Mr. Pitts, 48, a lifetime resident of Liberty City, is one of 36 fellows selected nationwide this year by the MacArthur Foundation. The estate of Chicago banker and philanthropists John D. and Catherine T. MacArthur also rewarded such varied talents as writer Susan Sontag and Stanford University Prof. Paul Ehrlich. Otis Pitts is in prestigious company.

As well he deserves to be. The former policeman has made a difference in Liberty City, where many failed and most declined even to try. His Tacolcy Economic Development Corp. has built low-income housing and commercial projects, both expanding the area's job base and enhancing the quality of life for residents. (Tacolcy stands for The Advisory Committee Of Liberty City Youth.) And he has done it his own way.

Mr. Pitts says he doesn't know yet what he'll do with the money. That's understandable, considering that the award was a gift out of the blue for which other, anonymous, parties nominated him. There are no strings; he may do with it as he wishes.

Eager to share credit with the many others who have participated in his projects, Mr. Pitts commented: "I feel it is something you never earn by yourself. It's a challenge to rededicate myself." Whatever he decides, you can be sure that poor, black Miamians' lives will be the better for it.

TRIBUTE TO CHAIRMAN HENRY GONZALEZ

HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. DREIER of California. Mr. Speaker, on July 15, the Los Angeles Times ran the following insightful article about our illustrious chairman of the Banking Committee, HENRY GONZALEZ. The article highlights a number of attributes that have made Chairman GONZALEZ one of the most interesting Members of Congress. At a time when many members of the Banking Committee receive less than favorable treatment from the press, this positive commentary is a tribute to the chairman's independence and fairness.

REPRESENTATIVE GONZALEZ: HE PACKS A PUNCH WHEN IT GETS TENSE

(By Paul Houston)

SAN ANTONIO.—When Rep. Henry B. Gonzalez slugged a knife-carrying man who called him a communist four years ago, it was nothing new.

The Texas Democrat once swatted a Republican House colleague for suggesting the same thing. And when Gonzalez's second grade teacher tried to wash his mouth out with soap for something he didn't do—angrily declaring that she was "getting tired of little Mexicans"—he smacked her too.

"I'm not prone to violence," the 74-year-old, barrel-chested Gonzalez insisted the other night over a dinner of chicken, beans, squash and tortillas served by his wife, Bertha. "But I came up the hard way. I've had to face a tense situation time and time again."

Though he hasn't thrown any punches lately, Gonzales is proving to be a tough fighter and key player as Congress grapples with a tense situation of a different sort trying to clean up the savings and loan mess, while starving off a similar collapse of banks.

Since becoming chairman of the House Banking, Finance and Urban Affairs Committee last year, Gonzalez has directed an extraordinary probe of the politically charged S&L scandal—including one brouhaha that led to the resignation of a top regulator and others that badly bruised five senators and Neil Bush, President Bush's son.

He also was a leader in toughening legislation that is now being used to close failed thrifts and bail out depositors. Currently, he is working on an emergency overhaul of federal deposit insurance, aimed at keeping the multibillion-dollar thrift crisis from spreading. And he is managing a massive housing bill whose scope and expense are sure to provoke battles with both the President and the Senate.

In all of this, Gonzalez's performance has confounded his many critics and delighted his friends. For most of his 29 years in Congress, Gonzalez was widely dismissed as a liberal loner with a quixotic taste for pursuing hopeless causes—a buffoon who couldn't control an assassination inquiry, an Uncle Tomas who was out of step with Latino militants and an eccentric who sometimes wore garish suits, made rambling speeches, told endless stories and—yes—even punched out an occasional critic.

So far was he from being a member of the congressional insiders club that he twice had to overcome campaigns to deny him House committee chairmanships, first of a housing subcommittee and then of the full Banking Committee. Capitol Hill-watchers say the moves were inspired partly by lobbyists, who were worried that Gonzalez's independent streak would make him difficult to deal with.

Today, however, while losing none of his distinctive character or style, Gonzalez has begun to win the grudging respect of the critics. Which merely proves, say longtime friends, how much he was underestimated and misunderstood in the past.

Friends remember his days as a San Antonio city councilman and Texas state senator, when they saw him as an eloquent, filibustering populist who throttled segregation measures and battled tax benefits for the rich. They recall him as a patently honest congressman who once stood alone among Texans in support of civil rights legislation and the New Frontier programs drafted by President John F. Kennedy.

They also revere him as a visionary, an insatiable reader and student of history whose warnings of German resurgence and allegations of illegal U.S. military interventions may be validated over time.

Many in the westside barrios here worship Gonzalez as an inspirational man of the people—the American-born son of Mexican immigrants who clawed past discrimination barriers to a law degree and lawmaking; a big-shot who lives modestly, mixes warmly with common folk and heaps affection on his eight children and 20 grandchildren.

"In a number of homes, there are pictures of John Kennedy in one corner and Henry Gonzalez in the other, and in the middle is the Vision of Guadalupe with a candle," said Frank Herrera, chairman of the Mexican-American Legal Defense Fund. "Henry B. has almost saint-like status."

Above all, Gonzalez is admired for his fighting spirit in the political arena.

"He'll take on a Mexican-American or an Anglo indiscriminately, and he'll pull you out into the middle of the street in full sunshine," said Maury Maverick Jr., a liberal San Antonio newspaper columnist and former state legislator who once competed with Gonzalez in a run for governor. "He's meaner than a riled cat when he goes after you."

As chairman of the Banking Committee, Gonzalez is credited with displaying fairness as well as toughness, in sharp contrast with his autocratic predecessor, Fernand J. St Germain (D-R.I.), who was defeated for reelection in 1988 amid charges that he maintained improper financial ties to the savings and loan industry.

"He started out as chairman saying he wanted to operate in a fair, bipartisan way as much as he could, and he certainly did that with the [S&L bailout] legislation and also the housing bill," said Rep. Chalmers P. Wylie of Ohio, the top-ranking Republican on the 49-member committee. "He's kind of a let-the-chips-fall-where-they-may individual."

Another Republican panel member, Rep. David Dreier of La Verne, agreed. "Philosophically, we rarely see eye to eye, but Henry has always allowed me the opportunity to offer amendments," Dreier said. "He is very kind and generous."

But the good feeling is not universal. Gonzalez has a feud going with Rep. Joseph Kennedy (D-Mass.) that began with his refusal to use the proxies of absent Democrats in favor of a Kennedy-sponsored amendment to an international banking bill.

"I lost my cool," Gonzalez conceded, referring to the run-in with the son of the late Robert F. Kennedy. But, he added: "Little Kennedy has a tendency to get excited."

Meanwhile, some Democrats complain that Gonzalez is too even-handed. They have pushed for the creation of a special committee that their colleagues could use during the election campaign to pile blame for the S&L scandals on the Republicans.

"How are you going to get those damn Republicans?" Gonzalez said he was asked by Rep. Paul E. Kanjorski (D-Pa.) at one point. His answer: "I think you have to be down-the-middle and patient."

With pressure mounting to contain the financial crisis, Gonzalez is mulling options to revamp the system under which deposits are federally insured up to $100,000. That system has been widely cited as a major factor in causing the S&L crisis. He has not yet proposed a remedy, but he has decried the way the insurance limit was raised from $40,000 in 1980.

"There was never one minute's consideration or hearing on that increase," Gonzalez says. "It took minutes. There was no debate."

As part of his own study of the matter, Gonzalez flew home over the Fourth of July congressional recess to solicit views from constituents. He makes such trips frequently, usually presiding at sessions in restaurants. His image is underscored by his unforgettable head: a magnificent landscape of cavernous eyes and mouth, mountainous nose, bushy eyebrows and deep, undulating facial creases.

Over lunch with members of a business establishment that once virulently opposed him, Gonzalez heard warm words of support for his S&L work. But the businessmen expressed concern that land values were being depressed and that credit is drying up because of new federal regulatory actions involved in the cleanup. "The backbone of the country"—small business—"is being crushed," developer Jack Rich said.

Gonzalez responded quietly that "the S&L crisis is really a symptom of a larger problem. Everybody is yelling: 'Pass a law, get the crooks.' But it's not that simplistic. The big issue is the insurance fund. We've simply got to find out how we got to the point we are today." He offered no immediate solutions, saying action probably would have to wait until a new Congress convenes in January.

In conversations later, the businessmen praised Gonzalez's work and integrity. "He's done a good job establishing a forum in which everyone can be heard," said Gerry Solcher, a former S&L president who lives near Gonzalez and often spots his neighbor mowing the lawn.

Added real estate executive Cliff Morton: "He damn sure researches his position before he jumps out on something. And you might be one of his closest friends, but if you are involved in something wrong, he is not going to cover for you. His ethics are impeccable."

Gonzalez accepts relatively little campaign money from special-interest political action committees. The $215,000 that he has received over the last eight years is only one-seventh as much as Senate Banking Committee Chairman Donald W. Riegle Jr. (D-Mich.) accepted.

Gonzalez's assets are modest: a two-story brick house and a savings account with less than $2,500 in it, according to his financial disclosure report.

Gonzalez cements the support that he gains on issues by paying close attention to local problems.

"He's always fighting to get jobs here, especially at Kelly [Air Force Base] and Ft. Sam [Houston]," said Martin Trevino, a bus driver. Tito Chavarria, president of Alamo Technology, a defense contractor, lauded Gonzalez for swiftly helping his firm resolve a dispute with government auditors. And grocery wholesaler Wilson Toudouze said the congressman has "uncovered a lot of scandals" in Texas and Washington, and "we're hoping he gets some more big fish in the S&L mess."

There are dissenters, of course. Businesswoman Barbara Maras, suggesting that Gonzalez should be replaced, said: "With new blood comes new ideas. a few radical ideas couldn't hurt at this point."

But Gonzalez has proved unbeatable, waltzing off with 71% of the vote two years ago. When he first ran for the House in a 1961 special election, though, he scraped by with only 55%. But it was an extraordinary victory: Gonzalez figures that less than 10% of the total came from Latino and black voters, who faced severe barriers at the polls.

A colorful storyteller with near-total recall, Gonzalez relishes describing how Republicans tried to defeat him in that first race by bringing in former President Dwight D. Eisenhower to campaign at rallies where free tamales and beer were served.

Ignoring cries of panic from his family and staff, Gonzalez decided to "store my energy for a last push." Without telling anyone, he took a blanket, pillow, loaf of bread and book of poems to a hill north of town and camped out for two days while Ike created a sensation.

When he returned, Gonzalez produced his friend, then Vice President Lyndon B. Johnson, to endorse him for the congressional seat, declaring: "I'd rather have a live and kicking vice president campaign for me than a has-been President."

And when he learned that Ike had flown into San Antonio on an oil-company plane and was staying at the home of an oil millionaire, the fiery populist had just the issue he needed.

Gonzalez, who proudly recalls his first grade teacher telling him he was "an American, not a Mexican," attributes to his broad voter appeal in part to refusing to run on ethnic issues. He alienated Latino militants by opposing creation of a separate La Raza Unida party, and he stirred up friction by dropping out of the congressional Hispanic Caucus—ostensibly in protest of the organization's fund-raising and dues-paying practices.

Actually, it was more than that. "Isolating oneself in the tribe means strangulation," Gonzalez said in declaring his belief that Latinos should seek opportunity within the general framework of American society.

In that context, Gonzalez's image has come a long way from the day in 1963 when he punched then-Rep. Ed Foreman (R-Tex.) for accusing him of being a "pinko" supporter of communist causes. Today, another conservative, Rep. Wylie of Ohio, considers Gonzalez a solid American.

"He talks about his family a lot and that has a lot of appeal to me," Wylie said. "I think he has his head screwed on right as far as the values which make our country great are concerned."

THE SENIOR EXECUTIVE SERVICE IMPROVEMENTS ACT OF 1990

HON. GERRY SIKORSKI

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. SIKORSKI. Mr. Speaker, in recent years, reports and surveys, hearings and conferences have all documented a "pending crisis," a "looming crisis," a "quiet crisis," in the Federal Civil Service. It threatens the ability of the Federal Government to function effectively—from neighborhoods across the country where entry level employees directly serve our citizens, to the top rung of the Senior Executive Service [SES] ladder. It will come if we are unable to attract and retain qualified top level senior executives. Without the expertise and leadership of America's best and brightest, it will be very difficult to manage the Government's 3 million workers and handle our Nation's $1½ trillion operation—now and in the 21st century.

Over a decade ago, the Senior Executive Service was created so that the U.S. Government would have a corps of top management leaders to provide the most highly motivated and highly competent Federal service leadership in the world. Unfortunately, due to political constraints, unfriendly administrations, budget cuts, and salary caps, we have failed to match the promise of the Civil Service Reform Act of 1978 with the reality of the Senior Executive Service in 1990.

In a recent Merit Systems Protection Board survey, 70 percent of former Federal executives believed that the Government has not established, as the law provides, a compensation system to attract and retain highly competent executives. Additionally, many former ex-

ecutives also believe that we have failed to achieve important nonmonetary objectives governing the operation of the Senior Executive Service.

Last November, we tried to address some of the compensation concerns of senior executives with the passage of the Ethics in Government Act of 1989. Today, I am introducing legislation, the Senior Executive Service Improvements Act of 1990, that addresses several of the nonmonetary concerns raised about the Senior Executive Service.

The legislation aims to reinforce the "rank in person" concept, the idea that an SES member's rank is related directly to their experience, capabilities, and performance, rather than the specific position they hold. The legislation will prohibit Federal agencies from forcing SES members to accept a reduced grade or pay level in order to fill a different position or to participate in sabbaticals.

The legislation will require general schedule employees, when promoted to the SES, to be placed in a SES pay level that is at least equivalent to the pay they were receiving before promotion to the SES.

Currently, only 3 percent of the entire career SES payroll is available for bonuses. In a recent Merit Systems Protections Board survey, 67 percent of former senior executives felt that not enough performance bonuses were available for career senior executives. This bill will boost the amount available to 10 percent, and up to 40 percent of this bonus pool can be used to combat recruitment and retention problems. Bonuses will also be made available to ease geographic relocation for career Federal executives. Additionally, the legislation will change statutory dollar amounts of SES rank awards to percentages of a career appointee's annual pay. The percentages used—20 and 40 percent—correspond to the percentages of annual salary represented by the dollar amounts originally legislated.

The legislation will also assure the career senior executive that they will have 120 days to work under a new noncareer supervisor who has the responsibilty for the careerist's performance evaluation. Currently, an employee may have little contact with a new noncareer supervisor and thus does not have a fair oppotrunity to prove their value in the position held.

The legislation will also require the Office of Personnel Management to determine a minimum number of hours for continuing professional education for both career and noncareer members of the SES. Today, continuing education is critical to the improvement of productivity, management ability and department morale. Additionally, it is vital to require continuing education due to the recently proposed regulations for recertification taking into consideration continuing education and training for executives to be recertified.

Finally, the legislation will allow the Merit Systems Protection Board to mitigate unreasonable penalties taken against SES employees. The legislation gives MSPB jurisdiction to mitigate penalties in conduct cases involving members of the SES just as they have for actions against other Federal employees in the Civil Service.

Mr. Speaker, as we rapidly approach the 21st century, the demands placed on senior executives will become greater and greater. With every new law passed, every new computer installed, every iron curtain falling, and every foreign purchase of American land and resources, the demand for an American Senior Executive Service that is increasingly flexible, talented, and knowledgeable itself increases.

Americans rightfully demand and expect a dedicated, talented, and competent corps of senior executives who will faithfully discharge the responsibilities of our democratic society. However, it is absolutely critical that we provide our Nation's senior executives with the tools necessary to achieve this goal. As we have seen and heard in reports and surveys, task forces and conferences, our original goals of the Civil Service Reform Act have not been met. This Senior Executive Service Improvements Act is intended to provide the Government with the tools necessary to make the original promises of the Senior Executive Service a reality.

ACHIEVEMENT AGAINST THE ODDS

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. PORTER. Mr. Speaker, I want to call Members' attention to a unique and inspirational program held recently in Washington. On May 4, 1990, the Allstate Foundation and National Center for Neighborhood Enterprise sponsored the First Annual Achievement Against the Odds Awards Program. The program recognized low-income Americans who overcame social, economic, and physical barriers to establish productive lives within their communities. The program sponsors sought to counter the myth that low-income Americans have no chance for success.

This year's award recipients came from a wide range of backgrounds, and each has risen above adversity through his own individual self/help approach. The honorees were Charles Ballard from Cleveland Heights, OH; Bobby Drayton from Washington, DC; Alfredo Garcia from San Antonio, TX; Cheryl Hayes from Milwaukee, WI; Kathleen Johnson from Montclair, NJ; Vivienne Thomson from Jamaica Plain, MA; and Brad Linnenkamp from Shawnee, KS. These outstanding individuals have demonstrated that hard work and perseverance can overcome daunting obstacles in their quest for success.

The Allstate Foundation proudly sponsored "Achievement Against the Odds." Established in 1952, the Allstate Foundation is the philanthropic branch of the Allstate Insurance Co. which funds national and local programs in three focus areas of health, neighborhood revitalization, and education. The foundation is one of the largest corporate foundations in the Chicago area and an active participant in national grantmaking.

The National Center for Neighborhood Enterprise [NCNE] developed the awards program in order to give low-income people the support they deserve and need. The NCNE is a research, demonstration, and development organization dedicated to the idea that communities must use their own strengths to successfully deal with economic and social problems.

The Achievement Against the Odds Program featured Secretary of Housing and Urban Development [HUD] Jack Kemp and the chairman and CEO of Allstate, Wayne Hedien. Mr. Hedien's remarks captured the spirit of the evening and I am proud to have them reprinted here for your consideration.

The remarks follow:

ACHIEVEMENT AGAINST THE ODDS

(Remarks by Wayne E. Hedien, Chairman and Chief Executive Officer, Allstate Insurance Co.)

When we talk about achievement against the odds, we probably have to include this program itself.

When Bob Woodson told me last July about his concept for these awards, the whole plan seemed a little ambitious.

He said there would be a national search for exceptional, but unheralded, people who had overcome adversity and gone on to help others. There would be a ceremony at the White House, and a big banquet honoring individuals chosen by a blue ribbon panel.

And the whole thing would happen within nine months.

Well, we at Allstate knew Bob Woodson and the National Center for Neighborhood Enterprise. We have worked together on various programs. We know how effective, and persuasive, Bob and his people can be.

Besides, from the beginning we liked the idea of honoring real people for their real and inspiring stories of extraordinary accomplishment. So the Allstate Foundation signed on right away.

Before long, other organizations were involved. Important people were lending their support. Tonight's program is really a tribute to them, and to literally hundreds of others who offered their help and encouragement.

But above all, tonight is a tribute to the seven exceptional people you will meet in a few minutes.

Their stories are different. They come from different cities, and they have overcome different kinds of obstacles.

But in learning a little about their lives, and again in meeting them tonight, I was struck by something they all have in common.

They all seem to have a wonderful "blind spot." When these achievers look at a situation, they simply refuse to see what others regard as overwhelming obstacles.

There is a telling story about Jackie Robinson—definitely a man who achieved greatness despite the odds. On the morning he became the first black baseball player in Major League history, Jackie kissed his wife goodbye at their hotel.

"When you come to the game, you won't have any trouble spotting me," he said. "My number's 42."

Now, I think it's safe to say that his uniform number was not the first thing most people saw when Jackie Robinson took the field that day. But it was how Jackie saw himself.

He was a ballplayer. A Brooklyn Dodger. Number 42. If other players, the fans or the press wanted to focus on something else, that was their concern.

Tonight's achievers have pursued their own goals with that same disregard for the doubts of others.

Like Jackie Robinson, who went 0 for 20 his first week in the majors, they've also shown uncommon persistence.

And once they've achieved their dreams, they've been equally determined to help others do the same.

In the epilogue to his autobiography, Jackie Robinson wrote, "A life is not important, except in the impact it has on other lives."

Because they believe in that idea wholeheartedly, tonight's achievers have become role models in their own right.

They have given much to their communities. But the most significant contributions they've made are the examples they've set.

The message of their lives, and of this award, is that perseverance still pays.

That caring is still contagious.

And that success still means more when it's shared with others.

NATIONAL DRIVE FOR LIFE WEEKEND RESOLUTION

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. MINETA. Mr. Speaker, today I introduce a resolution which asks all Americans to pledge to be responsible for driving sober during the Labor Day weekend, September 1 through 3, 1990, and throughout the year.

Drunk-driving related crashes are traditionally at their peak during the Labor Day weekend. This resolution, by bringing to the public's attention the need for a commitment not to drink and drive, can have a significant effect on reducing fatalities on our Nation's highways.

The National Drive for Life campaigns in previous years have proved to be a great success for all Americans: fatalities in drunk-driving-related crashes on Labor Day weekend have been reduced around 30 percent.

We in Congress can support grassroots efforts to save the lives of more Americans again this year by the adoption of this resolution.

Labor Day weekend is just around the corner, and I urge all Members to cosponsor this resolution.

THE PALO ALTO BATTLEFIELD SITE

HON. SOLOMON P. ORTIZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. ORTIZ. Mr. Speaker, I rise in strong support of a bill I am introducing today that would expand the boundaries of the Palo Alto Battlefield National Historic Site.

The Palo Alto Battlefield is the site of one of the two most important battles of the Mexican-American War fought on American soil in 1846. The historical significance of this war was great, as it led to the signing of the Treaty of Guadalupe-Hidalgo in 1848, granting the United States the land from the Gulf of Mexico to the Pacific Ocean. This caused the retreat of Mexican sovereignty from the territories they occupied in the West, and encouraged the expansion of United States settlement in that direction.

The commemoration and interpretation of the battle of Palo Alto and the Mexican-American War is strongly supported by individuals and groups within the Brownsville, TX area and within Mexico.

I would like to especially recognize the vision and leadership shown by Albert Alfonso Champion, without whose historical research and documentation the actual battlefield may have been forever lost to future generations.

It is fitting to commemorate the bravery of all who fought there by preserving this landmark in the spirit of international amity with the United States of Mexico. The battle fought on this field represents the rupture of relations between the United States and Mexico, which are still in the process of healing today, and remind us that we must strive for brotherhood, unity and peace with our neighbors to the south.

Two future Presidents served in this campaign: Gen. Zachary Taylor was in charge at the time of this battle and Lieut. Ulysses S. Grant gained valuable experience during this war that he would later use to lead the Union Forces in the American Civil War.

This war served as a test case for the first West Point-trained soliders, and the U.S. Army's success assured the Academy's continued funding.

It was during this battle that the U.S. Army explored the use of light and heavy artillery rather than large cavalry and infantry maneuvers, and explosive shells against the Mexican Army's solid shot; these new battle techniques contributed to the development of American warfare.

The Mexican-American War was the first to be reported by telegraph. Also, this was the first war in which railroads and steamboats were used to transport troops and war supplies. U.S. Army surgeons introduced ether as an anesthetic for the wounded, and combat photography made its debut. Samuel Colt's new revolver was introduced into the fight, resulting in a major contract for his company with the War Department. The occupation of Matamoros, Mexico during the war led to the development of nearby Brownsville as an important military/economic center.

There has been a great desire on the part of Mexico to preserve this area in order to commemorate the site in honor of those Mexicans who perished in the battle of Palo Alto. It is probable that both Mexican and American remains are buried on this site. Anthropological exploration of the area indicates that many artifacts dating from the battle still remain undiscovered. As a benefit for historic research purposes, the landscape, setting, and ground cover remain largely undisturbed, and alteration of the terrain has been minimal. It would be desirable to protect this historic area in light of the archaeological evidence that in all probability lies below the battle site.

Presently, there is an upright cannon that memorializes the site, set up in 1914 by Gen. James Parker of the First Cavalry Brigade at Fort Sam Houston. In 1893, a local Brownsville patriotic group erected a marble marker which later disappeared. It was reported that two Mexican survivors of the battle were in attendance at the ceremonies.

It is my hope that necessary funding will soon be provided to implement proposed activities at the site which will enhance visitorship.

I urge my colleagues to join me in supporting this important legislation.

CHARLES H. BUDDEKE III: "KEEPING THE PEACE"

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 19, 1990

Mr. MAZZOLI. Mr. Speaker, I commend to the attention of my colleagues the following article, entitled "Keeping the Peace," written by Charles H. Buddeke III, which appeared in the July 1990 edition of Louisville Magazine.

Mr. Buddeke reviews America's current defense posture based on his observations as a participant in the U.S. Defense Department's Joint Civilian Orientation Conference. Then, he offers some suggestions for a future U.S. defense posture.

I would also like to brief my colleagues about the author. At the end of October, Charles Buddeke will step down as the president of the Louisville Chamber of Commerce, a position he has held for nearly 2 years. He also served as executive vice president of the Greater Louisville Economic Partnership and executive director of the Louisville-Jefferson County Office for Economic Development.

After many years helping Louisville and Jefferson County existing businesses and in the field of attracting new businesses, Charles Buddeke is returning to private life, but I am pleased he will remain active in our locality's economic activities.

KEEPING THE PEACE

(By Charles H. Buddeke III)

This month's story about Fort Knox and the Naval Ordinance Station, by Eric George, may be labeled a history column, but it touches almost as much on current events as it does on the past. While it's interesting to look back at how these military facilities developed, it's equally important to look at what the future will hold for them.

Recently I had the opportunity to participate as one of 50 people in the U.S. Department of Defense's Joint Civilian Orientation Conference (JCOC). The purpose of JCOC is to give civilians a comprehensive review of Department of Defense issues and a firsthand look at the people and equipment in today's armed forces.

One thing the trip accomplished was to illustrate how the recent chain of events in Europe has affected the United States and how, in turn, the Louisville area may be affected. The tone was set the first day by Secretary of Defense Dick Cheney, by members of the Joint Chief's of Staff and by Department of Defense officials. All are keenly aware that the world is changing and appear to be trying to change with it.

While visiting Air Force, Navy, Marine and Army installations all across the country over the course of a week, I came to realize that there are two key elements essential to the defense of this nation. One is high technology; the other is the high quality all-

volunteer personnel. We've spent enormous amounts of money on both. Recent events in Eastern Europe indicate that the money spent has been a wise investment in promoting peace and democracy. The question becomes: Is the world now safe enough to reduce our multi-billion-dollar military budget and our two-million-person armed forces?

To answer this question, let's first look at the Soviet Union. We've fought an economic war with the Russians for the past 40 years. It's too soon to tell if we've won or if there's just a cease-fire in effect. The Soviets still have thousands of nuclear weapons pointed at us; that alone makes them a superpower threat. And their economy is in shambles, so they should be watched very carefully. We don't want history to repeat itself. No one wants another post-World War I German debacle. That economy fell apart, allowing a facist dictator to seize control. If, on the other hand, the Soviets withdraw their troops from Eastern Europe, and newly elected governments and decentralized market-based economies are allowed to develop, we may be able to breathe a sigh of relief.

The other threats to watch are what the Department of Defense calls 'low-intensity conflicts.' It's estimated that before too much longer, 15 countries will have cruise missiles. What type of deterrence is needed to counter such dangers?

CUTTING AND KEEPING

At the Pentagon and at the bases we toured, we heard time and time again about plans for a manageable reduction of our military forces. The trick is cutting back while still retaining enough trained, experienced people to maintain our readiness should something upset the balance of peace. We also need to examine whether or not we have some obligation to the men and women who stepped up to volunteer for a career when the draft was eliminated. Obviously they didn't do it just for the money. The ranks are full of well-trained, dedicated noncommissioned and commissioned officers who will be hard to replace quickly in a time of crisis. Allowing some of our state-of-the-art equipment to become obsolete would be equally risky.

Locally, we need to keep a close eye on what happens in Washington because, as mentioned in George's column, an estimated 7,200 jobs in the Louisville area are at stake. The fact is that Fort Knox and the Naval Ordnance Station can be proud: They haven't been living in the past; they've kept up with the present and are looking to the future by utilizing the latest technology to maximize the efficiency of their operations. The United States needs these facilities as much—if not more—than our local economy needs them.

The key to the free world and our country's future defenses lies in the decisions made in the next few years. Let's hope they are made with wisdom, by applying our best knowledge and hard-won experience. Congress needs to give the president and the secretary of defense time to analyze what's happened in history and what's happening now so they can adjust our forces accordingly.

In the meantime, while looking at the bigger picture, we should remember a quote from Secretary Cheney: "The peace dividend is peace."

SENATE—*July 20, 1990*

(Legislative day of Tuesday, July 10, 1990)

The Senate met at 8:45 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

The PRESIDENT pro tempore. As we reverence our Heavenly Father, the Senate will be led in prayer by the Reverend Richard C. Halverson.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

*Who can find a virtuous woman? For her price is far above rubies. The heart of her husband doth safely trust in her * * *. Her children arise up, and call her blessed; * * * a woman that feareth the Lord, she shall be praised.*—Proverbs 31:10, 11, 28, 30.

Gracious God, "Giver of every good and perfect gift," with gratitude we praise Thee for a remarkable lady, Mrs. Rose Kennedy, as she with her family celebrates her 100th birthday Sunday. We thank Thee for the strength of her Catholic faith and conviction—for her life of dedication and tough love which sustained her and strengthened family in adversity and tragedy. Thank Thee for her faithfulness, perseverance, resilience in the loss of three sons, Joseph by war, John and Robert by assassination. With family, a multitude of friends and admirers we rise up to call her blessed and express our appreciation for the inspiration of the life of one of the truly great women of the century. May Thy richest blessing abide upon her and her loved ones. In the name of Jesus her Lord whose Mother she cherished. Amen.

RESERVATION OF LEADER TIME

The PRESIDENT pro tempore. The Chair understands that the leadership time has been reserved by previous order.

MORNING BUSINESS

The PRESIDENT pro tempore. There will now be a period for the transaction of morning business.

THE 1990 MID YEAR REPORT

The mailing and filing date of the 1989 Mid Year Report required by the Federal Election Campaign Act, as amended, is Tuesday, July 31, 1990. All principal campaign committees supporting Senate candidates in an election year other than 1990 must file their reports with the Senate Office of Public Records, 232 Hart Building, Washington, DC 20510-7116. Senators may wish to advise their campaign committee personnel of this requirement.

The Public Records Office will be open from 8 a.m. until 9 p.m. on the filing date for the purpose of receiving these filings. In general, reports will be available 24 hours after receipt. For further information, please do not hesitate to contact the Office of Public Records on (202) 224-0322.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

TRIBUTE TO WILLIAM PETERSON

Mr. DURENBERGER. Mr. President, I was saddened to note the passing of William Peterson, a reporter on the national staff of the Washington Post.

I had the pleasure of knowing Mr. Peterson. He ably covered health issues, and my 1982 election campaign in Minnesota.

Mr. Peterson was born in San Luis Obispo, CA, but called Osakis, MN, his hometown. He was a 1965 graduate of Hamline University in St. Paul. William Peterson was the Post's Chicago correspondent and, as such, covered a variety of stories in Minnesota. He is remembered by many friends and family in Osakis, Alexandria, and St. Paul. I extend condolences to them, his wife, Linda Peterson of Chicago, and his sons, Chad and Mark.

Mr. President, I ask unanimous consent that the following article, the obituary for William Peterson which appeared in the July 19 edition of the Washington Post, appear at this point in the RECORD.

There being no objection, the obituary was ordered to be printed in the RECORD, as follows:

[From the Washington Post, July 19, 1990]

POST NATIONAL REPORTER WILLIAM PETERSON DIES

(By J.Y. Smith)

William R. Peterson, 47, a reporter on the national staff of The Washington Post who had been the newspaper's Chicago correspondent since 1987, died of cancer yesterday at Georgetown University Hospital.

Mr. Peterson joined The Post in 1975. Whether he was writing about politics, which was his main subject, or poverty in the Third World or small towns in the Midwest or some subject that just caught his attention in passing, his chief interest was how things worked and how people lived—how the different parts of the world were related to the whole.

In announcing his death to the staff, Managing Editor Leonard Downie Jr. said, "Behind his uncommonly graceful writing style and engaging professional manner was a hard-digging reporter and sharp analytical mind, all of which we will miss. But, most of all, we will miss one of the nicest guys anyone had ever met in this business."

Characteristic of Mr. Peterson's work was his account, in the spring of 1980, of the end of George Bush's two-year quest for the Republican presidential nomination, when Bush conceded to Ronald Reagan:

"He was the comeback candidate. No one took more beatings. No one went to the mat more often. No one bounced back with more tenacity and grace. Even in the end, he didn't want to quit. He agonized over it for days. But finally, he accepted what the numbers told him—that he was finished. . . .

"Always there were those who doubted his motives. First he was accused of being a stalking horse among moderates for former president Gerald R. Ford. Then he was accused of being interested only in the vice presidency. Bush steadfastly denied interest in the vice presidency and repeated it yesterday in his press conference. But his name can be expected to be more frequently mentioned as a possible Reagan running mate."

Mr. Peterson's coverage of the 1986 Florida campaign between Gov. Bob Graham (D) and Sen. Paula Hawkins (R) for the U.S. Senate was an important examination of politics of the 1980s and perhaps of the 1990s. What emerged was a profile of the politics of image, in which the determining factors are the 30-second television spots, sound bites, media consultants and enormous sums of money, and in which constituents almost never speak to candidates, except through polls, and in which substantive issues often seem to be ignored.

In January 1988, Mr. Peterson reported from Osakis, Minn., a town 120 miles northwest of Minneapolis, where the prairie meets the lake country, and where he had grown up:

"Jesse Jackson came to my hometown yesterday. It was, Mayor C.J. Moore proclaimed, 'the biggest thing that had ever happened' in this snow-covered town of 1,326. No one knew what to expect. A presidential candidate had never visited Osakis

(pronounced O-say-kiss) before, and the last time some residents saw a famous black man up close was in 1963 when the 'Inkspots' performed at the local high school.

"But this resort and farming town went wild over Jackson. The Community Center was filled to its capacity of 310 a full hour before Jackson arrived. . . . The Republicans jostled with Democrats when [Jackson] arrived in the 8-degree-below weather. . . . And insurance agent Mike Mathews placed his son Steve—wearing heavy leg braces—in the front row at the Community Center. He beamed when Jackson embraced the boy."

In 1978, Mr. Peterson traveled for two months in India, Pakistan, Indonesia, Guatemala and Tanzania to report on poverty in the Third World. He had never before been outside the United States, and this seemed to give a special freshness to his observations of the disadvantaged who make up "The Global Majority," the title of the articles he wrote.

Mr. Peterson was born on April 24, 1943, in San Luis Obispo, Calif. He graduated from Hamline University in St. Paul in 1965. He studied at American University, and in 1967 received a masters' degree in journalism from Northwestern University.

He then joined the Louisville Courier-Journal, where he covered politics. He also wrote a book, "Coaltown Revisited: An Appalachian Notebook" (1972).

At The Post, he began as a reporter on the Metro weekly staff and then covered Maryland. He joined the national reporting staff in June 1977.

Throughout his career, Mr. Peterson enjoyed writing topical pieces just because they were interesting, and his assignment in Chicago provided many opportunities for this kind of story.

So he reported on the introduction of riverboat gambling in Iowa, a radical departure dictated by the lagging economy in that normally strait-laced state; about a French restaurant and bowling alley in the farming community of Arcola, Ill., where some people go for the food and not the bowling, some people go for the bowling and not the food, and some people go for both.

Mr. Peterson was found to have lung cancer in the autumn of 1988. In March, just before undergoing surgery, he told a colleague that if he did not survive the procedure he wished it to be noted that his last story, a profile on Rep. Gus Savage, a Chicago Democrat, had appeared on Page 1 of that day's Post. In fact, his last story, about Chicago Mayor Richard M. Daley, appeared last month.

Mr. Peterson lived in Chicago and flew to Washington Monday to see friends and colleagues. He also had a home in Alexandria.

Survivors include his wife, Linda Peterson of Chicago; two sons, Chad Peterson of Washington and Mark Peterson of Chicago; his mother, Jeanette Susens of Osakis; three brothers, Kenneth, Michael and Timothy Peterson, all of St. Paul; and a sister, Helen Ann Wagner of Alexandria, Minn.

IN SYMPATHY FOR JESS STUMP, FATHER OF CONGRESSMAN BOB STUMP

Mr. DECONCINI. Mr. President, I would like to express my sincere sympathy to Congressman BOB STUMP on the death of his father, Jess, on July 18, 1990. Having lost my own father not many years ago, I can personally empathize with the sorrow one experiences on the loss of a loved parent. My wife Susie and I send our heartfelt condolences and our prayers to the Stump family.

Jess Stump was born in Nebraska in 1900, but moved to Arizona in 1908 when the family transferred its cotton farming operations to Phoenix. He was one of seven brothers and one sister.

Jess Stump, who attended Phoenix College, served on the Murphy School Board. He was elected to the 21st and 22d Arizona Legislatures, serving in the House of Representatives. During his tenure, Jess served as chairman of the House Agriculture and Irrigation Committee and on the Rules and Education Committees. In addition to being an active member of the Seventh Day Adventist Church, Jess was a member of the Lions, the Arizona Farm Bureau, and the Arizona Cotton Growers.

Jess Stump was married to Floy B. Field (1925-61) and Olive M Lewis (1961-89). He is survived by one brother, Judge Alfred Stump of Lodi, CA, two children, my colleague from Arizona, Congressman BOB STUMP, and Patricia Stump, six children and eight great-grandchildren.

In the early 1900's, Arizona was not yet a State and had not been discovered as an idyllic place to live by the rest of the country. At that point in Arizona's history, virtually everyone in Arizona was considered a neighbor. And the Stumps, the Hurleys, and the DeConcinis have been neighbors and friends for the better portion of this century.

My wife's family, the Hurleys, and my family have known the Stump family for many years. Susie's family had the longer relationship, both families having pursued their livelihoods in agriculture when Arizona was truly a frontier. The DeConcini family relationship extends back to the late forties when my father, Evo DeConcini, served as a justice on the Arizona Supreme Court and Jess Stump served as a member of the Arizona State Legislature. The Stump/DeConcini political relationship has continued to today with BOB STUMP and I serving as colleagues in the Arizona congressional delegation since 1976. More important, however, is that our family relationships have endured throughout the ensuing years.

The Hurleys and DeConcinis, who were enriched for having known Jess and his family, all mourn his passing. Jess Stump epitomized the best in the West—from his rugged individualism to his deep sense of caring for his family, his State, and his country. We shall all miss him. Once again, Susie and I express our sincerest sympathy to the entire Stump family in this hour of sorrow and loss.

CYPRUS GREEN LINE MUST FALL

Mr. PRESSLER. Mr. President, I rise today to speak on the tragic division of Cyprus, a country that has been illegally occupied for the past 16 years by Turkish troops.

The opening of the Berlin Wall and the shifting political situation in Eastern Europe have raised hopes for a freer, more democratic world. Nobody predicted the swiftness of these dramatic and significant changes. Yet the strong winds of freedom that toppled the Berlin Wall are but a faint breeze in parts of the Eastern Mediterranean island of Cyprus.

On Cyprus, the U.N.-controlled Green Line, a line of barbed wire, mines, and heavily armed Turkish troops has separated the Greek Cypriot community from the Turkish Cypriot community since 1974, when troops from Turkey invaded the island. Today, 35,000 Turkish troops remain in Cyprus patrolling the Green Line and ensuring the continued division of Cyprus. The Turkish Government blatantly ignores the rule of law by continuing the occupation, despite the international community's numerous calls for the troops' removal.

The Green Line runs through the center of Cyprus, but unlike the Berliners, the Cypriots are still prohibited from moving freely in their own country. Two hundred thousand Greek Cypriots are unable to cross the Green Line to return to their homes and businesses which were seized during the invasion. The Greek Cypriots wonder about the fate of 1,619 persons—including American citizens—who have been missing since the invasion. The Green Line is odious to the Turkish Cypriot community as well. It deprives them of economic exchange with their fellow Cypriots and with other nations—except Turkey, which subsidizes 60 percent of the occupied zone's economy. This is the tragedy of Cyprus.

There is hope. Like the East and West Germans, the Greek and Turkish Cypriots desire an end to the partition of their island; the status quo of division is unacceptable. This is especially true considering that the two communities have lived side by side for more than 400 years. Further, the United Nations recognizes only one Cyprus.

Unnatural boundaries and walls are intolerable and unacceptable. Foreign occupation troops have been withdrawn from Afghanistan, Angola, and Cambodia while Cyprus tragically stands alone as the only European country occupied by foreign troops. The presence of 35,000 heavily armed Turkish troops on Cyprus is a barrier to freedom.

Since August 1988, Cyprus President George Vassilious and Turkish Cypriot

leader Rauf Denktash have been negotiating under the auspices of the U.N. Secretary General, Mr. Javier Perez de Cuellar, in an effort to reunite the two sides. In July 1989, the Secretary General introduced a document containing concrete ideas as food for thought to help the two sides arrive at a framework agreement for a federal solution. The proposed constitution of a united Cyprus would provide for freedom of movement, freedom of settlement and freedom to own property within a framework agreed upon by the two sides.

Unfortunately, the Cyprus talks collapsed last March when the Secretary General was forced to declare an impasse because Mr. Denktash's insistence on using terminology that was contrary to the framework that all the parties had previously accepted. In contrast, President Vassiliou is anxious to resolve the conflict and is sincere in his belief to reach a just and lasting solution to the Cyprus problem.

For United States policy reasons, a solution to the Cyprus division is imperative. Although it is a small country about the size of Rhode Island, with a population equal to that of New Hampshire, Cyprus is strategically located in the Eastern Mediterranean—just 50 miles from the coast of Lebanon. Ending the partition would stabilize the entire region and end a major source of conflict between our NATO allies, Greece and Turkey.

To facilitate the goal of a unified Cyprus, the United States must continue to support U.N. Secretary General Perez de Cuellar in his efforts to reach a just and lasting solution to the Cyprus problem. With the beginning of this new decade, we must continue to find solutions and resolve difficult world problems. I urge the two communities to put the past aside and work in harmony for a brighter future for Cyprus. With encouragement from the United States, and the entire international community, the winds of change that toppled the Berlin Wall will sweep across Cyprus and heal the division there. The continuation of talks between President Vassiliou and Mr. Denktash would be a necessary and constructive step toward this goal.

RESOLUTION OF THE CYPRUS CONFLICT

Mr. PELL. Mr. President, it has been 16 years since the Turkish invasion of the island of Cyprus. As we have witnessed peace and cooperation triumph in all parts of the world, one cannot help but be struck by the glaring exception in the Eastern Mediterranean.

On July 20, 1974, the Republic of Cyprus was invaded by Turkey. Today, some 35,000 Turkish troops continue to occupy almost 40 percent of the territory of the republic. The occupation has been expanded by the transfer of some 82,000 settlers from mainland Turkey. United Nations' talks, once hailed as promising, have been shattered by the Turkish Cypriot leader's unacceptable demands.

Mr. President, as we remember today the 4,000 Greek Cypriots who lost their lives in the invasion and the 200,000 Greek Cypriots who became refugees in their own land, we must intensify our efforts to resolve the Cyprus question. I am deeply disappointed that the administration is either unwilling or unable to bring to bear the diplomatic, political and economic tools at our disposal to help resolve the Cyprus conflict. On March 23, I and four of my colleagues wrote to Secretary Baker asking that he personally take steps to elevate the Cyprus issue on the United States foreign policy agenda and that the administration begin utilizing our substantial leverage with the Turkish Government to bring about constructive negotiations on the issue of Cyprus. On April 2, I, along with 22 of my colleagues, wrote to President Bush urging that he make it clear to all parties that a Cyprus settlement is important to United States policy in the region. To date, there is little evidence that the administration is doing all it can to further a negotiated settlement.

In fact, there are disturbing indications that the administration may be wavering in its stated policy toward the illegal Turkish occupation of northern Cyprus. Both the tone and content of President Bush's June 22 report on the situation in Cyprus, required by law, and the apparent acquiescence of the administration to transferring responsibility for the security of Famagusta to Turkish Cypriot troops leave the unfortunate impression that the United States Government is conferring some level of legitimacy to the self-proclaimed, pseudo-state in northern Cyprus.

Mr. President, the international community has taken a strong stand against Turkey's armed occupation of Cyprus. The U.N. Security Council, the U.N. General Assembly, the European Parliament, and the International Parliamentary Union are all on record in support of a peaceful settlement that will preserve the unity and the territorial integrity of the Republic of Cyprus. Most recently, the European Council explicitly linked a resolution of the Cyprus question to the Council's relations with Turkey.

The executive and legislative branches of our Government must join together to send a strong, unambiguous message to Turkey that the Cyprus crisis must be resolved. President Bush has stated that the status quo is not an acceptable solution to the Cyprus problem. It's time he backed up those words with deeds. It's time to seek not only to limit aid to Turkey, but to give serious consideration to cutting aid to Turkey entirely, until Turkey commits itself to a peaceful solution on Cyprus.

THE 16TH ANNIVERSARY OF THE INVASION OF CYPRUS

Mr. SARBANES. Mr. President, it is with deep regret that we find it necessary to observe another anniversary of the brutal invasion of the Republic of Cyprus. On July 20, 1974, heavily armed Turkish troops stormed the island, causing hundreds of thousands to flee their homes and bringing an abrupt end to Cyprus' brief history as an independent, democratic and unified republic. Since that date, Turkish forces have maintained the country's division by enforcing the illegal Turkish occupation of nearly 40 percent of the island.

This story is rendered even more tragic by the fact that, to this day, the consequences of the invasion continue unabated. Some 200,000 Greek Cypriots who were forced to flee their homes in the north remain refugees in their own country, an entire generation having now nearly reached maturity with no memories of the towns and communities where generations of their ancestors were born. The beautiful coastal city of Famagusta remains off-limits to its former inhabitants, a ghost town under military control; 2,000 persons who disappeared during the invasion are still missing and unaccounted for, their relatives' prayers and pleas for any evidence or information as to their fate unanswered. Turkey still maintains a large occupation force on the island, heavily armed. Rather than having the possibility of devoting themselves to the challenge of building a democratic and prosperous society, the citizens of Cyprus are condemned to the task of coping with the grievous damage of the 1974 invasion.

The experience of the people of Cyprus has been particularly embittered by events of the past few months, as U.N.-sponsored efforts to achieve a just resolution to the Cyprus problem have collapsed due to intransigence on the part of Turkish Cypriot leader Rauf Denktash. Hopes that President Vassiliou's bold initiatives would bring new vitality to the negotiating process have been heavily dampened by Denktash's refusal to remain within the established conceptual framework of the talks. Important opportunities for progress have been squandered through the failure of Turkish Cypriots to reciprocate President Vassiliou's efforts to demonstrate flexibility and openness to new approaches.

Mr. President, I urge the Bush administration to make it clear beyond

any doubt that neither the status quo nor partition of the island can be considered an acceptable solution to the Cyprus problem, and I continue to urge that achievement of a negotiated settlement on Cyprus be made an even higher priority on our national agenda. As we recall the tragic events of 1974, our thoughts turn to the people of Cyprus, who must struggle on a daily basis to live with the invasion's bitter legacy. In an era of unprecedented change around the world, with successful examples of peacemaking evident in so many different regions, we must do everything in our power to bring new hope for peace and justice on the island of Cyprus.

WE MUST END THE DIVISION OF CYPRUS

Mr. DECONCINI. Mr. President, today is an unfortunate one for it marks the 16th anniversary of the invasion of Cyprus by Turkish troops, and nearly two decades of suffering and anguish for the original citizens of Cyprus. Today 35,000 Turkish troops and 82,000 Anatolian settlers illegally occupy almost 40 percent of Cyprus, preventing more than 80 percent of the ethnic Greek residents of the island from returning to their ancestral homes on the eastern side of the island. This cruel isolation and division have created nearly 200,000 Cypriot refugees in their own land, forcing them to leave behind land, homes, and personal property worth millions. In addition, the Turks have tried to completely rid their occupied areas of all items of Greek-Cypriot cultural and religious heritage, including the desecration of ancient Greek Orthodox Churches.

Currently, the United States provides Turkey with half a billion dollars annually in foreign assistance. Some of this aid may be being used by the troops occupying Cyprus contrary to the expressed direction of Congress. I strongly oppose this occupation that both the United States and the United Nations have called illegal and morally unjustifiable. Our aid, however, gives us great leverage with the Turkish leadership as we try to encourage a peaceful settlement to their military occupation of this island nation.

At the present time the talks between President Vassiliou of the Republic of Cyprus and Rauf Denktash, the Turkish-Cypriot leader, have stalled. We in the United States need to call upon President Vassiliou and Mr. Denktash to begin a new round of negotiations to bring about a peaceful resolution to this needless conflict between two U.S. allies. The Secretary General of the United Nations, Perez de Cuellar, has been actively using his good offices in attempting to resolve this issue. I applaud these efforts and urge President Bush to use his power and influence to revive these negotiations so that we will see that the basic rights of freedom, justice, and democracy are guaranteed to each and every Cypriot. It is my hope that this will be the last year that we will have to bring world attention to this sad division of territory in Cyprus.

VISIT BY KOREAN OFFICIALS

Mr. BOND. Mr. President, Monday, June 25 marked the 40th anniversary of the Korean war. Thus it was timely to have a group of distinguished Korean parliamentarians in Washington to meet with Members of Congress during that week.

The group included two former trade ministers, a senior foreign policy advisor to ruling party coleader Kim Young Sam and a lawmaker representing Korea's main opposition party which is led by Kim Dae Jung.

The Korean officials came to Washington to expand the communication channel between our parliaments and exchange views on a variety of economic and trade issues with key policy-makers in the House and Senate. In addition, they met with U.S. Trade Representative Carla Hills and other administration officials.

Mr. President, 40 years after the end of the Korean war, the United States-Korean relationship remains vital and strong. We in Congress have a keen interest in a secure, democratic, and economically vibrant Korea. This visit of the Korean parliamentarians along with past visits of similar delegations demonstrates that relations between our countries remain close. We should commend these political leaders for taking the time to come to the United States to open a channel of communication between our two legislative bodies, and we in the Congress should make similar efforts to ensure that the dialog remains open.

I ask unanimous consent that a list of the members of the delegation be inserted into the RECORD immediately following my remarks.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

The Honorable Rah, Woong-Bae—Mr. Rah is a member of the ruling Democratic Liberal Party and sits on the National Assembly's Economy and Science Committee. In the past, Mr. Rah has served as his nation's Deputy Prime Minister, Finance Minister and Trade and Industry Minister. He has a Ph.D. in economics from the University of California at Berkeley and, before entering government, taught at Seoul National University.

The Honorable Han, Seung-Soo—Mr. Han is a member of the ruling Democratic Liberal Party and sits on the National Assembly's Economy and Science Committee. His previous experience includes his work as Trade and Industry Minister, Chairman of the Korea Trade Commission and professor of economics at Seoul National University. Mr. Han has a Ph.D. from the University of York in England.

The Honorable Hwang, Byung-Tai—Mr. Hwang is a member of the ruling Democratic Liberal Party and sits on the Central Executive Committee of the National Assembly. In the past, he has served as President of the Hankuk University and a senior official at the Economic Planning Board. Mr. Hwang received his Ph.D. in political science from the University of California at Berkeley.

The Honorable Yoo, Joon-Sang—Mr. Yoo is a member of the opposition Party for Peace and Democracy and is Chairman of the National Assembly's Economy and Science Committee. His past experience includes service as Chairman of his party's Discipline and Presidential Election Campaign Committees and Spokesman for the Democratic Human Rights Association. Mr. Yoo has a B.A. in Economics from Korea University.

The Honorable Suh, Sang-Mok—Mr. Suh is a member of the ruling Democratic Liberal Party and sits on the National Assembly's Finance Committee. He is also his party's Director-General for Policy Coordination. His experience includes work as Vice President of the Korea Development Institute and Economist at the World Bank. Mr. Suh has a Ph.D. in economics from Stanford University.

The Honorable Cho, Kyung-Mok—Mr. Cho is a member of the ruling Democratic Liberal Party and sits on the National Assembly's Economy and Science Committee. His previous posts include Deputy Secretary General of his party and Vice Minister of Science and Technology. Mr. Cho did his graduate work at the School of Business Administration of Victoria University in New Zealand.

SAVINGS AND LOAN COMMISSION

Mr. BOSCHWITZ. Mr. President, over the weekend I am going to be considering the introduction of a bill that would establish a national commission which would be charged with considering causes and failures of the savings and loan system and to consider proposals to prevent future failures of this nature.

I understand there may be some other Senators who are offering a similar type of legislation and I will try to coordinate my activities with them. But this is certainly an important thing to do, to look back to see what caused these problems, and to try to establish some kind of a path so that in the future we will be able to gain from the experience so that we do not have such failure in the future either with banking systems or with other segments of the economy.

So, I simply wanted to say to my colleagues that I do have this in mind, and those who are interested in it should give me a call and I would enjoy their participation.

HOUSE REPUBLICANS AND THE NO-NEW-TAXES PLEDGE

Mr. KASTEN. Mr. President, 2 days ago, our House Republican colleagues sent a clear—and meaningful—message to the negotiators in the budget summit: New taxes would hurt the economy and, therefore, will be opposed by the Republican Party.

By a 2-to-1 margin, the House Republican Conference passed a resolution which states that the conference "opposes new taxes and all tax rate increases as a means of reducing the Federal budget deficit."

I ask unanimous consent that the text of the resolution be printed at this point in the RECORD:

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

REPUBLICAN CONFERENCE RESOLUTION

Whereas new taxes or tax rate increases would have a detrimental impact on families, business, and the American economy as a whole; and

Whereas, Republicans have bargained in good faith on previous balanced deficit reduction attempts and were consistently denied by the Democrat-controlled Congress the promised spending reductions to accompany tax increases; and

Whereas, the Conference endorsed the President's call for deficit reduction through spending cuts, growth incentives and process reform; and

Whereas, Republicans in the House of Representatives have the numbers to sustain a Presidential veto of legislation imposing new taxes or raising existing tax rates; and

Whereas, Senate Majority Leader Mitchell has abandoned the summit goals and emerged as a consistent roadblock to real spending cuts or growth incentives, and championed tax increases at every turn;

Whereas, the Democrats in Congress have consistently refused to approach deficit reduction in any way other than by raising taxes; and therefore, be it

Resolved, That the Republican Conference opposes new taxes and all tax rate increases [1] as a means of reducing the federal budget deficit, and instructs its leaders to represent this position to the President and the public.

Mr. KASTEN. This resolution reaffirms the Republican Party's commitment to economic growth, opportunity and job creation. While the budget deficit is a problem, it is not a crisis that requires a major tax increase. The Congressional Budget Office estimates that the 1991 deficit—including the cost of the S&L bailout—will be 2.7 percent of GNP. As recently as 1983, the deficit was 6 percent of GNP—and our economy was growing.

I think President George Bush put it best when he said, "There's no quicker way to kill prosperity than to raise taxes." He was right. I think he still believes it. But he's being forced to accept new revenues because the Members on the other side of the aisle will not consider any restraints on the $1.2 trillion Federal budget.

In a recent opinion poll, 45 percent of the public agreed that the Democrats are too quick to raise taxes.

Mr. President, if we simply set more reasonable deficit goals, I think we can achieve a meaningful bipartisan deficit reduction plan in the range of $30 to $40 billion without tax revenue increases beyond what the President proposed in his budget. Let's put an end to this manufactured hysteria over a $100 billion sequester. We all know that a sequester of this size is not going to happen.

Let's adjust the Gramm-Rudman targets and limit the potential sequester to $50 billion. In this way, if the budget talks fall apart, we can guarantee real deficit reduction without a tax increase.

[1] Tax rate increases include not only income tax rates but all rates on all existing taxes under federal jurisdiction.

CIVIL RIGHTS ACT OF 1990

Mr. DOLE. Mr. President, this past Wednesday, for the first time during my nearly 30 years in Congress, I voted against a bill that wore the civil rights label.

QUOTA JUSTICE

Despite my record of support for civil rights legislation, a record about which I am very proud, Wednesday's vote was an easy one for me.

It was easy because when you take the time to look behind the label and at the actual text of the so-called Civil Rights Act, you'll see that this bill has very little to do with civil rights, or racial justice, or equal opportunity. You'll see that it has more to do with forcing employers to "hire by the numbers." With quota justice. And with distorting not restoring, the civil rights vision that has served this Nation well for more than 25 years.

The so-called Civil Rights Act of 1990 alters the careful balance of title VII by allowing sky's-the-limit jury awards—unlimited compensatory damages, unlimited punitive damages, and unlimited opportunities for the plaintiffs' bar to make a killing in the courtroom.

This approach doesn't promote conciliation and settlement, one of the core principles underlying title VII and the Civil Rights Act of 1964. This promotes needless, time-consuming and often very expensive litigation that will break the backs of many small businesses in this country.

That's not fair. And that's not what this Senator means by "civil rights and equal opportunity."

WALK THE EXTRA MILE

Prior to the vote on Wednesday, President Bush and his advisers walked the extra mile in an effort to negotiate a compromise with Senator KENNEDY and with the Washington civil rights lobby.

Faxes were exchanged. New legislative language was proposed—it seems almost on an hourly basis. And very lengthy meetings were held between the bill's proponents here in Congress and the President's top advisers, including Chief of Staff John Sununu, White House Counsel Boyden Gray, and Attorney General Dick Thornburgh.

So, even though no agreement was ever reached, President Bush can hold his head high. He gave it his best shot. And he did not back down and run for the hills simply because the bill's sponsors were crafty enough to bless their legislative child with a wonderful-sounding name.

STILL HOPEFUL FOR A COMPROMISE

Mr. President, the House Judiciary Committee is scheduled to take up the Civil Rights Act of 1990 early next week. And the full House will probably consider the bill sometime in late August or early September.

So there seems to be enough time for both the administration and the bill's proponents to get together and give a negotiated agreement one last shot.

But the bill's proponents here in Congress must realize that Pennsylvania Avenue is a two-way street. There has to be give on both sides. They must understand that a deal's a deal, and that what may be perceived as the rhetorical upper hand doesn't justify reneging on agreements that have been made in good faith.

I know that President Bush wants to sign a civil rights bill, and he wants to sign it this year.

And I, as Senate Republican leader, have always wanted to help put that bill on the President's desk.

There's still time. And I still remain hopeful that agreement can be reached on a balanced and responsible civil rights bill for the 1990's.

TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,952d day that Terry Anderson has been held in captivity in Beirut.

COMMEMORATING THE CENTENNIAL OF THE SHERMAN ANTITRUST ACT

Mr. METZENBAUM. Mr. President, I rise today to commemorate the 100th anniversary of the enactment of the Sherman Antitrust Act, signed into law on July 2, 1890. I take a special interest in this occasion, not merely because I share common roots with the great Senator SHERMAN of Ohio, but because I share his vision of the rules of fair play and free competition that should guide our country. Today we celebrate not only 100 years of anti-

trust law, but also a continuing belief in a free market economy and the wealth of opportunity that economic freedom brings.

I am glad to be joined today by Senators from both parties to mark this anniversary. Antitrust is not a partisan issue—it is not a Democratic idea or a Republican idea. John Sherman was a Republican. Teddy Roosevelt—the great trustbuster of his time—was a Republican. In fact, it would appear that the Republican Party has long stood for a strong antitrust policy—until recently.

Under Ronald Reagan, the Republican Party became associated with "anti-antitrust." In fact, we came close to abandoning the principles of competition during the 1980's. So-called free market economists preached their theory of hands-off regulation—and the Government responded with an "anything goes" attitude. The merger mania of the 1980's created huge mega-corporations like Phillip Morris-Kraft, Chevron-Gulf and Time-Warner—companies that rival the size of the oil and steel trusts of the late 1800's. It is ironic that on the 100th anniversary of the Sherman Act we are once again faced with economic concentration of unprecedented proportions.

In fact, antitrust enforcement has not been consistent over the last 100 years. At certain times, proponents of big business have argued that cooperation, not competition, would help the American economy. Thus the history of antitrust enforcement is more one of ebbs and flows rather than an unwavering commitment to vigorous competition.

For instance, very few cases were brought during the first 10 years of the Sherman Act, until in 1901, Teddy Roosevelt created the antitrust division within the Department of Justice. This precipitated a number of important investigations which firmly imbedded principles of competition into American law. In 1914, Congress enacted the second antitrust law, the Clayton Act. Under the Clayton Act, Congress sought to prevent mergers and interlocks between corporations where such arrangements would "substantially lessen competition or tend to create a monopoly." In that same year, Congress created the Federal Trade Commission and gave it broad authority to police "unfair methods of competition."

During both world wars, antitrust enforcement declined as the Government tried to rationalize supply and stabilize markets to help the war effort. Not until the 1940's did antitrust see a revival when a series of Supreme Court decisions established several important principles of antitrust law, among them the per se rule against price fixing. This revival was short-lived, however, and antitrust cases again fell of until the much-celebrated cases against IBM and AT&T begun by the Justice Department in the early 1970's. Then antitrust entered some of its darkest hours under the Reagan administration. Federal resources devoted to antitrust enforcement were cut in half during the 1980's.

One might ask why there is any controversy about enforcing the antitrust laws. These laws merely establish the rules for free competition and prevent companies from using any unfair advantage against their competitors. Listen to this warning about the dangers of monopoly spoken by John Sherman during Senate debate on his legislation:

> The sole object of such a combination is to make competition impossible. It can control the market, raise or lower prices, as will best promote its selfish interests, reduce prices in a particular locality and break down competition and advance prices at will where competition does not exist.* * * the law of selfishness, uncontrolled by competition, compels it to disregard the interest of the consumer.

These words are as true today as they were 100 years ago. More importantly, this statement confirms that the Sherman Act was the original Consumer Protection Act. The antitrust laws do not protect any particular business; they protect consumers from abuse by huge companies. Competition brings more goods and services from fewer resources at the lower cost. That is what American consumers expect and that is what the antitrust laws protect. This is hardly controversial as an economic principle.

Moreover, belief in a free market economy is vital to our democratic form of government. We believe that concentration of political power threatens our political freedom as much as concentration of economic power threatens our economic freedom. For Americans, freedom means both freedom of expression and freedom of opportunity. Thus, a belief in competition is as much a part of our political history as it is a part of our economic history.

No one doubts the basic principle that competition is the mainstay of America's economic and political strength. Countries of Eastern Europe are reaching out to embrace the American ideal of personal freedom and a market-based economy. And yet, here at home, we continue to hear complaints that America is falling behind other countries because we are not longer competitive in world markets. Critics argue that we are being beaten at our own game. They argue that America is falling behind because our antitrust laws are too strict. These critics seem to believe that we have not had enough of mergers and buyouts during the last 10 years.

I am frank to say that I am disturbed by these arguments. I believe it is ludicrous to blame competition for the failings of a few American industries—ones that were perhaps indifferent, or even hostile, to the forces of competition. One needs only look at the history of the U.S. automobile industry to see that it was the lack of competition that led to its demise. At one time, we had more than a dozen domestic automakers. By the 1970's, we had only three. And then they became lazy. They ignored American consumers and they lost sales. They found out too late that you have to earn customers by building a better car. And I'll just bet that the critics of out antitrust policy who bemoan America's competitive failures drive foreign cars.

So I say to those critics who blame the antitrust laws for America's decline—competition is the solution, not the problem. When we have failed over the past 100 years of antitrust enforcement, it was when we were too lenient, not when we were too tough. Cooperation, joint ventures, consortium, efficiency—these words sound nice, but they are buzzwords for those who don't believe in the antitrust laws. It's time for America to get back to doing what we do best—competing our way to the top. That is our heritage which is best expressed in the Sherman Act.

THE 100TH ANNIVERSARY OF THE SHERMAN ACT

Mr. THURMOND. Mr. President, I am pleased to rise today, with my other colleagues, to commemorate the 100th anniversary of the Sherman Antitrust Act, which was adopted on July 2, 1890. Although we are late in our celebration, the importance of this occasion is in no way diminished.

Mr. President, Justice Black, in his opinion in *Northern Pacific Railway Co.* v. *United States,* 356 U.S. 1, 4 (1958), best, and most succinctly, captured the spirit and purpose of the Sherman Act. In that opinion, and I would like to quote, he stated that:

> The Sherman Act was designed to be a comprehensive charter of economic liberty aimed at preserving free and unfettered competition as the rule of trade. It rests on the premise that the unrestrained interaction of competitive forces will yield the best allocation of our economic resources, the lowest prices, the highest quality and the greatest material progress, while at the same time providing an environment conducive to the preservation of our democratic political and social institutions. * * * [T]he policy unequivocally laid down by the Act is competition.

Although the Northern Pacific opinion is more than 30 years old, it remains an eloquent statement of the purpose of an act which has become the cornerstone of American antitrust policy.

As all of my colleagues will recall, the Sherman Act came about because of increasing concern about the economic and monopolistic power of the business trusts and other business combinations. In fact, concern was so great that President Grover Cleveland addressed this issue in his third annual message to Congress in 1887, and in his final message in 1888. In the Presidential election of 1888, both parties included antitrust planks in their platforms, and when Benjamin Harrison, the Republican nominee, was elected President, he again urged Congress to enact some form of antitrust legislation. It is interesting to note that although 15 antitrust bills were introduced in the House in the 50th Congress, and 18 were introduced in the 51st Congress, it was the Senate that ultimately produced the legislation as we know it today.

However, it should be remembered that the Sherman Act was not the first antitrust legislation to be enacted. Between 1885 and 1890, 14 states and territories, including Arkansas, Connecticut, Georgia, Indiana, Kentucky, Maryland, Montana, North Carolina, North Dakota, South Dakota, Tennessee, Texas, Washington, and Wyoming, adopted constitutional prohibitions against monopolies. In addition, 13 States, including Iowa, Kansas, Kentucky, Maine, Michigan, Mississippi, Missouri, Nebraska, North Carolina, North Dakota, South Dakota, Tennessee, and Texas, enacted statutory antitrust provisions.

Mr. President, we cannot pay tribute to this monumental legislation, without paying tribute to the individual behind its enactment. Senator John Sherman, a Republican from Ohio, played a major role in the shaping of this legislation in both the 50th and 51st Congresses. Described by some as the preeminent Republican Member of the 51st Congress, Senator Sherman had a distinguished career in public service. He served 6 years in the House of Representatives, and ultimately, 32 years in the Senate. During his public career, Senator Sherman also served as Secretary of the Treasury under President Rutherford B. Hayes, and as Secretary of State for President William McKinley.

In conclusion, Mr. President, I would note that one of the most compelling points about the Sherman Act is its endurance and flexibility. Although enacted over 100 years ago, it has rarely been amended and serves us as well today as it did then. Over the years, its broad principles have provided the courts with the appropriate framework in which to determine the competitiveness of practices engaged in 100 years ago, and in our more economically sophisticated markets of 1990. In fact, Senator Sherman himself remarked on the wisdom of keeping the act general:

I admit that it is difficult to define in legal language the precise line between lawful and unlawful combinations. This must be left for the courts to determine in each particular case. All that we, as lawmakers, can do is to declare general principles, and we can be assured that the courts will apply them so as to carry out the meaning of the law, as the courts of England and the United States have done for centuries.

Mr. President, several weeks ago the Department of Justice commemorated the 100th anniversary of the Sherman Act, at which time several noteworthy individuals, including the Attorney General of the United States, offered their reflections on the Sherman Act. They were kind enough to provide their remarks to me, and at this time I ask unanimous consent that these remarks be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REMARKS BY DICK THORNBURGH, ATTORNEY GENERAL

Like so much other legislation, the Sherman Anti-Trust Act started as a trade-off.

In 1890, Congress wished to pass a very high tariff, but popular feeling was running even higher against the so-called "Trusts." A pamphleteer of the day argued that an American citizen was born to drink the milk of the milk trust, eat the beef of the beef trust, read by lamps lit by the oil trust, then die and be carried off by the coffin trust. Worse, political outcry against monopoly complained that "the tariff held the people down while the Trusts went through their pockets."

So, as a sop to such discontent, Senator John Sherman of Ohio—General William Tecumseh Sherman's brother—reported out of his finance committee a vague, peremptory, and some said "impenetrable" statute that covered everything in a few sentences, made law on July 2, 1890. The key sentence provided that every "contract, combination or conspiracy in restraint of trade, or commerce among the several states or foreign nations is hereby declared to be illegal."

The tariff passed handily, and the Sherman Anti-Trust Act harmlessly—without legal definition of the offenses it penalized, or any legal mechanism for enforcing its provisions. The next two Presidents—Cleveland and McKinley—scorned and ignored its anti-monopolistic intent. In fact, the key sentence was so construed that the first "conspiracy in restraint of trade" to be prosecuted was * * * the Knights of Labor!

The act was used in 1894 to break Eugene Debs' railroad strike.

It was Theodore Roosevelt—and even more so, William Howard Taft—who turned the act into a truly trust-busting instrument during the early years of this century. You will hear more about its subsequent history from others, but let me offer you here a slight twist on an old truism. The brevity of the Sherman Anti-Trust Act proves that unlike a little learning, a little legislating need not be a dangerous thing.

In fact, what counts—when the letter of the law is so sparse—it highlights the importance of the spirit of the law that is abroad. And about the present spirit of that law, I am more than ready to say a word or two.

You are well aware of the importance we place upon the prosecution of White-Collar Crime—especially the fraud, bribery, and corruption lately revealed in the Savings & Loan Rip-Offs. But we have an even longer-standing obligation to fight White-Collar Crime that undermines competition—to protect the greatest free marketplace in the world from the depredations of price-fixing, monopoly control, and other collusive and predatory acts.

Though there have been pauses—even lapses—in anti-trust prosecutions over one hundred years, the curve is surely upward, and on a steep climb today. Since 1974, violations of the Sherman Anti-trust Act—beyond any civil action for triple damages—can be prosecuted as a criminal felony. And we are hopeful that Congress will significantly raise the criminal penalties this year from $1 million to $10 million.

More importantly, our Anti-trust Division, under Assistant Attorney General Jim Rill, has greatly broadened the scope of its investigations, as well as the thrust of its prosecutions. Within our own borders, everybody from the airlines to the Ivy League have lately faced scrutiny—on what they are charging for tickets or tuition. But restraint of trade has been even more sharply scrutinized abroad. Japanese businessmen have been taken to court for Sherman Act violations. In a late but very positive reaction to such actions, the Japanese government has agreed to look to its own anti-trust laws. As part of the Structural Impediments Initiative, Japan has agreed to step up enforcement against restraint of trade and increase penalties for anti-trust violations.

In fact, that seems to sound a large warning for commerce the world over. Soviet president Gorbachev has discussed the desirability of adopting new antitrust laws—should the shaky Soviet economy ever produce something to collude over. Jim Rill's lawyers, along with our colleagues at the FTC, are already working with the new governments of Eastern Europe to develop antitrust laws for Czechoslovakia, Hungary, and Poland. Even Nelson Mandela—speaking out for many future freedoms—has offered his hand to South African businessmen, suggesting an expansion of economic freedom based on our American antitrust laws.

He might have been echoing the words of Justice Thurgood Marshall, who said, speaking for the Supreme Court: "Antitrust laws in general, and the Sherman Act in particular, are the Magna Carta of free enterprise. They are as important to the preservation of economic freedom and our free-enterprise system as the Bill of Rights is to the protection of our fundamental personal freedoms."

Nothing must impede the full force of free market competition—especially as that competition increases globally—and in that bold, free economic spirit, I am presenting to the Antitrust Division this bronze plaque to commemorate the brief directive that Congress gave the trust-busters back in the Gilded Age. It reads: "1890-1990. 100th Anniversary of the Passage of the Sherman Act. July 2, 1990. A Comprehensive Charter of Economic Liberty."

I trust Jim Rill's lawyers to stick by both the few words—and the ever-broadening spirit—of that law. And may this charter for economic liberty—like the widening jurisdiction of so many Americans—soon take in the whole world.

REMARKS BY JAMES F. RILL, ASSISTANT ATTORNEY GENERAL, ANTITRUST DIVISION

It is a privilege to serve the Department of Justice during the one-hundredth anni-

versary of the Sherman Act, and I am particularly honored to be here today to welcome Attorney General Thornburgh and our other distinguished speakers. On behalf of the Attorney General and the Department I also wish to extend a warm welcome to the former Assistant Attorneys General of the Antitrust Division who are with us today to help celebrate 100 years of antitrust enforcement.

In drafting the Sherman Act, Congress chose to provide fundamental competition principles rather than delineate every type of business conduct it found anticompetitive. It created an elastic statute—one that resembles a constitutional provision more than an ordinary statute. Its flexibility has allowed antitrust enforcement to benefit from new learning about the nature of business and economics. The statute has a rich and varied enforcement history—the highlights of which I will touch upon today.

Between 1890 and 1904, the Justice Department brought less than two Sherman Act cases a year. As General Thornburgh observed in his remarks, there was not a great deal of early enthusiasm for the Act at the Department of Justice. In those early days, resources were scarce at the Department, even by today's standard. Congress provided no specific appropriation for antitrust enforcement, and, consequently, there was no antitrust division within the Department. In fact, there were no lawyers assigned full-time to antitrust matters.

Despite scarce resources, in 1898 the Department successfully prosecuted the *Addyston Pipe and Steel Co.* case, charging six manufacturers of iron pipe with price-fixing and market allocation. Judge William Howard Taft's opinion for the Sixth Circuit established the basis of a per se rule of illegality for "naked restraints" of trade and the comparative ground work for the doctrine of ancillary restraints. The opinion in *Addyston* is recognized as a landmark in antitrust jurisprudence, and Judge Taft's accomplishment is hailed as particularly noteworthy given the time at which he was writing and the lack of Sherman Act precedent and antitrust jurisprudence.

The level of antitrust activity at the Department did not increase until 1904 when President Theodore Roosevelt and Attorney General Philander Knox persuaded Congress to appropriate the grand sum of $500,000 for antitrust enforcement over a five year period. This funding led to the creation of an antitrust division staffed by five lawyers.

By 1904 President Roosevelt's famed "big stick" had landed on J.P. Morgan's Northern Securities Company. Despite Roosevelt's reputation as our nation's foremost trustbuster, the Supreme Court's decision in the *Northern Securities* case actually set a troublesome precedent that could have greatly limited the utility of the Sherman Act. The holding of the Court amounts to the proposition that any elimination of substantial competition between two competitors constitutes a combination in restraint of trade without regard to its impact in the marketplace. Equally troubling was the dissent of Mr. Justice Holmes who contended that the Act prohibited only "external" restraints and did not apply to "an arrangement by which competition is ended through community of interest."

One ironic note—Justice Holmes was nominated to the bench by Roosevelt on the assumption that he would be an ardent trustbuster. His dissent in *Northern Securities* caused an antagonism between the two giants which never disappeared.

During the years 1910 through 1914, the Department brought an average of thirty-one cases per year—a remarkably high level of activity given the size of the Department as a whole at that time. Also during that period, the Supreme Court announced its decisions in *Standard Oil* and *American Tobacco*. Judge White's opinion in both cases not only corrected the overly literalistic reading of the Sherman Act in *Northern Securities*, but it also set the course for application of a rule of reason analysis to most forms of challenged conduct. The formal adoption of a rule of reason analysis resulted in a widespread public furor that may be hard to fathom in this era where the rule is well accepted: the popular press accused the Court of being soft on trusts; business complained bitterly about antitrust uncertainty; and Congress passed the Clayton Act and, as companion legislation, the FTC Act.

Ten years later, the Supreme Court's decision in *United States v. United States Steel Corp.* marked a big loss for the government, but a victory for the quality and integrity of future Sherman Act enforcement. The Department's complaint, filed in 1911, sought dissolution of U.S. Steel, which had been organized in 1901 to acquire and hold the stock of twelve independent operating companies. By 1911, however, the company's market share had actually decreased from 50 percent to about 41 percent, and the business of certain competitors had grown at a healthy pace. This trend continued through 1921 when the Supreme Court found that U.S. Steel had not engaged in predatory practices, had not attempted to oppress competitors, had encountered substantial competition, and had abandoned certain price-fixing agreements before the government's suit was filed. The Court concluded that U.S. Steel had neither the purpose nor the power to control prices, thus reducing the government's case to the proposition that size alone constituted a Sherman Act violation. The Court concluded: "the law does not make mere size an offense, or the existence of unexerted power an offense."

Following the *U.S. Steel* decision, the Department dismissed its appeals in several cases and shifted its focus to the prosecution of price-fixing cases. No significant monopoly cases were instituted until the *Alcoa* case was filed in 1937. Even the level of the Department's criminal antitrust enforcement had declined.

The downward trend was reversed abruptly when President Franklin Roosevelt turned to antitrust enforcement—and to Thurmond Arnold—to control big business. General Arnold became the new assistant attorney general in charge of the Antitrust Division in 1938 and served in the post until 1943, the longest term of any Antitrust Division chief. Upon his arrival, the division's legal staff increased from 59 to 144 and a small staff of economists was added. Procedures and policy changes were instituted that meant more enforcement, fewer settlements and more criminal prosecutions. General Arnold placed a premium on the detection of nationwide conspiracies. He encouraged his legal staff to think of antitrust enforcement in objective, systematic and economic terms. If a local complaint looked like a potential case, the staff was instructed to request nationwide investigations of the entire industry by the economics section and the FBI.

My comments on General Arnold should not overshadow the contributions of the other Assistant Attorneys General who have served the Department. The Division's leadership has been consistently excellent. Many of the former Assistants went on to distinguish themselves further in government service—Justice Robert Jackson, Justice Tom Clark and Wild Bill Donovan being the most notable examples.

The mood for enforcement at mid-century was further buoyed by two important Supreme Court decisions favorable to the government. *Alcoa* and the second *American Tobacco* case marked the rebirth of Section 2 of the Sherman Act. In *Alcoa*, Judge Learned Hand (the case was certified to the Second Circuit after the Supreme Court failed to assemble a quorum) made the important observation that "the successful competitor, having been urged to compete, must not be turned upon when he wins." Judge Hand maintained, however, that size is a determinant of monopolization when it is accompanied by the power to exclude competitors and the intent and purpose to do so.

Alcoa and *American Tobacco* signaled the start of a winning streak for the government that reached its peak during the years of the Warren Court. *Brown Shoe* (1952) and *Philadelphia Bank* (1963) ignited a firestorm of merger enforcement which culminated in Justice Stewart's dissenting observation in *Von's* that the only cognizable standard was that the government always wins.

During the modern era of Sherman Act enforcement the federal government has refined its approach to merger enforcement and invigorated its emphasis on criminal enforcement. The Department's prosecution of electrical contracting company price-fixing conspiracies during the 1960's gained national attention and helped our effort to deter *per se* illegal activity through vigorous prosecution. Cases like the electrical contracting cases were instrumental in persuading Congress to upgrade Sherman Act criminal violations from misdemeanor to felony crimes.

Recent years have been defined by the Department's continued emphasis on criminal enforcement, by the monumental AT&T case—which was filed on Tom Kauper's watch and since then has occupied the attention of no less than eight Antitrust Division chiefs, by our support of Congress' deregulation of the airline and railroad industries, and by the institution of Hart-Scott-Rodino premerger notification procedures and guidelines for merger analysis. Premerger notification and the Department's 1982 and 1984 Merger Guidelines virtually transformed the Department's approach to merger enforcement, affording us the framework for consistent and objective analysis based on current legal principles and economic theory.

Today, criminal and merger enforcement are the Department's top priorities, and we are placing renewed emphasis on our role as competition advocates. In recent months the Department has responded to requests of countries such as Canada, the Soviet Union, Hungary, Poland and Czechoslovakia for advice on competition policy. We have played a major role in the Administration's SII talks with Japan—with an emphasis on enhanced antitrust enforcement in that country. But our purpose today is more to take a retrospective, not so much a programmatic, look.

After one hundred years the Sherman Act has emerged with its essential character unchanged: it remains a great charter for the courts to develop the law of competition

within the framework of Congress' two overriding concerns: anticompetitive agreements and abusive behavior by firms that are dominant or are seeking to become so.

The generality of the charter has allowed courts and enforcement agencies to learn from experience and adapt the law to new needs and conditions. Indeed, it would be rash, if not irrational, to argue that the period of learning is over and the current doctrine is necessarily the last work. There is room, as well, for careful calibrated amendments, such as the Administration's recent joint production venture legislative proposal.

But the endurance and success of the Sherman Act should give us solid confidence in the soundness of its basic prescriptions. It should make us pause and reflect when major changes are proposed to exempt whole industries from the Sherman Act or to freeze the growth of the law by enacting current doctrine into statutory formulas. It should also make us proud—and this applies to practically everyone here—to have devoted some or all of our career in helping to assure that the great promise of the statute is fulfilled.

REMARKS BY JUDGE KIMBA M. WOOD, U.S. DISTRICT COURT, SOUTHERN DISTRICT OF NEW YORK

I was asked to say a few words about the significance of the Sherman Act and competition generally in our society from my perspective as a member of the Judiciary. To me, one of the most remarkable [things] about the Sherman Act is that while many in this country question whether our ways of doing business are outmoded, our antitrust rules are being emulated today in other countries. Many Western and Eastern European countries agree that our antitrust model (rooted in the Sherman Act) is the one to adopt. (As you know, many of your colleagues have gone abroad recently to help other governments create antitrust systems like ours.)

As I reflected on this, I wondered what was it that caused *this* country to take the lead in developing antitrust? Antitrust law is, after all, something we imported from *Britain*. It has roots dating back at least as early as 1602, when an English court voided a monopoly granted by Queen Elizabeth to Edward Darcy, groom of the Privy Chamber, to be the only maker and importer of playing cards in Great Britain. What was it that caused our American forbears to be so impassioned by antitrust issues that in the Presidential election of 1884 a party called the Anti-Monopoly party came in third, with 175,000 votes, beating out even the Prohibition Party? (While on the subject of linking the past to the present, I note that the Anti-Monopoly Party's birthplace was *Chicago*, and one of its planks was that we should pay off the nation debt.)

What was it that caused *this* country to adopt *national* antitrust legislation and [*stick* with it] for the past 100 years? Although it can be argued that the Sherman Act and our early antitrust policy is attributable in large part, to the self-interested anger of farm and labor groups at trusts, it also is attributable to more idealistic leanings, deeply ingrained in this country from its earliest days—a belief that in our egalitarian, democratic society freedom to contract must be restricted at times in order to permit all men (and, of course, later, all women) to be free to use their talents to better themselves economically, and to permit everyone to benefit from an efficiently operated market.

Both Britain and the U.S. recognized the tension between the freedom to contract—which was relied upon by courts to, for example, justify agreements among competitors to fix prices and allocate territories, and maximizing everyone else's economic welfare and opportunity. But in Britain, where family-owned firms dominated business, the tension among these divergent interests was resolved in the 1800's more in favor of freedom of contract, which had the effect of fostering a climate where the old guard could, and did, perpetuate itself. The British, consequently, have been until quite recently much more tolerant of consensual anticompetitive restrictions than are Americans. In the U.S., our desire to provide economic opportunity and benefits to all was instrumental in causing us to scrutinize restraints of trade more carefully, and—[to overgeneralize]—eventually, to permit them only where they promote desirable economic efficiencies.

This, of course, suggests a more orderly progression of the law than actually occurred. Even after passage of the Sherman Act, freedom of contract received more deference at some times than at others. This happened in part because the Sherman Act itself did little to guide judges in choosing among conflicting strands in the common law—judges *themselves* were left to sort out when freedom of contract should give way to the amorphous social and economic goals of maximizing opportunity and consumer welfare.

Little by little the courts developed what is today a remarkably sophisticated body of law that resolves these tensions admirably. For lack of time, I will pass over the low points, when judges tried to import into antitrust/legal rules designed for different purposes, and I will jump from an early high point of judicial perspicacity to today. In 1911, Chief Justice White's seminal *Standard Oil* and *American Tobacco* opinions decided that the Sherman Act's goal was maximization of consumer welfare and created a Rule of Reason that left room for changes in the law as our understanding of market operations advanced. These opinions gave the Sherman Act a sorely-needed content and structure that was essential as courts worked at reconciling the common law's conflicting goals. Although there were many judicial mis-steps between then and modern times, there are also many judges who increased our understanding of how to promote efficiency and opportunities. To take just one example, in 1977 Justice Powell in *Continental TV* v. *GTE Sylvania* performed a modern equipment of Justice White's 1911 shaping of the law—he turned his back on a confused body of law condemning vertical restraints, and refocussed the judicial lens on business efficiency, and the need to carefully assess whether restraints, as they operate in the real business world, further that efficiency.

With the benefit of hindsight, we can say that the genius of the Sherman Act is that it did not attempt to resolve, in 1890, the contradictory strands in the common law that reflected the tension between the freedom of businessmen to contract and the benefit everyone else derives when economic efficiency and opportunity are maximized. By simply outlawing restraints of trade, the Sherman Act laid a framework within which the Judiciary and the Department of Justice were able to develop a *flexible, dynamic* antitrust policy that could accommodate competing economic goals and incorporate, progressively, new economic thinking concerning what maximizes efficiency and opportunity.

If anyone wonders whether the Sherman Act is outmoded, or, rather, whether we are on the right course in antitrust policy and enforcement for this time in history, I think that two signs suggest that indeed, we are on the right course: the first, I mentioned at the outset—countries with a full range of options concerning how to modernize their economies are choosing our antitrust model. Second, our own country has experienced unprecedented growth in the past few years—and while even the hyperbole common at centennials would not lead me to attribute *all* of that growth to the *Sherman* Act, that growth is as good a sign as any that today's antitrust policy is serving the country well.

REMARKS OF RICHARD W. POGUE, PARTNER, JONES, DAY, REAVIS & POGUE

As I look out on the audience this afternoon and see all the outstanding prosecutors there, I become *very* nervous. And as I see this wonderful group of former Assistant Attorneys General who have gathered here, I am mentally revisited by the sins of the past on the part of myself or my clients.

It is a great honor to be asked to speak on this occasion—the celebration of the Centennial of the Sherman Act. I thank Assistant Attorney General Rill for his thoughtfulness in inviting me to participate with such a distinguished group of antitrusters. I am not sure that all my *clients* would applaud this celebration today, but for those of us in the private bar who have made a good living off the venerable statute, a hearty cry of congratulations seems to be in order.

I have been a practitioning lawyer (and primarily an antitrust lawyer) for more than one-third of the life of the Sherman Act—a shocking discovery which I stumbled upon in preparing these brief remarks—and thus I have witnessed and to a very, very minor extent participated in a considerable part of the development of the body of jurisprudence which we call antitrust. No one who has had that kind of experience can fail to be impressed with the durability and flexibility of this simple but elegant statute—legislation the principal substantive language of which has not been amended at any time during the past 100 years.

It would have been difficult in 1890 to predict that we would be celebrating this event today. What we know as the Sherman Act was the product of a legislative compromise. The political process that produced it was driven by a combination of forces: agrarian depression and outrage over the impact of a changing economy; a sense of hopelessness as industrial and financial organizations become larger and the popular sense was that the individual was losing the kinds of personal relationships which had frequently characterized business transactions in the past; the beginning of muckraking journalism; and a heavy element of relatively unfocused populism, filled with conspiracy theories, colorful rhetoric and a nostalgia for a different and simpler time.

Most of those forces have little relevance to antitrust enforcement today. But in 1990, perhaps more so than ever again, the impetus for antitrust legislation came from general popular unrest. It was democracy in action, for better or worse. As things turned out, it was very much for the better—be-

cause the Sherman Act legislated the basic principle of competition as the law of the land, and that economic principle has led America to prosperity and greatness. It is indeed astonishing that today even the Soviet bloc of nations and other countries in various parts of the world are beginning to recognize the fundamental soundness of the elemental doctrine of competition which was codified by the Sherman Act.

The Act as passed would probably not have survived without considerable help from the judiciary. It was, by its terms, absolutist; it gained its all-important flexibility by what today would probably be viewed as unacceptable judicial activism. In fact, until the *Standard Oil* decision of 1911 which "interpreted" the Act to prohibit only "unreasonable" restraints of trade, the statute was seldom used by either the government or private plaintiffs. Before Theodore Roosevelt became President in 1901, only one private case had been adjudicated on the merits, and in that case the successful plaintiff received $1,500, plus $750 in attorneys' fees—a ratio which, as a lawyer, I must regretably note, has deteriorated over time.

The public perception of the *Standard Oil* decision was quite negative at the time. Many believed that big business had just found a giant loophole; and so the Senate of the day requested its Interstate Commerce Committee to investigate what changes might be necessary in the antitrust area. The Committee investigated with a vengeance, and its hearings provided much grist for the 1912 Presidential campaign mill.

The results were Woodrow Wilson's election, the subsequent creation of the Federal Trade Commission as a regulator of business, and the end of the Sherman Act's exclusive franchise on American antitrust policy. Whether, in retrospect, those developments were wise is a debate for another day.

In any event, the Sherman Act remained, and over the years it has become increasingly more important. Constitutional jurisprudence has expanded the reach of the statute, while the elasticity of its legal standards has provided ample room for advocacy in any particular circumstance. In many ways, the Sherman Act illustrates perfectly the awkward balance between rhetoric and pragmatism which characterizes American antitrust.

I was asked to speak today as a member of the private bar. This is a special privilege, for I believe that it has been the private practitioner, at times as much as or even more than the government enforcer, who has shaped Sherman Act jurisprudence and competitive behavior over the years. This influence has been brought to bear in two principal ways—as advocate in antitrust litigation, and as counselor to business on how to comply with the law.

The "private attorney general" concept is both a blessing and a curse of antitrust. The opportunity to obtain treble damage awards, attorneys' fees, and injunctions through private litigation has provided remedies for those injured by anticompetitive conduct. But at times this same opportunity has also allowed some who were less than scrupulous to use the antitrust laws to extort and to inflict competitive harm. Different analysts would strike the balance in different ways, but there can be no doubt that private activity has been extremely influential in the development of antitrust, both in many seminal litigated cases in the field, and as a significant deterrent effect.

Further, the mere *threat* of treble damage actions has clearly had a significant effect on American business. Reasonable people may differ as to whether this effect has been, on balance, good or bad, but no one can deny the impact. Many would argue today that automatic trebling is far too blunt an instrument to be apropriate; it can deter competitive conduct as well as cartel behavior. But regardless of your views on this point, no one who has been a private practitioner will disagree that the possibility of treble damage attack has significantly affected the behavior of American business.

Treble damage litigation, big mergers or criminal cases are what the public sees under the Sherman Act and other antitrust laws, but *counseling* is what most antitrust practitioners really do. The most effective private attorneys general are not those who make their living bringing private actions, but the many thousands of lawyers who, day after day over the years have guided their clients through the nebulous scope of the Sherman Act and the other supplementary antitrust legislation.

Antitrust counseling is challenging work.

First, there are few hard and fast rules to learn; any discipline in which the guiding principle is the "rule of reason" leaves considerable room for judgment.

Second, all the antitrust knowledge in the world is useless if you do not understand the business arrangement and its business context. The facts are critical; knowing the case law is merely useful.

Third, you need to know how the relevant federal and state enforcement agencies work: What are their priorities? What is their bias? In this sense, antitrust is like a regulatory practice, where the agencies have considerable discretion and your job is to persuade them that public policy and your client's interests are congruent. Fortunately there are many volunteers, such as those in the 12,000 member Antitrust Law Section of the American Bar Association, who try to provide education in these areas—often in collaboration with the Antitrust Division.

Then of course the advice and its underlying reasoning have tc be communicated to the client in such a way that it can be understood, accepted, and implemented. This is difficult enough, given the ambiguity of the legal rules and the wide discretion given to the enforcement agencies, but it is further complicated by the responsiveness of antitrust to political trends. Antitrust is quite clearly subject to enforcement and attitude cycles; while the century-long trend lines are fairly constant, there have been some rather large spikes on the graph.

For example, in the 1950's and 1960's, it was the traditional American fear of size and concentration of power coming back after a World War in which all the rules had been suspended. The 1970's were an ambivalent decade for antitrust and politics: the enforcement program changed after *General Dynamics*, although we also saw shared monopoly investigations and a criminal resale price maintenance case. The 1980's were a re-expression of the American growth model, designed to regain world prominence; antitrust followed, with the emphasis on economic efficiency and virtual abandonment of the populist vocabulary that had always been a part of—and sometimes a problem for—antitrust.

But through it all, at least since the end of World War II, the Department of Justice has conducted its antitrust work with integrity. The private bar has felt that the *process* of the Antitrust Division has been fair, and that the Division has almost always been willing to *listen* and *consider* before acting. That is a wonderful reputation to have.

If I were presumptuous enough to offer some modest advice to the assembled enforcers, I would say that common sense and knowledge of the facts are more likely to produce sound enforcement decisions than is any ideological formula. Economic theory provides a critical analytical framework for antitrust, but economic doctrine does not by itself produce sensible enforcement decisions. No regression analysis can include all the relevant variables in an antitrust enforcement decision.

But if economics is not the complete answer, populist bias against size and efficiency is even worse. In our global economy, we must be competitive or we will fail. We have been, and in many respects still are, the strongest competitor in the world. We cannot retreat back to nostalgia about the family grocer and small merchants. Thus, we need as antitrust enforcers and decisionmakers people who believe in preserving competition, not just competitors; people who can apply common sense to a good understanding of the facts of a particular problem.

Today, on the Centennial of the Sherman Act, it is particularly gratifying to find people at the helm of both federal enforcement agencies who exemplify these characteristics.

On behalf of the literally tens of thousands of private lawyers who have participated in the antitrust experience during these first hundred years, I would like to express our appreciation for the Department's soundness and fairness, and for its recognition of the important role which we in the private bar have played, and will continue to play, in the development and enforcement of the Sherman Act.

As for the Sherman Act itself, let us hope that its second hundred years will be marked by as much vitality and significance as was its first Century.

Thank you.

REMARKS BY THOMAS E. KAUPER, HENRY M. BUTZEL PROFESSOR OF LAW, UNIVERSITY OF MICHIGAN LAW SCHOOL

I was asked to speak today on the significance of the Sherman Act and competition generally in American society—with a peculiar caveat, namely from my "special perspective as a professor of law." There is a clear implication that academics don't think like everyone else. That, I am afraid, is all too often true, as I shall undoubtedly demonstrate.

I was also struck by the pairing in my assigned subject of the Sherman Act with "competition generally," a pairing which suggest that the two somehow go hand in hand. Certainly we like to believe this is so. Yet there have been times in the history of the Sherman Act that the two have seemed to diverge, where unless one gives to competition a strange meaning the Act itself has been used to reach what seem to be anticompetitive results. The significance of competition may be one thing; the significance of the Sherman Act may be quite another. As I reflected on the impact of the Act, I was tempted to give the simple—and I believe scientifically correct—answer. It has spawned a bureaucracy, and put the children of antitrust lawyers through college. Beyond that, who knows? For in the end, we

can but speculate on how society would have differed in its absence.

The thought of standing here today and simply saying "who knows?" is not very appealing, particularly to an academic who is never supposed to make such professions of ignorance. So I thought that I might take you on a brief tour of the great moments of the Sherman Act and let you draw your own conclusions. I gave such a speech four years ago, although I then covered only the past twenty years. In searching for the significance of the Sherman Act in that speech, I noted two effects felt by every American consumer—telephones that don't always work and more televised college football games than anyone can possibly tolerate. Among the highlights I picked out in that speech were the Von's and Schwinn cases, the Herfindahl-Hirschman Index, and, as the crowning highlight of all, the Antitrust Division's Vertical Restraints Guidelines. As you may have gathered, it was a speech that poked fun.

As I reread that speech, I was struck by the way it trivialized the impact of the Sherman Act. It was intended to do so, for in such trivialization was much of its humor. But in recent years trivialization of the Act has become common sport, particularly in academic circles. It has been done not in humor, but as a means of suggesting either that the Act has served no social purpose or, in the worst case scenario, has been counterproductive, impairing the operations of American enterprises without any benefit to consumers, business enterprises, or anyone else for that matter. The Act, in these eyes, can do only harm. Its enforcement is a silly, trivial, and expensive exercise. Such critics' evaluations cannot simply be answered by a "who knows?" response.

What has been the significance of competition to society as a whole (a question which seems easier to deal with than the Sherman Act itself)? To antitrust lawyers, competition means rivalry among economic enterprises in a market. But competition is far more pervasive in American society than that. Individuals compete for jobs, for schools, for grades. Churches compete for parishioners. Bureaucracies compete for funds. Through competition we believe the best come to the top. In the market sense, resources are properly allocated. Throughout society competition preserves choice, and demands accountability. It is the result of economic liberty, a system of economic choices valued in its own right, but perhaps more important, because it is an integral part of the political and social liberty we cherish.

Do we know that competition works as advertised? Can we actually prove the virtues of competition, or is all of this simply an act of faith? After all, there have been both economic and social systems which do not rest on competition as the regulator and stimulus of achievement. Indeed, even in the United States the value of competition has been questioned. Competition results in both success and failure, and failure is often unacceptable. It presupposes an equality of opportunity which is often lacking. Competition, particularly at the individual level, suggests a kind of social Darwinism which many consider destructive and runs counter to a democratic notion of egalitarianism. The tension between individual liberty, on the one hand, and equality of individuals, on the other, has been a central feature of democracy from the beginning. This same tension has spilled over in antitrust decisions, particularly in the 1960s, when in words reminiscent of the civil rights cases of that same period the Sherman Act seemed to reflect a restraint on the consequences of unbridled competition in the name of equality. We have, in other words, occasionally decided that too much competition is a bad thing, and have made the decision to temper it. We cannot simply assume that competition always produces the outcomes society seeks.

During the Depression, competition itself was seen as a destructive process, a causative element in the Nation's economic difficulties. In more recent years, a growing body of critics suggests that greater cooperation among enterprises and the government would improve the position of American firms in the market place. The government, and not competition, would choose winners and losers. While suggestions that competition is inherently destructive or destabilizing have passed from the scene, the contention that competition alone will not lead to optimal technological development and efficiency has been more difficult to counter, particularly when other players in world markets don't abide by the same rules. As markets become truly international, competition as a market regulator becomes suspect. Some of the players may win by stacking the deck. But there are dangers to responding in kind, not the least of which is the erosion of the economic liberty upon which our political liberty in part depends.

Clearly our belief in the value of competition rests in part in theory, in part on the success of American economy and the material gains it has produced, and in part on faith. The empirical measure may best be seen in the events of the past year. Communism, and to a significant extent socialism, have failed. The Soviet Union and nations of Eastern Europe have turned in the direction of market economies, driven by the engine of competition. They are not all likely to be wrong. Competition is valued in part because it has provided greater prosperity and economic progress. But let us not forget that it also *tolerated*, and I use that word advisedly, as the price of *political* freedom. The Chinese learned, to their regret, that political freedom and economic liberty go hand in hand. The results of competition may be harsh. They often need tempering. But no one has yet devised a system which works better.

But let us take the virtues of competition and a capitalistic and free market as given. What has been the significance of the Sherman Act? Has it done what it was meant to do, or does it represent a promise unfulfilled? Has it done more good than harm? In the academic world, at least, there is strong disagreement on these questions. Views on the Act are mixed, to say the least.

To some, the Act may be seen as a futile gesture—indeed, an intentionally futile gesture—meant only to deflect the growing interest in Marxism, Socialism and other measures intended to curb the use of corporate power coming into vogue in the last three decades of the 19th Century. In these terms, the Act was a success at the moment of its enactment, and has caused some degree of harm with every subsequent action to enforce it. There is little historically to support this cynical view; clearly the Act was meant to have some continuing impact. But what was it to be?

Much of the disagreement over the impact of the Act—and the disagreement is considerable—arises out of uncertainty over what the Act's purpose actually is (or was). While the Congress of 1890 did not like the trusts, it was inarticulate about why. "Restraint of trade" is a remarkably loose term. Analyses of legislative history and the common law have not been terribly helpful. Debate has been more over what the Sherman Act's goals should be as a policy matter than on what Congress originally meant. At various times, and to various observers, the Sherman Act's purpose has been described as including consumer welfare, protection of small business, the control of corporate and social political power, redistribution of wealth, and simple fairness. Each of these goals has appeared in antitrust decisions under the Act, at different periods of time.

The difficulty in evaluating the Sherman Act rests in part, then, on our inability to state its purpose, or at least in the inconsistency of purpose underlying enforcement over a 100 year span. Shifts in enforcement and judicial philosophy (and, indeed, abandonment of the Act altogether in crisis), have meant that the Act has not over time fulfilled what some at any given moment expected of it. For example, the Sherman Act of the 1960s may in fact have aided small business (although this seems unlikely). As small business ceased to be a direct concern, the protection, if any, was lost. From a perspective of 1990, the Sherman Act seems to have done little to forestall the demise of small entrepreneurs.

Those who would impart to the Sherman Act lofty social and political ambitions, who perceive it as a bulwark against the oppression of economic and political liberty through the centralization of private economic power, may from the perspective of today to characterize it as a failure, a failure resulting from the inability or unwillingness of agencies and courts to carry out its mandate. Economic concentration has increased steadily. Corporate America seems larger, and sometimes beyond control. The individual seems lost in the marketplace. Conversely, to those who view the Act's purpose as protection of consumer welfare, the Act is at best a mixed blessing, all too often leading to enforcement actions that have been both inappropriate and costly, actions which have impaired efficiency and caused the loss of sales and jobs to foreign competitors.

The values and beliefs at issue go far beyond the boundaries of antitrust, encompassing broad issues of political and economic power which transcend the narrow issues with which antitrust must deal. Fear of economic concentration, faith in the ability of government to act responsibly and intelligently, and skepticism about the equation of private and public good, will lead some to seek a highly interventionist antitrust program which is, in turn, anathema to those whose major fear is the government and whose faith in free markets is unshaken. These values, however articulated, are born out of tradition, and the economic and political philosophies which we all hold. They are as much a matter of faith as demonstrable truth, however hard we may try to wrap antitrust in the trappings of science. Disagreements on these broad issues, which are central to the evaluation of the Sherman Act, the body of antitrust doctrine which it has spawned, and the performance of the institutions involved in its interpretation and enforcement, will not and cannot be resolved simply through the exercise of reason.

It would be a mistake, however, to conclude that the Sherman Act has been an exercise in futility, for it has in fact accomplished a great deal. It has deterred cartels,

preserved freedom of entry and set the stage for the control of market dominating mergers. It is very easy to lose these truly major accomplishments by arguing over the peripheries. Without the Act, there can be little doubt that cartels would be commonplace, and single firm monopoly would be more persistent. Perhaps cartels and monopoly would erode over time, even without the Sherman Act (although those of us burnt by the economists' notion of contestable markets during the airline deregulation battle remain very nervous over assertions of ease of entry). Perhaps the amount saved has not been worth the cost. How much in costs cartels have (or would have) imposed is unclear. The Sherman Act has imposed direct enforcement costs in terms of attorneys' fees, court time, litigation expenses and so on, and indirect costs in competitive conduct foregone from a fear of liability, and inefficiencies imposed by rules perceived to be misguided (although some such costs and inefficiencies may be viewed as resulting in social benefits by those who do believe the Act's sole purpose is the protection of consumer welfare). But efforts at cost-benefit analysis are necessarily doomed to failure; there is little agreement over what the costs of monopoly are even in purely economic terms (*i.e.*, monopoly profits or only deadweight loss), those costs cannot be measured in any event (particularly with respect to cartels which never occurred because of the deterrent effects of the Act), and much of what some describe as indirect costs of enforcement were the result of the conformity of the Act to what society perceived its purpose to be, costs which we were prepared to incur to achieve "benefits" not included in this equation.

The Act has deterred cartels and the development of monopoly power through enforcement actions, public and private. Perhaps it needs no further justification. But in my own view, the Act has had a significance far beyond the cartels and monopolies it has directly deterred. The Act, and the institutions it has spawned and supported, have been a steady force moving the economy in the direction of competitive outcomes. The Sherman Act is a symbol of commitment to a capitalistic market economy, and to the propriety of government action to check abuses of it. It has been the counterpoint to direct economic regulation and the tendency of government to create and nurture monopoly power. Without the Sherman Act and those involved in its enforcement, there may have been no significant check on this tendency. Deregulation and the introduction of competitive considerations into a variety of government policies may have saved the American consumer as much as all of the Sherman Act's direct enforcement combined. It is, after all, government which creates the most enduring market power. In totalling the benefits of the Sherman Act, this indirect effect must be given its due.

Finally, the symbolism of the Sherman Act—its commitment to a market economy, its assumption that competition is the best regulator of markets and its profession that government can control abuse—has had a dramatic impact outside the United States. The Sherman Act was not the first national antitrust legislation, but it has been the most influential. The world has moved in our direction. The examples are obvious—Germany, the EEC, and so on. No country has fully imitated the Act, and perhaps their antitrust systems are the better for it. The Act, after all, is hardly perfect.

But if we as a nation are best served when free market economies predominate throughout the world, in part because economic and political liberty go hand in hand, then we have also been well served by the Sherman Act, which perhaps more than anything else has been the symbol of our commitment to such an economy.

In June, 1989, I attended a small conference of American and Chinese scholars who were experts in something broadly called "economic law." It was in many ways an astonishing event. Among other things under discussion were drafts of Chinese bankruptcy, commercial, banking and, yes, antitrust legislation. The antitrust discussion sounded very familiar to one with a background in the Sherman Act. My observation during the euphoria of that conference that "I never thought I'd live to see the day when China had an antitrust law" turned out, I am afraid, to be tragically prophetic. Several hours after our Chinese colleagues boarded aircraft to begin their long journey home, government troops entered Tiananmen Square. The ideas we discussed died that night along with the gallant young Chinese who sought only a degree of freedom. But the point of our discussions was clear. Antitrust was necessary to preserve competition, according to our Chinese friends; otherwise plant managers, unwilling to bear the risks a free market imposes, would simply collaborate among themselves. But antitrust was seen as something more. It was a powerful symbol of commitment to a market economy, and to the principle that society must keep some check on accretions of private power.

I do not know how the benefit of such symbolism can be measured. But it is real, and an important part of the benefits of the Sherman Act.

Has the Act been worth the costs of enforcement and errors along the way? Surely it has, although its benefits cannot be quantified. What of the future? The impulse to cartels won't go away. Nor will the urge of government toward monoploy. Entry will not always be free, and cartels will not inevitably fail. The Act is still needed, and can accommodate new learning in the next century just as it has in the past if we are smart enough just to leave it alone.

REMARKS BY RICHARD SCHMALENSEE, MEMBER, COUNCIL OF ECONOMIC ADVISERS

It is an extraordinary honor and privilege to appear before you today with such distinguished speakers on this historic occasion. When Jim Rill invited me to speak today, he told me that my task was to represent an important antitrust constituency—economists. I am happy to do this for two reasons.

First, as any economist will be more than happy to tell you we are an underepresented—and in this town sometimes persecuted—minority. This is one of the very few Washington settings in which we could actually be described as an *important* constituency with a straight face.

Second, since we try to address issues from an economy-wide perspective at CEA, we sometimes think that the members of the American Economic Association are in fact our only constituents. And on our bad days, even they desert us.

I think I represent the views of most of my constituents correctly when I join the chorus and assert that this centennial does indeed call for a celebration. Some laws stay on the books for a long time because they are forgotten; the Sherman Act has endured because in some important senses, it has worked. The Act has had a long and productive life, one that has made our economy better than it would have been. And it has been a fruitful life; the Sherman Act has given birth to a broader antitrust policy that has many good years added ahead of it.

Some of you may expect me to support the assertion that antitrust deserves an economist's praise with numbers, but I cannot do this. This is in part because antitrust has had two very different sorts of effects on the U.S. economy. First, it has had direct effects: antitrust enforcement—and the fear of antitrust enforcement—have directly affected the economy's performance. Second, antitrust has had indirect effects: it has affected the formulation and evolution of public policies in other areas.

While I, personally, have little doubt that antitrust's direct effects have been positive, I cannot imagine how to quantify them. I have no doubt whatever that Section 1's prohibition against cartel behavior has made the U.S. economy more competitive, internationally as well as domestically. I also think that anti-merger policy has prevented a good deal of monopolization by merger—though in some periods it has also stopped more than a few efficiency-enhancing mergers. The economic effects of the other provisions of the antitrust laws, including every economist's favorite, the Robinson-Patman Act, are surely more problematic: some monopoly abuses may have been prevented, but so has some efficiency-enhancing conduct.

Thus, while the record is—inevitably—mixed, I agree with Tom Kauper that the Sherman Act's clear signal that the monopoly road to profit is closed—or at least intentionally rough—has surely increased competition and thus enhanced economic performance and consumer welfare.

The positive indirect effects of antitrust on the economy via other public policies may be more important; they are certainly even harder to measure. The antitrust laws are an expression of faith that competitive markets will generally serve the public interest well—faith that Adam Smith's seminal insight was correct. This faith is widely-shared these days—particularly in Chicago, Warsaw, and Prague—but it has not always been.

The presence of the antitrust laws has offered an alternative to public ownership and intrusive regulation that has remained viable through a century's dramatic political and economic changes. While the frequent calls for "more vigorous antitrust enforcement" in platforms of both parties have brought smiles to the lips of many cynics—including mine—it is interesting to think what else might have been prescribed if antitrust medicine were not available. And even in my short stay in Washington, I have more than once been able to use "the antitrust laws can handle that" as a winning argument against heavy-handed "fixes" to alleged competitive imperfections.

I don't want to overstate the case here: the Sherman Act surely did not create Americans' faith in competition, but I do think it has helped to sustain that faith through both tough times and many small temptations.

Let me now represent my constituents in a second way—by reflecting briefly first on what antitrust has done for economists and then on what economists have done for antitrust.

When I first took courses in industrial organization economics in the mid-1960s, I learned that a central goal of the field was to inform antitrust policy. This view began, I think, with the work of Chamberlin, Mason and others at Harvard in the 1930s;

it was certainly widely-held by the 1950s. In England, where industrial organization as a distinct field dates back to the earlier work of Alfred Marshall, competition policy was rarely if ever viewed as the object of the exercise. I think the historically greater and highly productive stress in the U.S. on general rules—empirical and, more recently, the theoretical—than on the details of particular industries flows in part from this difference in goals.

While this argument may be disputed by some of my constituents, there can be no dispute at all that antitrust has served U.S. industrial organization well as an exceptional data source. One of the great frustrations of this field is the difficulty of getting good information on firms' costs, policies, and objectives. Antitrust cases, particularly the big ones that produce large public records, have long been a rich source of well-documented examples of business behavior and market processes. Many of the classic works in industrial organization have been closely besed on particular antitrust cases. Thus, from an academic, if not a policy viewpoint, I would urge Jim Rill to bring Section 2 cases in two or three interesting industries.

I cannot quantify these two effects, but I would argue that they are not unrelated to the fact that U.S. has long dominated the world market in industrial organization.

Let me turn, finally—and with a good deal more humility—to what economists have done for antitrust. I must admit at the outset that we, as a profession, were not present at the creation. American economists in 1890 tended to be Darwinists; those few who cared about the Sherman Act viewed it as a potential negative force that might hinder the natural evolution of big business. From today's vantage point, it is interesting to note that this attitude of semi-benign neglect persisted for almost half of the Sherman Act's first century.

Some observers suggest that economists assumed the lead in the antitrust play in the 1980s, but I would dispute this—for two very different reasons. On the one hand, as long as lawyers decided cases presented by other lawyers, economists cannot be the stars—though we can occasionally turn in good supporting performances as consultants, expert witnesses, and commentators.

On the other hand, I think economists began to plan an important role in antitrust well before the 1980s. Economists have been present in the Antitrust Division since the late 1930s. The mention the cross-price elasticities of demand in the 1956 *Cellophane* decision used to be discussed in undergraduate economics classes with the sort of reverence normally reserved for passages from scripture. For better, or worse, the anticoncentration thrust of antitrust policy in the 1960s received considerable support from what was then the mainstream of industrial organization, as well as from populist sentiments. And, finally, the Antitrust Division's Economic Policy Office was founded in 1974, the year *General Dynamics* was decided.

Since the mid-1970s, I think the role of economists in the antitrust play has changed in two importants ways. First, their script has changed: the Chicago school's influence grew enormously, and antitrust policy heeded economists' growing calls for restraint and for greater concern with efficiency. Second, lawyers have begun reading from the same script as economists: the language of antitrust has changed, and there is more explicit use of economic terminology and economic reasoning. My constituents naturally think this is a good thing.

These developments illustrate a key strength of antitrust in general and of the Sherman Act in particular: its remarkable flexibility. Whatever Senator Sherman's intentions, he and his colleague drafted a "charter of economic freedom" that could not only survive the invasion of antitrust by economists, but could also change when economics changed. This achievement—and its positive effects on both the U.S. economy and U.S. economics—richly deserve today's tribute.

REMARKS BY GARY R. SPRATLING, CHIEF, SAN FRANCISCO OFFICE, ANTITRUST DIVISION

I. INTRODUCTION

When I first saw an advance copy of the program for today's ceremony, I immediately was struck by two thoughts:

First, I thought (and I'm sure most of you also thought): Someone has put together, for the most part, a great lineup of speakers for the occasion . . . but what is Spratling doing on the program with the heavy hitters?

Second, I thought: Since I am on the program, what in the world am I going to talk about, especially since I am batting at the bottom of the order?

There were a number of subjects I knew I could not plan to talk about, given who the other speakers were and the likelihood that they would cover certain areas. I knew I couldn't plan to talk about "government enforcement of the Sherman Act"—not with Attorney General Thornburgh and the country's chief antitrust enforcer, Assistant Attorney General Rill, leading off the program. I assumed that "judicial interpretation of the Act" was off limits, with Judge Wood on the program. I had the same thought with respect to "private antitrust enforcement," "development of antitrust theory," and "economic effects of the Sherman Act," with Dick Pogue, Professor Kauper, and Dr. Schmalensee as speakers.

Well, what was left? . . . Everybody's favorite subject: "Highlights from the legislative history of the Sherman Act." Now, I know that the prospect of hearing about that subject excites all of you about as much as speaking on the subject did me at first. But, before you all head for the doors to get an early start on the reception, you should know that the debates on the Sherman Act are very engaging and provocative. Although I have introduced the subject jokingly, I was amazed to discover how interesting and instructive the Sherman Act debates are; how accurately the debates foreshadowed the enforcement issues of the first 100 years, up to and including today; and how fervently everyone approached the debates.

There is no doubt that the senators and representatives who debated the Sherman Act felt real passion for or against it, and that the conduct targeted by the Act was regarded by its proponents as one of the most critical economic and legal problems facing the country.

Let me give you the flavor.

II. THE DEBATES

On March 21, 1890, Senator John Sherman, a Republican senator from Ohio, who two years earlier had narrowly lost his party's nomination for President of the United States, rose from his senate chair, and said in support of his proposed Bill:

"Mr. President:

"[A]ssociated enterprise and capital are not satisfied with partnerships and corporations competing with each other, and have invented a new form of combination, commonly called "trusts," that seeks to avoid competition. . . .

"The . . . object[s] of such a combination [are] to make competition impossible[;] . . . [to] raise or lower prices, as will best promote its selfish interests[;] . . . [and] to increase the profits of the parties composing it. . . . Such a combination . . . tends to advance the price to the consumer . . . [;] and in some cases should be denounced as a crime, and the individuals engaged in it should be punished as criminals. . . .

"If we will not endure a king as a political power, we should not endure a king over the production, transportation and sale of any of the necessaries of life."

But Democratic Senator James George, a former Chief Justice of the Mississippi Supreme Court, had grave doubts about the constitutionality and effectiveness of Senator Sherman's Bill. In a blistering attack on the bill, denouncing its scope and purpose, he concluded:

"Mr. President, I have shown that this bill is utterly unconstitutional, and, even if constitutional, utterly worthless. If we pass it we do not only a vain and useless thing; we do a wicked thing. We give to a suffering people as a remedy for a great wrong, that which will not only prove utterly inefficient, but will prove an aggravation of the evils.

". . . [The bill is] a sham, a snare, and a delusion. And that is just a sample of Senator George's lengthy, detailed, and vitriolic rebuke. What does one say in response to such a strident critique? Well, I suppose one of the late actress Gilda Radner's characters probably would have said: 'Oh, picky, picky, picky. . . . You know, it's always something.'"

But Senator Sherman, the preeminent advocate of the 51st Congress, and every bit the match of Senator George, responded:

"[The purpose of the bill] is to arm the Federal courts . . . in checking, curbing, and controlling the most dangerous combinations that now threaten the business, property, and trade of the people of the United States. And for one I do not intend to be turned from this course by fine-spun constitutional quibbles or by the plausible pretexts of associated or corporate wealth and power."

After the Judiciary Committee substantially revised the Bill and issued a report that allayed many concerns as to the Bill's constitutionality, the revised Sherman Act passed the Senate by a vote of 52 to 1. It went to the House, where the debates continued. On the one hand, Representative Heard from Ohio, in a passionate appeal, argued:

"[It is] our duty to the people who are being robbed, who . . . rely upon us for protection . . . [to] decide whether . . . by acquiescence in the continuation of the wrongs become parties to the wrongdoing . . . [or whether to] uproot and utterly destroy these evils. . . ."

On the other hand, Representative Bland from Missouri said: "The bill is not worth a copper. . . ."

III. ISSUES FORESHADOWED

A. A striking number of the issues confronted by, and debated in connection with, the Sherman Act foreshadowed current issues. For example, at one point in the debates, Senator Sherman summarized one argument against the Bill as follows:

"[Opponents of the bill] say, competition is open to all; if you do not like our prices, establish another combination or trust."

Recently I heard a not dissimilar argument from an economist making a presentation on behalf of parties whose merger was under review—admittedly a Clayton Act, not a Sherman Act question. But the argument—a barriers to entry argument—in today's vocabulary ran something like: "high supply elasticity of the competitive fringe should negate any inference of market power based on market share or the Herfindals alone."

And I'm sure some of you in the room even know—or think you know—what that means.

B. Another example of an issue that was debated in 1890, and is still very much with us, is what we today call "efficiency arguments." Senator Sherman observed during the debates:

"It is sometimes said of these combinations that they reduce prices to the consumer by better methods of production. . . ."

The same arguments are still made, of course, but with far more esoteric vocabulary and sophisticated language. In the context of a Clayton Act merger review, the 1890 argument might be articulated in today's language—some might even say today's "code"—as: "the reduction in costs to the merging firms, due to economies of scale, offsets any deadweight loss created by any possible resulting supracompetitive pricing."

The economists in the audience are thinking, "Sure, that sounds right." But, of course, nobody talked that way in 1890, not even economists.

In the analysis of a resale price maintenance program, the 1890 argument might be expressed in today's phraseology as: "the practice increases distributive efficiency by eliminating 'free rider' problems and ensuring the optimal amount of point-of-sale serices."

You know, this new jargon doesn't come cheap, and that the debaters did not predict. But then, how could the drafters possibly have foreseen how complex and sophisticated the arguments surrounding many issues would become; or how few individuals in the economic and legal disciplines would be qualified to formulate them; or how much money some of you would charge to make them.

C. Another issue clearly foreseen by the Sherman Act's drafters was that cartel-like behavior is a serious crime that would undermine the workings of a free market. In 1890, the proponents of the Sherman Act referred to cartel behavior as "conscienceless fraud" and "robbery." In 1990, Assistant Attorney General Rill, in very similar language, has referred to it as a "crime of deceit and fraud, no different in effect than outright theft."

In the area of criminal prosecutions, which has been the subject of very little change over the last 100 years, besides the increase in penalties, the vocabulary and language trend has been in the opposite direction—away from flowery and high-sounding, toward ordinary and mundane. Today, the charges in antitrust indictments typically end in the phrase, "All in violation of Title 15, United States Code, Section 1." In our first successful criminal antitrust prosecution, brought against the Federal Salt Company in 1903 in San Francisco, the indictment concluded, "All against the peace and dignity of the said United States, and contrary to the form of the statute in such case made and provided."

IV. SOME PREDICTIONS WRONG

A. A reading of the legislative history will convince anyone that the senators and representatives debating the Sherman Act were remarkably astute and foresightful. These were really smart guys. But "smart" doesn't mean "right all the time," and on some points the proponents and opponents were dead wrong in their predictions. For example, Senator Sherman, in arguing the importance of corporate penalties over individual penalties, declared:

"These corporations do not care about your criminal statutes aimed at their servants. They could give up at once one or two or three of their servants to bear this penalty for them. But when you strike at their powers, * * * when you deal with them directly, then they begin to feel the power of the Government."

However, the reality of criminal antitrust enforcement explodes that prediction. Those of us who prosecute criminal cases know that corporations readily offer—indeed, go to great lengths to get us to consider—payments of huge sums of money by the corporation in fines, restitution, and/or damages in exchange for keeping their executive from spending even one night in jail.

B. Similarly, the legislators of 1890 were wrong in their skepticism of the efficiency of private rights of action under the Sherman Act. The previously mentioned Senator George predicted:

"I do not hesitate to say that few, if any, of such [private antitrust] suits will ever be instituted, and not one will ever be successful."

Even Senator Sherman conceded that:

Very few [of these] actions will probably be brought.

Obviously, Senators Sherman and George did not count among their acquaintances the likes of Harold Kohn, Joe Alioto, Max Blecher, Steve Sussman, Harry Reasoner, Fred Furth, David Shapiro, and a good number of you. Nor did their predictions even contemplate the possibility that over 33,000 private antitrust suits would be instituted under the Act in its first 100 years.

C. Finally, on at least one issue Senator Sherman was half-right and half-wrong. He made the following statement in defense of his Bill's provision conferring a right of action by the federal government.

". . . [E]ven the United States is scarcely the equal of a powerful corporation in a suit where a single officer with insufficient pay is required to compete with the ablest lawyers encouraged with compensation far beyond the limits allowed to the highest government officer."

Well, while Sherman was sure right in saying that government officials are underpaid, he was just as wrong in predicting that government prosecutors would not be the "equal" of corporate defense attorneys. The Antitrust Division's long record of victories, and of convictions as a percentage of cases brought, repudiates that pessimistic prediction.

V. CONCLUSION: ONE OF THE MOST INFLUENTIAL PIECES OF LEGISLATION IN THE WORLD

In conclusion, those who debated the Sherman Act's passage foresaw many of the issues regarding its enforcement and gave us legislation of great vision and vitality. There remains no debate regarding the soundness of the Act's underlying premise that free and open competition must be preserved. The underlying concept has proven itself in the marketplace of ideas, and the Act drafted by a senator from Ohio 100 years ago has become one of the most influential pieces of legislation in the world. The Act has effectively maintained competition in the American economy during the first 100 years of its life, and its vital signs give every indication of continued good health for the next 100 years. Moreover, this magna carta of free enterprise has now spawned imitators around the world, becoming the model for modern and developing economies.

It seems appropriate to now turn the program back, for the purpose of its conclusion, to the person who will lead us into the second century of enforcement under the Sherman Act, the person who has been chosen by the President to consult with foreign countries contemplating privatization and a transition from state owned to free market economies. Thank you, and I give to you Assistant Attorney General Jim Rill.

Mr. INOUYE. Mr. President, I am pleased to join with my colleagues in commemorating the 100th anniversary of the Sherman Antitrust Act.

Prior to 1890, monopolists had a controlling force on the marketplace that drove small enterprises out of business and prevented other companies from even entering the market. Their power was so destructive that the demand for legislative relief was met with great unanimity.

Legislative relief occurred on July 2, 1890, with the enactment of the Sherman Antitrust Act. Associated with the name of Senator John Sherman of Ohio, its original authors were members of the Senate Judiciary Committee—George F. Edmunds of Vermont and George F. Hoar of Massachusetts.

The legislation was entitled: "An act to protect trade and commerce against unlawful restraints and monopolies." It marked the beginning of the attack on monopolies in the marketplace and the ending of unreasonable combinations and conspiracies. It was effective in restoring and maintaining a free and undirected market and in restricting collusion, price fixing, agreements not to compete, agreements to divide markets and group boycotts.

The Sherman Antitrust Act helped to foster the development of our present economic system—the notion of competition and freedom of trade directed by consumer demand.

Mr. President, I am pleased to join my colleagues in commemorating the 100th anniversary of the enactment of the Sherman Antitrust Act.

TOWARD PEACE IN CENTRAL AMERICA

Mr. KENNEDY. Mr. President, developments in Central America over the past several months, particularly in Nicaragua, have held out hope, for the first time in a decade, that a process for peace may replace years of violence and conflict. Peace initiatives and negotiations have secured this hope in Nicaragua, and hold out this prospect for El Salvador. But many obstacles remain.

Fundamental to the peace process is the ability of the governments in the region, with the support of the international community, to resolve the many refugee, humanitarian, and human rights issues that threaten peace and stability.

In order to assess progress on these issues, and to determine what further the United States should do to assist, the Subcommittee on Immigration and Refugee Affairs, which I chair, sent last month a staff mission to the area. In cooperation with my colleague, Senator SIMPSON, the ranking member on the subcommittee, we asked Jerry Tinker, the subcommittee's staff director, Michael Myers, counsel, Richard Day, minority chief counsel and staff director, and Gare Smith of my staff, to visit El Salvador, Nicaragua, Honduras, and Panama.

Some weeks ago they made their report to us and in internal memoranda to the subcommittee. But I would like to share with my colleagues, and for readers of the RECORD, a summary of the overview of their findings and observations.

Mr. President, the countries of Central America, especially Nicaragua and El Salvador, are at a critical juncture in the peace process. Central to this effort is resolving the many refugee, displaced persons and human rights problems in the region. Some progress has been achieved, but as our staff report suggests, much more remains to be done. This means rethinking our current programs of assistance, to assure that they will contribute to the removal of the obstacles to the peace process, and not maintain the existing status quo.

Mr. President, I ask that a summary of the subcommittee's staff report be printed at this point in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

TOWARDS PEACE IN CENTRAL AMERICA: RESOLVING REFUGEE AND HUMANITARIAN PROBLEMS

(Summary—Staff Report prepared for the use of the Subcomittee on Immigration and Refugee Affairs, Committee on the Judiciary, U.S. Senate, July 1990)

After a decade of escalating war and conflict throughout Central America—with civil wars spilling violence and instability into neighboring countries along with tens of thousands of refugees—the countries of the region are finally seeking peace and negotiated settlements. The parties to the conflicts, both governments and insurgents, are exhausted from years of endless war, of deteriorating economies, mindless bloodshed and human rights violations on all sides. With the assistance of the United Nations and neighboring Central and Latin American countries, as well as the humanitarian intervention of many nations, the prospects for peaceful change in Central America have never been brighter than today. In the case of Nicaragua, this process is well underway; in El Salvador it is just beginning.

The over-riding goal of United States foreign policy must be to advance this process, and all our diplomatic efforts and foreign assistance programs should be designed in support of this objective. This means rethinking our current economic and military assistance policies, so that they will contribute to the removal of the obstacles to the peace process, rather than simply maintaining the status quo.

Particularly critical at this stage is helping to resolve the many refugee, displaced persons and human rights problems in the region. They remain one of the principal obstacles to peace and stability.

The focal point today is Nicaragua, where—after a shaky start—the peace process as proceeded apace, but still faces significant obstacles. But thanks to the role of the United Nations, the Organization of American States, and several outside countries, the demobilization and disarmament of the contras has now been completed, following the negotiated and internationally supervised election of Mrs. Violetta Chamorro and her government. Serious hurdles remain, however, in the effort of President Chamorro go gain political, economic and security control of the country, (as the recent strikes in Managua illustrate).

In El Salvador the conflict continues, but both sides seem ready to begin serious negotiations. However, the path to peace in El Salvador will likely be far more difficult and dangerous, and must overcome deep-seated fears and the scars of many years of insurgent terrorism and military death squads.

1. NICARAGUA

Repatriation of the resistance

Second only to the elections, the demobilization of the Nicaraguan Resistance (the "contras"), was the most critical step in the peace process. Once the leadership of the Nicaraguan Resistance was persuaded by United Nations and international guarantees to commit their lives and security to the demobilization process, it moved forward only slightly behind the negotiated schedule. But the continuing needs, and fears, of the contras are genuine, and they need to be addressed in the months ahead.

First, there is obviously a need for a continued role of the United Nations and the OAS for protection and assistance in the field. There will be additional need for funding for immediate relief as well as for longer-term resettlement and integration programs.

The current test of the peace process rests with the Government of Nicaragua and its still "Sandinista-controlled" security forces—whether they will abide by the strict terms, as well as the spirit, of the negotiated agreements for the protection and reintegration of the contras. The United States should support a continued United Nations observer role in the field, and the involvement and monitoring of the Church both have played critical roles to date in the demobilization process.

Humanitarian needs of the Miskito Indians

The repatriation of the Miskito refugees from Honduras is well underway. But with the growing economic crisis affecting the eastern provinces to which they are returning, will require an emergency assistance program to assist the Miskito Indian community. There are urgent food and medical needs which a USAID disaster assessment team should survey in the short-run while a longer-term aid program is specifically designed to address the special needs of the Indian community in eastern Nicaragua.

Refugee/displaced persons assistance

With tens of thousands of refugees returning to Nicaragua from Costa Rica and Honduras, and the demobilization of the contras—all on top of an already existing 40% unemployment rate—requires that employment generating programs be established. An example would be a USAID food-for-work program, using P.L. 480 food, targeted to voluntary agency programs—and specific employment generating projects.

Economic stabilization

Finally, the over-riding issue before Nicaragua today is the need to achieve economic stability—to end the years of rampant inflation and economic stagnation caused by the conflict, the U.S. embargo, and the gross mismanagement and corruption of the former Sandinista government. Urgent commodity support has been provided by the United States, and following a donors conference in Rome in June, additional economic assistance and credit support has been offered by a number of European nations and Japan. But these are economic "band aids" while longer-term programs of economic reform and restructuring take place.

The largest share of the current U.S. aid package is for basic commodity support. But in programming this assistance, we must not lose sight of programs targeted for the most needy in rural and urban areas, such as maternal/child health, basic public health programs, and small scale agricultural projects and income generating schemes.

2. EL SALVADOR

Removing the obstacles to peace

Although a new peace process has begun in El Salvador, with negotiations underway and future meetings scheduled—and there is a genuine desire for dialogue by both parties—still serious obstacles to peace remain. Unless as many of these obstacles are removed as possible, the peace process will be in danger.

The first is to the control of violence. For the government this means control of death squads, vigilantism, and the protection of basic human rights. This task is most graphically symbolized in the senseless killing of the Jesuit Priests and what that case says about human rights and the judicial process in El Salvador. For the FMLN this means accepting a defacto, if not negotiated, cease-fire in place and a cessation of further terrorist attacks on the population. The FMLN has a serious obligation to reduce violence and maintain a climate of peace so that good-faith negotiations can proceed.

Second, is meeting the basic human needs of refugees and displaced persons. Unless this festering problem is addressed, it could become a source of conflict. The government must finally deal with the residual population of displaced persons, many thousands of whom have lived in squalid camps for nearly a decade—since the civil war escalated in the early 1980's. Programs for their resettlement and integration should be accelerated as well as those which are directed to meeting the basic human needs of the general population. USAID funds should be re-directed to this end.

Also, both the government and the FMLN must cooperate to assist those refugees who have returned from Honduras, to reintegrate into their communities in peace and security. This means the government must permit free access and allow genuine humanitarian assistance to reach those per-

sons in conflicted areas, and for the FMLN to honor this commitment by not misusing this assistance.

Conditioning U.S. assistance

To promote the peace process—to help assure that all segments of the government have a strake in its success (particularly the Salvadoran military)—the U.S. should condition continued military assistance on good faith efforts by the government to advance the peace process, and redirect economic assistance to removing the obstacles to peace rather than simply maintaining the status quo. Our commodity support programs are akin to a respirator which has kept ailing El Salvador's economy alive while war has bled its people.

Conditioning of U.S. assistance should be positive in nature, not punitive—to provide incentives for all sides to pursue peace instead of conflict. And humanitarian assistance should remain the most important priority of our overall assistance package.

3. REGIONAL HUMANITARIAN ISSUES

Nicaraguan repatriation: The Honduran government has given the Resistance until November 1 to return, and most are likely to do so long before that deadline, despite concerns about their personal security and economic support in Nicaragua. However, failure to clarify these issues may cause some members of the Resistance, as well as refugees, to seek to remain in Honduras.

A major complaint of the Resistance has been the reduction in the levels of humanitarian assistance that occurred when responsibility for that assistance shifted from USAID to the U.N. High Commissioner for Refugees. USAID had been providing food and other assistance at levels appropriate for combat units. Now, however, UNHCR is providing food at levels slightly above the normal U.N. requirements for refugee assistance.

In addition, the abrupt transition from AID to UNHCR assistance presented some immediate administrative obstacles to the UN. And the task was further complicated by the fact that the early groups of Resistance members to return to Nicaragua took with them much of the physical infrastructure and health care network that had sustained the Resistance in Honduras for the past eight years.

While the current program is sufficient for a brief transition, if the return of Resistance members and refugees is delayed, then adjustments in camp accommodations and assistance will be necessary.

Coordination: Given the complexities and multiple components of the repatriation and reintegration picture, the international community must continue its regional coordination role. This includes not only the major issues, such as the demobilization of the Resistance and assurances for their security, but also such smaller programs as the re-integration of disabled veterans of the Nicaraguan Resistance, the return to Nicaragua of former prisoners of the Resistance who had been reluctant to go home, and more.

In this context, special attention must be given not just to the efforts of the United Nations and the Organization of American States, but the United States should also join with other governments in supporting the continuing efforts of the International Conference on Central American Refugees (CIREFCA). Governments in the region, through the CIREFCA process, have proposed a number of realistic projects for meeting humanitarian and developmental needs in the region, and these are worthy of U.S. support.

CONCLUSION OF MORNING BUSINESS

The PRESIDENT pro tempore. The hour of 9 a.m. having arrived, under the order, morning business is closed.

FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT

The PRESIDENT pro tempore. Under the order, the hour of 9 a.m. having arrived, Mr. BRADLEY is recognized to offer an amendment on which there will be 1 hour of debate to be equally divided and controlled in the usual form, which means that Mr. BRADLEY will control half the time and the manager of the bill, Mr. LEAHY, if he opposes the amendment, will control half the time. If he agrees to the amendment, then the time in opposition to the amendment will be in the control of the minority leader or his designee.

The clerk will report the bill, S. 2830.

The legislative clerk read as follows:

A bill (S. 2830) to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes.

The Senate resumed consideration of the bill.

The PRESIDENT pro tempore. Has the Senator offered his amendment?

Mr. BRADLEY. The Senator is prepared to offer his amendment at this time.

AMENDMENT NO. 2314

(Purpose: To provide a substitute amendment for the sugar title)

Mr. BRADLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDENT pro tempore. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from New Jersey [Mr. BRADLEY], for himself, Mr. ROTH, Mr. MOYNIHAN, Mr. CHAFEE, Mr. REID, Mr. RUDMAN Mr. LAUTENBERG, Mr. PELL, Mr. BRYAN, and Mr. KERRY, proposes an amendment numbered 2314.

Mr. BRADLEY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

Beginning on page 310, strike line 1 and all that follows through page 312, line 11, and insert the following:

"SEC. 206. SUGAR PRICE SUPPORT FOR 1991 THROUGH 1995 CROPS.

"(a) IN GENERAL.—The price of each of the 1991 through 1995 crops of sugar beets and sugarcane, respectively, shall be supported in accordance with this section.

"(b) SUGARCANE.—The Secretary shall support the price of domestically grown sugarcane through nonrecourse loans at such level as the Secretary determines appropriate, but not less than 16 cents per pound for raw cane sugar, except that the level may be increased under subsection (d).

"(c) SUGAR BEETS.—The Secretary shall support the price of domestically grown sugar beets through nonrecourse loans at such level as the Secretary determines is fair and reasonable in relation to the loan level for sugarcane.

"(d) INCREASE IN SUPPORT PRICE.—

"(1) IN GENERAL.—The Secretary may increase the support price for each of the 1991 through 1995 crops of domestically grown sugarcane and sugar beets from the price determined for the preceding crop based on such factors as the Secretary determines appropriate, including changes (during the 2 crop years immediately preceding the crop year for which the determination is made) in the cost of sugar products, the cost of domestic sugar production, and other circumstances that may adversely affect domestic sugar production.

"(2) REPORT.—If the Secretary makes a determination not to increase the support price under subparagraph (A), the Secretary shall submit a report containing the findings, decision, and supporting data for the determination to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

"(e) ANNOUNCEMENTS.—The Secretary shall announce the loan rate to be applicable during any fiscal year under this section as far in advance of the beginning of that fiscal year as is practicable consistent with the purposes of this section.

"(f) TERM.—Loans under this section during any fiscal year shall be made available not earlier than the beginning of the fiscal year and shall mature before the end of the fiscal year.

"(g) CROPS.—Notwithstanding any other provision of law, this section shall be effective only for the 1991 through 1995 crop of sugar beets and sugarcane.".

Mr. LEAHY. Mr. President, will the distinguished Senator from New Jersey yield to me for 1 moment?

Mr. BRADLEY. By all means.

Mr. LEAHY. Mr. President, I ask unanimous consent that in my absence, the time allotted to me be under the control of Mr. CONRAD, the Senator from North Dakota.

The PRESIDENT pro tempore. The Senator managing the bill requests the time under his control be controlled by Mr. CONRAD.

Without objection, it is so ordered.

Mr. LEAHY. I thank the Senator from New Jersey.

Mr. BRADLEY. Mr. President, the amendment I am offering today is exceptionally simple. It extends the current sugar program for 5 years; it decreases the loan rate by 2 cents, from 18 cents to 16 cents.

Mr. President, this amendment would bring modest reform to a program that is today, I believe, completely irresponsible. The sugar program hurts the American farmer, harms American industry, frustrates American foreign policy goals, undermines our attempt to eradicate drugs, sets

back our trade policy objectives, endangers our environment, and does this at a direct expense to American consumers, all 250 million of them.

Yet, the proponents of the program call it a no-cost program. I say the costs are too great and it is time for a change. First, Mr. President, let me describe how this ingeniously designed, no-cost program works.

Under current law the Commodity Credit Corporation provides nonrecourse low-interest loans to sugar growers or processors, with the sugar standing as collateral. But current law also mandates that this program be managed at no cost to the Federal Government, meaning the Secretary of Agriculture must ensure that there are no defaults on the CCC loans.

As such, he must ensure that the domestic price for sugar stays above the loan rate plus shipping, handling, and storage. Because the resulting so-called market stabilization price must cover the highest-cost producer and the greatest transportation costs from Hawaii to the Northeast, the Secretary is forced to maintain a domestic price of about 22 cents a pound or 4 cents above the loan rate.

This is a pretty tall order, Mr. President, when we consider that the world market price for sugar is much lower. To fill it, the Secretary has only one tool to make sure that domestic prices stay high, and that is import quotas.

In ensuring our sugar program will work, the Secretary has had no choice but to slash imports from some of the poorest countries in the world. Mr. President, I believe this is a wrong policy.

First, I argue the sugar program now hurts American farmers more than it helps. In 1985, in the 1985 farm bill, all major commodities took a 10-percent to 15-percent cut in total support. Some had support target prices, some loans—all took a reduction, with the exception of sugar, which stayed at 18 cents. Wheat and corn reduced, cotton and rice reduced, milk reduced, soybeans reduced, others reduced, but sugar did not take a reduction in 1985. That is total support.

If we look only at the loan rate, we see, beginning in 1981, the loan rate went up dramatically and has stayed. The loan rate for other crops dramatically dropped. What this amendment would propose is reducing the loan rate by 2 cents, which, as we see, is still considerably above the loan rate for other crops.

Had the loan rate for sugar been set at a reasonable level in 1982, or had it been reduced to a reasonable level when we last debated this issue, the cost of this program to the American farmer would not have been so obvious. But the fact of the matter is when Congress, the Government, set the price, we set it too high. As a result, sugar is a highly profitable crop.

In other words, in 1985 sugar was the only commodity not to get a cut in its subsidy and it became more profitable than other crops like wheat, corn, oats, cotton, and soybeans. The question is, How much more profitable? Well, depending on how we determine profitability, according to USDA, whether it is gross value, profit margins, whatever—and there are different ways to calculate profitability—they all maintain that sugar is more profitable. But rather than just looking at accounting numbers, let us look at the tangible evidence.

In 1982, sugarcane was harvested on 700,400 acres. In 1989, that figure was up to 800,300 acres.

For sugar beets, it was harvested on 1 million acres in 1982; 1.3 million acres in 1989. So both cane and beets increased the acreage for production. I doubt we would have seen such an expansion of acreage planted in cane and beets had growers been operating at a loss.

Mr. President, there is a sequence here. High loan rate, high market stabilization price, high rate of return leads to more acres being planted and harvested. And more in some places, significantly more acres harvested in Florida and Louisiana in cane, for example, which increased 28 percent between 1980 and 1989.

In the case of beets, acres harvested in Minnesota, Michigan, Idaho, and North Dakota increased by 38 percent as these four States went from accounting for 52 percent of all beet acres in 1980 to 66 percent of all beet acres in 1989. Not surprisingly, profit margins for cane and beets in these regions.

So, Mr. President, more acres are planted because of higher return, because of higher market stabilization price, because of higher loan rate.

The expansion of acreage, interestingly, has not been matched by a dramatic increase in the number of growers. The reason that is so, I suggest, is because in many ways the industry is a cartel. Not everyone can grow beets. If they could, a lot of people probably would switch. But, instead, you have to be a member of a beet processing cooperative, and membership is not that easy to obtain.

So, Mr. President, the shift in land to sugar is a dramatic increase, and the closed nature of the industry has had an ominous impact on the social fabric of rural America. For example, in the Wall Street Journal on June 26, they ran a front-page article on the tensions that have developed in the heartland of the sugar beet area in Minnesota. In the article, the Wall Street Journal reports that neighbors and families are no longer on speaking terms because beet growers are buying up land once used for other crops—wheat, corn and other things. I would like to quote from that article:

> • • • Across a broad swath of southern Minnesota and elsewhere, beeters, flush with sugar profits, are outbidding other farmers whenever land is rented or a farm is sold. They are driving up land prices and rents, and crowding less fortunate farmers off the land. "We've lost a whole generation of young farmers," asserts Owen Gustafson, a Maynard grain grower and a leader of Fair Farm Policy, a group protesting "inequities" of sugar subsidies.
>
> • • • Marvin Freiborg, a member of a large family of beet growers who himself worked with hogs, assailed the sugar program two months ago in a letter to the editor of the Clara City Herald. "I've kept quiet longer than I should have," he wrote. "I'm tired of watching the majority of beet growers outbid neighbors on land, expand their operations year after year, drive nice pickups, buy new equipment. . . ."
>
> "My mom was just disgusted with me," says Mr. Freiborg, who had to give up his land last fall when his landlord raised the rent. "But I told the truth about what's happening. I had an awful lot of people call me, thanking me. They're just too timid to speak out."

Another one:

> • • • Ronald Carpenter says that when he showed up at land-rent auction here at LaRae's Cafe, alone among 20 beeters, "They laughed at me. They knew I couldn't afford the cash rent. I bid just to run up the price."

Then you have the anger between farmers, between beet growers. It has grown so strong that Wallace's Farmer reported that just this month many soybean farmers are intentionally overusing the pesticide Pursuit because the pesticide poisons their land against beets for 3 years and that is one way they are able to prevent beet farmers from buying them out.

So, Mr. President, I do not think that we want an agriculture policy or an aspect of an agriculture policy that brings tension and battle between our farmers.

Let us go back to the basic formulation: The high loan rates, the high market stabilization prices, high rate of return, expansion of acreage. By doing this, we are ensuring that America is going to be self-sufficient in sugar long before the decade ends. In 1988, we produced 7.3 million tons; both beets and cane increased. But this increase in production comes at a time when American consumption of sugar is declining from 10.2 million tons in 1980 to 8.3 million tons in 1989.

Mr. President, these combined effects, these two trends, a sharp rise in domestic sugar production and a decline in consumption, can force the Secretary of Agriculture, in order to maintain the market stabilization price, to strangle imports. Net imports fell from 3.9 million tons in 1981 to 1 million tons in 1988; in other words, about a 75-percent decline. All indications are that a simple extension of the program at an 18-cent loan rate

will lead to a virtual elimination of all imports so that high loan rates convert to high market stabilization price, more acres, more sugar, and, ultimately, no imports.

Some people might applaud no imports, but when there are no imports, this no-cost program will begin to cost the American taxpayer directly either through loan forfeitures as domestic surpluses make it impossible to maintain the market stabilization price or through an imposition of costly production and marketing controls, as is envisioned in the House bill.

Mr. President, on the basis of agriculture policy, to say the least, the sugar program is dubious. But on foreign policy, the consequences are even more severe. Going from roughly 4 million tons of imports to 1 million tons of imports has been absolutely disastrous. Over the last decade, we have spent literally millions promoting democracy in Central America and fighting the burgeoning drug trade in the Andean region. We have twice sent soldiers to die in a fight for interests in Grenada and Panama, while taxpayers shell out considerable sums of money for military and foreign assistance to the region.

Our sugar program blithly undermines our national security by closing our market to one of the few ways these same countries have to earn money. In other words, instead of allowing them to export something they have a comparative advantage in, get foreign exchange, create jobs, and increase the standard of living in their own country, we prefer to let them stay in poverty, block their export of goods in which they have a comparative advantage into the United States, and instead send them foreign aid.

Mr. President, this is perverse, to say the least, but it is not hyperbole. The Sanford Commission report released last year clearly indicates that the only way to bring some sort of stability to Central America is to encourage true economic development. Yet, according to the Department of Commerce, in 1987, cutting the sugar quota effectively transferred $126 million from the poor in the Dominican Republic to American sugar farmers, $90 million from the Philippines, $30 million from Guatemala, $200 million each from Panama and El Salvador—in 1 year.

This siphoning of wealth from these poor countries has continued unabated since then. In February, the Ambassador of El Salvador wrote: "Sugar is the second most important commodity for El Salvador in terms of jobs and foreign exchange. The loss of the United States quota over the last several years has had a devastating impact on our economy." Mr. President, this is an economy, I might add, that we send some $90 million in military assistance alone each year to help combat an insurgency that is created by this very economic devastation.

Then there is the Caribbean Basin Initiative. It is to encourage U.S. investment and increase the standard of living in the Caribbean countries. We like the CBI so much that we even extended it in perpetuity recently. While the CBI was to bring economic growth and social stability to the countries in the region, the Overseas Council estimates our sugar programs offset the entire benefit of the CBI. In other words, give the Caribbean countries with one hand, the CBI, and take from the Caribbean countries with the other hand through the sugar quota. The people are still in poverty.

I ask unanimous consent that a study by Terry McCoy, of the Latin American Studies Institute, University of Florida, be printed in the RECORD.

There being no objection, the study was ordered to be printed in the RECORD, as follows:

[Excerpts]

[Commission for the Study of International Migration and Cooperative Economic Development]

U.S. POLICY AND THE CARIBBEAN BASIN SUGAR INDUSTRY IMPLICATIONS FOR MIGRATION, MAY 1990

(By Terry L. McCoy)

A proposal to subsidize those Caribbean sugar imports to be refined in the United States and reexported for one year was never implemented, even though it had been passed by Congress. Although these efforts have thus far failed, Basin countries did benefit from temporary reallocation of the Nicaraguan quota in 1983 and the Panamanian quota in 1988 as the result of well-known political disputes with these countries and from the general increases in foreign quotas, due to domestic shortfalls. In spite of these recent gains, Caribbean Basin sugar exports to the United States fell by 73 percent between 1981 and 1989, and with recent events it seems likely that both Nicaragua and Panama will be returned to active quota status.

CONSEQUENCES

There are several ways to measure the effects of the drastic drop in Caribbean Basin sugar exports to the United States. The first is lost income. Messina reports that in constant dollars the total value of 1988 sugar exports from Caribbean Basin countries was $97,118,000 compared to $543,947,000 in 1981. This represents an 82 percent direct loss in hard currency export earnings because of lower quotas. It does not account for the loss resulting from lower quotas. It does not account for the loss resulting from lower world prices occasioned by the increased sugar dumped on the world market. Furthermore, it can be demonstrated that the exporters would have been better off in income terms without a U.S. sugar program with its higher quota price. Although this scenario would have meant a lower price per pound, free access to the U.S. market would have higher volume and greater income.

The loss in sugar export earnings more than offset U.S. assistance programs to the region and gains made under the CBI. This net loss comes in the midst of crushing foreign debt and the worst economic crisis since the Great Depression.

Nontraditional, CBI-promoted exports to the United States have increased. However, they have not come close to replacing the income lost from declining sugar sales. Because of their relatively low value-added (20 percent vs. 90 percent for sugar), it would take, for instance, a $4.5 million increase in textile exports to offset a $1 million decrease in sugar exports. That has not happened, and the best that can be concluded about the CBI is that the beneficiaries would have been even worse off without it. Put positively; the evidence demonstrates that small increases in the sugar quota would provide larger gains than the entire CBI program.

The second major consequence is the effect of declining sugar imports on Basin employment. Although the data is sketchy, the picture is alarming in a region where unemployment has grown as a consequence of economic crisis. According to one study, 400,000 jobs in 22 Caribbean Basin nations were lost from 1982 to 1988 as the result of the decline in U.S. import quotas. This contrasts with a gain of only 136,000 new jobs in nontraditional export industries. These figures may underestimate the impact of the declining quotas, since some Basin governments have continued to operate their sugar industries at a loss to avoid the social and political costs of laying off workers. From 1981 to 1985, total sugar production in the region declined by only 17,500 tons while quotas were cut by 200,000 tons. Presumably, much of the surplus sugar was sold on the world market at a loss. Nations with heavy debts and nagging fiscal deficits cannot afford to subsidize their sugar industries indefinitely, and sooner or later declining exports translate into fewer jobs. Whether this then results in social unrest, political instability and increased emigration remains to be seen, but it holds the promise for such dire consequences.

Table 4 enumerates the U.S. quota picture for each of the 12 countries covered in this paper. Although the percentage losses from 1981 to 1989 are comparable, effects vary from one country to another according to the importance of sugar in the local economy, nature and performance of the industry and its import intensity and dependence on the U.S. market. Because of these differences, we shall examine the consequences in individual cases or groups of countries.

THE DOMINICAN REPUBLIC

The hardest hit in both relative and absolute terms has been the Dominican Republic, which is a major source of Basin migration to the United States. Excluding Cuba, the Dominican Republic is the leading sugar producer in the Caribbean Basin. Sugar is very important to the economy, and the industry is heavily export-intensive and dependent on the U.S. market (about 70 percent of traded sugar went to the United States). In 1986, sugar accounted for 17.1 percent of the GDP; it was the second largest employer, supporting one out of every ten Dominicans; and it provided about a quarter of all foreign exchange. Among those employed are large numbers of Haitian cane cutters, and it is they who have traditionally born the brunt of the burden occasioned by adjustment in the sugar industry. The government is heavily involved in the industry, owning some of it and regulating all; and there is a tendency for the state to absorb losses rather than provoke strong political reactions by taking land out of production, closing unprofitable mills or

firing workers. This has obvious economic consequences.

Dominican sugar production had increased steadily. In the 1960s, it benefitted from reallocation of the Cuban quota; in the 1970s, it responded to high world prices and, for a time, free access to the U.S. market. Although the Dominican Republic received the largest quota allocation in 1982, its total tonnage dropped by nearly 50 percent and continued to decline before receiving small increases in 1988 and 1989. As of 1988, the accumulated loss from this cutback was $500 million. This produced instability in the public sector, which depends on sugar profits and export taxes as major sources of revenue.

The Dominican government, with assistance from U.S. AID, has pursued crop diversification to lessen dependence on sugar, but much of the sugar acreage is not suitable for other crops. At this point, it is the country that has suffered most from recent U.S. sugar policy.

GUATEMALA

Guatemala has the second largest quota of the Basin nations. Following a major expansion in the early 1980s, sugar became its third most important crop and second largest employer, with around 35,000 seasonal and full time workers. It is a major earner of foreign exchange, which until recently had been generated almost entirely through sales to the U.S. As access to this market has decreased, Guatemala, which has not significantly cut production, has increasingly sold its sugar on the world market at much lower prices. Overall earnings from sugar exports declined from an annual average of $81 million in the period 1975—Guatemala producers have successfully lobbied the government for high internal prices, which have partially offset export losses while adding to the fiscal deficit. There is an incipient effort to convert sugar cane to ethanol.

EL SALVADOR, HONDURAS AND COSTA RICA

These three Central American countries are small producers by world standards, and sugar is less dominant there than elsewhere in the Basin, but it is still important. Ironically sugar production rose in the 1970s and early 1980s in an attempt to lessen dependence on traditional exports. In the mid-1980s, the three benefitted from the exclusive reassignment of the Nicaraguan quota (which does not show up in Table 4), and they continued to increase production. But after 1985, cuts in their quotas were greater than gains from the Nicaraguan quota. Earnings from U.S. exports rose from $53.6 million in 1982 to $83 million in 1984 and then fell to $55 million in 1986. They have continued to fall, and now the three must face the probability that Nicaragua and Panama will regain their quotas. All three are experimenting with ethanol production from sugar cane.

TABLE 4.—U.S. SUGAR IMPORTS FROM SELECTED CARIBBEAN BASIN COUNTRIES

[Taw value, short tons]

Country	Average imports, 1975–81	Raw sugar quotas				Percent change, 1975–81–1989
		1982–83	1987	1988	1989	
Barbados	37,500	19,600	7,500	8,205	8,205	−78
Belize	53,000	30,800	10,010	16,692	12,770	−76
Costa Rica	82,990	42,000	17,583	19,578	22,925	−71
Dominican Republic	815,335	492,800	160,160	176,710	204,290	−75
El Salvador	129,090	72,800	26,020	28,815	33,488	−74
Guatemala	216,995	134,400	43,680	48,185	55,717	−74
Haiti	6,380	16,500	7,500	8,000	8,000	+25
Honduras	42,765	28,000	15,917	17,877	21,118	−51
Jamaica	47,890	30,800	10,010	16,692	2,770	−73
Panama	130,975	81,200	26,500	.....	33,663	−74
St. Kits-Nevis	19,120	16,500	7,500	8,000	8,000	−58
Trinidad-Tobago	31,550	19,600	7,500	8,588	8,205	−74
Totals	1,613,590	985,000	339,770	357,342	429,151	−73

JAMAICA, BELIZE, BARBADOS, TRINIDAD & TOBAGO AND ST. KITTS-NEVIS

As former British colonies, these five countries are signatories of the Lome Convention's Sugar Protocol which allows them to export sugar under preferential terms to the European Community. This means that they have both U.S. and E.C. quotas, but their sugar industries are in varying degrees of disarray. In fact, their combined production dropped from 819,000 tons in 1975 to 585,000 in 1981. Since 1981, overall production has stabilized, although individual countries are occasionally unable to meet their U.S. or E.C. quotas out of domestic production so they buy on the world market in order to earn the quota price and not lose the foreign exchange. In spite of recent declines, sugar remains very important in all five countries. It is a leading, if not the leading, export commodity and source of foreign exchange. The industry employs 45,000 (16 percent of the labor force) in Jamaica; 20,000 (25 percent) in Belize; 10,000 in Barbados; 15,000 in Trinidad and Tobago; and 6,000 (35 percent) in St. Kitts-Nevis. This employment profile and the high rates of unemployment in these countries make it difficult to reduce the labor force in response to declining demand. This has meant government subsidies for the sugar industry.

While their U.S. quotas have decreased by around 75 percent since 1981, overall earnings from sugar exports have dropped by less because of access to the E.C. market, which is the more important of the two. Diversification out of sugar has been a policy objective for some time, given the declining performance of the industry, but it has received a boost in recent years. Winter fruits and vegetables as well as ethanol are currently receiving attention.

PANAMA

The sugar industry has been an important source of employment and foreign exchange for Panama, accounting for 10–15 percent of total employment and 20 percent of export earnings in peak years. The industry expanded during the 1970s and early 1980s prior to resumption of U.S. quotas. Because Panama depends heavily on the U.S. market, the reduction in its quotas has had serious consequences. Overall earnings from sugar exports fell from $51 million in 1981 to no more than $10 million in 1987. In 1988, the U.S. government suspended Panamanian sugar imports as part of its economic sanctions against the Noriega government. Now that Noriega has been removed, the United States must reclaim the Panamanian quota from those countries to which it was temporarily assigned, reducing their earnings, yet the quota is so diminished that it does not constitute much of a contribution to the reconstruction of Panama, a country facing massive unemployment and foreign exchange shortages.

HAITI

Haiti was at one time the world's leading sugar producer. Although Haiti is currently assigned a U.S quota, which is actually higher than average annual imports during the 1975–81 period, the sugar industry has deteriorated to the point that Haiti is today a net importer of sugar.

IV. CONCLUSION

Summary

This paper has made the following points regarding the Caribbean Basin sugar industry, U.S. sugar policy and the consequences for migration: (1) sugar is central to the countries of the Basin; (2) U.S. sugar policy has been an important factor shaping the development of the Basin sugar industry; but (3) U.S. sugar policy is largely dictated by domestic forces and considerations while exporting countries dependent on the U.S. market can only adjust to changes in policy; (4) the most recent changes, which were adopted beginning in 1982, have produced a sharp and, until recently, persistent drop in Caribbean Basin sugar exports to the United States; (5) this decline has had serious consequences for the Basin at a time of deep economic crisis. The loss from sugar earnings has more than offset development assistance, most notably under the Caribbean Basin Initiative, thereby undermining U.S. foreign policy goals; and (6) while the linkages are not precise and the data only suggestive, it seems reasonable to conclude that current U.S. sugar policy indirectly encourages Caribbean Basin migration to the United States by contributing to unemployment, reducing the rate of economic growth and diminishing foreign exchange earnings.

There are prospects for change in this situation since both the Caribbean Basin sugar industry and U.S. sugar policy are at significant crossroads.

Mr. BRADLEY. Mr. President, he states the loss of sugar export earnings has more than offset U.S. assistance to the Caribbean Basin and Central America and offset the gains by the CBI. This net loss comes in the midst of pressing foreign debt and the worst economic crisis since the Great Depression.

Mr. President, take Nicaragua, our congressional preoccupation for about a decade. Violeta Chamorro says they need to reconstruct the Nicaraguan economy, ravaged by years of war and mismanagement. Sugar is a major export for the country. While her deficit is constraining our aid, we add insult to injury by telling Mrs. Chamorro, no, we are sorry but we are only going to import some 20,000 tons of sugar from Nicaragua, a 70 percent cut in their 1982 quota.

So, Mr. President, our sugar program treats all our allies equally badly, whether they are African States, the Philippines, Central America, Australia. During the debate on sugar in 1985, some opponents of reform were clearly willing to accept this foreign policy cost by saying our foreign policy objectives cannot be bought at the expense of our farmers. I suppose we are going to hear that again. OK. So we should say, forget all the talk about democracy and freedom when it comes to sugar.

Mr. President, I say that if we fail to change the sugar program that undermines our foreign policy, it is a cost to the American taxpayer.

Mr. President, I see the distinguished Senator from Delaware on the floor at the moment, and I am prepared to yield to him if he would like to make his statement at this time.

The PRESIDENT pro tempore. How much time does the Senator from New Jersey yield to the Senator from Delaware [Mr. ROTH]?

Mr. BRADLEY. I yield 5 minutes to the Senator from Delaware.

The PRESIDENT pro tempore. The Senator from Delaware [Mr. ROTH] is recognized for 5 minutes.

Mr. ROTH. I appreciate the courtesy of the Senator.

Mr. President, I rise today to join my colleague, Senator BRADLEY, in proposing this amendment to cut the loan rate for domestic sugar by 2 cents. I have said many times that this body must be willing to do all that is necessary to improve the competitive posture of America. Watching the exciting events transpire around the world, the democratization of Central and Eastern Europe, the unification of Germany, the rapid growth of the Pacific rim, we realize that we can no longer rest assured of world leadership. Even the most minor refinements to our system—like adjusting a spark plug another quarter turn in an engine—are necessary to keep our economy and competitiveness tuned and running well.

No longer can we afford false economies created by Congress to protect specific special interests. No longer can we afford to turn to the taxpayer time and again to finance grandiose subsidies. And no longer can we penalize our consumers through a form of domestic protectionism. Our objectives must be to let free market principles govern our economy. They built our nation. They made us No. 1. And I believe that with the right kinds of policies from this body, they will keep us there into the 21st century and beyond.

One minor adjustment—minor but with far-reaching implications—is the sugar subsidies that guarantee domestic sugar growers 18 cents a pound for raw sugar. As we know, this guarantee is to protect domestic growers from defaulting on loans issued by the Commodity Credit Corporation. To do this, the Secretary of Agriculture has to stabilize the domestic market price at 22 cents a pound which forces us into protectionism against exporting countries.

It is easy to see how this convoluted system artificially inflates the price of sugar for our consumers, while at the same time forcing our taxpayers to make up the difference, as will happen if the current program is extended. I guess it can be said that when you buy that lollipop for the grandchildren, or ice cream in summer, you are actually paying three times: At the counter, in your taxes, and to make up the difference in cost because the lower priced imported sugar is kept out of our market.

Unfortunately, however, our families are affected in more ways than one. Sure, the grocery bills are more costly—to guarantee high prices for domestic growers. But on top of this, our families are losing jobs. Sugar is a major food stuff—a major ingredient in food stuffs—and since our domestic prices are kept artificially high, confectioners, bakers, candy manufacturers—they are finding it easier to do business outside of our borders—to go into Canada and Mexico where they can get sugar at international prices at around 12 cents per pound—that is 10 cents lower than their cost in the United States. We have retailers finding it less expensive to import sugar containing foods than to buy American-made varieties. These measures are estimated by the Department of Commerce to cost the American consumer between $2 and $3 billion a year.

What a heavy price to be extracting at a time when we need to encourage our folks to get serious about the emerging global economic community and the need to be competitive. The criteria for legislation on this floor over the next few years must meet the test of the three E's: Effectiveness, efficiency, and expense.

Mr. President, the current farm bill, with its proposal to extend the 18 cents per pound loan rate for sugar meets none of these. It is inefficient, ineffective, and very expensive to the consumer. Consequently, I am happy to cosponser this amendment to reduce the loan rate to 16 cents. Clearly, a 2-cent reduction is not going to restore the proper and necessary balance needed to the sugar trade. It is not going to drastically reduce the artificially inflated costs our consumers pay. But it is a step in the right direction. At best, it will bring the domestic sugar growing industry back to reality. Currently, that industry is planting crops at record pace to fatten itself on generous Government handouts—all which will be at the expense of the taxpayer.

All indications are that a simple extension of the program will lead to the virtual elimination of imports before the decade is over. At that time, this so-called no cost program—and the program has never really been no cost—will begin to cost the American taxpayer directly, either through loan forfeiture as prices decline below the loan rate, or through the imposition of costly production marketing controls. The time calls for action now.

If we do not begin now to restore some semblance of reality, our endeavors to do so in the future will become increasingly more difficult.

I urge my colleagues to support this measure.

Mr. BRADLEY. Mr. President, how much time remains on the proponent's side?

The PRESIDENT pro tempore. The Senator from New Jersey has 5 minutes remaining.

Mr. BRADLEY. I will try to cover a lot of territory here.

Mr. President, I have argued that the sugar program hurts the American farmer and frustrates American foreign policy. I would also argue that it undermines our attempts to eradicate the drug trade.

Mr. President, 90 percent of the cocaine that reaches the United States comes from coca produced in two Andean countries, Peru and Bolivia. But as a detailed report by the Senate Permanent Subcommittee on Investigations points out, eradication efforts are failing in large measure because of the desperate economic conditions of these countries. The report specifically recommends:

Concrete efforts should be undertaken immediately to assure that U.S. antidrug and economic policies regarding the Andean region are fully coordinated and not operating at cross purposes. The U.S. approach to source country anti-narcotic efforts should

be comprehensive and sustained, focusing simultaneously on eradication, interdiction and drug-related economic development.

Mr. President, I ask unanimous consent that a February 14 op-ed by Senators NUNN and LIEBERMAN which summarizes the report be placed in the RECORD at this time.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Feb. 14, 1990]

HOOKED ON COCA

(By Sam Nunn and Joseph I. Lieberman)

To date, our anti-drug efforts in South America have focused primarily on law enforcement such as the eradication and interdiction of coca and the capture of drug traffickers, efforts that are essential and should be intensified. But a more balanced approach—including a comprehensive economic plan for the Andean region—is required. Tomorrow's drug summit in Colombia, at which President Bush will meet with the leaders of that country and of Bolivia and Peru, provides an ideal opportunity for the administration to put forward such a plan.

Ninety percent of the cocaine that reaches the United States comes from coca grown in Bolivia and Peru and processed in Colombia. Despite the recent crackdown on the drug cartels in Colombia, none of these countries has been able to keep farmers from planting coca. This failure stems from two factors: the desperate economic conditions in that part of the world and the consequent political instability.

Peru's gross domestic product shrank 28 percent in the first quarter of this year, and its inflation rate has been running at more than 5,000 percent since January. Fifty percent of Bolivia's work force is either out of work, underemployed or at work producing coca. Colombia's economy has fared better, but the recent collapse of international coffee agreement threatens its export market.

It should therefore not be surprising that so many people in the Andean region are involved in coca production. In Bolivia one hectare of coca yields a profit of $1,000 per year, versus a $200 yearly profit from an equivalent amount of soya, the next most lucrative crop. Peruvians earn $2.7 billion from their legal exports, and up to $1 billion from cocaine. All three countries have become financially hooked on the foreign exchange from their drug trade.

The democracies of the Andean region also face Marxist guerrilla movements and other insurgencies, many of which are tied to cocaine production. Peru is reluctant to crack down on its 300,000 coca cultivators for fear of driving more of them into the camp of the brutal and powerful Sendero Luminaso (Shining Path) insurgency. Bolivia fears that foreign military intervention or an aggressive campaign of eradicating coca fields would further radicalize well-organized peasant unions and risk a rebellion among its 200,000 cultivators. Colombian society has been rocked by terrorism in the wake of the government crackdown on drug lords, with a number of political leaders questioning the widsom of aggressive law enforcement.

This year's U.S. budget contains some $14 billion for foreign aid, but of that only $261 million will go to the Andean nations. They deserve a larger share of the foreign-aid pie because of the direct relationship between their economic woes and our drug crisis.

But there are also significant steps we can take without directly increasing foreign aid. We should coordinate trade policies with our drug war. In Senate hearings, the Colombian ambassador to the United States expressed frustration at our policy of simultaneously urging an end to the lucrative drug business while permitting collapse of the international coffee agreement. Coffee accounts for a third of Colombia's legal exports, and its recent precipitous drop in price will cost that country up to $500 million this year. In the same hearings, drug policy director William Bennett and a State Department narcotics official testified that they had not even been consulted by State's Bureau of Economic and Business Affairs about the coffee negotiations.

We should also consider granting larger import quotas and lower tariffs for agricultural products to replace coca, such as citrus juice concentrate, coffee, sugar and flowers. And we should provide agricultural and technological assistance to Andean nations to promote development of such alternative crops and products. An economic plan for the Andean region should include increasing our import quotas for manufactured goods and reducing duties on goods from those countries for a 12-year period.

Easing the Andean nations' debt problems can also play a role in the international drug war. Their external debt now totals more than $42 billion. The leading industrialized nations could create a "debt for drug reduction" swap, as has been suggested by Sen. Joseph Biden (D-Del.)—agreeing to reschedule or forgive some portion of debt on the condition that an equivalent amount of money be spent in local currency on the drug fight.

European nations, which will be represented at the drug summit, should be receptive because they have been targeted by the drug lords as the next major market for cocaine. Wealthy Asian countries, including Japan, should also be encouraged to help salvage the economies of the Andean region.

We will not gain the sustained, effective cooperation of the Andean nations until more of their people have other ways earning a living. Until then they will remain as dependent on cocaine as the hundreds of thousands of American addicts who are consuming it.

Mr. BRADLEY. Mr. President, sugar was once a major crop to both Peru and Bolivia. During the seventies virtually all their sugar exports were destined for the United States, but the need to sustain the 18-cent loan rate for sugar changed all that. The combined sugar quota for Peru and Bolivia fell from 137,000 tons in 1982 to 49,000 tons in 1988. The amount of land in sugar production dropped from 30,000 hectares to 13,000 hectares or 2,000 hectares.

So, Mr. President, there is no question that if we want countries like Peru and Bolivia to move out of the production of coca, they have to be able to make money in another product. That other product is sugar. But as long as we block the export of that sugar to our markets, then they are put in a position where combating and eradicating drug production, production of coca, in their countries is exceedingly difficult.

There is another aspect to the coca production problem: Cultivation and processing in Peru and Bolivia are destroying the sensitive Amazon River basin. Rain forests are being hacked away at an alarming rate to make room for coca production. And millions of barrels of the toxic chemicals used for processing raw coca leaves in the field are polluting the virgin headwaters of the Amazon. Environmental engineers at Peru's Agrarian University estimates that some 8 million gallons of sulfuric acid, 15 million gallons of kerosene, 3,200 tons of carbida and 1.6 million tons each of the solvents acetone and toluene are dumped into the watershed of the Upper Huallagua Valley alone each year. Many species of fish, amphibians and other wildlife have already disappeared from the area's rivers and streams.

Mr. President, there is another major environmental impact of our sugar policy, but this one is much closer to home—in the Florida Everglades.

The high loan rate and high rate of return led to 20 percent increase in the acreage, 60,000 acres, devoted to cane in Florida during the 1980's. That increase has been a primary cause for the increase in phosporous and nitrate pollution of the Everglades. The nutrient rich water drained from the 700,000 acre Everglades Agricultural Area may mean that the national park will face the same fate that befell nearby Lake Okeechobee, one of the Nation's largest natural freshwater lakes and a principal water source for the Everglades. During the 1970's and 1980's, Lake Okeechobee was flooded by agricultural drainage water. This has nearly destroyed the lake's ability to sustain its rich and diverse acquatic ecosystem. The same thing is happening in the Everglades where the native saw-grass system and its associated wildlife is being displaced by pollution tolerant plant species. Already, tens of thousands of acres of lush marsh habitat have been irreversibly changed to cattails, decimating native populations of fish and wildlife.

The expansion of sugar production has also exacerbated the water shortage facing south Florida. During the last year's drought, while the Everglades went dry and wildlife died, and while urban residents faced water emergency conditions, sugar producers continued to receive their full complement of water. Agriculture already consumes 80 percent of southern Florida's water; our sugar program only increases this draining.

These environmental problems are intolerable. After years of futile attempts to use pursuasion to resolve the problem, the Federal Government has now filed suit to stop the pollution. Years of costly litigation will pass before these suits can be expected to

bring relief to one of our most treasured national parks. Environmental groups are aware of this, and fully support this amendment as a quicker way to begin to resolve the problem. Mr. President, I ask unanimous consent that the attached letter endorsing the amendment, signed by the representatives of the Sierra Club, the Wilderness Society, the National Wildlife Federation, the Natural Resources Defense Council and the Florida Audubon Society be inserted into the RECORD.

Mr. President, there is another aspect of our Florida cane industry that I must mention briefly, for I doubt most of my colleagues are aware of it. Whereas the cane industry in Hawaii is highly mechanized, in Florida, the thick muck in which the cane is grown means that much of it must be harvested by hand. This is back-breaking work; not surprisingly, it attracts few Florida residents.

The PRESIDENT pro tempore. All the time controlled by the Senator has expired.

Mr. BRADLEY. Mr. President, I ask unanimous consent for 2 more minutes.

The PRESIDENT pro tempore. Is there objection? The chair hears none. The Senator is recognized for 2 more minutes.

Mr. CONRAD. Reserving the right to object, Mr. President.

The PRESIDENT pro tempore. The Senator from North Dakota reserves the right to object.

Mr. CONRAD. I will not object, but perhaps we can just add 5 minutes on both sides. Would that be agreeable?

Mr. BRADLEY. I have no objection.

The PRESIDENT pro tempore. There are other orders that follow this one which would be penalized thereby. Is there objection to the Senator's request? The chair hears none. Without objection, the Senator is recognized for 2 minutes.

As a result, the Florida cane industry must import some 10,000 temporary workers from the Caribbean under the special H-2 program. A recent highly acclaimed documentary film by Stephanie Black called "H-2 Worker" depicts all too graphically the horrible conditions these men are forced to work under. A review of the move I said the 10,000 workers live in barracks resembling prison camps, and they labor for a little over a dollar an hour. Articles talk about police dogs attacking workers, and workers being shipped home and being black listed from the industry.

Now I am the last to say that their working conditions would be any better in Haiti, or Jamaica, or the Dominican Republic, but it is unconscionable that such treatment should still be permitted in this country.

The issue does not stop with imported workers. What about the American workers in the food processing industries, so conveniently forgotten by proponents of the sugar program? And what of the 5,000 cane refinery workers who have watched half of our refiners close over the past several years?

Mr. President, I recall how supporters of the sugar program argued in 1985 that any attempt to lower the loan rate for sugar would increase the trade deficit since sugar imports would rise.

Obviously, those pushing this line have never heard of the concept of value added. The simple fact of the matter is that sugar that is not allowed to enter this country because of the quotas is entering anyway, in the form of processed foods. And imports of processed foods harm our trade deficit far more than would imports of sugar, by the margin of the value added in the product.

Sugar is a key ingredient in virtually all processed foods, and especially in candy, baked goods, cereal, chocolate, cookies, and others. The 23,000 food manufacturers employ 1.6 million workers; the 24,400 retail bakeries and confectioners employ another 200,000. And, because these firms are forced to use relatively high-priced American sugar, they have seen imports there from foreign competition skyrocket—140 percent between 1980 and 1987 in the case of candy; 188 percent in the case of biscuits and cakes. Imports of sugar in sugar-containing products more generally leapt 153 percent between 1980 and 1989. This is undoubtedly one reason why candy manufacturers like J.S. Brach have sought foreign trade zone status; and it is undoubtedly one reason why the Bakery, Confectionery, and Tobacco Workers International Union wrote in support of this amendment. Mr. President, I ask unanimous consent to place their letter of support into the RECORD.

And finally, as if all the indirect costs of the sugar program were not enough, there is a huge direct cost as well. In effect, every single American, whether old or wealthy enough to pay taxes or not pays for this program everytime he sweetens his cereal or her morning coffee. And the true pity of it is that this tax is highly regressive, since people with lower incomes spend far more of their money on food. The Department of Commerce estimated that America paid over $3 billion in 1987 for the no cost program. More recently, USDA estimated that over the past 3 years, consumers have shelled out nearly over $6 billion to support sugar and sweetener prices that are higher than would otherwise be the case. According to USDA, this premium translates into a benefit of up to $50,000 for each of the 9,900 sugar beet farmers and a whopping $235,000 for the 1,900 sugarcane growers. In the most conservative estimate I've seen, the Federal Trade Commission puts the price tag at $806 million a year.

Supporters of the sugar program dispute these estimates, which are based largely on the disparity between U.S. domestic sugar prices and world prices. They don't question that U.S. raw sugar prices are higher than the price of raw sugar on the world market; rather, they believe that the world market price is not relevant, that it's a dump price. Now that's an interesting argument; my bet is that most American consumers would be delighted to take cheaper sugar, and cheaper food, even at the so-called dump price; if the Europeans want to subsidize our standard of living, let them.

But the argument's specious anyway. When he was still at USDA, Jack Roney of the Hawaiian Sugar Planters Association argued that the 28 percent share of world sugar production traded in international markets was equal to or greater than that of most major commodities. Of this 28 percent, only a small portion, 6.3 percent, is traded at preferential rates, including U.S. quota imports, EC purchases and Soviets procurements from Cuba. The remaining 21.7 percent traded in international markets stacks up well against other commodities. Only 21 percent of world wheat production is traded at world prices, versus 28 percent for soybeans and 15 percent for corn. Yet I've not heard anyone argue that these are dump prices, even though governments provide substantial subsidies to farmers of these products. Perhaps even more significant is that Congress, the U.S. Department of Agriculture and the Nation's rice producers have recognized world market prices as an effective reference point for marketing loan payments even though only 3.9 percent of rice production is traded on the world market.

Whatever the reference point, the American consumer is getting rooked. Ask him. Ask all the major consumer advocacy groups. Ask editorial writers in newspapers throughout the land. They'll tell you.

Mr. President, I have gone on at great lengths about the tremendous costs I see in the sugar program. But before I yield the floor, I want to stress that our amendment proposes only a 2-penny reduction in the loan rate, will not cure all the ills I have described.

It makes a modest adjustment on the returns of 12,000 sugar growers concentrated in eight States: Hawaii, Florida, and Louisiana for cane, and Minnesota, California, Idaho, North Dakota, and Michigan. This adjustment is fair and equitable with the cuts in support price payments that all other major commodities took in the 1985 bill. This will do little more than

stop the net expansion in acreage devoted to sugar, as secular declines in Hawaiian acreage and shifts to cash crops suddenly made relatively profitable in California are offset somewhat by technology-driven increases in sugar extraction from beets. Overall, this should help address the agricultural and environmental policy problems. And it may help imports stabilize at the current level of just under 2 million metric tons, which will help address the foreign policy, drug policy, competitiveness, and consumer issues.

If passed, the amendment should have other benefits as well. The Uruguay round of trade talks, perhaps the most ambitious attempt to liberalize world trade since the inception of the General Agreement on Tariffs and Trade 40 years ago, is now deadlocked largely because of European and American differences over agricultural trade policy. The Europeans, whose own agricultural policy is inexcusable, regularly point to our refusal to reform our sugar program as one reason they needn't accept the political cost of reforming the Common Agricultural Policy.

In effect, the adjustment I'm proposing to the sugar loan rate will put the Europeans on the defensive, especially about their own sugar program. As the administration has said, the 10 percent reduction in the loan rate is not unilateral disarmament, it is an ante. And if the Europeans match us, we have a chance of returning world sugar markets to something resembling normalcy. The dynamic benefits of this, especially for producers like the Andean nations, should not be underestimated.

Mr. President, simply sustaining the status quo would be inexcusable. My amendment will not by any means gut the sugar program. Nor will it weaken the bill; rather, it will add some substance to the environmental and consumer aspects of it. I hope my colleagues will join me in supporting this amendment.

Thank you, Mr. President.

The PRESIDENT pro tempore. The Senator from North Dakota [Mr. CONRAD] now has control of the remaining time in opposition to the amendment.

Mr. CONRAD. Mr. President, I ask that the chair advise me at the end of 10 minutes so that I might limit my remarks so other of my colleagues would have time to speak.

The PRESIDENT pro tempore. The chair will so advise the Senator.

Mr. CONRAD. I thank the chair.

Mr. President, we have heard a lot of novel arguments advanced in this body on a whole range of issues, but never have I heard a more novel argument than the one that has been advanced by the opponents of the sugar program. The other day I received a letter in my office from the opponents of the sugar program who argue that if we would cut back the loan rate to our farmers by 2 cents a pound, all of a sudden we could do all the good things that need to be done in the world. We would be able to stamp out the drug trade. We would be able to save the rain forests in the Amazon. All of a sudden, we would be able to, in one blow, solve two of the major problems confronting our society.

Mr. President, I have heard a lot of creative arguments advanced during my time in Washington, but this one truly takes the cake. It is said in the legal profession that when you have the law on your side, you argue the law. When you have the facts on your side, you argue the facts. If you have neither, appeal to emotion. I suggest that that is what we have here. It is an appeal to emotion.

We all know that drugs and environment are the hot issues in our society. All the polls show that. But does anyone seriously believe that if we cut the loan rate to our farmers by 2 cents a pound, all of a sudden the drug cartel, worldwide, is going to abandon that multibillion-dollar market, that they are going to quit growing coca, that they sell for literally tens of billions of dollars on the street of our country?

It is time for a reality check. Recent testimony in the other body demonstrated that a Peruvian coca grower can earn $9,000 a year. That compares to $200 a year he could make growing any legal crop.

Mr. President and my colleagues, it is a fantasy and a fiction, to think that by somehow reducing our loan rate to our farmers by 2 cents a pound, that the Peruvian farmer is going to turn his back on $9,000 a year so he can get $200, especially given the fact that it would mean he would have to move his operation from the mountains of Peru, where the coca grows, back to the valleys where sugarcane will grow. Of course, with that move they would have to take a 98-percent pay cut.

Mr. President and my colleagues, it just does not add up. I do not believe it is a serious argument against a sugar program. Mr. President, there are serious arguments against a sugar program, and we have heard some of those today. We have heard a series of arguments advanced that deserve a response. First of all, I think we should make clear that the sugar program operates at no cost to the Federal Government.

Let me repeat that. The sugar program operates at no cost to the Federal Government. It does not cost the American taxpayer a dime.

Let us turn our attention to some of the arguments we have heard here advanced against the sugar program.

First of all, we heard that consumers are hurt. We have heard that farmers are hurt. We have heard about a tiny profit for food processors.

Mr. President, let me answer each one of those arguments in turn.

First, we do not have to imagine what would happen in this country absent a sugar program. This is not a theoretical question. I direct the attention of my colleagues to this chart that shows what has happened to U.S. sugar prices from 1947–88 expressed in real 1988 dollars. So we are comparing apples to apples.

These two areas that are highlighted in yellow in the mid-1970's and in the early 1980's were periods when we had no sugar program. Look what happened. We first see, that with the elimination of a sugar program, prices absolutely skyrocketed from under 25 cents a pound to over 65 cents a pound in just a matter of months. That pummeled consumers. That did tremendous damage to those who use sugar in products. Then prices plummeted from 65 cents down to less than 20 cents in real 1988 dollars. That devastated farm producers. It bankrupted producers and processors all across the country.

When my dear colleague, Senator BRADLEY of New Jersey, talks about the increase in acres planted, he is very selective in the years that he uses because his starting point is when prices had fallen so badly that, all across the country, refineries were going bankrupt and producers were getting out of the business of growing sugar in this country.

Mr. President, the fact is the sugar program has provided a stable supply of sugar to American consumers at reasonable prices.

Let me just turn to the next chart to demonstrate that I think is conclusive.

This chart shows the cost of retail sugar to consumers. The source of this chart is USDA.

When the opponents say the sugar program is hurting consumers, what are the facts? The facts are that in the United States the average cost for consumers at retail is 40 cents a pound; worldwide, the average is 41 cents a pound; and in the rest of the industrialized world, the average is 44 cents a pound.

Are our consumers disadvantaged? Mr. President, I think the evidence suggests something quite to the contrary.

The next argument that is advanced by the opponents is that other farmers are being hurt by the sugar program.

Let me just say this. I represent the most agricultural State in the Nation. Every single farm organization favors the sugar program—every single farm organization. I rely for farmers on the votes to return me to this Chamber. But I can tell you without equivocation, without fear of contradiction, the farmers of my State—the wheat farm-

ers, the soybean farmers, the barley farmers—support the sugar program. In fact, they would like to have one like it because it is one of the few programs that is working to secure the incomes for American agricultural producers.

When my dear friend talked about all the other commodities getting cut, but sugar being held harmless against reductions, he was very selective in the dates that he chose to use. He talked about 1985 to 1990. If you look at a broader perspective—1981 through 1990—you find something quite different. In fact, what one finds is that in comparing the average reduction in support, in real dollars, for our major commodities, sugar has had a 23.5-percent reduction from 1981 to 1990; the weighted average for the five major commodities—corn, wheat, cotton, rice, and sugar—21.8 percent. So sugar has had more of a reduction than our other commodities. If we take another 2-cent reduction, as cut of 11 percent——

The PRESIDENT pro tempore. The time allotted to the Senator by himself has expired.

Mr. CONRAD. Mr. President, I will allot an additional amount of time as is necessary to complete my presentation. I thank the Chair.

The PRESIDENT pro tempore. The Senator is recognized for such time.

Mr. CONRAD. If we take an additional 2-cent reduction, then sugar will have taken a reduction in support of 32 percent, far more than any of the other commodities.

Mr. President, let me turn to the other argument advanced by the Senator from New Jersey. Again, he talks about the expansion of acreage as evidence that sugar is somehow extraordinarily profitable.

The first thing I would want to point out to my colleagues is that gross returns for sugar must be much higher than gross returns for other commodities because the costs of producing sugar are far higher than the costs of other commodities.

Mr. President, let me just show this chart that shows the total economic cost per acre for major commodities. Wheat—my State is a major wheat producer—costs $126 an acre. On the other end of the spectrum are sugar beets. They cost $735 an acre to produce. These are not my numbers. These are USDA numbers.

When we talk about the need for a high gross return on sugar beets, it is because there is a very high cost to producing sugar beets. The only thing that is more expensive to produce is sugarcane at $849 an acre.

Mr. President, I think we should probably also refer one more time to the question of acreage. Again, my dear friend, the Senator from New Jersey was very selective in the years that he talked about. He started in 1982. That was when we had seen sugar prices rise and then plummet because there was no sugar stabilization program. Of course we have seen acreage expansion since then.

In summary, Mr. President, the sugar program is good for consumers. We have the lowest cost of sugar of any of the developed countries. We have a consumer price that is lower than the worldwide average. It is good for farmers. It is one of the few programs that is working for farmers. Mr. President, it operates at no cost to the American taxpayers.

Mr. President, at this time I would be willing to yield time to Senator Akaka.

How much time does the Senator from Hawaii need?

Mr. AKAKA. Ten minutes.

Mr. CONRAD. I yield to the Senator for 10 minutes.

The PRESIDENT pro tempore. Does the Senator yield 10 minutes? How much time does the Senator yield?

Mr. CONRAD. Ten minutes.

The PRESIDENT pro tempore. The Senator from Hawaii [Mr. AKAKA] is recognized for 10 minutes.

Mr. AKAKA. Mr. President, despite all the fast talk and loose rhetoric we have been hearing about sugar, the sugar program is a good deal. It has assured stable supplies of sugar at moderate prices. It is a good deal for American consumers. It is a good deal for the American taxpayers. It is good farm policy.

Since 1982, the first full year of operation for the current program, supermarket prices for sugar have averaged about 36 cents per pound. Moreover, only once in the past 8 years has the retail sugar price exceeded this 36 cent average by more than 1 percent. By contrast, in the years before the program came into effect, the supermarket price for a pound of sugar climbed as high as 56 cents. Clearly, consumers have fared well under this program.

The sugar program is also a good deal for sugar-exporting nations. The premium that these countries receive in the U.S. market over the prevailing world price for sugar accounts for $200 to $300 million per year in export revenues. USDA has determined that without the current program, the sugar revenues of Caribbean nations would drop by nearly 20 percent. In the absence of the sugar program, would the United States be able to make up these losses through increased foreign aid to the region? Given our current budget woes, I think not.

The sugar program makes good sense in relation to our broader farm policy objectives. The program indirectly benefits corn growers because the price of sugar helps determine the price of corn sweeteners. Each year, almost 600 million bushels of corn are converted to sweeteners. If the Federal Government failed to renew the sugar program, the corn market would face turmoil. Under such circumstances USDA estimates that forfeitures and deficiency payments for corn would cost the Federal Government $500 to $700 million annually. As you can see, the sugar program is good farm policy.

Finally, the sugar program is a good deal for consumers and the American taxpayer. Over the past 3 years the program, which by law must be operated at no cost to the Federal Government, has actually generated revenues of $336 million for the U.S. Treasury. The sugar program makes good budget sense.

I repeat, the sugar program is a good deal for consumers and a good deal for exporting nations. It is good farm policy, and it is a bonus for the U.S. taxpayer.

The only griping we seem to hear about the sugar program comes from the big, corporate sugar users, such as the soft drink industry. Yet it is the soft drink manufacturers that year after year rank as the most profitable of all U.S. industries, with the highest return on equity of any business sector. With all their fat profits, I have no sympathy for their complaints.

The United States has a prominent place among sweetener producing nations, and Hawaii has always played an important part in helping our country achieve this status. The United States is the world's sixth largest producer of sugar, and Hawaii is the second largest producing State.

The U.S. sugar and corn sweetener industries make a vital contribution to the national economy. According to a recent study, the nutritive sweetener sector generates annual revenues of $18.5 billion and supports the equivalent of 361,000 full-time jobs.

The importance of sugar to the economy, ecology, culture, and beauty of Hawaii is enormous. The sugar industry is the State's third largest, generates nearly $400 million in revenues, and is responsible for more than 20,000 jobs. Sugarcane covers 178,000 acres, almost three-quarters of Hawaii's cropland.

Sugarcane has been grown commercially in Hawaii for 155 years. As the industry expanded, it attracted skilled and unskilled labor from all around the world, helping to create the ethnic diversity and industrious human resources that is the backbone of Hawaiian culture. Though our output of cane has declined in recent years, the State still accounts for more than one-fourth of cane sugar production.

The notion that the U.S. sugar program is some kind of a "get rich quick scheme" for a few large producers is completely unfounded. This is not

true nationally, and is especially untrue in Hawaii.

Hawaii's loan rate is the lowest of all sugar-producing regions and, after adjustments by USDA, has generally been at least a half cent below the nominal 18 cent loan rate which has prevailed since 1981. Though Hawaii has made great progress in reducing its costs of production, many of our plantations are losing money and for the foreseeable future returns will remain breakeven, at best. Average returns from sugar to Hawaiian producers in 1988 were only 16 cents per pound, one-half cent below our average production cost.

This contrasts with some critics' claims that the program assures producers returns that exceed the market stabilization price. Clearly, no industry is enriching itself on the basis of support levels that fall short of the cost of production.

Hawaii has by far the highest sugar yields in the world, more than double its nearest rival, according to USDA data. This can be attributed to Hawaii's ideal climate, excellent soil, more than a hundred years of research on cane varieties and cultural practices, and enormous private investment in irrigation, machinery, and mill technology.

However, Hawaii's labor and transportation costs are also high. Field workers are well-trained, mostly heavy equipment operators, and the highest paid in the world. Including benefits, Hawaii's workers received $107.00 per day in 1988. Compare this to field workers in, say Guatemala, who earn about $5 per day or in Brazil or the Dominican Republic where they earn even less. Transportation costs are high not just because of the distance involved, but also because of the Jones Act shipping requirements which have necessitated that the industry invest in its own ships.

Despite these high costs, the Hawaiian sugar industry has an exemplary record when it comes to making the investment necessary to achieve improvements in productivity and increases in yields. In the last 10 years, man-hours per ton of sugar have declined 25 percent and the number of acres cultivated per employee increased from 11.7 to 14.7. Tons of sugar produced per acre rose 13.5 percent. On the other hand, the cost per ton of sugar increased 25 percent. This compares with an overall inflation rate of 81 percent for the period.

Unfortunately, we have reached the point where efficiencies are getting harder and harder to come by and the pace of productivity improvements will begin to slow. Higher costs in the future appear inevitable as wages and energy prices begin to rise. The cost of new equipment, an essential component in the Hawaii industry's modernization effort, is rising sharply.

As I have outlined, the sugar program is working well and is benefiting consumers and producers alike by providing a stable supply of sugar at reasonable prices. However, 6 straight years of an 18-cent loan rate have taken its toll on the domestic sugar industry. Since the current program was put in place, the number of cane sugar refineries declined from 22 to 12. The number of raw sugar mills dropped from 45 to 40. The number of sugar beet processing facilities declined from 56 to 41. Unless we continue the 18-cent loan rate, we will be in grave danger of losing a large share of domestic sugar-producing capacity, and that is exactly what would happen under this amendment.

The amendment before us would unilaterally reduce support levels in advance of the conclusion of the Uruguay round of the multilateral trade negotiations.

Mr. President, adopting this amendment would be bad farm policy and bad foreign policy.

Only sugar is being asked to unilaterally disarm itself in this way. No other farm commodity would be forced to accept the reductions in supports prior to the conclusion of the Uruguay round. Only sugar must walk this plank. What rational purpose would be served by weakening our bargaining position in advance of these negotiations? Such an approach could lead to international agreements which are more distorted than trade practices now in place. Would U.S. trading partners have any incentive to grant concessions on matters which the United States has conceded in advance? The answer to this question is a resounding "No!"

To my colleagues who believe that the administration supports a reduction in the sugar program, I have only one thing to say: the Bush administration has had so many different positions on sugar that they have lost all credibility on this issue.

In the beginning President Bush and Secretary Yeutter told us: "There will be no unilateral changes in the sugar program." Later we were told by Ambassador Hills and Secretary Yeutter: "The program must be cut 10 percent." Soon thereafter we were told: "The Bush administration supports the status quo and wants a 10-percent cut." Finally we are told that a 10-percent cut is not a unilateral reduction.

How absurd! You tell me how to cut the sugar program without making unilateral reductions, and I will show you how to pass a camel through the eye of a needle!

Mr. President, on behalf of thousands of employees for whom sugar has become a way of life, the small businesses, shopping centers, and service industries that support the industries and the sugar communities, I urge our colleagues to reject this amendment.

Mr. President, I yield to my colleague.

Mr. CONRAD. Mr. President, I ask the Senator from Minnesota how much time he desires.

How much time is remaining on our side, Mr. President?

The PRESIDENT pro tempore. The Senator from North Dakota has 12 minutes. The Senator from New Jersey has 3 minutes.

Mr. CONRAD. I yield 7 minutes to the Senator from Minnesota.

Mr. BOSCHWITZ. I thank the Senator.

The PRESIDENT pro tempore. The Senator from Minnesota [Mr. BOSCHWITZ] is recognized for 7 minutes.

Mr. BOSCHWITZ. I thank the President pro tempore.

Mr. President, this amendment should really be named as the European Community relief bill. That is really what it is. The European Community has created some of the problems that we have in world sugar, and the European Community would be the principal beneficiary of this amendment. The European Community dumped sugar onto the world market, and raising the world price will reduce the cost to the European Community of maintaining their program. I wish to outline briefly how this amendment would do that.

Sugar in the world is a small crop. It is a crop of approximately 107 million tons worldwide. Approximately 70 percent of the world sugar is consumed in the country in which it is grown. Another 30 percent falls onto the world market. Much of that 30 percent is traded under contract; for instance, the Russians buy at 30 cents a pound the Cuban output of sugar, which is 9 million tons. There are other such agreements with countries around the world. Very little, sometimes as little as 15 percent—on the high side about 20 percent—of the world's sugar production falls on the world market. That is, it is traded outside the country that it is produced, and it is traded on the free and open market.

The United States consumes about 13 million tons of sugar a year and in the event that would become available to the world market there is no question that the charts that the distinguished Senator from North Dakota has shown us this morning would not be big enough. If you bring that kind of volume of sugar onto the world market there will be an extraordinary reaction. The price of sugar would go through the roof. There is no question about that.

I dealt with commodities in most of my business life. When you increase the demand for a commodity by 2 or 3 or 4 percent you have 10 or 20 percent reaction in the price of that commodi-

ty. If you increase the demand for the world market of sugar by 30 or 40 or 50 percent as would occur if the American demand were to come onto the world market there is no question that the price of sugar worldwide would escalate and would go right off the charts that the Senator from North Dakota had.

What would be the result of that? The largest sugar producer, the European Community, that produces 14 million tons, would now find that its surplus could be sold at prices around the world without it having to subsidize those prices. We would be saving the European Community an enormous amount of money and the result would be we would be encouraging their bad habits in agriculture.

This is a European Community relief act and it should not be.

There is only one agricultural group that came to the Secretary of Agriculture under the Reagan administration when the Reagan administration adopted the position advocating a 10-year phaseout of all subsidies, of all trade barriers, quotas, incentives, and trade distorting practices. That group said we agree with you, we are willing to operate on a level trading field; if you do that we will support you. Only one group, and that was the sugar producing industry, both cane and beet, came to the Secretary of Agriculture and said we support the idea of removing all these trade restraints.

I am proud of the sugar industry for doing that. They recognized that, currently, a small amount of the world's production falls onto the international trading market. Suddenly for the American demand to come onto that market, the world market in sugar would rise and the cost of sugar to the American consumers and others would rise. Indeed the European Community would be bailed out.

So this amendment should really be called the European Community Relief Act, and it should not be that.

I would also say to my friend from New Jersey that I do not really understand the relationship of coca, which is grown in a very different climate than sugar. I do not think that increasing sugar production in those countries would necessarily by any means be a substitute for coca, even if the prices that the farmers could earn were comparable. The Senator from North Dakota points out that they are not.

I would say, however, to my friend from New Jersey, that there are some arguments among farmers and that some farmers feel that they are being hurt because of sugar beets. Sugar beet production has led to higher economic rewards per acre. Some sugar beet growers have gone around my State, as was written about in the article that he pointed out in the Wall Street Journal, and offered higher rents on some land than soybean farmers or wheat farmers have been able to afford. There I believe that he is correct.

However, it is without question in my mind that there would be such a disruption of the world market if we were to begin to unilaterally act on sugar that sugar prices worldwide would indeed go up. The result of that would be that the worst offenders in the world sugar markets would be relieved and our ability to deal with the European Community on bringing down all of their trade distorting practices would be more limited. And that is why I oppose the amendment.

The Senator from New Jersey and the Senator from Delaware.

The PRESIDENT pro tempore. Who yields time?

Mr. CONRAD. I yield whatever time is remaining to the Senator from Hawaii.

The PRESIDENT pro tempore. The Senator from Hawaii [Mr. INOUYE] is recognized for 4 minutes and 40 seconds.

Mr. INOUYE. I thank the Chair very much.

Mr. President, I rise in opposition to the Bradley-Roth amendment.

I initially planned to speak of the importance of sugar production to the State of Hawaii. My colleagues know of its critical importance to me. A reduction of 2 cents in the support price will most surely cast a fatal blow on Hawaii's sugar production industry which has been in existence for more than 155 years. This industry directly employs more than 6,100 workers, and provides indirect employment for more than 20,000.

Mr. President, I would like to address an argument made by proponents of the Bradley-Roth amendment because I am deeply troubled by their assertions. They claim that a reduction in the U.S. sugar support level will benefit developing countries that export sugar to the United States. I inquired into the position of the Caribbean Basin countries and the Philippines. They oppose the amendment.

Mr. President, I have a letter from the CBI Sugar Group opposing the amendment. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CBI SUGAR GROUP,
July 12, 1990.

Hon. DANIEL K. INOUYE,
U.S. Senate,
722 Hart Building,
Washington, DC.

DEAR SENATOR INOUYE: This letter is in response to your inquiry as to the effect of a two cent reduction in the sugar loan rate on the CBI sugar producing countries.

Without a guarantee that a price reduction would produce a substantial and immediate increase in quotas, the result would be a net loss in income for our countries.

Simple mathematics convince us that a two cent reduction in price would, in fact, result in lower foreign exchange earnings for our economies that need social and political stability.

I would also mention my remarks to the American Sugar Alliance symposium on June 25, 1990:

"The assumption made by many that the U.S. price is out of line with what a true world market would dictate oversimplifies the present world dumping market. The only credible study I have seen, done by Landel Mills, concludes that the world price in a free market would be somewhere between 15 and 22 cents, which is the same range as the U.S. price."

I hope this is responsive to your inquiry.

Sincerely,

JULIO HERRERA,
President.

Mr. INOUYE. If the Bradley-Roth amendment is so beneficial, why are the developing countries of the Caribbean Basin and the Philippines—the intended beneficiaries—opposed to it?

The Bradley-Roth amendment is not in their best interest. Simple logic demonstrates that a sharp reduction in the U.S. sugar support level, such as the one proposed today, would hurt developing countries, not help them.

Mr. President, let us look at the facts. The U.S. sugar import quota has risen for 4 consecutive years. This year it is at is highest level since 1984—just under 2.3 million short tons. At this volume, a 2-cent reduction in the U.S. price would mean a loss to our traditional foreign suppliers of $92 million in revenues. Of the 39 countries that hold U.S. quota shares, 37 are developing countries. The Dominican Republic would lose nearly $15 million; the Philippines would lose over $13 million; Guatemala would lose over $4 million. Is this beneficial? I think not. These countries could not afford to support the Bradley-Roth amendment.

Proponents of the amendment further argue that what the developing nations lose in the U.S. market, they will make up with higher prices by selling to the world dumping market. Mr. President, I should note that this contention presumes the shutdown of domestic sugar operations and the bankruptcy of American farmers.

Nonetheless, this argument is a fallacy. It reveals a lack of knowlege about the countries that export sugar to the United States. The majority of the 39 U.S. quota-holding countries export little or no sugar onto the world market; 24 of the 39 quota-holding countries export 10 percent or less of their production onto the world market; 16 of these export no sugar onto the world market. The conclusion is clear; these sugar exporting nations are dependent on the U.S. market, not the world market.

As the former chairman of the Senate Appropriations Foreign Operations Subcommittee, I am all too fa-

miliar with the dwindling Federal dollars allocated for foreign aid. U.S. import quotas not only provide developing countries with revenues, but also provide employment for their citizens. These import quotas are an important means of providing foreign aid without cost to the U.S. Treasury.

Mr. President, despite the fact that the Bradley-Roth amendment will reduce the revenues of countries exporting sugar to the U.S. market the supporters of this amendment are peddling an M&M Mars-financed attack purporting to prove that the proposed change will help solve the cocaine problem. This is really outrageous.

Do they not know that Peru, the major coca growing country, is, and has been, a major net importer of sugar even though they have a U.S. quota? Moreover Peru has been unable to fill its current quota in recent years. How reducing the price they receive for their sugar will encourage them to grow sugar instead of coca is beyond comprehension. Bolivia also does not produce enough sugar to fill its present United States quota.These are the big coca growing countries.

We ought to increase the prive support for sugar if we want to reduce their dependence on coca.

The Bradley-Roth amendment is not a sweet deal for developing countries. I urge my colleagues not to presume what is best for them. They have already told us that they need the U.S. market and the solid, stable 18-cent support price. And not the unpredictable world market where the price could range anywhere from 3 to 65 cents per pound that proponents of the amendment have deemed to be in their best interest.

This is not a sugar-coated statement. It is a bare fact. The developing countries will not win if the Bradley-Roth amendment passes. I know they will lose. They know they will lose—as will our domestic sugar producers.

Mr. President, because of the limitation of time, I would just want to briefly summarize what has been said today.

First, I regret very much, Mr. President, that my colleagues are not here to listen to the sage advice and wise words of my colleague from North Dakota, who is managing the opposition to this amendment. Senator CONRAD has clearly covered all of the charges made. I think his answers and his responses are not only responsible but on target. I hope my colleagues will take time to read the transcript of these proceedings.

I am also sorry that my colleagues are not here to listen to the remarks of my distinguished colleague from Hawaii, Mr. AKAKA, who I believe has clearly set forth the effect this amendment would have not internationally but on people—on the workers, on those who shop in the supermarkets. And I am sorry they were not here to listen to my friend from Minnesota, Mr. BOSCHWITZ, who set forth clearly this matter of the world market.

Mr. President, of all of the dozens of farm programs that we have on our books, this is the most successful. This program has assured our consumers that they will have a steady, flat price in the supermarket.

As Senator CONRAD pointed out, during that period when the sugar program was out, the Congress somehow had a moment of lapse of wisdom and did away with that. In 2 months, the price went up from 20 to 65 cents. And when that happened, everyone began dumping sugar into the United States. Then it plummeted down to about 3 cents for a few days. Then everyone withdrew, farms went bankrupt, and the price went up again. All within 6 months.

A second observation, Mr. President. Listening to my dear friend from New Jersey, one gets the impression that this is a giveaway program, that we are giving our farmers 18 cents a pound. This is a loan program, Mr. President, and they have always paid it back. It does not cost the taxpayers any money. In fact, the Government has made money. It is the only farm program that makes money. No other farm program makes money for the people of the United States. This one does.

Speaking of subsidies, Mr. President, as of yesterday, in the European Community, their sugar growers are being subsidized—not loaned, subsidized—30 cents a pound. And so when they do have surplus sugar, they can afford to send it into the world market and sell it for 4 cents a pound. No one can produce sugar for 4 cents a pound, so obviously it is being sold below cost. Do we expect our people to sell our sugar for 4 cents a pound?

And this argument that the sugar program is supporting the drug cartel in South America is just outrageous, Mr. President.

The PRESIDENT pro tempore. The Senator from New Jersey has 3 minutes remaining.

Mr. BRADLEY. Mr. President, I thank the Chair.

Mr. President, to deal with the consumer argument and the environmental argument, I ask unanimous consent to have printed in the RECORD a letter from the National Wildlife Federation, the National Resources Defense Council, the Wilderness Society, the Sierra Club, Public Voice for Food and Health Policy, and Public Citizen's Congress Watch, and others, all of whom support the amendment.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JULY 13, 1990.

Hon. BILL BRADLEY,
SH-731 Senate Office Building, Washington, DC.

DEAR SENATOR BRADLEY: We are writing to urge you to vote for an amendment to the sugar title of the 1990 farm bill that we understand will be offered by Senators Bradley and Roth later this month. A "yes" vote on the Bradley-Roth amendment would provide much-needed reform of U.S. sugar policy.

The sugar policies of the 1980s have been among the most inequitable of all the federal commodity programs. When it comes to balancing the public interest against financial benefits to sugar producers, the sugar program has consistently given consumers and the environment the short end of the stick.

According to the U.S. Departments of Agriculture and Commerce, during the 1980s the general public incurred between $1.9 and $3 billion annually in additional sweetener costs as a result of the sugar program. These billions of dollars in annual benefits to sugar producers are split between a mere 11,000 growers. This translates into a highly regressive annual transfer of between $170,000 and $270,000 per grower from the consuming public.

The sugar program has also stimulated expanded sugar cane production around the fragile Florida Everglades. The result has been a substantial increase in phosphorus discharges into the Everglades ecosystem and alterations in natural water flows in and out of the marshes. This pollution represents a major threat to water quality and wildlife habitat.

In addition, sugar producers have been unjustifiably favored over all other farm commodity groups. The sugar program was the only major commodity program to escape price support reduction reforms in the 1985 farm bill. Despite this imbalance, sugar legislation reported by the Senate Committee on Agriculture, Nutrition and Forestry for the 1990 farm bill would maintain existing price support levels.

To address the shortcomings of current law, the Bradley-Roth amendment, which the Administration supports, requires a 2 cent reduction in the price support level from the current 18 cents per pound to 16 cents per pound. This modest change is comparable to reductions experienced by other farm commodities in 1985 and would begin to move the sugar program in a more equitable direction.

Again, we urge you to support long-overdue reform of the sugar program by voting for the Bradley-Roth amendment. Extensive editorial support in newspapers throughout the country suggests that the general public will be looking to Congress to take positive action on this issue.

We look forward to working with you to ensure a rational, equitable sugar program. If we can be of any further assistance on this matter, please do not hesitate to contact us.

Sincerely,

Mark Cooper, Research Director, Consumer Federation of America; Harry W. Snyder, Director, West Coast Regional Office, Consumers Union; Charles Lee, Senior Vice President, Florida Audubon Society; David C. Campbell, Research Economist, National Wildlife Federation; Justin Ward, Senior Resource Specialist, Natural Resources Defense Council; Michael Waldman, Director, Public Citi-

zen's Congress Watch; Ellen Haas, Executive Director, Public Voice for Food and Health Policy; Theresa Woody, Southeast Associate Field Representative, Sierra Club; Brian F. Culhane, Assistant Director, National Parks Program, the Wilderness Society.

Mr. BRADLEY. I would also like to submit for the RECORD the following editorials in the Journal of Commerce, "The Sugar Tax"; the Burlington, NC Times-News, an editorial entitled "Sugar Quota Needs to be Attacked"; the Tampa Tribune, "Congress Should Cut Aid to Exploitive Sugar Barons"; the Detroit News, "The Sugar Scandal"; the Chicago Sun Times, "Sweetheart Deal Imperils Jobs Here"; the Los Angeles Times, "How Sweet It Isn't"; Jackson, MS, Daily News, "Crop Props; Sugar Supports Blatant Protectism"; and the (Phoenix) Arizona Republic, "Uncle Sugardaddys' Sour Deal."

I ask unanimous consent that those and other editorials be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Journal of Commerce, July 18, 1990]

THE SUGAR TAX

If you could buy sugar with no restrictions, you'd pay about 12 cents a pound. American sugar users aren't so lucky. Bakers, distillers and other bulk buyers pay about 22 cents a pound, thanks to a government program that taxes consumers to keep sugar growers and corn farmers fat and happy. This week, Congress has a chance to cut that tax, if only it can summon up the courage.

"Tax," of course, is a loaded word. Supporters of the sugar program prefer to talk about the "loan rate," 18 cents a pound, at which the government agrees to take raw sugar off growers' hands. But to keep from losing its shirt in the sugar market, the government limits imports to support the domestic price. The difference between that price and the world market price, current about 10 cents a pound, is a tax on the consumers of products containing sugar.

The last time Congress approved a farm bill, back in 1985, sugar's supporters turned back a drive to cut the loan rate from 18 cents to 12 cents. This time around, both houses face far more modest proposals. Sen. Bill Bradley, D-N.J.; Rep. Willis Gradison, R-Ohio; and Rep. Thomas Downey, D-N.Y., all want to cut sugar supports to 16 cents. A vote in the Senate could come as early as this week.

The most potent backing for the sugar program comes not from sugar growers themselves, but from corn farmers and millers, including political heavyweight Archer-Daniels-Midland. High sugar prices have created a market for their product, high fructose corn syrup, which has replaced sugar in soft drinks and many other uses. HFCS probably would not be viable in a completely uncontrolled sugar market. But the U.S. Department of Agriculture estimates that HFCS costs only 13 to 14 cents a pound to produce. Keeping the price of sugar above that level simply ensures profits for corn millers. Lowering the sugar loan rate by 2 cents a pound, the department projects, will reduce the demand for U.S. corn by all of 0.07%. That won't have much effect on the price.

The United States has talked a good game when it comes to curbing subsidies to agriculture. Congress' vote on reducing the sugar tax will show how serious it is.

[From the Burlington (NC) Times-News, Dec. 10, 1989]

SUGAR QUOTA NEEDS TO BE ATTACKED

During the past two national election campaigns, the political action committees representating the sugar industry in the United States contributed $2.1 million to various federal lawmakers.

And what did they get for their money? Congress continues to renew the sugar quotas in order to help the family farmer. However, one must know more about the "family farmer" to be fully informed. One such family is the Fanjul brothers who have seven sugar companies. They have done so well they have financed three resort hotel takeovers and built four mansions in Palm Beach, Fla.

The sugar industry has been getting a sweet deal for a long time, and it is one which is sour to the American taxpayer and the American consumer. For instance, this business of congressionally imposed import quotas on sugar costs Americans 22 cents per pound for raw sugar. We pay three times what the rest of the world pays. Three times! It means that for every 10 pounds of granulated sugar we buy, we are paying an extra $2. Not only that, the sugar cost raises the price of most prepared foods and artificial sweeteners.

Between 1982 and 1984, these quotas added $7.5 billion to the price of those products. An example? There is an extra 10 cents on every gallon of ice cream because of the quotas. Currently, it is having a major effect on the price of Christmas candy you might purchase. Since the government began tightning sugar quotas, the amount of hard candy imported has increased 250 percent. Makers of hard candy and candy canes say if not for the sugar quotas, they could be exporting candy and underselling foreign companies.

Who benefits from all this? There are about 12,000 sugar growers in the United States, or only two percent of all American farms. That seems a bit out of proportion. The purpose of the sugar quotas is simple. It keeps the price of all imported sugar sky high so that domestic producers can raise their prices to the exorbitant level.

This setup is costly to workers in the prepared food industry. There have been thousands of jobs lost in recent years because foreign processed food companies take advantage of the price difference and sock it to U.S. firms on the world market. Our food processors can't compete because of the wide gap in sugar prices.

Is this being done to save jobs in the sugar industry? Hardly. The supported price has allowed the domestic producers to mechanize their operations, cut their labor and reduce costs. It is a good deal for a very few producers, and it is at the expense of almost every American consumer.

Sen. Bill Bradley plans to attack these quotas in the 1990 farm bill, and we hope a lot of others in Congress—and the White House—join him. These quotas should be eliminated, and the price of sugar should be set by the market, not by law.

[From the Tampa Tribune, Oct. 20, 1989]

CONGRESS SHOULD CUT AID TO EXPLOITIVE SUGAR BARONS

Sugar rots the teeth and if consumer to excess adds body fat. Equally unhealthy is Congress' sugar program.

An investigation by Tribune reporters Ray Locker and Booth Gunter found that the sugar policy:

Results in $3 billion in extra food costs for American consumers each year.

Subsidizes an industry that is polluting the Everglades. Runoff from sugar fields is pumped to Loxahatchee National Wildlife Refuge, part of the Everglades' drainage system. The nutrient-rich water changes the soil's character. Consequently, cattails, which have little value as wildlife habitat, replace saw grass native to the area. Since 1979, when water officials began dumping the runoff in Loxahatchee, cattails have smothered 6,000 acres of the refuge and invaded another 12,000. They spread at the incredible rate of five acres per day.

The industry, armed with powerful lawyers and pricey consultants, opposes attempts to make growers clean up their waste water.

Destabilizes sugar-growing Caribbean countries. Blocked from the American market by trade barriers, these nations' economies are crumbling. Consequences will be costly for the United States.

Nations such as the Dominican Republic and El Salvador will need more American aid. More islanders will turn to the drug trade, more countries will be unable to pay their debts to American banks, and more illegal immigrants will seek refuge here. Too, some nations desperate for income will launch destructive projects that aggravate the globe's environmental woes.

Congress' sugar program guarantees the industry a profit. The government lends sugar companies money based on a price of 18 cents per pound. If the U.S. price is lower than 18 cents, companies do not have to pay the money back. They simply default on the loan and hand the sugar over to the federal government. The federal government doesn't want that to occur (as it did in 1985, when the industry defaulted on a $77-million loan) so it established quotas that throttle imports.

The result is high sugar prices for Americans and bleak prospects for Caribbean nations.

Congress and the American sugar industry are not solely to blame for the mess. European countries heavily subsidize sugar companies and dump at least 3 million excess tons a year on the world market. That lowers prices and would—where it not for Washington's protections—wreak havoc on American growers.

But the government program completely exempts growers from market forces. For instance, the world market price for sugar is 14 cents per pound. Americans pay 23 cents. And, though health-conscious Americans buy less sugar, Florida growers are expanding production. In fact, since 1981, when the program was initiated, the sugar industry has increased production 39 percent. Something is badly out of joint.

Alec Wilkinson's new book, *Big Sugar: Seasons in the Canefields of Florida*, reinforces the industry's image as ruthlessly exploitative. He details the brutal conditions cane cutters suffer. Immigrants from the West Indies, most fields hands have no choice but to take the work. Says one: "We live in captivity, we must obey our master—

anything he say, we do. For we, it is rough. We are all of us under a sufferation."

Congress is scheduled to reauthorize the sugar program next year—high time for a change. Given the complexities of global markets, government support for agriculture is sometimes unavoidable. But the sugar industry's deal is obscenely sweet.

[From the Wall Street Journal, July 17, 1990]

ASIDES

SWEET RELIEF

The Senate takes up the farm bill this week, and one of the first votes will be an attempt to put the bloated sugar program on a diet. Senators Bill Bradley of New Jersey and Bill Roth of Delaware think it's absurd that U.S. consumers should pay twice the world price of sugar to support a few wealthy domestic growers. Quotas on imported sugar cost consumers $2.4 billion in higher food prices every year. They also undercut U.S. foreign policy by undermining many faltering Caribbean and Asian democracies that need currency earnings to repay foreign debts and import U.S. products. Senators Bradley and Roth propose a cut of about 10% in the sugar subsidy. A budget squeeze already recently forced cuts of about that size in subsidies for milk, wheat, cotton, rice and feed grains. But the sugar lobby is powerful, and it has discovered that large PAC contributions serve as a useful sweetener. The vote on the sugar program will show whether Congress has any interest in reforming America's Soviet-style agricultural policy.

[From the Detroit News, June 11, 1989]

THE SUGAR SCANDAL

Many American politicians of both parties have made bashing foreign countries for keeping American goods out of their markets into something of a blood sport. Now an international panel has come along to declare that the United States hardly has clean hands in these matters. Let he who is without sin cast the first stone, or perhaps in this case, sugar bowl.

On June 2, a committee of the General Agreement on Tariffs and Trade (GATT), the international body that monitors trade barriers around the world, found that our policy of deliberately limiting the importation of foreign sugar was a trade violation. The full GATT is likely to endorse this position when it meets in Geneva on June 21. The Bush administration is thought likely to go along with the GATT ruling and ask Congress to repeal the import quota, which effectively acts as a subsidy to American sugar farmers, many of whom are in Michigan.

That would be good news, since the sugar import quota is a scandal of longstanding that has damaged both consumers and American allies in sugar-growing Third World countries. At the same time, it has also helped enrich various corporate fat cats.

Here's how it works: Congress restricts imports of sugar to 1.25-million tons this year, less than 8 percent of the roughly 16.5-million tons Americans consume every year. That has the effect of nearly doubling sugar prices in this country. The world price of sugar right now is a little less than 12 cents a pound (it was only 6 to 7 cents a year or more ago). But the quota means Americans pay about 22 cents a pound for the sweet stuff.

That disparity is what creates a market for an artificial sweetner called High Fructose Corn Syrup (HFCS), which is made primarily by the Archer-Daniels-Midland food conglomerate. It can produce HFCS for about 15 to 16 cents a pound and sell it to industry consumers of sweetners, such as soft-drink companies, and make a killing.

The import quotas have also helped wipe out what was left of the economies of the Dominican Republic, Haiti and Jamaica, all of which have lost hundreds of millions of dollars in export earnings. And in the Philippines, our aid can't begin to make up for the economic devastation caused by the sugar quota.

The protectionist hotheads in Congress—including many members from Michigan—will have a difficult time branding Japan a trade criminal while simultaneously insisting on favored treatment for their own constituents. The sugar quota is bad policy both domestically and internationally. The quicker it goes by the boards, the better.

[From the Chicago Sun-Times, Sept. 28, 1989]

SWEETHEART DEAL IMPERILS JOBS HERE

Mention the industrial heartland, and most people will think of steel mills and refineries, not candy companies.

But there it is, out on the West Side, a candy company that is the sixth largest employer in Chicago and the 24th in the state. Brach's plant on Kinzie, the largest candy manufacturing plant in the world, employs nearly 3,500 people, many of them from the economically depressed West Side. The company fuels the local economy with millions in taxes and purchases from other companies.

To say that Brach's, which started here, is vital to Chicago's economic health is an understatement.

But it may not be there for long. Saddled with obsolete equipment and high labor costs, the company is wondering whether it would be better off moving elsewhere . . .

Opps, we can hear the voices telling us now: "Hold it right there. If this is another attempt by a company to extort millions from taxpayers by threatening to move elsewhere, forget it." But it's not.

What Brach's wants is freedom from the stranglehold of one of this country's most effective special interests—the sugar lobby. A sweet deal worked out in Congress protects the 12,000 U.S. sugar growers, found mainly in the South and West, by keeping out cheap foreign sugar. As a result, Brach's must pay 10 to 18 cents more a pound for its sugar.

But it's the consumers who really get to pay, having to cough up nearly twice as much for their sugar, at a cost of some $3 billion annually.

To get some relief, Brach's wants the federal government to designate the West Side plant a Foreign Trade Zone. The designation, which is supported by state and local officials, simply means that the company would be allowed to buy sugar at more favorable world prices. It doesn't cost taxpayers anything.

Brach's President Ron Habijanac said the designation ensures that the company would stay here and invest some $100 million in the plant in the next few years.

But if Brach's gets this break, shouldn't other candy companies? We suppose so, if they qualify like Brach's.

The idea of the zone is to assist economically depressed communities, and it's hard to find any community more in need than the West Side, where nearly a quarter of its jobs have disappeared in a decade.

The real, long-term answer, of course, is to end the sugar industry's outrageous favored treatment. But because that is equivalent to yearning for utopia, the next best thing is to demand that Chicago not have to support sugar cane growers by giving up 3,500 of its jobs.

[From the Los Angeles Times, Dec. 21, 1987]

HOW SWEET IT ISN'T

Sugar has moved to center stage in Congress in a confusion of maneuvers that threaten continued inflated prices for consumers and broad disruption of the already troubled world market.

The bad news began with the announcement of new reductions in the import quotas that already had been reduced by 75% over the last four years. This squeeze on the pathetically poor producers of the Third World was a result of the congressional mandate that domestic producers be protected. But when Congress realized that the Philippines and Caribbean nations would be the principal targets of the cutbacks, just when the United States was trying to help them stabilize their troubled societies, two congressional committees approved special added quotas for the Caribbean nations, restoring their quotas to the 1983-84 level for one year. But at a terrible price: The bonus sugar would then be re-exported at a reduced price to compete on the world market, exacerbating the huge surplus and thereby punishing other desperate Third World producers.

There is a better plan—just introduced in Congress by Sens. Bill Bradley (D-N.J.) and William V. Roth Jr. (R-Del.) and Reps. Thomas J. Downey (D-N.Y.) and Willis D. Gradison Jr. (R-Ohio)—that would strip away over a four-year period the costly protection that is currently given to American sugar producers. Under the provisions of the plan, the loan rate would be cut from its present level of 18 cents a pound to 12 cents, and import quotas would be increased until they reached the 1983-84 level. This would certainly end the anomaly of American sugar growers producing more and more even while U.S. consumption declines and a world surplus grows. This ever-growing economic absurdity, implemented at the expense of consumers, is the result of legislation that guarantees sugar producers a profit—the only farmers so benefited.

As the sugar producers have manipulated successifully their congressional support, sugar has dwindled from 62% of the American sweetener market in 1981 to 43% this year. Corn sweeteners have grown from 32% to 44% of the market, and low-calorie substitutes from 5% to 12%. But all of the losses in sugar sales have been made at the expense of foreign producers—never mind that they can produce sugar more cheaply and that they depend on sugar in many cases as the sole way to climb out of poverty.

Congressional efforts to give temporary relief to the Philippines and the Caribbean nations at least recognize part of the injustice of the existing program. But the kind of partial remedy now proposed does more harm than good. Real redress depends on providing increased access to the U.S. market for all foreign producers and relieving the American consumer of this unnecessary burden of artificially high prices.

[From the Jackson (MS) Daily News, Clarion Ledger, Jan. 2, 1988]

CROP PROPS: SUGAR SUPPORTS BLATANT PROTECTIONISM

Uncle Sam maintains price supports for a wide variety of crops across the country, including some in Mississippi, but the props placed under sugar production represent one of the most glaring examples of government for the few at the expense of the many.

As a result, Americans pay more than twice the world price for sugar when they buy such products as candy, cookies and soft drinks. The world price is about 8.5 cents per pound; the price to U.S. consumers is 18 cents a pound.

Such artificially inflated sugar prices are costing consumer up to $3 billion a year, or $100 for the average family of four, critics claim.

As Sen. Bill Bradley, D-N.J., observed, "It is ludicrous." It's also foolish, inequitable and outrageous.

The nation's 10,000-plus sugar growers, of course, strongly defend the higher price, saying it keeps them from being wiped out by unfair world competition. Owners of many another American enterprise hurt by foreign competition would like a fraction as much help.

There is clearly something wrong with an industry (agricultural or otherwise) that claims it must receive more than twice the world price to stay in business.

Perhaps the most startling thing about the situation is that sugar growers are not that numerous, relatively, not spread across the nation geographically. However, their system draws the support of a broad coalition of lawmakers with agricultural constituents—sugar-cane growers in Hawaii and Louisana and sugar beet farmers in the northern Midwest.

One might think the sugar producers would be quietly satisfied, but no—they claim they're struggling still.

Congress appears far from embarrassed by the sugar program. Nevertheless, Bradley and several other lawmakers have introduced bills designed to cut the price of domestic sugar and to increase sugar imports, imports now restricted by a rigid quota system used to shore up domestic prices. The proposals merit support.

Price supports, like crab grass and cockeburs, are tough to fight off, but if and when Congress begins scaling back agricultural subsidies, sugar growing may be the best place to start. But food buyers would be wise not to wait; they had best start reducing their consumption—which might be good for their health anyway.

[From the (Phoenix) Arizona Republic, Jan. 7, 1988]

UNCLE SUGARDADDY'S SOUR DEAL

To understand the unpleasant consequences of trade restraint—sure to get even worse if pending protectionist legislation ever becomes law—it is only necessary to examine the sweetheart deal between the federal government and the nation's sugar industry.

In an effort to protect a relatively small number of American farmers and refiners from foreign competition, Congress long has set quotas for sugar imports. This year's limit is 750,000 tons down an estonishing 25 percent from the previous year and the lowest quota since 1875—that is to say, in the past 113 years.

The extraordinary drop was necessary to keep U.S. sugar prices at an inflated level, which a foolish Congress supposes to be a national priority. The current price, about 21 cents a pound, is more than three times the world price. Since corn sweeteners and artificial substitutes have reduced demand substantially, cutting imports was the only way to maintain the high price required under a 1982 congressional mandate.

The chief, if not the only, beneficiaries are some 10,000 sugar growers and refiners, who are protected from the marketplace, and those U.S. congressmen who will be rewarded with political support. For nearly everyone else, the sugar quota can be counted as no more than a raw deal.

Not only will American consumers be forced to pay as much as $3 billion in higher prices for some soft drinks and candy—an estimated $100 a year for every family of four—but U.S. producers of sweetened products, put at a competitive disadvantage in international markets, must pay a high price as well.

If this weren't bad enough, the sugar quotas also hurt foreign sugar producers in Third World countries where the United States is trying to promote economic development as an alternative to the relentless spread of Marxism. These include such basket cases as Haiti, Brazil and the Philippines.

Recognizing the foreign policy drawbacks in its sugar-pricing scheme, Congress has belatedly authorized a temporary arrangement whereby the Philippines and Caribbean nations can sell more sugar to the United States, but for export purposes only. The refined sugar will be sold abroad via another subsidy device—one that will penalize still other developing countries.

Apart from eliminating sugar subsidies altogether, the best solution would be passage of pending legislation that would phase out sugar assistance over the next several years, giving producers and politicians time to learn how to stand on their own feet. But unless voters and consumers begin raising some cain themselves, victory over the sugar lobby seems remote.

[From the Indianapolis Star, June 30, 1989]

"UNCLE SUGAR DADDY"

The McMillan *Dictionary of Slang and Unconventional English* defines "sugar daddy" as "an oldish man spending lavishing on a young woman." Movies usually presented a sugar daddy as one who buys furs and jewels for a chorus girl. But the U.S. government has given new meaning to the term. Uncle Sam uses taxpayers' funds to protect favored businesses.

It works this way: Congress protects the country's sugar industry with import quotas to keep domestic sugar prices up to four times the world price.

The quotas restrict imports to 1.25 million tons this year, about 8 percent of the 16.5 millions tons Americans consume. The artifically induced high price, in turn, stimulates more domestic production, which has driven sugar imports down about 80 percent over the past seven years.

The government gives farmers a 22-cent per pound support price for growing sugar, about twice the world market price. The result is that U.S. consumers pay up to $3 billion a year more for sugar and other sweeteners than if Uncle Sam didn't interfere in the market. Further, more than 15,000 jobs have been lost as food processing shifted to nations where sugar is cheaper.

Domestic sugar producers claim that import quotas save U.S. jobs and guarantee Americans a secure supply at stable prices. Unmentioned is that over the past 13 months retail sugar prices have risen nearly 8 percent to about 35 cents a pound.

Free trade economists long have argued that the quotas break rules set by the General Agreement on Tariffs and Trade (GATT) of which the United States is a member. They turned out to be right.

On June 22 the 96-nation council of GATT said the sugar quotas violate world trade rules. Australia brought the complaint before the panel, successfully arguing that the quotas hurt it and other sugar producing nations.

As all GATT actions must be unanimously accepted by members, Washington could have blocked the panel's ruling, but the ruling was made soon after U.S. citation of Japan, India and Brazil as "priority" nations whose trade barriers subject them to possible U.S. trade sanctions. To avoid appearing hypocritical, Washington agreed to comply with GATT's decision.

"We have an obligation under GATT to administer the program consistent with international trade rules and we are confident we can do so," said Carla Hills, the U.S. trade representative.

No compliance details or timetable were given but there are several options.

Quotas could be changed to GATT-approved tariffs, which are less restrictive. Or reparations could be paid to Australia. Better yet, consideration could be given to ending the quotas and opening the U.S. market so that consumers may buy sugar products at the less costly true market prices.

That would require standing up to the powerful sugar industry and provoke battles in Congress where cane and beet sugar producers have strong representation, especially in the House and Senate agricultural committees.

But it is about time Uncle Sam stopped playing the rule of Uncle Sugar Daddy.

[From the Evansville, IN, Courier, May 4, 1990]

BITTER SWEETS

President Bush's decision to let Nicaragua sell its sugar in the United States is good news all around, not only for American candy manufacturers and sweet-toothed consumers but also for beleaguered Nicaraguan farmers climbing out of the Marxist quagmire.

Unfortunately, that's where the good news ends. U.S. sugar policy is a mess, costing billions of dollars a year. And it's in danger of getting worse.

Like too many U.S. trade policies, the import of sugar has been used as a foreign relations tool, a means of punishing or rewarding regimes according to political taste. In 1983, President Reagan began distributing Nicaragua's sugar import quota to other Latin American nations in an attempt to bring the Sandinistas to heel.

Now Bush has restored democratic Nicaragua's quota to pre-1983 levels, without reducing the beefed-up allotments of its neighbors. More sugar will thus flow into the United States, lowering prices. It's a good decision, but one made for the wrong reasons.

The problem lies in the quotas themselves. The government imposes quotas to keep cheap sugar from flooding U.S. markets, thereby protecting the country's 11,000 beet and cane growers whose product is more expensive. The U.S. sugar price is 24 cents a pound, the world price 15 cents.

While insulating U.S. growers from the inconvenience of competition, the quotas cost American consumers about $3 billion a year. Just as important, they cost American jobs, as the 3,500 workers at Chicago's E.J. Brach & Sons will tell you.

The candy manufacturer, struggling to stay in business on the city's blighted West Side, recently requested an exemption to purchase sugar at world prices. Its request denied, the company now says it may be forced to relocate abroad, where sugar is bought and sold according to the laws of supply and demand rather than the preference of a powerful sugar lobby.

This dangerous silliness continues. The other day, a House agricultural subcommittee voted to increase subsidies for domestic sugar growers, even though the average grower made $235,000 in subsidies over the last three years.

That could buy a lot of sugar in Nicaragua, or save a lot of jobs on Chicago's West Side.

[St. Petersburg Florida Times, May 5, 1990]

STOP THE SUBSIDIES FOR BIG SUGAR

Figure this out. The U.S. sugar program has been so generous to domestic growers that they have actually increased production by 41.3 percent at a time when national consumption has dropped 26 percent. Yet a House subcommittee, in its first offering on sugar for the 1990 Farm Bill, says the subsidy should be increased.

Can this make sense?

Rep. Jerry Huckaby, D-La, who chairs the subcommittee, has made a serious miscalculation if he thinks the public is ready for more of the same on sugar subsidies. Not only has his bill raised the ire of consumer groups for obvious reasons, but it has drawn scorn from the Bush administration for its trade implications and from many agricultural interests whose loyalties are being divided. While other farm support programs are likely to take budget cuts this year, the Sugar Program has no such worries. It is "off budget," which means the subsidy is charged directly to consumers—at an estimated rate of $3-billion a year.

As *Congressional Quarterly* reports: "No other U.S. crop program is more blatantly protectionist than sugar, and no other has such far-reaching implications for U.S. foreign and trade policies."

Because the sugar program relies on import quotas to keep U.S. prices artificially high, it hurts not only domestic consumers but foreign producers. The Caribbean nations whose economies depend on sugar production have been crippled by the restrictions. According to the CBI Embassy Group, 22 Caribbean Basin countries have lost 400,000 jobs since 1983. Instead of restoring open trade, though, Huckaby's bill simply tries to buy off Caribbean nations by giving them a 5 percent premium on the little sugar they are allowed to send to the United States. It's a blatant attempt to win their support for trade policies that are an affront to the international General Agreement on Tariffs and Trade treaty that is currently being renegotiated.

The limits Huckaby proposes for U.S. sugar production are similarly deceptive. Domestic growers are willing to limit their producton for one reason, and one reason only: They fear that if all imports are stopped, then the United States won't be able to use them as a tool to inflate domestic prices.

The most galling element of the Huckaby bill is its attempt to increase the subsidy to growers. Though domestic prices are now about 23 cents per pound, roughly 8 cents more than the world price, Huckaby is not satisfied. He would increase the government loan rate, which is now 19 cents and thoroughly unrelated to the actual cost of production, by a factor of inflation each year. In so doing, he assures the growers will earn far in excess of the world market price, and that they cannot possibly suffer a loss. (If the United States doesn't prop up the domestic price above the loan rate, growers can dump the sugar on the government and keep the loans.)

A more responsible revision to the sugar program has been proposed by Reps. Thomas Downey and Willis Gradison, who would lower sugar price supports by 5 percent a year and gradually increase sugar imports.

In the House agricultural subcommittee that is expected to begin analyzing Huckaby's bill next week, Florida is represented by Rep. Tom Lewis, whose district includes the state's sugar county. Lewis has been a consistent friend of the sugar growers, but he now is facing a different set of questions. In Flordia, any politician who votes to subsidize sugar is also voting to help an industry that is poisoning one of the state's most precious resources—the Everglades. In Florida, Big Sugar is, in more than one way, a bad deal.

[From the Provo, (UT) Herald, May 8, 1990]

SUGAR IMPORT QUOTAS NOT VERY SWEET AT ALL

Congresionally imposed import quotas on sugar are supposed to protect U.S. beet and cane growers, thereby preserving American jobs.

But at what price?

At a Chicago candy factory, the price may be the imminent loss of 3,500 jobs.

Uncle Sam's sugar program has proved to be a raw deal for workers and consumers alike. Over the last few years, an estimated 12,000 workers in the prepared food industry lost their jobs because of the high domestic cost of sugar. The price of sugar in this country is artifically pegged at 24 cents a pound, about 60 percent more than the price on the world market.

Because of the ripple effect of sugar prices on a wide range of prepared foods, from baked products to breakfast cereal, the total cost to American consumers of quotas and subsidies is estimated at several billion dollars a year. All this is to protect approximately 12,000 domestic sugar growers, or less than 2 percent of American farmers.

America's third-largest candy maker vividly illustrates the flip side of sugar price supports. The financially ailing company, E.J. Brach & Sons of Chicago, may be forced to move to Canada or Mexico if its application to buy sugar at world prices instead of inflated domestic prices is turned down. Cheaper sugar would save the company $20 million a year.

The request has been provisionally rejected by the Commerce Department. But the decision is subject to review by Commerce Secretary Robert Mosbacher. About 3,500 jobs would be lost if the company closed its 68-year-old factory on the economically depressed West Side of Chicago.

The quotas that help sugar farmers clearly hurt the candy company and other food processors. But the farmers wield a disproportionate influence on lawmakers on Capitol Hill.

Sugar quotas clearly distort the international market and transgress the rules of free trade. In addition to hurting consumers, the protectionist measures hurt the emerging democracies of the Caribbean, which rely on sugar as a major export. This is a prime reason the Agriculture Department is working toward eventual elimination of the quota system and why pressure is building in Congress to strip sugar quotas from the 1990 farm bill, which is now being drafted by a House Agriculture subcommittee.

It is time to end the sweetheart deal for domestic sugar growers. Allowing the sugar market to find its own level under free trade conditions would help the Chicago candy company and other domestic food processors compete with foreign companies. It would lower prices for consumers. And, probably most important and certainly not least, it would provide thousands of jobs for American workers.

[From the San Diego Union, Nov. 28, 1989]

BITTER SUGAR

The ever-perky Mary Poppins prescribed a spoonful of sugar to make the medicine go down. But congressionally imposed import quotas on sugar are enough to gag American consumers.

Last year, Americans paid 22 cents per pound for raw sugar, three times what the rest of the world paid. According to the U.S. Department of Commerce, sugar quotas cost consumers more than $3 billion a year. And who benefits from this federally protected price-gouging? Approximately 12,000 sugar growers, or less than 2 percent of American farms.

Congress currently imposes a steep tax on all imported sugar, which in turn enables domestic producers to jack up their prices. Yes, we've seen the swarmy Archer-Daniels-Midland commercial with a smooth voice insisting that American sugar remains one of the best bargains in their local grocery store. Don't you believe it.

Not only are consumers paying an extra two bucks for a 10-pound bag of granulated, but the price of most prepared foods and artificial sweeteners is inflated as well because of the wasteful sugar quotas. Between 1982 and 1984, the quotas added $7.5 billion to the price of such products. A case in point is the extra 10 cents that consumers pay for a gallon of ice cream to support domestic sugar producers.

Uncle Sam's sugar program has been a raw deal for the 12,000 workers in the prepared food industry who have lost their jobs because of the high cost of sugar. This is because foreign processed food companies take advantage of the price discrepancy and clobber U.S. firms in the world market. In fact, the Commerce Department estimates that it costs $76,000 to save just one job in the domestic sugar industry.

But such facts haven't disuaded the well-heeled sugar political action committees from doling out plenty of cash to pliant congressmen. During the last two national election campaigns, the sugar PAC's contributed $2.1 million to federal lawmakers. In return for such generosity, Congress routinely renews the sugar quotas under the guise of helping the family farmer. One such family, the Fanjul brothers, has seven sugar companies that have been so lucrative they have financed three resort hotel takeovers and four mansions in Palm Beach, Fla.

The U.S. sugar quotas, which clearly violate world trade rules, expire next year. Sen. Bill Bradley, D-N.J., plans to lead the fight

to strip these quotas from the 1990 farm bill. President Bush should lend a hand in dissolving this sweetheart deal for domestic sugar producers.

[From the Miami Herald, Dec. 18, 1989]

BALANCE SUGAR QUOTAS

Modern market economies still bear vestiges of the sort of protectionism that was rampant in the 19th Century. Though it is clothed in the technical language of trade quotas and complex subsidies, present-day protectionism is no less injurious to domestic consumers and to a country's trade partners than were its outmoded predecessors.

U.S. sugar quotas are an example of modern protectionism. The import quotas on sugar hurt American consumers by allowing domestic producers to sell their sugar at a guaranteed price that is substantially higher than the world-market price.

Moreover, the quotas also have wrought havoc in the economies of the Caribbean's sugar-producing countries by denying them much of a share of the large U.S. market. Since they cannot sell their sugar profitably elsewhere, countries such as the Dominican Republic and Jamaica have been devastated by restrictive U.S. quotas. The resultant reduction in sugar earnings is one of the chief causes for the rise in Caribbean unemployment and emigration.

While the United States rightly promotes policies such as the Caribbean Basin Initiative (CBI) to assist development in the region, its sugar quotas simultaneously demolish much of what the CBI purports to accomplish. That is why the Agriculture Department's recent decision to raise the U.S. sugar quota by 13.5 percent was sorely needed and deserves praise.

The latest quota of 2.49 million tons is still less than this decade's previous high of 3.09 million tons, but the increase will help Caribbean Basin producers enormously. For the depressed Dominican Republic alone, for example, the increase represents additional income of $22 million. Other important producers will benefit, among them the Philippines, Brazil, and Guatemala.

When the sugar program expires next year, Congress should fully weigh its effects on the sugar industry and its benefits to consumers and struggling Caribbean nations before crafting a new version of the bill. The best balance would mean export earnings to Caribbean producers, lower prices to U.S. consumers, and reasonable return to the American sugar industry.

[From the Akron Beacon Journal, Jan. 4, 1988]

A SUGAR-COATED MARKET

Talk about your sweet deals. For years, the nation's sugar growers have convinced their friends on Capitol Hill to keep foreign competition at a minimum, allowing them to charge their domestic customers far more than the world price for sugar.

It's quite a scam—all legal, of course, but a flagrant example of protectionism. And this year, the practice has plunged to new depths of venality. The quota on cheap foreign sugar has been cut to its lowest level in more than 100 years. That'll keep the domestic price at about 18 cents a pound, more than twice what foreign growers would charge.

The loser in all this is the consumer. The inflated price he pays amounts to roughly $3 billion a year, an excise tax, if nothing else. Incredibly, the winners are no more than about 10,000 sugar farmers, a mere 2 percent of all U.S. commercial farmers. As one consumer advocate told the Washington Monthly, "We could afford to pay every sweetener grower in the United States almost $250,000 in cash, and it would be cheaper than extracting the high prices for sugar than current law requires."

One's tempted to think twice, even three times, about that holiday candy. Concern grows when consideration is given to the effect on U.S. foreign policy. Corazon Aquino, the Philippine president, presides over a fragile democracy that Washington claims to support. But the American sugar policy benefits the communist opponents of the Aquino government. It hobbles the Philippine economy; 250,000 cane-cutters there are out of work; how many have turned in frustration to the insurgency?

U.S. sugar policy also undermines American interests in the Caribbean. Once again, words and deeds clash. President Reagan's Caribbean Basin Initiative was a well-conceived, free-market approach to trade and economic policy. But there's no free market in sugar. Caribbean growers have been pushed out of their most lucrative market, the United States. It's hard to imagine what more Washington could do to encourage radicalism there.

Sen. Bill Bradley, D-N.J., and Rep. Thomas Downey, D-N.Y. have offered a plan to reduce the U.S. sugar quota system over the next three years. The aim is to cut the price of domestic sugar through competition. It's long overdue. The sweetest deal would be one that serves the interests of American consumers and the country as a whole.

[From the Asheville (NC) Citizen, Apr. 25, 1989]

SUGAR SUBSIDIES ADD TO FAMILY FOOD BILLS

Federal farm programs abound with ironies, one of which is, no matter what the outcome of national farm policy, the country also gets stuck with a higher tab.

Consider sugar subsidies. When it comes to feeding at the federal trough, no one has a sweeter deal than the nation's few thousand sugarcane growers, most of them corporate enterprises that control thousands of acres each.

Were it not for the federal government, they would have gone out of the sugarcane business years ago and used those vast farms for something more productive. Instead of switching to other crops, they have persuaded Uncle Sam to give them a monopoly that allows them to charge billions of dollars more a year than their product is worth.

The world price of sugar hovers around 10 cents a pound. The federal government guarantees U.S. sugar producers 18 cents a pound and imposes import quotas to limit the supply so that market prices will stay above 18 cents.

The program is required to operate at "no net cost" to the government—but it operates at high cost to Americans in other ways. Because the price of sugar is held at a level well above what the rest of the world pays, U.S. customers spend $3 billion more a year for food than they would otherwise.

Foods containing sugar can be produced cheaper elsewhere, so food imports have grown, taking jobs away from American workers. The U.S. government sends foreign aid to Caribbean countries that once were self-sufficient. We feel obligated, because their economies were disrupted when we closed U.S. markets to their sugar.

No net cost? The program is costly to the extreme, and not just in terms of family food budgets and foreign aid dollars. It hurts our standing with our Caribbean neighbors and gives the lie to trade policies that we urge upon the rest of the world.

The mighty Untied States, proponent of free markets and fair trade, resorts to blatant protectionism to benefit a relative handful of sugarcane and sugar beet growers—and does so at the expense of the rest of the country. The program not only makes us hypocritical, it makes us look foolish.

Sugar producers have preserved their $3-billion-a-year subsidy through the clout of the farm lobby. Other farm groups (dairying, grains, cotton, soybeans, tobacco) tend to close ranks around any program that comes up for review, no matter how wasteful or misguided the particular program may be. They see an attack on one as an attack on all.

President Reagan tried to scale back sugar price supports and wean the industry from its subsidies. The farm lobby won.

President Bush seems more tolerant of the sugar program, but several members of Congress are sponsoring legislation anyway that would reduce price supports and slowly raise the quotas on imports. Despite heavy support from food companies, the measure has little prospect of passage.

Federal farm programs are something that most of the public seems to care little about—even when they hit us in the pocketbook.

[From the Fort Lauderdale Sun-Sentinel, May 24, 1989]

SUGAR INDUSTRY AID ENOUGH TO RAISE CANE

(By Jack Nease)

With Congress once again being asked to pass laws sweetening the bank accounts of South Florida sugar producers, it is time to review the basics of the business.

First, there is no such thing as a family sugar farm. Sugar cane growing is a millionaire's game. It takes thousands of acres, much expensive equipment and a big supply of cheap labor.

Likewise, there is no such thing as a "ma-and-pop" sugar mill. There are only seven mills in the state, and all except two are owned by large corporations. The exceptions are cooperatives owned by large growers.

The profits made by these big sugar operations are tightly guarded secrets.

FAMILY HAS FETISH ON SECRECY

Indeed, the people now reputed to be the biggest sugar producers in South Florida, the Fanjul family of the town of Palm Beach, makes a fetish of secrecy. The United States Sugar Corp. in Clewiston, the state's second largest sugar producer, is a private company now and doesn't make public reports either. But before going private, it reported annual profits as high as $38 million.

Other big players in the business include the Lykes family in Tampa, which made a fortune in shipping, banking and citrus, and the St. Joe Paper Co., a remnant of the old Alfred I. duPont estate.

Now why, you might ask, should Congress busy itself with devising programs to benefit this bunch?

The Florida sugar industry has a couple of answers. First, it says, without some sort of price-support program, there would be no sugar industry in this country. Low-priced

sugar from foreign countries, subsidized by foreign governments, would flood the country. Domestic producers would be forced out of business. Then sugar prices would rise. Consumers would pay more.

Additionally, Florida sugar producers argue, the industry produces jobs for South Florida. They come up with astronomical estimates of this impact but actual payrolls are tiny. The largest group of employees are part-time workers imported for the harvest season from Jamaica.

PROGRAM HAS 2-FISTED DELIVERY

Sugar prices are kept high by a two-fisted federal program. Punch one comes when sugar import quotas are kept low, producing a sugar scarcity in this country. Punch two comes when a "market stabilzation" price is set, and federal loans are made to sugar growers. That price, almost 22 cents a pound for milled sugar, is supposed to cover costs of production, repayment of loans and give growers a profit.

But how much profit? That's a big, big secret. Ask sugar producers about costs of production and they just laugh.

A group of urban congressmen has introduced legislation that would cut loan support prices by 6 cents a pound in the next four years.

What will happen next is an unsavory bit of vote trading among congressmen with agricultural supporters. Don't be surprised, for example, to see South Florida congressmen voting for tobacco price supports and tobacco-state congressmen voting for sugar.

The sugar program isn't supposed to cost taxpayers anything as operated now, but in 1985 it cost taxpayers $77 million.

The sugar program is an absurd example of government aid to the rich. It keeps prices high but never lowers themn.

If it is to be continued, taxpayers should make two modest requests: (1) Make public costs of production, so more realistic, lower price-support levels can be set, and (2) Give us back our $77 million.

Don't hold your breath.

[From the St. Louis Post-Dispatch, Jan. 3, 1988]

HOW SWEET IT ISN'T

The recent announcement by the Agriculture Department that 1988 sugar imports will be cut 25 percent compared to last year is devastating news for some countries the United States is trying to help in many other ways. This was not a mean-spirited move on the part of the administration, however, but was mandated by the Food Security Act of 1985.

That law requires that the sugar program not cost the government money—that is, no surplus stocks are bought and held. To maintain the price support without purchasing the commodity, the government must limit the amount of sugar that can be imported. While the government may not be out a dime, the law costs consumers plenty. Sugar price supports maintain a U.S. sugar price almost three times the world level. Grocery shoppers should consider all the products they buy that contain sugar and recognize the price they pay to shelter a single industry.

In additon to domestic economic concerns, the sugar import restrictions hurt some of our needy allies. For instance the 1983 Caribbean Basin Economic Recovery Act was supposed to give those countries greater access to U.S. markets. But what is a major Caribbean export? Yes, sugar. Likewise, successive reductions in the sugar quotas have cost the Philippines $150 million in each of the last four years. Evidently recognizing the hardship, Congress this year passed special import rules for the Caribbean and the Philippines.

What Congress should do next year is revise the sugar price-support legislation. The administration has said it will push for a more "rational" sugar program. Indeed. Sugar price supports and trade barriers both need to be lowered.

[From New York Newsday, June 4, 1989]

JAPAN'S AN UNFAIR TRADER? WE HAVE QUOTAS, TOO

Caught, with our hands in the cookie jar. Just as Washington is getting aggressive about trade, insisting Japan drop barriers against U.S. goods and Europe stop subsidizing farm exports, look what happens:

A panel that referees world trade has found that this country's own limits on sugar imports violate international trade rules. To conform with the General Agreement on Tariffs and Trade, Washington must scrap or overhaul its quotas on imported sugar.

GATT is right: Sugar quotas are bad business. They limit the amount of low-cost foreign sugar coming into the United States, keeping prices up here. It's welfare for U.S. sugar growers, at an estimated cost to consumers of perhaps half a billion dollars a year.

But the farm lobby has clout and the Reagan administration gave in when it demanded that sugar quotas, which lapsed in the '70s, be revived in 1982. So it will be hard to end them. But it's important to do that.

There is a lesson to be learned from this: It's hard for U.S. politicians to resist farmers' demands for trade protection, and it's just as hard for those from Japan and Europe, too.

Under Congress' 1988 trade law, the Bush administration has unilaterally cited Japan for limiting access to its markets and threatens to retaliate if Tokyo doesn't change its ways. That kind of bullying isn't allowed under GATT, but we're doing it anyway.

At the same time, this country is leaning hard on the European Economic Community to end its farm subsidies, as part of a sweeping revision of GATT rules now being negotiated.

We want Europe and Japan to accept our view of what trade rules should be—but we're not living by the trade rules that the industrial world accepted long ago.

We are, in short, in one prickly predicament. GATT's rules aren't enforceable, so Washington could ignore them. But to do that would seriously weaken U.S. credibility on trade. That's particularly dangerous because we, as much as any other country, will benefit from the current negotiations to modernize GATT.

Washington may wiggle out of this one yet, perhaps by modifying the sugar quotas without actually eliminating them. But if the Bush administration wants the rest of the world to play cleaner than clean when it comes to trade, it had better come to the table with clean hands itself.

[From the La Grange (GA) News, Mar. 15, 1989]

A $3 BILLION OVERCHARGE FOR SUGAR

(By John Chamberlain)

The United States is in trouble in the Caribbean. It could solve some of its direct problems with Jamaica, Guatemala and the Dominican Republic if it would only do something about sugar. The good will thus engendered would skip borders. What with steadily tightening quotas on Caribbean sugar, the U.S. has been carrying protectionism to a point that threatens revolutions to our south.

What to do about it? Beet sugar farmers in Colorado, and cane growers in Louisiana, whose domestic prices are supported, maintain powerful lobbies that want no change. But a New York Democrat, Rep. Thomas J. Downey, and an Ohio Republican, Rep. Willis D. Gradison, Jr., have just introduced a Sugar Supply Stabilization Act into Congress that would phase down a loan rate of 18 cents per pound of sugar until the rate reaches 12 cents. Meanwhile import quotas for sugar would correspondingly increase, to the cheers of the Caribbean countries.

How this would affect the American housewife who is intent on baking a birthday cake seems negligible. A good-sized cake calls for the addition of a pound (two cups) of white sugar retailing at 40 cents a pound to flour, milk and vanilla extract. Forty cents in an inflationary age isn't much.

It's when you multiply the cake bakers that the cost of sugar becomes politically troublesome. According to L. Francis Bouchey, the president of the Council for Inter-American Security, "the U.S. consumer . . . pays up to three times the world price for sugar," costing consumers an additional $3 billion a year. Bouchey calls this a "bloated level" for the benefit of 10,000 domestic sugar producers "who can't compete in the world market."

With an eye on Ortega in Nicaragua, Bouchey thinks it would be "utter folly for our government to increase economic aid to Latin America and the Caribbean, and then shut our market to one of the region's most important exports." U.S. aid to the Caribbean Basin countries, Bouchey says, "does not even match the revenue lost from our ever-shrinking sugar quotas." Sugar quota help to Guatemala, Jamaica and the Dominican Republic would create an opinion in Central America favorable to the Contras in Honduras, who are waiting for a turn in events before deciding to move against Ortega.

Bouchey is willing to let George Bush accept the Costa Rican invitation that the U.S. "become directly involved in negotiating the implementation of the Arias plan," which calls for a peaceful democratic settlement with the Nicaraguan Sandinistas. By participating in the Arias negotiations, Bush can "frame the issue and focus pressure on compliance." If Ortega uses the negotiations in bad faith, breaking his word for the third or fouth time, he will stand finally exposed. The reports are that Venezuela's new president, Carlos Andres Perez, would then stand alongside George Bush "in efforts to put the teeth back into the Arias accord."

There are eight presidential elections scheduled in Latin America this year. Most will presumably go democratic. But protectionist trade quotas don't help the democratic parties. Says Bouchey, "only an open trade system will allow for long-term economic growth in debtor nations, and thus ease the debt and poverty which provoke political upheavals damaging to the national security."

The next time you bite into a piece of birthday cake, think of this.

[From the Journal of Commerce, Jan. 5, 1988]

HOW SWEET IT ISN'T

Deep in the 8-inch stack of pages comprising the omnibus appropriations bill, one of the two budget measures signed reluctantly before Christmas by President Reagan, is a provision hailed by sugar refiners, Caribbean nations and the Philippines. It would permit refiners to import 400,000 tons of sugar above quotas from these countries for processing and re-export at government-subsidized world prices.

This means that U.S. consumers will be paying twice for the privilege of supporting Gulf state and Hawaiian cane growers and Midwestern beet sugar producers. Because of price controls and import quotas, which cut overseas sales in this country as domestic production rises, they pay roughly twice the world price for sugar. It is estimated that this alone is costing consumers $3 billion a year. Now, through taxes, they will support Caribbean and Philippine growers frozen out of the U.S. market and U.S. refiners unable to process to the crops of these growers.

Sponsors of the measure emphasize that there will be no new subsidy costs. The sugar credits merely will substitute in part for another federal program that finances the donation of surplus U.S. farm products to needy countries. This hardly changes the fact that U.S. consumers are paying twice for the privilege of adding to the number of U.S. sugar millionaires.

This coming-and-going insult to the U.S. consumer stems from passage of an omnibus farm bill in the Christmas rush to adjourn two years ago, much as the twin budget measures were passed this season. A few years ago, responding to requirements of the 1985 law, the administration trimmed sugar import quotas 25 percent, bringing to 75 percent the cuts over the past four years and reducing sugar imports to the lowest level in more than 100 years.

The effects of sugar import quotas have not been slow coming. Soft drink manufacturers increasingly are using sugar substitutes. Cookies makers are moving production offshore. And refiners have been driven out of business.

Sen. Bill Bradley, D-N.J., and Rep. Tom Downey, D-N.Y., have launched an effort to rein in this unconscionable giveaway. Their bill deserves the strongest support. Equally important, as the president remarked with regard to the budget just passed, there has to be a better way to run a government. If ever there was a matter deserving the line-item veto, sugar import limitation is one.

[From the Clearwater (FL) Sun, June 27, 1989]

U.S. IS GUILTY OF SUGAR PROTECTIONISM

No sooner had the United States accused Japan, Brazil and India of unfair trade practices than it got nailed for its own misdeeds. Australia successfully argued before a world trade panel that U.S. sugar quotas are hurting other sugar-producing countries. The embarrassing turnabout should cause Americans to take a hard look at the difference between what they preach and what they practice about trade.

Since it resurrected the sugar program in 1981, Congress has protected the country's sugar industry with import quotas. The artifical restrictions keep the domestic sugar price as much as two to four times higher than the world price. The high price stimulates more domestic production, which has driven sugar imports down 80 percent over seven years. After losing 75 percent of its quota, Australia filed a complaint with the General Agreement on Tariffs and Trade (GATT).

Sugar growers and their allies argue that the quotas guarantee Americans a secure supply at stable prices and protect 100,000 jobs. The protection is necessary, they say, because the European Community heavily subsidizes sugar production and dumps the surplus on the world market. What a deal. In return, American consumers pay up to $3 billion a year more for sugar products and other sweeteners. In addition, more than 15,000 jobs have been lost as food processing shifted to countries where sugar is cheaper. By protecting sugar, the United States endorses protectionism elsewhere, which hurts U.S. exports.

Sugar is a test. If the United States fails to discipline itself for sugar violations, world trade law and order will be severely undermined.

[From the New York Times, Dec. 12, 1989]

UNCLE SUGAR, UNCLE MILK

Christmas brings candy canes, chocolate bon-bons—and a woeful tangle of Federal meddling. Candy makers' grief over sugar import quotas peaks during this big selling time. Milk chocolate makers suffer added grief this year, over milk quotas. What's happening is regulation gone haywire.

Quotas protect sugar growers against foreign competition—and mean that American consumers pay an extra $3 billion a year for sugar and sugar products. With sugar's price jacked up artificially, the demand for substitutes has risen, and their prices too.

Candy canes—60 percent sugar and 40 percent corn sweetener—catch it both ways. According to Bob's Candy, a Georgia specialist in candy canes, U.S. producers pay roughly twice as much as foreign producers for the two ingredients. The inevitable result: America is importing more candy canes.

Milk chocolate producers have the same problem with sugar quotas—and now have a milk quota problem as well. Milk chocolate is half sugar, one-quarter cocoa and one-quarter nonfat dry milk. Annual imports of dry milk in this form are limited to 820 metric tons. That's barely a one-day supply for the American milk chocolate industry, which uses 300,000 tons a year.

The absurdity of Washington's tight curb on dry milk imports has been compounded this year. The Government is subsidizing milk exports—on top of last year's drought and earlier programs to cut dairy herds. Earlier this year it cost 80 cents to buy a pound of nonfat dry milk in this country. It now costs twice as much.

Two New Jersey companies, M&M Mars and Van Leer Chocolate, are pressing the Department of Agriculture to lift the milk quota briefly. Good luck. Bob's Candy and legions of other sugar users have railed against sugar quotas for years. In Washington, when it comes to protecting farmers versus protecting consumers, the consumer loses.

[From the New York Times, May 23, 1989]

AMERICA'S TRADE CURBS ARE UNFAIR, TOO

On the eve of Washington's crackdown on so-called "unfair" trade restrictions by other countries, an international panel has ruled that one of America's most outrageous restrictions is unfair, too: the quota on sugar imports. The timing is coincidental, but the message is clear. Unfair trade, like fair trade, works both ways.

Under a deadline set by last year's trade legislation, the Administration will soon declare that one or more countries discriminate against certain U.S. products and services and demand negotiations to remove objectionable restrictions. If Washington isn't satisfied with the results, the law threatens punitive tariffs on imports from the targeted countries.

Congressional defenders of this unilateral high-handedness claim it's justified because America is more open to imports than other countries. By threatening to restrict U.S. imports, the law would pressure other countries to lower their barriers. There is nothing wrong with badgering other governments. The risk is that they will balk at America's presuming to be the sole judge of what's fair and unfair, and that the process will lead to trade warfare and more, not fewer, restrictions.

The strategy has already had one salutary result. To avoid being targeted, South Korea has agreed to a wide range of measures that should make it easier for foreigners to sell and invest there. But the European Community, taking a harder line, protests that unilateral action by the United States would violate the General Agreement on Tariffs and Trade, the agreement that covers most of the world's merchandise trade.

The General Agreement provides a framework for negotiations to reduce trade barriers—like the Uruguay Round now under way—and a forum for settling bilateral disputes. Indeed, acting on an earlier protest by Australia, a panel of trade officials has ruled that America's sugar quotas violate the General Agreement. So America finds itself, in effect, convicted of an unfair practice at the very moment it plans to accuse others.

If not actually embarrassed, Washington should be sufficiently chastened to admit its own faults, not just find fault with everyone else.

[From the New York Times, Dec. 21, 1987]

UNCLE SUGAR'S SUGAR DEAL

America will import no more sugar in 1988 than it did in 1875. The way things are going, it may soon import none at all. That's splendid for a few thousand protected farmers—but a raw deal for everyone else. Hopes of relief have faded what with Congress adjourning, but the Administration and consumers need to keep up the pressure for a reduced support price.

U.S. sugar law, in force since 1982, sets the American price, currently 21.8 cents a pound, more than triple the world market price. At retail, sugar goes for about 36 cents a pound in Washington, D.C., is higher in Europe and still higher in Japan. In Latin America and other third world countries, it is substantially less.

To avoid Federal outlays for surplus sugar, Congress ordained that the price be enforced by curtailing imports. If American production rises, imports must fall and the consumers pays. The Administration, having no real choice but to obey the law, has just whacked the 1988 quota by 25 percent, to approximately 750,000 tons—down 75 percent since 1982. It could drop to zero by 1990.

The American quota means trouble for the economies of the Caribbean, Brazil, the Philippines and Australia, among others. It also distorts agriculture and food processing at home. The high sugar price has increased the popularity of corn sweeteners and has

driven some American food companies over the border to Canada, where they can make their cake mixes, cookies and candy with cheaper raw material.

Why should all of America pay three times the world sugar price for the sake of a few farmers? In large measure because the sugar lobby, rated as one of Washington's most effective, has a solid phalanx of support from the four big sugar-cane states—Texas, Florida, Louisiana and Hawaii—plus a dozen others that grow sugar beets, and lately the corn belt too.

The lobbyists point to a major factor driving down the world price: government subsidies that have generated oversupply in Europe. Washington hesitates to sacrifice American farmers to keep subsidized European farmers afloat.

To deflect some of the impact on countries Washington wants to help, and to help American refiners, Congress has voted to permit importation of an extra 800,000 tons next year from the Philippines and the Caribbean, provided that the refined product is re-exported. The sugar will come in at the American price and be re-exported at the lower world price, with the Government making up the difference by giving refiners other surplus commodities. American consumers get no benefit; countries that aren't in on the deal resent it.

While the Reagan Administration would prefer a free market, foreign subsidies prevent it. But the Administration believes, with reason, that a 12-cent support price would benefit consumers and America's trading partners without too much grief for American farmers. Congress continues to turn a deaf ear.

On a broader plane, the Administration is also pursuing the issue with the Europeans in the new round of global trade negotiations. Meanwhile, Uncle Sugar's unnecessarily high support price gouges consumers and hurts foreign friends.

[From the Jacksonville (NC) News, Oct. 14, 1988]

SWEETS FOR CONSUMERS

The Europeans have announced plans for an international inquiry on U.S. sugar-import quotas. Good. Since Congress has refused to eliminate this consumer-gouging program, perhaps it can be buried another way.

Thanks to Congress, U.S. sugar prices are generally two or three times the world price, raising the rate of every food product using sugar. At the same time, the program undermines the shaky economies of friendly sugar-producing nations such as the Philippines.

By one estimate, the Philippines has lost $150 million a year because of the restricted U.S. market.

The European Economic Community has announced that it plans to ask the General Agreement on Tariffs and Trade, the Geneva-based international trade body, to investigate the U.S. program. The move is interesting because the Europeans do not come to the table with clean hands; their sugar industry, too, is highly subsidized. The public airing of this issue should be fascinating.

In current talks to revise international trade law, the Reagan administration has called for a 10-year phase-out of wasteful farm subsidies. The continuing scandal of the U.S. sugar program provides yet another powerful argument in favor of that goal.

[From the Schenectady (NY) Gazette, Aug. 22, 1989]

DROP SUGAR QUOTAS

Americans pay at least two times more for sugar than they should, thanks to quotas that limit low-cost imports to 8 percent of the U.S. market. The quotas amount to a sweet deal for a handful of U.S. sugar producers, but a raw one for other industries, millions of consumers and foreign trade partners. It's time Congress let them die.

Unfortunately, the influential sugar and corn-sweetener lobby has different ideas. It's launched a slick advertising campaign in an effort to convince viewers that American sugar is relatively cheap. In fact, it is about 16 cents per pound higher than the world price. And over the course of a year, that amounts to roughly $2.25 billion in higher prices for U.S. consumers and industrial sugar users.

The sugar industry has argued all along that the quotas preserve domestic jobs. True enough; they save maybe 75,000. But according to the Commerce Department, that works out to roughly $76,000 per job, which hardly seems worth it. The sugar industry also doesn't like to brag about the fact that higher sugar prices have cost jobs in the American soft-drink and candy industries.

The council which governs the General Agreement on Tariffs and Trade recently declared that the quotas violate world trade rules, and recommended that Congress not renew them when they expire next year. President Bush reportedly agrees with this position, as do some lawmakers.

The big obstacle is the sugar industry lobby: over the past two elections, its political action committees have donated more than $2 million to preserve favorable treatment. And because the quotas system doesn't cost taxpayers directly—the way price supports do—Congress may be reluctant to scrap it.

The quotas are bad news, though, and not simply because they defy economic sense. They also weaken the United States' effort to dismantle world trade barriers.

[From the Kansas City Star, Jan. 15, 1988]

SWEET QUICKSAND

Once again, Congress has slipped into the legislative quicksand of sugar imports.

To protect U.S. growers, imports must fall as domestic production increases. But the government recently estimated that in 1988, imports will drop to their lowest levels in more than a century. This will increase the strain on our friends in the Philippines and the Caribbean, where the development of stable democracy depends largely on economic growth.

Instead of phasing out the quotas, Congress will sink deeper. A provision in the recent catch-all spending bill permits more imports from Caribbean and Philippine growers, but here's the catch: To keep our domestic industry happy, the sugar must be refined in the United States and may not be sold here.

The refiners will pay the high U.S. import price of 21 cents a pound but will sell the refined product overseas for the world price of 10 cents a pound. Who picks up the difference? The taxpayer.

Thus, under this measure, for the first time our government will be subsidizing foreign agricultural production.

In one sense, this "solution" is welcome. It is so scandalous that even Congress may soon come to the realization that the sugar program must be reformed.

[From the Atlanta Journal, Nov. 28, 1989]

UNCLE SUGAR IS SWEETER

Uncle Sam has never been very kind to the other sugar-producing countries of the world, although he has been Uncle Sugar to U.S. sugar producers. By limiting imports from other countries, we have deprived some needy ones of a fair share of our market in order to benefit a few politically powerful businessmen in the United States. And of course it has worked to the detriment of U.S. consumers who must pay artifically high prices in the marketplace.

We do this with other products, especially agricultural ones. But it has been particularly illogical in the case of sugar because the quotas hurt countries that we otherwise seek to help. For example, one of the main reasons President Reagan's Caribbean Basin Initiative has failed to do more to uplift countries that we wanted to inoculate against communism and Castroism is that sugar is the principal export of most of the countries in question. We won't let them sell much of it to us—even though CBI was supposed to rely on "trade," rather than direct aid, as its principal tool in assisting their economic development.

Now Agriculture Secretary Clayton Yeutter has announced a 13.5 percent increase in the amount of raw sugar that can be imported from 39 countries in 1990. Opponents of liberalization of our sugar import policy have long claimed that if we increase our dependence on foreign sugar, we might someday be at the mercy of a foreign cartel. The fact that 39 countries have sugar quotas and are involved in exporting to the United States in itself shows how unlikely it is that such a cartel could be formed. Even if they tried, we could certainly break it up by making particularly favorable deals with those CBI countries.

Besides, Secretary Yeutter claims that the U.S. crop is going to be down anyway next year, and no domestic producers are really going to be hurt if imports are increased. At least that gives him the political opening for something we should have done much earlier.

As for the amount, a 13.5 increase isn't much. Being happy over it is a bit like being pleased when a man agrees to cut down his wife-beating from five times a week to only four. But it is a beginning, and some progress is better than none.

[From the Washington Post, Aug. 9, 1988]

THE GREAT SUGAR BOWL

An ironic side effect of the drought is that is has briefly civilized U.S. sugar policy. Sugar beet production in the Red River valley of North Dakota and Minnesota has been sharply curtailed. The government has responded by raising import quotas on sugar from abroad; those quotas had previously been the lowest since 1875. That will help such weak producing countries as the Philippines and the Caribbean islands. These are countries toward which U.S. policy is normally contradictory. The goal of foreign policy is to help them; the effect of sugar policy is the reverse.

Sugar in the United States, as in much of the rest of the world, is a protected industry. The U.S. price of about 23 cents a pound—the price at which the government promises to buy any sugar that domestic producers cannot sell—is roughly double the world price. To enforce it without incurring costs, the government imposes import quotas. First, U.S. beet and cane producers sell all they can grow; only then can foreign

producers sell, and only enough to meet the rest of demand.

The effect of this system and competition from corn sweeteners has been to drive the foreign quotas down in recent years; soon they could disappear entirely. Until the drought, only about 758,000 tons of foreign sugar were going to be allowed in the country this year. That has now been raised about 40 percent to just over 1,050,000 tons, up a little over last year but still low by historical standards—down 40 percent from 1986, for example.

The sugar people justify the quota system on the grounds that other countries protect their markets, too. Without such protection, they say, the United States would be ceding its lucrative market not merely to the lower-priced Third World producers who are the acknowledged pawns in all this but to the heavily subsidized Europeans. The Europeans are portrayed by U.S. producers as the true villains in the plot, in that their governments pay them to grow surplus sugar that is then dumped in the world market, depressing prices there for everyone.

The U.S. producers' case would be a lot stronger if they did not so palpably enjoy the comforts of the present system. They and their fellow travelers, the corn-sweetener people, are given a kind of national monopoly at the expense not merely of foreign producers but of U.S. consumers. This is a program whose cost doesn't show up in the budget, but at the grocery store—and on all those occasions when the United States preaches free trade abroad. From inside the great sugar bowl, such preaching always sounds a little hollow.

There is no joy in seeing U.S. producers wiped out by drought. There is no joy in seeing them propped up by the government either. The next administration and Congress should show some leadership and begin to phase the sugar program out.

[From the Washington Post, Mar. 12, 1988]

THE SUGAR DISASTER

American sugar import quotas have turned into a disaster for the small agricultural countries of the Caribbean. As the quotas shrink, they are cutting off one of these countries' principal sources of earnings. Congress, justly afflicted by a bad conscience, enacted in December legislation that would at least temporarily mitigate the effects of the quota reductions. The Reagan administration says that the legislation is fatally flawed technically, and refuses to carry it out.

Beyond the legal quibble, the administration—here the reformer—detests the sugar quotas, wants to get rid of them and resists anything that will make them seem less damaging. The American sugar program is thoroughly rotten, and there's a certain attraction to just saying no. But the cost of that stern and virtuous denial would fall exclusively on the Caribbean sugar-producing countries and the Philippines.

Congress, in a conspicuously squalid act of pure protectionism, has fixed the price of sugar in this country at roughly 22 cents a pound. The world price is currently about 8 cents. Since the supporters of this commitment recognize that it is economically indefensible, they have decreed that it must be maintained without cost to the government. They accomplish that by the quota system, which cuts imports to whatever level necessary to maintain the mandated price. The consumer pays the bill. Because American production of sugar and other sweeteners has been rising, the quotas have been cut drastically. They fell from a peak of 6 million tons in 1977 to 1 million last year and, after another big U.S. crop, to 750,000 tons this year.

Congress is, to its credit, uneasy about this ferocious squeeze on Caribbean sugar earnings and last year came up with a rather tricky one-year remedy. An additional 400,000 tons would be allowed into the country at U.S. prices, to be refined and re-exported at the lower world price—with the deal subsidized with surplus stocks of other commodities that the government holds. It would bring $100 million to the sugar farmers and exporters of the Caribbean countries and the Philippines.

Ideally, the solution is to abolish U.S. sugar quotas and, at the same time, get the Caribbean countries out of sugar production. Sugar is in vast oversupply worldwide, and producing it is a formula for perpetual poverty. The Reaganite reformers are right in principle. But, unfortunately, the sugar economy can't be transformed overnight. For the present year they would be wiser, as well as more generous, to reread the law and see whether there isn't a way to get that $100 million to the Caribbean and the Philippines.

[From Business Week, May 8, 1989]

U.S. CONSUMERS, AND THE CARIBBEAN ARE GETTING A SOUR DEAL ON SUGAR

(By Paul Magnusson)

Customs officials were puzzled. The sugar they were testing for purity was clearly marked as Canadian, and it entered the U.S. under Canada's quota. Yet tests showed that it was cane sugar from a balmier clime—as in Australia, mate.

The Byzantine rules governing the sugar trade inspire such shenanigans. Several of the 38 nations that export sugar can profit handsomely by resorting to a bit of legal arbitrage: They can sell their sugar to the U.S. at inflated prices, then buy cheaper sugar on the world market for their own use (chart).

American consumers and manufacturers pay an estimated $930 million a year to preserve the antiquated quota system. Although there are only 12,000 sugar cane and sugar beet growers in the nation, they are a powerful bunch when teamed up with corn growers, who know that high sugar prices boost sales of corn sweeteners.

The Bush Administration could help end the sugar madness. But a timid White House has been scared off supporting a bill called the Caribbean Basin Initiative II, which is now being drafted by a House Ways & Means subcommittee. The original CBI was conceived in 1983 as a regional free-trade zone that would provide an economic tonic for impoverished Caribbean nations and their shaky governments. But powerful U.S. lobbies eviscerated it by exempting textiles, shoes, petroleum, leather goods, canned tuna, sugar, and watches from its liberal provisions. Since 1983, U.S. imports from the Caribbean have actually fallen by a third, to $6.8 billion last year.

Sugar exporters ultimately got the worst deal of all. A bizarre provision of the 1985 farm bill required that the federal government guarantee U.S. producers at least 18¢ a pound for sugar—without any net cost to the Treasury. The CBI eliminated tariffs on Caribbean Basin sugar, but quotas were ratcheted down to keep the U.S. raw sugar price at an artifically high 22¢ per pound. As a result, the government didn't have to pay off the farmers.

But rising competition from artificial sweeteners and corn syrups required ever lower quotas to keep the U.S. price stable. Foreign producers have seen their U.S. sugar quotas shrink by 63% since 1982. That means 400,000 jobs lost in the 22 Caribbean Basin countries since 1983, claims Jose Orive, who chairs the CBI Embassy Group, a coalition of Caribbean nations. "We are busting our tails to try to diversify and find alternatives to sugar, but how are you going to do that on the little islands like St. Kitts and Nevis?" he asks. Exports of manufactured goods are up, but they are dwarfed by the loss of earnings on sugar, the region's second-most-important commodity export after coffee.

The outlook was brighter for the Caribbean last year. The Reagan Administration and a few in Congress wanted to eliminate sugar quotas entirely. Sam Gibbons (D-Fla.), chairman of the House Ways & Means trade subcommittee, sought at least to restore the CBI's sugar quota to the 1983 level. But he was stymied by the U.S. sugar lobby, which wants stable pricing above all else.

Now, Gibbons is trying to freeze the overall CBI sugar quota at its current level while redistributing to CBI countries any unused quota allotments from other nations. "The current program just makes no sense," says Gibbons. "Someone has to start straightening it out." But the Bush Administration demurs, contending that Gibbons' modest sugar proposal would violate international trade rules that prohibit such juggling of quotas among nations.

The ultimate solution may lie elsewhere—in next year's farm bill or in the current round of trade talks in Geneva. The U.S. is seeking an agreement to phase out European farm subsidies, including those for sugar. But it's long overdue for Congress to admit that writing trade policy for the convenience of 12,000 U.S. sugar farmers is a bad idea. It's not often that the government has a chance to help struggling island countries—and save consumers $1 billion in the bargain.

[From the Greenwood (MS) Commonwealth, Sept. 18, 1989]

COSTLY SUGAR QUOTAS ABOUT TO EXPIRE

In discussing sugar quotas now imposed in the U.S. market, a recent editorial in The Wall Street Journal alleges that the quotas "fleece the average American family of four to the tune of $100 a year."

The editorial comments apparently were prompted by the approaching expiration—early next year—of the sugar restrictions. Renewal seems unlikely since the General Agreement on Tariffs and Trade (GATT) has ruled the quotas violate world trade rules.

The Wall Street Journal observes that "the quotas restrict low-cost imports to only 8 percent of the sugar consumed by Americans. The 1,400 U.S. sugar beet and sugar cane growers also get a support price of 24 cents a pound, twice the world price."

It is believed that President Bush will go along with the GATT because to do otherwise would lay the United States open to charges of hypocrisy in its criticism of foreign trade barriers.

It will be interesting to see whether Washington bigwigs are more influenced by the affected industry or by millions of consumers.

[From the Los Angeles Times, Sept. 25, 1989]

STOP THE SUGAR QUOTAS

The extension and enlargement of the sugar import quota will at least cool the inflation in the price of sweeteners in the United States, but it is only window dressing. The real need continues to be restoration of a free market and abolition of the sugar program. Congress will have an opportunity to do just that when the new five-year farm bill is written next year.

The action on the U.S. quotas means some immediate help for several nations whose economic well-being is of particular importance to the United States. The four largest quotas go to the Dominican Republic, Philippines, Brazil and Australia. Four Central American nations with major dependence on sugar exports also are quota recipients. They are Guatemala, El Salvador, Costa Rica and Honduras. Nicaragua should also be restored to that list.

The consumption of sweeteners is continuing to increase in the United States, but slowly. Deliveries of sugar this year will be up 1%, high fructose corn syrup up 3%. U.S. beet and cane production in the current crop year is estimated at 7.13 million tons. The sugar import quota has been increased from 1.1 million tons to 2 million tons, still far behind the 1977 import peak of 6.1 million tons.

The squeeze on imports in recent years has provided protection to American sugar growers at an enormous cost. The cost has been borne by foreign producers, most of them impoverished nations dependent on their commodity exports, in terms of lost markets.

And it has been borne by American consumers, who have been forced to pay what amounts to $3 billion a year in inflated prices, according to one consumer advocacy group, the Public Voice for Food and Health Policy. The protectionism has also distorted the sweetener market, encouraging a dramatic shift from sugar to the now-dominant corn-based sweeteners.

At a time when the United States is encouraging all nations to abandon farm subsidies and other programs that distort world trade in food commodities, the U.S. sugar program is a conspicuous embarrassment. New price increases, the highest in a decade, that led to the quota increases have compounded the burden on American consumers. Termination of the sugar program is the only appropriate way to protect consumers while assuring fairness to nations dependent on their sugar exports. The challenge to American sugar growers is to compete, not hide behind quotas.

[From the Kingsport (TN) Times-News, Nov. 13, 1989]

U.S. SUGAR QUOTAS MAKE SWEET TOOTH NOT SO SWEET

Anyone who thinks import quotas are good for America because they protect American jobs should take a look at the bittersweet truth of sugar quotas.

American consumers are paying more for sugar than any other western nation—three times what they should be paying—to "protect" the U.S. sugar industry.

The "industry" consists of 12,000 sugar growers, less than 2 percent of American farmers.

No one would wish those 12,000 growers out of business. But consumers don't realize what it's costing to keep the growers happy and turning a profit.

The elevated price of sugar forces consumers to pay more for anything that contains it—10 cents added to the cost of a gallon of ice cream, for instance.

The U.S. sugar program has added $7.5 billion to the price of other products, everything from peanut butter to microwave dinners.

The impact of those higher prices has cost the American economy 12,000 jobs, just about the number of jobs it seeks to protect at the expense of all consumers.

Those jobs were lost to foreign producers not handicapped by higher American sugar prices.

At the sacrifice of American jobs and high food prices, sugar growers are filling their pockets.

The current sugar program is so wasteful that if the government discontinued it, it could give each sugar grower in America $250,000 a year in cash, and still save money.

Sugar growers know they're on the gravy train and they want to keep it that way.

And so they paid out more than $2 million in political action committee donations in the past two national election campaigns.

Meanwhile, the growers get richer. One owner of seven sugar companies has financed three resort hotel takeovers and four mansions in Palm Beach, according to the Miami Herald. That's not exactly your typical struggling farm family.

Ironicaly, the sugar quota protection has even hurt the sugar industry itself.

U.S. sugar now is too expensive to export and the high cost has hurt refineries, forcing 10 to close and 6 companies to leave the industry since the reinstatement of quotas in 1981. Sugar use has fallen 17 percent in the United States.

Nor are our trading partners pleased that the sugar quotas violate the General Agreement on Tariffs and Trade, a comprehensive trading pact between the United States and other nations.

U.S. quotas have also severely cut export revenues for several debtor countries who export sugar. Since these debtor countries also receive U.S. economic aid, this is a double waste of taxpayers' money: One hand of the government is giving money in aid while the other hand is taking away their sugar revenues.

It's time to put an end to this protection that helps so few, and hurts so many.

[From the Chicago Tribune, Dec. 24, 1987]

SUGAR QUOTAS LEAVE SOUR TASTE

In a single move earlier this month, the Reagan adminstration added to the uncertainty of Cory Aquino's future in the Philippines, encouraged illegal drug traffic in Central America and the Caribbean and raised the price of the average American family's grocery bill.

How, you might ask, could the White House manage to inflict so much political and foreign policy damage with one shot? The answser lies in the United States' sugar program, perhaps the epitome of everything that is wrong with special-interest politics in this country and a prime example of the enormous costs of protectionism.

What the administration did—and it took the step reluctantly—was slash sugar imports for next year by 25 percent to their lowest level in more than a century. The Philippines, Dominican Republic, Brazil and other sugar-exporting countries will be allowed to sell slightly more than 750,000 tons to the U.S., the smallest amount since 1875.

Just as Japan shields its venerated rice farmers, the U.S. government has been protecting American sugar beet farmers and sugar cane growers form foreign competition for decades. The latest legislation, passed in 1985 over the strenuous objections of the White House, forbids sugar surpluses and requires imports to be restricted in order to keep domestic prices from falling below a support level of 18 cents a pound. The result is that sugar sells here for 22 cents a pound nearly triple the world price.

The winners of this economic folly are about 12,000 well-to-do American farmers, or 2 percent of the total. The losers are many. Foremost, American consumers have to pay higher prices for their sweets—essentially an excise tax estimated at about $3 billion a year.

Then there's the damage done to some of America's trading partners. In the last four years, the sugar program has cost the Philippines about $150 million a year in foreign exchange, and that country's sugar regions are where the Communists are most active in opposing President Aquino. State Department officials say sugar cane farmers in tropical areas often turn to growing marijuana or the coca plant, the base for cocaine, when faced with a shrinking market.

The Reagan administration has tried unsuccessfully to make the sugar program more market-oriented and rational. It favors cutting price supports by a third and paying sugar producers about $1 billion over five years to cushion the blow. In 1985, a similar plan to reduce the sugar program was defeated by a coalition of sugar growers and the Midwestern corn refiners, who make sweeteners used as lower-cost alternatives to sugar.

The sugar program centers on an extravagant quota that squeezes out foreign goods, drives up the majority and forces the State Department to dole out foreign aid to make up for wrongheaded U.S. policy. The program should be completely overhauled or, better yet, scrapped. It's hypocritical to bash the Japanese for their failure to open their markets when Washington closes America's to foreign sugar producers to keep a few beet farmers happy.

[From the Indianapolis News, Dec. 29, 1989]

THE SUGAR-COATED TRUTH

A couple of weeks ago in this space we noted how the sugar lobby has presented some sugar-coated advertising on what American consumers really pay to purchase sugar.

What the slick television advertisements, which boast that American consumers pay a smaller portion of their incomes on sugar than people in most other nations, fail to mention is that consumers are paying about $3 billion a year more in direct and indirect costs than they need to because of government sugar-import quotas.

Those restrictions, which severely limit foreign sugar imports, are tantamount to a government subsidy for sugar.

This not only translates directly into higher prices for sugar at the supermarket, but into higher prices for all products that use any kind of sweetner at all—natural or artificial.

Since firms that use sugar or corn sweetener in their candy and beverage products have to pay about twice as much for the raw product as foreign competitors, they are at a disadvantage in the international marketplace. Any protection of jobs in the domestic sugar-growing industry has more than

been offset by job losses in the domestic candymaking industry.

What's more, the import restrictions have been a financial blow to friendly countries in the Caribbean and South America whose economies have been tied to sugar cane farming. If sugar isn't profitable, why not switch to drugs, which are?

But that's only part of the sugar story.

In a series of articles on the death of the Florida Everglades, Knight-Ridder reporter Dave Von Drehle writes that "King Sugar" is the largest single polluter of the dwindling Everglades.

Water diversion to the sugar plantations and agricultural runoff of tons of phosphorus and nitrogen are destroying the last vestiges of this "river of grass" running through central and southern Florida. The Everglades, which may be a key to Florida's natural water supply—not to mention being the home of numerous plant and animal species on the verge of extinction—is on the brink of destruction. Some naturalists say the Everglades area is already biologically dead.

"Florida's sugar cane industry, the nation's biggest, is a bruiser at every level—county, state and federal," Von Drehle writes. "The Florida sugar cane league is one of the state's most powerful forces. In Washington, sugar lobbyists are widely agreed to be among the most effective in the United States, alongside the folks from the National Rifle Association."

In addition to import restriction subsidies that benefit sugar growers, the state of Florida leases land to them at nominal prices. Although the cane growers benefit enormously from south Florida's expensive water control system, they pay only $300,000 in taxes toward the system's $168 million annual budget. Their water is free of charge.

Von Drehle notes that all of this economic benefit and subsidy in Florida are going to only a handful of people who control four huge sugar companies. Two of those four companies—U.S. Sugar Co. and a company owned by the Fanjul family—collect nearly a quarter of all the sugar cane revenues in the United States.

This bonanza is enough to make a dairy farmer blush.

[From the Wall Street Journal, Aug. 15, 1989]

UNCLE'S SUGAR

If you watch any of the Sunday public affairs shows such as "Meet the Press," you've no doubt seen a commercial in which a soothing announcer says, "When Americans reach for sugar, they get a pretty good deal." The spiel goes on to compare what U.S. consumers pay for sugar with what is charged in consumer-hostile Japan. What it doesn't say is that the ad's sponsor is a major booster of sugar-import quotas that fleece the average American family of four to the tune of $100 a year.

The sponsor is Archer-Daniels-Midland, a leading producer of high-fructose corn sweeteners that are used in products such as soft drinks. Corn sweeteners are competitive only at the quota-inflated price of sugar, and that explains why ADM has been pumping ad dollars into those Sunday morning shows that are watched by Beltway elites. Sugar quotas expire next year, and this June the council governing the General Agreement on Tariffs and Trade ruled that the quotas violate world trade rules. The quotas restrict low-cost imports to only 8% of the sugar consumed by Americans. The 11,400 U.S. sugar-beet and sugar-cane growers also get a sugar support price of 24 cents a pound—twice the world price.

President Bush is likely to go along with the GATT ruling and seek an end to the quotas. To do otherwise would lay the U.S. open to charges of hypocrisy in its criticism of foreign trade barriers.

But the sugar growers and their corporate allies such as ADM aren't giving up easily. Sugar-grower PACs doled out well over $2 million to Congress in the last two elections, and Members know the PACs will raise Cain if they even touch the quotas.

Sugar growers are also stockpiling new statistics that purport to show that the sugar and corn-sweetener industries directly create at least 75,411 full-time jobs nationwide. It's true that an end to quotas would mean some dislocation of workers, but not nearly as much as the quotas themselves create.

The Commerce Department recently estimated that it costs $76,000 to save just one job in the sugar industry, and even that won't preserve it forever. The inflated price of U.S. sugar has allowed producers to mechanize their operations and sharply reduce their labor needs. Louisiana has cut its sugar workforce from 15,000 to 4,000 in just 10 years.

High-priced sugar also destroys jobs in the soft drink and candy manufacturing industries. Democratic Representative Jim Moody says sugar quotas are "devastating" candy makers in his Wisconsin district because foreign manufacturers can buy sugar for much less than America's inflated price. The chocolate and confectionary industries alone employ more than 60,000 people nationwide.

Democratic Senator Bill Bradley plans to lead the fight to strip sugar quotas out of the 1990 farm bill. President Bush should lend his wholehearted support, especially since the sugar growers will no doubt be sweetening the pot of campaign cash they give to Members of Congress.

ADM is already doing its bit to keep the quotas alive. It has unveiled a new commercial in its normal Sunday morning time slot. This one shows a man climbing a staircase representing the amount of time consumers in other countries must work to buy a pound of sugar. The last few steps represent economic basketcases such as Argentina and Poland. Funny, we thought one of the reasons those countries were in so much trouble was their indiscriminate use of subsidies.

Mr. BRADLEY. Mr. President, the simple fact of the matter is that sugar that is not allowed to enter the country because of quotas is entering anyway in the form of processed foods. The imports of processed foods harm our trade deficit far more than would imports of sugar by the margin of the value added to the product. You can import sugar at 15 cents, or you import a candy bar at 95 cents.

Mr. President, I would argue as well that we have to simply face up to the fact that the dumped price, so-called dumped price, is an interesting argument, but it is not exactly right.

If you take Jack Roney, of the Hawaiian Sugar Planters Association, when he was at USDA he argued that a 28-percent share of world sugar production traded at international markets. As the Senator from Minnesota said, if you remove from that about 16.3 percent traded in preferential rates, including United States quota impacts, EC purchases and procurements from Cuba, that leaves about 21 percent traded in the international market.

That stacks up very well against other commodities. Twenty-eight percent of world wheat production is traded at world prices, 28 percent of soybeans, 15 percent for corn. Yet I have not heard anyone argue that these are dumped prices, even though Government provides substantial subsidies to farmers.

Finally, Mr. President, I would argue this amendment is the best incentive and best pressure we can bring on the European Community to reduce their support.

● Mr. MOYNIHAN. Mr. President, I am most enthusiastic to join my distinguished colleagues, Senators BRADLEY and ROTH, as a cosponsor of this amendment to reduce the sugar support price. This has been and remains one of the most misguided and elementarily dumb programs ever enacted.

Since this program began in 1985, we have impoverished Caribbean producers, bankrupted American sugar refiners, made millionaires out of several thousand U.S. growers of sugarcane, and established a new class of wealthy sugar beet growers.

Indeed, we watched sugar imports from our Caribbean neighbors collapse, from 5 million tons to under 1 million tons. U.S. sugar refiners collapsed apace. Food processors of all types were impacted.

At the same time, U.S. users of sugar could no longer afford it. One is now hard-pressed to find sugar in Coca-Cola. Be it classic, regular, or nouvelle. All one finds now is corn sweetener or high fructose syrup or such.

It is long past time that the U.S. sugar program was terminated. It has cost the United States billions of dollars, enriched a few, and broke faith with our Caribbean friends.

Although I would urge we do more to return U.S. sugar prices to world market levels, I believe the 2-cent reduction in the price support level is an appropriate first step. I urge my colleagues to support it.

I yield the floor.●

The PRESIDENT pro tempore. All time is expired.

Under the previous order, the Bradley amendment No. 2314 will be laid aside until 9 a.m. on Tuesday next, July 24.

The Senator from Minnesota [Mr. BOSCHWITZ] is recognized to offer an amendment in which there will be 80 minutes of debate equally divided in the usual form, which means the offeror of the amendment will have 40 minutes, the manager of the bill, if he

opposes the amendment, will have 40 minutes under his control.

If the manager of the bill supports the amendment, then the time in opposition to the amendment will be controlled by the minority leader or his designee.

The Senator from Minnesota [Mr. BOSCHWITZ] is recognized.

AMENDMENT NO. 2315

(Purpose: To modify the acreage reduction requirements for wheat and feed grains that are triggered by carryover stocks)

Mr. BOSCHWITZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDENT pro tempore. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Minnesota [Mr. BOSCHWITZ] proposes an amendment numbered 2315.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 87, line 15, strike "40 percent" and insert "50 percent".

On page 87, line 23, strike "40 percent" and insert "50 percent".

On page 136, line 17, strike "25 percent" and insert "30 percent".

On page 136, line 23, strike "12.5 percent" and insert "10 percent".

On page 137, line 1, strike "25 percent" and insert "30 percent".

On page 137, line 6, strike "12.5 percent" and insert "10 percent".

Mr. BOSCHWITZ. Let me describe the amendment. The reading of the amendment would be almost impossible to understand because of the technical nature of it. But it has to do with the set-aside program.

Under the bill we are considering, S. 2830, the set-aside program or the acreage reduction programs, or ARP's, as they are sometimes called, are that in the event that carryover stocks in wheat are less than 40 percent, then the Secretary of Agriculture would have the authority, the discretion, to have a set-aside of 0 to 12.5 percent of the wheat base. In the event that stocks-to use, or carryover stocks, as I call them, are greater than 40 percent, then the Secretary of Agriculture must have a 12.5 percent ARP, or set-aside and can have a set-aside as high as 20 percent. So this amendment deals with the set-asides. My amendment would reduce the set-asides.

In the case of corn, the Secretary of Agriculture would have the authority to have a set-aside of 0 to 12.5 percent if the carryover is less than 25 percent and, in case the carryover exceeds 25 percent, then he must invoke 12.5 percent set-aside and may invoke a set-aside as high as 20 percent.

There is some logic to that approach, in the sense that in the event stocks are high, farmers would be allowed to plant less land.

What my amendment does is set the set-aside levels somewhat lower and would set the carryover levels that trigger set-asides higher.

In the case of wheat, the carryovers would have to be 50 percent before the Secretary would have the authority to have a set-aside in excess of 12.5 percent and that in the event the carryovers exceeded 50 percent, only then could he have a set-aside as large as 12.5 percent.

In the case of corn, instead of having a 25-percent carryover, we have a 30-percent carryover. It is hard to explain all of that, Mr. President. So let me explain it in more general terms.

We have two basic theories among those of us who are on the Agriculture Committee. Some would seek to raise prices by setting aside lands, while others of us would say that productive land should be farmed, that an important element of agriculture is the infrastructure of agriculture. The people who move the product, who sell the chemicals for the product, who operate the grain elevators, all the folks of rural America that are involved in agriculture off the farm outnumber those involved in agriculture on the farm. Those who are involved in agriculture off the farm, who work at the elevators, who run the trucks, who run the barges, who are the representatives—be they the lawyers or the insurance agents, who sell the chemicals, have as large a share of the gross national product as do the farmers in their production. Those people, also, need to be served. They are served poorly by set-asides.

If we take land out of production and do not allow planting of that land, then we are going to produce less. If we produce less, rural America suffers. If we produce more, in some way the farmers suffer because of lower prices. But, Mr. President, we are the only country that sets aside. We are the only country that has acreage reduction programs. As we reduce acres, others increase acres and take the market that we should have.

It is my contention that if we produce, we will sell that product and we will prevent other nations from expanding their production. One of the most compelling examples of that is in the area of soybeans. Because of the 1985 farm bill, the farm program requires you to plant the program crop on the base. For instance, the corn base must have corn planted on it. If you do not use your base you lose your base. The base is closely related to the value of the land. If you go to sell an acre of land, Mr. President, and you have a corn base on that land, then that acre of land is worth more. So you must plant corn on the base in order to retain the corn base. That results in considerable inflexibility.

If the world market is calling, not for corn but rather for soybeans, as it has in recent years, you simply do not have the option. Even though that land might be interchangeable with respect to planting, you simply do not have the option to plant the crop other than the base crop.

Another amendment I will be offering will allow flexibility so that farmers will be able to interchange crops among bases. But what this amendment does is limit to some degree the set-aside. This amendment says that carryover stocks have to be higher than they are in this bill before the set-asides can be raised.

I want to use as an example, Mr. President, the European experience. This chart shows the experience of the European Community from 1977 to 1988. It shows in 1977 the European Community was the largest net importer of grains in the world. Because of their internal pricing policies, that all changed and now they have become a very large exporter of wheat and feedgrains—mostly wheat. Their exports, as a matter of fact, put them in second place in the world with respect to grains even though they have a very small piece of real estate where the European Community operates—much, much smaller than the United States. By holding prices very high for domestic production and then by subsidizing the exports, they have become very, very large exporters.

Let me show on another chart what has happened cumulatively. This chart shows the cumulative exports of the European Community, and this is the cumulative displacement of other countries' grain exports—read into that American grain exports—the cumulative displacement by the change in the EC, the European Community, net trade position.

In other words, over these 11 years, they have displaced 300 million metric tons of shipments, most of which probably have come from the United States.

This chart shows the cumulative amount of U.S. grain production that has been foregone by acreage reduction programs, by ARP's, the subject of this amendment.

You can see that we have foregone a great deal of production in this country, almost 250 million tons, over this same period of time and the Europeans simply have picked it up and now they do that business. Two hundred fifty or 300 million tons, Mr. President, over a period of 10 or 12 years, approximately 25 million tons a year. That is an enormous amount of business. Think of the number of trucks, think of the number of barges and elevators included in handling, think of the activity in rural America that has been foregone because of acreage reduction programs.

I submit, Mr. President, that if other countries of the world had acreage reduction programs, then it would be one thing. Then we could say that we are all participating in an effort to control supply and have an impact on prices and that, not only ourselves, but the Europeans, the Australians, the Canadians, the Brazilians, the Argentines, that all these countries as principal producers of the world are making an effort to control production of supply and demand and bring it into balance. That would be one thing. I do not think it will work. These kind of cartel arrangements have never worked, be they in oil or any other commodity. We are trying to go solo, we are acting alone, and we are doing so at a penalty to ourselves. We are giving away the market to others.

I also have a chart about soybeans. In soybeans, the same thing has happened. Because of the inflexibility of our farm programs, we have reduced soybean production in this country by 13 million acres. Around the world in Argentina, Brazil, and Paraguay there have been increases in planting by what amount? By 13 million acres. So that as we penalize our own producers, as we set-aside acres in this country, as we reduce production by one means or another, production simply goes elsewhere and our economy is penalized.

So this amendment, while doing away entirely with acreage reduction programs, nevertheless is a move in that direction. It gives the Secretary of Agriculture greater leverage than does this bill.

There are some who would say that these acreage reduction programs raise prices. I am not among them. Some would say that, indeed, we should have very large acreage reductions in the United States. There was a bill introduced by my colleague from Iowa and by Congressman GEPHARDT in 1985 that would have resulted in 40 or 50 percent of the farmland of the United States set-aside. It would have been terribly destructive to rural America; it would have reduced economic activity in rural America very substantially.

This amendment would give the Secretary greater discretion so that he would not have to impose such large set-asides when the carryover stocks are at relatively modest levels. For instance, when I say that I raise the carryover stocks in wheat from 40 to 50 percent of annual use, in the last 30 years only seven times have stocks been less than 40 percent.

We keep a large wheat reserve; indeed, we keep most of the world's wheat reserve so that when there is starvation and when there is loss of life around the world, we are normally called upon first to help because we, indeed, not only have the facilities to hold the reserves, but we, as a moral matter, feel that we should keep a reserve.

But only seven times in the last 30 years has the carryover stock been as low as 40 percent, which means that in 23 of the last 30 years, the Secretary of Agriculture would have been compelled under this legislation to have a set-aside of at least 12.5 percent. This amendment would raise, in the case of wheat, the carryover stock to 50 percent before he would be compelled to have a set-aside of 12.5 percent.

In the last 30 years, in 14 of them, the carryover stock has been less than 50 percent. So even under my amendment, at least half the time, from past experience, the Secretary of Agriculture would have to have this level of set-aside. We are doing the same thing in corn, raising the carryover stock from 25 to 30 percent.

That is the purpose of this amendment, and that is the nature of this amendment.

This chart, Mr. President, in conclusion, shows soybeans. Back in 1970, the tonnage of soybeans traded in international trade was 20 million tons. Over the years, it has gone up so now it is above 60 million tons. This was our percentage share of that trade. Our percentage trade back in the early seventies was 80 percent of the world trade. It has now gone down to 35 or 36 percent of world trade.

Where has the world trade gone? It has simply gone to other countries who have planted an equivalent number of acres that have been lost in the United States.

Why are soybeans so important, Mr. President? Soybeans have been called the miracle crop of agriculture. It has been the major crop that has grown the fastest, that has grown the fastest in overall trade, and it is so important that we regain our market share because it will mean more activity in rural America, it will mean greater wealth in all of America because at the base of our economy is agriculture. That is the purpose and sense of this amendment.

I yield the floor and reserve the remainder of my time.

The PRESIDENT pro tempore. Who yields time? Time is running against both sides, if there is no Senator yielding time. Does the Senator from Vermont oppose the amendment?

Mr. LEAHY. The Senator from Vermont does. I ask first, Mr. President, if the Chair can advise me how much time is available to the Senator from Vermont.

The PRESIDENT pro tempore. The Senator from Vermont, who controls time in opposition to the amendment, controls 39 minutes and 40 seconds.

Mr. LEAHY. I thank the Chair. For the interest of our colleagues, I advise the Senate that unless there are others who come here to speak, I do not intend to use the full nearly 40 minutes and will probably, assuming that the Senator from Minnesota at some point is willing to yield back any remaining time, I will perhaps do the same.

So if somebody is running a stopwatch on when the rollcall might occur, it might occur 20 to 30 minutes earlier than some have thought.

Mr. President, just for the interest of my colleagues, I should note that in the Agriculture Committee we actually put together a working group to lay out the way these programs are to operate. We had numerous meetings of nearly a couple of weeks, evenings——

The PRESIDENT pro tempore. The galleries will be in order. The Chair apologizes to the Senator from Vermont for the interruption. The Senator from Vermont.

Mr. LEAHY. I thank the Chair.

As the Chair knows better than any Member in this body, it is, of course, the duty of the Chair to maintain order, and it is not interference with any Senator who might be speaking when the Chair exercises that duty.

We met, this particular group, for a couple weeks. We worked evenings and weekends on how to put together a green stocks policy. It is not an easy thing to do because you have different parts of the country with differing views, and you have Senators, some of the most knowledgeable Members of this body, who themselves disagree as to how this should be done. We want to talk about how the Department of Agriculture would sell Government-owned grains, the levels of acreage control we are going to appropriate over the next 5 years.

Again I should emphasize, Mr. President, that we have Senators, among the most knowledgeable Members of this body in this field, both Republicans and Democrats, who agree in some areas and disagree in others. The Senate bill reflects a compromise. We could not get something where everybody agreed on every single point. It just does not work that way. Some wanted to go further and some did not want to go as far as we did.

My good friend from Minnesota is aware and knows of those debates and arguments, and I think that he knows which Members would go further and which Members would not go as far. But at some point you have to hit one position. We cannot have 20 different positions.

The Senate expects us to come forward from the committee and at least give a recommendation as a committee on what the policy should be. Then, of course, the Senate, all 100 Members, are free to work their will. They can vote it up. They can vote it down. They can vote for or against amendments, but at least the committee gives them a recommendation.

In this case we gave them the middle ground. Incidentally, it turned out that the middle ground was exactly what the administration proposed. This is one of those areas where I agree with the administration and because of that I would oppose the amendment of Senator BOSCHWITZ.

I might say that I found myself in agreement with the Senator from Minnesota on a great number of matters in the bill. I disagree on this one.

Now, there are some other reasons to oppose the amendment. Let me speak of some of the things that came up among the Senators who talked about this policy.

I will try to summarize as well as I can the arguments of various Senators against this amendment. They would tell us that in the early and mid-eighties American agriculture was forced to go through a roller coaster approach to the control of their stocks. Up down, up down. We had little or no acreage control one year, followed by a requirement to idle 1 acre and 4 the next. It was kind of a start-and-stop policy without much consistency for farmers. That happened not once but twice between 1980 and 1987. That is why we included the stock triggers that are in this bill. To get off that roller coaster.

I support the bill, and I support the compromise that we came out with in the bill. Because of that, I would oppose the amendment.

I understand the argument of the Senator from Minnesota on competitiveness and other areas, but I think it is necessary, if we are going to keep our stocks under control today, that we do this. Otherwise, I think we could find ourselves getting back on that roller coaster. One aspect of it is the sudden, and in many people's minds, arbitrary idling of significant acreage.

Mr. President, I reserve the remainder of my time.

Mr. BOSCHWITZ addressed the Chair.

The PRESIDENT pro tempore. The Senator from Minnesota [Mr. BOSCHWITZ].

Mr. BOSCHWITZ. I thank the distinguished chairman for his remarks.

I agree that the bill was a compromise and as I noted in my remarks, that some on our committee would have preferred very large set-asides, ARP's as they are called. I would not.

This is a market-oriented amendment. This is an amendment which will drive this farm bill to greater market orientation than the compromise we worked out in committee. While the compromise we worked out has many very fine features, of course, we come to the floor of the Senate to debate that compromise and to try improve it.

If I may, Mr. President, I would like to speak just for a moment about the whole business of set-asides. When a farmer has 100 acres and is required to set-aside, not plant, let us say, 10, 12½, or even 20 percent of his acres. He must on 80 of the 100 acres produce the volume and income that he needs to support his farming activity and his family.

Quite clearly, it is more difficult to produce enough income on 80 acres than it is on 100 acres, and some of his overhead will continue on the acres that are set-aside. It raises the production costs if you do not plant those acres. It means that the 80 acres have to carry the entire farm. It means that on the 80 acres you have to make enough money to pay the taxes on the 20, and those taxes certainly continue. On the 80 acres you have to make enough money that you can also make the mortgage payments which continue on the other 20 acres.

What does that do? It means that the farming practices on the 80 acres are not as environmentally sound as they would be if they could be spread over the entire farm; that the farmers are driven to much more intensive agricultural production; that the farmers are driven to use much more intensively the chemicals that are so often used in agriculture. So the amendment I am offering and the movement away from set asides, the movement away from acreage reduction programs, has an important environmental element to it as well.

We want to make American agriculture produce, and we want to make it produce not only for the benefit of the farmer but for the benefit of the consumer and for the benefit of the infrastructure of agriculture, those people living in rural America who work with the process and move the products of the farm.

We want to serve them as well.

It is important to note, Mr. President, that this amendment has no cost. Both the OMB, Office of Management and Budget, and the CBO, Congressional Budget Office, have stated that this amendment is a no cost amendment. So this amendment has the benefit of not only being sound agricultural policy, sound environmental policy, but it also adds no cost to the Federal Government.

Mr. President, I believe there may be one or two other Senators who wish to speak on this amendment. While I determine that, I yield the floor.

The PRESIDENT pro tempore. Who yields time?

Mr. LUGAR. Will the Senator yield 5 minutes?

Mr. BOSCHWITZ. With pleasure.

The PRESIDENT pro tempore. The Senator from Indiana [Mr. LUGAR] is recognized for 5 minutes.

Mr. LUGAR. Mr. President, I rise to commend the distinguished Senator from Minnesota for his work on the Agriculture Committee and especially for his very thoughtful analysis and research with regard to this issue. He has offered, I believe, statesmanlike positions on many issues before us.

This is a complex and intricate issue that is difficult for every one of us to comprehend, even when we work with it on the committee, and try to follow daily how the set-asides occur and what the trigger points are.

Let me just say that at the beginning of the debate in the committee I asked that the committee not consider increasing set-asides; that is, increasing the amount of land to be taken out of production. The committee in due course came to a point of view, as the Senator from Minnesota has characterized it, as well as the distinguished chairman of the committee, in which the policy suggested by the U.S. Department of Agriculture and the so-called green book of recommendations was followed by the committee.

It is a middle point between some Members who would set aside a great deal more land, attempt to go into much more of a production control strategy, as opposed to those who are more market oriented, as the Senator from Minnesota clearly is and as I am in terms of our general prejudices on these issues.

Let me just make two points.

First of all, the Senator from Minnesota has mentioned that this amendment has no cost implication, and he has carefully crafted it to make certain that is so.

Second, the thought that we had been on a roller coaster with regard to stocks is true but that was true prior to the Conservation Reserve Program, the CRP Program, in which about 34 million acres in America now have been set aside in conservation reserve. That has had the effect of making these oscillations much less pronounced.

Let me just add, as I have listened to the distinguished Senator from Minnesota, he points out in most years his amendment would not have an effect because the stocks have been so large, and therefore the stocks would not be small enough to trigger off more planting, more acreage available.

In fact, the Senator, as I heard his argumentation, was suggesting that for about 5 years out of the last 40 his amendment would have had an effect, and for the other 35 it would not have.

Mr. President, having said all of that, the Senator's amendment clearly is in the right direction. It is a modest and incremental change in the amount of acreage that might be planted. The Senator's general point is surely correct that if the United States of America and its agriculture are to be more competitive, we have to make available the best land, the best resources, and the lowest cost production if we are to be competitive against the South

American countries that have come into play, or European countries that have been very severe competitors for a long time.

Therefore, Mr. President, I commend the distinguished Senator from Minnesota for thinking through this problem with us and for setting the stage clearly for what I believe will be a trend in American agriculture in which farmers will have more right to plant, to use their land as they choose to do the most efficient thing, to do the most cost-effective thing, and to do the most competitive thing for America. I believe the Senator's amendment is constructive for the overall strength of agriculture in America. Once again, I thank him for his ingenuity and his research.

The PRESIDING OFFICER (Mr. KERREY). Who yields time?

Mr. BOSCHWITZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. Mr. President, I would advise all Senators that we are coming close to the end of this amendment. As the distinguished chairman has pointed out, we will probably vote before all of the time is used up.

Let me say another word about set-asides and that it is an interesting thing that, first, the Government says plant fence row to fence row, and then at a later date they say set-aside some land.

Most recently we have brought a good deal of land out of production; that is, we have established something called the Conservation Reserve Program. In the Conservation Reserve Program there are now 34 million acres. These are acres that will now be used for conservation purposes, for conservation uses, as they say, rather than crops. When you consider that we plant approximately 330 million acres in this country, that is somewhat in excess of 10 percent of the land that we normally crop.

So there is already in this bill a set-aside on fragile lands. I have no objection. I have no argument with the CRP. Indeed, I voted to expand the conservation reserve program. I introduced in committee the thought and requirement that, of the 6 to 7 million additional acres that are yet to go into the conservation reserve, at least 1 million of them should deal with wetlands so that additional wetlands will be put into the conservation reserve.

But as we talk about acreage reduction programs, it is important to note that we have built into the process the Conservation Reserve Program which sets aside land in a somewhat permanent manner that pays the farmer for a 10-year period to set-aside that land, and, indeed, in some instances a 15-year period. And that means that trees and other things are grown there, and that land will probably remain out of production.

So that too must be taken into consideration. In addition to the acreage set-aside program, the ARP's the acreage reduction programs, that are imposed by the Secretary of Agriculture on wheat, corn and on other feed grains, on cotton and rice; you also have to consider that there is already the conservation reserve program in effect now.

A total of 10 percent of all arable lands in the United States has been put into a reserve, into a kind of semi-permanent reserve paid for by the taxpayers of the United States. That too must be considered in the overall picture.

I would like to add as a cosponsor of this amendment my colleague from Iowa, Senator GRASSLEY. I ask unanimous consent that he be added as a cosponsor of this amendment.

The PRESIDING OFFICER (Mr. LEAHY). Without objection, it is so ordered.

Mr. BOSCHWITZ. I reserve the remainder of my time.

Mr. KERREY addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. KERREY. Mr. President, I rise with respect to the distinguished Senator from Minnesota to oppose this amendment for three simple reasons.

The first is that both the chairman and the ranking member of the committee gave to those of us who were working to develop the piece of legislation a number of charges as we try to craft a compromise. One, was stay within the budget. Two, was make sure that it is going to conform approximately to current policy. In other words, follow the guidelines the administration has given us, try to produce something that will satisfy a sufficient number of Republicans and Democrats, that it can be bipartisan. And to say the least, this was not easy to do.

To say the least, this was not easy to do, and not easy, as well, to hold it together here on the floor. So I suggest, reason No. 1 is that the current provision in the language is to the green book proposal. There are identical proposals sought by the administration.

There were some, as the distinguished Senator from Minnesota knows, and the ranking member knows, that wanted to be more aggressive on ARP's, and we were, and we held them off with the argument that we had to have no change in the ARP's going in a more restrictive fashion than this current bill does. So we tried, in the process of compromising, to accept the administration's proposal in the green book.

Second, I urge my colleagues to consider that one of the things that we are trying to do with the farm bill is provide stability. I know it is not perfect. I hear the philosophical arguments that the distinguished Senator from Indiana proposes and, in general, I find myself in agreement with him. However, if the stability of price is the object of the farm bill, as I think it is, not just as a consequence of our desire to provide some minimal protection level for producers, not for the object of trying to guarantee profit, but for the object of saying, keep your eye on cash, your eye on your resource base and on the marketplace, if that is the object for the producer and for the consumer, to keep some steady and relatively dependable supply of food at a relatively low cost, as well, and to maintain a competitive position in the world marketplace, stability becomes very important to do that.

Right now, as I am sure the distinguished Senator from Minnesota knows, I am a little more aware of it, because it impacts Nebraska a bit more than I assume it does Minnesota. We are seeing wheat stocks going up now, 33 percent of total use level. Prices are down approximately 70 percent. The consequence of that is increased Government costs.

What we are trying to do in this, as I said in the beginning, is to balance the taxpayer desire to keep the costs down, because the producers need to have some floor in there, and the consumer desire for stability.

I feel rather strongly that to lose even this stock use ratio would be a mistake from that standpoint; even though I can understand it from a philosophical standpoint and yield on some of the arguments, I find myself, in practice, being concerned about the change.

Finally, I point out that under the export enhancement program provided by the administration, the competitiveness issue, to provide the administration with 566 million dollars' worth of appropriate authority, and with 60 days left we have used 225, it seems to me that we have given the administration a tool to maintain that competitive position in a situation where we have stock use ratio that might be lower than what we would like. We have been given that particular tool, and we ought to be taking more advantage of it.

As a consequence of those three things, I urge my colleagues to see this not just as an amendment that could change the policy away from what the administration is going to do, but to change the policy; and, in fact, it will cost the American taxpayers more, not less, and as a result I urge my colleagues to oppose this amendment.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KERREY). Without objection, it is so ordered.

Mr. BYRD. Mr. President, does my distinguished friend, the manager of the bill, have 5 minutes which he could yield to me on another matter?

Mr. LEAHY. I yield whatever time that I have that the Senator from West Virginia needs.

Mr. BYRD. Mr. President, the manager is kind and courteous, as always. I ask unanimous consent that I may speak out of order.

The PRESIDING OFFICER. Without objection, it is so ordered. The distinguished senior Senator from West Virginia is recognized.

ROSE FITZGERALD KENNEDY'S 100TH BIRTHDAY

Mr. BYRD. Mr. President, there is a very special event that will occur this coming Sunday. The Washington Post refers to it with the headline, "At 100, the perennial Rose Fitzgerald Kennedy." So this Sunday, Mrs. Joseph P. Kennedy, Sr., better known to millions of Americans and others around the world as "Rose," will be 100 years old.

That, in my judgment, is a truly remarkable occasion on which to celebrate.

The psalmist says, as we read in the Scriptures:

"The days of our years are threescore years and ten, and if by reason of strength they be fourscore years, yet is their strength, labour and sorrow; for it is soon cut off, and we fly away."

Here is a great lady who has lived 30 years beyond the promise of the psalmist. A celebration was recently held by the family, and on that occasion, Senator EDWARD KENNEDY, one of our most distinguished colleagues, described his mother in this way: "In the chaos of our household she was the quiet epicenter of the storm, the anchor of our family, the safe harbor to which we always came; or, as mother said, 'the shadow in all our pictures,' because she was taking them."

What a grand and appropriate encomium expressed by her illustrious U.S. Senator son. Last Sunday a public birthday celebration was held with news commentator Robert MacNeil, emceeing the festivities. This weekend, Senator KENNEDY and Rose Kennedy's immediate family—including as many as 28 grandchildren and 22 great-grandchildren will assemble at Hyannis for a private, more intimate observance.

Few women in this century have witnessed and been a participant in so many significant facets of our country's history as has Rose Fitzgerald Kennedy.

As the wife of Joseph P. Kennedy, Sr., Rose was married to a man who was one of the most adroit American financiers and bankers of our time, and who served in a number of important Government roles, including that of being the American Ambassador to England.

But more importantly, Rose Kennedy will be remembered in history as being the mother of three of the most prominent political figures in the second half of the 20th century. I note in the Washington Post article written by Sarah Booth Conroy that Mrs. Kennedy once said that she would prefer to be the mother of a President than to be President of the United States.

This great woman was the mother of a President of our country and the mother of two U.S. Senators—one of whom also became the Attorney General of the United States, and the other who today graces 1 of the 100 seats in this Chamber, and who is a Senator who perhaps has had more legislation attached to his name than has any other Senator in our time.

I have served with TED KENNEDY here now for almost 3 decades, and I believe that he would have been an outstanding Senator at any time in the entire 200 years of this Senate's history.

Much tragedy has been visited upon this family. Rose Kennedy lost a son in World War II, and she lost two sons, one of whom was President, by assassination.

It is truly a great family, and I commend President Bush for proclaiming this Sunday as Rose Fitzgerald Kennedy Family Appreciation Day, certainly an appropriate means of expressing to Mrs. Kennedy and to Senator KENNEDY and to all of their distinguished family the national affection and esteem in which they are held.

I know that I speak for all of our colleagues in wishing Rose Kennedy our most sincere good wishes, and in tendering our congratulations on the occasion of her 100th birthday, and to our colleague, Senator TED KENNEDY, and the entire Kennedy family, our continued regards and appreciation for the vital contributions that they have made and that they are making to our national life.

To this great lady, I say in wishing her a happy birthday:

Count your garden by the flowers,
Never by the leaves that fall,
Count your days by the sunny hours,
Not remembering clouds at all.
Count your nights by stars, not shadows,
Count your life by smiles, not tears,
And on this beautiful July birthday,
Count your age by friends, not years.

The PRESIDNG OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, every so often, it is necessary in the pell-mell and hurly-burly of the Senate to pause for a moment and think of those things that make this a great country, and to hear the kind of speeches on the floor that remind us of our heritage and our history.

I believe very sincerely that has just happened on the floor, and I commend the senior Senator from West Virginia, the President pro tempore of the U.S. Senate, Senator BYRD, for doing that.

He has spoken of one of the most remarkable women in American history. I always noted that her birthday is the same day as that of my much beloved and now departed father. They were born 10 years apart to the day, and we know a number of times there was an exchange of birthday greetings. And I recall the many times we spoke of the great history of the Kennedy family.

But I also applaud especially, though, the words of Senator BYRD, putting it within the historical context. Too often we find in this country we lose our sense of perspective, our sense of history. I worry that perhaps not enough history is taught in the grade schools, high schools, and colleges of our country, or in the pages of our newspaper or on our television screens.

But I know my mother reads the CONGRESSIONAL RECORD daily, and one of the things she frequently points out are history lessons. History lessons such as Senator BYRD, and the distinguished Republican leader, Senator DOLE, and others, have given from time to time. And I recommend that these lessons be read by the people of this country. We are a great, good, and noble country with a history that would make any country in recorded history proud.

Every so often we face the problems of this Nation. When we see the things that worry us, as we do now, we should look at this history and remember what went before us: Remember the resiliency of this country, the men and women who made it great, the people in this body, the hundreds and hundreds of people over the 200 years, not only in the two great political parties represented here, but the political parties of the forebearers of these, the men and women of those who have really been the giants of this country and helped hold us together in very difficult times.

After the rancorous hurly-burly political debate and the sometimes necessary partisanship or factionism, regionalism that has come up, they have come together so many times to save this Nation, to do the things that are right.

I have always said during my 16 years here that the U.S. Senate should be the conscience of the Nation. We face many problems today. Once again, it is necessary for that conscience to coalesce here. We have the kind of sense of history that so many

of us feel, so many of us have expressed before, that the conscience of the Nation will come through and we will be a better Nation for it.

FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT OF 1990

The Senate continued with the consideration of the bill.

Mr. President, I might ask my good friend from Minnesota how much additional time he intends to take, because we are prepared to yield back time on this side.

Mr. BOSCHWITZ. Mr. President, I say to the distinguished chairman, not much more time. I believe Senator GRASSLEY wants to be heard.

Before the distinguished President pro tempore leaves the Chamber, I would like to say that was one of the most beautiful speeches I have heard here in the Chamber, and I was wondering the name of the poem and poet he was quoting in his remarks.

Mr. BYRD. I am sorry; I cannot produce the name of the poet. The title of the poem is "The Multiplication Table of Happiness."

I thank the distinguished Senator for his kind comments.

Mr. BOSCHWITZ. Mr. President, does the Senator from Iowa wish to speak at this time?

Mr. GRASSLEY. No.

Mr. BOSCHWITZ. Mr. President, let me respond to the distinguished Senator from Nebraska about some of the statements that he made, and also talk just a little more about the amendment once again.

The distinguished Senator from Nebraska said that we had not used all of the report enhancement program funds, so-called EEP funds, and that much is yet left that can be expended prior to the end of the fiscal year. We have not because of low stocks. We have not had the wheat to sell, really, to utilize all those funds. I hope it is not necessary to utilize those funds, because when your stocks are low and you have not spent the money to enhance exports; that is, you have not subsidized exports, that is really the situation that we want to find ourselves in.

We hope that the world market will take up the stocks that we have without the exports needing to be enhanced. The price of wheat, while it has come down just recently about 30 cents, has been very high during the year of 1990, and the result is that export enhancement also is not as expensive as when the price is high.

That was part of our argument with respect to the sugar amendment that was discussed earlier this morning, that in the event that we break down the sugar program in this country, world prices certainly would rise as American demand hits the world market, which is a rather small market, and the result would be that the export enhancement that the Europeans would have to do to get rid of their sugar would be reduced. The subsidies that they would have to pay would be reduced. That is why I called the sugar amendment offered by the senior Senator from Delaware and the senior Senator from New Jersey, a European Community relief bill which would not serve the purposes of world trade nor would it serve the purposes of the American agricultural community.

I say to the distinguished Senator from Nebraska, in talking about Europe, I pointed out that over an 11-year period they had grown from being a net importer of grain, a large net importer of grain, about 20 million tons, to becoming a large net exporter of grain and that this has changed the whole nature of the world market, particularly in wheat, and that the Europeans, who have been very aggressive in the sale of wheat and in the subsidizing of wheat, have held up their internal prices so high that they have massive surpluses.

I would also say to the distinguished Senator from Nebraska that this chart represents the cumulative displacement of other countries' grain exports by a change in the EC net trade position. Over this 11- to 12-year period, they have displaced about 275 million tons of wheat exports from other countries. And this, I bring to the attention of my friend from Nebraska, is the cumulative amount of U.S. grain production foregone by acreage reduction programs. We have foregone production and really have in the process given the market to the Europeans. Through acreage reduction, we have reduced production in this country, and the EC simply stepped in to take up that production.

As I also pointed out in my earlier remarks, the same has happened in soybeans. Due to the inflexibility of our farm programs and the requirement of our farm programs, to plant the program crop, soybean planting in this country has gone down by 13 million acres. Soybean planting in Argentina, Paraguay, and Brazil have gone up by the exact same amount. So our share of world markets have gone down. That is why I oppose acreage reduction programs. That is why I am offering this amendment.

Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BOSCHWITZ. Mr. President, I am now prepared to yield back the remainder of my time, if the distinguished chairman is willing to do the same.

Mr. LEAHY. Mr. President, did the distinguished Senator from Iowa wish to speak? I believe he was going to speak on the time of the Senator from Minnesota.

Just for my colleagues' information, I know of no other colleagues that wish to speak. As soon as the Senator from Iowa has finished, I will, if nobody else is seeking recognition, yield back all time.

Mr. BOSCHWITZ. Mr. President, I yield the Senator from Iowa 5 minutes.

The PRESIDING OFFICER (Mr. BURDICK). The Senator has 4 minutes remaining.

Mr. BOSCHWITZ. I yield it all to the Senator from Iowa.

Mr. GRASSLEY. Mr. President, I am a cosponsor of this legislation. I think this is one of the key issues that we are going to debate on this bill. The reason I think it is one of the key issues is because it deals with a discretion that we ought to give to the Secretary of Agriculture. I think it also strengthens the Secretary of Agriculture's hand in dealing with other agencies, particularly OMB, in the whole debate over the budget impact of the farm program. And I think any way we can strengthen the hand of the Secretary of Agriculture in that regard should be done.

But my main purpose for supporting this legislation is the fact that, as compared to the 1985 farm bill debate when there was a wide degree of difference and lack of consensus on what kind of a farm bill we ought to have in the farm communities of the United States, we have a consensus in 1990, and that is that we ought to continue the general format of the 1985 farm bill which is the product of the committee. If I describe to my farmers what we are doing in the 1990 farm bill debate, I describe it as fine tuning. I know that the committee did what they thought was fine tuning when they set the standards in the bill that we have before us, which the amendment of Senator BOSCHWITZ tries to change, and I suppose even his change is within the area of fine tuning.

But I think that there is justification for the Boschwitz amendment when people try to base the 1990 farm legislation too much on what the situation was in 1985. Things have changed since then. We have the Conservation Reserve Program where we have idled 34 million acres for a 10-year period of time. Those acres represent a permanent ARP of between 10 and 15 percent on wheat and between 5 and 10 percent on corn. In 1985, the share of a stagnant world market was declining and agriculture exports were only $26 billion in fiscal year 1986. Today export markets are expanding and agriculture exports are $43 billion.

So besides having a permanent ARP as a result of the Conservation Reserve Program we have expanding world markets.

So Senator BOSCHWITZ should be commended for coming forth with this amendment that will simplify our farm programs.

This proposal will give the Secretary additional flexibility to reduce setasides when world demand requires additional production.

Long-term market signals, drought in other parts of the world, new grain agreements or new nonfood uses may substantially increase crop needs from one season to the next. It will be important for the Secretary to have the freedom to utilize as many resources as possible when he feels it is necessary.

I am concerned that higher setasides will send signals to our foreign competitors that we will not have the ability to sell to our new markets. I do believe that ARP's serve a conserving purpose, but I think proper rotations will make up for any losses through decreased ARP's.

The administration has viewed ARP's as a way to manage stocks and to reduce outlays. If world demand, especially in Third World countries and Eastern Europe increases, United States producers must be able to plant the crop needed to fulfill those needs or lose these markets to our competitors.

The ARP levels in S. 2830 are clearly excessive and need to be changed. Unless this is done, the United States will be less capable of competing for export sales which provide economic benefits to the farmers and the infrastructure of the U.S. agriculture.

I am through and yield the floor. If I have time left I will yield it back.

I yield the floor.

Mr. BOSCHWITZ. Mr. President, I thank the Senator from Iowa. He is, I believe, one of the few, perhaps the only practicing farmer in our body. So I am particularly complimented that he also sees things in agriculture my way. I yield the remainder of my time.

Mr. LEAHY. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back.

The question is on agreeing to amendment of the Senator from Minnesota. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Montana [Mr. BAUCUS], the Senator from Louisiana [Mr. JOHNSTON], the Senator from New York [Mr. MOYNIHAN], and the Senator from Georgia [Mr. NUNN] are necessarily absent.

I further announce that the Senator from Maryland [Ms. MIKULSKI] is absent because of illness.

I also announce that the Senator from Michigan [Mr. RIEGLE] is absent because of illness in family.

Mr. DOLE. I announce that the Senator from Montana [Mr. BURNS], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Oklahoma [Mr. NICKLES], the Senator from Wyoming [Mr. SIMPSON], the Senator from Idaho [Mr. SYMMS], the Senator from Wyoming [Mr. WALLOP], and the Senator from California [Mr. WILSON] are necessarily absent.

I further announce that, if present and voting, the Senator from Wyoming [Mr. WALLOP] would vote "yea."

The PRESIDING OFFICER (Mr. EXON). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 37, nays 50, as follows:

[Rollcall Vote No. 163 Leg.]

YEAS—37

Armstrong	Durenberger	Mack
Biden	Garn	McCain
Bond	Gramm	McClure
Boschwitz	Grassley	McConnell
Chafee	Hatch	Murkowski
Coats	Hatfield	Packwood
Cochran	Helms	Roth
Cohen	Humphrey	Specter
D'Amato	Jeffords	Stevens
Danforth	Kassebaum	Thurmond
Dixon	Kasten	Warner
Dole	Lott	
Domenici	Lugar	

NAYS—50

Adams	Ford	Lieberman
Akaka	Fowler	Metzenbaum
Bentsen	Glenn	Mitchell
Bingaman	Gore	Pell
Boren	Gorton	Pressler
Bradley	Graham	Pryor
Breaux	Harkin	Reid
Bryan	Heflin	Robb
Bumpers	Hollings	Rockefeller
Burdick	Inouye	Rudman
Byrd	Kennedy	Sanford
Conrad	Kerrey	Sarbanes
Cranston	Kerry	Sasser
Daschle	Kohl	Shelby
DeConcini	Lautenberg	Simon
Dodd	Leahy	Wirth
Exon	Levin	

NOT VOTING—13

Baucus	Moynihan	Symms
Burns	Nickles	Wallop
Heinz	Nunn	Wilson
Johnston	Riegle	
Mikulski	Simpson	

So the amendment (No. 2315) was rejected.

Mr. LEAHY. Mr. President, I move to reconsider the vote.

Mr. MITCHELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEAHY. Mr. President, I ask unanimous consent that Senator DASCHLE be recognized to bring up an amendment on storage costs; that there be 40 minutes equally divided on the amendment in the usual fashion, with no second-degree amendments.

I have cleared the request with both sides of the aisle.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request?

The Chair hears none, and it is so ordered.

Mr. LEAHY. Mr. President, for the interest of Senators, that means no longer than 40 minutes from now, we will be having another rollcall vote. If Members yield back the time, it will be less time than that.

Mr. LUGAR. If the Senator will yield, the distinguished chairman, I would like to indicate that I will put in a quorum call for a moment or two. I think we are close to some arrangement with the Senator from South Dakota, and it may be possible to work out that language. If that is not possible, we will commence debate rapidly.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I ask unanimous consent that notwithstanding the pending unanimous-consent order, I be recognized for no more than 4 minutes for the purpose of bringing up a number of amendments that have been cleared.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

AMENDMENT NO. 2316

(Purpose: To provide for the establishment of a National Urban and Community Forestry Advisory Council)

Mr. LEAHY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. SARBANES, proposes an amendment numbered 2316.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1079, between lines 4 and 5, insert the following new section:

SEC. 1943. NATIONAL URBAN AND COMMUNITY FORESTRY ADVISORY COUNCIL

(a) ESTABLISHMENT.—The Secretary shall establish a National Urban and Community Forestry Advisory Council for the purpose of—

(1) developing a national urban and community forestry action plan;

(2) evaluating the implementation of such plan; and

(3) developing recommended criteria for, and submitting recommendations with respect to, the Urban Forestry Energy Conservation Program under section 1942.

(b) Membership.—

(1) IN GENERAL.—The Council shall be composed of 15 members appointed by the

Secretary, including at least two representatives of each of the following—

(A) national nonprofit forestry and conservation citizen organizations;

(B) the forest products, nursery, or related industries;

(C) urban forestry professionals such as landscape, or design consultants, planners, horticulturalists, consulting foresters and arboriculturalists;

(D) academic institutions with an expertise in urban and community forestry activities;

(E) State or local forestry agencies or equivalent State or local agencies;

(F) Federal agencies involved in urban forestry such as the Forest Service; and

(G) the general public, one of whom shall be a resident of a community with a population of less than 50,000 as of the most recent census and both of whom shall have expertise and have been active in urban and community forestry.

(2) VACANCY.—A vacancy on the council shall be filled in the manner in which the original appointment was made.

(3) CHAIRPERSON.—The Secretary shall select one individual from among the members appointed to the Council, who is not an officer or employee of the United States nor any State, county, city, or town government, who shall serve as the chairperson of the Council.

(4) TERMS.—

(A) IN GENERAL.—Except as provided in subparagraphs (B) and (C), members of the Council shall be appointed for terms of 3 years, and no member shall serve more than two consecutive terms.

(B) STAGGERED TERMS.—Of the members first appointed under paragraph (1)—

(i) five, including the chairperson, shall be appointed for a term of 3 years;

(ii) five shall be appointed for a term of 2 years; and

(iii) five shall be appointed for a term of 1 year;

as designated by the Secretary at the time of appointment.

(C) EXPIRATION OF TERM.—Any member appointed to fill a vacancy occurring before the expiration of the term of the predecessor of such member shall be appointed only for the remainder of such term. A member may serve after the expiration of the term of such member until the successor of such member has taken office.

(5) COMPENSATION.—

(A) IN GENERAL.—Except as provided in subparagraph (B), members of the Council shall serve without pay, but may be reimbursed for reasonable costs incurred while in the actual performance of duties of the Council.

(B) EMPLOYEES OF THE FEDERAL GOVERNMENT.—Members of the Council who are full-time officers or employees of the United States shall receive no additional pay, allowances, or benefits by reason of their service on the Council.

(C) SUPPORT.—The Secretary shall provide financial and administrative support for the Council.

(c) NATIONAL PLAN.—Not later than 1 year after the date of enactment of this Act, and at least once every 10 years thereafter, the Council shall prepare a National Urban and Community Forestry Action Plan. The Plan shall include—

(1) an assessment of the status of urban forest resources in the United States at the time of the submission of the Plan;

(2) the results of a review of urban and community forestry programs and activities carried out in the United States, including education and technical assistance activities conducted by the Forest Service, Extension Service, and other Federal agencies, the State forestry organizations, private industry, private nonprofit organizations, community and civic organizations and other interested entities;

(3) recommendations for improving the status of the urban and community forest resources of the United States, including education and technical assistance and modifications required in existing programs and policies of relevant Federal agencies;

(4) the results of a review of urban and community forestry research including—

(A) all ongoing research associated with urban and community forests, arboricultural practices, and the economic, social, and psychological benefits of trees and forest cover in urban and community areas that are being conducted by the Forest Service, other Federal agencies, and associated land grant colleges and universities;

(B) recommendations for new and expanded research efforts directed toward urban and community forestry concerns; and

(C) a summary of research priorities and an estimate of the funds needed to implement such research, on an annual basis, for the next 10 years;

(5) a statement of the criteria to be used for evaluating proposed projects under the Urban Forestry Energy Conservation Program under section 1942, with special emphasis given to projects that would demonstrate the benefits of improved forest management (including the maintenance and establishment of forest cover and trees) in urban areas and communities; and

(6) an estimate of the resources needed to implement the Plan for the succeeding 10 fiscal years.

(d) AMENDING OF PLAN.—The Plan may be amended by a majority of the members of the Council. Such amendments shall be incorporated into the annual review by the Council of the Plan.

(e) The Council shall submit the Plan to the Secretary and the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate on its completion. Not later than December 31 of the first year after the submission of the Plan, and annually thereafter, the Council shall submit a review of the Plan to the Secretary. Such review shall consist of—

(1) the assessment of the Council of the prior year accomplishments in research, education, technical assistance, and related activities in urban and community forestry;

(2) the recommendations of the Council for research, education, technical assistance, and related activities in the succeeding year; and

(3) the recommendations of the Council for the urban and community forestry challenge cost share projects to be funded during the succeeding year.

The review to be submitted to the Secretary under this subsection shall be incorporated into the annual report of the Forest Service to the Congress under the Forest and Rangeland Renewable Resources Planning Act of 1974.

(f) DETAIL OF PERSONNEL.—On request of the Council, the Secretary is authorized to detail, on a reimbursable basis, any of the personnel of the Department of Agriculture to the Council to assist the Council in carrying out its duties under this section.

(g) DEFINITIONS.—As used in this section:

(1) COUNCIL.—The term "Council" means the National Urban and Community Forestry Advisory Council established under subsection (a).

(2) PLAN.—The term "plan" means the National Urban and community Forestry Action Plan developed under subsection (c).

(3) SECRETARY.—The term "Secretary" means the Secretary of Agriculture.

(4) URBAN AND COMMUNITY AREA.—The term "urban and community area" includes cities, their suburbs, and towns.".

On page 1079, line 7, strike out "1943" and insert in lieu thereof "1944".

On page 1079, line 16, strike out "1944" and insert in lieu thereof "1945".

On page 1080, line 20, strike out "1945" and insert in lieu thereof "1946".

Mr. SARBANES. Mr. President, the amendment which I am introducing today cleared by both the majority and minority managers, takes a significant step in enhancing the Urban Forestry Program contained in the committee's bill. I want to commend the chairman and the ranking minority member, as well as the chairman of the Subcommittee on Conservation and Forestry, Senator FOWLER, for their leadership in establishing an urban forestry program.

My amendment would require the Secretary of Agriculture to create a national urban and community forestry advisory council. The council would be responsible for developing a national urban and community forestry action plan, evaluating implementation of that plan, and developing recommended criteria for the Urban Forestry Energy Conservation Program under section 1942 of the committee bill. It was a key element of the urban forestry bill, S. 1399, I introduced last year. This legislation, in slightly modified form, has already passed the House of Representatives.

The council would consist of 15 members with representation from the national nonprofit forestry and conservation citizen organizations; the forest products, nursery, or related industries; urban forestry professionals; academics; State or local forestry agencies; Federal agencies; and, finally, the general public. It is a broad-based group organized to provide the Department of Agriculture with the best possible advice and guidance on this program to combat global warming and to improve the environment of our cities, towns, and communities.

I am pleased that the committee has so forthrightly addressed the urban forestry issue in this bill. The addition of the council will ensure that the program is given guidance and direction by those who are most experienced in forestry, and I would urge the managers to accept this amendment.

Mr. LEAHY. Mr. President, this has been cleared on both sides. I have nothing further to say.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agree-

ing to the amendment of the Senator from Maryland.

The amendment (No. 2316) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2317

(Purpose: To implement a comprehensive national management program for undesirable plant species on Federal lands and to establish a national coordination program for noxious weed management)

Mr. LEAHY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. CONRAD, proposes an amendment numbered 2317.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 557, between lines 10 and 11, insert the following new subtitle:

Subtitle F—Noxious Weed Management

SEC. 1271. SHORT TITLE.

This subtitle may be cited as the "Noxious Weed Management Act of 1990".

SEC. 1272. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds that—

(1) noxious weeds and undesirable plants are—

(A) contaminating Federal, State, and private lands by taking over and encroaching on desirable plant species;

(B) degrading air, land, and water resources by increasing soil erosion and decreasing native ground cover;

(C) spreading on Federal, State, and private lands;

(D) causing wildlife habitats to be degraded to the detriment of wildlife populations;

(E) causing human health hazards through the spread of pollen, insects, and disease;

(F) costing farmers and ranchers millions of dollars in lost crops and range land; and

(G) displacing the native vegetation in the area that such weeds are present and thus having a considerable impact on domestic animals and wildlife foraging in such areas;

(2) unless noxious weeds and undesirable plants are prevented, controlled, or contained, they will—

(A) increase expotentially, causing further contamination and deterioration of wildlife habitat, recreational resources, and aesthetic values;

(B) increase soil, water, and contamination hazards;

(C) have a detrimental effect on human health; and

(D) further eliminate native species of vegetation;

(3) even though there are numerous laws addressing the stewardship and management of Federal lands, those laws do not directly or effectively deal with the management of noxious weeds and undesirable plants on Federal lands;

(4) the total eradication of noxious weeds is impossible, therefore resources should be used to develop measures that will decrease the number of noxious weeds and undesirable plants to an acceptable level;

(5) concerns about reducing ground water contamination and environmental impact argue in favor or a more ecologically sound approach to resolving noxious weed problems;

(6) in order to control and manage noxious weeds and undesirable plants, the focus must be on an integrated management plan; and

(7) comprehensive, national noxious weed management will—

(A) protect the environment by preventing the degradation of air, land, and water resources, and reduce soil erosion through the prevention of the introduction and containing the spread of noxious weeks and undesirable plants on Federal lands;

(B) improve the protection of recreation uses and aesthetic values on Federal lands by reducing the risk of the transfer of noxious weeds and undesirable plants from one area to another;

(C) improve the habitat for wildlife and domestic animals on Federal lands by reducing the spread of undesirable plants that are detrimental to desirable vegetation;

(D) protect threatened and endangered species listed as such under the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.) by reducing the infestation of noxious weeds and undesirable plants in protected ecosystems;

(E) provide for the management, development, and enhancement of Federal lands by protecting those lands from the continuing spread of noxious weeds and undesirable plants; and

(F) promote coordination, control, and educational efforts at the regional, State, and local level.

(b) PURPOSE.—It is the purpose of this Act to—

(1) establish and implement a national comprehensive management program to prevent and control undesirable plant species on Federal lands and maintain practices that achieve the control of noxious weeds on such lands; and

(2) establish and implement a national noxious weed management coordination program.

SEC. 1273. DEFINITIONS.

As used in this subtitle:

(1) COOPERATIVE AGREEMENT.—The term "cooperative agreement" means a written agreement between a Federal and a State agency.

(2) EXOTIC PLANT.—The term "exotic plant" means a plant species that—

(A) is not indigenous to the United States nor native to the plant community in which it is found; and

(B) may possess one or more of the following—

(i) it aggressively invades or is detrimental to native plant communities or crops;

(ii) it is poisonous to livestock;

(iii) it is of little economic value;

(iv) it colonizes disturbed habitats;

(v) it is a carrier of determinal inserts, diseases, or parasites;

(vi) its presence is detrimental to sound management of native or agricultural ecosystems; and

(vii) it threatens fish, wildlife, or endangered species.

(3) FEDERAL AGENCY.—The term "Federal agency" means a department, agency, or bureau of the Federal Government that is responsible for administering or managing Federal lands under its jurisdiction.

(4) FEDERAL LANDS.—The term "Federal lands" means lands managed by or under the jurisdiction of the Federal Government, except those lands on which the activities authorized under this subtitle are precluded by Federal law.

(5) INTEGRATED MANAGEMENT SYSTEM.—The term "integrated management system" means a system for the planning and implementation of a program using an interdisciplinary approach to select methods for preventing, controlling, or containing undesirable plants through the use of all judicious and environmentally safe methods, including—

(A) education;

(B) preventive measures;

(C) physical or mechanical methods;

(D) biological agents;

(E) herbicide methods;

(F) cultural methods; and

(G) general land management practices, such as manipulation of livestock or wildlife grazing strategies or improving wildlife or livestock habitats.

(6) INTERDISCIPLINARY APPROACH.—The term "interdisciplinary approach" means an approach to making decisions regarding the prevention, containment, or control of noxious weeds and undesirable plants that—

(A) includes the participation of personnel from Federal or State administrative agencies with experience in areas including weed science, range science, wildlife biology, land management, ecology, and forestry; and

(B) includes the consideration of—

(i) the most efficient and effective methods of preventing, containing, or controlling undesirable plants to achieve optimum management with the least possible environmental damage;

(ii) scientific evidence and current technology;

(iii) the physiology and habitat of a plant species; and

(iv) the economic, social, and ecological consequences of implementing the programs established under this subtitle.

(7) NOXIOUS PLANT.—The term "noxious plant" has the same meaning given the term "noxious weed" under section 3(c) of the Federal Noxious Weed Act of 1974 (7 U.S.C. 2802(c)) and includes all noxious plant species listed on the Federal or State noxious weed list.

(8) STATE AGENCY.—The term "State agency" means the State Department of Agriculture, or any political subdivision thereof, or other appropriate State agency or political subdivision thereof as designated by the chief executive officer.

(9) UNDESIRABLE PLANT SPECIES.—The term "undesirable plant species" means plant species that is classified as undesirable, noxious, exotic, injurious, or poisonous, pursuant to State or Federal law. A designation of undesirable plants under this section shall be limited by the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.), and shall not include plants indigenous to an area where control measures are to be taken under this section.

CHAPTER 1—NATIONAL UNDESIRABLE PLANT MANAGEMENT PROGRAM

SEC. 1274. MANAGEMENT OF UNDESIRABLE PLANTS ON FEDERAL LAND.

Each Federal agency shall—

(1) designate a specific office, and an individual who is adequately trained in the management of undesirable plant species, to develop and coordinate a program for the

management of undesirable plant species on Federal lands that are under the jurisdiction of that agency;

(2) establish a program to manage undesirable plant species on a continuing basis;

(3) enter into and implement cooperative agreements with State and local agencies, when appropriate, regarding the management of undesirable plant species on Federal lands that are under the jurisdiction of that agency;

(4) establish integrated management systems using an interdisciplinary approach to prevent, control, or contain undesirable plant species targeted under cooperative agreements entered into under paragraph (3); and

(5) complete an environmental assessment or environmental impact statement that may be required under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and implement the plant prevention, control, or containment activities under this section not later than 1 year after the date on which the agency ascertains that the preparation of such assessment or statement is necessary.

SEC. 1275. COOPERATIVE AGREEMENTS WITH STATE AGENCIES.

(a) IN GENERAL.—A Federal agency shall, where appropriate, enter into cooperative agreements under section 1274(3), when requested by State and local agencies, to coordinate the management of undesirable plant species on Federal lands under the jurisdiction of that Federal agency.

(b) CONTENTS.—A cooperative agreement entered into under subsection (a) shall—

(1) prioritize and target undesirable plant species to be prevented, controlled, or contained within a specific geographic area;

(2) describe an integrated management system to be used to prevent, control, or contain the targeted undesirable plant species; and

(3) detail the means of implementing such an intergrated management systems, define the duties of the Federal and State agency in implementing such systems, and establish a time frame for the initiation and completion of the tasks specified in such integrated management systems.

CHAPTER 2—NATIONAL NOXIOUS WEED MANAGEMENT COORDINATION PROGRAM

SEC. 1276. NOXIOUS WEED MANAGEMENT COORDINATION PROGRAM.

(a) NATIONAL NOXIOUS WEED MANAGEMENT COUNCIL.—

(1) ESTABLISHMENT.—The Secretary of Agriculture and the Secretary of the Interior shall jointly establish a National Noxious Weed Management Council that shall take such actions as may be necessary to coordinate the national control, research, and educational efforts associated with Federal, State, and locally designated noxious weeds.

(2) REGIONAL COMMISSIONS.—

(A) AUTHORITY.—The National Noxious Weed Management Council is authorized to establish such regional commissions as may be necessary to assist the Council in carrying out this subtitle.

(B) COMPOSITION.—A regional commission established under subparagraph (A) shall be composed of—

(i) two regional representatives of the Department of Agriculture;

(ii) two regional representatives of the Department of the Interior;

(iii) one regional representative of the Army Corps of Engineers; and

(iv) not more than seven representatives of State and local governments involved in weed management activities, including representatives for agriculture, wildlife management, and health.

(C) DUTIES.—A regional commission established under subparagraph (A) shall—

(i) identify regional priorities with respect to noxious weed management;

(ii) make recommendations to the National Noxious Weed Management Council concerning noxious weed management;

(iii) coordinate noxious weed management using an interdisciplinary approach, regional research, training, technical assistance, and requests for funding;

(iv) assist in the development of regional technical guides for noxious weed management; and

(v) prepare and submit, on not less than an annual basis, to the National Noxious Weed Management Council a report on regional control, research, and education concerning noxious weed management.

(3) COORDINATION.—The National Noxious Weed Management Council shall coordinate the regional commissions established under paragraph (2) and facilitate the transfer of information among such regional commissions.

(4) SUPPORT SERVICES.—The Secretary of Agriculture and the Secretary of the Interior may provide to each regional commission established under paragraph (2) such administrative and technical support services as necessary for the effective functioning of such regional activities.

(b) ADMINISTRATIVE PROVISIONS RELATING TO REGIONAL COMMISSIONS.—

(1) COMPENSATION.—The members of a regional commission established under subsection (a)(2) shall receive no additional pay, allowances or benefits by reason of such members service to the regional commission.

(2) CHAIRMAN.—The members of a regional commission shall select a chairman from among the members of the regional commission.

(3) AREA.—Each regional commission shall meet in the geographical area of the regional commission at the call of the chairman of such commission or at the request of a majority of the members of such commission.

SEC. 1277. NOXIOUS WEED MANAGEMENT COST SHARING.

(a) GRANTS.—The National Noxious Weed Management Council, in consultation with the regional commissions established under subsection 1276(a)(2), may provide grants to State and local agencies to enable such agencies to manage noxious weeds and to provide cost sharing incentives to local private landowners for the management of noxious weeds.

(b) ELIGIBILITY.—To be eligible to receive assistance from the National Noxious Weed Management Council for the management of noxious weeds, a State or local agency shall—

(1) maintain staff that is adequately trained in the management of noxious weeds;

(2) develop and coordinate a program of noxious weed management in consultation with the regional commissions established under section 1276(a)(2); and

(3) ensure that a majority of the landowners in the area will participate in a noxious weed management program.

SEC. 1278. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as may be necessary in each of fiscal years 1991 through 1995 to carry out this subtitle.

On page 557, line 11, strike out "Subtitle F" and insert in lieu thereof "Subtitle G".

On page 557, line 12, strike out "1271" and insert in lieu thereof "1281".

On page 558, line 7, strike out "1272" and insert in lieu thereof "1282".

On page 560, line 1, strike out "1273" and insert in lieu thereof "1283".

On page 562, line 7, strike out "1274" and insert in lieu thereof "1284".

On page 569, line 12, strike out "1275" and insert in lieu thereof "1285".

On page 570, line 4, strike out "1276" and insert in lieu thereof "1286".

On page 574, line 21, strike out "1277" and insert in lieu thereof "1287".

NOXIOUS WEEDS

● Mr. BAUCUS. Mr. President, I rise today to give my strong support for the amendment offered by the Senator from North Dakota.

He, Senator DASCHLE and I have been working for several months to put together an amendment which will address the very serious problem of noxious weeds management.

This problem has become epidemic in proportion.

In Montana alone, over 8.4 million acres of land are infested with noxious weeds. Over half of these acres are infested with spotted knapweed.

Scientists predict that 70 million acres nationwide will be lost to this weed if control measures are not taken.

Part of the problem has been that there is no comprehensive, coordinated approach to noxious weed management between Federal agencies, and State and local governments.

The amendment we are offering today will establish that coordination.

It will set up a comprehensive national management program to control the spread of noxious weeds.

Under the program, each Federal agency will be required to designate a specific office and person to develop and coordinate a noxious weeds program. This office will be given authority to establish cooperative agreements between the Federal agency and State and local agencies to coordinate the management of noxious weeds.

In addition, the amendment will authorize the establishment of regional commissions to identify regional priorities and coordinate noxious weeds management within the regions. Grants will be made available to State and local agencies to provide cost sharing incentives to local landowners as needed for the management of noxious weeds.

The amendment is strongly supported by Montana's Weed Control Association, Montana State University, the Weed Science Society of America, the Intermountain Noxious Weed Ad Hoc Committee, the Wildlife Management Institute, the Wildlife Federation, the Department of Interior and the USDA.

I urge my colleagues to vote for it.●

Mr. LEAHY. This also has been cleared on both sides.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from North Dakota.

The amendment (No. 2317) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2318

Mr. LEAHY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. BURNS, proposes an amendment numbered 2318.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In S. 2830, on page 676, line 12, insert the following new section:

"SEC. 1427. ALTERNATIVE USES FOR AGRICULTURAL PRODUCTS.

(a) The Secretary of Agriculture is encouraged to conduct a study on new uses for traditional and alternative agricultural products and, within 6 months, and annually thereafter, after the date of enactment of this Act, submit to the Congress a report on such study.

(b) The annual studies shall include—

(1) a review of existing alternative uses for traditional and alternative crop both here and abroad; and

(2) a strategy for research in new uses for traditional and alternative agricultural products within the national land grant college system.

Mr. LEAHY. This has also been cleared on both sides.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Montana.

The amendment (No. 2318) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2319

Mr. LEAHY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY] for Mr. BURNS, proposes an amendment numbered 2319.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

The amendment is as follows:

In S. 2830, on page 671, line 7, insert the following:

(c) The Secretary of Agriculture is encouraged to conduct a study on the impact of rangeland carrying capacity during drought and, within 1 year after the date of enactment of this Act, submit to the Congress a report on such study.

(d) The study shall include—

(1) a review of exising rangeland drought research here and abroad; and

(2) a strategy for the establishment of a national rangeland drought research program, involving international, Federal, State and local agencies.

The PRESIDING OFFICER. Is there debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Montana.

The amendment (No. 2319) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2320

Mr. LEAHY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. MCCONNELL, proposes an amendment numbered 2320.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate point in the bill, add the following:

Section 5.17(a) of the Farm Credit Act of 1971 is amended by deleting paragraph (13).

Section 5.19(a) of the Farm Credit Act of 1971 is amended by adding after the third sentence the following:

"Examinations of banks shall include an analysis of the compensation paid to the chief executive officer and the salary scales of the employees of the bank.".

Mr. MCCONNELL. Mr. President, this amendment seeks to improve the Farm Credit Administration's approval process of farm credit system bank compensation plans. Currently, FCA must approve the salary scale and compensation package of senior bank officers for each of the 12 farm credit banks.

My amendment revises the statute and gives the authority to the board directors of each district bank. Additionally, the Farm Credit Administration will be required to annually review the salary and compensation packages. Granting authority to bank boards will not reduce the ability of the FCA as a regulator to effect change through the exercise of existing statutory powers.

The statutory requirement has been difficult to administer and shifting authority from FCA will enhance the bank's ability to act quickly, responsibly, and effectively in managing these independent financial institutions. The FCA has requested this change because it provides better use of their limited resources. The amendment has been agreed to by both managers of the bill; therefore, I urge the adoption of the amendment.

The PRESIDING OFFICER. Is there debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Kentucky.

The amendment (No. 2320) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2321

(Purpose: To increase the amount authorized to be appropriated for national competitive research initiative grants)

Mr. LEAHY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. GLENN, proposes an amendment numbered 2321.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 737, line 21 and 22, strike out "for each of the fiscal years 1994 and 1995" and insert in lieu thereof "for fiscal year 1994, and $500,000,000 for fiscal year 1995".

Mr. GLENN. Mr. President, today in this country, we have an opportunity to invest in the future. We can choose to spend money with a reasonable rate of return. At the same time, our investment will find ways to keep specialized workers employed, clean up our environment and find new ways to utilize our commodities. Our investment counselor says we can do all this while maintaining our international competitive edge by an $500 million/year investment for the next 5 years.

Mr. President, I am talking about investing in our agricultural research community. By supporting the Com-

petitive Research Grants Office of USDA, we can support the individual investigators working alone or in small groups all over the United States. These are the scientists who pursue questions with answers that can revolutionize an entire industry.

Mr. President, the National Research Council's Board on Agriculture has recommended increasing the Competitive Research Grants Office budget to $500 million starting in fiscal year 1991. This report outlines 6 areas of research that need to receive priority one of which is the development of new products and uses for our traditional commodity crops. As you know, I have long supported research that allows us to find new ways to use the crops we produce in abundance. By funding the National Research Initiative at the recommended level we can increase our commitment in research dollars to this most important area of product utilization.

The Agriculture Committee has done a remarkable job of working out a compromise funding scheme that phases in this appropriation. I would like to amend this title to reflect the final goal of $500 million. Therefore, I am offering an amendment that changes the authorization for 1995 from $400 to $500 million.

I would ask that my colleagues support me in making a clear statement of intent to invest in the future of agricultural research and therefore in the future of America.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Ohio.

The amendment (No. 2321) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEAHY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ROBB). Without objection, it is so ordered.

The Senator from Minnesota [Mr. BOSCHWITZ].

Mr. BOSCHWITZ. Mr. President, I will proceed and talk about some amendments that I am offering, and when the differences are worked out with the Senator from South Dakota on his amendment, so that they are ready to proceed, I will yield the floor at that point so they may proceed with it.

I understand that is the order of events that is about to occur and should occur.

The PRESIDING OFFICER. Without objection, it is so ordered. The pending unanimous-consent request will be placed aside, and the Senator is recognized.

Mr. BOSCHWITZ. Mr. President, I am going to offer, if not today, on Monday or Tuesday, or at such time as it is convenient with the chairman and ranking member of the committee, some amendments on loan rates.

Under the 1985 farm bill, which my farmers almost uniformly say has been a great success story, loan rates are established at 75 to 85 percent of the market price in the preceding 5 years, taking out the high year and the low year.

So you take out the high year and the low year of the preceding 5 years, you average the other 3 years of market prices, and the Secretary has the authority to establish the loan rate at 75 to 85 percent of the average of those 3 years.

The Secretary has always chosen to go at 75 percent in order to have the loan rate at the most competitive level possible. Under this bill, the same rules apply, except that the loan rates cannot be lower than the 1990 level.

I will offer an amendment that reinstates the 1985 farm bill rule without having the 1990 floor. I believe that one of the great successes of the 1985 farm bill is that our loan rates have become competitive.

So I will offer that amendment at some later time and will probably talk about it at some length later on today so that Senators and their staff will be informed of what I intend to do. I also will have some variations on that theme. In the event that amendment loses, I will offer other amendments somewhat similar to that.

I yield the floor.

The PRESIDING OFFICER. Under the previous order, the Senator from South Dakota is recognized to offer an amendment on which debate will be divided equally, 20 minutes per side.

AMENDMENT NO. 2322

Mr. DASCHLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislation clerk read as follows:

The Senator from South Dakota [Mr. DASCHLE] proposes an amendment numbered 2322.

Mr. DASCHLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

STORAGE PAYMENTS.—

(1) On page 349 of S. 2830 (as amended by amendment No. 2303), strike lines 15 through 25 and insert the following:

"In making storage payments to producers under section 110 of the Agricultural Act of 1949 (7 U.S.C. 1445e) and to commercial warehouses under the authority contained in the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.), the Commodity Credit Corporation and the Secretary of Agriculture shall, to the extent practicable, ensure that the rates of the storage payments made to producers are equivalent to average rates paid for commercial storage, taking into account the current demand for storage for commodities, efficiency, location, regulatory compliance costs, bonding requirements, and impact of user fees as determined by the Secretary, except that the rates paid to producers and commercial warehouse shall be established at rates that will result in no increase in current or projected combined outlays of the Commodity Credit Corporation for the storage payments made to producers and commercial warehouse as a result of the adjustment of storage rates under this section.".

Mr. DASCHLE. Mr. President, first of all, let me thank the distinguished Senator from Minnesota for his courtesy. I appreciate the willingness to allow this amendment to be offered. I must say the managers of the bill went a long way in addressing the concern that this amendment addresses today in the amendment that passed yesterday.

My motivation in offering this amendment goes to the comments I made yesterday, that is, that we can find ways, minimal as they may be, to help offset some of the problems associated with the bill in its entirety in terms of farm income for the average family farmer.

One of the problems that existed in past farm bills has been storage. There is a disparity that exists between grain elevators and farmers with regard to the storage payments. The disparity is related directly to the payment itself. The disparity is also related to the fact that elevators can be provided with handling fees and other reimbursements for expenses that farmers are not entitled to.

This amendment recognizes that some of that disparity will always be there, that there may be a need for elevators to obtain a higher compensation rate, especially as it relates to some of the regulatory requirements and the availability of storage itself.

My amendment simply improves upon what was done yesterday by striking the reference in the legislation passed yesterday which gives discretion to the Secretary to come up with a lot of other reasons this disparity ought to continue. It locks in place a number of specific exemptions to the requirement for equivalency, but that is all it does. The storage amendment says that there shall be equivalency with regard to payments made to farmers as well as to elevators with the following exceptions: Efficiency,

location, regulatory compliance costs, bonding requirements, and the impact of user fees as determined by the Secretary.

I emphasize as well that this amendment is budget neutral. We have no intention of adding to the budget. We simply take whatever pie is available and make sure that, except for the things stated specifically in the amendment, there shall be equivalency.

With that, Mr. President, I retain the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. BOSCHWITZ. Who is controlling time?

Mr. DASCHLE. I am happy to yield to the Senator from Minnesota.

The PRESIDING OFFICER. The Senator from Minnesota is recognized with the time charged to the Senator from South Dakota.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that I be listed as a cosponsor of the amendment of the Senator from South Dakota.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOSCHWITZ. Mr. President, I compliment the Senator from South Dakota and quite agree with what he is trying to achieve, that is, equivalence between the storage that is paid the farmer and paid the elevator in the town, taking into account that when there are different duties and when there are different obligations, those obligations and duties, be they on the part of the farmer and his storage facility or be they on the part of the commercial storage facility, that those can be taken into consideration with respect to compensation as well.

I compliment the Senator from South Dakota for bringing this amendment before us. I have spoken to my own farmers at scores and scores of meetings about the same subject, and I am pleased that the Senator has brought this matter to a head here on the floor.

Mr. DASCHLE. I appreciate the Senator's cosponsorship. I also ask unanimous consent that Senators KERREY and CONRAD be listed as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. DASCHLE. I yield whatever time the chairman requires.

The PRESIDING OFFICER. The Senator from Vermont is recognized on time charged to the Senator from South Dakota.

Mr. LEAHY. Mr. President, I say on our side this matter is cleared. I see no need for a rollcall vote. It is acceptable on this side. I reserve to the Senator from South Dakota the remainder of his time.

The PRESIDING OFFICER. Who yields time?

Mr. LUGAR. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Indiana is recognized for 5 minutes.

Mr. LUGAR. Mr. President, I commend the distinguished Senator from South Dakota for his amendment. He has, without doubt, improved upon the language of the bill. I appreciate his acknowledgement that the staff, in a bipartisan way, had gone some distance with regard to storage rates in the legislation.

The Senator has been thoughtful, as always, about how farmer income could be enhanced in difficult times in his State and throughout the country. He has made very constructive suggestions. It is a very constructive amendment.

On our side we are prepared to accept that amendment, and I join with the distinguished chairman, if that is his will, in recommending that we have a voice vote as opposed to a rollcall vote in view of what I suspect is overwhelming support for the amendment.

The PRESIDING OFFICER. Who yields time?

Mr. LUGAR. I yield whatever time the Senator from Iowa would request.

The PRESIDING OFFICER. The Senator from Iowa, Mr. GRASSLEY, is recognized under the time charged to the Senator from Indiana.

Mr. GRASSLEY. First of all, I ask unanimous consent to be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I compliment the Senator from South Dakota for his sponsorship of this amendment.

This amendment will eliminate, or hopefully eliminate, a very sore point that has been an issue with farmers ever since we had the farmer-held grain reserve and onfarm storage has been an emphasis of our Federal Government.

I know there are a lot of people here in this body who have been involved with the writing of this legislation who feel that a differential is very justified. I cannot see any justification for that differential. More importantly, farmers that deal every day with their local elevator out there that gets a higher rate of storage, in most instances at least, do not understand the differential. They deal with the manager. They know that manager as well as they know any other business person in their community. The farmers out there do not understand the difference.

They understand the operation of that elevator. A lot of those people serve on the boards of those elevators. And even from that group of people, I have found a feeling that the farmer comes out on the short end of the stick when he gets paid less than the commercial elevator does.

So not only to enhance farmer income, but I see this more as a matter of equity and fairness. I hope that the language of the legislation now, which does not expressly provide parity because of some language that is left in the bill, will in actuality bring this parity. I think that is the intention of the Senator from South Dakota.

I yield the floor.

Mr. DASCHLE. Mr. President, I will be very brief. Let me just thank the ranking member for his comments and also for the tremendous cooperation we have received from many on his staff that were helpful in coming to the agreement that we did.

I thank the Senator from Iowa for his cosponsorship and his comments. I think this does improve the bill and what we are all trying to do.

With that I yield back the remainder of my time.

The PRESIDING OFFICER. All time is yielded back by the proponents.

Mr. LUGAR. Mr. President, I yield back all of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

The amendment (No. 2322) was agreed to.

Mr. DASCHLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. MITCHELL. Mr. President, with the disposition of the Daschle amendment, I am advised by the managers that there will be no further amendments today which would require a rollcall vote. It was anticipated, of course, a short while ago that that amendment would require a rollcall vote but it has now been accepted. Accordingly, there will be no further rollcall votes today.

At the moment staffs on both sides are attempting to put together a schedule of amendments for Monday and I hope shortly to be able to announce that schedule. That is not quite ready yet and no announcement is therefore possible.

Mr. LUGAR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum has been suggested. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PRYOR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2323

(Purpose: To provide for increased emphasis on nutritional programs in the food aid grant programs)

Mr. PRYOR. Mr. President, I send an amendment to the desk on behalf of Mr. KERREY, the Senator from Nebraska. This amendment has been cleared by the Republican side and the Democratic side. It relates to nutritional programs, asking for an additional emphasis upon the nutritional programs. I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Arkansas [Mr. PRYOR], for Mr. KERREY, proposes an amendment numberd 2323.

Mr. PRYOR. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In S. 2830, on page 361, line 16, before ".", insert the following provision: ", including policies to reduce measurably hunger and malnutrition through efforts such as establishing and institutionalizing supplemental nutrition programs targeted to reach those who are nutritionally at risk."

On page 417, line 15, after "security" insert ", including nutrition,".

On page 418, line 10, after "security" insert ", including nutrition,".

Mr. PRYOR. Mr. President, once again, the amendment is self-explanatory. It has been cleared on both sides of the aisle.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, we accept and commend the amendment. It is an important addition to our understanding of what we can do with regard to world famine.

Our understanding is that in the other body, Congressman BEREUTER of Nebraska has gained passage of this amendment in the House Foreign Affairs Committee and it is appropriate we should consider it and his colleague, Senator KERREY, should offer it. We support the amendment.

The PRESIDING OFFICER. If there be no further debate, the question is on agreeing to the amendment of the Senator from Nebraska.

The amendment (No. 2323) was agreed to.

Mr. PRYOR. Mr. President, I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PRYOR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2324

Mr. LUGAR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Indiana [Mr. LUGAR] proposes an amendment numbered 2324.

Mr. LUGAR. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place at the end of title XVII, add the following new section:

SEC. 17 . MARKETING ORDERS.

Section 8e of the Agricultural Adjustment Act (7 U.S.C. 608e-1), is amended, by—

(1) striking "(a) Notwithstanding any other provision of law," in the first sentence, and inserting in its place "(a) Subject to the provisions of subsection (c) and notwithstanding any other povision of law,";

(2) adding at the end thereof the following new subsection:

"(c) Prior to any import prohibition or regulation under this section being made effective with respect to any commodity—

"(1) the Secretary of Agriculture shall notify the U.S. Trade Representative of such import prohibition or regulation;

"(2) the U.S. Trade Representative shall determine, and submit in writing to the Secretary of Agriculture, that the application of the grade, size, quality, and maturity provisions of the relevant marketing order, or comparable restrictions, to imports are not inconsistent with U.S. international obligations under any trade agreement, including the General Agreement on Tariffs and Trade; and

"(3) if the U.S. Trade Representative does not submit a determination under paragraph (2) within 30 days of the notification under paragraph (1), the Secretary may proceed with the proposed prohibition or regulation.".

Mr. LUGAR. Mr. President, this amendment has been cleared on both sides, but I wish to explain it briefly. The purpose of the amendment is to clarify current practices on establishing marketing orders to ensure consistency with international trade obligations.

Presently, as Senators know, marketing orders were created by law in 1937 and they can be used by the Secretary of Agriculture to develop programs to stabilize and improve the marketing of products. The purpose of my amendment is to make certain that these marketing orders do not come into conflict with our trade negotiations.

We have offered language that we believe is acceptable to those Senators who have had great experience with and support marketing orders and those Senators who are very much in favor of our pursuing trade negotiations.

The PRESIDING OFFICER. Is there further debate.

The Chair recognizes the Senator from Arkansas [Mr. PRYOR].

Mr. PRYOR. Mr. President, this amendment has been cleared on this side of the aisle. There is no objection.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 2324) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote.

Mr. PRYOR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, I ask unanimous consent that on Monday, July 23, the following amendments be offered and debated; that any votes ordered to occur relative to these amendments be stacked to occur at a time to be determined by the majority leader after consultation with the Republican leader; that no other amendments be in order to the listed amendments except where noted; and that the agreements be in the usual form regarding the control of time on any of the listed amendments with specific time limitations: a Daschle amendment relating to new products research, 3 hours equally divided; a Conrad amendment relating to repay barley advance deficiency payments, 1 hour equally divided; a Reid amendment relating to consumer product safety testing, to which second-degree amendments would be in order; a Cohen amendment relating to flexible basing; a Grassley amendment relating to rural safety education; a Grassley amendment relating to sustainable agriculture, with a possible relevant second-degree amendment by Senator LEAHY. I further ask unanimous consent that at 1 p.m. on Monday, when the Senate resumes consideration of S. 2830, Senator GRASSLEY be recognized to offer his listed amendment relating to rural safety education.

The PRESIDING OFFICER. Is there objection?

Mr. SPECTER. Reserving the right to object, I had been handed a sheet on this unanimous-consent request which the distinguished majority leader has substantially read and which sheet contained a reference to stacking the votes to Tuesday, July 24, at a time to be determined by the majority leader after consultation with the Republican leader. So I would inquire as to whether that is the intent of the distinguished majority leader?

Mr. MITCHELL. Mr. President, as the distinguished Senator from Pennsylvania will note, if he has the sheet that I have, there are a number of changes and interlinings and crossouts, as is common with these agreements. He is correct that the words "on Tuesday, July 24," were deleted. I wanted the opportunity to consult with the Republican leader before making a determination on precisely when the votes would be stacked to occur. I invite the Senator's advice in that regard as well.

Mr. SPECTER. Mr. President, I have stayed to participate in this unanimous-consent request because of this Senator's concern as to what is to be the schedule of the Senate. I understand the majority leader's responsibility to move a very important and congested calendar, and when the majority leader had circulated the letter in early July saying that we would be expected to vote on Mondays, among other times, this Senator canceled a plan which had been scheduled for a long period of time because I did not want to be in the position of missing a vote and would not ask for any special consideration by the distinguished majority leader.

Earlier today, I had consulted with Mr. Howard Greene about the schedule on Monday, as it was my hope to travel with the President in Philadelphia on Tuesday, and I had not made a decision on that because I wanted to see what the Senate's business was to be on Tuesday. I did not intend to ask for any special deference, to have any window so that I might go. Although I have not missed a vote during the whole of this session or the last session, I would want to consider that, missing perhaps a vote or two, to join the President on what I think may be an important event in my State on the drug issue.

But I did not want to find myself in the position where, being available on Monday to vote, I then found votes stacked on Tuesday, which would prejudice my own position, having canceled my plans and been available on Monday.

Having said that, without taking up too much of the Senate's time, since we are not going to vote anymore, as no pressing business is pending, I think it not inappropriate to add again, considering the very complex demands that the majority leader has, and after the majority leader made a statement recently asking for Senators' responses, I took the majority leader up on his invitation, went in and sat with him and told him of this Senator's concern on a number of items.

One item that this Senator is concerned about is the slow pace of the Senate when amendments are not offered. As for example, last night; as for example today. The majority leader asked unanimous consent that we would be expected to vote until 3 o'clock on Friday afternoon.

With a schedule of voting where we have quorum calls through 6 o'clock, 7 o'clock; votes scheduled for 7:45, apparently to accommodate schedules, or on Wednesday on the civil rights bill, we did not vote until 9 o'clock. There was a question in this Senator's mind as to why.

All of which raises the general question which I think is worthy of our consideration as to how the Senate is going to function. We have very important business to perform. I do not like to see anybody say that the Senate is not ready, willing, and able to go ahead and do the Senate's work.

Often a Senator comes to the majority leader and asks for special consideration—I heard about one recently. I heard the story. The sequence was, well, you did that for 99 other Senators. You missed 99 days of work. So I have made it a practice simply not to ask the majority leader to accommodate my schedule.

But at the same time, when this Senator cancels longstanding plans because I knew I could wait until 1 o'clock on Friday and change events. To change another 50 or 60 people's schedule simply will not do. I want to be available to help the majority leader and the distinguished Republican leader carry out our work.

But the question comes into my mind, I think understandably, when on Friday afternoon—and I heard the majority leader last night at 7:30 talk about the August 3 conclusion date. He wanted to observe it but he could not observe it if the Senate cannot work on Thursday night, and the Senate did not work on Friday. My basic request is that whatever the rules are, it is the prerogative of the majority leader, the prerogative to work and be responsible, and us for him. It is his prerogative to set the rules. I think the rest of us ought to cooperate with whatever rules he sets.

But that is why I am concerned about the possibility that these votes might be stacked on Tuesday. If there are votes on Tuesday, in sequence, I am prepared to take my chances, not go to Philadelphia, even though it is an important event on a drug issue with the President. It is also a Republican fundraiser, let me add that; not for me, a Republican fundraiser for the Republican State Committee.

But I have asked the President to meet with the drug task force there. I would like to be there. So I am prepared to make that evaluation as to what happens on Tuesday. But I do not want to be prejudiced by the absence of votes on Monday.

So having said all of that, my request to the majority leader, again, is to see if it might be possible to fashion rules so that when we are on the farm bill we either take up amendments or go to third reading.

Third reading might not be a bad idea this afternoon. It certainly would facilitate the conduct of the Senate's business in the future. I know that is not about to happen. There has to be notice to Senators. If we are to work on Mondays, I would like to see us notified and have the majority leader in the position, in conjunction with the Republican leader, to move ahead.

Outside of that, Mr. President, I have no objection.

Mr. DOLE. No objection.

Mr. SPECTER. Mr. President, I do object to the unanimous-consent request in the present form where it is open ended as to whether all of these votes might occur on Tuesday at noon.

The PRESIDING OFFICER (Mr. KOHL). Objection is heard.

Mr. MITCHELL. Mr. President, I thank my colleague. I did have a good constructive meeting with the distinguished Senator from Pennsylvania in which he made a number of suggestions on proceeding within the Senate, most of which I have attempted to implement but without success.

Of course, I do not have the unilateral authority to impose my preferences upon the Senate. It requires cooperation. Any individual Senator can prevent an action from occurring, as the Senator from Pennsylvania has just done with respect to this agreement. I think his points made today are well taken. I will take them into account.

I would simply note that as the Senator from Pennsylvania alluded to I am daily, and it appears increasingly, deluged with requests by Senators not to have votes at certain times on certain days, all for very valid reasons, including a visit by the President to one's home State or home community, and a number of others.

We have had difficulty getting Senators willing to come and offer amendments. As the Senator from Pennsylvania well knows, where I could attempt to move to third reading, I will let the distinguished Republican leader speak for himself, but I think he could and no doubt would prevent me from doing so to protect the interests of Republican Senators who wish to offer amendments but are not at this moment prepared to do so.

Mr. SPECTER. If the distinguished majority leader will yield, I had suggested at a meeting that I had with the distinguished majority leader that some of these be taken up in caucuses on each side to see if we could not find some consensus.

I understand that the distinguished Republican leader cannot proceed to third reading, nor can the distinguished majority leader because notice has not been given. But I think there is a lot of frustration among all Sena-

tors. I do not know whether it is the majority or minority of us who do not ask for special consideration on a trip by President Bush to Pennsylvania on Tuesday. I simply seek to find out what will be the consequence of this unanimous-consent arrangement.

If the impact could be heavier at a specific time, which I think would be unfair, having been available to vote on Monday, and as the distinguished majority leader may surmise, I say I do not wish to in any way impede the majority leader getting a unanimous-consent request.

When the majority leader comments that any Senator can stop the operation at any time, it is true that can be done on a unanimous-consent request, but not on the customary conduct of the business of the Senate. The majority leader schedules the business. He has 54 Senators who will stand behind him on what he seeks to do.

So I would really ask that this dialog today be followed by an effort to try to get a consensus on moving forward on the appointed hours, and that there not be a 3-hour window or 2-hour window on a Wednesday night until 9 p.m. to have votes and have the Senate conclude its business at 10 o'clock.

I am not in any way assessing any blame. I am trying to look to the future. If we can vote at 5 o'clock or 6 o'clock, if we are going to work on into the evening, I am prepared to do that. But we are here on Friday afternoon. I made plans to be here on Friday and Monday afternoons after I got the majority leader's letter. But I think that there are 96 other Senators besides the 4 here who share these views—95; we have a Presiding Officer—and are prepared to do this if we simply knew what was going to happen.

Mr. DOLE. Will the majority leader yield?

I think it is one thing if you live in Pennsylvania but quite another if you live out on the West Coast or 4 or 5 hours from here. You cannot make it up and back in an hour by plane.

There are Members that have problems from time to time. Maybe the Senator from Pennsylvania has never had one. On this Monday, I had one. As minority leader, I do not ask for many favors around here. I will be back at 5:30, and prepared to vote at that time.

In fact, if necessary, I could vote ahead of that time. But again, it is a longstanding standing commitment that I have made.

So maybe I am at fault instead of the majority leader for this request. So I apologize to both the Senator from Pennsylvania and the Senator from Maine, the majority leader.

I am not certain the unanimous consent is needed. In any event, it seems to me, let us go from one amendment to the next. We do not have to vote. We can lay it aside and take up another amendment.

I would say that if it would be helpful to the Senator from Pennsylvania and the majority leader, I believe I can be on the floor by 5:30, 5:45 on Monday afternoon. I say there would probably be votes Tuesday morning in any event. If I can help, I am happy to.

Mr. MITCHELL. I thank the Senator.

Mr. SPECTER. Mr. President, I understand the situation with Senators who do not live as close to Washington as this Senator does, and if there is anything that the distinguished Republican leader needs by way of scheduling, I would not consider posing any objection under any circumstance. I understand that Senators from the greater distances have to travel. But what this Senator seeks is just whatever the rules are going to be, I do not care what they are, as long as we know what they are.

Mr. MITCHELL. If I may interject on that point. There is a universal desire for certainty with respect to the schedule. Unfortunately, given the rules of the Senate, which make the schedule inherently uncertain, it is not possible to determine in advance precisely how long each measure will take or when votes will occur. I do not know how many amendments will be offered to a particular bill when the bill is brought up, or how long the debate will be on each amendment. And the ability of any Senator to speak without limitations makes it impossible to establish total certainty with respect to the scheduling.

When there is added to that the differing and very demanding schedules of 100 Senators, it is very difficult to organize business in a way that meets the convenience of everybody.

I can say, as I have said, that the Senate will be in business and operating on Friday, but if no Senator will come and offer an amendment and if I can be prevented, as I am prevented at any time from moving to third reading, then I simply do not have the capacity or the authority to accomplish that which the Senator from Pennsylvania would like, and which I assure him, in all sincerity, I want more than he.

So I have done the best I could to organize the operation in a way that would provide the maximum degree of certainty possible, given the rules of the Senate and the circumstances under which we operate. Indeed, one of the reasons I wanted to get in a unanimous-consent request—even though as the distinguished Republican leader has just noted, it is not technically necessary—was to indicate, to the extent we can do so, what will be coming up on Monday, and having gained the commitment of these Senators whose names I read off, that they will be here to further assure their presence to offer these amendments.

I recognize the concerns of the Senator from Pennsylvania and the particular situation in which he finds himself at this time. I will be pleased to consult with him and the distinguished Republican leader further before making a final decision on these amendments. Inevitably, as the distinguished Republican leader knows better than I, because he served as majority leader longer than I have served as majority leader, it comes down to attempting to accommodate the interests of a large number of Senators, most of which are in conflict, and we do the best we can to accommodate the largest number in the fairest possible way.

Mr. SPECTER. Well, Mr. President, one final comment. I will withdraw any objection and let the roulette wheel stop wherever it chooses.

I say, in conclusion, that it appears to me on the state of the record, that we are not going to be voting on Mondays, and we are not going to be doing much on Fridays. And it may mean there is going to have to be more done within the respective party caucuses to say where the Senators want to stand.

I understand what the majority leader has said. Nothing that I have said relates to the questions about offering amendments or how long any Senator is going to speak. I do not want to interfere with the schedule of my colleagues from the Midwest, the West, or any place. But I do think that it is a subject on our scheduling that is going to require more attention beyond the leadership, more cooperation from the rest of us, to set the kind of standard we want. If there are enough of us who do not want to vote on Fridays or Mondays, so be it. Then we do not want to be accused of working 3 days a week, 3 days a month. We have a large agenda to accomplish, and we are all responsible for it, not just the leadership.

So I withdraw my formal objection, having noted a fair number of objections in the past.

The PRESIDING OFFICER. Does the majority leader renew his request?

Mr. MITCHELL. I do.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that there be a period for morning business with Senators permitted to speak therein.

THE PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE HOUSE

At 12:28 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the bill (S. 605) to authorize appropriations for the Consumer Product Safety Commission, and for other purposes, with amendments; it insists upon its amendments to the bill, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. DINGELL, Mr. WALGREN, Mr. SLATTERY, Mr. LENT, and Mr. RITTER as managers of the conference on the part of the House.

The message also announced that the House has passed the bill (S. 2088) to amend the Energy Policy and Conservation Act to extend the authority for titles I and II, and for other purposes, with amendments; it insists upon its amendments to the bill, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. DINGELL, Mr. SHARP, Mr. MARKEY, Mr. BRUCE, Mr. TAUZIN, Mr. LENT, Mr. MOORHEAD, and Mr. DANNEMEYER as managers of the conference on the part of the House.

The message further announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 5268. An act making appropriations for Rural Development, Agriculture, and Related Agencies programs for the fiscal year ending September 30, 1991, and for other purposes.

MEASURES REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 5268. An act making appropriations for Rural Development, Agriculture, and Related Agencies programs for the fiscal year ending September 30, 1991, and for other purposes; to the Committee on Appropriations.

ENROLLED JOINT RESOLUTIONS PRESENTED

The Secretary of the Senate reported that on today, July 20, 1990, he had presented to the President of the United States the following enrolled joint resolutions:

S.J. Res. 276. Joint resolution designating the week beginning July 22, 1990, as "Lyme Disease Awareness Week"; and

S.J. Res. 281. Joint resolution to designate September 13, 1990, as "National D.A.R.E. Day."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HEFLIN, from the Select Committee on Ethics, without amendment:

S. Res. 311. An original resolution concerning the Select Committee on Ethics investigation of Senator David F. Durenberger (Rept. No. 101-382).

By Mr. KENNEDY, from the Committee on Labor and Human Resources, without amendment:

S. 2632. A bill to amend the Public Health Service Act to reauthorize the National Center for Health Statistics, and for other purposes (Rept. No. 101-383)

By Mr. NUNN, from the Committee on Armed Services, without amendment:

S. 2884. An original bill to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes (Rept. No. 101-384).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. COATS (for himself and Mr. LUGAR):

S. 2882. A bill to modify the boundaries of the Indiana Dunes National Lakeshore, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. AKAKA (for himself and Mr. INOUYE):

S. 2883. A bill directing the President to transfer funds for emergency aid to the Philippines; to the Committee on Appropriations.

By Mr. NUNN, from the Committee on Armed Services:

S. 2884. An original bill to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes; placed on the calendar.

By Mr. KASTEN:

S. 2885. A bill to amend the Federal Deposit Insurance Act to require States in which the failure of State chartered savings associations has involved a disproportionately large share of the thrift resolution costs to pay a State thrift deposit insurance premium as a condition of future Federal deposit insurance; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. GLENN (for himself, Mr. GORE, Mr. AKAKA, and Mr. LIEBERMAN):

S. 2886. A bill to amend the Stewart B. McKinney Homeless Assistance Act to clarify requirements regarding the use of unutilized, underutilized, surplus, and excess Federal buildings and real property to assist the homeless, and for other purposes; to the Committee on Governmental Affairs.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. HEFLIN, from the Select Committee on Ethics:

S. Res. 311. An original resolution concerning the Select Committee on Ethics investigation of Senator David F. Durenberger; placed on the calendar.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. COATS (for himself and Mr. LUGAR):

S. 2882. A bill to modify the boundaries of the Indiana Dunes National Lakeshore, and for other purposes; to the Committee on Energy and Natural Resources.

INDIANA DUNES NATIONAL LAKESHORE ACCESS AND ENHANCEMENT ACT

Mr. COATS. Mr. President, today, I am pleased to introduce a bill, sponsored by Senator LUGAR and myself, to enhance and expand the Indiana Dunes National Lakeshore.

Just about 100 years ago, President Theodore Roosevelt convened a conference on conservation at the White House. It brought together one of the most distinguished collections of national leaders ever gathered, including most of Congress, the Supreme Court and the Governors of 34 States. The President opened the proceedings with a disturbing declaration: "It seems to me time for the country to take account of its natural resources, and inquire how long they are likely to last."

That question is still with us. We asked it as a nation only a few months ago. Earth Day focused our attention on the resources of a nation whose frontier was conquered long ago. When we destroy our natural wealth, there is no moving onward and westward to better things. Conservation is a problem dumped into this generation's lap. It is we who will suffer or triumph.

It is true that too often in the past America's "shining city on a hill" has been obscured by smog, and littered with stagnant pools. Our shrinking open space has been crowded by pollution and noise and blight. We've often violated the basic human needs of men and women to live in places that are healthy and pleasing to the senses—the promise of "America the Beautiful."

All this has constituted a theft from our future. It is a myopia of the mind's eye in which greed or carelessness rob our children of beauty and resources.

But it is also something more. It is a violation of our best principles. In Christianity and Judaism, nature is God's creation, to be respected and heeded. Man is not the master. He is the steward. And nature is His trust. To violate that trust is, in some way, to betray a God who saw the work of His hands and pronounced it "very good."

Federal, State, and local governments have unprecedented responsibilities—but also unequaled opportunity. Never before have we had such power to control our environment. Never before have we had such power to destroy it. To paraphrase John Kennedy,

this will be the best generation, or one of the last.

I have seen in Congress the emerging outline of a bipartisan consensus on the environment. Alliances you would never have expected have brought us tough, needed efforts at conservation.

And one of the most vital roles in this new environmental agenda is played by our national parks and scenic wilderness. During my time in Congress, I have supported the protection of 15 million new acres of wilderness, and the classification of over 2,500 miles of wild and scenic rivers.

But even in the extraordinary variety of our parks and wilderness areas, Indiana Dunes is unique. I have visited the Dunes a number of times. Each occasion is a revelation of beauty and contrast. Running each from the industrial center of the Nation, the Dunes National Lakeshore weaves its way around the shores of Lake Michigan. It is an island of natural beauty in a sea of industrial sprawl. Its wooded dunes and marshy thickets stand undisturbed within 100 miles of over 10 million men and women. This is truly what is meant by "parks for the people."

This unique role also presents unique challenges. It requires constant effort to protect the Dunes from encroachment. Its location, just 45 miles from Chicago, means pressures and difficulties faced by no other park in the county.

But, in another way, the Dunes is a vision of the future for many of those other parks. The type of boundary pressures in this area will eventually push against park boundaries everywhere—as population and development increase. How the Dunes deals with these pressures will be seen as an example, a model of conservation in an urban landscape.

Clearly, Indiana Dunes must be protected. But the specifics of this charge involve some difficult issues. I have personally talked with environmental groups, such as the Save the Dunes Council, with leaseback holders, with residents of the Salt Creek and Little Calumet corridors, and with other property owners. I have done my best to listen to every side with sympathy and understanding. These conflicting voices have led some people to claim that this is a no-win situation, that the minefield can't be crossed.

But Senator LUGAR and I believe the Dunes are too important—both to Indiana and the Nation—for inertia and timidity. We are committed to seeing the Dunes expanded and protected. And we have drafted a bill that listens with sympathy and acts with resolution.

First, and I believe most importantly, this bill includes authorization for the National Park Service to acquire Crescent Dune, the last remaining lakeshore property on the eastern edge of the park. This piece of land is an important and natural addition to the lakeshore. And expanding the Dunes is one of the best ways we can preserve it.

Second, there are two additional, important nature areas that were considered for acquisition in legislation which passed the House a few months ago. Senator LUGAR and I have decided, in our bill, that the pressures of development in these areas are too urgent to wait for future action. We have included immediate authorization for acquisition for wetland areas in Beverly shores and a small section of virgin prairie containing rare plants and wildlife known as Hobart Prairie Grove. Both of these areas are environmentally sensitive and important.

Third, it is important to note that the four northern Lake County areas which were passed in the House bill are also included in this legislation—including Inland Manor and Woodlake Dune Savannah. Inland Manor comprises about 90 homes, and Woodlake Dune Savannah is a wooded, natural area which is vulnerable to development. These are important additions to the park.

Fourth, we have tried to give fair resolution to the debate over the Salt Creek and Little Calumet River corridors. This legislation includes a proposal which will protect this important natural resource while allowing most homeowners to keep their property. Under the bill, the first step would be for the National Park Service to conduct an inventory of important natural resources in the two river corridors. This inventory would also include a list of current and projected threats to these resources. At the conclusion of this evaluation, the Park Service will issue recommendations for the best ways to protect these resources, emphasizing efforts that can be made by State and local governments. The Park Service will continue to work in an advisory capacity to local governments, and will periodically report to Congress to ensure their recommendations are implemented.

I believe this proposal will allow the important natural resources at the river corridors to remain under local protection and jurisdiction. However, I am determined to ensure that local governments will protect these resources, and this is why the proposal contains congressional oversight.

Finally, I would like to discuss proposed additions in Porter County. Senator LUGAR and I have worked closely with both property owners and the environmental community regarding proposed lakeshore additions in this area. We believe the proposal we are introducing today provides necessary protection for the environment, including valuable wetlands and lakefront property, while protecting the rights of property owners, especially when it is necessary to include homes.

First, a small parcel of land in Porter Beach has been included as passed by the House. This addition is necessary to construct facilities to allow access for the handicapped to the park.

Concerning the U.S. 20 completion, I have personally met with the residents of Furnessville, and I understand their opposition to inclusion. For this reason, Senator LUGAR and I decided that the Senate bill should not include Furnessville. It is our hope and belief that Furnessville residents will work with the Park Service and environmental organizations to prevent commercial development of the Furnessville area.

Regarding the parcel known as the State Route 49 corridor addition, Senator LUGAR and I have agreed that homeowners should continue to be allowed to live along this section unless an attempt is made to use property currently in residential use for commercial purposes.

The last area included in the House bill from Porter County is the campground addition. I am pleased that, beginning next year, a 200-site campground will be developed within the boundaries of the lakeshore. I would like to note that the boundaries of the proposed addition included in the House bill have been slightly altered, to exclude homes and property currently used for residential purposes. Instead, the Senate boundaries will include a small area intended for use as a beach shuttle station and adjacent parking lot.

All these rather technical proposals are addressed to complicated issues and debates. They will not please everyone. But they are directed toward a simple goal—developing a position that Indiana can champion and defend. A position that is sensitive to local concerns. But a position that strengthens a fragile and irreplaceable natural resource.

I ask unanimous consent that the text of the bill I am introducing be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2882

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Indiana Dunes National Lakeshore Access and Enhancement Act".

SEC. 2. DEFINITION.

For the purposes of this Act, the term "the Act" means the Act entitled "An Act to provide for the establishment of the Indiana Dunes National Lakeshore, and for other purposes", approved November 5, 1966 (6 U.S.C. 460u et seq.).

SEC. 3. BOUNDARIES.

(a) IN GENERAL.—The first section of the Act (16 U.S.C. 460u) is amended by striking "October 1986, and numbered 626-80, 033-B" and inserting "July 1990, and numbered _____".

(b) CRESCENT DUNE.—Section 12 of the Act (16 U.S.C. 460u-12) is repealed.

SEC. 4. SALT CREEK AND LITTLE CALUMET RIVER PROTECTION PLAN.

The Act is amended by adding at the end thereof the following new section.

"SEC. 25. (a) Not later than 2 years after the date of enactment of this section, the Secretary shall, in cooperation with affected landowners, conservation organizations, local and State governments, and Federal agencies having jurisdiction over the scenic, natural, cultural, and recreational resources within the area, complete a study of—

"(1) the Little Calumet Corridor between U.S. Highway 20 and County Road 450 East, Pine Township; and

"(2) the Salt Creek Corridor between Interstate 94 and County Road 700 North, Liberty Township.

"(b) Participation in the study required by subsection (a) by landowners, conservation organizations, local and State governments, and Federal agencies shall include ample opportunity for review and comment, including opportunity to—

"(1) comment on the scope of the study;

"(2) furnish information and opinion at any time during the study and planning process;

"(3) testify at a public meeting; and

"(4) comment on a written draft of the study and recommendations.

"(c) The study required by subsection (a) shall include—

"(1) an inventory of the corridor's scenic, natural, cultural and recreational values;

"(2) an analysis of existing threats and likely future threats to those resource values and of existing local State and Federal efforts to counter those threats;

"(3) an evaluation of public access opportunities for the purposes of fishing, canoeing, hiking, and other appropriate recreational activities;

"(4) alternative private, State, and local means for enhancing the protection of resource values and for ensuring public access for recreational purposes; and

"(5) recommendations for actions that could be taken by landowners, conservation organizations, local and State governments, and Federal agencies to enhance protection of the corridors' resource values and ensure appropriate public access, consistent with landowner rights.

"(d)(1) The Secretary shall transmit copies of the study prepared pursuant to subsection (a) to the landowners, conservation organizations, local and State governments and Federal agencies or organizations that were recommended to have a role in the implementation of a conservation strategy for the river corridors.

"(2) With the transmittal of the study under paragraph (1), the Secretary shall request the participants to describe, not later than 6 months after receipt of the study, the extent to which they intend to adopt and implement the recommendations made in the study.

"(e) Not later than 12 months after the date of completion of the study required by subsection (a), the Secretary shall submit a report to the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives that—

"(1) summarizes the response received from study participants concerning their intent to adopt and implement the recommendations made in the study; and

"(2) recommends further actions that should be taken to ensure full protection of, and adequate public access to, the significant resources of the Calumet River Corridor and Salt Creek Corridors.

"(f) Following submission of the Secretary's report to Congress, the Secretary shall continue to actively monitor actions taken by landowners, conservation organizations, local and State governments, and Federal agencies to implement the Secretary's recommendations, and make periodic reports to Congress on the extent to which the study recommendations are being implemented and the resource values of the corridors are being protected.

"(g) Following completion of the study required by subsection (a), the Secretary shall, upon request, provide technical and coordination assistance to landowners, conservation organizations, local and State governments and Federal agencies that wish to implement the study recommendations.".

SEC. 5. REPORT ON ROAD RIGHTS-OF-WAY.

The Act, as amended by section 4, is amended by adding at the end thereof the following new section:

"SEC. 26. (a)(1) Not later than 180 days after the date of enactment of this section, the Secretary shall prepare and submit to the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a report that—

"(A) identifies road rights-of-way within the boundaries of the lakeshore that are proposed to be relinquished by local governments;

"(B) describes actions that have been taken to effect the relinquishment of the rights-of-way; and

"(C) describes any impediments there may be to each relinquishment.

"(2) The Secretary shall notify Federal, State, and local transportation authorities of the road rights-of-way identified in the report described in paragraph (1).

"(b) The Secretary may reimburse a local government for reasonable administrative costs associated with relinquishing a road right-of-way within the boundaries of the lakeshore.".

SEC. 6. DEEP RIVER CORRIDOR STUDY.

The Act, as amended by section 5, is amended by adding at the end thereof the following new subsection:

"SEC. 27. (a) Not later than 2 years after the date of enactment of this section, the Secretary shall complete and submit to the Committee on Interior and Insular Affairs of the House of Representatives and to the Committee on Energy and Natural Resources of the Senate a study of the Deep River Corridor.

"(b) The area to be studied pursuant to subsection (a) shall include—

"(1) the segment from the abandoned Chesapeake and Ohio Railroad right-of-way south of the existing Deep River County Park to the confluence of Deep River with the Little Calumet River;

"(2) the portion of the Little Calumet River between Lake Michigan and Martin Luther King Drive in Gary, Indiana; and

"(3) the Lake George Segment of the Deep River Corridor.

"(c) The study required by subsection (a) shall include—

"(1) an inventory of the area's natural, cultural, and recreational values and features;

"(2) recommendations for the provision of the public access for the purposes of fishing, canoeing, hiking, and other public activities; and

"(3) recommendation of the lands, waters, and interests therein that should be acquired to provide for the protection of the resources in the corridor, including recommendations regarding the State, local, or Federal agencies or jurisdictions that should acquire and administer those lands, waters, and interests therein.".

SEC. 7. IMPROVED PROPERTY; RETENTION OF RIGHTS.

(a) ADDITIONAL AREAS.—The table in section 4 of the Act (16 U.S.C. 460u-3) is amended to read as follows:

"Property within boundaries of map	Construction began before
Dated July 1990.....	July 1, 1990
Dated October 1986, No. 626-80, 033-B.	February 1, 1986
Dated December 1980, No. 626-91014.	January 1, 1981
Dated September 1976, No. 626-91007.	February 1, 1973
Dated September 1966, No. LNPNE-1008-ID.	January 4, 1965".

(b) RETENTION OF RIGHTS.—Section 5(a) of the Act (16 U.S.C. 460u-5(a)) is amended—

(1) in paragraph (2)(B), by striking "subparagraph (A)" and inserting "subparagraph (A)(ii)"; and

(2) by adding at the end thereof the following new paragraph:

"(3)(A) In the case of improved property included within the boundaries of the lakeshore after July 1, 1990, that was not included within the boundaries before that date, an individual who is an owner of record of such property as of that date may retain a right of use and occupancy of such improved property for noncommercial residential purposes for a term ending at either of the following:

"(i) A fixed term not to extend beyond September 30, 2010, or such lesser fixed term as the owner may elect at the time of acquisition.

"(ii) A term ending at the death of the owner or the owner's spouse.

The owner or owners shall elect the term to be reserved.

"(B) Subparagraph (A)(ii) shall apply only to improved property owned by an individual who—

"(i) was an owner of record of the property as of July 1, 1990;

"(ii) had attained the age of majority as of that date; and

"(iii) made a bona fide written offer not later than July 1, 1995, to sell the property to the Secretary.".

(c) EXTENSION OF LEASES.—Section 5 of the Act (16 U.S.C. 460u-5) is amended by adding at the end thereof the following new subsection:

"(d)(1) With respect to an improved property acquired prior to the date of enactment of this subsection upon which a valid existing right of use and occupancy has been reserved for a term not more than 29 years, the Secretary may renegotiate the term of the retained right to a term for a period of not more than 29 years from the commence-

ment date of the existing right, not to extend beyond September 30, 2010.

"(2) In order to obtain a lease extension under this subsection, the holder of a reserved right shall make application to the Secretary and elect an extended lease term not later than one year after the date of enactment of this subsection.

"(3)(A) A lease extension under this subsection—

"(i) shall be conditioned on payment of an annual rental at the commencement of each calendar year of the lease term and shall commence in the calendar year during which the original right of use and occupancy would have terminated; and

"(ii) shall be subject to such terms and conditions as the Secretary deems appropriate to ensure the use of the property is consistent with the purposes of this Act.

"(B) The holder of the lease whose term is extended may elect to terminate the lease prior to the expiration of the extended term.

"(C) Upon the Secretary's determination that the property, or any portion thereof, has ceased to be in accordance with the applicable terms and conditions of a lease, the Secretary may terminate the lease.

"(D) If the Secretary terminates a lease under this subsection, the Secretary shall refund to the lessee an amount equivalent to the remaining portion of the prepaid rental.

"(4) By acceptance of a lease extension under this subsection, the holder of a lease waives any benefits to which the holder may be entitled under the Uniform Relocation and Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601 et seq.).

"(5) The amount of the annual lease payment required under this subsection shall be equivalent to the amount discounted from the purchase price paid by the Secretary under the terms of the original sale adjusted annually by a general index adopted by the Secretary reflecting overall value trends within the Indiana Dunes National Lakeshore between the time of the original sale and the time of the commencement of the annual lease payment of the renegotiated retained right offered by this subsection.".

(d) CLERICAL AMENDMENT.—Section 5(a)(1) of the Act (16 U.S.C. 460u-5(a)(1)) is amended by striking the period after "626-91014" the first place it appears and inserting a comma.

SEC. 8. COOPERATIVE AGREEMENT.

The Act, as amended by section 6, is amended by adding at the end thereof the following new section:

"SEC. 28. In furtherance of the purposes of this Act, the Secretary may enter into a cooperative agreement with the city of Gary, Indiana, pursuant to which the Secretary may provide technical assistance in interpretation, planning, and resource management for programs and developments in the city of Gary's Marquette Park and Lake Street Beach.".

SEC. 9. UNIT I-M.

The Act, as amended by section 8, is amended by adding at the end thereof the following new section:

"SEC. 29. (a)(1) UNIT I-M.—Before acquiring lands or interests in land in Unit I-M (as designated on the map referred to in the first section of this Act), the Secretary shall consult with the Commissioner of the Indiana Department of Transportation to determine what lands or interests in lands are required by the State of Indiana for improvements to State Road 49 and the reconstruction and relocation of the interchange with State Road 49 and U.S. 20 so that the acquisition by the Secretary of lands or interests in land in Unit I-M shall not interfere with planned improvements to the interchange and State Road 49 in the area.

"(2) The Secretary may acquire lands or interests in land that are as of July 1, 1990, and that thereafter remain in use as improved residential properties within Unit I-M only with the consent of the owner.".

"(b) UNIT VII-D.—Before acquiring any lands or interest in land in Unit VII-D (as designated on the map referred to in the first section of this Act) the Secretary shall consult with the Commissioner of the Indiana Department of Transportation to determine what land or interests in land are required by the State of Indiana for improvements to Old Hobart Road and reconstruction and relocation of the intersection of Old Hobart Road and State Road 51 so that the acquisition by the Secretary of lands or interests in lands in Unit VII-D will not interfere with planned improvements to the interchange and Old Hobart Road in the area.".

SEC. 10. GREENBELT.

Section 18 of the Act (16 U.S.C. 460u-18) is amended—

(1) by inserting "(a)" after "SEC. 18."; and

(2) by adding at the end thereof the following new subsection:

"(b)(1) If Northern Indiana Public Service Company (referred to as 'NIPSCO') is agreeable, the Secretary shall enter into a memorandum of agreement with NIPSCO that shall provide for the following with respect to the area referred to as Unit II-A on the map described in the first section of this Act (referred to as the "Greenbelt"):

"(A) NIPSCO shall provide the National Park Service with access for resource management and interpretation through the Greenbelt and across the dike for purposes of a public hiking trail.

"(B) The National Park Service shall have rights of access for resource management, and interpretation of the Greenbelt area.

"(C) NIPSCO shall preserve the Greenbelt in its natural state. If NIPSCO utilizes the Greenbelt temporarily for a project involving pollution mitigation or construction on its adjacent facilities, it shall restore the project area to its natural state.

"(D) If NIPSCO proposes a different use for the Greenbelt NIPSCO shall notify the National Park Service, the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Energy and Natural Resources of the Senate and make no change in the use of the property until 3 years after the date notice is given.

"(2) If a memorandum of agreement is entered into pursuant to paragraph (1), so long as the memorandum of agreement is in effect and is being performed the Secretary may not acquire lands or interests in land in the Greenbelt belonging to NIPSCO.".

SEC. 11. VISITOR CENTER.

In order to commemorate the vision, dedication, and work of Dorothy Buell in saving the Indiana Dunes, the National Park Service visitor center at the Indiana Dunes National Lakeshore is designated as the "Dorothy Buell Memorial Visitor Center".

SEC. 12. AUTHORIZATION OF APPROPRIATIONS.

Section 9 of the Act (16 U.S.C. 460u-9) is amended—

(1) by inserting "(a)" after "SEC. 9.";

(2) in the first sentence of subsection (a), as designated by paragraph (1), by striking "20,000,000" and inserting "27,500,000"; and

(3) by adding at the end thereof the following new subsection:

"(b) Subject to the limitations provided in subsection (a) for development, there are authorized to be appropriated such sums as are necessary to carry out this Act.".

By Mr. AKAKA (for himself and Mr. INOUYE):

S. 2883. A bill directing the President to transfer funds for emergency aid to the Philippines; to the Committee on Appropriations.

EMERGENCY AID TO THE PHILIPPINES

● Mr. AKAKA. Mr. President, I rise today to introduce legislation providing dire emergency assistance to the Philippine people in the aftermath of Monday's devastating earthquake on Luzon Island. My bill would provide $20 million in dire emergency supplemental appropriations. $10 million would be for immediate relief to the victims of the earthquake. The remaining $10 million is added to the Philippine Assistance Program to help the stricken towns of Baguio and Cabanatuan regain their economic feet once relief efforts are complete.

The death toll from Monday's earthquake has risen to nearly 500 confirmed dead. The final figure undoubtedly will be much higher in light of the hundreds of people who are seriously injured or missing. Large areas of the hardest hit regions lie in ruin.

Many of the residents are without electricity, drinking water or food. Emergency supplies and equipment have run out. The United States responded to this tragedy quickly by releasing $25,000 in emergency funds to the Philippine Red Cross and dispatching rescue support equipment and supplies.

But given the extent of the devastation, the Philippine people are in dire need of additional assistance. Other nations such as Great Britain, The Netherlands, and Japan have already offered generous amounts of emergency aid.

It is my conviction that the United States should respond in kind. Mr. President, I know there are some who may hesitate at extending assistance to the Philippine people at a time when our Government is under severe budgetary constraint.

But there are reasons why the United States should go farther in providing relief to the Philippines in this time of emergency. The Philippines is America's most longstanding ally in Asia and we should help our friends when they are in trouble.

In the past several years the freely elected government of Corazon Aquino has struggled valiantly to revive democratic political institutions and to build a healthy market economy.

An event like Monday's earthquake is a heavy body-blow that could undermine the stability of the democratically elected government at a time when

it is very vulnerable to economic and insurgent pressures. We must act quickly by providing emergency monetary assistance.

This is an hour of great need in the Philippines. In short, Mr. President, both humanitarian and foreign policy interests dictate that the United States provide meaningful amounts of earthquake assistance to the Philippine Government.

The amount of aid proposed by my legislation is extremely modest in proportion to our overall Federal budget, but it would go a long way in providing urgently needed relief to the Philippine people.

Finally, I would like to appeal to all Americans to contribute generously to the many private relief efforts that are underway. I ask unanimous consent that a list of relief agencies printed in the July 18, 1990, Washington Post be printed in the RECORD.

There being no objection, the list of relief agencies was ordered to be printed in the RECORD, as follows:

[From the Washington Post, July 18, 1990]

WHERE TO SEND HELP

The following agencies are accepting cash donations for Philippine earthquake victims:

American Friends Service Committee, Philippines Earthquake Assistance, 501 Cherry St., Philadelphia, Pa. 19102. Call (215) 241-7141.

American Jewish Joint Distribution Committee, 711 Third Ave., 10th Floor, New York, N.Y. 10017. Call (212) 687-6200.

American Red Cross, Philippines Earthquake Disaster, P.O. Box 37243, Washington, D.C. 20013. Call (800) 842-2200.

Grassroots International, P.O. Box 312, Cambridge, Mass. 02139. Call (617) 497-9180.

International Medical Services for Health, 103 Loudon St. SW, Leesburg, VA. 22075. Call (703) 771-0011.

Operation USA, 7615½ Melrose Ave., Los Angeles, Calif. 90046. Call (213) 658-8876.

World Concern, P.O. Box 33000, Seattle, Wash. 98133. Call (206) 546-7201.

World Relief, P.O. Box WRC, Wheaton, Ill. 60187. Call (312) 665-0235.

World Vision, 919 W. Huntington Dr., Monrovia, Calif. 91016. Call (800) 423-4200.

Church World Service, Philippines Earthquake Response, P.O. Box 968, Ekhart, Ind. 46515. Call (219) 264-3102.

U.S. Committee for UNICEF, 333 E. 38th St., New York, N.Y. 10016. Call (212) 686-5522.

Catholic Relief Services, P.O. Box 17220, Baltimore, Md. 10304. Call (301) 625-2220.●

By Mr. KASTEN:

S. 2885. A bill to amend the Federal Deposit Insurance Act to require States in which the failure of State chartered savings associations has involved a disproportionately large share of the thrift resolution costs to pay a State thrift deposit insurance premium as a condition of future Federal deposit insurance; to the Committee on Banking, Housing, and Urban Affairs.

STATE THRIFT DEPOSIT INSURANCE PREMIUM ACT

● Mr. KASTEN. Mr. President, the multibillion dollar S&L bailout bill represents a massive wealth transfer from States with well-managed S&L's like Wisconsin States to high-flying and often fraudulent S&L speculators like Texas and California.

For example, one study found that every Wisconsinite will pay $592 for the cost of the S&L cleanup—and every Texan will receive $4,775. The study found that those who have caused 5 percent of the problem will pay for 47 percent of the solution, while those who have caused 72 percent of the problem will pay for only 6 percent of the solution.

This is patently unfair. Wisconsin should pay their fair share for the cost of the cleanup because we all benefit from Federal deposit insurance. But this outrageous mess is not Wisconsin's fault because our S&L's are well managed and conservatively run.

To be sure, the "moral hazard" of blanket deposit insurance coverage is the chief cause of this mess. The current system of deposit insurance provides no incentive for depositors to concern themselves with the soundness of risk-taking thrifts.

Wealthy speculators simply strung together bundles of $100,000 accounts—and chased the high interest rates offered by Texas and California thrifts. When these thrifts went bankrupt, the taxpayers picked up the tab—and the great income transfer from Wisconsin to Texas was underway.

A major contributing factor to the excessive costs of the bailout was the irresponsible State regulation of State-chartered thrifts in Texas and California. These thrifts were given the ability to participate in more risky activities, while paying the same deposit insurance premium as everyone else.

I am introducing legislation that has been sponsored by Representative HOWARD WOLPE in the House to bring some fairness to the taxpayers of Wisconsin and other Midwest States. This legislation would require States—like Texas and California—that have been responsible for the cost of bailout to pay a deposit insurance premium if their State-chartered thrifts continue to be covered by Federal deposit insurance.

This legislation sends a clear message to Texas legislators, regulators, and citizens who allowed their thrifts to engage in risky—and often fraudulent—activity. These extra premiums would help defray the cost of the bailout—and reduce the burden on taxpayers in Wisconsin.

I ask unanimous consent that the following documents and the text of the bill be entered in the RECORD:

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2885

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "State Thrift Deposit Insurance Premium Act of 1990".

SEC. 2. DETERMINATION OF STATE PREMIUMS FOR FEDERAL DEPOSIT INSURANCE.

Section 8(a) of the Federal Deposit Insurance Act (12 U.S.C. 1818(a)) is amended by adding at the end the following new paragraph:

"(11) DETERMINATION OF STATE PREMIUMS FOR FEDERAL DEPOSIT INSURANCE.—

"(A) CUMULATIVE DETERMINATIONS OF STATE RESOLUTION COSTS.—

"(i) IN GENERAL.—Except as provided in clause (ii), not later than 90 days after the end of each calendar year beginning with calendar year 1990, the Corporation shall determine the aggregate of the amounts expended during the period beginning on January 1, 1988, and ending at the end of such calendar year, in providing assistance for case resolutions and other assistance with respect to all institutions that were State chartered savings associations on or after January 1, 1988, and—

"(I) were then insured by the Federal Savings and Loan Insurance Corporation; or

"(II) are members of the Savings Association Insurance Fund,

"(ii) CALENDAR YEAR 1990.—The Corporation shall make the determination described in clause (i) with respect to amounts expended during calendar year 1990, on the later of the date which is 90 days after the end of such fiscal year, or the date of the enactment of this paragraph.

"(B) CUMULATIVE APPORTIONMENTS OF STATE RESOLUTION COSTS AMONG THE STATES.—After making the determination required by subparagraph (A) for any period, the Corporation shall apportion among the States the amount so determined, according to the amounts expended during such period in providing assistance for case resolutions and other assistance with respect to all institutions described in subparagraph (A) located in each respective State.

"(C) PREMIUMS REQUIRED FROM HIGH RISK STATES.—Each high risk State shall pay the Savings Association Insurance Fund an amount equal to—

"(i) the product of—

"(I) the current State percentage share of State resolution costs, minus 2 times the State percentage share of 1980 State deposits; and

"(II) 25 percent of the aggregate amount currently determined by the Corporation under subparagraph (A); minus

"(ii) the aggregate of the amounts previously paid by the State under this subparagraph, minus the aggregate of the rebates (if any) paid to the State under subparagraph (H).

"(D) HIGH RISK STATES.—A State is a high risk State for purposes of this paragraph if—

"(i) the current State percentage share of State resolution costs; exceeds

"(ii) 2 times the State percentage share of 1980 State deposits.

"(E) CURRENT STATE PERCENTAGE SHARE OF STATE RESOLUTION COSTS.—For purposes of this paragraph, the term 'current State per-

centage share of State resolution costs' means—

"(i) the amount currently apportioned to the State under subparagraph (B); divided by

"(ii) the amount currently determined under subparagraph (A).

"(F) STATE PERCENTAGE SHARE OF 1980 STATE DEPOSITS.—For purposes of this paragraph, the term 'State percentage share of 1980 State deposits' means—

"(i) the amount of deposits in 1980 in institutions described in subparagraph (A) located in the State; divided by

"(ii) the total deposits in 1980 in all institutions described in subparagraph (A).

"(G) PREMIUM PAYMENT TERMS.—

"(i) IN GENERAL.—Except as provided in clause (ii), the premium currently required of any State under subparagraph (C) shall be due at the end of the 6-month period beginning on the date the Corporation makes its current apportionment to the State under subparagraph (B).

"(ii) MULTIYEAR AGREEMENTS.—If the premium currently required of any State under subparagraph (C) exceeds $1,000,000,000, such State may enter into an agreement with the Secretary of the Treasury to pay such amount, with interest accruing in accordance with section 3717(a) of title 31, United States Code, over the 4-year period beginning on the date on which such premium would otherwise be due under clause (i), and such State shall be treated as meeting the requirements of this paragraph so long as such State is in compliance with the terms of such agreement.

"(H) PREMIUM REBATES.—If, with respect to a State, the result of the calculation described in subparagraph (C)(ii) exceeds the result of the calculation described in subparagraph (C)(i), the Secretary of the Treasury shall rebate such excess amount to the State, with interest accruing in accordance with section 3717(a) of title 31, United States Code.

"(I) TERMINATION of insurance if State fails to pay required premiums.—

"(i) IN GENERAL.—If any State fails to pay the premium required of such State under subparagraph (C), the Corporation shall terminate deposit insurance for State chartered financial institutions located in such State at the end of the 6-month period beginning on the date the premium was due under subparagraph (C).

"(ii) TRANSITION.—Notwithstanding clause (i), after termination of the insured status of any financial institution under this paragraph, the insured deposits of each depositor in such institution on the date of such termination, minus all subsequent withdrawals from any deposits of such depositor, shall continue to be insured for a period of 2 years and the financial institution shall continue to pay assessments to the Corporation as if the institution were an insured financial institution during such period.

"(J) NOTICE TO DEPOSITORS.—The Corporation shall require the financial institutions chartered by any State which fails to pay the premium required of such State under subparagraph (C) to notify the depositors in such institutions that—

"(i) the deposits made in such institution before the end of the 6-month period described in subparagraph (I)(i) will continue to be federally insured during the 2-year period beginning at the end of such 6-month period; and

"(ii) the deposits made in such institution after the end of such 6-month period will not be federally insured.

"(K) RESTORATION OF INSURANCE.—If the Corporation terminates deposit insurance for State chartered financial institutions in any State, such insurance may be restored by the Corporation only if such State has paid all of the premiums required of the State under this paragraph, with interest accruing in accordance with section 3717(a) of title 31, United States Code.".

U.S. total	[4] 16,000	0	16,000

[1] Determined by multiplying each State's 1989 share of the U.S. tax burden as determined by the Tax Foundation by $16,000 million.

[2] Assumes that "high risk" States choose to pay the State thrift deposit insurance premium so their State-chartered thrifts remain eligible for Federal deposit insurance.

[3] The State's thrift deposit insurance premium during this period would be $2,835 million. However, this premium would displace $172 million the State would have already paid, leaving a net impact of $2,663 million.

[4] Minimum amount the U.S. Treasury is obligated to spend to recapitalize SAIF. This number may be higher if thrift industry contributions do not reach $2 billion a year.●

By Mr. GLENN (for himself, Mr. GORE, Mr. AKAKA, and Mr. LIEBERMAN):

S. 2886. A bill to amend the Stewart B. McKinney Homeless Assistance Act to clarify the requirements regarding the use of unutilized, underutilized, surplus, and excess Federal buildings and real property to assist the homeless, and for other purposes; to the Committee on Governmental Affairs.

STEWART B. MCKINNEY HOMELESS ASSISTANCE AMENDMENTS

● Mr. GLENN. Mr. President, I rise today to introduce legislation which will reauthorize two programs under the Stewart B. McKinney Homeless Assistance Act and make changes in a third. This legislation is a critical part of Congress' effort to ensure the continued functioning of the Omnibus Act, a collection of programs that has proven to be very successful over the past 3 years.

But before I describe this legislation in a little more detail, I want to comment briefly upon the problem of homelessness and why I think the McKinney Act has come to be so important.

Mr. President, over the past 3 years, the homeless problem has become a festering sore on the social conscience of America. There is no escaping the hard facts—millions remain homeless or chronically vulnerable to the condition. Millions more teeter perilously on the edge of personal disaster leading directly to homelessness. Increasingly, the homeless are families, single mothers with children, rural Americans, many of whose relatives or friends are the only thing between them and the street. Studies and surveys all over the country are documenting a catastrophe of untold proportions—the birth of a permanent underclass, comprised of mothers and their children, sliding down the same hole of poverty into homelessness, from one generation to the next.

Yet, with all this proof now surfacing, all the alarm bells ringing, I have noted a growing disinterest in and even disdain for the homeless. I am not sure where or why this began. But I do know that we must resist it. We are a Nation of compassionate people—not blindly obedient to the tugs of voiceless guilt, but activist and spontaneous in response to human suffering. So we help, not only when we are asked, but also, and more often, when it just seems like the right thing to do. That is a hallmark of American society and one of its greatest contributions to the world at large.

And that is why we must take up anew the challenge to end homelessness in our country. The McKinney Act has proven no instant solution, nor should we believe that remedies will come easily and quickly. But neither should we accept, as some people have said, that things have gotten much better. I insist that we have simply decided to believe things have gotten better. How much easier it is to deny the problem, to pretend that the people who most need our help don't want it. That is not the situation on the streets and in the loneliest corners of America, Mr. President. We should know it and we must never forget it.

The ethic that pushed us to act once is pushing again. That is why I am speaking today. Three years ago the Congress passed and the President signed into law the Stewart B. McKinney Homeless Assistance Act. That measure, born in the hope that we finally had begun to define the homeless problem, has proven an excellent approach to a very difficult situation. Many, many lives have been touched by McKinney Act programs. Many more stand to benefit by the actions this body takes in reauthorizing those programs which are expiring this year.

Today I am introducing the Governmental Affairs contribution to that effort—the Stewart B. McKinney Homeless Assistance Amendments of 1990. This bill will reauthorize two McKinney programs—the Interagency Council on the Homeless and the FEMA [Federal Emergency Management Agency] Emergency Food and Shelter Program—and will make very important changes to a third, the title V Surplus Property Program. I would like briefly to describe each of the sections of this legislation.

The first section of the bill reauthorizes for 3 years the Interagency Council on the Homeless at a level of $1.2 million the first year and $1.3 million for each of the next two. Although it got off to a rather shaky start, the Council, according to reports from most quarters, has been steadily improving its performance. Its mission—to coordinate and provide information about McKinney Act programs—is critical in the overall success of the Act. Our Government Affairs hearing on the Council on July 19 bore out the need to reauthorize it.

The second section reauthorizes the FEMA Emergency Food and Shelter Program at $150 million for the next 3 fiscal years. This funding level is contained in the House version of this reauthorization and is supported by the entire National Board of Directors of the program. The Emergency Food and Shelter Program has been one of the most effective programs in the Act. Last year it distributed $126 million in aid, on a formula basis, to thousands of jurisdictions around the country. Funds allocated are used for anything from food and shelter repairs, to rent assistance and help in paying utilities. Witnesses at our hearing on July 19 also strongly supported this program.

Finally, the bill I am introducing will make important changes in the title V Surplus and Personal Property Program. Title V of the McKinney Act is supposed to ensure that suitable unutilized, underutilized, excess, and surplus government property is, whenever possible, made available for use as facilities to assist the homeless. Unfortunately, a good deal of confusion in that process, combined with bureaucratic slowness, has prevented many properties from being turned over. This legislation seeks to improve the process by adding some new deadlines for action, requiring better publicity on available properties, and clearly setting out the steps by which a property is applied for and acquired. The section makes no changes in the personal property part of title V, which has proven very successful in distributing millions of dollars of boots, blankets, vehicles, and so forth. Again, testimony received at our hearing on July 19 indicated a clear consensus on the need to amend this program.

Let's make no mistake about it, Mr. President. There are people who will go hungry tonight in America; people who will not have a place to stay. Most of them, perhaps well over 200,000 of whom are children, did not ask to be in such a predicament. We have a responsibility to speak and act in their behalf; to give back to them the only thing they may truly possess—our trust and solemn word to help. Certainly we can do that much. Certainly that is the least we can do.●

ADDITIONAL COSPONSORS

S. 160

At the request of Mr. THURMOND, the name of the Senator from Mississippi [Mr. COCHRAN] was added as a cosponsor of S. 160, a bill to require the construction of a memorial on Federal land in the District of Columbia or its environs to honor members of the Armed Forces who served in World War II and to commemorate United States participation in that conflict.

S. 656

At the request of Mr. GRASSLEY, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 656, a bill to amend the Internal Revenue Code of 1986 to restore the deduction for interest on educational loans.

S. 1140

At the request of Mr. MITCHELL, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 1140, a bill to provide that Federal facilities meet Federal and State environmental laws and requirements and to clarify that such facilities must

comply with such environmental laws and requirements.

S. 2034

At the request of Mr. BINGAMAN, the name of the Senator from Nebraska [Mr. KERREY] was added as a cosponsor of S. 2034, a bill to authorize the creation of a National Education Report Card to be published annually to measure educational achievement of both students and schools and to establish a National Council on Educational Goals.

S. 2158

At the request of Mr. PRYOR, the name of the Senator from Maine [Mr. MITCHELL] was added as a cosponsor of S. 2158, a bill to direct the Secretary of Health and Human Services to promulgate regulations to require that an individual telephoning the Social Security Administration has the option of accessing a Social Security Administration representative in a field office in the geographical area of such individual, and for other purposes.

S. 2307

At the request of Mr. RIEGLE, the name of the Senator from Hawaii [Mr. AKAKA] was added as a cosponsor of S. 2307, a bill to require the Secretary of Health and Human Services to provide intensive outreach and other services and protections to homeless individuals.

S. 2602

At the request of Mr. METZENBAUM, the name of the Senator from Vermont [Mr. JEFFORDS] was added as a cosponsor of S. 2602, a bill to amend the Public Health Service Act to provide assistance for biomedical and health services research, treatment programs and for other purposes relating to Alzheimer's disease and related disorders.

S. 2813

At the request of Mr. GRAHAM, the names of the Senator from Alaska [Mr. MURKOWSKI] and the Senator from Utah [Mr. HATCH] were added as cosponsors of S. 2813, a bill to authorize the minting of commemorative coins to support the training of American athletes participating in the 1992 Olympic games.

SENATE JOINT RESOLUTION 284

At the request of Mr. BYRD, the names of the Senator from California [Mr. CRANSTON] and the Senator from Maryland [Mr. SARBANES] were added as cosponsors of Senate Joint Resolution 284, a joint resolution to designate the week beginning September 16, 1990 as "National Give the Kids a Fighting Chance Week."

SENATE JOINT RESOLUTION 335

At the request of Mr. JOHNSTON, the name of the Senator from Idaho [Mr. MCCLURE] was added as a cosponsor of Senate Joint Resolution 335, a joint resolution designating July 1, 1990, as "Imported Oil Dependence Day."

SENATE JOINT RESOLUTION 351

At the request of Mr. BYRD, the names of the Senator from Hawaii [Mr. INOUYE] and the Senator from Virginia [Mr. WARNER] were added as cosponsors of Senate Joint Resolution 351, a joint resolution to designate the month of May 1991, as "National Trauma Awareness Month."

SENATE RESOLUTION 311—ORIGINAL RESOLUTION REPORTED RELATIVE TO THE SELECT COMMITTEE ON ETHICS INVESTIGATION OF SENATOR DAVID F. DURENBERGER

Mr. HEFLIN, from the Select Committee on Ethics, reported the following original resolution; which was placed on the calendar:

S. RES. 311

Resolved, That the conduct of Senator Durenberger in connection with his arrangement with Piranha Press, his failure to report receipt of travel expenses in connection with his Piranha Press and Boston area appearances, his structuring of real estate transactions and receipt of Senate reimbursements in connection with his stays in his Minneapolis condominium, his pattern of prohibited communications respecting the condominium, his repeated acceptance of prohibited gifts of limousine service for personal purposes, and the conversion of a campaign contribution to his personal use, has been reprehensible and has brought the Senate into dishonor and disrepute;

That Senator Durenberger knowingly and willingly engaged in conduct which was in violation of statutes, rules and Senate standards and acceptable norms of ethical conduct;

That Senator Durenberger's conduct was clearly and unequivocally unethical, and;

That, therefore, pursuant to article 1, section 5, clause 2 of the United States Constitution and Senate Resolution 338 of the 88th Congress, as amended, Senator David Durenberger be, and hereby is:

(1) denounced by the United States Senate;

(2) referred to the Republican Party Conference for attention; and

(3) directed to reimburse $29,050 plus interest to the Senate; and to pay to charities with which he has no affiliation $93,730, less State and Federal taxes previously paid on the amount, in excess honoraria improperly retained during 1985 and 1986, such payments to be made at the regular intervals over the balance of his United States Senate term.

AMENDMENTS SUBMITTED

FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT

BRADLEY (AND OTHERS) AMENDMENT NO. 2314

Mr. BRADLEY (for himself, Mr. ROTH, Mr. MOYNIHAN, Mr. CHAFEE, Mr. REID, Mr. RUDMAN, Mr. LAUTENBERG, Mr. PELL, Mr. BRYAN, and Mr. KERRY) proposed an amendment to the bill (S. 2830) to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes, as follows:

Beginning on page 310, strike line 1 and all that follows through page 312, line 11, and insert the following:

"SEC. 206. SUGAR PRICE SUPPORT FOR 1991 THROUGH 1995 CROPS.

"(a) IN GENERAL.—The price of each of the 1991 through 1995 crops of sugar beets and sugarcane, respectively, shall be supported in accordance with this section.

"(b) SUGARCANE.—The Secretary shall support the price of domestically grown sugarcane through nonrecourse loans at such level as the Secretary determines appropriate, but not less than 16 cents per pound for raw cane sugar, except that the level may be increased under subsection (d).

"(c) SUGAR BEETS.—The Secretary shall support the price of domestically grown sugar beets through nonrecourse loans at such level as the Secretary determines is fair and reasonable in relation to the loan level for sugarcane.

"(d) INCREASE IN SUPPORT PRICE.—

"(1) IN GENERAL.—The Secretary may increase the support price for each of the 1991 through 1995 crops of domestically grown sugarcane and sugar beets from the price determined for the preceding crop based on such factors as the Secretary determines appropriate, including changes (during the 2 crop years immediately preceding the crop year for which the determination is made) in the cost of sugar products, the cost of domestic sugar production, and other circumstances that may adversely affect domestic sugar production.

"(2) REPORT.—If the Secretary makes a determination not to increase the support price under subparagraph (A), the Secretary shall submit a report containing the findings, decision, and supporting data for the determination to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

"(e) ANNOUNCEMENTS.—The Secretary shall announce the loan rate to be applicable during any fiscal year under this section as far in advance of the beginning of that fiscal year as is practicable consistent with the purposes of this section.

"(f) TERM.—Loans under this section during any fiscal year shall be made available not earlier than the beginning of the fiscal year and shall mature before the end of the fiscal year.

"(g) CROPS.—Notwithstanding any other provision of law, this section shall be effective only for the 1991 through 1995 crops of sugar beets and sugarcane.".

BOSCHWITZ AMENDMENT NO. 2315

Mr. BOSCHWITZ proposed an amendment to the bill S. 2830, supra, as follows:

On page 87, line 15, strike "40 percent" and insert "50 percent".

On page 87, line 23, strike "40 percent" and insert "50 percent".

On page 136, line 17, strike "25 percent" and insert "30 percent".

On page 136, line 23, strike "12.5 percent" and insert "10 percent".

On page 137, line 1, strike "25 percent" and insert "30 percent".

On page 137, line 6, strike "12.5 percent" and insert "10 percent".

CONRAD (AND OTHERS) AMENDMENT NO. 2317

Mr. LEAHY (for Mr. CONRAD, for himself, Mr. BAUCUS, and Mr. DASCHLE) proposed an amendment to the bill S. 2830, supra, as follows:

On page 557, between lines 10 and 11, insert the following new subtitle:

Subtitle F—Noxious Weed Management

SEC. 1271. SHORT TITLE.

This subtitle may be cited as the "Noxious Weed Management Act of 1990".

SEC. 1272. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds that—

(1) noxious weeds and undesirable plants are—

(A) contaminating Federal, State, and private lands by taking over and encroaching on desirable plant species;

(B) degrading air, land, and water resources by increasing soil erosion and decreasing native ground cover;

(C) spreading on Federal, State, and private lands;

(D) causing wildlife habitats to be degraded to the detriment of wildlife populations;

(E) causing human health hazards through the spread of pollen, insects, and disease;

(F) costing farmers and ranchers miilions of dollars in lost crops and range land; and

(G) displacing the native vegetation in the area that such weeds are present and thus having a considerable impact on domestic animals and wildlife foraging in such areas;

(2) unless noxious weeds and undesirable plants are prevented, controlled, or contained, they will—

(A) increase expotentially, causing further contamination and deterioration of wildlife habitat, recreational resources, and aesthetic values;

(B) increase soil, water, and contamination hazards;

(C) have a detrimental effect on human health; and

(D) further eliminate native species of vegetation;

(3) even though there are numerous laws addressing the stewardship and management of Federal lands, those laws do not directly or effectively deal with the management of noxious weeds and undesirable plants on Federal lands;

(4) the total eradication of noxious weeds is impossible, therefore resources should be used to develop measures that will decrease the number of noxious weeds and undesirable plants to an acceptable level;

(5) concerns about reducing ground water contamination and environmental impact argue in favor or a more ecologically sound approach to resolving noxious weed problems;

(6) in order to control and manage noxious weeds and undesirable plants, the focus must be on an integrated management plan; and

(7) comprehensive, national noxious weed management will—

(A) protect the environment by preventing the degradation of air, land, and water resources, and reduce soil erosion through the prevention of the introduction and containing the spread of noxious weeds and undesirable plants on Federal lands;

(B) improve the protection of recreation uses and aesthetic values on Federal lands by reducing the risk of the transfer of noxious weeds and undesirable plants from one area to another;

(C) improve the habitat for wildlife and domestic animals on Federal lands by reducing the spread of undesirable plants that are detrimental to desirable vegetation;

(D) protect threatened and endangered species listed as such under the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.) by reducing the infestation of noxious weeds and undesirable plants in protected ecosystems;

(E) provide for the management, development, and enhancement of Federal lands by protecting those lands from the continuing spread of noxious weeds and undesirable plants; and

(F) promote coordination, control, and educational efforts at the regional, State, and local level.

(b) PURPOSE.—It is the purpose of this Act to—

(1) establish and implement a national comprehensive management program to prevent and control undesirable plant species on Federal lands and maintain practices that achieve the control of noxious weeds on such lands; and

(2) establish and implement a national noxious weed management coordination program.

SEC. 1273. DEFINITIONS.

As used in this subtitle:

(1) COOPERATIVE AGREEMENT.—The term "cooperative agreement" means a written agreement between a Federal and a State agency.

(2) EXOTIC PLANT.—The term "exotic plant" means a plant species that—

(A) is not indigenous to the United States nor native to the plant community in which it is found; and

(B) may possess one or more of the following—

(i) it aggressively invades or is detrimental to native plant communities or crops;

(ii) it is poisonous to livestock;

(iii) it is of little economic value;

(iv) it colonizes disturbed habitats;

(v) it is a carrier of determinal inserts, diseases, or parasites;

(vi) its presence is detrimental to sound management of native or agricultural ecosystems; and

(vii) it threatens fish, wildlife, or endangered species.

(3) FEDERAL AGENCY.—The term "Federal agency" means a department, agency, or bureau of the Federal Government that is responsible for administering or managing Federal lands under its jurisdiction.

(4) FEDERAL LANDS.—The term "Federal lands" means lands managed by or under the jurisdiction of the Federal Government, except those lands on which the activities authorized under this subtitle are precluded by Federal law.

(5) INTEGRATED MANAGEMENT SYSTEM.—The term "integrated management system" means a system for the planning and implementation of a program using an interdisciplinary approach to select methods for preventing, controlling, or containing undesirable plants through the use of all judicious and environmentally safe methods, including—

(A) education;

(B) preventive measures;

(C) physical or mechanical methods;

(D) biological agents;

(E) herbicide methods;

(F) cultural methods; and

(G) general land management practices, such as manipulation of livestock or wildlife grazing strategies or improving wildlife or livestock habitats.

(6) INTERDISCIPLINARY APPROACH.—The term "interdisciplinary approach" means an approach to making decisions regarding the prevention, containment, or control of noxious weeds and undesirable plants that—

(A) includes the participation of personnel from Federal or State administrative agencies with experience in areas including weed science, range science, wildlife biology, land management, ecology, and forestry; and

(B) includes the consideration of—

(i) the most efficient and effective methods of preventing, containing, or controlling undesirable plants to achieve optimum management with the least possible environmental damage;

(ii) scientific evidence and current technology;

(iii) the physiology and habitat of a plant species; and

(iv) the economic, social, and ecological consequences of implementing the programs established under this subtitle.

(7) NOXIOUS PLANT.—The term "noxious plant" has the same meaning given the term "noxious weed" under section 3(c) of the Federal Noxious Weed Act of 1974 (7 U.S.C. 2802(c)) and includes all noxious plant species listed on the Federal or State noxious weed list.

(8) STATE AGENCY.—The term "State agency" means the State Department of Agriculture, or any political subdivision thereof, or other appropriate State agency or political subdivision thereof as designated by the chief executive officer.

(9) UNDESIRABLE PLANT SPECIES.—The term "undesirable plant species" means plant species that are classified as undesirable, noxious, exotic, injurious, or poisonous, pursuant to State or Federal law. A designation of undesirable plants under this section shall be limited by the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.), and shall not include plants indigenous to an area where control measures are to be taken under this section.

CHAPTER 1—NATIONAL UNDESIRABLE PLANT MANAGEMENT PROGRAM

SEC. 1274. MANAGEMENT OF UNDESIRABLE PLANTS ON FEDERAL LAND.

Each Federal agency shall—

(1) designate a specific office, and an individual who is adequately trained in the management of undesirable plant species, to develop and coordinate a program for the management of undesirable plant species on Federal lands that are under the jurisdiction of that agency;

(2) establish a program to manage undesirable plant species on a continuing basis;

(3) enter into and implement cooperative agreements with State and local agencies, when appropriate, regarding the management of undesirable plant species on Federal lands that are under the jurisdiction of that agency;

(4) establish integrated management systems using an interdisciplinary approach to prevent, control, or contain undesirable plant species targeted under cooperative agreements entered into under paragraph (3); and

(5) complete an environmental assessment or environmental impact statement that

may be required under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and implement the plant prevention, control, or containment activities under this section not later than 1 year after the date on which the agency ascertains that the preparation of such assessment or statement is necessary.

SEC. 1275. COOPERATIVE AGREEMENTS WITH STATE AGENCIES.

(a) IN GENERAL.—A Federal agency shall, where appropriate, enter into cooperative agreements under section 1274(3), when requested by State and local agencies, to coordinate the management of undesirable plant species on Federal lands under the jurisdiction of that Federal agency.

(b) CONTENTS.—A cooperative agreement entered into under subsection (a) shall—

(1) prioritize and target undesirable plant species to be prevented, controlled, or contained within a specific geographic area;

(2) describe an integrated management system to be used to prevent, control, or contain the targeted undesirable plant species; and

(3) detail the means of implementing such an intergrated management system, define the duties of the Federal and State agency in implementing such systems, and establish a time frame for the initiation and completion of the tasks specified in such integrated management systems.

CHAPTER 2—NATIONAL NOXIOUS WEED MANAGEMENT COORDINATION PROGRAM

SEC. 1276. NOXIOUS WEED MANAGEMENT COORDINATION PROGRAM.

(a) NATIONAL NOXIOUS WEED MANAGEMENT COUNCIL.—

(1) ESTABLISHMENT.—The Secretary of Agriculture and the Secretary of the Interior shall jointly establish a National Noxious Weed Management Council that shall take such actions as may be necessary to coordinate the national control, research, and educational efforts associated with Federal, State, and locally designated noxious weeds.

(2) REGIONAL COMMISSIONS.—

(A) AUTHORITY.—The National Noxious Weed Management Council is authorized to establish such regional commissions as may be necessary to assist the Council in carrying out this subtitle.

(B) COMPOSITION.—A regional commission established under subparagraph (A) shall be composed of—

(i) two regional representatives of the Department of Agriculture;

(ii) two regional representatives of the Department of the Interior;

(iii) one regional representative of the Army Corps of Engineers; and

(iv) not more than seven representatives of State and local governments involved in weed management activities, including representatives for agriculture, wildlife management, and health.

(C) DUTIES.—A regional commission established under subparagraph (A) shall—

(i) identify regional priorities with respect to noxious weed management;

(ii) make recommendations to the National Noxious Weed Management Council concerning noxious weed management;

(iii) coordinate noxious weed management using an interdisciplinary approach, regional research, training, technical assistance, and requests for funding;

(iv) assist in the development of regional technical guides for noxious weed management; and

(v) prepare and submit, on not less than an annual basis, to the National Noxious Weed Management Council a report on regional control, research, and education concerning noxious weed management.

(3) COORDINATION.—The National Noxious Weed Management Council shall coordinate the regional commissions established under paragraph (2) and facilitate the transfer of information among such regional commissions.

(4) SUPPORT SERVICES.—The Secretary of Agriculture and the Secretary of the Interior may provide to each regional commission established under paragraph (2) such administrative and technical support services as necessary for the effective functioning of such regional activities.

(b) ADMINISTRATIVE PROVISIONS RELATING TO REGIONAL COMMISSIONS.—

(1) COMPENSATION.—The members of a regional commission established under subsection (a)(2) shall receive no additional pay, allowances or benefits by reason of such members service to the regional commission.

(2) CHAIRMAN.—The members of a regional commission shall select a chairman from among the members of the regional commission.

(3) AREA.—Each regional commission shall meet in the geographical area of the regional commission at the call of the chairman of such commission or at the request of a majority of the members of such commission.

SEC. 1277. NOXIOUS WEED MANAGEMENT COST SHARING.

(a) GRANTS.—The National Noxious Weed Management Council, in consultation with the regional commissions established under subsection 1276(a)(2), may provide grants to State and local agencies to enable such agencies to manage noxious weeds and to provide cost sharing incentives to local private landowners for the management of noxious weeds.

(b) ELIGIBILITY.—To be eligible to receive assistance from the National Noxious Weed Management Council for the management of noxious weeds, a State or local agency shall—

(1) maintain staff that is adequately trained in the management of noxious weeds;

(2) develop and coordinate a program of noxious weed management in consultation with the regional commissions established under section 1276(a)(2); and

(3) ensure that a majority of the landowners in the area will participate in a noxious weed management program.

SEC. 1278. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as may be necessary in each of fiscal years 1991 through 1995 to carry out this subtitle.

On page 557, line 11, strike out "Subtitle F" and insert in lieu thereof "Subtitle G".

On page 557, line 12, strike out "1271" and insert in lieu thereof "1281".

On page 558, line 7, strike out "1272" and insert in lieu thereof "1282".

On page 560, line 1, strike out "1273" and insert in lieu thereof "1283".

On page 562, line 7, strike out "1274" and insert in lieu thereof "1284".

On page 569, line 12, strike out "1275" and insert in lieu thereof "1285".

On page 570, line 4, strike out "1276" and insert in lieu thereof "1286".

On page 574, line 21, strike out "1277" and insert in lieu thereof "1287".

BURNS AMENDMENT NOS. 2318 AND 2319

Mr. LEAHY (for Mr. BURNS) proposed two amendments to the bill S. 2830, supra, as follows:

In S. 2830, on page 676, line 12, insert the following new section:

"SEC. 1427. ALTERNATIVE USES FOR AGRICULTURAL PRODUCTS.

"(a) The Secretary of Agriculture is encouraged to conduct a study on new uses for traditional and alternative agricultural products and, within 6 months, and annually thereafter, after the date of enactment of this Act, submit to the Congress a report on such study.

"(b) The annual studies shall include—

"(1) a review of existing alternative uses for traditional and alternative crop both here and abroad; and

"(2) a strategy for research in new uses for traditional and alternative agricultural products within the national land grant college system".

In S. 2830, on page 671, line 7, insert the following:

(c) The Secretary of Agriculture is encouraged to conduct a study on the impact of rangeland carrying capacity during drought and, within 1 year after the date of enactment of this Act, submit to the Congress a report on such study.

(d) The study shall include—

(1) a review of existing rangeland drought research here and abroad; and

(2) a strategy for the establishment of a national rangeland drought research program, involving international, Federal, State and local agencies.

McCONNELL AMENDMENT NO. 2320

Mr. LEAHY (for Mr. MCCONNELL) proposed an amendment to the bill S. 2830, supra, as follows:

At the appropriate point in the bill, add the following:

Section 5.17(a) of the Farm Credit Act of 1971 is amended by deleting paragraph (13).

Section 5.19(a) of the Farm Credit Act of 1971 is amended by adding after the third sentence the following:

"Examinations of banks shall include an analysis of the compensation paid to the chief executive officer and the salary scales of the employees of the bank."

GLENN AMENDMENT NO. 2321

Mr. LEAHY (for Mr. GLENN) proposed an amendment to the bill S. 2830, supra, as follows:

On page 737, lines 21 and 22, strike out "for each of the fiscal years 1994 and 1995" and insert in lieu thereof "for fiscal year 1994, and $500,000,000 for fiscal year 1995".

DASCHLE (AND PRESSLER) AMENDMENT NO. 2322

Mr. LEAHY (for Mr. DASCHLE, for himself and Mr. PRESSLER, Mr. BOSCHWITZ, and Mr. GRASSLEY) proposed an amendment to the bill S. 2830, supra, as follows:

STORAGE PAYMENTS.—

(1) On page 349 of S. 2830 (as amended by amendment No. 2303), strike lines 15 through 25 and insert the following:

"In making storage payments to producers under section 110 of the Agricultural Act of 1949 (7 U.S.C. 1445e) and to commercial warehouses under the authority contained in the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.), the Commodity Credit Corporation and the Secretary of Agriculture shall, to the extent practicable, ensure that the rates of the storage payments made to producers are equivalent to average rates paid for commercial storage, taking into account the current demand for storage for commodities, efficiency, location, regulatory compliance costs, bonding requirements, and impact of user fees as determined by the Secretary, except that the rates paid to producers and commercial warehouses shall be established at rates that will result in no increase in current or projected combined outlays of the Commodity Credit Corpration for the storage payments made to producers and commercial warehouses as a result of the adjustment of storage rates under this section.

KERREY (AND HATFIELD) AMENDMENT NO. 2323

Mr. PRYOR (for Mr. KERREY, for himself, and Mr. HATFIELD) proposed an amendment to the bill S. 2830, supra, as follows:

In S. 2830, on page 361, line 16, before ".", insert the following provision: ", including policies to reduce measurably hunger and malnutrition through efforts such as establishing and institutionalizing supplemental nutrition programs targeted to reach those who are nutritionally at risk".

On page 417, line 15, after "security" insert ", including nutrition,".

On page 418, line 10, after "security" insert ", including nutrition,".

LUGAR AMENDMENT NO. 2324

Mr. LUGAR proposed an amendment to the bill S. 2830, supra, as follows:

At the appropriate place at the end of title XVII, add the following new section:

SEC. 17 . MARKETING ORDERS.

Section 8e of the Agricultural Adjustment Act (7 U.S.C. 608e-1), is amended, by—

(1) striking "(a) Notwithstanding any other provision of law," in the first sentence, and inserting in its place "(a) Subject to the provisions of subsection (c) and notwithstanding any other provision of law,";

(2) adding at the end thereof the following new subsection:

"(c) Prior to any import prohibition or regulation under this section being made effective with respect to any commodity—

"(1) the Secretary of Agriculture shall notify the U.S. Trade Representative of such import prohibtion or regulation;

"(2) the U.S. Trade Representative shall determine, and submit in writing to the Secretary of Agriculture, that the application of the grade, size, quality, and maturity provisions, of the relevant marketing order, or comparable restrictions, to imports are not inconsistent with U.S. international obligations under any trade agreement, including the General Agreement on Tariffs and Trade; and

"(3) if the U.S. Trade Representative does not submit a determination under paragraph (2) within 30 days of the notification under paragraph (1), the Secretary may proceed with the proposed prohibition or regulation.".

NOTICES OF HEARINGS

COMMITTEE ON SMALL BUSINESS

Mr. BUMPERS. Mr. President, I would like to announce that the Small Business Committee will hold a full committee hearing on Wednesday, August 1, 1990, to examine the impact on small business of proposed legislation regarding estate tax freezes and capital gains. The hearing will be held in room 428A of the Russell Senate Office Building and will commence at 9:30 a.m. For further information, please call Marja Maddrie at 224-5175, or Matthew Helmerich at 224-4721.

SUBCOMMITTEE ON WATER AND POWER

Mr. BRADLEY. Mr. President, I would like to announce for the public that a bill has been added to the hearing before the Subcommittee on Water and Power of the Senate Committee on Energy and Natural Resources rescheduled to take place Tuesday, July 24, 1990, at 10 a.m., in room SD-366 of the Dirksen Senate Office Building, Washington, DC. In addition to S. 2807, the Grand Canyon Protection Act, the subcommittee will also receive testimony on S. 1556, a bill to designate the Salt-Gila aqueduct of the Central Arizona Project as the "Fannin-McFarland Aqueduct."

For further information, please contact Tom Jensen, counsel for the subcommittee at (202) 224-2366.

SUBCOMMITTEE ON ENERGY REGULATION AND CONSERVATION

Mr. WIRTH. Mr. President, I would like to announce for the public that the hearing scheduled before the Subcommittee on Energy Regulation and Conservation on July 30, 1990, has been rescheduled, and will take place on August 2, 1990, beginning at 9:30 a.m., with an afternoon session beginning at 2 p.m.

The hearing will take place in room SD-366 of the Senate Dirksen Office Building in Washington, DC.

The purpose of the hearing is to consider legislation to promote energy production through the use of waste and recoverable materials.

For further information, please contact Allen Stayman or Joel Saltzman, at (202) 224-4756.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON MEDICARE AND LONG-TERM CARE

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Medicare and Long-Term Care of the Committee on Finance be authorized to meet during the session of the Senate on July 20, 1990, at 9:30 a.m. to hold a hearing on S. 1766, the Patient Self-Determination Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet on Friday, July 20, at 10 a.m. for a hearing on pending nominations within the committee for associate judges of the Superior Court.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate on Friday, July 20, 1990, at 10 a.m. to conduct a hearing on the nomination of Constance Horner to be a member of the Board of Directors of the National Cooperative Bank for a term of 3 years.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON EAST ASIAN AND PACIFIC AFFAIRS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on East Asian and Pacific Affairs of the Committee on Foreign Relations be authorized to meet during the session of the Senate on Friday, July 20, at 9:30 a.m. to hold a hearing on the Cambodian peace negotiations: Prospects for a settlement.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON NUTRITION AND INVESTIGATIONS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Nutrition and Investigations of the Senate Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Friday, July 20, 1990, at 10 a.m. to hear testimony on the economic concentration of ownership in the meatpacking industry.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON LABOR AND HUMAN RESOURCES

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Friday, July 20, at 10 a.m., for a hearing on the nomination of Julian De La Rosa to be inspector general, Department of Labor.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE CIVIL RIGHTS ACT OF 1990

● Mr. NUNN. Mr. President, all Americans should be protected against discrimination based on race, color, sex, religion, or national origin. In reaction

to a potential threat to these rights, the Senate has passed the Civil Rights Act of 1990 to overturn several recent Supreme Court decisions in the area of employment discrimination. These decisions make it more difficult for employees to challenge discriminatory practices. To confront the inequity of these Court rulings, I believe that a revision of our civil rights laws is necessary.

While I have supported overturning the Wards Cove, Patterson, and other cases in concept for some time, I did not cosponsor the bill because of my concerns about the original bill's potential impact on businesses in general, and small businesses in particular. I was concerned about the potential for the creation of either explicit or implicit hiring quotas. I was equally concerned about the greatly increased provision for damages encouraging frivolous lawsuits.

The bill passed by the Senate on Wednesday was significantly changed from the original bill introduced in February of this year. I believe that a great deal of progress in addressing these concerns has been made in the past few weeks' negotiations. I commend my colleagues for their efforts on this most important issue. In particular, I want to commend the efforts of Senators BOREN, BUMPERS, PRYOR, DECONCINI, DANFORTH, JEFFORDS, and others in reaching an understanding with the manager of the bill, Senator KENNEDY, about issues of mutual concern.

I believe that the modifications that have been made by Senators KENNEDY and JEFFORDS with regard to the business necessity definition improve the bill. I also believe that the modifications made in this area will prevent this legislation from becoming a "quota bill." I support the amendment offered by Senator DECONCINI which states clearly that this bill should not "be construed to require an employer to adopt hiring or promotion quotas."

The resolution of the business necessity definition is most important as this is the key to avoiding the quota threat issue. This definition represents the legal standard that employers must meet when their hiring practices are challenged. Under the bill and under the law before the Wards Cove case, once an employee has shown that a hiring practice or group of practices operates to have a discriminatory impact on minorities or women, the burden then shifts to employers to prove that a practice with a disparate impact was justified by a business necessity.

The definition of business necessity has been modified on two occasions since the introduction of this legislation. It started out as "essential to effective job performance." Responding to arguments that this standard was unduly stringent, Senators KENNEDY and DANFORTH prepared an amendment which would have changed the definition to "bears a substantial and demonstrable relationship to effective job performance." Prior to passage of the legislation, the sponsors responded to suggestions from the White House and others and modified the definition again and it now reads that a challenged practice or group of practices "must bear a significant relationship to successful performance of the job." At each of these steps in the negotiations, the employers' standard of proof was lessened. All of these changes were made in order to accommodate the legitimate concerns of the business community.

Two other important issues will be addressed in conference: Statistical imbalances and jury awards. Amendments which I cosponsored on both of these areas were offered, but because of a procedural objection by the Republican leader, they were not included in the bill as passed.

The first amendment was offered by Senator PRYOR regarding statistical imbalances. Because of my concerns about the bill's implicit encouragement of quotas, I have worked with Senator PRYOR and others to clarify that mere statistical imbalances alone in an employers' work force will not be a violation of the act. We have been assured that the Pryor amendment will be included in the conference report. Also, we clarified that this legislation will not apply to small businesses which employ 15 or fewer employees—consistent with the 1964 Civil Rights Act.

Second, I also support the jury awards cap that Senators BOREN, BUMPERS, and others have proposed. In cases where intentional discrimination is proved, employees will be able to seek compensatory and punitive damages. However, punitive damages shall not exceed the amount of compensatory damages or $150,000, whichever is greater. The managers of this legislation have assured the Senate that they will take this issue to conference and work for its inclusion.

Because I was assured that these two concerns will be addressed in conference, I voted for the bill's final passage. I will carefully review the conference report before voting on its approval to ensure the resolution of these two important issues.

I believe that the Senate acted properly in passing this legislation to ensure fundamental protections against employment discrimination. It is my hope that a bill will emerge from the conference committee that both the House and Senate can approve and the President will sign.●

THE PASSING OF JOHN BIGGS

● Mr. GORTON. Mr. President, the people of Washington State on Saturday, June 23, lost a great friend and leader. John Biggs, former director of the State departments of game and ecology, died at the age of 77.

Biggs' 19-year tenure as director of game was the longest of any game director in the Nation. He left the post to become the first director of Washington's Department of Ecology. In that role, he had to pull together various departments, with different operating styles and messages, into one cohesive group. The enthusiasm that Biggs put into ecology has been carried on for two decades. His vision of business, industry, and the environment coexisting with one another is exemplified through his creation of the Nation's first recycling program, which gave the opportunity to forge ties with State and local business leaders for the benefit of Washington's environment.

Washington residents were indeed fortunate to have had John Biggs lead the way in helping protect and preserve their rich and varied natural resources. His vision, commitment, and leadership will long be remembered.●

A TRIBUTE TO AARON COPLAND

● Mr. KERRY. Mr. President, I rise today to honor Aaron Copland, the preeminent and prolific American composer. Often referred to as the President of American music," Aaron Copland is an American institution.

Bestowed with virtually every accolade that can be awarded in a lifetime; from the Pulitzer-Prize to an Oscar, from the Medal of Freedom to the Congressional Gold Medal, Copland is enormously accomplished. He has composed operas, ballets, film scores, chamber music, as well as orchestral, choral, and keyboard arrangements. He taught poetry at Harvard and took up conducting when he was well into his fifty's. However, to think of Aaron Copland is not to think of a litany of accomplishments and accolades. Rather, it is to think of American music.

Copland saw this country as his greatest musical inspiration. He remarked once "I can't say that I went around thinking about creating an American sound; what I wrote was just the way I heard things. I connect American sentiment with a certain reserve in its expression rather than something that carries its bleeding heart all over the place." It is clear his view of the world was shaped by living above the family store on Washington Avenue in Brooklyn, NY, during the early 1900's—and it never left him. Years later, following a trip to one of the markets in Tangier, Copland remarked to his traveling companion "I have seen this all on President's Street in Brooklyn."

Whether it is "Appalachian Spring," "Billy the Kid," or "Fanfare for the Common Man," Copland's music transcends time and boundaries. His music is a reflection of the American century and its people. Richard Dyer of the Boston Globe wrote of Copland's music "Some of it sounds French, some Latin, some American. Some of it is high-minded, some of it serious, some of it very funny. Some of it evokes New England; the most famous evokes the Old West. . . (and) maybe only Midwesterners will know how fully the opera 'The Tender Land' realizes that place." "Some as comfortable as a summer evening on the back porch . . . at various times it evokes both urban elan and urban loneliness . . . all it takes is a few bars of 'Coplandesque' music to evoke whole eras and areas of our history."

To hear Copland's music today is to evoke memories of an America we believe may no longer exist but in our minds. From the urban hum of our cities to the silent fields in the countryside; from the loneliness of a single soul lost in the bustle of the city to the isolation of Appalachia; from the swelling of pride that comes with a job well done, a shared joy, or a flag passing by in a parade, this is still America. We are a land that still possesses countless noble acts, endless dreams, and quiet aspirations. We are a country that still wants to do better and tries to do so. We are a people that still believes that we can leave things better than we inherited them. That is Aaron Copland's timeless music. And that is still America.

Virgil Thomson, a colleague of Copland's, once called him "the voice of America in our generation." For us, Aaron Copland will always be the voice of all generations in America.●

DOMINIC JACOBETTI, UPPER PENINSULA LEADER IS 70

● Mr. LEVIN. Mr. President, I rise today to pay tribute to Michigan's longest-serving State representative as he celebrates his 70th birthday.

Dominic Jacobetti grew up in Negaunee, MI, where his Italian immigrant parents found work in the Upper Peninsula mines. When he began working in the mines himself, his mother advised him to join the union because it was "for the people." Dom went on to become president of United Steelworkders Local 2867 and later USW Local 4950.

Dom has worked tirelessly for the Upper Peninsula since his election to the Michigan House of Representatives in 1954. He has been chairman of the House Appropriations Committee since 1975. He has remained a fervent advocate for the Upper Peninsula of Michigan, for youth work programs and for helping the poor and helpless throughout his 36 years in the House.

Dom and his wife, Marie, are active with their three children, their spouses, and their 11 grandchildren. I'm sure there are few State or Federal legislators known for standing on their roofs in red Santa Claus costumes lowering Chirstmas gifts down the chimney. And who else but Dom Jacobetti, after all of his years in Lansing, would list his proudest moment as that time in 1938 when as captain and quarterback of the Negaunee St. Paul Catholic High School, he led his team to triumph over Pequaming.

State Senator Joe Mack, his colleague of 30 years, describes Dominic Jacobetti as "100 percent U.P. * * * (everything) the public could possibly expect from a man to represent them in the legislative halls."

Dom's love of people has provided the Upper Peninsula with a servant unparalleled in Michigan history. I join the people of our State to wish the best to Dominic Jacobetti.●

CHARLESTON'S WAR ON DRUGS: A MODEL FOR THE NATION

● Mr. HOLLINGS. Mr. President, earlier this year, under the auspicies of our Commerce, Justice, State Appropriations Subcommittee, Senator RUDMAN and I held field hearings in South Carolina focusing on illegal drug trafficking. It was truly an education for me. And what impressed me perhaps most of all was the determination and ingenuity with which local officials are tackling the drug crisis. Certainly, a sterling example of creative local initiative is the antidrug strategy of Charleston's, SC, Police Chief Reuben Greenberg. Chief Greenberg's approach was highlighted in a column by William Raspberry in Wednesday's Washington Post.

As Raspberry points out, in Charleston "the police don't bother with * * * lighting-strike shows of force. When he learns of an open-air drug market, the chief assigns an officer or two to the area for round-the-clock surveillance. If the dealers move, the officers move with them. That simple tactic has worked in Charleston and appears to be working in Mobile, AL, where Greenberg is on loan as public safety director." Raspberry also notes under Chief Greenberg's extraordinary leadership, the overall crime rate in Charleston has dropped 45 percent to the lowest rate in 20 years.

Mr. President, I salute the tremendous job Reuben Greenberg has done in my hometown. Along with Raspberry, I commend the Greenberg antidrug tactics to other urban communities searching for answers to the drug plague. For a more complete description of what the police are doing in Charleston, I ask that the entire Raspberry column be reprinted in the RECORD at this point.

The article follows:

DRUG DEALERS: A WAY TO TAKE THEIR TURF

(By William Raspberry)

"Once again I was awakened at 2:15 a.m. with the loud noises of the drug dealers outside my home. Then by 4:15 a.m., I was disturbed again, this time by a female voice screaming in distress. As I looked out, I could only partially see figures moving in the dark. I called the police, and soon the men who had been standing on the corner began to flee down the street.

"Exactly what happened I do not know, but several squad cars arrived, as well as a paddy wagon, ambulance and unmarked cars. However, within five minutes after the police left, the drug dealers were again standing on the corner."

The remarkable thing about the woman's account is that it is so unremarkable. Not just in the slums but in erstwhile quiet neighborhood like hers, drug dealers routinely work their open-air markets, suspending operation when the cops arrive, resuming it as soon as the cops drive away. And like her fellow sufferers, this Northwest Washington resident doesn't know what to do. Her letters and phone calls to city officials date back nearly two years. Four or five nights a week, she says, her sleep is broken by the activities of the drug dealers—sometimes a handful, sometimes as many as 20—operating within a few feet of her front door.

"Cars are constantly coming and going, doors opening and closing, music blasting from car radios—all this at 2, 3, 4 or 5 a.m. When I leave for work at 6, they are still there on the corner. I'm afraid even to go out in the mornings unless I see others moving on the street. Why can't [city officials] do something?"

It's a good question, and the answer—perhaps too naive—is that they can.

You've heard the official answers. The police respond to complaints, but since the activity ceases with their arrival, there's usually nobody to arrest. Making a case against the dealers involves the painstaking work of making undercover buys, obtaining warrants and then returning days later with other officers (so as to protect the identity of the undercover cops) to make the arrests. With the open-air markets numbering in the hundreds, little progress is made.

Is there another way? Well, maybe there is. In Charleston, S.C., the bailiwick of Police Chief Reuben Greenberg, the police don't bother with these lightning-strike shows of force. When he learns of an open-air drug market, the chief assigns an officer or two to the area for round-the-clock surveillance. If the dealers move, the officers move with them. That simple tactic has worked in Charleston and appears to be working in Mobile, Ala., where Greenberg is on loan as public safety director.

"A street-level drug dealer is a merchant, that's all," Greenberg said recently. "They don't want to move more than a block away. Their customers don't know where they are."

And there's another reason they don't like to move too far, he points out. "You can get killed [by rival dealers] moving someplace else. Once you lose your turf to the cops, in most cases you're out of business."

I haven't asked the local authorities why they don't copy Greenberg's tactic, but I can anticipate their answers: too few officers; a lack of jail space for arrested dealers; the probability that it would only force the dealers indoors, where they are harder to catch.

I don't buy it. Most cities could use more police officers, but using the present force smarter could work as well in other places as in Charleston, where the crime rate has dropped 45 percent to its lowest level in 20 years. Jail space matters in the case of arrests, but who supposes that the dealers would court arrest by continuing their drug-selling operations in the presence of uniformed officers or that their customers would continue buying?

As for moving indoors, Greenberg, has an answer. When his officers bust an indoor operation, they cart off everything that could conceivably be used as evidence: furniture, telephones, clothing. "We take the air conditioner out of the window and the chair he was sitting on. He can't get back in business Monday or Tuesday. He's losing $30,000 a day."

But the main appeal of the Greenberg approach is that it is not dependent on making arrests. The idea is to hit the dealers financially, disrupting their markets and scaring off their customers, including the vital out-of-neighborhood middle-class "recreational" users. Sure they will move, but not far. To hide from the cops means hiding from their customers as well, and they can't stand it.

Finally, if there are too many open-air markets to police them all, I offer this suggestion. Let the police give priority to those neighborhoods that bestir themselves to institute citizen patrols. Such a joint undertaking could have the twin effect of busting up the drug traffic and putting citizens back in charge of their neighborhoods. Not a bad parlay.●

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations: Calendar items 885, 886.

I further ask unanimous consent that the nominees be confirmed en bloc; that any statements appear in the RECORD as if read; that the motions to reconsider be laid upon the table en bloc; and that the President be immediately notified of the Senate's action; and that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations, considered and confirmed en bloc, are as follows:

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Rosalie Gaull Silberman, of the District of Columbia, to be a member of the Equal Employment Opportunity Commission for a term expiring July 1, 1995. (Reappointment.)

NATIONAL LABOR RELATIONS BOARD

James M. Stephens, of Virginia, to be a member of the National Labor Relations Board for the term of five years expiring August 27, 1995. (Reappointment.)

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will now return to legislative session.

AUTHORITY FOR COMMITTEES TO REPORT AND FOR RECORD TO REMAIN OPEN

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate committees may file reported legislative and executive calendar business until 4 p.m. today; and that the RECORD remain open for the introduction of bills and statements until 4 p.m. today.

NOMINATION OF GEORGE F. MURPHY REFERRED TO COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. MITCHELL. Mr. President, as in executive session, I ask unanimous consent that the nomination of George F. Murphy, to be inspector general of the U.S. Information Agency, reported by the Committee on Foreign Relations, be referred to the Committee on Governmental Affairs for a period not to exceed 20 days.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senator from Kansas be recognized to address the Senate; that upon the completion of his remarks, the Senator from Hawaii be recognized to address the Senate; and that upon the completion of his remarks the Senate stand in recess as under the order until 12:30 p.m. on Monday.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Republican leader is recognized.

BUDGET SAVINGS

Mr. DOLE. Mr. President, we have finally begun floor debate on the 1990 farm bill. Winter wheat producers and other farmers need to know what kind of farm program we are going to have for the crop year already upon us. I have asked Secretary Yeutter to make some kind of announcement regarding the 1991 acreage reduction requirement and he has agreed to do so by the end of the month.

YESTERDAY'S BUDGET FIX

I congratulate the chairman, Senator LEAHY, and the ranking member of the committee, Senator LUGAR, for offering their budget-related amendment yesterday, but I think it is important to review the bidding and put this amendment in context—because where you stand may depend upon where you sit. Let me be clear about one fact: this amendment does not spell the end of the budget story.

The current law baseline, just updated this week by OMB, projects spending on commodity programs of about $54 billion over the next 5 years. CBO's baseline is $52 billion, not much different from OMB's in this case.

BILL STILL OVER BUDGET

The committee originally came forward with a bill that is projected to cost almost $60 billion. This is a number subject to great uncertainty; it could be more. But the committee bill was clearly an increase over current law—this at a time when, right down the hall in S-207, the budget summitteers are meeting to try to cut a deficit that is now over $200 billion for fiscal year 1991.

So I do not think it was realistic of the committee to come forward with a bill that was a $6 billion budget increase.

Do not get me wrong. I support a strong agriculture program. I come from rural America.

BE HONEST WITH PRODUCERS

But farmers want to be leveled with. They do not want to hear one story from this Senate when we pass a bill, only to get the real bad news in a few months.

Plus, farmers are concerned about inflation. Farmers are concerned about interest rates. They know we cannot continue to spend more and more and more money on any program, including theirs.

So let us look at where we are. The amendment offered by the committee yesterday would cut about $4 billion from their original bill over 5 years. That leaves the bill $1.6 billion over the current law baseline. And the biggest part of the savings—$3 billion of the $4 billion cut—the committee offered came from a shift. We just shifted the payment or repayment dates for loans. So it is not completely real savings. In fact, it might be in real costs but certainly not any savings to shift the date and say we just saved $3 billion.

DO NOT IGNORE FUTURE CUTS

But even with the amendment, a bill that is about $1.5 billion over the baseline ignores the fact that additional cuts are around the corner. The administration has asked for $1.1 billion in farm program savings this year—$18.7 billion over 5 years. And the summit is talking about savings of anywhere from $6 to $18 billion below the current law baseline.

So we have to be realistic. The deficit is now $168 billion—$231 billion if you count the S&L's. We face a sequester of over $100 billion in just 2½ months. That means, if there is no budget agreement, a cut of 38 percent across the board in all farm programs.

So rural America should want to see a successful budget summit. They should want an agreement. And if there is to be a successful summit—if there is to be an agreement—agriculture will have to do its part. Those who wish to offer amendments to raise

spending or those who think our job is done should keep this in mind.

So let us not mislead the farmers and producers out there, and others. Let us not send them the wrong signal.

SUBSTITUTE RECOGNIZES BUDGET

I have a substitute drafted, which I have discussed with the distinguished ranking Republican on the committee, Senator LUGAR. I am not certain it will be offered. But at least it will bring our bill slightly below current services. It also moves us closer to the 1985 farm bill which most farmers and Members of Congress say was a good bill, and probably one of the most successful farm bills in history.

The White House said it will veto this bill, the bill now pending—not the substitute I may offer—if it is not brought in line with the summit agreement.

I appreciate our chairman's commitment to forestall final consideration of a farm bill conference report until and unless the bill meets summit agreement spending levels.

ALSO NEED POLICY REVISIONS

I also hope we are able to make some policy improvements here on the floor. It will make our job a little easier later on.

I know Senators GRASSLEY and BOSCHWITZ will have some suggestions on flexibility. Senators MCCONNELL and FOWLER apparently have a dairy plan. SENATORS CHAFEE, ROTH, and METZENBAUM have some honey and peanut ideas that deserve consideration. There are many others who may have amendments as well.

The bottom line is that there are going to have to be budget savings below the baseline. It could be about a billion dollars for next year. And it could be several billion dollars over 5 years. And we should begin now to talk about options for achieving those savings. Thomas Jefferson once said that "the whole of Government consists of the art of being honest." Let's be honest to our farmers. We need a budget agreement. And agriculture will have to do its part. Yesterday's amendent was only a first step and a very short step at that.

If I have any leader time I yield 2 minutes to the Senator from Missouri.

The PRESIDING OFFICER. Under the previous order, the Senator from Hawaii is recognized. Subsequent to that, I will recognize the Senator from Missouri.

The Senator from Hawaii is recognized.

Mr. AKAKA. I thank the Chair.

(The remarks of Mr. AKAKA pertaining to the introduction of S. 2883 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

THE SAVINGS AND LOAN DEBACLE

Mr. BOND. Mr. President, a few days ago I rose to discuss in this body the implication of the savings and loan debacle. It is clearly one of the largest financial disasters that this country has ever seen. The cost is now estimated at $130 billion, some of that to be paid by the industry but much of it to be paid back by the taxpayers, and the interest on it to be paid by the taxpayers.

It is important that we ask what are the taxpayers, the constituents we serve, going to get for the money they put into it?

Well, prosecutions are very important. We are encouraged to see the Department of Justice continuing and stepping up the pace of prosecutions to go after those who are criminally responsible or who have assets that can be recovered.

I am very pleased that Attorney General Thornburgh is in my State of Missouri today to discuss the savings and loan activities and the law enforcement activities going along with them.

But, while it is important to prosecute wrongdoers and to go after those who have taken illegal assets, taken gains that are not properly theirs, that is not enough. I believe the taxpayers of America have a right to expect more. We must go beyond prosecutions and determine what were the policy mistakes, what were the administrative mistakes, the executive mistakes, the legislative mistakes, the private sector mistakes that led to this immense scandal.

I do not believe it is productive for us, in Congress, to lob political hand grenades at each other as we discuss how this scandal came about. I think there is a great need for an independent commission to look into this matter, to make a calm and careful assessment of what went wrong, and to lay out for us and for the taxpayers what we need to do in the future; what mistakes we ought to avoid in the future so we do not run into another problem.

I would like to see that answer in 6 months. I would like to see it soon. And I would like to be able to put this behind us so we can go on with the ongoing responsibilities we have in financial institutions and their regulation.

I believe an independent commission could conduct a full investigation of all aspects of the scandal without political skirmishing and give the Congress and the people of the United States some answers. That is why yesterday my colleagues, Senator DODD of Connecticut, Senator ROBB of Virginia, and I, circulated a letter asking colleagues with ideas who want to join us to let us know because we are in the process of drafting a resolution to establish a commission which is not composed of Government officials, legislative officials, or administrative officials, which should be set up on a bipartisan basis, which should be charged with getting the answers, and getting the answers as soon as possible.

I invite my colleagues to join us. I invite my colleagues to submit their ideas so we can provide the best possible vehicle. We will be talking with the leadership about finding an appropriate vehicle to move this resolution forward. I believe it is the least we can do for the taxpayers who are being asked to bear the burden of this tremendous scandal.

I yield the floor.

THE SENATE'S SCHEDULE

Mr. MITCHELL. Mr. President, I want to repeat for the information of Senators, so there can be no current or later misunderstanding, the requirements of the Senate's schedule over the next 2 weeks prior to the August recess. I have been asked by many Senators what action will be required before the commencement of the recess. I stated it last evening. I will restate it now just in the event anyone who was not aware of my remarks yesterday may now be listening.

We will complete action on the farm bill, I hope, early next week. The distinguished Senator from Indiana and the distinguished Senator from Vermont have been working diligently to move forward on the bill. We hope to have a full schedule of amendments on Monday.

Following that we will take up the campaign finance reform bill and then we will have to deal with the Department of Defense authorization bill and the debt limit extension.

In addition, I met yesterday with the distinguished Republican leader and the chairman and vice chairman of the Ethics Committee, and it is my intention to dispose of the recommendation made this week by the Ethics Committee prior to the recess. The timing of that remains yet to be determined. I hope to have an announcement in that regard early next week. In fairness to all concerned, I believe that matter should be disposed of promptly as well.

So we are talking really about 5 measures: The farm bill, the campaign finance reform bill, the ethics report, the debt limit extension, and the Department of Defense authorization bill.

Senators should understand that to the extent any of those are delayed, the likelihood for going on recess at the close of business on August 3 is reduced. Whether or not we go is entirely up to the Senate and Senators—not whether or not we go, when we go, I should say, because there definitely

will be a recess. The question of course is at what time it will begin.

So any Senator who thinks he is gaining something by delaying, why of course that merely pushes the other end back further. And I know that no Senator wishes to inconvenience his or her colleagues in that regard.

I thank the distinguished Senator from Indiana and the Senator from Vermont. As I indicated, Mr. President, I hope shortly to have an announcement regarding the schedule for Monday and Tuesday.

ORDERS FOR MONDAY, JULY 23, 1990

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 12:30 p.m. on Monday, July 23; that following the time for the two leaders there be a period for morning business not to extend beyond 1 p.m. with Senators permitted to speak therein for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL MONDAY, JULY 23, 1990, AT 12:30 P.M.

The PRESIDING OFFICER. Under the previous order, the Senate stands in recess until 12:30 p.m., Monday, July 23, 1990.

Thereupon, at 1:32 p.m., the Senate recessed until Monday, July 23, 1990, at 12:30 p.m.

CONFIRMATIONS

Executive Nominations Confirmed by the Senate July 20, 1990:

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

ROSALIE GAULL SILBERMAN, OF THE DISTRICT OF COLUMBIA, TO BE A MEMBER OF THE EQUAL EMPLOYMENT OPPORTUNITY COMMISSION FOR A TERM EXPIRING JULY 1, 1995.

NATIONAL LABOR RELATIONS BOARD

JAMES M. STEPHENS, OF VIRGINIA, TO BE A MEMBER OF THE NATIONAL LABOR RELATIONS BOARD FOR THE TERM OF 5 YEARS EXPIRING AUGUST 27, 1995.

THE ABOVE NOMINATIONS WERE APPROVED SUBJECT TO THE NOMINEES' COMMITMENT TO RESPOND TO REQUESTS TO APPEAR AND TESTIFY BEFORE ANY DULY CONSTITUTED COMMITTEE OF THE SENATE.

HOUSE OF REPRESENTATIVES—July 20, 1990

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We admit, O God, that there is much to do in our lives, so many tasks and responsibilities. Yet, in the midst of all this activity, we take this moment to offer our prayers of thanksgiving for Your gifts of faith and hope and love for Your gift of peace in our hearts and souls. We are eventually grateful to You, our Creator and Redeemer, for all the blessings that we receive in our lives. For this new day, O God, and for all Your graces, we offer this grateful prayer. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Ohio [Mr. TRAFICANT] please come forward and lead the House in the Pledge of Allegiance.

Mr. TRAFICANT led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed without amendment joint resolutions of the House of the following titles:

H.J. Res. 577. Joint resolution designating the month of November 1990 as "National American Indian Heritage Month," and

H.J. Res. 591. Joint Resolution designating the third Sunday of August of 1990 as "National Senior Citizens Day."

The message also announced that the Senate agrees to the amendments of the House to the joint resolution (S.J. Res. 75) "Joint resolution relating to NASA and the International Space Year."

The message also announced that the Senate disagrees to the amendment of the House to the bill (S. 1939) "An act to extend the authorization of appropriations for the Taft Institute" and agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. KENNEDY, Mr. PELL, Mr. DODD, Mr. HATCH, and Mrs. KASSEBAUM, to be the conferees on the part of the Senate.

SUPPORT OUR DEFENSE WORKERS

(Mr. BRENNAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BRENNAN. Mr. Speaker, anyone wondering if the cold war is over need only consider the news this week.

The Soviet Premier agreed to pull his troops out of East Germany, once his richest satellite, and what is more, agreed that territory that was East Germany could join the NATO alliance.

Yes, the cold war is over and America has won. The credit goes, in part, to our brave soldiers who stood guard for freedom around the world. And it also goes in part to our defense workers who built the mightiest military force in the history of this world.

Now as we turn our attention—and resources—to new challenges, we can not forget nor ignore the defense workers who helped make this day possible. We must help them adjust.

Rep. MARY ROSE OAKAR's bill on economic conversion is a good first step.

It is important to my home State of Maine, and in fact, to States across this Nation, with defense facilities. It provides money for communities to plan to retrain workers and to encourage business to invest. Defense workers are among our most skilled.

This bill will help them contribute to the new America. We owe them, and ourselves, at least this much.

I urge your support for the Economic Conversion Act when it comes to the floor of this House.

THE EDUCATION BILL TOO EXPENSIVE

(Mr. BALLENGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BALLENGER. Mr. Speaker, the House will finish consideration of the Equity and Excellence in Education Act (H.R. 5115) later today. This is too much spending at a time when our budget is screaming in pain from too much deficit.

We face a budget deficit of over $168 billion. Can we afford a $600 million increase over the President's education proposal—$1 billion in new education spending?

This bill is an expensive, shotgun approach to improving education and the President considers it an unacceptable substitute for his original proposal. The President has indicated he will veto the bill.

I want to provide the best possible education for our children, I also do not want the burden of the Federal deficit on their backs in future years. It is time to make some tough, but responsible decisions about our children's financial future. I believe that the billion dollar bill is one our children can do without.

Please join me in voting "no" on these expensive new programs.

PETE ROSE AND THE S&L CROOKS

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, Richard Secord lied to Congress. Martin Seigal stole billions from the savings and loan, but the judge said when he sentenced them, "You're a disgrace. You're guilty. The Nation knows it. You've endangered our freedoms, ripped off our Constitution, but you've suffered enough, poor boys. No jail time, no fines, no community service. You've suffered enough."

Now comes in Pete Rose. What he did was wrong. He gambled, but Mr. Speaker, Pete Rose blew his own money. He did not rip off the savings and loans.

The judge says, "You're a disgrace." He is getting more jail time than all the crooks from the savings and loan and Iran-Contra combined.

I say, "Keep your head up, Pete. You made a mistake," but those crooks ripped off the American public.

I would not be surprised if his community service is not shining the shoes of Secord and Seigal.

Mr. Speaker, he must be a Democrat.

VEGETATION CONTROL

(Mr. SHAW asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHAW. Mr. Speaker, the Federal Highway Administration recently announced the reversal of a 13-year-old policy which allowed billboard

companies to practice so-called vegetation control.

Vegetation control is a euphemism for the cutting and poisoning of trees in front of billboards for the sole purpose of giving the motorist an unobstructed view of the billboard.

While I applaud the actions of the Highway Administration, which are wholly consistent with the President's policy of planting and preserving trees, not destroying them, we in Congress must finish the job.

Mr. Speaker, what this country needs is a lot less vegetation control and a little more billboard control. I urge my colleagues to take action on this matter by cosponsoring H.R. 3389, a bill that restores the original intent of the Highway Beautification Act. The time to end billboard blight is now.

PROPER RESTITUTION IN FRAUD CASES

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEKAS. Mr. Speaker, the Supreme Court of the United States in a recent decision decided that where an individual charged with a dozen or more counts of embezzlement or fraud, but who pleads guilty to 1, does not necessarily have to make restitution to the 9 or 10 other people who are defrauded for the sake of that 1 count to which he pleaded guilty.

Mr. Speaker, we believe that is an unfortunate result and we believe that the judge ought to have the right to order restitution for all those moneys, even though he was only punished for one count.

Therefore, we are introducing today a piece of legislation which would do just that, which would accord the judge in such a case the right to assess restitution for all the moneys defrauded in the event the individual wants to plead guilty to any one count. This will be done if we pass it just in time to help us in these investigations of the S&L fees.

□ 1010

APPOINTMENT OF CONFEREES ON S. 605, CONSUMER PRODUCT SAFETY COMMISSION AUTHORIZATION ACT OF 1989

Mr. WALGREN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 605) to authorize appropriations for the Consumer Product Safety Commission, and for other purposes, with House amendments thereto, insist on the House amendments, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania? The Chair hears none, and appoints the following conferees and reserves the right, without objection, to appoint additional conferees: Messrs. DINGELL; WALGREN; SLATTERY; LENT; and RITTER.

There was no objection.

APPOINTMENT OF CONFEREES ON S. 2088, ENERGY POLICY AND CONSERVATION ACT AMENDMENTS OF 1990

Mr. WALGREN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2088) to amend the Energy Policy and Conservation Act to extend the authority for titles I and II, and for other purposes, with House amendments thereto, insist on the House amendments, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania? The Chair hears none, and appoints the following conferees, and, without objection, the Chair reserves the right to appoint additional conferees: Messrs. DINGELL; SHARP; MARKEY; BRUCE; TAUZIN; LENT; MOORHEAD; and DANNEMEYER.

There was no objection.

INTRODUCTION OF GOVERNMENT-BY-THE-PEOPLE CONSTITUTIONAL AMENDMENT

(Mr. APPLEGATE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. APPLEGATE. Mr. Speaker, I ask all of the Members here to join me in cosponsoring my government-by-the-people constitutional amendment, House Joint Resolution 624.

Simply, it will allow the people of the United States to be able to initiate, petition, and vote directly on constitutional amendments. After all, we are a government of, by, and for the people, not of, by, and for the Congress.

This will answer all you would like to know about how your constituents feel and do not know how to find out, about such issues as flag burning, abortions, and balanced budgets.

Let us give the people of this country their first amendment rights and allow them to vote on whether or not they want these issues in the Constitution of the United States.

STOP TRYING TO RAISE TAXES

(Mr. DELAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DELAY. Mr. Speaker, on Wednesday the House Republicans stood up for the American people and sent a clear message to the Democrats in the budget summit negotiations—stop trying to raise taxes on overtaxed Americans and cut spending.

The Federal Government is confiscating money out of the pockets of hard-working Americans at unprecedented levels. Yet the Democrats continue to complain like Donald Trump that they can't live on $1.2 trillion a year and must spend more.

The Democrats should stop whining about raising taxes and get down to the business of cutting spending. Billions of dollars' worth of program cuts have been offered.

The Heritage Foundation identified over $130 billion in deficit reduction options. Citizens Against Government Waste issued a report identifying over $304 billion in savings over 5 years. The GAO reported $180 billion a year is squandered through waste, fraud, and abuse.

Democrats should stop deceiving the American public and the media by saying there is no spending to cut and start explaining why they continue to ignore these important studies.

The House Republicans have stood up to declare they will protect the American taxpayer from the Democrats' urge to grab more money out of their pockets. The House Republicans want real spending reductions. Billions of dollars' worth of spending reductions are on the table and it is about time the Democrats start looking at it.

TREAT THE HIGHWAY AND AVIATION TRUST FUNDS THE SAME AS SOCIAL SECURITY

(Mr. ANDERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANDERSON. Mr. Speaker, the Federal Government has 98 different trust funds but only the highway and aviation trust funds are 100 percent supported by user fees. Even the Social Security trust fund receives general revenue.

If we remove the Social Security trust fund from the budget, as rumors out of the budget summit suggest, then we must do the same for highways and aviation. Certainly, the highway and aviation trust funds deserve this status.

Yesterday, I introduced H.R. 5315, which would require that the highway and aviation trust funds be treated the same as Social Security. The same arguments that apply to Social Security apply to the transportation trust funds.

We must stop this deception of the American taxpayers. The $19 billion uncommitted balance in the highway trust fund should be spent for highways, bridges, highway safety, and mass transit. The $7.6 billion surplus in the aviation trust fund should be used for airport construction and the

air traffic control system. The needs are there, the funds are there, we must use our user fees.

Any off-budget action should include the highway and aviation trust funds. I ask the Members to join me in support of H.R. 5315.

END THE RICE-A-RONI RUNAROUND ON FARM PROGRAM

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, the farm bill is here, and I see it is busy feeling its oats, protecting its sacred cows, and of course beating its plowshares into cash shares—and some mighty hefty cash shares they are. $100,000, $200,000, $300,000, and even more, each year, for some fat cat farmers living high on the hog.

The largest farm producers know that if you can farm the land, you can farm the Federal treasury and rake in the cash.

They can get away with huge individual payments because the existing payment limits—which Congress set—are not what they appear to be.

If you think that the existing $50,000 payment limitation on farm deficiency payments really does limit an individual's payments to $50,000, then I have some news for you. You have been had.

"It ain't so." That $50,000 limit is in reality a $100,000 limit, and the $250,000 limit on total farm program payments is actually a $500,000 limit.

Next week you will have the opportunity to end the rice-a-roni runaround on farm program payments.

I will be offering an amendment to the farm bill that really will establish an effective $50,000 payment limitation. It is something everyone can support.

AND NOW A DESERT PAD FOR BILL WALTERS

(Mr. ANNUNZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANNUNZIO. Mr. Speaker, when we last visited Bill Walters, who defaulted on nearly $100 million of loans from Silverado Savings & Loan, the Los Angeles Times was reporting that this former partner of Neil Bush was living in a $1.9 million house in Newport Beach, CA, complete with twin Mercedes. He also had a nearby beach house.

Today, the Times reports that Mr. Walters also has a $1 million home in Palm Springs, CA, in one of the plushest golf resorts, and that he had a paid up $7,500 yearly membership at the golf club.

The taxpayers will have to pick up a $1 billion tab for the Silverado collapse, which was caused in large part by Walters' failure to pay his debts. When Mr. Walters appeared before the Banking Committee last month, he claimed poverty. From his statement, you might have thought Mr. Walters was only days away from the poor house. In reality, Mr. Walters was only days away from his mansion house, his beach house, and now we find out, his desert house.

Mr. Walters may believe that he is thumbing his nose at the taxpayers, but I intend to pursue this matter in hopes of getting money back for the taxpayers.

I am writing to Mr. Walters today asking him to appear before the Financial Institutions Subcommittee, which I chair, to discuss how a man who claims poverty can live with a Silverado spoon in his mouth.

I also want to know what he did with the millons that he owes Silverado. If Mr. Walters declines to appear, then I will ask the full Banking Committee to subpoena Mr. Walters.

Mr. Speaker, taxpayers are outraged by Mr. Walters spending habits. I have received calls from all over this country demanding action against Mr. Walters. I intend to get answers, and hopefully money for the taxpayers.

INTRODUCTION OF BIRD RESEARCH AND CONSERVATION ACT

(Mr. BUECHNER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BUECHNER. Mr. Speaker, the 20th century will be remembered for its achievements. However, it may be even more notable for its failures—particularly with respect to the protection of wildlife. Specifically, numerous species of songbirds are declining dramatically across the Western Hemisphere. Unless we act immediately many will not survive into the next century. This would be a tragedy.

I would not relish the task of explaining to my grandchildren why I stood by and did nothing as these fascinating creations of nature were allowed to perish—and I don't think any one of you would either. That's why I ask each of you to support legislation I am introducing today, the Bird Research and Conservation Act

My bill provides for the formation on an intergovernmental working group to develop a comprehensive plan for monitoring and research on migratory nongame birds in the Western Hemisphere. It also directs the President to elevate this as an issue of international concern and seek designation of the decade beginning January 1, 1991 as the "World Decade of Ornithology."

If Lacey J. Davenport of Doonesbury fame truly was in Congress this would be her bill—a memorial to her beloved birdwatching mate. Unfortunately, Ms. Davenport is not real—this problem is.

In the rich tapestry of life on Earth, the fate of each species is interwoven with all others—the loss of any one diminishes the whole. I do not want the 20th century to be remembered as the time in which the songbirds perish. Join me before it is too late—not for me but for your children's children.

□ 1020

S&L BAILOUT AND THE NATIONAL DEBT

(Mr. FLIPPO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FLIPPO. Mr. Speaker, American taxpayers have a right to be disgusted when they hear about calls for new taxes. They know that too many of their tax dollars are paying for the S&L disaster.

They know that the fat cats who drove the thrift industry into the ground are still riding high in their Mercedes, wearing their fine tailored suits.

Now officials responsible for the S&L clean up have reported that fraud and criminal conduct played a role in the collapse of at least 40 percent of the thrifts now under government control.

It is likely that over half of the failed savings and loans were put at risk due to negligence or some other misconduct.

It's time for the fat cats guilty of raiding America's savings and loans to trade in their Armani silk suits for plain prison gray.

I welcome the efforts of the House leadership to put forward a package of expanded criminal and civil penalties to deal with these cases of fraud. Before we ask the American people for any additional revenue, we must act to ensure that the S&L robber barons are put behind bars where they belong.

By putting the guilty behind bars, we can begin to regain the trust of the American people in their financial institutions as well as their political institutions.

Americans have a right to expect honesty from elected officials. The truth about the savings and loan debacle is that no one really knows how much more money we will have to pour down this rate hole.

Only a year ago, the administration told the Congress that $50 billion would do the job. Now after those funds have almost been exhausted, we're told that it may take as much as

another $50 billion to just carry us through the coming fiscal year.

No one knows how much the final cost will be. We didn't know last year, and we still don't know today. What we do know is that last year's estimates were a complete sham. That's why I voted against the S&L bailout each time it came before the House.

Last week, President Bush sent an official from the Treasury Department to testify before the Ways and Means Committee on need to increase the national debt ceiling. The driving force behind this request is the billions of dollars being spent to close down insolvent S&L's.

When the Reagan administration began in 1980 to push the wave of deregulation that played a major role in the S&L disaster, our national debt was less than $1 trillion.

In 1990, the Nation's debt is over $3 trillion. The drain of Federal funds to clean up insolvent thrifts is so rapid that the Treasury Department has estimated that the Government itself will be in default unless the debt ceiling is increased before the August recess.

The Bush administration has indicated that the Federal debt limit will need to be over $3½ trillion for the coming fiscal year.

The S&L bailout and the Nation's debt are now inextricably entwined.

If we are going to ask the American people to accept an additional increase in the national debt, I believe we must enact strong criminal sanctions against thrift fraud at the same time.

I urge my colleagues to join me in withholding your support from any permanent debt ceiling measure unless Congress acts to restore the faith of American taxpayers in U.S. political and financial institutions.

LAST DAY FOR DEMOCRATS TO JOIN REPUBLICANS IN DEMANDING INVESTIGATION OF PRIOR DEMOCRAT LEADERS

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURTON of Indiana. Mr. Speaker, well, this morning the Democrats, like my colleague the gentleman that just left the lectern, are attacking the administration and attacking the fat cats. But the one thing they will not attack are the Democrats who served in this Chamber who are also responsible for the S&L debacle. Now, over a week ago I asked Members on that side of the aisle to join me in signing a letter to the Attorney General asking them to investigate Jim Wright, former Speaker, former deputy whip and leader Tony Coelho, and former Banking chairman Mr. St Germain, and not one Democrat has signed this letter.

Now, today is the last day, fellows, you are going to have an opportunity. If you really care, come up here and sign this letter asking for an investigation of those three individuals. If there are criminal wrongdoings, then they should be indicted and brought to justice. This is your last chance. You have been talking and talking and talking. Now let us do something about it.

CIVIL RIGHTS BILL OF 1990

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, during the 1988 elections, President Bush treated us to a continuous chorus of "read my lips" on taxes. He also assured working women that he would balance the demands of the family and the workplace. And he promised that a positive civil rights agenda would be the top priority of his Attorney General. Now, 2 years later, the President has reversed his pious and unrealistic tax stance, vetoed a much-needed Family Medical Leave Act, and threatens to veto the Civil Rights Act of 1990. It is painfully clear that while we were busy reading the President's lips, we should have been watching his nose.

Mr. Speaker, the White House and other opponents of the Civil Rights Act of 1990 claim that it is a quota bill which will stack the deck in favor of minorities and benefit only lawyers by creating a plethora of civil court disputes. Nothing could be further from the truth. The Civil Rights Act of 1990 aims to provide all qualified workers with equal access to the job market. It restores antidiscrimination laws to where they were before recent Supreme Court decisions and the civil rights retrogressions of the Reagan and Bush years. I urge my colleagues to pass this measure when it reaches the floor and I urge the President finally to fulfill one of his campaign pledges by signing this bill into law.

AMERICA IS LOSING THE SPACE RACE

(Mr. KOLBE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KOLBE. Mr. Speaker, while we stumbled all over ourselves trying to assign blame for grounded shuttles and blurry mirrors, we lost sight of the bigger picture: We are losing the space race. And, while we are hopefully going to have a successful commercial launch of a government payload later today, the fact is, Arianespace now controls 60 percent of the world launch market of contracts for full-sized payloads, compared with 35 percent for the United States.

And while our largest current commercial space program is the Jetsons, Arianespace has announced plans to launch 23 more public and private payloads between now and November 1991. But not to worry; additional competition for Arianespace is on the way—not from the United States—but from China, Japan, and the Soviet Union.

Mr. Speaker, now is the time for a progressive commercial launch policy. The Space Transportation Services Purchases Act has lingered in the Science, Space, and Technology Committee for more than a year. Mr. Speaker, I urge the committee to act on this bill as quickly as possible, and not let the blunders at NASA prevent the first step toward a competitive commercial launch policy for America.

FARM PROGRAMS SAVED CONSUMERS $40 BILLION FOLLOWING 1988 DROUGHT

(Mr. DE LA GARZA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DE LA GARZA. Mr. Speaker, next week we will take up the Food and Agricultural Resources Act of 1990, which most Members know as the 1990 farm bill.

There is a lot of misinformation about this bill. Some say farm programs raise prices to consumers.

Yes, farm programs do put a floor on farm commodity prices. But they also provide us a way of keeping food prices from going too high.

Farm programs even out the peaks and valleys that occur in agricultural prices.

All of us represent consumers. So I thought my colleagues should be aware of a study being released today by the University of Missouri's Food and Agricultural Policy Research Institute.

This study has found that the stabilizing influence of farm programs has saved consumers $40 billion by preventing large food price increases after 1988 drought.

Before the 1988 drought—one of the worst in history—we had a large carryover corn reserve of 4.3 billion bushels.

One year later—after that drought, our corn supplies were down to 1.9 billion bushels.

What this University of Missouri study says is that without this reserve, corn prices could have gone up 41 percent, causing long-lasting and costly consequences to the whole food production system.

Corn is used in producing beef, pork, and poultry. Sky-high corn prices would have forced farmers to sell off their livestock, glutting the market, and, yes, initially we would have had lower meat prices.

But what these smaller livestock herds mean is that meat prices would have been much higher for years. It takes time to rebuild herds.

The University of Missouri study says consumer food costs would have gone up $15 billion by the third year after the drought without the stabilizing influence of farm programs.

Without Government stocks to cushion the effects of the drought, annual increase in food costs would have averaged $5 billion between 1989-96.

This scenario would have devastated low-income families the most.

I urge my colleagues to keep in mind the real goals of our farm programs when we debate the farm bill. It's not welfare for farmers.

Farm programs make affordable food prices possible for all Americans. We all benefit from broad participation in the farm programs. Before you point the finger at the farm programs remember it saved you, the consumer, $40 billion.

U.S. IMPORTS RECORD 49.9 PERCENT OF OIL

(Mr. REGULA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. REGULA. Mr. Speaker, an article in yesterday's New York Times, "U.S. Imports Record 49.9 percent of Oil"—this compares to 28 percent in 1984—is testament both to the problem as well as the laissez faire attitude of most to the potential threat posed by this trend. The story was not front page news, but relegated to section D.

In feeding a seemingly insatiable oil demand, the United States relied on imports for a record 49.9 percent of its consumption in the first half of 1990. Domestic production is at the lowest level in 29 years. In four of the last 12 months imports have exceeded domestic production.

Clearly, the United States, already the world's largest oil importer is relying increasingly on imports to feed its energy hungry appetite. More worrisome these imports are coming more and more from the unstable region of the Persian Gulf, accounting for about one-fourth of U.S. imports—up from virtually nothing 10 years ago.

Absent an energy crisis, Congress and the Nation are turning a deaf ear to these worrisome trends.

Even worse, our actions on the domestic front, rather than heading off a potential crisis will serve only to exacerbate the problem. Just last month the President put vast areas of our potentially oil and gas rich Outer Continental Shelf off limits for exploration or development for the rest of the century. The ink was not dry on that agreement before others were clamoring for taking off just about any acreage that was left open for potential exploration and development.

It is a sad but true reality that Americans and Congress will not respond to the growing signs of an impending energy crunch until the lines are formed at the gas pumps.

DR. BENJAMIN HOOKS, NAACP

(Mr. DYMALLY asked and was given permission ot address the House for 1 minute and to revise and extend his remarks.)

Mr. DYMALLY. Mr. Speaker, there is a perception among African-Americans that black-elected and appointed officials are the victims of harassment by law enforcement, the media and certain groups. Dr. Benjamin Hooks, executive director of NAACP, has, for the second time this year, articulated this concern. He has since been the subject of criticism by Oped writers in the Washington Post. Dr. Hooks' assertion is supported by two documented studies and two national conferences; one conducted in Washington, DC by the Congressional Black Caucus and one in New York City sponsored by the National Council of the Churches of Christ in the U.S.A.

If Mr. Nelson Mandela taught us anything, it is courage and intellectual honesty. Whether you agree with Mr. Hooks or not, one has to admire him for his courage, his commitment, and his fearlessness. As one who has been studying the subject for 15 years, I commend Dr. Benjamin Hooks for his courage and intellectual honesty.

□ 1030

ON THE BUDGET SUMMIT: HERE IS WHERE I STAND

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, there has been some confusion about my position on the budget summit based on distorted leaks from yesterday's supposedly private discussions.

Here is where I stand: I am committed to a budget summit that leads to economic growth. I believe such a summit must include a permanent capital gains tax cut with indexing and with no increase in income tax. It must include adequate funding for defense. It must have enforceable real cuts in discretionary spending. It must have real cuts in entitlement spending. It must include real reforms in the budget process to give the President spending controls since Congress cannot control spending.

In that setting House Republicans I believe will consider appropriate revenue increases. For 2 months congressional Democrats have postured. The President has reached out and the Democratic leadership has offered only increased spending.

It is time for congressional Democrats to bring a serious proposal to the summit.

S&L BAILOUT

(Mr. KENNEDY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KENNEDY. Mr. Speaker, last year the American people were told by their President that the savings and loan bailout would cost $50 billion, excluding interest. Yesterday, we were told the real story: the bailout effort will be broke before election day. Before even one-third of the bankrupt and braindead thrifts are put to rest.

Clearly, more money—much more money—is required to cleanup what has become the single greatest financial disaster in our history. There are some people—in both parties—who publicly refuse to come to grips with this reality. But the question is no longer whether to pay. It is who pays.

Yesterday, 20 Members of this body joined me in saying that the working people of our country have paid enough. They are tired of watching thrift thieves steal their money and walk away scot free. They are tired of the high interest rates on their home loans and small business loans that S&L rip-off artists charged. They are tired of paying to bail out an industry from a crisis that brought them nothing. And they are tired of a bailout scheme that will send them, their kids, and their grandkids a bill of $1.369 trillion—$900 billion of which is in interest, just because we lack the courage to pay today for the wrongs of yesterday.

The American people are telling us loud and clear: make the crooks pay, and those who can most afford to. I urge my colleagues to cosponsor the Savings and Loan Fair Financing and Anti-Fraud Enforcement Act of 1990.

IT MEANT WHAT IT SAID: NO NEW TAXES

(Mr. HERGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HERGER. Mr. Speaker, on Tuesday, the House showed its unwillingness to commit itself to ending the deficit by rejecting the balanced budget constitutional amendment.

The next day, the House Republican conference overwhelmingly adopted a resolution opposing any tax increases.

Mr. Speaker, the resolution means exactly what it says. It was not a response to remarks about capital gains taxes by anyone in the other body. Like many of my colleagues who voted

for it, I was elected to this House to oppose any tax increases. I will vote against any tax increase. I intend to keep my promise to my constituents. And I am convinced that a majority of my Republican colleagues intend to do so as well.

POOR AND NEEDY IN OUR OWN COUNTRY NEED ASSISTANCE

(Mr. SERRANO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SERRANO. Mr. Speaker, here we go again.

The Wall Street Journal reports that the administration has decided to give the Soviets technical aid. I ask you, My colleagues, if technical assistance is being offered now, can good old American dollars be far behind?

We are being told that the reason for this help being offered is that the Soviets are now our friends. Well, Mr. Speaker, this troubles me a lot. It troubles me because I wonder if we will get our priorities straight.

Right here in our own country we have people who have been our friends for a long time.

The homeless are our friends.

The school dropouts are our friends.

The poor who live under horrible conditions are our friends.

We are always told that the budget deficit does not allow us to take care of some of our own needs. We are also told to help our new friends throughout the world.

Not long ago, members of this administration were part of an administration that referred to the Soviets as members of an Evil Empire.

Well, Mr. Speaker, there is something very evil in letting poverty and despair continue to exist in our country. Let us send technical assistance and dollars to the poor and needy in our country as we strive to help our new friends.

ANNIVERSARY OF AN INCREDIBLE EVENT IN HISTORY

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, today, July 20 is the 46th anniversary of an incredible event in history. It was called Operation Valkyrie and it was an attempt by the German officer corps, those that had some dignity left, to assassinate Adolf Hitler. They placed a bomb next to his leg in the Fuehrer headquarters at Wolf's Lair in Poland, the advance headquarters for the foreign eastern front, and the bomb exploded, destroyed the building completely, killed three and maimed three others in the building. But Hitler had walked to the opposite end of the table which had concrete foundations and was not killed.

Five thousand German officers were executed, hung with piano wire on meat hooks. It was filmed for Hitler's sadistic pleasure.

Probably 2 million people died in the concentration camps, many of starvation, that would not have died otherwise.

Now Klaus von Stoffenburg, a nobleman, German colonel, one hand lost in the eastern front, blind in one eye, he went to this Catholic bishop in Berlin to get permission for tryannicide, the killing of a tyrant. The bishop said, "Give me time to think about it." Ten days later he gave him permission.

I would like to put that in the context of today. The vicious anti-Catholicism and criticism against Catholic bishops who are excommunicating people who run abortion mills. My church knows what it is doing. I love my church. It knows how to handle weighty subjects.

Stop the anti-Catholic criticism. If there are anti-Semites in this country, there are certainly vicious anti-Catholics also.

PROCEDURAL MODIFICATIONS DURING CONSIDERATION IN THE COMMITTEE OF THE WHOLE OF H.R. 5115, THE EQUITY AND EXCELLENCE IN EDUCATION ACT OF 1990

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that during consideration of H.R. 5115, the Equity and Excellence in Education Act of 1990, the following modifications be made in the procedure in the Committee of the Whole from that set forth in the House Resolution 430:

First, that it first be in order to consider amendments en bloc, to be offered by myself, that the amendments en bloc be debatable for not to exceed 30 minutes, to be equally divided and controlled by the gentleman from Pennsylvania [Mr. GOODLING] and myself, and that the amendments en bloc not be subject to amendment or to a demand for a division of the question in the House or in the Committee of the Whole.

Second, that it not be in order to consider the following numbered amendments printed in the House Report 101-588: 1, 2, 4, 6, 7, 8, and 13.

Third, finally, amendments numbered 3, 5, 9, 10, 11, and 12 be considered as contemplated in House Resolution 430.

The SPEAKER pro tempore (Mr. MCNULTY). Is there objection to the request of the gentleman from California?

Mr. GOODLING. Mr. Speaker, reserving the right to object, and I will not object, I would like the chairman to explain why we are making these unanimous-consent requests.

Mr. HAWKINS. Mr. Speaker, will the gentleman yield?

Mr. GOODLING. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Speaker, I thank the gentleman for yielding.

□ 1040

I would like to thank the gentleman from Pennsylvania [Mr. GOODLING] for giving me this opportunity to explain our request. For the past week we have been negotiating with Mr. GOODLING and others to reach an agreement on a series of amendments. Our objective has been to secure broad bipartisan support for the bill.

These committee amendments carry out that agreement. The key elements are the following:

First, I have agreed not to offer any of the three amendments I have had printed in the RECORD;

Second, Mr. GUNDERSON has agreed not to bring up his substitute for the bill;

Third, we are accepting the Smith amendment;

Fourth, we are including a revised version of the Gingrich amendment, which would require the expansion of State efforts to teach literacy to prisoners; and

Fifth, we are including a modified version of the Bartlett amendment. This revision would authorize $40 million to the Secretary for planning grants for four innovative purposes. These areas of innovation are parental involvement in the public schools; business and community involvement in the public schools; State reform of public education finance; and open enrollment.

It is our clear understanding that if the committee amendments are adopted, none of the other amendments permitted by the rule for myself, Mr. SMITH, Mr. GINGRICH, Mr. GUNDERSON, and Mr. BARTLETT would be offered. All of the other amendments permitted by the rule would proceed in the order listed in the rule: Mr. MILLER, Mrs. ROUKEMA, Mr. PANETTA, Mr. SOLOMON, Mr. MACHTLEY, and Mr. VALENTINE. I would like to include a summary of the committee amendments in the RECORD of today's proceedings.

Let me ask the gentleman from Pennsylvania [Mr. GOODLING] to confirm that agreement on behalf of the minority.

Mr. GOODLING. Mr. Speaker, further reserving the right to object, I would like to confirm this agreement. The chairman has stated it correctly, and all those amendments would be deleted if these committee amendments are adopted.

Mr. BARTLETT. Mr. Speaker, will the gentleman yield?

Mr. GOODLING. I yield to the gentleman from Texas.

Mr. BARTLETT. Mr. Speaker, under the gentleman's reservation, this is just to confirm that the unanimous-consent request is only to take those amendments off from consideration, if the committee amendment is adopted, but otherwise the amendments cited would still be in order to be offered?

Mr. GOODLING. Mr. Speaker, the gentleman is correct.

Mrs. ROUKEMA. Mr. Speaker, will the gentleman yield under his reservation of objection?

Mr. GOODLING. Mr. Speaker, I yield to the gentlewoman from New Jersey.

Mrs. ROUKEMA. Mr. Speaker, I want to confirm that I do understand that my right to offer my amendment is protected. Does that also apply to the time limit as applied under the rule; is that correct?

Mr. HAWKINS. Mr. Speaker, if the gentleman will continue to yield under the reservation, that is my understanding, and I think my statement did include that as an understanding.

Mr. GOODLING. Mr. Speaker, with that understanding, I withdraw my reservation of objection.

The SPEAKER pro tempore (Mr. MCNULTY). Is there objection to the request of the gentleman from California?

There was no objection.

THROW OFF THE CHAINS OF COMMUNISM

(Mr. STEARNS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEARNS. Mr. Speaker, I wish to call attention to Moscow's session of Congress last week. One of the points brought to bear was a question, "How much property and capital enterprises does the Communist Party own in the Soviet Union, and how did they get it?" The Communist Party owns 114 publishing houses. Forty-one percent of the profits from these newspapers and publishing houses are being used to support the Communist Party. In a population of, roughly, 300 million, only 19 million people are members of the Communist Party.

Turn over the records to show how they got ownership or what they own. Using state money for their own purposes, the Communist Party, for over 70 years, has been robbing wealth and workers of the people of the Soviet Union for a very small ruling group.

Karl Marx said, "Throw off our chains and people of the world unite." I say to the people of the Soviet Union, "Throw off the Communist Party and set your people free."

CONGRATULATIONS ON ADMINISTRATION POLICY

(Mr. WISE asked and was given permission to address the House for 1 minute.)

Mr. WISE. Mr. Speaker, I rise to commend the administration for its policy that it is adopting concerning trying to keep the Khmer Rouge from taking power in Cambodia. This is a very, very important policy. Having had the occasion last year to visit Thailand, to visit personally the refugee camps in which thousands of Cambodians flee from the conflict in their own land, seeing atrocities, and hearing about atrocities committed by Khmer Rouge.

I cannot underscore enough how wrong and terrible it would be to permit the Khmer Rouge to gain power. I was struck by a meeting with the Ambassador from the People's Republic of China more than a year ago in which Members and Senators, on a bipartisan basis, many of them veterans of the Vietnam War, stood up to say whatever the administration policy was then, that we cannot permit the Khmer Rouge to take power.

I think what the administration did this week is significant and important. I want to express my appreciation for it.

SPECIAL PROSECUTOR SHOULD INVESTIGATE SPECIAL PROSECUTOR

(Mr. LIVINGSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LIVINGSTON. Mr. Speaker, the wire services are saying that Col. Ollie North's conviction was overturned, and the early reports indicate that the reason for the reversal was the fact that Ollie North's testimony before Congress, under immunity, was used against him by the special prosecutor in order to obtain the conviction.

Now, Mr. Speaker, as any first year prosecutor would know or any early student of criminal law would understand, they cannot use a person's immunized testimony against him. Yet the special prosecutor not only used Colonel North's testimony against him but apparently he has also used Admiral Poindexter's testimony against him. Presumably that conviction stands to be overturned as well

I would only suggest that after $40 million expended by the special prosecutor that we deserve better than that. Perhaps we ought to appoint a special prosecutor to investigate the special prosecutor.

EQUITY AND EXCELLENCE IN EDUCATION ACT OF 1990

The SPEAKER pro tempore. Pursuant to House Resolution 430 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 5115.

□ 1046

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee on the Whole House on the State of the Union for the further consideration of the bill (H.R. 5115) to improve education in the United States, with Mr. OBERSTAR in the Chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Monday, July 16, 1990, all time for general debate had expired.

Pursuant to the rule, the committee amendment in the nature of a substitute now printed in the reported bill shall be considered as an original bill for the purpose of amendment and is considered as read.

The text of the committee amendment in the nature of the substitute is as follows:

H.R. 5115

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Equity and Excellence in Education Act of 1990".

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) historically equity and excellence have been the twin goals of American education;

(2) belief in the ability of every child to succeed, if competently guided, and in the capability of every school to implant basic and higher order skills, if given the necessary resources, constitutes the foundation of the educational systems of the Nation;

(3) the Elementary and Secondary Education Act of 1965 was enacted to give meaning to these objectives;

(4) successively, throughout the education continuum, new elements have been added to the process;

(5) in the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988, the various elements were combined into a framework that includes early childhood development programs, school readiness and completion programs, accountability for results, parental involvement, acquisition of critical skills, the concept of effective schools, and preparation for life after the age of compulsory school attendance;

(6) the Congress concurs with the recent findings of the Commission on Excellence in Education that—

(A) the educational foundations of the Nation are being eroded;

(B) education is in crisis;

(C) the United States is a nation at risk; and

(D) education must be made a priority;

(7) the United States, therefore, is challenged to—

(A) fully implement proven, cost-effective programs;

(B) vigorously enforce accountability requirements;

(C) adequately fund school improvement; and

(D) work cooperatively in a total, all-out mobilization;

(8) the President and the Governors recently announced goals for education in the United States; and

(9) the next step must be to agree upon a plan of specific action to achieve national goals in education.

(b) PURPOSE.—It is the purpose of this Act to coordinate the first steps that now must be taken by the Federal Government, in conjunction with others, and within the decade of the 1990s, to assure the achievement of national goals in education and to once again give the Nation preeminence in commerce, industry, and social and technological innovation.

SEC. 3. FINDINGS WITH RESPECT TO RESPONSIBILITIES OF STATE AND LOCAL GOVERNMENTS.

The Congress further finds that—

(1) State and local governments bear the primary responsibility for educating children under their jurisdictions;

(2) this Act identifies areas of national importance that traditionally have been assisted by the Federal Government;

(3) there are other areas of education that are in need of assistance and that should receive attention from State and local governments; and

(4) the Congress expects State and local governments to dedicate extra resources and attention to achieving the national goals in education described in section 2(a)(8).

TITLE I—READINESS

SEC. 101. FINDINGS AND POLICY.

(a) FINDINGS.—The Congress finds that the Federal Government has a long-standing commitment to ensuring that all physically and economically disadvantaged children are ready and able to begin school by providing them with the same opportunities to develop physically and mentally as their more advantaged peers.

(b) POLICY.—It is the goal of the United States that, by the year 2000, all children in America will start school ready to learn. In recognition of this goal, it is the policy of the United States—

(1) to provide, by 1994, Head Start services to every eligible child who needs such services;

(2) to provide, by 1994, sufficient funding for the special supplemental food program for women, infants, and children so that all potentially eligible women, infants, and children have access to the services provided by the program; and

(3) to expand, by 1995, funding for Even Start to allow programs to reach all parts of the United States and to allow each State to fund a sufficient number of programs throughout the State so that approaches are available for local educational agencies, the State educational agency, and other organizations to adopt and implement.

TITLE II—SCHOOL COMPLETION

SEC. 201. FINDINGS AND POLICY.

(a) FINDINGS.—The Congress finds that in order for the Nation to regain its economic competitiveness, each individual in the United States must be educated to his or her greatest potential and must be encouraged to finish secondary school.

(b) POLICY.—It is the goal of the United States that, by the year 2000, the high school graduation rate will increase to at least 90 percent. In recognition of this goal, it is the policy of the United States—

(1) to expand, by 1995, funding for secondary school dropout prevention and reentry programs and basic skills programs to allow programs to reach all parts of the United States and to allow each State to fund a sufficient number of programs throughout the State so that approaches are available for local educational agencies, the State educational agency, and other organizations to adopt and implement; and

(2) to collect uniform, reliable data from the States with respect to school completion rates.

SEC. 202. NATIONALLY COMPARABLE AND UNIFORM DATA REQUIRED.

Subparagraph (C) of section 406(g)(4) of the General Education Provisions Act (20 U.S.C. 1221e-1) is amended by adding at the end the following: "The Center shall ensure that the report submitted under the preceding sentence contains nationally comparable and uniform data by State.".

TITLE III—STUDENT ACHIEVEMENT

SEC. 301. FINDINGS AND POLICY.

(a) FINDINGS.—The Congress finds that—

(1) American students are falling behind students in other industrialized nations on tests measuring abilities in all academic subject areas; and

(2) the United States, in seeking to increase student ability and achievement, has traditionally served special populations, such as disadvantaged individuals and individuals with disabilities.

(b) POLICY.—It is the goal of the United States that, by the year 2000, American students will leave grades 4, 8, and 12 having demonstrated competency over challenging subject matter including English, mathematics, science, history, and geography, and every school in America will ensure that all students learn to use their minds well, so they may be prepared for responsible citizenship, further learning, and productive employment in our modern economy. In recognition of this goal, it is the policy of the United States—

(1) to provide remedial assistance for all disadvantaged children in the United States by increasing the participation of eligible children in programs under chapter 1 of title I of the Elementary and Secondary Education Act of 1965 from approximately 50 percent of such children in the fiscal year 1990 to 100 percent of such children by the fiscal year 1993;

(2) to fulfill, by the year 2000, the commitment made by the United States in 1975 to provide 40 percent of the costs of educating children with disabilities, with at least 25 percent of such costs being provided by 1995;

(3) to reward successful programs in schools with concentrations of disadvantaged children; and

(4) to promote efforts that encourage all students to be involved in activities that promote and demonstrate good citizenship, community service, and personal responsibility.

PART A—PRESIDENTIAL SCHOOLS OF DISTINCTION

SEC. 311. PRESIDENTIAL SCHOOLS OF DISTINCTION.

(a) IN GENERAL.—Chapter 1 of title I of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2701 et seq.) is amended—

(1) by redesignating part F as part G; and

(2) by inserting after part E the following:

"PART F—PRESIDENTIAL SCHOOLS OF DISTINCTION

"SEC. 1411. SHORT TITLE.

"This part may be cited as the 'Presidential Schools of Distinction Act'.

"SEC. 1412. FINDINGS AND PURPOSE.

"(a) FINDINGS.—The Congress finds that—

"(1) the basic goal of all schools is to develop the skills and abilities of students to their maximum potential;

"(2) achievable standards of excellence can and should be set for all students and for all schools;

"(3) financial incentives can spur schools to rise to the challenge of meeting these standards;

"(4) improvement in the quality of our educational system is vital to the Nation's future; and

"(5) demonstrated schoolwide progress in achieving excellence deserves public recognition.

"(b) PURPOSE.—The purpose of this part is to recognize and reward public and private elementary and secondary schools that have made substantial progress in—

"(1) improving student educational achievement;

"(2) creating a safe and drug-free school environment; and

"(3) reducing the dropout rate.

"SEC. 1413. AUTHORIZATION OF APPROPRIATIONS.

"(a) GENERAL AUTHORITY.—Except as provided in subsection (b), there are authorized to be appropriated for the purpose of carrying out this part $280,000,000 for the fiscal year 1991, $350,000,000 for the fiscal year 1992 and $450,000,000 for the fiscal year 1993.

"(b) MINIMUM APPROPRIATIONS FOR CHAPTER 1 PROGRAMS.—Subsection (a) shall not apply with respect to any fiscal year unless amounts appropriated in such fiscal year for the purpose of carrying out parts A, B, D, E, and F of chapter 1 of title I exceed $5,600,000,000.

"SEC. 1414. ALLOCATION OF APPROPRIATIONS.

"(a) RESERVATIONS.—

"(1) the Secretary may reserve up to ¼ of 1 percent of the amount appropriated under section 1413 for any fiscal year for grants to Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and the Secretary of the Interior for activities under this part.

"(2)(A) Subject to subparagraph (B), from the amount appropriated under section 1413, the Secretary may reserve up to ¼ of 1 percent for evaluations, studies, reports, and other activities the Secretary considers appropriate.

"(B) The amount reserved under subparagraph (A) may not exceed $500,000.

"(b) ALLOCATION AMONG STATES.—

"(1) The amount remaining after any reservation of funds under subsection (a) shall be allocated among the States on the same basis as funds are allocated among the States under section 1005 for the same fiscal year.

"(2) For purposes of this subsection, the term 'State' means each of the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico.

"SEC. 1415. STATE APPLICATIONS.

"(a) 3-YEAR APPLICATION.—Each State that wishes to receive a grant under this part shall submit to the Secretary, through its State educational agency, an application for a 3-year period, at such time and in such manner as the Secretary may prescribe.

"(b) APPLICATION CONTENTS.—Each State application shall contain—

"(1) the criteria the State educational agency will use to select Presidential Schools of Distinction under section 1418;

"(2) the criteria it will use to determine the amount of awards;

"(3) an assurance that it will carry out this part in accordance with the requirements of this part and other applicable legal requirements; and

"(4) such other information as the Secretary may require.

"(c) GEPA PROVISIONS INAPPLICABLE.—Sections 435 and 436 of the General Education Provisions Act, except to the extent that such sections relate to fiscal control and fund accounting procedures, shall not apply to this part.

"SEC. 1416. STATE USE OF FUNDS.

"(a) ADMINISTRATION.—Each State educational agency may use not more than 3 percent of the amount it receives under this part for the administrative costs of carrying out this part.

"(b) PRESIDENTIAL SCHOOL OF DISTINCTION AWARDS.—Each State educational agency shall use at least 97 percent of the amount it receives under this part for Presidential School of Distinction Awards made in accordance with section 1418.

"(c) PUBLIC LAW 95-134 INAPPLICABLE.—The provisions of Public Law 95-134, permitting the consolidation of grants to Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands, shall not apply to funds received under this part.

"SEC. 1417. STATE ACTIVITIES AND RESPONSIBILITIES.

"(a) STATE REVIEW PANEL.—

"(1) Each State educational agency shall establish a State review panel to assist in the selection of Presidential Schools of Distinction.

"(2) The State review panel shall be broadly representative of—

"(A) elementary and secondary school teachers and administrators, including teachers who provide services under programs receiving assistance under chapter 1;

"(B) college and university faculty and administrators;

"(C) parents, including parents of children being served by programs receiving assistance under chapter 1;

"(D) State and local boards of education;

"(E) State and local governments;

"(F) labor;

"(G) business; and

"(H) the general public.

"(b) ANNUAL REPORTS TO THE SECRETARY.—

"(1) Before the expiration of the 60-day period beginning on the date a State educational agency distributes Presidential School of Distinction Awards under this part for a fiscal year, such State educational agency shall submit a report to the Secretary that—

"(A) identifies the schools chosen as Presidential Schools of Distinction;

"(B) states the reasons for their selection; and

"(C) states the amount of their awards.

"(2) For the second year and each succeeding year for which any State educational agency receives funds under this part, such agency shall include in any report submitted under paragraph (1) a brief description of how schools selected in the previous year used their awards.

"SEC. 1418. SELECTION OF PRESIDENTIAL SCHOOLS OF DISTINCTION.

"(a) ELIGIBLE SCHOOLS.—A State educational agency may designate as a Presidential School of Distinction any public or private elementary or secondary school in the State that—

"(1) is participating in programs under chapter 1 of title I; and

"(2) has been nominated through procedures established by such agency.

"(b) CRITERIA ESTABLISHED BY SECRETARY.—

"(1) The Secretary shall establish minimum criteria to be used by every State educational agency in selecting Presidential Schools of Distinction.

"(2) The criteria established by the Secretary shall address—

"(A) with respect to children being served under chapter 1 of title I, aggregate performance as assessed by objective measures and standards of program improvement evaluation and review under sections 1019 and 1021;

"(B) with respect to all children being served by a school, progress in improving educational performance, with particular emphasis on mastery of reading, writing, and mathematics skills;

"(C) the degree to which the school demonstrates progress in achieving and maintaining a safe environment, including reduction or elimination of problems related to drug and alcohol use; and

"(D) with respect to secondary schools, progress in reducing the number of students who drop out of school or in encouraging students who have dropped out to reenter school and complete their schooling.

"(c) STATE CRITERIA.—

"(1) Based on the selection criteria established by the Secretary under subsection (b), each State educational agency shall establish additional selection criteria that measure progress in such areas as—

"(A) student achievement, as measured by such factors as—

"(i) year-to-year improvement in test scores; and

"(ii) with respect to secondary schools—

"(I) college entrance rates; and

"(II) employment of graduates in jobs with significant potential for career development; and

"(B) other indicators of a school's success, such as improvements in—

"(i) school leadership;

"(ii) the teaching and learning environment; and

"(iii) parental and community support and involvement.

"(2) In setting criteria for Presidential Schools of Distinction, the State educational agency shall consider the special problems faced by schools with substantial numbers or proportions of children from low-income families and other relevant factors. The State educational agency may also set different criteria for different grade levels.

"(3) In applying the criteria established by the Secretary under subsection (b)(2)(A) to a school, the State educational agency shall consider the desired outcomes identified for children in the application submitted under section 1012(b) by the local educational agency that has jurisdiction over the school. No school that a local educational agency has identified under section 1021(b) shall be eligible for a Presidential School of Distinction award until such time as the school has demonstrated progress in complying with the provisions of the State or local improvement plan developed pursuant to section 1020 or section 1021.

"(4) To the extent consistent with other provisions of this part, each State educational agency shall apply uniform selection criteria in selecting Presidential Schools of Distinction.

"(5) Any local educational agency that has jurisdiction over a school designated as a Presidential School of Distinction under subsection (a) shall implement the provisions of section 1013(c)(2) with respect to children attending such school if the provisions of such section are otherwise applicable.

"(d) AMOUNT OF AWARD.—Each State educational agency shall establish criteria for determining the amount of Presidential School of Distinction awards, including criteria relating to the size of the school and the economic circumstances of the student body.

"(e) LIMITATION.—A State educational agency may not consider a school's planned use of a Presidential School of Distinction award in selecting Presidential Schools of Distinction or in setting the amount of their awards.

"SEC. 1419. PRESIDENTIAL CERTIFICATES OF MERIT.

"Each Presidential School of Distinction shall be awarded a Presidential Certificate of Merit.

"SEC. 1420. USE OF FUNDS BY PRESIDENTIAL SCHOOLS OF DISTINCTION.

"(a) GENERAL AUTHORITY.—A Presidential School of Distinction other than a private school shall use its Presidential School of Distinction award for activities that improve student achievement. Such award may not be used for construction costs, general expenses, salaries, bonuses, or other administrative expenses.

"(b) PRIVATE SCHOOL PARTICIPATION.—

"(1) In the case of a private school that is designated as a Presidential School of Distinction, the monetary award shall be allotted to the local educational agency that provides services under chapter 1 of title I to the children from the private school that qualify for such services. The local educational agency, after consultation with private school officials, shall use the award to improve services provided under chapter 1 of title I to such children.

"(2) If a local educational agency is either prohibited by law from providing for the participation in programs assisted with funds made available under this part of eligible children who are enrolled in private schools, or is unwilling to do so, it shall notify the Secretary of such prohibition or unwillingness, and shall include in such notification—

"(A) the names of the private schools it has designated as Presidential Schools of Distinction; and

"(B) the amounts of their awards.

"(3) The Secretary shall, with respect to the private schools identified under paragraph (2)—

"(A) make suitable arrangements to provide the awards to such schools; and

"(B) withhold from the State's allocation under this part the funds necessary to make the awards to such schools and to pay the administrative costs of making such arrangements.

"SEC. 1421. PROHIBITION ON STATE OR LOCAL REDUCTION OF OTHER ASSISTANCE.

"No Federal, State, or local agency may, in any year, take a Presidential School of Distinction award into account in determining whether to award any other assistance from Federal, State, or local resources, or in determining the amount of such assistance, to either the Presidential School of Distinction or the local educational agency that has jurisdiction over such school.

"SEC. 1422. EVALUATION.

"(a) IN GENERAL.—The Secretary shall conduct a biennial evaluation of Presidential Schools of Distinction.

"(b) NATIONAL DIFFUSION NETWORK.—The Secretary shall submit information on successful Presidential Schools of Distinction programs to the National Diffusion Network for possible dissemination.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on July 1, 1991.

PART B—INSTRUCTION ON THE HISTORY AND PRINCIPLES OF DEMOCRACY IN THE UNITED STATES

SEC. 321. INSTRUCTION ON THE HISTORY AND PRINCIPLES OF DEMOCRACY IN THE UNITED STATES.

Part F of title IV of the Elementary and Secondary Education Act of 1965 (20 U.S.C. is amended—

(1) by redesignating section 4608 the second place it appears as section 4610; and

(2) by inserting before section 4610 (as redesignated by paragraph (1) of this section) the following:

"SEC. 4609. INSTRUCTION ON THE HISTORY AND PRINCIPLES OF DEMOCRACY IN THE UNITED STATES.

"(a) GENERAL AUTHORITY.—

"(1) The Secretary shall carry out a program to educate students about the history and principles of the Constitution of the United States, including the Bill of Rights, and to foster civic competence and civil responsibility. Such program shall be known as 'We the People . . . The Citizen and the Constitution'.

"(2) The program required by paragraph (1) shall continue and expand the educational activities of the National Bicentennial Competition of the Constitution and Bill of Rights administered by the Center for Civic Education.

"(3) The Secretary is authorized to enter into a contract with the Center for Civic Education to carry out the program required by paragraph (1).

"(b) CONTENTS OF PROGRAM.—The program required by subsection (a)(1) shall provide—

"(1) a course of instruction on the basic principles of the constitutional democracy of the United States and the history of the Constitution of the United States, including the Bill of Rights;

"(2) at the request of participating schools, simulated congressional hearings in the school or community following the course of instruction described in paragraph (1); and

"(3) an annual competition of simulated congressional hearings in congressional districts and at the State and national levels for secondary students who wish to participate.

"(c) PARTICIPANTS.—The program required by subsection (a)(1) shall be made available to local educational agencies in each of the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and American Samoa.

"(d) TEACHER TRAINING.—Amounts appropriated for purposes of carrying out this section may, if sufficient amounts remain after carrying out the program required by subsection (a)(1), be used for providing advanced training to teachers with respect to the Constitution of the United States, including the Bill of Rights.

"(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section $5,000,000 for the fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992 and 1993.".

TITLE IV—MATHEMATICS AND SCIENCE

SEC. 401. FINDINGS AND POLICY.

(a) FINDINGS.—The Congress finds that—

(1) students in the United States are falling behind students from other industrialized nations on tests measuring achievement in mathematics and science;

(2) the Federal Government has a significant role in promoting the study of mathematics and science in elementary and secondary schools by providing financial assistance to local educational agencies to improve the general quality of programs for the study of mathematics and science; and

(3) the Federal Government has indirectly assisted in the postsecondary study of mathematics and science by providing future scientists, mathematicians, and engineers with financial assistance to attend postsecondary institutions, but more incentives are needed to attract high-achieving students into these areas of study.

(b) POLICY.—It is the goal of the United States that, by the year 2000, United States students will be first in the world in mathematics and science achievement. In recognition of this goal, it is the policy of the United States—

(1) to, by the year 2000, expand funding for the Dwight D. Eisenhower Mathematics and Science Education Act so that all elementary teachers and all secondary teachers of mathematics and science will have an opportunity for updating and improving their mathematics and science education skills;

(2) to, by 1995, expand funding for such Act so that all elementary school teachers have an opportunity for skill improvement; and

(3) to award scholarships to high-achieving students to pursue the study of mathematics, science, and related subjects at postsecondary institutions.

SEC. 402. NATIONAL SCIENCE SCHOLARS PROGRAM.

(a) AMENDMENT.—Part A of title IV of the Higher Education Act of 1965 (20 U.S.C. 1001 et seq.) is amended—

(1) by redesignating subparts 7 and 8 as subparts 8 and 9, respectively; and

(2) by inserting immediately after subpart 6 the following new subpart:

"Subpart 7—National Science Scholars Program

"PURPOSE; APPROPRIATIONS AUTHORIZED

"SEC. 419L. (a) PURPOSE.—It is the purpose of this subpart—

"(1) to establish a National Science Scholars Program to recognize student excellence and achievement in the physical, life, and computer sciences, mathematics, and engineering;

"(2) to provide financial assistance to students under paragraph (1) to continue their postsecondary education in such fields of study at sustained high levels of performance; and

"(3) to contribute to strengthening the leadership of the United States in these fields.

"(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $5,000,000 for fiscal year 1991.

"SCHOLARSHIPS AUTHORIZED

"SEC. 419M. (a) PROGRAM AUTHORITY.—(1) The Secretary is authorized, in accordance with the provisions of this subpart, to carry out a program of awarding scholarships for the study of the life, physical, or computer sciences, mathematics, engineering, or mathematics and science education; and who—

"(A) are selected by the President;

"(B) have demonstrated excellence and outstanding academic achievement in the life, physical, or computer sciences, mathematics or engineering; and

"(C) show promise of continued outstanding academic performance in such field of study.

"(2) The Secretary may carry out this program through grants, contracts, or cooperative agreements.

"(b) PERIOD OF AWARDS.—

"(1) PERIOD OF INITIAL AWARD.—A student who satisfies the requirements of section 419O(a) may receive a scholarship, for a period of 1 academic year, for the first year of undergraduate study at an institution of higher education.

"(2) CONTINUATION AWARDS.—A student who satisfies the requirements of section 419O(b) may receive additional scholarships, each awarded for a period of 1 academic year, in order to complete his or her undergraduate course of study. A student may receive additional scholarships for up to 3 academic years of undergraduate study, except that, in the case of a student who is enrolled in an undergraduate course of study that requires attendance for 5 academic years, the student may receive additional scholarships for up to 4 academic years of undergraduate study.

"(c) USE AT ANY INSTITUTION PERMITTED.—A student awarded a scholarship under this subpart may attend any institution of higher education, as defined in section 1201(a) of the Act.

"(d) NATIONAL SCIENCE SCHOLARS.—Students awarded scholarships under this subpart shall be known as 'National Science Scholars'.

"SELECTION OF SCHOLARS

"SEC. 419N. (a) SELECTION CRITERIA.—The Secretary shall appoint a panel of experts, composed of scientists, mathematicians, engineers, and representatives of industries that utilize advanced technologies, to recommend to the Secretary specific academic achievement criteria for use in the nomination of scholars. The Secretary shall review the panel's recommendations and publish appropriate academic achievement criteria in the Federal Register.

"(b) SELECTION PROCESS.—

"(1) STATE NOMINATION.—Using the criteria described in subsection (a), each State shall nominate at least 4, but not more than 10, students from each congressional district within that State. The President shall select students to receive scholarships under this part in accordance with paragraph (2).

"(2) PRESIDENTIAL SELECTION.—(A) After considering the students nominated under paragraph (1), the President shall select at least 30 students to receive scholarships. The President may consult a board, consisting of the President's Science Advisor, the Secretary, and the Director of the National Science Foundation, regarding the selection of students under this subparagraph.

"(B) After considering the students nominated under paragraph (1), the President shall select an additional 540 students to receive scholarships. Each Senator and Member of the House of Representatives (or in the case of the District of Columbia, Puerto Rico, the Virgin Islands, Guam, or American Samoa, the Delegate or Resident Commissioner) is entitled to make recommendations to the President regarding the selection of students, nominated under paragraph (1), for 1 scholarship.

"(3) CONSIDERATION FOR ECONOMICALLY DISADVANTAGED.—In the nomination and selection of students for awards under this part, special consideration shall be accorded to

students of exceptional merit who are economically disadvantaged.

"(c) USE OF EXCESS FUNDS.—If the funds available under this subpart for any fiscal year exceed the amounts required for initial and continuing awards under section 419M(b), the President may, after considering the students nominated under subsection (b)(1), select additional students to receive scholarships under section 419M(b)(1).

"(d) DISBURSAL OF SCHOLARSHIP PROCEEDS.—Scholarship proceeds shall be disbursed on behalf of students who receive scholarships under this subpart to the institutions of higher education at which the students are enrolled. No scholarship proceeds shall be disbursed on behalf of a student until the student is enrolled at an institution of higher education.

"ELIGIBILITY OF SCHOLARS

"SEC. 419O. (a) REQUIREMENTS FOR INITIAL AWARD.—To be eligible to receive a scholarship under section 419M(b)(1), a student shall—

"(1) be scheduled to graduate from a public or private secondary school, or to obtain the equivalent of a certificate of graduation (as recognized by the State in which the student resides), during the school year in which the award is made, or be scheduled to so graduate or obtain such equivalent within three months after the date of the award;

"(2) have demonstrated outstanding academic achievement in secondary school in physical, life, or computer sciences, mathematics, or engineering;

"(3) have been accepted for enrollment at an institution of higher education as a full-time undergraduate student (as determined by the institution); and

"(4) have declared a major in 1 of the life, computer, or physical sciences, mathematics, or engineering, or provided a written statement to the State of his or her intent to major in 1 of these fields of study, if it is the policy of the institution at which the student has been accepted for enrollment that students not declare a major until a later point in their course of study.

"(b) REQUIREMENTS FOR CONTINUATION AWARDS.—A student who has received a scholarship under section 419M(b)(1) may receive a scholarship for a subsequent academic year of undergraduate education under section 419M(b)(2) if the student—

"(1) maintains a superior level of academic achievement, as determined in accordance with the regulations of the Secretary;

"(2) continues to major in, or provides a statement to the State as described in subsection (a)(4) of his or her continuing intent to major in, one of the life, computer, or physical sciences, mathematics, or engineering; and

"(3) continues to be enrolled at an institution of higher education as a full-time undergraduate student (as determined by the institution).

"(c) WAIVER OF FULL-TIME ATTENDANCE REQUIREMENT.—The Secretary may waive the full-time attendance requirements in this section in unusual circumstances.

"(d) FAILURE TO MEET ELIGIBILITY REQUIREMENTS.—In the event that the student fails to meet the requirements of this section, the student's eligibility to receive further scholarships (or scholarship proceeds) under this subpart shall be determined in accordance with the regulations of the Secretary.

"SCHOLARSHIP AMOUNT

"SEC. 419P. (a) AMOUNT OF AWARD.—Except as provided in subsections (b) and (c), the amount of a scholarship awarded under this subpart for any academic year shall be $10,000.

"(b) RELATION TO COST OF ATTENDANCE.—Notwithstanding subsection (a), the amount of a scholarship awarded under this subpart shall be reduced by the amount that the scholarship exceeds the student's cost of attendance, as defined in section 472 of this Act. A scholarship awarded under this subpart shall not be reduced on the basis of the student's receipt of other forms of Federal student financial assistance, but shall be taken into account in determining the eligibility of the student for those other forms of Federal student financial assistance.

"(c) ADJUSTMENTS FOR INSUFFICIENT APPROPRIATIONS.—In the event that funds available in a fiscal year are insufficient to fully fund all awards under this subpart, the amount paid to each student shall be reduced proportionately.

"SUMMER EMPLOYMENT OPPORTUNITIES FOR SCHOLARS

"SEC. 419Q. (a) PRIORITY FOR SUMMER EMPLOYMENT.—To the extent that they are otherwise qualified, students receiving scholarships under this part shall be given priority consideration for federally financed summer employment in federally funded research and development centers, that, to the maximum extent practicable, complements and reinforces the educational program of these students.

"(b) FEDERAL AGENCY COOPERATION.—Federal agencies shall cooperate fully with the Secretary and participate actively in providing appropriate summer employment opportunities for such students.".

(b) CONFORMING AMENDMENTS.—

(1) Section 401(b) of the Higher Education Act of 1965 is amended by striking out "subparts 1 through 8," and inserting in lieu thereof "subparts 1 through 9,".

(2) Section 481(a)(1) of such Act is amended by striking out "except subpart 6" and inserting in lieu thereof "except subparts 6 and 7".

(3) Section 483(f) of such Act is amended by striking out "subparts 4, 5, and 7" each place it appears and inserting in lieu thereof "subparts 4, 5, and 8".

(c) EFFECTIVE DATE.—The amendments made by this section shall be effective on July 1, 1991.

TITLE V—FAMILY LITERACY AND LIFELONG LEARNING

SEC. 501. SHORT TITLE.

This title may be cited as the "Literacy for All Americans Act of 1990".

SEC. 502. FINDINGS AND POLICY.

(a) FINDINGS.—The Congress finds that—

(1) nearly 30,000,000 adults in the United States have serious problems with literacy (the ability to read, write, speak English, compute, and solve problems effectively);

(2) literacy problems are closely associated with poverty and pose a major threat to the economic well-being of the United States;

(3) present public and private literacy programs reach only a small portion of the population in need and often result in only minimal learning gains;

(4) literacy programs generally lack adequate funding, adequate coordination with other literacy programs, and an adequate investment in teacher training and technology; and

(5) access to better information about the best practices in the literacy field and more research in order to provide better diagnostic and instructional tools are essential for the improvement of literacy and employability in the United States.

(b) POLICY.—It is the goal of the United States that, by the year 2000, every American will be literate and will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship. In recognition of this goal, it is the policy of the United States—

(1) to provide all workers and adults in the United States with the opportunity to acquire the skills needed to function productively;

(2) to promote the pursuit of lifelong learning by all individuals in the United States by providing essential support for the Nation's system of public school, academic, and research libraries;

(3) to establish programs for large-scale public-private partnerships in workforce literacy for upgrading the basic functional literacy skills of workers;

(4) to provide for teacher training and instructional technologies to increase the number of students served by each teacher and increase the rate and extent of learning gains;

(5) to provide easy access to information on model programs by teachers, community-based organizations, volunteers, small businesses, and large businesses; and

(6) to help build the capacity of States to assist larger numbers of adults and families.

SEC. 503. DEFINITIONS.

For purposes of this title:

(1) APPLICABLE PROGRAM.—The term "applicable program" means any program under—

(A) the Adult Education Act;

(B) the Carl D. Perkins Vocational Education Act;

(C) the Job Training Partnership Act; or

(D) the Library Services and Construction Act.

(2) BASIC SKILLS.—The term "basic skills" means—

(A) reading in the English language;

(B) writing in the English language;

(C) speaking in the English language;

(D) mathematics; and

(E) problem-solving.

(3) LITERACY.—The term "literacy" means the attainment of a level of proficiency in basic skills that is sufficient to allow each individual to meet individual goals for proficiency and to meet social and economic demands for proficiency.

(4) SECRETARY.—Except as otherwise provided, the term "Secretary" means the Secretary of Education.

PART A—LITERACY: STRATEGIC PLANNING, RESEARCH, AND COORDINATION

Subpart 1—National Planning, Research, and Coordination

SEC. 511. INTERAGENCY TASK FORCE ON LITERACY.

(a) ESTABLISHMENT.—There is established an Interagency Task Force on Literacy (in this section referred to as the "Task Force").

(b) COMPOSITION.—

(1) IN GENERAL.—The Task Force shall consist of—

(A) the Secretary of Education;

(B) the Secretary of Labor;

(C) the Secretary of Health and Human Services; and

(D) any other head of an agency that the President considers appropriate.

(2) SPECIAL APPOINTMENTS.—Any officer not appointed to the Task Force who is the head of an agency of the United States may be assigned by the President or the Chairperson of the Task Force to serve whenever matters within the jurisdiction of the agency headed

by such officer are to be considered by the Task Force.

(3) CHAIRPERSON.—The President is requested to appoint the Chairperson of the Task Force from among its members to serve as Chairperson at the President's discretion.

(c) QUORUM.—1 more than ½ of the members of the Task Force shall constitute a quorum for the purpose of transmitting recommendations and proposals to the President, but a lesser number may meet for other purposes.

(d) ABSENCES.—Any member of the Task Force who is unable to attend a meeting of the Task Force shall appoint an appropriate Assistant Secretary from the department of which the member is the Secretary, or in the case of an agency, the second-ranking official of such agency, to represent the member for that meeting.

(e) DUTIES OF THE TASK FORCE.—The Task Force shall—

(1) coordinate the various literacy functions of the Federal Government;

(2) measure departmental progress toward meeting the goals of this Act;

(3) devise, coordinate, and implement government-wide initiatives in workplace literacy and other high-priority issues affecting adult and family literacy;

(4) facilitate the integration of resources across programs; and

(5) issue an annual report to Congress and the President concerning the progress being made by the Federal Government, the individual States, and the United States as a whole toward improving adult and family literacy.

SEC. 512. NATIONAL INSTITUTE FOR LITERACY.

(a) ESTABLISHMENT.—There is established the National Institute for Literacy (in this section referred to as the "Institute"). The Institute may include any research and development center supported under section 405(d)(4)(A)(ii) of the General Education Provisions Act and any other center, institute, or clearinghouse established within the Department of Education the purpose of which is determined by the Secretary of Education to be related to the purpose of the Institute.

(b) DUTIES.—The Institute shall, in order to improve and expand the system for delivery of literacy services—

(1) conduct basic and applied research and demonstrations on literacy, including—

(A) how adults learn to read and write and acquire other skills;

(B) how the literacy skills of parents affect the ability of children to learn literacy skills;

(C) the assessment of literacy skills;

(D) the best methods for assisting adults and families to acquire literacy skills, including the use of technology;

(E) the special literacy needs of individuals with learning disabilities and individuals with limited English proficiency;

(F) how to effectively reach and teach the most disadvantaged individuals; and

(G) how to attract, train, and retain professional and volunteer teachers of literacy;

(2) assist Federal, State, and local agencies in the development, implementation, and evaluation of policy with respect to adult literacy by—

(A) establishing a national data base with respect to—

(i) adult literacy and basic skills programs (including programs in Federal departments, State agencies, and local agencies, and programs that are privately supported through nonprofit entities and for-profit entities;

(ii) assessment tools and outcome measures;

(iii) the amount and quality of basic education provided in the workplace by businesses and industries; and

(iv) progress made toward the national literacy goals described in section 2(a)(8); and

(B) providing technical and policy assistance to government entities for the improvement of policy and programs relating to literacy;

(3) provide program assistance and training for literacy programs throughout the United States and technical and policy assistance to government entities in order to improve the effectiveness of such programs and to increase the number of such programs, which assistance and training shall—

(A) be based on the best available research and knowledge; and

(B) be coordinated with activities conducted by—

(i) regional educational laboratories supported under section 405(d)(4)(A)(i) of the General Education Provisions Act;

(ii) curriculum centers assisted under section 251(a)(8) of the Carl D. Perkins Vocational Education Act; and

(iii) other educational and training entities that provide relevant technical assistance; and

(4) collect and disseminate information to Federal, State, and local entities with respect to literacy methods that show great promise (including effective methods of assessment, effective literacy programs, and other information obtained through research or practice relating to adult and family learning that would increase the capacity and quality of literacy programs in the United States), using a variety of methods to ensure that the best information is received by State and local providers of literacy services.

(c) NATIONAL INSTITUTE FOR LITERACY GOVERNING BOARD.—There is established the National Institute for Literacy Governing Board (in this Act referred to as the "Board"), which shall consist of the following:

(1) The Secretary of Education.

(2) The Secretary of Labor.

(3) The Secretary of Health and Human Services.

(4) The head of any other Federal department that chooses to participate and that is invited by the Board.

(5) 8 individuals, not more than 4 of whom shall be from the same political party, appointed (not later than the end of the 90-day period beginning on the date of the enactment of this Act) by the President with the advice and consent of the Senate from individuals who are not otherwise officers or employees of the Federal Government who are representatives of—

(A) literacy organizations and providers of literacy services, including—

(i) providers of literacy services receiving assistance under the Adult Education Act; and

(ii) nonprofit providers of literacy services;

(B) businesses that have demonstrated interest in literacy programs;

(C) literacy students;

(D) experts in the area of literacy research;

(E) State and local governments; and

(F) organized labor.

(d) DUTIES.—

(1) IN GENERAL.—The Board shall determine policy for the Institute, set an agenda for the Institute, and oversee the operations of the Institute.

(2) CONTRACT AND GRANT AUTHORITY.—The Board may enter into contracts or cooperative agreements with, or make grants to, individuals, public or private nonprofit institutions, agencies, organizations, or consortia of such institutions, agencies, or organizations to carry out the activities of the Institute. Such grants, contracts, or agreements shall be subject to the laws and regulations that generally apply to grants, contracts, or agreements entered into by the Secretary of Education.

(e) TERMS.—

(1) IN GENERAL.—Each member who is not an ex officio member shall be appointed for a term of 3 years. Any such member may be appointed for not more than 2 consecutive terms.

(2) VACANCIES.—Any member appointed to fill a vacancy occurring before the expiration of the term for which the member's predecessor was appointed shall be appointed only for the remainder of that term. A member may serve after the expiration of that member's term until a successor has taken office. A vacancy in the Board shall be filled in the manner in which the original appointment was made. A vacancy in the Board shall not affect the powers of the Board.

(f) WAIVER OF LIMITATION ON EXECUTIVE SCHEDULE POSITIONS.—Appointments may be made under this section without regard to section 5311(b) of title 5, United States Code.

(g) BASIC PAY.—

(1) RATES OF PAY.—Except as provided in paragraph (2), members of the Board shall each be entitled to receive the daily equivalent of the maximum annual rate of basic pay payable for grade GS-15 of the General Schedule for each day (including travel time) during which they are engaged in the actual performance of duties vested in the Board.

(2) PROHIBITION OF COMPENSATION OF FEDERAL EMPLOYEES.—Members of the Board who are full-time officers or employees of the United States shall receive no additional pay, allowances, or benefits by reason of their service on the Board.

(h) TRAVEL EXPENSES.—Each member of the Board shall receive travel expenses, including per diem in lieu of subsistence, in accordance with sections 5702 and 5703 of title 5, United States Code.

(i) QUORUM.—A majority of the members of the Board shall constitute a quorum but a lesser number may hold hearings. Any recommendation may be passed only by a majority of its members present.

(j) CHAIRPERSON; VICE CHAIRPERSON.—The Chairperson and Vice Chairperson of the Board shall be elected by the members. The term of office of the Chairperson and Vice Chairperson shall be 1 year.

(k) MEETINGS.—The Board shall meet at the call of the Chairperson or a majority of its members.

(l) GIFTS, BEQUESTS, AND DEVISES.—The Board may accept, use, and dispose of gifts, bequests, or devises of services or property, both real and personal, for the purpose of aiding or facilitating the work of the Board. Gifts, bequests, or devises of money and proceeds from sales of other property received as gifts, bequests, or devises shall be deposited in the Treasury and shall be available for disbursement upon order of the Board.

(m) MAILS.—The Board may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(n) STAFF.—The Board may appoint and fix the pay of a Director and such staff as it considers appropriate.

(o) APPLICABILITY OF CERTAIN CIVIL SERVICE LAWS.—The Director and staff of the Board may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of that title relating to classification and General Schedule pay rates, except that an individual so appointed may not receive pay in excess of the annual rate of basic pay payable for GS-18 of the General Schedule.

(p) EXPERTS AND CONSULTANTS.—The Board may procure temporary and intermittent services under section 3109(b) of title 5, United States Code.

(q) REPORT.—Not later than the expiration of the 3-month period beginning on the last day of any fiscal year in which the Institute receives assistance under this section, the Institute shall submit a report to the President and to the Congress. Such report shall include a comprehensive and detailed description of the Institute's operations, activities, financial condition, and accomplishments in the field of literacy for such fiscal year.

(r) AUTHORIZATION OF APPROPRIATIONS.—

(1) IN GENERAL.—There are authorized to be appropriated to carry out the provisions of this title $15,000,000 for each of the fiscal years 1991, 1992, 1993, 1994, and 1995.

(2) USE OF OTHER FUNDS.—Any amounts appropriated to the Secretary of Education, the Secretary of Labor, the Secretary of Health and Human Services, or any other department that participates in the Institute for purposes that the Institute is authorized to perform under this title may be provided to the Institute for such purposes.

Subpart 2—State Planning, Research, and Coordination

SEC. 516. STATE COORDINATION OF ADULT LITERACY PROGRAMS.

Subsection (f) of section 332 of the Adult Education Act (20 U.S.C. 1205a) is amended—

(1) by amending paragraph (1) to read as follows:

"(1) meet with the State agency responsible for literacy training to advise on the development of a State plan for literacy and for adult education that fulfills the literacy and adult education needs of the State, especially with respect to the needs of the labor market, economic development goals, and the needs of the individuals in the State;" and

(2) by amending paragraph (2) to read as follows:

"(2) advise the Governor concerning—

"(A) the development and implementation of measurable State literacy and adult education goals, especially with respect to—

"(i) improving levels of literacy in the State;

"(ii) improving literacy programs in the State; and

"(iii) fulfilling the long-term literacy goals of the State;

"(B) the coordination of State literacy training programs in order to progress toward the long-term literacy goals of the State;

"(C) the expansion of literacy programs to eventually fulfill the educational needs of all illiterate adults in the State;

"(D) the improvement of the quality of literacy programs in the State by supporting integration of services, staff training, and technology-based learning; and

"(E) private sector initiatives that would improve adult education programs and literacy programs, especially through public-private partnerships; and".

SEC. 517. LITERACY RESOURCE CENTERS.

(a) ESTABLISHMENT.—From amounts appropriated pursuant to subsection (f), the Secretary shall make grants for purposes of establishing a network of State or regional adult literacy resource centers.

(b) AUTHORIZED ACTIVITIES.—The centers established with assistance under subsection (a) shall—

(1) serve as a reciprocal link between the National Institute for Literacy and service providers for the purpose of sharing information, data, research, and expertise;

(2) improve the diffusion and adoption of state-of-the-art teaching methods;

(3) assist in coordinating the delivery of services by public and private agencies;

(4) encourage government-industry partnerships;

(5) encourage innovation and experimentation in literacy services;

(6) provide technical and policy assistance to State and local governments in improving literacy policy and programs; and

(7) provide training and technical assistance to service providers, including service providers that serve special populations.

(c) STATE APPLICATIONS.—Each State or group of States, as appropriate, that desires to receive a grant under this section shall submit to the Secretary an application that has been reviewed and commented on by the State advisory board and that describes how the State or group of States will—

(1) develop a literacy resource center or expand an existing literary resource center;

(2) provide services and activities with the assistance provided under this section; and

(3) assure access to services of the center for all public and private programs providing or seeking to provide basic skills instruction, including local educational agencies, service delivery areas under the Job Training Partnership Act, welfare agencies, labor organizations, businesses, volunteer groups, and community based organizations.

(d) ALLOTMENT.—From sums available for purposes of making grants under this section for any fiscal year, the Secretary shall allot to each State having an approved application under subsection (c) an amount which bears the same ratio to such sums as the number of adults in such State who do not have a certificate of graduation from a school providing secondary education (or its equivalent) and who are not currently enrolled or required to be enrolled in the schools of such State bears to the number of such adults in all States.

(e) MATCHING REQUIREMENT.—Each State that receives assistance under this section shall agree to provide funds for the center established with such assistance in the following amounts:

(1) In an amount equal to 10 percent of the amount provided under this section for each of the first 2 years for which assistance is provided under this section.

(2) In an amount equal to 20 percent of the amount provided under this section for the third year for which such assistance is provided.

(3) In an amount equal to 30 percent of the amount provided under this section for the fourth year for which such assistance is provided.

(4) In an amount equal to 40 percent of the amount provided under this section for the fifth year and each succeeding year for which such assistance is provided.

(f) REGIONAL CENTERS.—

(1) AUTHORIZATION.—A group of States may form an interstate compact to develop and operate a regional adult literacy resource center if the States determine that a regional approach is more appropriate for their situation.

(2) REDUCTION OF MATCHING REQUIREMENT FOR REGIONAL CENTERS.—Any State that receives assistance under this section as part of a regional center shall only be required to provide under subsection (e) 50 percent of the funds such State would otherwise be required to provide under such subsection.

(3) REGIONAL CENTERS REQUIRED IN SOME AREAS.—In any fiscal year in which the Secretary determines that the amount a State is entitled to receive under this section is insufficient to carry out this section, the Secretary may designate certain States that may only receive assistance under this section as part of a regional center.

(4) BASIS FOR DESIGNATION.—The Secretary shall select States that may receive assistance under this section only as part of a regional center on the basis of the proportionate population in each State in need of services.

(5) RESERVATION OF FUNDS FOR STATE SERVICES.—In any fiscal year in which paragraph (2) applies, the Secretary may allow certain States that receive assistance as part of a regional center to reserve a portion of such assistance for State literacy services pursuant to this section.

(g) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out the provisions of this section $25,000,000 for each of the fiscal years 1991, 1992, and 1993, and such sums as may be necessary for each of the fiscal years 1994 and 1995.

SEC. 518. STATE LITERACY COORDINATION PLAN.

Subsection (c) of section 342 of the Adult Education Act (20 U.S.C. 1206a) is amended—

(1) by amending paragraph (1) to read as follows:

"(1) describe and provide for the fulfillment of the literacy needs of individuals in the State;";

(2) by striking paragraph (9);

(3) by redesignating paragraphs (2) through (8) as paragraphs (3) through (9), respectively;

(4) by inserting after paragraph (1) the following:

"(2) set forth measurable goals for improving literacy levels, retention in literacy programs, and long-term learning gains of individuals in the State and describe a comprehensive approach for achieving such goals, including the expected outcomes of programs, services, and activities during the 4-year period;";

(5) in paragraph (4) (as redesignated by paragraph (3) of this section)—

(A) by striking "the use of" and inserting "coordination by";

(B) by striking "other than" and inserting "including"; and

(C) by striking "such as"; and

(6) in paragraph (9) (as redesignated by paragraph (3) of this section), by inserting before the semicolon the following: "and the progress the State has made toward achieving the goals set forth in each State plan subsequent to the initial State plan".

SEC. 519. EVALUATION.

Section 352 of the Adult Education Act is amended—

(1) by striking "and" at the end of paragraph (2);

(2) by striking the period at the end of paragraph (3) and inserting "; and"; and

(3) by adding at the end the following:

"(4) annually submit a report to the Interagency Task Force on Literacy describing—

"(A) how the State will or has met the literacy goals established in its State plan; and

"(B) progress being made in reaching its literacy goals, coordination of workplace literacy services, and building a high quality delivery system for adult literacy programs.".

PART B—INVESTMENT IN LITERACY

SEC. 521. AMENDMENTS TO THE ADULT EDUCATION ACT.

(a) AUTHORIZATION OF APPROPRIATIONS; ALLOTMENTS.—Section 313 of the Adult Education Act (20 U.S.C. 1201b) is amended—

(1) in subsection (a)—

(A) by inserting "(1)" before "There"; and

(B) by striking "1993" and inserting the following: "1990, $280,000,000 for the fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995"; and (2) by amending subsection (b) to read as follows:

"(b) ALLOTMENT.—(1) From the amounts appropriated pursuant to subsection (a) for any fiscal year, the Secretary shall allot—

"(A) $100,000 each to Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Virgin Islands, and the Trust Territory of the Pacific Islands; and

"(B) $250,000 to each of the other States.

"(2) In any fiscal year the Secretary, from the amount remaining after the allotments are made as required by paragraph (1), shall allot to each State an amount which bears the same ratio to such remaining amount as the number of adults in such State who do not have a certificate of graduation from a school providing secondary education (or its equivalent) and who are not currently enrolled or required to be enrolled in schools of such State bears to the number of such adults in all States.".

(b) USE OF FUNDS.—Subsection (a) of section 322 of the Adult Education Act (20 U.S.C. 1203b(b)) is amended—

(1) by amending paragraph (1) to read as follows:

"(1) Grants to States under this subpart shall be used in accordance with State plans (and amendments thereto) approved under sections 341 and 351, to pay the Federal share of the cost of the establishment or expansion of adult education programs to be carried out by local educational agencies, community-based organizations, public or private nonprofit agencies, postsecondary educational institutions, and other institutions that have the capacity to provide literacy services to adults and families. In determining which programs shall receive assistance under the preceding sentence, the State shall ensure that all potential applicants have a fair opportunity to apply and be considered for such assistance. Where relevant to making such determination, the State shall consider—

"(A) the past effectiveness of applicants in providing effective services (especially with respect to recruitment and retention of educationally disadvantaged adults and the learning gains demonstrated by such adults);

"(B) the degree to which the applicant will coordinate and utilize other literacy and social services available in the community; and

"(C) the commitment of the applicant to serve individuals in the community that are most in need of literacy services.";

(2) in paragraph (3)—

(A) by striking the first sentence; and

(B) by inserting after "sources;" the following: "the projected goals of the applicant with respect to participant recruitment, retention, and successful completion of the literacy program;";

(3) in paragraph (4)—

(A) by striking "(A)"; and

(B) by striking subparagraph (B);

(4) by redesignating paragraphs (3) and (4) (as amended by paragraphs (2) and (3) of this subsection) as paragraphs (4) and (5), respectively; and

(5) by inserting after paragraph (2) the following:

"(3)(A) Grants to States provided under this section shall also be used for competitive 2-year grants to public housing authorities for literacy programs and related activities. Any grant provided under the preceding sentence shall be referred to as a 'Gateway Grant'.

"(B) The Secretary shall, not less often than every 2 years, evaluate any grants made under this paragraph and report the results of such evaluation to the Committee on Education and Labor of the House of Representatives and the Committee on Labor and Human Resources of the Senate.".

(c) EVALUATION.—Section 352 of the Adult Education Act (20 U.S.C. 1207a) (as amended by section 519 of this Act) is amended—

(1) in paragraph (1), by inserting before the semicolon the following: ", including—

"(A) the number and percentage of local educational agencies, community-based organizations, volunteer groups, and other organizations that are grant recipients; and

"(B) the amount each such grant recipient receives under this Act"; and

(2) in paragraph (2)—

(A) by striking "before the end" and all that follows through "shall consider" and inserting the following: "evaluate ¼ of the grant recipients each year so that at the end of such period each grant recipient shall have been evaluated once and such evaluations shall consider, at a minimum—";

(B) by redesignating subparagraphs (A) through (D) as subparagraphs (B) through (E), respectively;

(C) by inserting before subparagraph (B) (as redesignated by subparagraph (B) of this paragraph) the following:

"(A) the projected goals of the grant recipient as described in its application under section 322(a)(3);"; and

(D) by amending subparagraph (D) (as redesignated by subparagraph (B) of this paragraph) to read as follows:

"(D) the success of the grant recipient in recruiting, retaining, and assisting participants in reaching desired literacy goals and obtaining subsequent work experience; and".

(d) DEMONSTRATION PROJECTS.—Subsection (a) of section 353 of the Adult Education Act (20 U.S.C. 1208) is amended—

(1) by striking "and" at the end of paragraph (1);

(2) by striking the period at the end of paragraph (2) and inserting a semicolon; and

(3) by adding at the end the following new paragraphs:

"(3) development and expansion of innovative programs; and

"(4) support for statewide volunteer technical assistance activities.".

SEC. 522. INVESTMENT IN TRAINING AND TECHNOLOGY.

(a) CHALLENGE GRANTS FOR TRAINING AND TECHNOLOGY.—

(1) GENERAL AUTHORITY.—The Secretary is authorized to make matching grants to States or groups of States for purposes of—

(A) training staff to provide adult and family literacy instruction; and

(B) providing, purchasing, or developing learning technologies related to adult and family literacy.

(2) STATE ALLOCATIONS.—From amounts appropriated for purposes of making grants under this subsection, the Secretary shall first allocate $1,000,000 to each State that applies for a grant under this subsection. From any remaining amounts, the Secretary shall allocate to each such State an additional amount that bears the same ratio to such remainder as the number of adults in such State who do not have a certificate of graduation from a school providing secondary education (or its equivalent) and who are not currently enrolled or required to be enrolled in the schools of such State bears to the number of such adults in all States applying for grants under this subsection.

(3) INTERSTATE AGREEMENTS.—A group of States may enter into an agreement to provide the training services described in paragraph (5)(A) at a regional center or to make a joint purchase of the learning technologies described in paragraph (5)(B).

(4) MATCHING REQUIREMENT.—(A) Except as provided in subparagraph (B), each State that receives a grant under this subsection shall agree to provide, from other sources, assistance for the activities for which the grant is received. Such assistance shall be in an amount equal to not less than 20 percent of the amount of the grant. Such assistance may be in the form of State funds or Federal funds provided under provisions of law other than this subsection for staff training, capital improvement, or general administration (to the extent that such funds are used for training individuals to provide literacy instruction, adult education, or basic skills instruction).

(B) Each State that enters into an interstate agreement under paragraph (3) shall agree to provide, from other sources, assistance for the activities for which the grant is received in an amount equal to not less than 20 percent of the amount of the grant.

(5) AUTHORIZED USES.—Each State that receives a grant under this subsection—

(A) shall use not less than 60 percent of amounts received under the grant for purposes of training staff to provide adult literacy instruction; and

(B) may use not more than 40 percent of amounts received under the grant for purposes of providing, purchasing, or developing learning technologies related to adult literacy.

(6) APPLICATIONS.—Each State or group of States that desires to receive a grant under this subsection shall submit an application to the Secretary at such time, in such manner, and containing or accompanied by such information as the Secretary may reasonably require.

(7) UNIFORM ACCESS TO ADULT LITERACY FACILITIES AND EQUIPMENT.—Each State that receives funds under this subsection shall provide assurances that any equipment, facilities, or training services purchased or supported with assistance under this subsection—

(A) will be available without charge to any adult literacy or basic skills program receiving Federal assistance; and

(B) will be available at cost to corporate efforts, community-based organizations, volunteer groups, or other groups providing

adult literacy programs that do not receive Federal assistance.

(8) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out the provisions of this subsection $40,000,000 for the fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995.

(b) LITERACY LEADER TRAINING FUND.—

(1) ESTABLISHMENT OF FUND.—There is established the Literacy Leader Training Fund (in this subsection referred to as the "Fund").

(2) SCHOLARSHIPS.—The Secretary shall make grants from the Fund to professional individuals pursuing a career in adult educational instruction, adult educational management, research in adult education, or innovation in adult education for purposes of education or research intended to expand their expertise.

(3) APPLICATIONS.—The Secretary shall establish a process for submission and review of applications for grants under this subsection.

(4) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out the provisions of this subsection $10,000,000 for the fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995.

SEC. 523. AMENDMENTS TO THE EVEN START PROGRAM.

(a) GENERAL RULE.—Subsection (c) of section 1052 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2742) is amended—

(1) by inserting after "part" the following: "other than section 1053";

(2) by striking "and"; and

(3) by inserting before the period the following: ", Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands".

(b) ALLOCATION.—Section 1053 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2743) is amended—

(1) by amending subsection (a) to read as follows:

"(a) RESERVATION FOR MIGRANT PROGRAMS AND TERRITORIES.—In each fiscal year in which this section applies, the Secretary shall first reserve for programs consistent with the purpose of this part—

"(1) for migrant children, an amount equal to 3 percent of the amount appropriated for purposes of carrying out this part, which programs shall be conducted through the Office of Migrant Education; and

"(2) for allocations to Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands, an appropriate amount comparable to their relative need as measured by the number of children in such territories who are eligible to be counted under section 1005(c).''; and

(2) by adding at the end the following:

"(d) For the purpose of this section, the term 'State' includes each of the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico.".

PART C—BUSINESS LEADERSHIP FOR EMPLOYMENT SKILLS

SEC. 531. NATIONAL STRATEGIES IN HUMAN RESOURCE DEVELOPMENT PROGRAM.

(a) PURPOSE.—It is the purpose of this section—

(1) to provide basic skills training to the currently employed, especially those workers who are marginally employed with low basic skills and limited opportunity for long-term employment and advancement, by establishing large-scale national strategies in workforce literacy;

(2) to develop, test, and evaluate replicable national strategies based on regional, State, and industrywide cooperative ventures that will demonstrate effective approaches to improving the levels of adult literacy in the American workplace, that can be implemented in the near-term and provide adequate incentive for business investment in workforce literacy, and are cost-effective for individual employers and the Nation's economy as a whole.

(b) GENERAL AUTHORITY.—The Secretary of Labor, in consultation with the Secretary of Education and the Secretary of Commerce, is authorized to carry out a program of making grants to business, business associations, industry, labor (or a combination of small and medium-sized business and consortia thereof), either separately or as joint ventures with governmental entities on a local, statewide (including SEA's), regional, or national level (or a combination or consortia thereof), to establish and provide large-scale models in strategic approaches to improving the basic skills of workforce sectors.

(c) USES OF FUNDS.—Grants awarded under this section shall be used to provide—

(1) basic skills training that is cost effective and needed by employees and required by their employers to establish a trainable workforce which can take advantage of further job specific training and advance the productivity of the labor force on an individual, industrywide, and national level;

(2) specific program offerings, which may include—

(A) English as a second language instruction;

(B) communications skill building;

(C) reading and writing skill building; and

(D) computation and problem solving;

(3) where appropriate, workplace literacy audits which assess individuals' basic skill needs and of the basic skill level required by the workforce sector;

(4) evaluations of programs in terms of outcome measures such as skill attainment, enhanced worker employability, increased business productivity;

(5) the establishment, as appropriate, of technology-based learning environments, such as computer-based learning centers; and

(6) the support services needed by the workers, such as child care and transportation, so they can fully participate in the program funded under subsection (b) of this section.

(d) GRANT ADMINISTRATION.—

(1) Applications for grants authorized under subsection (b) shall be submitted jointly by the governmental entity or entities and the business or labor entity or entities proposing to form a joint venture for the purposes set forth in subsection (c).

(2) The Secretary shall designate one of the entities submitting the application for each grant as the grant recipient responsible for the administration and reporting requirements of the grant.

(3) 5 percent of the grant may be reserved for the administration of the grant.

(e) ABILITY TO MAKE SUBCONTRACTS.—A grant recipient under this section may, by contract, secure the actual service delivery of basic literacy and workforce competency skills training from experienced adult education, English as a second language, basic skills, and literacy agencies, including public agencies for-profit and not-for-profit entities, community-based and volunteer programs and their national associations.

(f) APPLICATION AND GRANT AWARD PROCESS.—

(1) To receive a grant under this section, a joint proposal shall be submitted by business, business associations, industry, or organized labor, a plan outlining the design of their strategy and justifies the national, statewide, and industrywide importance of this approach. The proposal shall include—

(A) a demonstration of need;

(B) a statement of goals;

(C) a description of the respective roles of each member of the joint venture;

(D) a description of the business, industry or workforce sector for which the strategy is to be established;

(E) an assessment process for the evaluation of workers' skills and the skills demanded by the workplace;

(F) letters of agreement from all organizations participating in this demonstration and letters of support from the community;

(G) a plan and description of the services to be provided;

(H) outcome measures for the program and the participants;

(I) plans for an independent evaluation of the model's effectiveness in improving the basic skills of workers and the productivity of employees in a cost-effective way; and

(J) indications of the model's potential for achieving replicability.

(2) The Secretary of Labor, in consultation with the Secretary of Education and the Secretary of Commerce, shall develop a formal process for the submission of proposals and announce that process and the availability of funds in the Federal Register.

(3) The Secretary shall give priority to multiyear awards, subject to yearly renewal and interim evaluation of the project and to the availability of funds.

(4) The Secretary may take into account geographic considerations (such as rural and urban) outreach efforts to involve small and medium sized business consortia, and national distribution, when awarding grants under this part.

(5) The Secretary shall award no more than 5 grants from each $10,000,000 appropriated to carry out the provisions of this section.

(g) MATCHING REQUIREMENT FROM GRANTEES.—The Federal share of the total cost of any demonstration program under this part shall not exceed 70 percent of such cost. The non-Federal share of such cost may be in the form of in-kind contributions, cash, worker-release time, equipment, or facilities provided by the entities participating in the grant.

(h) INDEPENDENT EVALUATION.—The Secretary shall every two years and at the expiration of this section, have an independent evaluation conducted on the effectiveness of the national strategies authorized and developed under this section.

(i) AUTHORIZATION OF APPROPRIATIONS.—

(1) There are authorized to be appropriated $40,000,000 for fiscal year 1991 and each of the 4 succeeding fiscal years to carry out the provisions of this title.

(2) The Secretary may reserve up to 5 percent of the funds authorized under this title for administration and the independent evaluation of the program authorized under this section.

SEC. 532. EDUCATION PROGRAMS FOR COMMERCIAL DRIVERS.

(a) PROGRAM AUTHORIZED.—The Secretary is authorized to make grants on a competi-

tive basis to pay the Federal share of the costs of establishing and operating adult education programs which increase the skills of commercial drivers which are necessary to successfully complete the knowledge test requirements under the Commercial Motor Vehicle Safety Act of 1986.

(b) FEDERAL SHARE.—The Federal share of the costs of the adult education programs authorized under subsection (a) shall be 50 percent. Nothing in this subsection shall be construed to require States to meet the non-Federal share from State funds.

(c) ELIGIBLE INDIVIDUALS.—Individuals eligible to receive a grant under this section include—

(1) private employers employing commercial drivers;

(2) colleges, universities, or community colleges;

(3) approved apprentice training programs; and

(4) labor organizations, the memberships of which includes commercial drivers.

(d) REFERRAL PROGRAM.—Grantees shall refer individuals who are identified as having literacy skill problems to appropriate adult education programs as authorized under this Act.

(e) DEFINITION.—The term "commercial driver" means an individual required to possess a commercial driver's license under the Commercial Motor Vehicle Safety Act of 1986.

(f) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $2,500,000 for each of fiscal years 1991 and 1992.

TITLE VI—SAFE, DISCIPLINED, AND DRUG-FREE SCHOOLS

SEC. 601. FINDINGS AND POLICY.

(a) FINDINGS.—The Congress finds that—

(1) use of illicit drugs and alcohol by the youths of the Nation continues to be a major problem that threatens the safety of the children of the Nation and impedes their ability to succeed in school and in their lives; and

(2) more Federal efforts are urgently needed in the areas of drug and alcohol abuse education and prevention.

(b) POLICY.—It is the goal of the United States that, by the year 2000, every school in America will be free of drugs and violence and will offer a disciplined environment conducive to learning. In recognition of this goal, it is the policy of the United States to, by 1993, expand funding for the Drug-Free Schools and Communities Act of 1986 in order to ensure that all students receive drug abuse prevention education and counseling services.

TITLE VII—TEACHER RECRUITMENT AND RETENTION

SEC. 701. FINDINGS AND POLICY.

(a) FINDINGS.—The Congress finds that—

(1) the success of America's schools depends most heavily on the Nation's teachers;

(2) when teachers have the necessary skills to be highly motivated and committed to excellence, they succeed in not only imparting subject matter knowledge, but also in instilling in their students an appreciation of the value and importance of education; and

(3) teachers are instrumental in the education of the children of the United States and are instrumental to achieving the national goals in education described in section 2(a)(8).

(b) POLICY.—It is the goal of the United States that, by the year 2000, there will be a well-qualified teacher in every classroom in the Nation and that these teachers will reflect the demographic make-up of the general population of the United States. In recognition of this goal, it is the policy of the United States—

(1) to recruit talented individuals into the teaching profession with special emphasis on teachers who are members of minority groups;

(2) to ensure that current teachers continually develop their teaching skills and subject matter knowledge;

(3) to reward successful teachers and encourage all teachers to further enhance their skills; and

(4) to encourage qualified professionals in other fields to enter the teaching profession.

PART A—TEACHER RECRUITMENT AND RETENTION

SEC. 711. SHORT TITLE.

This part may be cited as the "21st Century Teachers' Act".

SEC. 712. FINDINGS; POLICY.

(a) FINDINGS.—The Congress finds that it is necessary to enact additional programs—

(1) to alleviate shortages of teachers, including minority teachers, particularly in urban schools with high concentrations of disadvantaged students, and teachers specializing in specific subject areas or trained to work with targeted populations;

(2) to improve teacher training by encouraging new developments in teacher preparation which provide for greater integration of subject matter and pedagogical training;

(3) to improve teacher retention by supporting new teachers' induction into the teaching profession;

(4) to improve teacher skills by providing opportunity for in-service training in specialty areas, teaching and classroom management skills, and school based management;

(5) to improve teacher retention by providing opportunities for experienced teachers to take leadership roles in professional development academies, school based management efforts, and sabbatical programs; and

(6) to support local school officials in restructuring and improving our Nation's schools.

(b) POLICY AND PROGRESS.—It is the policy of the United States that, by the year 2000 or earlier, there will be a well qualified teacher in every classroom in the nation. The purpose of this part is to provide financial assistance for the development, recruitment, retention, and training of teachers and other instructional personnel.

Subpart 1—Loans Incentives for Teaching

SEC. 721. ESTABLISHMENT OF SEPARATE NDSL FUND FOR TEACHERS.

Part E of title IV of the Higher Education Act of 1965 (20 U.S.C. 1087aa et seq.) is amended by adding at the end thereof the following new section:

"LOANS INCENTIVES FOR TEACHING

"SEC. 469. (a) PURPOSE.—It is the purpose of this section to provide separate funds for loans under this part to students who undertake a commitment to enter into the teaching profession.

"(b) AUTHORIZATION OF APPROPRIATIONS.—For the purpose of enabling the Secretary to make, for the purposes of this section, separate capital contributions to student loan funds established under this part, there are authorized to be appropriated $90,000,000 for fiscal year 1991 and each of the 4 succeeding fiscal years.

"(c) USE OF FUNDS.—Any sums appropriated pursuant to subsection (b) for any fiscal year shall be available for apportionment pursuant to subsection (d) and for payments of Federal capital contributions therefrom to institutions of higher education which have agreements with the Secretary under section 463 and subsection (c) of this section. Such Federal capital contributions and all contributions from such institutions shall be used for the establishment, expansion, and maintenance of student loan funds.

"(d) ALLOCATIONS.—The Secretary shall allocate the amount appropriated pursuant to subsection (b) for any fiscal year among institutions which have agreements under subsection (e) on the basis of the number of students enrolled in that institution who obtained Pell Grants during the most recently completed academic year for which satisfactory data is available to the Secretary. The Secretary shall reallocate any amounts for which institutions do not qualify by reason of subsection (e)(2)(B) in accordance with such equitable criteria as the Secretary shall prescribe by regulation.

"(e) AGREEMENTS WITH INSTITUTIONS.—An agreement with any institution of higher education for the payment of Federal capital contributions from funds appropriated under subsection (b) shall—

"(1) provide for the establishment and maintenance of a separate account, for purposes of this section, in the student loan fund required under section 463(a)(1);

"(2) provide for the deposit in such separate account of—

"(A) Federal capital contributions from funds appropriated under subsection (b);

"(B) a capital contribution by such institution in an amount equal to not less than one-ninth of the amount of the Federal capital contributions described in subparagraph (A);

"(C) collections of principal and interest on student loans made from the account;

"(D) charges collected pursuant to regulations under section 464(c)(1)(H);

"(E) reimbursement payments received under subsection (f)(6); and

"(F) any other earnings of the account;

"(3) provide that such student loan fund shall be used only for—

"(A) loans to students, in accordance with the provisions of this section;

"(B) administrative expenses, as provided in section 463(b), but including expenses under subsection (i) of this section;

"(C) capital distributions, as provided in section 466; and

"(D) costs of litigation, and other collection costs agreed to by the Secretary in connection with the collection of a loan from the fund (and interest thereon) or a charge assessed pursuant to regulations under section 464(c)(1)(H);

"(4) make the provisions of the agreement required by paragraphs (4) through (10) of section 463(a) applicable to loans made from funds appropriated pursuant to subsection (b) of this section; and

"(5) require the institution to disseminate information, in accordance with subsection (i), on the loans made from accounts established under paragraph (1) of this subsection.

"(f) TERMS OF LOANS.—

"(1) IN GENERAL.—Except as otherwise provided by this section, loans from any separate account established pursuant to subsection (e)(1)—

"(A) shall be made in the amounts, on the same terms and conditions, and under a loan agreement with the student that contains the same provisions as are required by section 464, and

"(B) shall be subject to deferral and cancellation in the same manner as any other

loan from a loan fund established under this part.

"(2) SPECIAL CONDITIONS.—A student may not receive a loan from a separate account established pursuant to subsection (e)(1) unless—

"(A) in the case of an undergraduate student, such student has successfully completed at least one year of a program of undergraduate education, and

"(B) in the case of either an undergraduate or graduate student, such student enters into an agreement that—

"(i) contains a statement of the student's present intention to pursue a teaching career upon completion of his or her academic preparation;

"(ii) provides that, if the student does not enter employment as a full-time teacher providing service described in section 465(a)(2)(A) within 2 years after such student ceases to carry at an eligible institution at least one-half the normal full-time academic workload, as determined by the institution, the loan shall be immediately repaid through consolidation as provided in subsection (g);

"(iii) provides that, if the student ceases to be employed as such a teacher before the loan is canceled in full pursuant to section 465(a)(3)(A)(i) for 5 years of such service, the loan shall be immediately repaid through consolidation as provided in subsection (g); and

"(iv) contains such other terms and conditions as the Secretary may require to enforce the requirements of this section.

"(3) PRIORITY TO MINORITY, OTHER UNDERREPRESENTED, AND HIGH ACHIEVING STUDENTS.—(A) In making loans from an account established under subsection (e)(1), an institution shall give priority to—

"(i) individuals who are minority students or are otherwise underrepresented in the teaching profession, or in the curricula areas in which they are preparing to teach, and

"(ii) individuals who qualify and have need for such a loan and who demonstrate high academic achievement and potential for success in the teaching profession.

"(B) An institution of higher education shall—

"(i) have the responsibility for making the determinations required by subparagraph (A); and

"(ii) in setting the priorities under this paragraph, shall consult with the local education agencies in its area to determine the curricula areas that are experiencing teacher shortages and attempt to give priority to students meeting the requirements of clause (i) or (ii) of subparagraph (A) who are pursuing courses of study that will enable them to teach in these shortage areas.

"(4) AGGREGATE LOAN LIMITS.—Notwithstanding section 464(a)(2)(B), the aggregate of the loans for all years made by institutions of higher education from an account established under subsection (e)(1) may not exceed the amount specified in section 464(a)(2)(A).

"(5) EXPEDITED CANCELLATION OPTION.—(A) Loans from an account established under subsection (e)(1) shall, at the option of the borrower, be cancelled either under section 465 or under this paragraph.

"(B) Loans may be cancelled under this paragraph at the rates provided in subparagraph (C) for each complete year of service as a full-time teacher—

"(i) in schools currently receiving assistance under section 1013 of the Elementary and Secondary Education Act of 1965,

"(ii) in schools currently designated for schoolwide projects under section 1015(b) of such Act,

"(iii) in schools serving rural or geographically isolated areas (as defined by the Secretary by regulation consistent with the purposes of this section), or

"(iv) in a Head Start program designated by the Secretary for this purpose.

"(C) The percent of a loan which shall be cancelled under subparagraph (A) is 33⅓ percent for each complete year of service described in such subparagraph. If a portion of a loan is cancelled under this paragraph for any year, the entire amount of interest on such loan which accrues for such year shall be cancelled. Paragraphs (4) and (5) of section 465(a) apply with respect to cancellations under this paragraph.

"(g) CONSOLIDATION AUTHORITY.—Any student who is required to repay a loan or loans under this section by reason of subparagraph (B) or (C) of subsection (f)(2) shall be eligible for a consolidation loan under section 428C of this Act, notwithstanding subsection (a)(3)(A)(i) of such section, for purposes of repaying the loan or loans under this section.

"(h) REIMBURSEMENT FOR CANCELLATION.—The Secretary shall pay to each institution for each fiscal year an amount equal to 125 percent of the aggregate amount of loans from an account established under subsection (e)(1) which are canceled pursuant to subsection (f)(5) for such year, minus an amount equal to the aggregate amount of any such loans so canceled which were made from Federal capital contributions to its student loan fund provided by the Secretary under section 468. None of the funds appropriated pursuant to section 461(b) shall be available for payments pursuant to this subsection.

"(i) OBLIGATION TO DISSEMINATE INFORMATION ON PROGRAM.—Any institution which receives a Federal capital contribution under this section shall include with the information required to be disseminated under section 485 a separate document describing, in a form approved by the Secretary, the incentives provided under this section and develop an awareness and outreach program for prospective students entering the teaching profession.

"(j) MINORITY STUDENT DEFINITION.—For purposes of this section, the term 'minority student' means a student who is American Indian, Alaskan Native, Black (not of Hispanic origin), Hispanic (including persons of Mexican, Puerto Rican, Cuban, and Central and South American origin), Pacific Islander, or Asian American.".

Subpart 2—Financial Assistance for Institutional Recruitment and Retention of Individuals Preparing to Enter the Teaching Force

SEC. 731. PURPOSE.

It is the purpose of this subpart to authorize a grant program to provide financial assistance to institutions of higher education for new and innovative programs to recruit and retain students, especially minority students, preparing to enter the teaching profession.

SEC. 732. DEFINITIONS.

As used in this subpart—

(1) The term "Secretary" means the Secretary of Education.

(2) The term "institution of higher education" has the meaning provided by section 1201(a) of the Higher Education Act of 1965.

(3) The term "historically Black college or university" means an institution that qualifies as a "part B institution" under section 322(2) of the Higher Education Act of 1965.

(4) The term "Hispanic-serving institution of higher education" means an institution of higher education which—

(A) has a student enrollment that is at least 25 percent Hispanic,

(B) is duly accredited by an agency recognized for that purpose by the Secretary of Education,

(C) provides a 4-year program leading to a baccalaureate degree or a 2-year program leading to an associate's degree, and

(D) is a public or nonprofit institution of higher education.

(5) The term "local educational agency" has the meaning provided by section 1471 of the Elementary and Secondary Education Act of 1965.

(6) The term "minority student" means a student who is American Indian, Alaskan Native, Black (not of Hispanic origin), Hispanic (including persons of Mexican, Puerto Rican, Cuban, and Central and South American origin), Pacific Islander, or Asian American.

(7) The term "teacher" includes a certified school library media specialist.

SEC. 733. GENERAL AUTHORITY.

The Secretary shall allocate funds under this subpart to State agencies for grants for new and innovative programs, in accordance with the requirements of this subpart, to institutions of higher education submitting applications that meet the requirements of section 735(a) and plans that meet the requirements of section 735(b).

SEC. 734. ALLOCATION OF FUNDS.

(a) ALLOCATION OF FUNDS TO STATE EDUCATIONAL AGENCIES.—

(1) ALLOCATION FORMULA.—The Secretary shall allocate funds appropriated under section 737 for any fiscal year among States entering into agreements with the Secretary that meet the requirements of paragraph (2). Such allocation shall be made in accordance with an allocation formula which the Secretary shall prescribe by regulation. Such formula shall provide for an equitable distribution of such funds among the States and shall—

(A) take into account the number of institutions in the States that are eligible for grant priority under subsection (b)(2) and the number of students enrolled in such institutions;

(B) take into account evidence of teacher shortages; and

(C) provide a minimum amount for each State that is sufficient to fund grants of sufficient size to operate at least one effective grantee program.

(2) STATE AGREEMENTS.—Any State desiring to obtain an allocation under paragraph (1) shall enter into an agreement with the Secretary in such form and containing such information and assurances as the Secretary may reasonably require by regulation for the effective administration by the State of the grant program under this subpart. Such agreement shall, at a minimum—

(A) designate a single State agency to administer the grant program;

(B) provide for the close coordination of the program with the State educational agency;

(C) provide for the selection of grant recipients in accordance with subsection (b); and

(D) provide (i) for such fiscal controls and fund accounting procedures as may be necessary to assure proper disbursement and accounting for grant funds, and (ii) for the making of such reports, in such form and containing such information, as may be rea-

sonably necessary to enable the Secretary to perform the functions required by this subpart.

(b) INSTITUTIONAL AWARD.—From the amount allocated to any State under subsection (a), the State agency shall award grants to institutions of higher education located in such State. In making such awards, the State agency shall—

(1) evaluate the applications and plans submitted by such institutions in accordance with such competitive criteria as the Secretary shall prescribe by regulation;

(2) give priority to the applications and plans submitted by—

(A) historically Black colleges and universities, Hispanic-serving institutions of higher education, and other institutions with significant minority populations;

(B) institutions of higher education which have prepared and are preparing substantial numbers of teachers for service in rural schools or geographically isolated areas;

(C) institutions which have the highest numbers of Pell Grant recipients; and

(D) institutions of higher education that (i) have agreements with community and junior colleges to accept and honor the credits awarded by such colleges for a 2-year program of study in full satisfaction of the first 2 years requirements of that institution of higher education or (ii) are making substantial progress toward adoption of such an agreement.

SEC. 735. APPLICATIONS AND PLANS; USE OF FUNDS.

(a) APPLICATION.—Any institution of higher education desiring to obtain a grant under this subpart shall submit an application to the State agency designated under section 734(a)(2)(A) at such time, in such form and containing or accompanied by such information or assurances as the Secretary may require by regulation.

(b) PLANS.—Each institution of higher education desiring to obtain a grant under this subpart shall—

(1) prepare, develop, update, and submit to such State agency a plan which will enhance the recruitment and retention of students seeking careers in teaching, with a priority to—

(A) individuals who are minority students or are otherwise underrepresented in the teaching profession, or in the curricula areas in which they are preparing to teach, and

(B) individuals who qualify and have need for such a loan and who demonstrate high academic achievement and potential for success in the teaching profession.

(2) include in such plan—

(A) specific recruitment strategies for reaching secondary schools, community colleges, or other agencies and institutions from which candidates are to be drawn;

(B) specific retention strategies and activities, such as preinduction, summer sessions, instructional technology awareness, field trips, academic support services, including internships and mentoring programs and similar activities;

(C) specific recruitment and retention strategies developed by the institution of higher education with one or more local educational agencies, community colleges, or other agencies and institutions from which candidates are to be drawn;

(D) one or more adopted agreements between the institution of higher education and community colleges which assure that transfer students will receive full course credit and not be burdened with additional course requirements which impede or alter the normal sequence and graduation process and which describes the available financial assistance (including financial assistance available under subpart 1 of this part) for which transfer students may be eligible;

(E) specific methods by which the institution of higher education will be working with local educational agencies to ensure that prospective graduates will be interviewed and, if possible, placed in jobs upon meeting all graduation requirements;

(F) the goals and objectives which are to be used to indicate the degree of success being obtained by the grant recipient in its program under this subpart, including specific timelines; and

(G) the special plans, if any, which will assure that students are being prepared for careers in rural or geographically isolated communities; and

(3) develop and implement such plan after consultation and in coordination with local nonprofit agencies and organizations that the institution determines have the capability to assist the institution in recruitment and retention activities under this subpart.

(c) USE OF FUNDS.—An institution of higher education may use funds provided under this subpart only for the conduct of activities that are specifically described in the plan submitted in accordance with subsection (b) of this section.

SEC. 736. REPORTS AND EVALUATION.

(a) REPORTS.—Any institution of higher education receiving a grant under this subpart shall submit to the Secretary an annual report and a final report containing such information as the Secretary may reasonably require—

(1) to determine whether the institution has attained the goals and objectives (including timelines) set forth in its plan under section 735(b)(2)(F); and

(2) to evaluate the success of the programs under this subpart in achieving the purposes of this subpart.

(b) EVALUATION.—The Secretary shall prepare and submit to the Congress, not later than the 3rd and 5th years after the date of enactment of this Act, an evaluation of the effectiveness of the program authorized by this subpart in attaining the purpose of this subpart. Such report shall contain any recommendations the Secretary considers appropriate for changes in such program.

SEC. 737. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out this subpart $90,000,000 for fiscal year 1991 and such sums as may be necessary for each of the 4 succeeding fiscal years.

Subpart 3—Professional Development Academies

SEC. 741. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) professional development academies can serve as forums for the coordination and provision of a variety of activities to meet the needs of school districts;

(2) in-service training for experienced teachers enables such teachers to keep current in their substantive fields of expertise and in the practice of teaching;

(3) in-service training enables teachers to learn new substantive fields of expertise in order to alleviate teacher shortages;

(4) in-service training provides teachers an opportunity to enhance skills in classroom management;

(5) in-service training in school districts operating new school based management and shared decisionmaking programs assist teachers, principals, and administrators to assume new responsibilities;

(6) providing experienced teachers with sabbaticals allows such teachers the opportunity to participate in professional programs and activities, and allows such teachers the opportunity to return to the classroom renewed; and

(7) professional development academies shall support local school officials in restructuring and improving our Nation's schools.

(b) PURPOSE.—It is the purpose of this subpart to authorize a grant program to provide financial assistance to consortia of local education agencies, institutions of higher education and other eligible entities in order to develop and provide the highest quality professional training for our existing and future workforce for our Nation's schools.

SEC. 742. DEFINITIONS.

As used in this subpart—

(1) The term "professional development academy" means an entity that—

(A) is operated by a partnership which includes one or more local educational agencies and one or more institutions of higher education that offer teacher training programs, and

(B) provides in-service training and other activities described in this subpart to teachers and administrators.

(2) The term "Secretary" means the Secretary of Education.

(3) The term "local educational agency" has the meaning provided by section 1471 of the Elementary and Secondary Education Act of 1965.

(4) The term "institution of higher education" has the meaning provided by section 1201(a) of the Higher Education Act of 1965.

(5) The term "State educational agency" has the meaning provided by section 1471 of the Elementary and Secondary Education Act of 1965.

(6) The term "teacher" for the purposes of this subpart includes library media specialists, counselors, administrators, or other personnel which the school district employs.

SEC. 743. SELECTION OF GRANT RECIPIENTS.

(a) FORMULA GRANTS.—

(1) STATE ALLOCATION.—Except as provided in subsection (e), the Secretary shall allocate an amount equal to 95 percent of the amount appropriated under section 747 for any fiscal year among States educational agencies that have entered into agreements with the Secretary that meet the requirements of section 744(a). The Secretary shall allocate such amount among such State educational agencies on the basis of the number of children counted, under section 1005(c) of the Elementary and Secondary Education Act of 1965 for the most recent allocation under such section, in the school districts of the local educational agencies which are participating in consortia that have submitted applications meeting the requirements of section 744(b)(1).

(2) SUBSTATE ALLOCATION.—Each State educational agency receiving an allocation of funds under paragraph (1) shall, subject to subsection (e), distribute such funds among the consortia (that have submitted such agreements) on the same basis and using the same data as was used by the Secretary in making the allocation under paragraph (1), except that the State educational agency may reallocate any funds which it determines will not be used by a consortia, or will not be a sufficient amount to provide an effective program, among the other consortia on an equitable basis.

(b) COMPETITIVE GRANTS.—From the remaining 5 percent of the amount appropriated under section 747 for any fiscal year,

the Secretary shall award grants to establish and operate professional development academies under this subpart on the basis of a competition among eligible applicants whose applications provide evidence that the professional development academy will provide an interstate, international, or other exemplary program. The Secretary shall prescribe, by regulation, criteria for the selection of grant recipients under this subsection.

(c) ELIGIBLE APPLICANTS.—Grants under this subpart shall only be made to applicants that are consortia composed of one or more local educational agencies and one or more institutions of higher education that offer teacher training programs. Such consortia may also include components from nonprofit organizations and agencies, business, industry, and technical, proprietary, and community colleges. The State educational agency may, notwithstanding section 742(1), grant a waiver from the requirement that the consortia include an institution of higher education to local educational agencies that are geographically isolated from such institutions if such agencies demonstrate that the inclusion of such an institution in the consortia is not feasible and that those agencies and other appropriate entities can provide the services and expertise required to conduct programs under this subpart.

(d) DURATION OF GRANTS.—Grants under this subpart shall be for 5 years and may be renewed for not more than one additional 5-year period.

(e) STATE ADMINISTRATION.—The Secretary shall reserve 3 percent of the amount allocated under subsection (a)(1) for the purpose of providing administrative funds to State educational agencies. Such funds shall be in an amount equal to 3 percent of the total amount awarded to consortia in that State and shall be used for the purposes described in section 305(b).

SEC. 744. APPLICATIONS AND PLANS.

(a) STATE AGREEMENTS.—Any State educational agency desiring to obtain an allocation under section 743(a)(1) shall enter into an agreement with the Secretary in such form and containing such information and assurances as the Secretary may reasonably require by regulation for the effective administration by the State educational agency of the grant program under this subpart. Such agreement shall, at a minimum—

(1) provide for the allocation of funds in accordance with section 743(a)(2); and

(2) provide (A) for such fiscal controls and fund accounting procedures as may be necessary to assure proper disbursement and accounting for grant funds, and (B) for the making of such reports, in such form and containing such information, as may be reasonably necessary to enable the Secretary to perform the functions required by this subpart.

(b) CONSORTIA APPLICATIONS.—

(1) APPLICATIONS FOR ALLOCATIONS.—Any consortium desiring to obtain an allocation under section 743(a)(2) shall submit an application therefor to the State educational agency of the State within which it is located. Such application shall be submitted at such time, in such form, and contain or be accompanied by such information and assurances as the Secretary may require by regulation. An application that complies with such regulation shall be approved by the State educational agency unless the State educational agency determines that such application is not in fact designed to meet local and statewide current and projected teacher shortages, and of sufficient size and scope to meet the articulated goals of the projects.

(2) APPLICATIONS FOR GRANTS.—Any consortium desiring to obtain a grant under section 743(b) shall submit an application therefor to the Secretary. Such application shall be submitted at such time, in such form, and contain or be accompanied by such information and assurances as the Secretary may require by regulation.

(c) CONSORTIA AGREEMENTS.—Any consortium desiring to obtain funds under this subpart for the establishment of a professional development academy shall enter into an agreement with the Secretary, in the case of a grant under section 743(b), or with the State educational agency, in the case of a grant under section 743(a). Such agreement shall be in such form and contain such information and assurances as the Secretary may reasonably require by regulation for the effective administration of such academy by the consortium. Such agreement shall, at a minimum—

(1) describe in detail the intended use of such fund;

(2) provide for such fiscal controls and fund accounting procedures as may be necessary to assure proper disbursement and accounting for grant funds; and

(3) provide for the making of such reports, in such form and containing such information (including information on effective models and programs), as may be reasonably necessary to enable the Secretary to perform the functions required by this subpart.

SEC. 745. USE OF FUNDS.

(a) LOCAL FUNDS.—Funds provided to consortia under section 743(a) or 743(b) of this subpart may be used—

(1) to provide support and in-service training for local educational agencies based upon most recent research findings, successful teaching practices, and the needs articulated by the local education agencies;

(2) to coordinate research and practice, especially between professional preparation programs and current and future demands of workplace;

(3) to improve and upgrade skills of teachers, especially in regard to emerging technology;

(4) to recruit and retain teachers, with highest priority to minority individuals and individuals serving in shortage areas as determined by members of the consortia;

(5) to enhance school improvement efforts by training school personnel how to provide high quality instructional programs targeted to particular populations of students such as disadvantaged students, handicapped students, students who are limited English proficient or individuals who are preschool age;

(6) to improve teacher skills so that teachers may participate fully as partners in school based management and decisionmaking and practice;

(7) to develop strategies which include business and industry as fully active partners in the consortia agreements;

(8) to provide guidance in the establishment of priorities for, and assistance in the coordination of, in-service and professional renewal for teachers across the full spectrum of Federal and State programs, as reflected in the consortia agreement;

(9) to expand upon, implement, or develop teaching models, including the teaching hospital models and clinical supervision models;

(10) to establish intrastate and interstate networks for the purposes of this subpart; and

(11) to establish international networks for the purposes of this subpart.

(b) STATE FUNDS.—Funds awarded under section 743(e) shall be available to cover the cost for the State educational agency to review and comment on each grant application submitted under section 744(b). Such review shall be for purposes of ascertaining whether the grant applications are in fact designed to meet local and statewide current and projected teacher shortages, and whether the work plans proposed are of sufficient size and scope to meet the articulated goals of the projects.

SEC. 746. EVALUATION.

(a) REPORT BY SECRETARY.—The Secretary of Education shall submit biennial reports on the program authorized by this subpart to the appropriate authorizing committees of Congress and shall, using existing dissemination programs, disseminate information developed or operated under this subpart.

(b) GAO REPORT.—The Comptroller General shall submit an evaluation on the program authorized by this subpart due to the appropriate committees by January 1, 1994.

SEC. 747. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out this subpart $270,000,000 for fiscal year 1991 and such sums as may be necessary for each of the 4 succeeding fiscal years.

PART B—PRESIDENTIAL AWARDS FOR EXCELLENCE IN EDUCATION

SEC. 751. PRESIDENTIAL AWARDS FOR EXCELLENCE IN EDUCATION PROGRAM.

(a) TECHNICAL AMENDMENT.—The heading for title II of the Elementary and Secondary Education Act of 1965 is amended to read as follows:

"TITLE II—CRITICAL SKILLS IMPROVEMENT AND PRESIDENTIAL TEACHER AWARDS".

(b) PRESIDENTIAL TEACHER AWARDS FOR EXCELLENCE IN EDUCATION.—Title II of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2982 et seq.) is further amended by adding at the end the following:

"PART D—PRESIDENTIAL AWARDS FOR EXCELLENCE IN EDUCATION PROGRAM

"SEC. 2301. FINDINGS AND PURPOSE.

"(a) FINDINGS.—The Congress finds that—

"(1) the success of America's elementary and secondary schools depends most heavily upon the Nation's teachers;

"(2) elementary and secondary school systems should have in place standards of teacher excellence and fair and effective procedures for measuring teacher success; and

"(3) in return for their efforts, excellent elementary and secondary school teachers deserve public recognition, respect, and appropriate financial awards.

"(b) PURPOSE.—It is the purpose of this part to reward teachers in every State who meet the highest standards of excellence.

"SEC. 2302. AUTHORIZATION OF APPROPRIATIONS; ALLOTMENTS TO STATES.

"(a) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated for the purpose of carrying out this part $5,000,000 for each of the fiscal years 1991, 1992, and 1993.

"(b) ALLOTMENT FORMULA.—

"(1)(A) Subject to subparagraph (B), the Secretary shall, from amounts made available to carry out this part in any fiscal year—

"(i) first allot to the Secretary of the Interior an appropriate amount for purposes of making awards under this part to teachers

in elementary and secondary schools for Indian children operated with Federal assistance or operated by the Department of the Interior; and

"(ii) from the remaining amount, allot to each State an amount that bears the same ratio to the remainder as the number of full-time equivalent public elementary and secondary school teachers in the State bears to the total number of such teachers in all the States.

"(B) No State shall be allotted an amount which is equal to less than the sum of—

"(i) the amount necessary to fund 1 Presidential Award for Excellence in Education; and

"(ii) the State's administrative expenses reserved pursuant to subsection (c).

"(2) In determining a State's allotment under paragraph (1), the Secretary shall use the most recent satisfactory data available to the Department.

"(c) ADMINISTRATIVE EXPENSES.—Each State may reserve up to 3 percent of its allotment under subsection (b)(2) for administrative expenses.

"(d) USE OF EXCESS FUNDS.—If a State has excess funds remaining after it has made the maximum number of awards possible in accordance with section 2305(a) and reserved a portion of its allotment for administrative expenses in accordance with subsection (c), the State may use the remainder of its allotment for appropriate recognition of teachers in the State who do not receive a Presidential Award for Excellence in Education.

"(e) STATE DEFINED.—For the purposes of this part, the term 'State' means each of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands.

"(f) PUBLIC LAW 95-134.—The provisions of Public Law 95-134, permitting the consolidation of grants to Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands, shall not apply to funds allocated under this part.

"SEC. 2303. STATE APPLICATIONS.

"(a) SUBMISSION OF STATE APPLICATIONS.—The Secretary is authorized to make grants to States in accordance with the provisions of this part. In order to receive a grant under this part, the State educational agency shall submit an application to the Secretary. Such application shall be filed at such time, in such manner, and containing such information as the Secretary may reasonably require.

"(b) DESCRIPTION OF STATE CRITERIA AND PROCEDURES.—The application shall contain a description of the criteria and procedures the State educational agency will use to select recipients of Presidential Awards for Excellence in Education. Such criteria and procedures shall be subject to the approval of the Secretary.

"(c) ASSURANCES.—The application shall contain assurances that—

"(1) Presidential Awards for Excellence in Education will be made in accordance with the provisions of this part;

"(2) the State educational agency will provide such fiscal control and fund accounting procedures as the Secretary may require;

"(3) the State educational agency will apply the selection criteria uniformly to nominations for recipients of Presidential Awards for Excellence in Education that are received from public and private schools, teachers, associations of teachers, parents, associations of parents and teachers, businesses, business groups, or student groups, as well as those received from local educational agencies; and

"(4) to the extent practicable, the State educational agency will use existing procedures for programs of recognition and awards to teachers.

"SEC. 2304. SELECTION OF AWARD RECIPIENTS.

"(a) ELIGIBLE RECIPIENTS.—Any full-time public or private elementary or secondary school teacher that teaches any subject other than religion (other than religion as an academic discipline), shall be eligible to receive an award under this part.

"(b) NOMINATIONS.—(1) Local educational agencies, public and private schools, teachers, parents, associations of teachers, associations of parents and teachers, businesses, business groups, and student groups may nominate teachers for awards under this part.

"(2) Annually, the State educational agency shall notify local educational agencies, public and private schools, associations of teachers, associations of parents and teachers, business groups, and the general public of the deadlines and procedures for making nominations, and inform them of the selection criteria that will be used in selecting award recipients.

"(c) SELECTION BY STATE PANEL.—Selection of award recipients in each State shall be made from among the teachers nominated in accordance with subsection (b). Award recipients shall be selected by a panel that is chosen by the State educational agency and is composed of members representing parents, school administrators, teachers, school board members, and the business community.

"(d) SELECTION CRITERIA.—The State panel shall select award recipients in accordance with the criteria approved by the Secretary in the State educational agency's application. The selection criteria may take into account, but are not limited to, a teacher's success in—

"(1) educating at-risk students to their fullest potential, including educationally or economically disadvantaged, handicapped, limited English proficient, or homeless children, as well as the children of migrant agricultural workers;

"(2) educating gifted and talented students to their fullest potential;

"(3) encouraging students to enroll, and succeed, in advanced classes in challenging fields of study which include mathematics, science, and foreign languages;

"(4) teaching in schools educating large numbers of at-risk students, including schools in low-income inner-city or rural areas;

"(5) introducing a new curriculum area into a school or strengthening an established curriculum;

"(6) acting as a master teacher by helping new teachers make the transition into a teaching career; or

"(7) encouraging potential dropouts to remain in school or encouraging individuals who have dropped out to reenter and complete their schooling.

"SEC. 2305. AMOUNT AND USE OF AWARDS.

"(a) AMOUNT OF AWARDS.—The amount of a Presidential Award for Excellence in Education shall be $5,000. The Secretary may issue award certificates.

"(b) USE OF AWARDS.—An award to an individual recipient under this part shall be available for the recipient's use for professional development and other educational experiences.".

(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall take effect on July 1, 1991.

PART C—NONTRADITIONAL ROUTES TO TEACHER LICENSURE

SEC. 761. NONTRADITIONAL ROUTES TO TEACHER LICENSURE.

(a) IN GENERAL.—Title V of the Higher Education Act of 1965 is amended by adding at the end the following new part:

"PART F—NONTRADITIONAL ROUTES TO TEACHER LICENSURE

"SEC. 581. SHORT TITLE.

"This part may be cited as the 'Nontraditional Routes to Teacher Licensure Act of 1990'.

"SEC. 582. FINDINGS.

"The Congress finds that—

"(1) effective elementary and secondary schools require competent teachers and strong leadership;

"(2) school systems would benefit greatly by increasing the pool of qualified individuals from which to recruit teachers;

"(3) many talented professionals who have demonstrated a high level of subject area competence outside the education profession may wish to pursue careers in education, but have not fulfilled the requirements to be licensed as teachers; and

"(4) nontraditional routes can enable qualified individuals to fulfill State licensure requirements and would allow school systems to utilize the expertise of these professionals and improve the pool of qualified individuals available to local educational agencies as teachers.

"SEC. 583. PURPOSE.

"It is the purpose of this part to improve the supply of qualified elementary and secondary school teachers by assisting States to develop and implement programs to assist talented professionals who have demonstrated a high level of competence in a subject area outside the education profession and wish to pursue careers in education to meet State licensing requirements, with special emphasis on participation by individuals who are members of minority groups.

"SEC. 584. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated for the purpose of carrying out this part $15,000,000 for the fiscal year 1991.

"SEC. 585. ALLOTMENTS.

"(a) IN GENERAL.—

"(1) From the amount appropriated to carry out this part, the Secretary shall allot to each State the lesser of—

"(A) the amount for which the State educational agency applies under section 586; or

"(B) an amount which bears the same ratio to the amount appropriated to carry out this part as the school-age population of the State (aged 5 through 17) bears to the school-age population of all the States.

"(2) If a State does not apply for the full amount of its allotment under paragraph (1), the Secretary may reallocate the excess funds to 1 or more other States that demonstrate, to the satisfaction of the Secretary, a need for the funds.

"(b) SPECIAL RULE.—Notwithstanding section 412(b) of the General Education Provisions Act, assistance provided under this part shall remain available for obligation by a recipient until the expiration of the 2-year period beginning on the date the grant is awarded.

"(c) GEPA PROVISIONS INAPPLICABLE.—Sections 435 and 436 of the General Education

Provisions Act, except to the extent that such sections relate to fiscal control and fund accounting procedures, shall not apply to this part.'

"SEC. 586. STATE APPLICATIONS.

"(a) IN GENERAL.—Any State desiring to receive a grant under this part shall, through the State educational agency, submit an application at such time, in such manner, and containing such information, as the Secretary may reasonably require.

"(b) REQUIREMENTS.—Each application shall—

"(1) describe the programs, projects, and activities to be undertaken; and

"(2) contain such assurances as the Secretary considers necessary, including assurances that—

"(A) assistance provided to the State educational agency under this part will be used to supplement, and not to supplant, any State or local funds available for the development and implementation of programs to provide nontraditional routes to fulfilling teacher licensure requirements;

"(B) the State educational agency has, in developing and designating the application, consulted with—

"(i) representatives of local educational agencies, including superintendents and school board members, including representatives of their professional organizations;

"(ii) elementary and secondary school teachers and principals, including representatives of their professional organizations;

"(iii) parents; and

"(iv) other interested organizations and individuals; and

"(C) the State educational agency will submit to the Secretary, at such time as the Secretary may specify, a final report describing the activities carried out with assistance provided under this part and the results achieved.

"SEC. 587. USE OF FUNDS.

"(a) IN GENERAL.—

"(1) A State educational agency shall use assistance provided under this part to support programs, projects, or activities that develop and implement new, or expand and improve existing, programs that provide teacher training to individuals who are moving to a career in education from another occupation through a nontraditional route to teacher licensure.

"(2) A State educational agency may carry out such programs, projects, or activities directly, through contracts, or through grants to local educational agencies, intermediate educational agencies, institutions of higher education, or consortia of such agencies.

"(b) USES OF FUNDS.—Funds received under this part may be used for—

"(1) the design, development, implementation, and evaluation of programs that enable qualified professionals who have demonstrated a high level of subject area competence outside the education profession and are interested in entering the teaching profession to fulfill State licensure requirements;

"(2) the establishment of administrative structures necessary to the development and implementation of programs to provide nontraditional routes to fulfilling teacher licensure requirements;

"(3) training of staff, including the development of appropriate support programs, such as mentor programs, for teachers licensed through alternative means;

"(4) the development of recruitment strategies;

"(5) the development of reciprocity agreements between or among States for the licensure of teachers; and

"(6) other appropriate programs, projects, and activities designed to meet the objectives of this part.

"SEC. 588. DEFINITION.

"For purposes of this part—

"(1) the term 'State' means each of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands;

"(2) the term 'State educational agency' has the meaning provided by section 1471 of the Elementary and Secondary Education Act of 1965; and

"(3) the term 'local educational agency' has the meaning provided by such section 1471.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on July 1, 1991.

(c) EXPIRATION DATE.—Effective July 1, 1993, the Nontraditional Route to Teacher Licensure Act of 1990 (as contained in part F of title V of the Higher Education Act of 1965) is repealed.

TITLE VIII—EQUAL OPPORTUNITY FOR POSTSECONDARY EDUCATION

SEC. 801. FINDINGS AND POLICY.

(a) FINDINGS.—The Congress finds that—

(1) it is essential to the economic well-being of the United States that all Americans be educated to their fullest potential;

(2) to bring this about, it is necessary to increase college participation by all Americans, especially minorities, and to reduce the imbalance between grants and loans in financing a college education, so that all Americans with the desire and the ability have an equal opportunity to participate in postsecondary education and training, from the undergraduate to the postgraduate level, by the year 2000.

(b) GOAL.—Therefore, it is the policy of the United States that, by the year 2000, no qualified student shall be denied the opportunity for postsecondary education because of financial or other barriers.

(c) STATEMENT OF RESPONSIBILITY.—In recognition of this goal, Congress declares it to be the policy of the United States to—

(1) increase the participation of low-income, first-generation-in-college, and minority students in postsecondary education;

(2) expand college assistance to middle income families;

(3) reduce the reliance on loans as the principal means of financing postsecondary education for students and their parents by—

(A) increasing the annual appropriations for the Pell Grant program under title IV of the Higher Education Act of 1965 by annual increments so that in fiscal year 1995 the maximum Pell Grant will be $3,700, restoring it to the level of purchasing power it had in fiscal year 1975 (when the $1,400 maximum award was fully funded); and

(B) increasing the maximum award by at least 10 percent per year thereafter until the year 2000; and

(4) enhance the capacity of postsecondary institutions to recruit and retain low-income, first-generation-in-college, and minority students, including graduate students, and to provide those students with a quality education, by increasing the annual appropriations for the TRIO programs under title IV of the Higher Education Act of 1965 by at least 25 percent per year until the year 2000 to expand the percentage of eligible students served and to more effectively serve the students receiving services from these programs.

SEC. 802. PELL GRANTS.

Section 411 of the Higher Education Act of 1965 is amended by striking subsection (g) and inserting the following:

"(g) ADJUSTMENTS FOR INSUFFICIENT APPROPRIATIONS.—If, for any fiscal year, the funds appropriated for payments under this subpart are insufficient to satisfy fully all entitlements, as calculated under subsection (b) (but at the maximum grant level specified in such appropriation), the Secretary shall, from the next succeeding fiscal year's appropriation for this subpart, expend such sums as may be necessary to meet any such insufficiencies for the preceding fiscal year.".

SEC. 803. TREATMENT OF NONLIQUID ASSETS.

(a) PELL GRANT NEEDS ANALYSIS.—Section 411F(2) of the Act is amended—

(1) by inserting "(A)" after "(2)"; and

(2) by adding at the end thereof the following:

"(B) For academic year 1992-1993, the term 'assets' shall not include the net value of—

"(i) the family's principal place of residence; or

"(ii) a family farm on which the family resides.".

(b) GENERAL NEED ANALYSIS.—Section 480(g) of the Act is amended—

(1) by inserting "(1)" after "ASSETS.—"; and

(2) by adding at the end thereof the following:

"(2) For academic year 1992-1993 and succeeding academic years with respect to determinations of need under this title, other than for subparts 1 and 3 of part A and part B, the term 'assets' shall not include the net value of—

"(A) the family's principal place of residence; or

"(B) a family farm on which the family resides.".

(c) SECRETARY TO RECOMMEND ADJUSTMENTS.—Within 60 days after the date of enactment of this Act, the Secretary of Education shall submit to the Congress such recommendations for changes to parts A and F of title IV of the Higher Education Act of 1965 as may be necessary to achieve an equitable assessment of income and assets after exclusion of the assets described in the amendments made by subsections (a) and (b) of this section. Such changes may include changes in the assets protection allowances, asset conversion rates, and other factors used in the determination of expected family contribution.

SEC. 804. HISTORICALLY BLACK COLLEGES AND UNIVERSITIES.

(a) AMENDMENT.—Section 360(a)(3) of title III of the Higher Education Act of 1965 is amended—

(1) by inserting "(A)" immediately after "(3)"; and

(2) by adding at the end thereof a new subparagraph to read as follows:

"(B)(i) There are authorized to be appropriated $20,000,000 for fiscal year 1991 for awards under section 332 of the Act to historically black colleges and universities that qualify as part B institutions.

"(ii) A part B institution that receives an award from funds appropriated for any fiscal year under clause (i) shall not be eligible to receive an award from funds appropriated for that fiscal year under subparagraph (A), but a part B institution that does not receive an award from funds appropri-

ated for any fiscal year under clause (i) shall be eligible to receive an award from funds appropriated for that fiscal year under subparagraph (A).".

(b) EFFECTIVE DATE.—The amendments made by this section shall be effective October 1, 1990.

TITLE IX—POLICY EVALUATION AND ASSESSMENT

PART A—POLICY EVALUATION

SEC. 911. SHORT TITLE.

This Act may be cited as the "National Summit Conference on Education Amendments of 1990".

SEC. 912. FINDINGS.

Section 5(b)(1) of the National Summit Conference on Education Act of 1984 (Public Law 98-524; 98 Stat. 2489) is amended to read as follows:

"(b)(1) The Congress finds that—

"(A) the United States economic well-being requires a better trained and educated workforce;

"(B) a strong educational system is essential to achieve such a workforce;

"(C) agreement has been reached among many citizens that the Nation's schools must be improved in order to strengthen economic competitiveness and achieve economic prosperity;

"(D) reforms and goals to improve our educational system, including the preparation and retraining of classroom teachers, have been proposed by various groups concerned about education;

"(E) there should be a national forum authorized by law to review these reforms and goals and to suggest and recommend ways to implement and achieve them.".

SEC. 913. EXECUTIVE COMMITTEE MEMBERSHIP.

Section 5(f)(1) of the National Summit Conference on Education Act of 1984 is amended to read as follows:

"(f)(1) There shall be an executive committee on the Conference consisting of—

"(A) 6 individuals appointed by the Speaker of the House of Representatives, of whom—

"(i) 2 shall be members of the House, one from each political party;

"(ii) one shall be a local school board member;

"(iii) one shall be a local elected official; and

"(iv) 2 shall be representatives of local educational agencies; and

"(B) 6 individuals appointed by the Senate majority leader, of whom—

"(i) 2 shall be Senators, one from each political party;

"(ii) 2 shall be State Governors, one from each political party;

"(iii) one shall be a State legislator; and

"(iv) one shall be the head of a State educational agency; and

"(C) the Secretary of Education, ex officio.".

SEC. 914. REGIONAL MEETINGS.

Section 5(h)(2)(A) of the National Summit Conference on Education Act of 1984 is amended by striking the last sentence and inserting "The executive committee is authorized to conduct regional meetings to carry out the purposes of this Act.".

SEC. 915. AGENDA.

Section 5(i)(1) of the National Summit Conference on Education Act of 1984 is amended to read as follows:

"(i)(1) The executive committee shall develop an agenda for the conference prior to the conference. The purpose of this agenda shall be to review the goals and recommendations made by recent reports on education in this country, by organizations such as the National Governors Association, and by the President of the United States, and to make recommendations as to how these goals might be implemented and the roles of different levels of government in that implementation.".

SEC. 916. TECHNICAL AND CLARIFYING AMENDMENTS.

Section 5 of the National Summit Conference on Education Act of 1984 is further amended—

(1) in subsection (d), by inserting "postsecondary education," after "school board members,";

(2) in subsection (e), by striking "section 605" and inserting "subsection (f)"; and

(3) in subsection (f)(2)—

(A) by striking "section 604" and inserting "subsection (d)"; and

(B) by striking "sections 603 and 604" and inserting "subsections (c) and (d)".

PART B—ASSESSMENT

SEC. 921. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress makes the following findings:

(1) Comprehensive testing systems provide data to address—

(A) the need for information instrumental to improving student learning, teacher performance, and program design, which derives from diagnostic sets of assessment information that are curriculum-referenced; and

(B) the need for information describing existing levels of student, teacher, or program performance, which derives from evaluative sets of test information that usually are standardized and norm-referenced.

(2) Results from standardized and norm-referenced tests are used to compare individuals, groups of individuals, or institutions with other similar individuals, groups of individuals, or institutions. Such results provide accurate normative information that, over a period of several years, can be used to identify major trends in the educational achievement of students within a district, a State, or the Nation.

(3) Results from curriculum-referenced tests are used to analyze and assess the strengths and weaknesses of students and programs and to prescribe corrective measures. Such tests provide the best method of measuring student growth and development.

(4) Diagnostic assessment is used to improve curriculum, instruction, and achievement for all students at all ability levels by assessing needs and abilities of students, developing a curriculum based on such needs and abilities, and matching the tests with the taught curriculum.

(b) PURPOSE.—It is the purpose of this title to develop diagnostic assessment systems that are curriculum-referenced to improve student learning, program design, and teacher performance at the local level, and to train teachers in such assessment.

SEC. 922. DEMONSTRATION PROJECTS FOR THE DEVELOPMENT OF EXEMPLARY AND INNOVATIVE DIAGNOSTIC AND ASSESSMENT SYSTEMS AND POLICIES.

(a) PROGRAM AUTHORIZED.—The Secretary, through the Office of Educational Research and Improvement, is authorized to make grants to State educational agencies, local educational agencies, institutions of higher education, and consortia of such agencies or institutions (which consortia may include nonprofit or for-profit agencies) for purposes of establishing demonstration projects to develop exemplary and innovative diagnostic assessment systems and policies.

(b) ELIGIBLE AGENCIES.—Any State educational agency, local educational agency, institution of higher education, or consortium described in subsection (a) that desires to receive a grant under this section shall submit to the Secretary an application at such time, in such manner, and containing or accompanied by such information and assurances as the Secretary may reasonably require. Each such application shall demonstrate to the Secretary that the agency, institution, or consortium, in developing diagnostic assessment systems and policies with assistance under the grant, will collaborate with experts from the field, including experts from institutions of higher education and other scholars, to ensure the proper critical perspective and the quality of the assessment.

(c) PRIORITY FOR GRANTS.—The Secretary shall give priority for grants under this section to State educational agencies, local educational agencies, institutions of higher education, or consortia described in subsection (a) that submit applications that—

(1) demonstrate how data gathered through comprehensive, district-wide needs assessments will be disaggregated with respect to strengths and weaknesses of students served by the agency, institution, or consortium and how such assessments will incorporate the assessment required by section 1014;

(2) demonstrate how data gathered from such assessments will be used to improve student performance, particularly with respect to students who are members of minorities and students of varying socioeconomic statuses;

(3) provide for programs for teacher training in diagnostic assessment skills, with special emphasis on minorities;

(4) describe how the scope of work will include professional expertise from test publishers, institutions of higher education, textbook publishers, and other experts from the field; and

(5) demonstrate how data will be disaggregated and presented in nontechnical language to appropriate members of the school community, including visiting committees and review boards.

(d) LIMITATION ON ELIGIBILITY.—A local educational agency may receive a grant under this section in each of not more than 5 fiscal years.

(e) REPORTS.—Not later than the end of the 2-year period beginning on the date of the enactment of this Act, and every 2 years thereafter, the Secretary shall report to the Congress on the grant program established under this section. Each such report shall describe how diagnostic assessment systems developed with assistance under this section relate to research conducted by the Office of Educational Research and Improvement, including research on other Federal and State programs of standardized testing.

(f) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out the provisions of this section $20,000,000 for the fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995.

The CHAIRMAN. Pursuant to the order of the House of earlier today, no amendment to said substitute shall be in order except those amendments numbered 3, 5, 9, 10, 11, and 12 printed in House Report 101-588, which shall be considered in the order and manner specified in said report, and those amendments offered en bloc by the gentleman from California [Mr. HAWKINS]. Said en bloc amendments shall

be debatable for 30 minutes, equally divided and controlled by the gentleman from California [Mr. HAWKINS] and the gentleman from Pennsylvania [Mr. GOODLING] and are not subject to amendment.

EN BLOC AMENDMENTS OFFERED BY MR. HAWKINS

Mr. HAWKINS. Mr. Chairman, I offer en bloc amendments.

The CHAIRMAN. The Clerk will report the en bloc amendments.

The Clerk read as follows:

Amendments offered by Mr. HAWKINS: Page 7, line 15, insert "foreign languages," after "mathematics, science,".

Page 20, strike lines 12 and 13 and insert the following:

PART B—LAW-RELATED EDUCATION PROGRAMS

Page 20, line 17, strike "(20 U.S.C. is amended)—" and insert the following: "(20 U.S.C. 3151 et seq.) is amended—".

Page 22, after line 19, insert the following:

SEC. 322. AMENDMENT TO LAW-RELATED EDUCATION PROGRAM.

Section 1565 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2965) is amended—

(1) by striking "(a) AUTHORIZATION.—" and inserting "(1)";

(2) by inserting after the section heading the following:

"(a) AUTHORIZATION.—;

(3) in subsection (a)—

(A) by moving paragraph (1) (as designated by paragraph (1) of this section) 2 ems to the right so that it is indented 4 ems from the left margin and aligned with paragraphs (2) and (3) (as added by subparagraph (B) of this paragraph); and

(B) by adding at the end the following:

"(2) The Secretary shall give priority for grants and contracts under this section to agencies, organizations, and institutions described in paragraph (1) that plan to operate statewide programs.

"(3)(A) Except as provided in subparagraph (B), the Secretary shall award grants and enter into contracts under this section for periods of 2 or 3 years.

"(B) The Secretary may award a grant or enter into a contract under this section for a period of less than 2 years in any case in which the Secretary determines that special circumstances exist."; and

(4) by adding at the end the following:

"(d) APPLICATIONS.—

"(1) Any agency, organization, or institution described in subsection (a)(1) that desires to receive a grant or enter into a contract under this section shall submit an application to the Secretary at such time, in such manner, and containing or accompanied by such information as the Secretary may reasonably require.

"(2) The Secretary shall convene a panel of experts for purposes of reviewing applications submitted under paragraph (1). Such experts shall be individuals who have experience in and are familiar with law-related education.".

PART C—AMENDMENTS TO OTHER EDUCATION PROGRAMS

SEC. 331. AMENDMENTS TO THE BILINGUAL EDUCATION ACT.

(a) AUTHORIZATION OF APPROPRIATIONS.—Subsection (b) of section 7002 of the Bilingual Education Act (20 U.S.C. 3282) is amended by adding at the end the following:

"(8) From the sums appropriated under paragraph (1) for part A for any fiscal year, the Secretary is authorized to reserve not more than $1,000,000 for developmental bilingual education projects and special alternative instructional projects in middle school grades carried out under section 7021(a)(7).".

(b) BILINGUAL EDUCATION PROGRAMS.—Subsection (a) of section 7021 of the Bilingual Education Act (20 U.S.C. 3291) is amended—

(1) by striking "and" at the end of paragraph (5);

(2) by striking the period at the end of paragraph (6) and inserting "; and"; and

(3) by adding at the end the following:

"(7) programs for developmental bilingual education or special alternative instructional projects, to be carried out in middle school grades, that feature developmental bilingual approaches for fostering academic achievement and retention by emphasizing the arts and humanities and placing special emphasis on site-based decision-making, magnet schools community involvement, and collaboration with local colleges.".

SEC. 332. PROGRAMS FOR IMPROVING EDUCATIONAL PERFORMANCE OF UNDERACHIEVERS.

(a) GENERAL AUTHORITY.—Section 4601(a) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 3151(a)) is amended—

(1) by striking "and" at the end of subparagraph (C);

(2) by striking the period at the end of subparagraph (D) and inserting "; and"; and

(3) by adding at the end the following:

"(E) establish programs for improving the educational performance of and employment opportunities available for underachieving students in accordance with section 4606.".

(b) PROGRAM AUTHORIZED.—Part F of title IV of the Elementary and Secondary Education Act of 1965 (as amended by section 321 of this Act) (20 U.S.C. 3151 et seq.) is amended—

(1) by redesignating sections 4606 through 4610 as sections 4607 through 4610, respectively; and

(2) by inserting after section 4605 the following:

"SEC. 4606. PROGRAMS FOR IMPROVING EDUCATIONAL PERFORMANCE OF UNDERACHIEVERS.

"(a) GENERAL AUTHORITY.—The Secretary is authorized to make grants and enter into contracts with local educational agencies, as authorized by section 4601, for the purpose of improving the educational performance of and employment opportunities available for underachieving students.

"(b) PRIORITY.—The Secretary shall give priority for grants under this section to local educational agencies that propose to demonstrate effective approaches to improving the performance of underachieving students.

"(c) DEFINITION.—For the purposes of this section, the term 'underachieving student' means an elementary or secondary school student who is not performing to his or her educational potential.".

Page 40, line 25, strike "and".

Page 41, line 10, strike the period and insert "; and".

Page 41, after line 10, insert the following:

(5) establish and administer a National Workplace Literacy Assistance Collaborative, in accordance with the requirements of subsection (q), to assist small and medium-sized businesses, business associations, and labor organizations in developing and implementing national strategies in workforce literacy programs tailored to the needs of the workplace.

Page 44, beginning on line 2, strike "entitled to receive" and insert "paid at a rate equal to".

Page 46, after line 3, insert the following:

(q) NATIONAL WORKPLACE LITERACY ASSISTANCE COLLABORATIVE.—

(1) There is established within the Institute a National Workplace Literacy Assistance Collaborative (in this subsection referred to as the Collaborative) to improve the basic skills of the currently employed, especially those workers who are marginally employed with low basic skills and limited opportunity for long-term employment and advancement, by assisting small and medium-sized businesses, business associations, and labor organizations to develop and implement literacy programs tailored to the needs of the workplace and workforce sectors.

(2) The Collaborative shall—

(A) develop and implement a plan for providing small and medium-sized businesses with the technical assistance required to address the literacy needs of their workforce;

(B) monitor the development of workplace literacy training programs and identify best practices and successful small and medium-sized business program models;

(C) inform businesses and unions of research findings and best practices regarding exemplary curricula, findings, and best practices regarding exemplary curricula, instructional techniques, training models, and the use of technology as a training tool in the workplace;

(D) provide technical assistance to help businesses assess individual worker literacy skill needs, implement workplace literacy training programs, and evaluate training program effectiveness;

(E) promote cooperation and coordination among State and local agencies and the private sector to obtain maximum uses of existing literacy and basic skills training resources;

(F) conduct regional and State small business workplace literacy meetings to increase program effectiveness and accountability;

(G) establish cooperative arrangement with the National Institute for Literacy and other centers involved in literacy and basic skills research and development activities;

(H) prepare and produce written and video materials necessary to support technical assistance and information dissemination efforts; and

(I) establish a program of grants, in accordance with the requirements of paragraph (3), to facilitate the design and implementation of national strategies to assist small and medium-sized businesses and unions to effectively provide literacy and basic skills training to workers.

(3) In order to carry out the purpose of paragraph (2)(I), the Board shall establish a program of grants in accordance with the requirements of this paragraph.

(A) Grants awarded under this paragraph shall provide funds to establish large-scale national strategies in workforce literacy, which may include, but are not limited to, the following activities:

(i) Basic skills training that is cost-effective and needed by employees and required by their employers to establish a trainable workforce which can take advantage of further job specific training and advance the productivity of the labor force on an individual, industry, or national level;

(ii) specific program offerings, which may include—

(I) English as a second language instruction;

(II) communications skill building;

(III) reading and writing skill building; and

(IV) computation and problem solving;

(iii) appropriate assessments of individual worker's literacy and basic skills needs and appropriate assessments of the skill levels required by business;

(iv) cooperative arrangements with other organizations involved in providing literacy and basic skills training, including adult education, vocational education, community and junior colleges, community-based organizations, State level agencies, and private industry councils; and

(v) the establishment as appropriate of technology-based learning environments, such as computer-based learning centers.

(B) To receive a grant under this paragraph, a proposal shall be submitted to the Board by a business association, industry organization, or organized labor, or consortia of these organizations, containing a plan specifying a strategy for designing and implementing workplace literacy and basic skills training for workers, and justifying the national, statewide, or industry-wise importance of this strategy. The proposal shall include—

(i) a demonstration of need for literacy and basic skills training;

(ii) a description of the business or industry for which the strategy is to be established;

(iii) a statement of specific, measurable goals and participant outcomes;

(iv) a strategy for achieving the goals, including a description of the process to identify literacy and basic skills required by employer and the skills of individual workers, and a description of the specific services to be provided;

(v) letters of agreement from all organizations participating in the grant program and letters of support from appropriate national, State, or community officials;

(vi) a plan for an independent evaluation of the model's effectiveness in improving the literacy and basic skills of workers and the productivity of employees, including potential for the model's potential replicability or adaption; and

(vii) a description of the costs of that activities to be undertaken.

(C) The Board shall develop a formal process for the submission of proposals and announce that process and the availability of funds in the Federal Register.

(D) The Board shall pay to each grant recipient the Federal share of the cost of the activities described in the application. The Federal share shall not exceed 70 percent. The non-Federal share may be in the form of in-kind contributions, cash, worker-release time, instructional costs, equipment, or facilities provided by the entities participating in the grant program.

(E) The Board shall give priority to grant proposals that are authorized in pararaph (3)(A)(iv).

(G) The Board may take into account geographic considerations (such as rural and urban) and national distribution, when awarding grants under paragraph (3) of this subsection.

(H) The Board shall award no more than 5 grants from each $10,000,000 appropriated to carry out the provisions of paragraph (3) of this subsection.

(4) EVALUATION.—The Board shall every 3 years and at the expiration of this section have an independent evaluation conducted on the effectiveness of activities undertaken by the collaborative.

(e) FUNCTIONAL LITERACY REQUIREMENT FOR INDIVIDUALS IN STATE CORRECTIONAL INSTITUTIONS.—Section 321 of the Adult Education Act (20 U.S.C. 1203) is amended—

(1) by striking "From" and inserting the following: "(a) PROGRAM AUTHORIZED.—Subject to subsection (b), from"; and

(2) by adding at the end the following:

"(b) LIMITATION.—

(1) No State shall receive the portion of its grant under this subpart that is required under section 322(b)(1) to be used for corrections education unless such State—

"(A) before the expiration of the 2-year period beginning on the date of the enactment of the Equity and Excellence in Education Act of 1990, has in effect a mandatory functional literacy program in at least 1 State corrections institution; and

"(B) before the expiration of the 5-year period beginning on the date of the enactment of the Equity and Excellence in Education Act of 1990, has in effect a mandatory functional literacy program in each State corrections institution.

"(2) Each mandatory functional literacy program required by paragraph (1) shall include—

"(A) a requirement that each individual convicted of a felony who is incarcercerated in the State corrections institution and who is not functionally literate participate in such program until such individual—

"(i) achieves functional literacy;

"(ii) is granted probation, parole, or a suspended sentence;

"(iii) completes his or her sentence; or

"(iv) is released pursuant to a court order;

"(B) a prohibition on granting probation or parole to or suspending the sentence of any individual described in subparagraph (A) who refuses to participate in such program; and

"(C) adequate opportunities for individuals required to participate in such program to be tested for functional literacy.

"(3) For purposes of this subsection, the term 'functional literacy' means the ability to demonstrate, in English, educational skills at not less than the eighth grade level. Skills required to be demonstrated under the preceding sentence shall include all skills necessary to function independently in society, such as reading, writing, comprehension, and arithmetic computation skills.

"(4) Any individual serving a life sentence or under a sentence of death shall not be required to participate in a mandatory functional literacy program.

"(5) The Secretary may waive the application of paragraph (2)(B) in any case in which a court order requires early release of an individual due to constitutional considerations.".

Page 64, strike lines 2 through 11 and insert the following:

(a) STATE GRANT PROGRAM.—Section 1052 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2742) is amended—

(1) by adding at the end of subsection (a) the following: "In any year in which this subsection applies, from amounts apropriated for purposes of carrying out this part, the Secretary may reserve an amount equal to not more than 3 percent of such amounts for purposes of—

"(1) carrying out the evaluation required by section 1058; and

"(2) providing technical assistance for program improvement to local educational agencies or consortia of such agencies that receive grants under this part.";

(2) in subsection (b)—

(A) by striking "$50,000,000" and inserting "$100,000,000"; and

(B) by adding at the end the following: "In any year in which this subsection applies, each State that receives a grant under this part may use not more than 5 percent of assistance provided under the grant for costs of administration and technical assistance."; and

(3) in subsection (c)—

(A) by inserting after "part" the following: "(other than section 1053)";

(B) by striking "and"; and

(C) by inserting before the period the following: ", Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands".

Page 65, after line 8, insert the following:

(c) FEDERAL SHARE LIMITATION.—Subsection (c) of section 1054 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2744) is amended—

(1) by redesignating paragraphs (1) through (4) as subparagraphs (A) through (D), respectively, and by moving such subparagraphs 2 ems to the right so that they are indented 6 ems from the left margin;

(2) by striking "LIMITATION.—" and all that follows through "may be—" and inserting the following: "LIMITATION.—

"(1) The Federal share under this part may be—";

(3) by moving the matter following subparagraph (B) (as redesignated by paragraph (1) of this subsection) 2 ems to the right, so that it is indented 4 ems from the left margin;

(4) by striking the last sentence and inserting the following: "The remaining cost may be provided in cash or in kind, fairly evaluated, and may be obtained from any source other than funds made available for programs under this chapter."; and

(5) by adding at the end the following:

"(2) The Secretary may waive, in whole or in part, the requirement that all or part of the remaining cost described in paragraph (2) be obtained from sources other than funds made available under this chapter if a local educational agency—

"(A) demonstrates that it otherwise would not be able to participate in the program under this part; and

"(B) negotiates an agreement with the Secretary with respect to the amount of the remaining cost to which the waiver would be applicable.".

(d) ELIGIBLE PARTICIPANTS.—Section 1055 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2745) is amended—

(1) by striking "Eligible" and inserting the following: "(a) IN GENERAL.—Except as provided in subsection (b), eligible"; and

(2) by adding at the end the following:

"(b) CONTINUATION OF ELIGIBILITY FOR CERTAIN PARTICIPANTS.—Any family participating in the program under this part that becomes ineligible for such participation as a result of 1 or more members of the family becoming ineligible for such participation, may continue to participate in the program until all members of the family become ineligible for participation, which—

"(1) in the case of a family in which ineligibility was due to the child or children of such family attaining the age of 8, shall be when the parent or parents become ineligible due to educational advancement; and

"(2) in the case of a family in which ineligibility was due to the educational advancement of the parent or parents of such family, shall be when all children in the family attain the age of 8.".

(e) SELECTION PROCESS.—Subsection (a) of section 1057 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2747) is amended by striking paragraph (2) and redesignating the succeeding paragraphs accordingly.

(f) EFFECTIVE DATES.—

(1) OCTOBER 1, 1990.—The amendments made by subsections (a) and (d) of this section shall take effect on October 1, 1990.

(2) GRANTS FOR FISCAL YEAR 1991.—The amendments made by subsection (b) shall apply with respect to grants made under this part for the fiscal year 1991.

PART C—AMENDMENTS TO THE GENERAL EDUCATION PROVISIONS ACT

SEC. 931. NATIONAL CENTER FOR EDUCATION STATISTICS.

Paragraph (4) of section 406(d) of the General Education Provisions Act (20 U.S.C. 1221e-1(d) is amended by adding at the end the following:

"(G)(i) This paragraph shall not apply to—

"(I) the survey required by section 1303(c) of the Higher Education Amendments of 1986; or

"(II) to any longitudinal study concerning access, choice, persistence progress, or attainment in postsecondary education.

"(ii) In conducting any study described in clause (i), the Center shall protect the confidentiality of respondents by separating information relating to the identity of individuals from other information contained in questionnaires responded to by such individuals. Any file that is publicly released shall not include the following individual identifiers:

"(I) Name.

"(II) Social Security number.

"(III) Address.

"(IV) Telephone number.

"(iii) No department, bureau, agency, officer, or employee of the Government, except the Commisssioner of Education Statistics in carrying out the purposes of this section, shall require, for any reason, copies of responses or reports that include individual identifiers described in clause (ii). Copies of such responses or reports that have been so retained or filed with the Center, or any of its employees, contractors, or agents, shall be immune from legal process and shall not, without the consent of the individual concerned, be admitted as evidence or used for any purpose in any action, suit, or other judicial or administrative proceeding.

"(H) This paragraph shall not apply to the General Accounting Office.".

SEC. 932. RESPONSIBILITY OF STATES TO FURNISH INFORMATION CONCERNING USES OF FEDERAL FUNDS.

Section 406A of the General Education Provisions Act (20 U.S.C. 1232f) is amended to read as follows:

"RESPONSIBILITY OF STATES TO FURNISH INFORMATION

"SEC. 406A. (a) Each State educational agency shall submit to the Secretary a report on or before March 15 of every second year. Each such report shall include—

"(1) information with respect to the uses of Federal funds in that State in the 2 preceding fiscal years under any applicable program under the jurisdiction of the State educational agency; and

"(2) to the extent practicable, information with respect to the uses of Federal funds in that State in the 2 preceding fiscal years under any Federal program administered by the State that provided grants or contracts to a local educational agency in the State.

"(b) Each report submitted as required by subsection (a) shall—

"(1) list, with respect to each program for which information is provided, all grants made to and contracts entered into with local educational agencies and other public and private agencies and institutions within the State during each fiscal year concerned;

"(2) analyze the information included in the report by local educational agency and by program;

"(3) include the total amount of funds available to the State under each such program for each fiscal year concerned and specify which appropriation Act or Acts made such funds available;

"(4) separately account for any funds carried over from a preceding fiscal year by any State or local educational agency; and

"(5) be made readily available by the State to local educational agencies and institutions within the State and to the public.

"(c)(1) On or before August 15th of any year in which reports are submitted under subsection (a), the Secretary shall submit a report to the Committee on Education and Labor of the House of Representatives and the Committee on Labor and Human Resources of the Senate. Such report shall include—

"(1) an analysis of such the content and data quality of such reports;

"(2) a compilation of statistical data derived from such reports; and

"(3) information obtained by the Secretary with respect to—

"(A) direct grants made to local educational agencies by the Federal Government; and

"(B) contracts entered into between such agencies and the Federal Government.".

SEC. 933. ENFORCEMENT.

(a) OFFICE OF ADMINISTRATIVE LAW JUDGES.—Section 451 of the General Education Provisions Act (20 U.S.C. 1234) is amended—

(1) in the first sentence of subsection (c), by striking "the Department" and inserting "the United States";

(2) in subsection (e), by striking "determination" and inserting "decision"; and

(3) in paragraph (2) of subsection (g)—

(A) in the first sentence, by striking "subsections (f)(1) and (g)(1)" and inserting "subsection (f)(1) and paragraph (1)";

(B) by inserting after the first sentence the following: "Such application for enforcement may be made in the judge's name, through the judge's attorneys, or through the party seeking enforcement of the subpoena."; and

(C) by adding at the end the following: "The judge is authorized to institute and maintain litigation to carry out such provisions without the approval or assistance of the Department of Justice.".

(b) RECOVERY OF FUNDS.—Paragraph (1) of section 452(f) of the General Education Provisions Act (20 U.S.C. 1234a(f)) is amended by striking "Department" and inserting "departmental".

(c) MEASURE OF RECOVERY.—Subsection (b) of section 453 of the General Education Provisions Act (20 U.S.C. 1234b) is amended—

(1) in paragraph (3), by striking "paragraph (2)" and inserting "paragraph (2)(B)"; and

(2) in paragraph (5)—

(A) in subparagraph (B), by striking "was permissible" and inserting "might have been permissible"; and

(B) in subparagraph (C), by striking "was permissible" and inserting "might have been permissible".

(d) USE OF RECOVERED FUNDS.—Subsection (c) of section 459 of the General Education Provisions Act (20 U.S.C. 1234h) is amended by striking "following" and all that follows and inserting the following: "following the later of—

"(1) the fiscal year in which final agency action under section 452(e) is taken; and

"(2) the fiscal year in which judicial review of such action is completed.".

TITLE X—PLANNING GRANTS FOR INNOVATIVE DEMONSTRATION PROJECTS AND RESEARCH

SEC. 1001. GRANTS TO STATE AND LOCAL EDUCATIONAL AGENCIES.

(a) STATEMENT OF PURPOSE.—The Secretary is authorized to make grants to State educational agencies, local educational agencies, and consortia of such agencies to plan for the development and expansion of policies, programs, and projects that—

(1) increase opportunities of parents, particularly parents of disadvantaged children, parents of minority children, and parents of children who live in rural areas, to select the school or program attended by their children;

(2) advance equity in the methods used by States and local educational agencies to support systems of public elementary and secondary education;

(3) further the involvement of parents in the education of their children, especially parents who are economically disadvantaged; and

(4) further the involvement of businesses and communities in public education.

(b) USES OF FUNDS.—Funds provided under grants under this section may be used to plan for—

(1) the development of State or local policies and procedures for open enrollment among public schools or programs;

(2) the development of State or local policies and procedures to assist parents, particularly parents of disadvantaged children and parents of minority children, to become more involved in the education of their children;

(3) the development of improved methods for States to advance equity in the systems used by States and local educational agencies to finance public elementary and secondary education; and

(4) the development of improved methods to involve businesses and communities in public education.

(c) APPLICATIONS.—

(1) IN GENERAL.—Any agency or consortium that desires to receive a grant under this section shall submit to the Secretary an application in such form, in such manner, and containing or accompanied by such information as the Secretary may reasonably require. Each such application shall—

(A) assure that the funds provided under the grant will be used for the purposes described in subsection (b);

(B) describe the need for the grant;

(C) describe the objectives of the project and how those objectives will be fulfilled;

(D) assure that any project assisted with funds under this section will not—

(i) result in segregation in schools within the State based upon race, religion, color, national origin, sex, or handicap, or impede the progress of desegregation among the schools within the State; or

(ii) in the case of a grant to a local educational agency or to a consortium that includes a local educational agency, result in such segregation or impede the progress of desegregation among the schools of the local educational agency;

(E) in the case of a grant to a State educational agency, assure that the State educational agency will provide assistance to the project, in cash or in kind, in an amount at least equal to the amount of funds awarded under the grant; and

(F) assure that outreach and dissemination activities will be conducted with assistance under the grant to inform parents of their rights, choices, and obligations with respect to activities funded under the grant as such activities relate to the education of their children.

(2) OPPORTUNITY FOR COMMENT BY STATE EDUCATIONAL AGENCY.—Each local educational agency or consortia consisting entirely of local educational agencies that submits an application to the Secretary under this subsection shall also provide a copy of such application to the appropriate State educational agency. The State educational agency may review such application and provide comments to the Secretary with respect to such application not later than the expiration of the 30-day period beginning on the date that the application is submitted to the Secretary and to the State educational agency.

(3) APPLICATIONS FOR CONTINUATION OF GRANTS.—An agency or consortium that receives assistance under this section for 1 year may not receive such assistance under this section for any later year unless such agency or consortium includes in its application for continuation of such assistance, in addition to the information and assurances required by paragraph (1), a description of the methods employed by such agency to fulfill the assurance described in paragraph (1)(D).

(d) PRIORITY.—

(1) IN GENERAL.—The Secretary shall give priority for grants under this section other than planning grants for open enrollment systems to agencies and consortia that propose projects that have the greatest potential for improving the education of disadvantaged students and minority students.

(2) OPEN ENROLLMENT GRANTS.—In making planning grants for open enrollment systems under this section, the Secretary shall give equal priority to students described in paragraph (1) and students who live in rural areas.

(e) DURATION OF AWARDS.—Grants under this section may be awarded for a period not to exceed 3 years.

(f) COOPERATION.—Any agency or consortium that receives a grant under this section shall, to the extent practicable, cooperate with research activities carried out under section 1002.

(g) DISSEMINATION OF EVALUATION RESULTS.—Each agency and consortium that receives a grant under this part shall provide a copy of results of evaluations of programs assisted under such grants to the Educational Resources Information Center.

SEC. 1002. RESEARCH AND DISSEMINATION.

(a) GENERAL AUTHORITY.—The Secretary, through the Office of Educational Research and Improvement, is authorized to conduct research on open enrollment systems, parental involvement, school finance equalization, and business involvement in public education and to disseminate the results of such research. The Office of Educational Research and Improvement may conduct such research and dissemination directly or through grants, contracts, or cooperative agreements with institutions of higher education, State educational agencies, public or private nonprofit organizations, or individual researchers.

(b) PROGRAM REQUIREMENTS.—Each recipient of funds under this section for purposes of conducting research shall submit a copy of its final research results to the Educational Resources Information Center.

(c) FEDERAL DISSEMINATION.—To the extent possible, the Secretary shall provide information to State and local educational agencies regarding opportunities for dissemination of exemplary programs under this part through the National Diffusion Network established under section 1562 of the Elementary and Secondary Education Act of 1965. The Secretary shall coordinate the identification of exemplary projects with the National Diffusion Network.

SEC. 1003. DEFINITIONS.

For purposes of this part:

(1) The term "local educational agency" has the meaning given such term in section 1471(12) of the Elementary and Secondary Education Act of 1965.

(2) The term "open enrollment system" means a system adopted by a State educational agency or local educational agency under which parents may select the school or educational program in which their child will be enrolled.

(3) The term "Secretary" means the Secretary of Education.

(4) The term "State educational agency" has the meaning given such term in section 1471(23) of the Elementary and Secondary Education Act of 1965.

SEC. 1004. AUTHORIZATION OF APPROPRIATIONS.

(a) IN GENERAL.—For purposes of carrying out this part, there are authorized to be appropriated $40,000,000 for each of the fiscal years 1991, 1992, and 1993.

(b) AMOUNTS FOR RESEARCH AND DISSEMINATION.—From the amounts appropriated under subsection (a) in any fiscal year, the Secretary may reserve not more than $1,000,000 for purposes of carrying out section 1002.

TITLE XI—EDUCATIONAL PERFORMANCE AGREEMENTS FOR SCHOOL RESTRUCTURING

SEC. 1101. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds and declares that—

(1) the ability of the United States to deliver more effective educational services to its citizens, especially disadvantaged citizens and traditionally underserved citizens, is of primary importance to the national security and to the continued role of the United States as a world leader;

(2) local school authorities should have more discretion in the uses of Federal and State funds than currently provided, if they can demonstrate the ability to educate children and adults to perform at higher levels;

(3) local school authorities and the Governors of several States have requested greater flexibility in designing innovative programs for training, special needs education, and drug education, in exchange for an agreement to achieve higher, clearly stated performance levels in a reasonable period of time; and

(4) all public education in this country will benefit from school improvement models developed under such agreements.

(b) PURPOSE.—It is the purpose of this title to establish a national demonstration program of educational performance agreements under which—

(1) local authorities develop proposals which enable students to achieve higher performance;

(2) with such proposals, schools are allowed to combine funds for the education of special needs students, drug education, and training programs;

(3) Federal, State and local protections with respect to civil rights, discrimination and safety will be upheld; and

(4) States will make available such funds as may be necessary to plan, develop, monitor and evaluate local performance agreements.

SEC. 1102. ESTABLISHMENT OF PROGRAM FOR EDUCATIONAL PERFORMANCE AGREEMENTS FOR SCHOOL RESTRUCTURING.

(a) GENERAL AUTHORITY.—For the purposes of granting authority to combine Federal and State special needs education, drug education, and training programs, and waiving Federal laws and regulations relating to the use of funds under certain Acts, the Secretary of Education shall—

(1) receive assurances from and enter into educational performance agreements with the State concerned for not more than 50 local school authorities, each of which shall also enter into a local performance agreement in accordance with section 1103; and

(2) develop procedures by which the agreements in paragraph (1) will be reached.

(b) FEDERAL PROGRAMS PERMITTED TO BE COMBINED.—The educational performance agreement and the local performance agreements may provide for the combination (and contain waivers from restrictions regarding uses of funds applicable to) Federal, State, and local funds available for programs relating to special needs education, drug education, and training programs, including—

(1) in the case of training programs at the secondary level for children participating in vocational education courses, funds provided under—

(A) the Carl D. Perkins Vocational Education Act; and

(B)(i) the Job Training Partnership Act;

(ii) the Drug-Free Schools and Communities Act of 1986; or

(iii) subtitles A, B, and C of title VII of the Stewart B. McKinney Homeless Assistance Act; and

(2) in the case of special needs programs at the elementary school level for children receiving services under chapter 1 of title I of the Elementary and Secondary Education Act of 1965, funds provided under—

(A) such chapter; and

(B)(i) subtitles A, B, and C of title VII of the Stewart B. McKinney Homeless Assistance Act;

(ii) the Drug-Free Schools and Communities Act of 1986;

(iii) the School Dropout Demonstration Assistance Act of 1988;

(iv) the Bilingual Education Act;

(v) the Jacob K. Javits Gifted and Talented Students Education Act of 1988;

(vi) the Emergency Immigrant Education Act of 1984; or

(vii) title XI of the Education Amendments of 1978.

(c) AUTHORITY OF OTHER AGENCIES.—For the purposes of implementing an educational performance agreement that proposes to include programs not under the jurisdiction of the Secretary of Education, the Secretary of Education shall provide copies of such proposed agreement to each Secretary concerned. Each such Secretary shall, with respect to the programs under the jurisdiction of such Secretary, have the same power as the Secretary of Education has under subsection (a) to grant authority to combine such programs, and to waive Federal laws and regulations relating to the use of funds in accordance with an educational performance agreement and its component local performance agreements that meet the requirements of this title.

(d) LIMITATIONS.—Nothing in this title may be construed—

(1) to authorize any changes in, substitutions for, or lessening of the mandates and protections of Federal laws and regulations regarding civil rights, discrimination, and safety, and the procedural safeguards contained therein;

(2) to affect regulations and prohibitions concerning the diversion of Federal funds for private use;

(3) to absolve any State or local agency of any maintenance of effort or comparability of services requirements under any program described in subsection (b);

(4) to alter the distribution of funds to schools within the local educational agency, or to change the way funds are utilized within schools for programs not included under the local performance agreement; or

(5) to permit funds made available for services and activities to be used for the construction, renovation, or repair of facilities.

(e) SUNSET OF COMBINATION AUTHORITY.—The authority to combine programs (and receive exemptions) under this section shall expire at the conclusion of the sixth year of the educational performance agreement. Each applicant shall sign a form acknowledging that—

(1) the applicant's participation in the agreement is for experimental purposes;

(2) the applicant understands that the rules and regulations waived under the agreement will no longer be waived at the end of the 6 years, absent subsequent legislation to the contrary; and

(3) the applicant will not use any public funds to influence the passage of legislation to extend the agreements under this section.

(f) AUDITS.—Expenditures made in accordance with the provisions of this title, the applicable educational performance agreement, and local performance agreement shall not be subject to exception or recovery, pursuant to audit, for failure to comply with the provisions of any law governing a program or funds combined under the agreement, other than a provision referred to in subsection (d).

SEC. 1103. STATE ASSURANCES AND EDUCATIONAL PERFORMANCE AGREEMENTS.

(a) STATE ASSURANCES.—Within 2 years after the date of enactment of this title, the Secretary of Education shall select, from those States that provide appropriate assurances, not more than 50 local school authorities to combine Federal special needs education, drug education, and training program funds under an educational performance agreement that complies with subsection (b). Such assurances shall contain such information as the Secretary of Education may determine to be necessary, including—

(1) assurances that sufficient State funds will be available for technical assistance, planning and development, implementation, assessment, and evaluation;

(2) commitments from the State that local educational performance agreement working groups will be formed to develop and implement the local performance agreements;

(3) assurances from the State that participating in an educational performance agreement will not lessen its commitment to enforce Federal laws and regulations with respect to civil rights, discrimination, and safety;

(4) commitments from the State that it will exempt local school authorities from regulations for State programs, as specified in the local performance agreements relating to the use of funds under certain Acts, and will permit comparable combination of the funds provided under State programs included under such agreements;

(5) assurances that the State will—

(A) give priority to local performance agreements proposed by local school authorities concerning schools in areas with high poverty rates serving large numbers or percentages of students receiving services under chapter 1 of title I of the Elementary and Secondary Education Act of 1965;

(B) give appropriate consideration to the geographical distribution of local performance agreements, and the distribution between urban and rural areas;

(C) consider the prior record of compliance regarding Federal laws and regulations with respect to civil rights, discrimination, and safety; and

(D) in determining areas with high poverty rates under this paragraph, utilize the most recent poverty income guidelines promulgated each year by the Secretary of Health and Human Services;

(6) assurances that, other than the local performance agreements, the State will not require new or additional paperwork or promulgate new regulations as a result of participation in the agreement;

(7) assurances from the State that appropriate indices and goals for higher educa-

tional performance will be described in the local performance agreements;

(8) commitments from the State that the local performance agreements will be developed with the assistance of full-time local educational personnel (including paid release time for teachers), parents and other representatives of relevant groups;

(9) assurances from all appropriate State agencies that an approved local performance agreement will serve as any required local application or plan for programs that are included in the agreement;

(10) commitment from the State that a collaborative process will occur which involves, at a minimum, participation from the chief elected official and the chief State school officer;

(11) assurances from all appropriate State agencies that approved local performance agreements will serve as modifications or amendments to the relevant State plans; and

(12) assurances from the State that authority to waive State laws and regulations specified under the local performance agreements regarding uses of funds under certain Acts will be retained by the appropriate State agency.

(b) EDUCATIONAL PERFORMANCE AGREEMENTS.—Each educational performance agreement under this title shall be entered into by each Secretary concerned and the States selected under subsection (a) within 2 years of the date of enactment of this title and shall be effective for 6 fiscal years. Such agreement shall—

(1) identify the responsibilities of the respective parties to the agreement;

(2) describe the methods and activities by which the commitments and assurances provided under section 1103(a) will be implemented;

(3) require that the first such fiscal year be devoted to the development of local performance agreements (in accordance with section 1104) for the implementation of the agreement;

(4) not permit the combination of Federal funds during such first fiscal year;

(5) require that the second through sixth such fiscal years be years in which the educational performance agreement is implemented in accordance with the local performance agreements;

(6) once the local performance agreements are adopted, include a specific description of—

(A) the Federal and State special needs education, drug education, and training programs and funds which will be affected and the manner in which the funds will be combined; and

(B) the waivers which will be provided from restrictions applicable to Federal, State, and local funds available for such programs; and

(7) contain such additional information and assurances as each Secretary concerned may require consistent with the purposes of this title.

(c) INITIAL PLANNING YEAR.—During the initial planning year, the State shall provide to the local school authorities—

(1) such technical assistance or funding for technical assistance as may be necessary; and

(2) funds sufficient to meet the costs of developing comprehensive and detailed plans for the implementation of the local performance agreements, including the costs of the working group.

(d) IMPLEMENTATION YEARS.—For the second through sixth fiscal years in which an educational performance agreement under this title is in effect, the State shall make such funds available to the local school authorities as are necessary for continuing technical assistance and local administration, monitoring, and annual evaluation. Such funds shall also be available to other program providers participating in the agreement.

SEC. 1104. LOCAL PERFORMANCE AGREEMENTS.

During the second through sixth year of an educational performance agreement, such agreement shall be effective only if it contains, as component elements, local performance agreements that—

(1) are developed and coordinated by a local educational performance agreement working group comprised of individuals representative of program providers, business, local school authorities and personnel, parents, and other representative individuals with direct involvement with the local performance agreement as appropriate, and who reflect local needs and interests;

(2) are entered into by the schools, the local educational agency, the State, and each Secretary concerned;

(3) are amendable through negotiation during the term of the educational performance agreement;

(4) include any relevant provisions of the State assurances and educational performance agreement under section 1103;

(5) specify the funds to be combined and the waivers required from State and Federal laws and regulations regarding uses of funds under certain Acts to carry out the educational performance agreement;

(6) contain goals for—

(A) children receiving services under chapter 1 of title I of the Elementary and Secondary Education Act of 1965; and

(B) children participating in vocational education courses;

(7) include a set of intermediate performance goals;

(8) include higher outcomes than previously demonstrated over the preceding 3 years for the children described in paragraph (6);

(9) identify the entities which will be responsible for the achievement of the stated goals at the end of each year of the agreement;

(10) include—

(A) a description of the indices to be measured in order to ascertain the amount of progress made toward the stated goals of the agreement, which indices may include measurement instruments developed before or after the date of enactment of this title and may include—

(i) the dropout rate, retention rate, or graduation rate;

(ii) teacher and student absenteeism rates;

(iii) skill levels of students in reading, mathematics, analytical reasoning, and higher order thinking; and

(iv) other indicators considered to be appropriate by the local educational agency, including open-ended problem solving exercises to measure analytical and mathematical skills, portfolios of student's work in subject areas, and performance tests (including vocational skills assessments);

(B) a description of the methods to be used in measuring such indices; and

(C) an average measurement of such indices over the preceding 3 years as of the date the local performance agreement is entered into;

(11) provide for the termination of the local performance agreement, and withdrawal of authority to combine programs, if any Secretary concerned, in consultation with the State, determines that the agency has substantially failed to comply with any requirement of this title, the educational performance agreement, or the local performance agreement;

(12) include a plan for coordinated services and service delivery;

(13) describe rewards and incentives that will be provided to students and successful service providers, particularly incentives for service providers that meet goals for students who are members of special populations and dropouts; and

(14) include a commitment that—

(A) the local performance agreement will be adopted at a regular meeting of the local school authorities, with adequate public notice, and the agreement will include comments received at such meeting with a written description of the response to the concerns expressed in such comments;

(B) the local performance agreement will be reviewed by the local educational agency not less often than once annually during the term of the agreement in accordance with section 1105(a); and

(C) the State will submit the results of the assessments conducted under section 1105(b) to each Secretary concerned.

SEC. 1105. LOCAL REVIEW AND ASSESSMENT.

(a) ANNUAL REVIEW.—

(1) CONDUCT OF REVIEW.—(A) Each local educational agency that enters into a local performance agreement under this title shall conduct an annual review of programs operated under such agreement to ascertain whether improved performance is being achieved and whether such performance is being sustained. Such review—

(i) shall at least include measures of the performance of students targeted under the programs combined under the local performance agreement; and

(ii) shall be conducted in consultation with the local performance agreement working group.

(B) The results of each annual review required by paragraph (1) shall be made available to parents, the public, and the State educational agency involved, and shall be considered as part of the 3-year assessment required under subsection (b).

(2) CONSEQUENCES OF REVIEW.—If the annual review required by paragraph (1) reveals any decline in performance, the local educational agency concerned shall, in cooperation with the local educational performance agreement working group, develop alternative strategies and modify the program as appropriate, including making available additional sources of technical assistance and inservice training.

(b) ASSESSMENT.—

(1) CONDUCT OF ASSESSMENTS.—Each local educational agency shall assess the effectiveness of programs operated under the provisions of the local performance agreement at the end of the third year of program implementation. At a minimum, such assessment shall include measurement of the performance of students eligible for services under chapter 1 of title I of the Elementary and Secondary Education Act of 1965 and students enrolled in vocational education programs. Such assessment results shall be submitted to the State educational agency. The State educational agency shall make public the results reported, and shall transmit the results of these assessments to the Secretary of Education.

(2) CONSEQUENCES OF ASSESSMENTS.—If the local educational agency assessment results

do not achieve the stated goals and outcomes in the local performance agreement, or if the performance of the students participating in the programs does not exceed the average performance of such children for the preceding 3 years or exceed the performance of similar target populations district wide, the local educational agency and the State educational agency shall develop a local implementation and improvement strategy that may include agreement modification, technical assistance from the State, and revised assessment criteria and timetables. The local performance agreement may be terminated, and authority to combine programs withdrawn, if the Secretary of Education determines that—

(A) the local educational agency cannot achieve the goals or sufficient improvement in educational performance even with assistance; or

(B) the local educational agency refuses to negotiate or implement an improvement strategy.

SEC. 1106. EVALUATION AND REPORT TO CONGRESS.

(a) FINAL REPORT.—

(1) CONDUCT OF EVALUATION.—The Secretary of Education, in consultation with each other Secretary concerned, shall enter into a contract for an independent evaluation of each educational performance agreement under this title, and the local performance agreements thereunder, and submit to the appropriate committees of the Congress a report that contains an analysis of that evaluation and a description of the results achieved.

(2) SUBMISSION DEADLINE.—Each report required by paragraph (1) shall be submitted not later than 1 year after the termination or completion of the educational performance agreement.

(b) INTERIM REPORT.—The Secretary of Education shall provide interim progress reports to the Congress with respect to each educational performance agreement under this title, based on an analysis of the yearly evaluations conducted pursuant to each agreement.

SEC. 1107. ASSESSMENT TO ASSIST CONGRESS, STATES, AND SCHOOLS IN IMPROVING STUDENT PERFORMANCE.

(a) REPORT ON THE PUBLIC SCHOOLS.—In order to assist State and local educational agencies and teachers in focusing more time and resources on improving student performance, the Secretary of Education shall, not later than January 1, 1991, prepare a report on the public schools of each State.

(b) CONTENTS OF REPORT.—The report required by subsection (a) shall—

(1) describe the administration of public education within each State and identify any legal, regulatory, and organizational requirements promulgated since 1980 that affect educational practices;

(2) identify which governmental entity promulgated each requirement described in paragraph (1);

(3) analyze the impact of the requirements described in paragraph (1) on the time and resources local educational agencies have available for educating students, including fiscal resources, staff time, facilities, instructional equipment, and services;

(4) determine the extent to which the number of requirements described in paragraph (1) has increased or decreased since 1980 and the reasons for any such increase or decrease; and

(5) include recommendations on how best to simplify Federal or State regulations so that more resources can be used to improve student performance.

(c) SPECIFIC ISSUES FOR ANALYSIS.—In preparing the report on new requirements imposed since 1980, the Secretary of Education shall analyze for each State—

(1) the amount of resources, if any, that local educational agencies must direct to complying with new mandates and other new legal and regulatory requirements directly related to the education of students, including mandated curricula and student-teacher ratios;

(2) the amount of resources, if any, that local educational agencies must expend to meet new mandates and other new legal and regulatory requirements that are not directly related to the education of students;

(3) the amount of time, if any, that school personnel must spend responding to new requests for data and completing new reports to fulfill Federal or State requirements;

(4) the amount of time, if any, that administrators must spend responding to the paperwork requirements that result from new legal, regulatory, and organizational requirements;

(5) the effect of any new legal and regulatory requirements on the ability of local educational practices, including the impact of such requirements on local flexibility and control over the classroom and school building management; and

(6) the degree to which any Federal or State requirements have been reduced since 1980 and how such a reduction was achieved.

(d) DISTRIBUTION OF REPORT.—The appropriate State report shall be submitted to the chief executive officer, chief State school officer, legislative leaders of each State, and major State education organizations by January 1, 1991.

(e) SUMMARY REPORT TO THE CONGRESS.—A summary report on all States shall be submitted by the Secretary of Education to the Congress not later than January 1, 1991. Such summary report shall include a chart comparing the findings in each of the States and shall rank the States according to the degree of regulatory burden within each State.

(f) UPDATE OF REPORT.—By January 1 of each year, the Secretary of Education shall update each State report and the summary report to the Congress, illustrating where Federal or State requirements have increased or decreased during the previous year.

(g) CONSULTATION WITH THE CONGRESS.—The Secretary of Education shall consult with the Committee on Education and Labor of the House of Representatives and the Committee on Labor and Human Resources of the Senate by June 1, 1990, concerning the report's design.

SEC. 1108. DEFINITIONS.

For the purposes of this title:

(1) Except as otherwise provided, each term has the meaning provided under section 1471 of the Elementary and Secondary Education Act of 1965.

(2) The term "local school authorities" shall include, as appropriate, local educational agencies and administrators of all affected public schools.

(3) The term "Secretary concerned" means the head of the Federal agency responsible for the program which the State and local entities propose to be made part of the local performance agreement. In the case of a local performance agreement involving programs under the jurisdiction of more than 1 Federal agency, the agreement on the part of the Federal Government may only be entered into, modified, or terminated by the mutual consent of all involved heads of Federal agencies, except that failure to comply with the terms of the exemption from a provision of law or regulation of 1 agency may be grounds for that agency's withdrawal of that exemption or the involvement of that program, without termination of the entire agreement.

(4) The term "State" includes each of the 50 States and the District of Columbia.

Mr. HAWKINS (during the reading). Mr. Chairman, I ask unanimous consent that the en bloc amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. The gentleman from California [Mr. HAWKINS] will be recognized for 15 minutes and the gentleman from Pennsylvania [Mr. GOODLING] will be recognized for 15 minutes.

The Chair recognizes the gentleman from California [Mr. HAWKINS].

Mr. HAWKINS. Mr. Chairman, I yield myself such time as I may consume.

These amendments offered en bloc carried out the agreement that we have in a very friendly and bipartisan basis agreed to offer as a means of clarifying the proposal before Members. I think we have reached a consensus, if possible, that some Members individually do not agree with everything that is in the amendment, but generally we think that they advance the cause of education.

We have agreed that the proposal before Members is so important to the best interests of the Nation that we should not only support the objectives that have been reached by the President and the Governors of the various States and their educational goals, but that also some of the initiatives that have been proposed by members of the Committee on Education and Labor to expand the cost effective and successful education programs should be put into a comprehensive package and offered to the American people.

I believe that this is truly the most comprehensive and far-reaching education proposal that we have yet considered in the Congress, and at the same time, we have been highly selective in trying to offer only those programs that have a proven record of accomplishment, and that are cost effective, and actually related to educational reform as we have witnessed that great movement since 1983.

□ 1050

I would also like to stress that we have excluded no one with a good idea or with proposals that we felt would add to the test we have given to this proposal, that of being cost effective. We have considered any amendment that we felt had proved itself or was of

a bipartisan nature, any amendment that we thought had merit to demonstrate in the next few years some degree of success.

So we have before us, I think, a well-crafted proposal. It contains the amendments that I have indicated offered by a host of Members, both members of the committee as well as several who are not on the committee—Mr. GUNDERSON, Mr. SMITH of Vermont, Mr. GINGRICH, and Mr. BARTLETT. We have put those amendments and others into the package.

I would simply like to say that all this week we have been hearing bad news. We have been hearing the news about deficit reduction, the great debt that has been piling up, and the need to do something about it. I think today we have an opportunity to talk about good news, how we can make our nation more competitive, and how we will leave to our children and their children not only a legacy of debt but also the ability to handle these problems.

So I believe we should approach the proposal before us in the sense that it is not only well-crafted but that it is essential to the future of this nation, but that if we are going to be truly competitive, if every child is going to be ready for school by the year 2000, if we are going to get into the question of intelligence and an intelligent and productive workforce, we have got to begin, and we have got to begin now.

I think we have approached it with that seriousness, and it is because of that that I think we have been able to craft a proposal that meets with the approval of Members on both sides of the aisle in the sense that it is a truly bipartisan proposal.

Mr. Chairman, it is on that basis that I hope we will debate this proposal before us and act on the various amendments that may be offered.

Mr. GOODLING. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Massachusetts [Mr. CONTE], who helps control the pocketbook for us.

Mr. CONTE. Mr. Chairman, I rise today to commend the members of the Education and Labor Committee for their terrific work on H.R. 5115, the Equity and Excellence in Education Act of 1990, and to voice strong support for this committee substitute amendment.

The bill has taken 17 months to get to the floor, but it has been worth the wait. The bill not only embraces the President's education goals, it also combines the administration package with the illiteracy and teacher packages already passed by the Senate.

The bill does so much you might say it is a triple play! This amendment is like adding the game-ending fireworks to a tightly contested baseball game.

The committee amendment contains many important provisions for fostering excellence and equity throughout the educational system. Let me talk about a couple of them.

One provides for expanding the underachiever initiative within the Department of Education's Fund for Innovation in Education. I have long been concerned about underachieving students and think more should be done to understand and respond to these children.

Underachievers are the forgotten students among the widespread efforts to meet the needs of kids on both ends of the education continuum.

The only effort of its type, the underachiever program was started in 1990 to improve educational performance and employment opportunities for underachieving students. It responds to a growing concern about the many youth who are not achieving their potential.

This amendment raises the underachiever initiative to the same status as all the other categories within the FIE Program. It says programs for underachievers are as important as the other FIE programs for computer-based instruction, health education, alcohol abuse, discovering new ways to identify outstanding students, and using radio and television in classrooms. Surely underachievers deserve as much attention as these other worthwhile FIE programs. It is an area ripe with promise that deserves our attention.

Another provision strengthens the Bilingual Education Act by creating two demonstration projects by bringing together several of the most exciting educational developments in recent years.

For the first time, the restructuring of school management and student services will be merged with developmental bilingual techniques in an arts-based curriculum at two magnet middle schools.

The demonstrations allow us to explore better ways to meet the needs of students during the critical early adolescent years. Given the high drop-out rate of minority students I think every effort should be made to keep them in school.

This provision is but another step toward attaining that elusive goal.

I urge your support for H.R. 5115 and this substitute amendment to the bill.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois [Mr. POSHARD].

Mr. POSHARD. Mr. Chairman, I rise in strong support of the Hawkins en bloc amendments to H.R. 5115, the Equity and Excellence in Education Act of 1990.

Part of that package of amendments is a piece of legislation which my friend and colleague PETER SMITH and I have worked together on for more than a year, the education performance agreements. The committee has held a total of four hearings on the bill, two here in Washington, PETER came to southern Illinois for a hearing in my district, and I went to Vermont for a hearing there.

The Smith amendment seeks to give local schools more discretion over how they spend the Federal funds which they receive. It allows local administrators to pool precious Federal resources for the benefit of their students and their schools. We strongly believe this flexibility will allow local administrators, in concert with local teachers, to craft an individual plan for that school's financing, a plan which best meets the educational needs of that schools' unique student body.

The rights and protections given by Federal law to students attending schools which participate in the educational performance agreements program would be just as strong as they are now. In fact, the bill is designed to improve the quality of the programs which those schools offer.

Mr. Chairman, this amendment is a modest attempt to explore one way of improving our Nation's schools. There are certainly many others, and we need to look carefully at every one of them. American students fall far behind our Western allies in both test scores and educational spending. Clearly something needs to be changed, and our amendment is a change which I believe will prove successful.

I thank Chairman HAWKINS for the courtesy which he has extended to Congressman SMITH and myself on this issue. I also urge all of my colleagues to support the Hawkins en bloc amendments.

Mr. GOODLING. Mr. Chairman, I yield 2 minutes to one of our distingushed leaders from our side of the aisle, the gentleman from Georgia [Mr. GINGRICH].

Mr. GINGRICH. Mr. Chairman, first of all, I want to thank the chairman and the vice chairman of the Committee on Education and Labor for including my prisoner literacy amendment in the series of committee amendments they will be offering today.

Let me take a few minutes to explain how this idea was brought to my attention. On May 2, John Chancellor delivered a commentary on the NBC Nightly News aimed at shedding light on one of our society's major shortfalls. The commentary was aptly titled "Readin', Writin' & Pris'n."

Chancellor's main thrust was that "in the American penal system, too many people go to prison, get out, commit another crime and go back in again. In Japan, the rate of return to prison is far lower."

One reason advanced by Chancellor for the disparity is that "* * * in Japan, if your prison sentence is longer than one year, they won't let you out if you can't read and write." To illustrate the problem just consider that in the United States 62 percent of all released prisoners who are rearrested have an education of eighth grade or less.

□ 1100

The amendment can be summarized as follows:

Requires States, within 2 years of enactment, to have in effect a mandatory functional literacy pilot program in at least one corrections institution in that State for all persons convicted of a felony who are not functionally literate.

Within 5 years of enactment, States are required to have in effect mandatory functional literacy programs in each State corrections institution for all persons convicted of a felony who are not functionally literate.

Defines functional literacy as the ability to demonstrate, in English, at not less than the eighth-grade level, educational skills necessary to function independently in society, including reading, writing, comprehension, and arithmetic computation.

Failure of a State to comply with the requirements renders that State ineligible to receive the 10-percent setaside grant for corrections education under the Adult Education Act.

Let me just say that I believe this is a step in the right direction. It is patterned after the highly successful literacy incentive program in Virginia, and it does move us toward trying to help prisoners develop the skills which would allow them to truly take their place in society.

Again I thank the vice chairman who has been very aggressive and supportive and the chairman for accepting this.

Mr. GOODLING. Mr. Chairman, I yield 2 minutes to the gentleman from Wisconsin [Mr. GUNDERSON], one of the distinguished members of our committee.

Mr. GUNDERSON. Mr. Chairman, there has been and I guess this is the time and the season for partisanship. It is a campaign year and that is inevitable, but I would like to call to the attention of all my colleagues that if you could have witnessed our distinguished chairman and our distinguished ranking member yesterday when they led in a totally unified effort the House Republicans and Democrats in the conference with the Senate on vocational education and if you could have witnessed these same two gentleman over the last 2 weeks in leading negotiations to produce a bipartisan consensus on educational reform, you would know that at least in the 10 years that I have been in the Congress this is our finest hour on a bipartisan basis of the Committee on Education and Labor, and it is due in no small part to the distinguished leadership and cooperation of our chairman, the gentleman from California [Mr. HAWKINS] and our ranking Republican, the gentleman from Pennsylvania [Mr. GOODLING].

Yesterday we were able to lead an effort, and it was exciting to see a Democrat endorse a Republican and back and forth this week as we greatly strengthened each other's arguments in behalf of the progressive vocational education bill.

Today as a result of this amendment in this bill, we will enact the most significant step toward true educational reform in the history of this country, with alternative certification, merit schools, the whole decentralization, the whole concept for open enrollment and choice, prison literacy and a whole host of other issues in the math and science area, in teacher retraining and dealing with Mrs. Bush's major concern of literacy.

Mr. Speaker, we have proven to the American people that we can work together for the interest of their children in this legislation.

Mr. GOODLING. Mr. Chairman, I yield 2 minutes to the gentleman from Texas [Mr. BARTLETT] who has worked long and hard on the issue that I am sure he will describe in his remarks.

Mr. BARLTETT. Mr. Chairman, I rise in strong support of the committee amendments and in particular thank the gentleman from California [Mr. HAWKINS] and the gentleman from Pennsylvania [Mr. GOODLING] for the bipartisan spirit in which they have entered into these committee agreements.

I rise also to take note that one of the items in the agreement is the significant portion of the Open Enrollement in Education Act that the gentleman from Ohio [Mr. ECKART] and I have introduced and pushed over the course of the last year.

I also want to acknowledge the partnership and leadership of the gentleman from Ohio [Mr. ECKART] on this issue, stressed in his bipartisan approach.

The winners in this agreement are the children, the students and families and parents in the United States as a whole.

I would note that the original open enrollment bill that the gentleman from Ohio [Mr. ECKART] and I introduced, H.R. 3697, contains two sections. One, is that we would remove barriers in Federal law, those barriers in chapter 1, chapter 2 and the Department of Defense schools, which prevented local educational agencies from adopting their own parental choice programs.

Two, we have provided for State and local demonstration grants which provide demonstration funding to provide for planning and the establishment of open enrollment or parental choice programs for individual schools; no mandates, no one is required to take advantage of it, no school district is required to adopt any form of open enrollment or open enrollment at all.

The Federal Government on these demonstration grants would put the imprimatur of Federal leadership in open enrollment, allowing parents to choose where their children go to school.

The bipartisan agreement contains the second half, but not the first half of the legislation. We provide for the demonstration grant. It will be a force for change all over this country. It will not cause the change to happen. The change is already happening in States and in local school districts around the country. This will simply put that note of the Federal imprimatur on the change.

Mr. Chairman, I commend the gentleman from California for his amendments and support them.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes to the gentlewoman from Washington [Mrs. UNSOELD].

Mrs. UNSOELD. Mr. Chairman, I rise today in strong support of H.R. 5115, the Equity and Excellence in Education Act, and commend our esteemed chairman, the gentleman from California [Mr. HAWKINS] for the work he has done in putting this together.

President Bush and the Nation's governors have ambitiously committed America's high schools to a 90-percent graduation rate, our students to becoming first in the world in math and science, every adult literate, and every school in America free of drugs—all by the year 2000. These are commendable goals but they were presented devoid of any plan, money, or program for achieving them. So Congress has now come up with a framework for school improvement, a framework to achieve these goals. This framework is H.R. 5115

It builds on existing, successful programs. It includes aspects of the President's education initiatives. And finally, it creates two new programs—loan forgiveness, incentives, and training for teachers and adult literacy strategies.

More than ever, America is challenged to keep peace with the dynamics of the global marketplace. Our international industrial competitiveness is dependent on an educated, highly skilled work force. Simply put, education is an investment in our future. It is key to our international competitiveness and our success as a society. I believe we must make a commitment to education and put more of our resources toward it. The Equity and Excellence in Education Act does

this. An investment in our next generation pays dividends to all of us.

The CEO of Honeywell, James Remier, testified before the Education and Labor Committee this year. He became compelled by the inadequacy of his work force to get involved in education programs. He claims that American businesses spent nearly $25 billion last year teaching its employees basic education skills. Thus, the bottomline for society and especially American business is that we can pay now or we can pay later, but we will end up paying. I urge my colleagues to begin making the investment in quality education programs now.

Mr. Chairman, it is America's greatest shame that one out of every three adult Americans cannot read. They are functionally illiterate. In the richest country in the world, this dooms 60 million adult Americans to lives of poverty and ignorance—and costs our Nation billions of dollars in economic damage and waste. Illiteracy is a devastating problem for our society. This bill will help to eradicate our insidious literacy problems. It will help alleviate our eroding competitive advantages in the global marketplace. The solutions are tough but so are the consequences.

Finally, I want to express my support for the teaching provisions of this bill. Teachers have one of the toughest, most important jobs in society and I believe we need to give them all the support we can. With the erosion of our family and community support systems, somebody's got to be there for our kids and these days it seems that more of the burden is falling upon our teachers. They are faced with extraordinary challenges beyond the classroom lessons. This bill makes a stronger national commitment to teacher training and retraining to prepare our teachers for the 21st century.

It also provides incentives for our best and our brightest to choose the teaching profession. We will need good teachers. Their influence will be critical in preparing our children to succeed in an ever-increasingly competitive world.

Mr. President, we are sending this bill to you to sign into law so that you will be the Education President. I want to challenge you to truly be the Education President. I want to end the rhetoric and truly make educational excellence a top priority. Our country's future depends on our investments in education today.

I urge my colleagues to support this critical education initiative.

Mr. GOODLING. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. CLINGER].

Mr. CLINGER. Mr. Chairman, I rise in strong support of the Equity and Excellence in Education Act.

Mr. Chairman, it is clear that few of the problems facing us are as pervasive as the challenge of educating our children to meet the demands of the 21st century.

The education initiatives that have come before the House of Representatives this week, the Dwight D. Eisenhower Mathematics and Science Education Amendments of 1990 and the Equity and Excellence in Education Act, will both strengthen and enhance our Nation's education system and improve our ability to compete with other industrialized nations.

I am encouraged by the willingness of this body to address these critical concerns through this legislation. The many provisions in these bills, such as: school readiness, school completion, math and science, literacy, drug-free schools, and teacher recruitment and retention are the very vital elements that demand our immediate attention.

Since the end of the Second World War, we have increased human knowledge more than in the entire rest of history combined. This vast increase in our knowledge and the rapid changes in world society pose many pitfalls and challenges for Americans, the most important of which is international competitiveness. After all, if we are to remain a premier nation, we must ensure that our children have the skills necessary to compete and be innovative.

The key to achieving this is education. Without this we will fail.

I believe everyone has the responsibility for ensuring that the United States stays educated—government, business, and the schools all have crucial roles to play; and we must work together as partners to see that the best solutions to our problems are reached.

The Eisenhower math and science bill is designed to provide schools and teachers with state-of-the-art curriculum materials through a national clearinghouse. It places special emphasis on teacher training in the math-science disciplines at the elementary and middle school level and directs additional resources toward improving instruction.

Yet, the Equity and Excellence in Education Act is even more far reaching. With its many policy goals, it is the Federal Government's action plan to assist States, local school districts, and universities to meet the six national education goals agreed to by the President and the Governors at last year's education summit.

The bill also includes several of the President's education requests that were part of his 1989 education initiatives package. One example is the establishment of the National Science Scholars Program. It would provide scholarships to exceptional high school who excel in math and science and choose to pursue these fields in their college study. The program would give priority to poor students, giving them better access to a college education.

There are also programs in the bill to provide awards to outstanding teachers; and awards and recognition to elementary and secondary schools that have: improved student achievement, a safe and drug-free school environment, and a reduced dropout rate.

Putting in place the dynamic forces that can lead our Nation into the next century should be our highest priority. These bills build upon that foundation.

In less than a decade, Americans will ask where and who succeeded or failed to set the math and science education priorities of the early 1990's. Today's concerted, committed efforts by Congress to support the development of effective education policies will help determine the extent to which society is scientifically and technologically literate and if we are ready to compete in the next century.

Our actions today will help draw the map of American society for years to come and we must continue our work to ensure our education system is up to meeting these challenges.

Mr. GOODLING. Mr. Chairman, I yield 2 minutes to the gentleman from New Hampshire [Mr. SMITH], the author of one of the very important packages in the legislation.

Mr. SMITH of Vermont. Mr. Chairman, I thank the gentleman from Pennsylvania for yielding me this time.

Mr. Chairman, I rise in support of the en bloc amendments and of the bill as a total entity.

I want to start by thanking the chairman of our committee, the gentleman from California [Mr. HAWKINS], and the ranking member, the gentleman from Pennsylvania [Mr. GOODLING] for their understanding, openness and willingness to go down the road with a freshman Member of Congress, and our colleague, the gentleman from Illinois [Mr. POSHARD], as we have investigated what we think is a bold change, the beginning of a new future for American schools over the last year-and-a-half in our committee. Without their openness and without their willingness to think about new ideas and engage in debate, we would not be standing here today.

This amendment to this bill is the result, frankly, of years of work, stemming from the "Report of a Nation at Risk."

□ 1110

We have begun the process of putting new resources into our schools. We have begun the process of talking about higher standards in realistic and meaningful ways. But what, in fact, we have lagged behind on is how we get from where we are to where we want to be in terms of American schools.

This amendment has been called a bold step and has also been called the best hope, in terms, as we begin to fashion a policy where this country can achieve the goals for all children in our public schools that we so desperately need, because, Mr. Chairman, we have to face it, not only are our children our most precious resource, but in fact, if we do not do a radically and dramatically better job in educating every child to the maximum of his or her capacity by the 21st century, then, in fact, this country faces a threat to its national security through undermining and diminishing our own human resources that is unparalleled.

What this bill does is give authority to local school districts to redesign their schools, to reinvent their schools in whole or in part for radically better, dramatically better performance on the part of all students, and it also gives them the responsibility and the necessity to be held accountable for what they do. It opens the door to reinvent public education for excellence in this country. It will be a bold step forward for all children.

Mr. HAWKINS. Mr. Chairman, I yield 1 minute to the gentleman from Ohio [Mr. ECKART].

Mr. ECKART. Mr. Chairman, this is, indeed, quite a moment of accomplishment.

My colleague and I, Mr. BARTLETT in the introduction of this bill, are pleased at the receptivity to our ideas and the support that the Republican and Democratic Members of the committee have been able to extend to the question of an open-enrollment program. This similar program has already been embraced in my home State of Ohio and other States, as well, such as Minnesota, Iowa, Nebraska, and Colorado, and what we hope to do through the creation of this demonstration project program is to create an incentive to ensure and to assure for both students and parents that the quality of education that their children receive is in direct proportion to the kinds of accomplishments and goals they want their children to realize.

The Chair and the ranking member of this committee have entertained this proposal with some appropriate negotiations and have now taken us to the point of a modest open-enrollment program demonstration project that will enable the States to achieve the goals that the parents want for their children.

We thank the committee for their support and urge the adoption of the en bloc amendments.

Mr. HAWKINS. Mr. Chairman, I yield 1 minute to the gentleman from New York [Mr. WEISS].

Mr. WEISS. Mr. Chairman, I want to congratulate the chairman on this excellent piece of legislation and, indeed, to commend him for a magnificient career that he has contributed in this House of Representatives and, before that, in California.

Mr. Chairman, an eery calm has descended over the debate on American education. Gone is the media frenzy of the education summit last fall. Gone are the photo ops. Gone are the front page headlines.

Why? Although improvements have been made, the facts about American education should still make us angry. By now, I hope most of us are familiar with them.

A disturbing percentage of U.S. students are not attending school. The dropout rate in some areas is as high as 55 percent. Even the students who do attend are not learning the skills to function and compete in an increasingly competitive world.

It takes more than summits, reports, and sound bites to improve American education. Today we have a chance to do something more.

This bill incorporates the educational goals for the year 2000 that were agreed upon at the education summit. I generally support this bill. It is a good beginning. But it is only a beginning. Those goals are a tall order for the year 2000. To meet them, we must keep the Nation's attention focused on education. We need vigilance and endurance as much as conferences and studies. We also need money.

Educating Americans is expensive. The Federal Government pays a paltry 7 percent of all the educational costs in the country. Some might applaud that statistic. I do not. This puts a tremendous burden on cities and States that are already gasping from financial strain. This year, 18 States expect budget shortfalls totaling $5.1 billion. Where will these States find the resources for improved educational standards, higher teacher pay, updated textbooks, sizable classrooms? The list could go on.

For those who want it, the chance to get a good education in the United States should be as easy as going through a McDonald's drive-thru. Families should not have to take a second mortgage to send their children to college. Children in the cities should not receive below standard education while suburban children attend advanced classes. Congress must find other ways to help out.

Will the House pass this bill today? I certainly hope so.

Will we continue to care about American education? I don't think we have a choice.

The future of America rests upon it.

Mr. GOODLING. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, first of all, I want to make sure that I do not forget to thank our distinguished chairman for the legislation that we have before us, but to go much beyond that, to thank our distinguished chairman for all of the service he has provided to the young people of America for so many years. I do not know that I have ever met anyone who is as fair. I have never met anyone who is more of a gentleman than the chairman of the Committee on Education and Labor, the gentleman from California [Mr. HAWKINS]. He will be sorely missed by us, but the children of this country certainly will miss his efforts on their behalf.

I also want to thank the gentleman from Michigan [Mr. FORD], who worked with us to revive and put together the package that we have now in a bipartisan fashion. I certainly want to thank the majority staff for all the work they have done. I want to thank the staff of the gentleman from Michigan [Mr. FORD]. I want to thank Sara Davis of the staff of the gentleman from Ohio [Mr. SAWYER], and Liz Powell of the legislative counsel for her hard work and excellent effort. I want to thank all the members of the committee, because, as I indicated, it is a bipartisan effort. It could not have happened had not all of our committee members pulled together to bring it about.

I want to thank the minority staff who are outnumbered dramatically but they are never outgunned, because they spend hours and hours, and then with their outstanding ability, we can catch up with the overwhelming support staff on the other side of the aisle.

I particularly want to thank our young attorney, Jo-Marie St Martin. I want to thank our staff director, Dr. Hartman, our education coordinator, Dr. Buehlmann, Michael Lance, who handles our higher education effort, and all the members of the staff and the support staff for the efforts to bring about a bipartisan bill.

Mr. Chairman, I would like to say two things about the bill. First of all, we have included some of the things that the President wanted when he sent his message perhaps 16 to 18 months ago. Those efforts came before the summit between the Governors and the President. So we have taken the President's initiative, which I indicated came before the summit, and then we put together effort into this bill that we believe will drive us to realizing the great goals that were set by the Governors and by the President.

It is we in the Congress, the State legislatures and those who are out in the field who will make the changes that will bring about what it is that we hope to accomplish by the year 2000.

I think we have a good bill, and I would ask everyone to support it.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois [Mr. HAYES].

Mr. HAYES of Illinois. Mr. Chairman, I rise in support of the passage of H.R. 5115, the Equity and Excellence in Education Act of 1990. After months and months of tireless efforts on the part of my chairman, GUS HAWKINS, and a representive group of the minority and majority members of the Education and Labor Committee, a very timely piece of legislation has been fashioned.

As you know, H.R. 5115 outlines the plan of action for the Federal Government that will assist States, local school districts, and institutions of higher education to meet the six national education goals formulated by President Bush and this Nation's Gov-

ernors at the education summit held last year. This effort has been truly bipartisan and inclusive.

Not only does H.R. 5115 include several of the President's proposals, it further seeks to improve teacher recruitment and retention and focuses on a new literacy initiative.

I rise today in support of this measure because our Nation is truly in need of these initiatives to counter our eroding education system. This Nation's dropout rate has reached appalling levels, the numbers of students choosing teaching as a career has plummeted, and the readiness of our students to compete in the world economy, as we move toward the year 2000, is questionable at best at this point. The Equity and Excellence Act of 1990 directly addresses these concerns.

I am certain that this bill will be of great help to the city of Chicago. I know that this Nation's youth will benefit. The expansion of the Head Start Program and the WIC nutrition programs are very crucial to my constituents.

We have known for a long time that the Head Start and WIC programs are clearly a couple of the most effective domestic programs ever created by this Congress. However, many that are in need of these programs have not been able to access them because of limited funds and limited enrollment slots. This legislation finally improves the access to these programs for many, many children.

An ongoing concern of mine has been the drastic school dropout levels. The Equity and Excellence Act sets as its goal, by the year 2000, that the rate of high school graduation will increase to at least 90 percent. Toward that goal, the legislation provides funding and programming for currently existing dropout programs. If we as a country want to move forward, educationally, these provisions are crucially needed.

Finally, the bill confronts head on this Nation's drug crisis in our schools. Again, the bill states that by the year 2000 this Nation's schools will be free of drugs and violence and will offer an environment conducive to learning.

The positive aspects of the Equity and Excellence Act continues on to address adult literacy, math and science preparedness, and equal opportunity for postsecondary education, specifically authorizing $20 million in fiscal year 1991 for historically black colleges and universities.

Mr. Chairman, I truly encourage my colleagues to lend their support for the passage of this much-needed legislation. I believe that the need for Federal support and direction is greatly needed in our education system, and the Equity and Excellence Act provides us with the right framework for doing so. Thank you, Mr. Chairman.

□ 1120

Mr. GOODLING. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. HAWKINS. Mr. Chairman, I yield the balance of my time, 2 minutes, to the gentleman from North Carolina [Mr. PRICE].

Mr. PRICE. Mr. Chairman, I rise in strong support of the Equity and Excellence in Education Act, a bill designed to move our country toward the six national education goals agreed upon by the President and the Nation's Governors last year. I am particularly gratified by the inclusion in this bill of the key portions of H.R. 3123, the Adult Literacy and Employability Act, a bill which I have cosponsored and on which I have worked, along with Representative SAWYER and many other Members, for the past 3 years. Many people and organizations have helped bring us to this day, by documenting the need for a national literacy initiative, by formulating a well-conceived and practical bill, and by working timelessly for its passage. Representative SAWYER deserves special credit, and it gives me special pleasure to thank him for his cooperation and his leadership.

Illiteracy is a daily tragedy for millions of our citizens, depriving them of full participation in the life of our society. It is also a tragedy for us as a nation—and the bill before us lays particular stress on the impact that the education and skills of our work force have on our Nation's economy and on our ability to compete in the global marketplace. In my district—which encompasses the high-technology facilities in Research Triangle Park as well as traditional industries that are rapidly modernizing—business leaders tell me that education is their No. 1 concern.

Too many of our young people are entering the work force without the skills necessary to advance, and too many of our adult workers find themselves unable to adapt to the workplace's changing demands. The Sunbelt Institute, in a study cochaired by Representative HAL ROGERS and myself, has documented a cycle of undereducation and underemployment that is especially critical in the Southern States. Our region's literacy problem, the study concludes, must increasingly be seen in terms of work force skills—grade school dropouts who never learned to read, write, add, or subtract, but also, increasingly, high school dropouts whose skills still fall far short of what the workplace requires. The bill before us, formulated in the context of studies like these, conceives of literacy in this functional sense and encourages public-private partnerships in literacy training, often geared to the workplace.

I am happy to report that the Science Committee, on which I serve, is also making a significant contribution to the advancement of workplace literacy. My Science and Technological Literacy Act (H.R. 3122), a companion bill to H.R. 3123, is scheduled for an early markup there.

The bill before us, H.R. 5115, includes provisions for the establishment of a national institute for literacy—a center for research, program evaluation and assistance, and the dissemination of curricula and instructional technologies—which will provide an absolutely critical resource for State and local programs. Representative JIM COOPER is due a great deal of credit for his effective advocacy of this proposal. The bill also will encourage the establishment of much-needed State and regional adult literacy resource centers. These centers will be of great importance to regions of the country, like the South, which have lagged behind much of the Nation in educating their work force. I am encouraged that the Southern Growth Policies Board, a consortium of the Southern States, has already announced plans to develop a southern regional literacy center. This is the sort of initiative H.R. 5115 will facilitate and support.

I appreciate the cooperation of Representives SAWYER, GOODLING, and HAWKINS in making it clear, in the leadership's technical amendment, that the funding States receive can go for services provided by a regional center, a State center, or both. We must work to ensure the flexibility of these centers in addressing the diverse problems posed by illiteracy. My own State of North Carolina will channel most of its efforts through a State literacy center, but will also participate in the regional center which is being set up in the South.

I believe this is entirely appropriate. There are some activities which will be best undertaken by a State literacy center while others may be best undertaken through a regional center.

I look forward to working with Mr. GOODLING, Mr. SAWYER, and others, in the conference committee and beyond, to ensure that States and regional groups of States have the greatest possible flexibility in establishing and funding centers that meet their diverse needs.

Mr. Chairman, I am pleased to see this comprehensive education package come to the floor, and pleased to see the bipartisan agreement in this body on the importance of an educated work force. Workplace literacy will have an enormous impact on all of us—business, education, media, governments. It will take the efforts of all of us to solve this crisis facing our country. This is why I strongly support passage of this comprehensive education package which has been carefully crafted to address many of

our education needs. I urge my colleagues to lend their support to this important legislation which will enhance this Nation's readiness to meet the challenges which lie ahead.

Mr. MURPHY. Mr. Chairman, we are here today to improve education in our country and to discuss why it has become increasingly more important with each generation. I believe H.R. 5115, the equity in education act, will help achieve these goals. The challenge is competition. The world economy and society have become more competitive and to survive in the world today we must match that competitiveness.

In an era of rapid technological change and interactive global economies the three R's just do not go far enough to prepare our students for the challenges that will lie ahead. And lately we have been finding that many graduates have not even mastered basic reading, writing, and arithmetic. In America illiteracy is on the rise. Some students are graduating from high school who cannot fill out a basic job application. How are they ever going to compete in the global market? H.R. 5115 provides for every adult to be or become literate by the year 2000.

Worldwide we are outranked in math and science educational performance. By 1995 8 out of the 10 fastest growing occupations in the United States will require upper level math skills, yet our educational system is turning out fewer math graduates. As the college age population shrinks over the next several years the number of math and science students will shrink also. H.R. 5115 provides for every U.S. student to be the first in the world in math and science education.

Another avenue we must pursue with renewed vigor is educating our young people to the fact that drugs, and the crime that follows, will kill them. What makes this task more difficult is when they see that they can make more money in a week selling drugs than their parents earn in a month. The dropout trend must be reversed. America's educational system has to grab a students' attention early and challenge him or her to stay in school and excel. H.R. 5115 may provide an opportunity for our schools to be drug and crime free by the year 2000.

President Bush has set education goals that he would like to see accomplished by the end of this century. He wants a 90-percent graduation rate, and every adult able to read and write. He wants to see U.S. students first in math and science and every school free of drugs and violence. I applaud his ambition to make America No. 1 again. We applaud and join him in the desire to educate those who were left to fend for themselves for the last decade by the previous administration.

This overall goal is attainable. We can still be the highly competitive society we once were. Efforts are needed to bring our schools into the computer age, and adequately pay teachers for the valuable service they perform. Knowledge is a valuable commodity, the more we all know the better society as a whole is able to compete. I believe we can achieve many of these goals by the year 2000 and H.R. 5115 is the means to do just that.

Mrs. MARTIN of Illinois. Mr. Chairman, as a cosponsor of legislation proposing educational performance agreements, I strongly support Congressman PETER SMITH's amendment to H.R. 5115, the Equity and Excellence in Education Act of 1990. It makes good sense to give school districts flexibility to use education funds in the manner they believe will benefit children the most.

That's what this amendment will do. It is a proposal that will spur experimentation in school reform at the local level. Far too many teachers and administrators have been stymied in their efforts by inflexible Federal rules and regulations dictating how funds must be used. Educational performance agreements will untie these strings.

Local school districts that participate in an educational performance agreement would be permitted to pool Federal funds from a variety of sources, unencumbered by restrictive regulations. A restructuring plan, drawn up by a team comprised of parents, community representatives, teachers, and administrators, would spell out how resources would be used and would set a timetable for improvement. In return for easing regulations, the participating school district would be held accountable for the goals it sets. If student performance did not improve, the contract would be terminated.

Educational resources are best coordinated and educational decisions are best made at the local level, and my colleague's amendment provides for increased local control. Educators, unencumbered by restrictive regulations, would have freedom to figure out creative methods and programs that best meet the needs of the children they serve. Parents, school personnel, and communities would be empowered to create a learning environment that will promote educational excellence.

Mr. Chairman, this amendment is an innovative proposal that should be adopted to H.R. 5115, the Equity and Excellence in Education Act.

Mr. BRENNAN. Mr. Chairman, I rise in support of excellence in education, and I urge my colleagues to vote for this bill. As a cosponsor of the Adult Literacy and Employability Act, I am pleased with the incorporation of adult literacy programs in this act. One of my constituents referred to the bill as, "a major triumph for the cause of literacy in America." Nearly 30 million adult Americans are functionally illiterate. They can't read food labels, they can't read a newspaper, and they can't fill out a job application.

This bipartisan bill would authorize a 5-year, $5 billion investment in literacy. It would be a triumph for the 1 in 4 students who drop out of school each year. And it would be a victory for employers and employees throughout the Nation, struggling to create a more literate America. This bill would further math and science education, student achievement, and citizenship. It would improve teacher recruitment and retention, and provide loan incentives for educators who are willing to teach in rural areas, such as Maine. I am voting for H.R. 5115, and I urge my colleagues to join me and vote for excellence in education.

The CHAIRMAN. All time has expired.

The question is on the amendments en bloc offered by the gentleman from California [Mr. HAWKINS].

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. GOODLING. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 387, noes 0, not voting 45, as follows:

□1144

Mr. HANSEN changed his vote from "no" to "aye."

So the en bloc amendments were agreed to.

The result of the vote was announced as above recorded.

PERSONAL EXPLANATION

Mr. SMITH of Vermont. Mr. Chairman, I was unavoidably detained in a meeting during the vote on en bloc amendments to H.R. 5115, the Equity and Excellence in Education Act of 1990. Had I been present, I would have voted "aye."

The CHAIRMAN. It is now in order to consider amendment No. 3, printed in House Report 101-588.

AMENDMENT OFFERED BY MRS. BOXER

Mrs. BOXER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Is the gentlewoman designated to offer this amendment on behalf of the gentleman from California [Mr. MILLER]?

Mrs. BOXER. Mr. Chairman, yes; I am.

The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mrs. BOXER: Page 116, after line 21, insert the following:

PART D—NATIONAL WRITING PROGRAM

SEC. 771. FINDINGS.

The Congress finds that—

(1) the United States faces a crisis in writing in schools and in the workplace;

(2) only 25 percent of 11th grade students have adequate analytical writing skills;

(3) over the past two decades, universities and colleges across the country have reported increasing numbers of entering freshmen who are unable to write at a level equal to the demands of college work;

(4) American businesses and corporations are concerned about the limited writing skills of entry-level workers, and a growing number of executives are reporting that advancement was denied to them due to inadequate writing abilities;

(5) the writing problem has been magnified by the rapidly changing student populations in the Nation's schools and the growing number of students who are at risk because of limited English proficiency;

(6) most teachers in the United States elementary schools, secondary schools, and colleges, have not been trained to teach writing;

(7) since 1973, the only national program to address the writing problem in the Nation's schools has been the National Writing Project, a network of collaborative university-school programs whose goal is to improve the quality of student writing and the teaching of writing at all grade levels and to extend the uses of writing as a learning process through all disciplines;

(8) the National Writing Project offers summer and school year inservice teacher training programs and a dissemination network to inform and teach teachers of developments in the field of writing;

(9) the National Writing Project is a nationally recognized and honored nonprofit organization that recognizes that there are teachers in every region of the country who have developed successful methods for teaching writing and that such teachers can be trained and encouraged to train other teachers;

(10) the National Writing Project has become a model for programs in other academic fields;

(11) the National Writing Project teacher-teaching-teachers program identifies and promotes what is working in the classrooms of the Nation's best teachers;

(12) the National Writing Project teacher-teaching-teachers project is a positive program that celebrates good teaching practices and good teachers and through its work with schools increases the Nation's corps of successful classroom teachers;

(13) evaluations of the National Writing Project document the positive impact the project has had on improving the teaching of writing, student performance, and student thinking and learning ability;

(14) the National Writing Project programs offer career-long education to teachers, and teachers participating in the National Writing Project receive graduate academic credit;

(15) each year approximately 85,000 teachers voluntarily seek training through word of mouth endorsements from other teachers in National Writing Project intensive summer workshops and school-year inservice programs through one of the 141 regional sites located in 43 States, and in 4 sites that serve United States teachers teaching overseas;

(16) 250 National Writing Project sites are needed to establish regional sites to serve all teachers;

(17) 13 National Writing Project sites in 8 different States have been discontinued in 1988 due to lack of funding; and

(18) private foundation resources, although generous in the past, are inadequate to fund all of the National Writing Project sites needed and the future of the program is in jeopardy without secure financial support.

SEC. 772. NATIONAL WRITING PROJECT.

(a) AUTHORIZATION.—The Secretary is authorized to enter into a contract with the National Writing Project (hereafter in this section referred to as the "contractor"), a nonprofit educational organization which has as its primary purpose the improvement of the quality of student writing and learning, and the teaching of writing as a learning process in the Nation's classrooms—

(1) to support and promote the establishment of teacher training programs, including the dissemination of effective practices and research findings regarding the teaching of writing and administrative activities;

(2) to support classroom research on effective teaching practice and to document student performance; and

(3) to pay the Federal share of the cost of such programs.

(b) REQUIREMENTS OF CONTRACT.—The contract shall provide that—

(1) the contractor will enter into subcontracts with institutions of higher education or other non-profit educational providers (hereinafter referred to as "subcontractors") under which the subcontractors will agree to establish, operate, and provide the non-Federal share of the cost of teacher training programs in effective approaches and processes for the teaching of writing;

(2) funds made available by the Secretary to the contractor pursuant to any contract entered into under this section will be used to pay the Federal share of the cost of establishing and operating teacher training programs as provided in paragraph (1); and

(3) the contractor will meet such other conditions and standards as the Secretary determines to be necessary to assure compliance with the provisions of this title and will provide such technical assistance as may be necessary to carry out the provisions of this part.

SEC. 773. TEACHER TRAINING PROGRAMS.

The teacher training programs authorized in section 772(a) shall—

(1) be conducted during the school year and during the summer months;

(2) train teachers who teach grades kindergarten through college;

(3) select teachers to become members of a National Writing Project teacher corps whose members will conduct writing workshops for other teachers in the area served by each National Writing Project site; and

(4) encourage teachers from all disciplines to participate in such teacher training programs.

SEC. 774. FEDERAL SHARE.

(a) IN GENERAL.—(1) Except as provided in paragraph (2) and for purposes of section 772 the term "Federal share" means with respect to the costs of teacher training programs authorized in section 772, 50 percent of such costs to the subcontractor.

(2) The Federal share of the costs of teacher training programs conducted pursuant to section 772 may not exceed $40,000 for any one subcontractor.

(b) SPECIAL RULE.—For the purposes of subsection (a) the costs of teacher programs do not include the administrative costs, publication cost or the cost of providing technical assistance, to the contractor.

SEC. 775. CLASSROOM TEACHER GRANTS.

(a) GRANT AUTHORITY.—(1) The National Writing Project may reserve an amount not to exceed 5 percent of the amount authorized to be appropriated in section 779(a) to make grants, on a competitive basis, to elementary and secondary school teachers to enable such teachers to—

(A) conduct classroom research;

(B) publish models of student writing;

(C) conduct research regarding effective practices to improve the teaching of writing; and

(D) conduct other activities to improve the teaching and uses of writing.

(b) SUPPLEMENTATION OF FUNDING.—(1) Grants awarded pursuant to subsection (a) shall be used to supplement and not supplant State and local funds available for the purposes set forth in subsection (a).

(2) Each grant awarded pursuant to this section shall not exceed $2,000.

SEC. 776. NATIONAL ADVISORY BOARD.

(a) BOARD AUTHORIZED.—The National Writing Project shall establish and operate a National Advisory Board.

(b) COMPOSITION.—The National Advisory Board established pursuant to subsection (a) shall consist of—

(1) national educational leaders;

(2) leaders in the field of writing; and

(3) such other individuals as the National Writing Project deems necessary.

(c) DUTIES OF THE BOARD.—The National Advisory Board established pursuant to subsection (a) shall—

(1) advise the National Writing Project on national issues related to student writing and the teaching of writing;

(2) review the activities and programs of the National Writing Project; and

(3) support the continued development of the National Writing Project.

SEC. 777. EVALUATION.

The National Writing Project may reserve up to $100,000 from the amount authorized to be appropriated pursuant to section 779(a) to evaluate the teacher training programs conducted pursuant to this Act. The results of such evaluation shall be made available to the appropriate committees of the Congress.

SEC. 778. RESEARCH AND DEVELOPMENT ACTIVITIES.

(a) GRANT AUTHORITY.—From amounts available to carry out the provisions of this section, the Secretary, through the Office of Educational Research and Improvement, shall make grants to individuals and institutions of higher education to conduct research activities involving the teaching of writing.

(b) PRIORITY AND RESERVATION.—(1) In awarding grants pursuant to subsection (a), the Secretary shall give priority to junior researchers.

(2) The Secretary shall award not less than 25 percent of the funds received pursuant to section 779(b) to junior researchers.

(3) The Secretary shall make available to the National Writing Project and other national information dissemination networks the findings of the research conducted pursuant to the authority of subsection (a).

SEC. 779. AUTHORIZATION OF APPROPRIATIONS.

(a) NATIONAL WRITING PROJECT.—There are authorized to be appropriated to the National Writing Project $10,000,000 for fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, 1995, and 1996 to carry out the provisions of this part.

(b) RESEARCH AND DEVELOPMENT.—There are authorized to be appropriated $500,000 for fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, 1995, and 1996 to carry out the provisions of section 778.

SEC. 780. DEFINITIONS.

As used in this part—

(1) the term "institution of higher education" has the same meaning given such term in section 1201(a) of the Higher Education Act of 1965;

(2) the term "junior researcher" means a researcher at the assistant professor rank or the equivalent who has not previously received a Federal research grant; and

(3) the term "Secretary" means the Secretary of Education.

Mrs. BOXER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from California.

There was no objection.

Mrs. BOXER. Mr. Chairman, I am pleased to offer Congressman GEORGE MILLER'S national writing project amendment to H.R. 5115, the Equity and Excellence in Education Act of 1990. This amendment was originally introduced as H.R. 5125, the national writing project bill, which has almost 100 cosponsors and strong bipartisan support.

The national writing project is a widely respected collaborative higher education/public school initiative that provides inservice training to teachers in the area of writing. The project was developed over seventeen years ago, and is presently operating at 143 sites, most of which are in universities, in over 44 States year-round. It uses a teachers-teaching-teachers-to-teach model that has been very effective in improving student learning ability, writing performance, and test scores. To date, over 815,000 teachers have been trained by the national writing project.

The project has been honored by the American Association for Higher Education and the Carnegie Foundation for the Advancement of Teaching as "an outstanding and nationally significant example of how schools and colleges can collaborate to improve American education." It has been funded for an unprecedented 10 years by the National Endowment for the Humanities, and received numerous awards.

Although the writing project has been funded by private foundations and State and local agencies, it has never received Federal funding. Program needs have exceeded the funding potential of those organizations currently funding the project. As a result, the project has been unable to expand its number of sites, and, in fact, 13 sites in 7 States—Arkansas, Kansas, Michigan, Minnesota, Ohio, Tennessee, Texas, and the District of Columbia—have become inactive within the last year. The amendment I am proposing authorizes $10 million in Federal support, $5 million of which will be used to fund the cost of existing sites and the remaining $5 million will be used to fund the costs of establishing new sites, with a maximum matching basis of $40,000. This money would also be used to fund matching grants to teachers to conduct research on effective classroom practices and to the national writing project to disseminate information on the effective teaching of writing. It also provides $500,000 for the Office of Educational Research and Information [OERI] in the U.S. Department of Education to conduct research on the teaching of writing and on methods to use writing as a learning tool to improve the quality of education.

Identical legislation has been introduced in the Senate with strong bipartisan support. At a time when we are facing a writing crisis in our schools and in our workplace, this amendment represents a sound and affordable investment in one of the most basic elements of a solid education.

Ms. PELOSI. Mr. Chairman, I rise today in support of the Miller amendment to H.R. 5115, the Equity and Excellence in Education Act of 1990. Mr. MILLER'S amendment would authorize $10 million in Federal support for the national writing project.

Mr. Chairman, we are all familiar with the myriad problems which confront America's educational system: overloaded classrooms, underfunded school districts, and serious morale problems. The national writing project cannot by itself solve these problems. However, by refocusing attention of the hub of educational life, teachers, the national writing project is an effective and cost-effective contribution to improving the ability of our students to read, think, understand, and write.

I strongly believe, Mr. Chairman, that the national writing project is exactly the type of initiative that should be encouraged. With the help of private, local, and State funding, the national writing project has grown to 166 sites in 46 States. But the national writing project can expand to its goal of 250 national sites in all regions of the country, promote a needed program in writing and literacy for America's target audiences of "at risk" students, and help our Nation pass the tests which truly

measure national strength: the education and well-being of its citizens.

I urge my colleagues to vote for the Miller amendment to H.R. 5115 and support the national writing project.

□ 1150

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from California [Mrs. BOXER].

The amendment was agreed to.

The CHAIRMAN. It is now in order to consider amendment No. 5 printed in House Report 101-588.

AMENDMENT OFFERED BY MRS. ROUKEMA

Mrs. ROUKEMA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. ROUKEMA: Page 121, after line 15, insert the following (and redesignate the succeeding title and sections accordingly):

SEC. 805. TREATMENT OF VETERANS BENEFITS.

(a) PELL GRANT NEEDS ANALYSIS.—(1) Section 411B(d)(1)(C) of the Act is amended by striking out "one-half of the student's total veterans educational benefits, excluding Veterans' Administration contributory benefits," and inserting in lieu thereof "the student's total veterans educational benefits".

(2) Section 411C(c)(1)(C) of the Act is amended by striking out "one-half of the student's total veterans educational benefits, excluding Veterans' Administration contributory benefits," and inserting in lieu thereof "the student's total veterans educational benefits".

(3) Section 411D(c)(1)(C) of the Act is further amended by striking out "one-half of the student's total veterans educational benefits, excluding Veterans' Administration contributory benefits," and inserting in lieu thereof "the student's total veterans educational benefits".

(b) GENERAL NEEDS ANALYSIS.—(1) Section 475(a) of the Act is amended—

(A) by striking out "and" at the end of paragraph (2);

(B) by striking out the period at the end of paragraph (3) and inserting in lieu thereof a semicolon and the word "and"; and

(C) by adding at the end thereof the following new paragraph:

"(4) any veterans educational benefits paid because of enrollment in a postsecondary institution, including (but not limited to) benefits received under chapters 105, 106, and 107 of title 10, and chapters 30, 31, 32, 34, and 35 of title 38, United States Code.".

(2) Section 476(b)(1)(D) of the Act is amended by striking out "plus the amount of veterans' benefits paid during the award period under chapters 32, 34, and 35 of title 28, United States Code".

(3) Section 477(a) of the Act is amended—

(A) by inserting "and" at the end of subparagraph (A) of paragraph (1);

(B) by striking out "and" at the end of subparagraph (B) of paragraph (1);

(C) by striking out subparagraph (C) of paragraph (1);

(D) by striking out "and" at the end of paragraph (2);

(E) by adding at the end of paragraph (3) the word "and"; and

(F) by adding at the end thereof the following new paragraph:

"(4) adding any veterans educational benefits paid because of enrollment in a postsecondary institution, including (but not limited to) benefits received under chapters 106 and 107 of title 10, and chapters 30, 31, 32, 34, and 35 of title 38, United States Code.".

(c) CONFORMING AMENDMENT.—Section 428(a)(2)(C)(i) of the Act is amended by striking out "and any amount paid to the student under chapters 32, 34, and 35 of title 38, United States Code".

SEC. 806. PREVENTION OF DOUBLE COUNTING OF INCOME IN ASSET COMPUTATIONS.

(a) PELL GRANT PROGRAM.—Section 411F(2) of the Higher Education Act of 1965 (20 U.S.C. 1070a-6(2)) is amended by adding at the end thereof the following: "No cash on hand or other property (or interest therein) of a dependent student shall be treated as an asset of the student (or spouse) for purposes of section 411B(1) except to the extent that such cash or property exceeds the amount the student is required to contribute from discretionary income under section 411B(f).".

(b) OTHER STUDENT ASSISTANCE PROGRAMS.—Section 480(g) of such Act (20 U.S.C. 1087vv(g)) is amended by adding at the end thereof the following: "No cash on hand or other property (or interest therein) of a dependent shall be treated as an asset of the student (or spouse) for purposes of section 475(h) except to the extent that such cash or property exceeds the amount the student is required to contribute from available income under section 475(g).".

(c) EFFECTIVE DATE.—The amendments made by this section shall be effective for the 1990-1991 academic year.

SEC. 807. DEFINITION OF INDEPENDENT STUDENT.

(a) SECTION 411F.—Section 411F(12) of the Higher Education Act of 1965 (hereafter in this title referred to as the "Act") is amended to read as follows:

"(12) The term 'independent', when used with respect to a student, means any individual who—

"(A) is 24 years of age or older by December 31 of the first calendar year of the award year;

"(B) is an orphan or is or has been a ward of the court;

"(C) is a veteran of the Armed Forces of the United States;

"(D) is a graduate or professional student and will not be claimed by his or her parents (or guardian) for income tax purposes for the award year;

"(E) is married or has legal dependents;

"(F) is an undergraduate student who was not claimed by his or her parents (or guardian) for income tax purposes for the 2 calendar years preceding the first calendar year of the award year, and who either was awarded assistance under this title as an independent student in the prior year, or demonstrates to the student financial aid administrator total self-sufficiency during the 2 calendar years preceding the first calendar year of the award year by demonstrating annual total resources (including all sources other than parents and student aid) of $4,000; or

"(G) is a student for whom a financial aid administrator makes a documented determination of independence by reason of other unusual circumstances.".

(b) SECTION 480(d).—Section 480(d) of the Act is amended to read as follows:

"(d) INDEPENDENT.—The term 'independent', when used with respect to a student, means any individuals who—

"(1) is 24 years of age or older by December 31 of the first calendar year of the award year;

"(2) is an orphan or is or has been a ward of the court;

"(3) is a veteran of the Armed Forces of the United States;

"(4) is a graduate or professional student and will not be claimed by his or her parents (or guardian) for income tax purposes for the award year;

"(5) is married or has legal dependents;

"(6) is an undergraduate student who was not claimed by his or her parents (or guardian) for income tax purposes for the 2 calendar years preceding the first calendar year of the award year, and who either was awarded assistance under this title as an independent student in the prior year, or demonstrates to the student financial aid administrator total self-sufficiency during the 2 calendar years preceding the first calendar year of the award year by demonstrating annual total resources (including all sources other than parents and student aid) of $4,000; or

"(7) is a student for whom a financial aid administrator makes a documented determination of independence by reason of other unusual circumstances.".

SEC. 808. TREATMENT OF AWARD YEAR EARNINGS.

Section 443(b)(4) of the Act (20 U.S.C. 2753(b)(4)) is amended to read as follows:

"(4) provide that for a student employed in a work-study program under this part, at the time income derived from any need-based employment (including non-work-study or both) is in excess of the determination of the amount of such student's need by more than $200, continued employment shall not be subsidized with funds appropriated under this part;".

SEC. 809. RESTRICTION ON NEED ANALYSIS FOR PARENTS NOT ENROLLED IN DEGREE OR CERTIFICATE PROGRAM.

In sections 475 and 477 of the Act (20 U.S.C. 1087oo, 1087qq) insert at the end of subsection (b) the following: "For purposes of paragraph (3) of this subsection, the number of family members attending such a program does not include any parent who does not meet the requirements of section 484(a)(1) or 484(b)(2).".

SEC. 810. NEEDS ANALYSIS FINANCIAL AID ADMINISTRATOR ADJUSTMENTS.

(a) IN GENERAL.—Section 479A(a) of the Act is amended to read as follows:

"SEC. 479A. (a) IN GENERAL.—Nothing in this title shall be interpreted as limiting the authority of the student financial aid administrator, on the basis of adequate documentation, to make necessary adjustments to the cost of attendance and expected student or parent contribution (or both) to allow for treatment of individual students with special circumstances. In addition, nothing in this title shall be interpreted as limiting the authority of the student financial aid administrator to use supplementary information about the financial status or personal circumstance of eligible applicants in selecting recipients and determining the amount of awards under subparts 1 and 2 of part A and parts B, C, and E of this title.".

(b) SPECIAL RULE.—Section 479A of the Act is amended—

(1) by redesignating subsection (c) as subsection (d), and

(2) by inserting immediately after subsection (b) the following new subsection:

"(c) SPECIAL ADJUSTMENTS.—

"(1) ADJUSTMENTS FOR INDEPENDENT STUDENTS WITH DEPENDENTS.—A student financial aid administrator shall be considered to be making a necessary adjustment in accordance with subsection (a) if the administrator determines that the cost of attendance in section 472 should include costs of

food and shelter for dependent care when the total income for independent students with dependents is less than the Standard Maintenance Allowance under section 477(b)(4).

"(2) ADJUSTMENT FOR DISLOCATED WORKER.—A student financial aid administrator shall be considered to be making a necessary adjustment in accordance with subsection (a) if, in the case of dislocated workers—

"(A) the administrator uses the income for the year in which the determination is made (the award year) rather than the income reported in the preceding tax year; and

"(B) the administrator excludes the net value of investments and real estate, including the primary residence in the calculation of the family contribution for the Pell Grant Program and the expected family contribution under part F.

"(3) ADJUSTMENT FOR DISPLACED HOMEMAKER.—A student financial aid administrator shall be considered to be making a necessary adjustment in accordance with subsection (a) if, for displaced homemakers, the administrator excludes the net value of investments and real estate, including the primary residence, from the calculation of the Pell Grant family contribution and from the expected family contribution under part F.".

(c) CONFORMING AMENDMENTS.—(1) Section 479A(d) of the Act (as amended by subsection (a)) is amended by striking out "subsection (b) is an example" and inserting in lieu thereof "subsections (b) and (c) are examples".

(2)(A) Section 411B(g)(1) of the Act is amended by striking out ", except that in the case of a dislocated worker (certified in accordance with title III of the Job Training Partnership Act) or a displaced homemaker (as defined in section 480(e) of this Act), the net value of a principal place of residence shall be considered to be zero".

(B) Section 411B(l) of the Act is amended by striking out ", except that in the case of a dislocated worker (certified in accordance with title III of the Job Training Partnership Act) or a displaced homemaker (as defined in section 480(e) of this Act), the net value of a principal place of residence shall be considered to be zero".

(C) Section 411C(f)(1) of the Act is amended by striking out ", except that in the case of a dislocated worker (certified in accordance with title III of the Job Training Partnership Act) or a displaced homemaker (as defined in section 480(e) of this Act), the net value of a principal place of residence shall be considered to be zero".

(D) Section 411D(f)(3) of the Act is amended by striking out ", except that in the case of a dislocated worker (certified in accordance with title III of the Job Training Partnership Act) or a displaced homemaker (as defined in section 480(e) of this Act), the net value of a principal place of residence shall be considered to be zero".

(E)(i) Section 411F(1)(G) of the Act is repealed.

(ii) Section 411F(9)(E) of the Act is repealed.

(3)(A) Section 475(d)(2)(B) of the Act is amended by striking out "except that in the case of a dislocated worker (certified in accordance with title III of the Job Training Partnership Act) or a displaced homemaker (as defined in section 480(e) of this Act)".

(B) Section 475(h) of the Act is amended by striking out ", except that in the case of a dislocated worker (certified in accordance with title III of the Job Training Partnership Act) or a displaced homemaker (as defined in section 480(e) of this Act), the net value of a principal place of residence shall be considered to be zero".

(C) Section 476(c)(2)(B) of the Act is amended by striking out "except in the case of a displaced worker (certified in accordance with title III of the Job Training Partnership Act) or a displaced homemaker (as defined in section 480(e) of this Act)".

(D) Section 477(c)(2)(B) of the Act is amended by striking out "except in the case of a dislocated worker (certified in accordance with title III of the Job Training Partnership Act) or a displaced homemaker (as defined in section 480(e) of this Act)".

SEC. 811. STUDENT CONTRIBUTION MODIFICATION.

Section 475(g)(1)(C) of the Act is amended by striking out "70 percent" and inserting in lieu thereof "not less than 50 percent".

TITLE IX—STUDENT FINANCIAL AID IMPROVEMENT

SEC. 901. SHORT TITLE; REFERENCES.

(a) SHORT TITLE.—This title may be cited as the "Student Loan Default Reduction Act of 1990".

(b) REFERENCES.—References in this title to "the Act" are references to the Higher Education Act of 1965.

SEC. 902. PELL GRANT PROGRAM AMENDMENT.

Section 411(c)(1)(A) of the Act (20 U.S.C. 1070a(c)(1)(A)) is amended by striking clauses (i) and (ii) and inserting the following:

"(i) the number of academic years (or portion of an academic year) that the undergraduate degree or certificate program normally requires, plus one academic year; or

"(ii) 6 academic years in the case of a undergraduate degree or certificate program normally requiring more than 4 academic years;".

SEC. 903. RISK SHARING BY LENDERS TO STUDENTS AT HIGH DEFAULT RATE INSTITUTIONS.

Section 428(b)(1)(G) of the Act (20 U.S.C. 1078(b)(1)(G)) is amended to read as follows:

"(G) insures not less than 100 percent of the unpaid principal of loans insured under the program, except that if one-third or more of the principal amount outstanding during any consecutive 2-year period on loans of an eligible lender consists of loans to students for the cost of attendance at a high default rate institution, the program insures 95 percent of the unpaid principal of the loans of such lender that are insured under the program;".

SEC. 904. GUARANTY AGENCY PROHIBITION ON THE SALE OF CERTAIN STAFFORD STUDENT LOAN LISTS.

Section 428(b)(3) of the Higher Education Act of 1965 (hereafter in this title referred to as the "Act" is amended—

(1) by striking out "or" at the end of subparagraph (B);

(2) by striking out the period at the end of subparagraph (C) and inserting in lieu thereof a semicolon and "or"; and

(3) by adding at the end thereof the following:

"(D) sell lists of student borrowers who have loans made, insured, or guaranteed under this part.".

SEC. 905. GUARANTY AGENCY USE OF STATE LICENSING BOARD INFORMATION.

Section 428(b) of the Act is amended by adding at the end thereof the following new paragraph:

"(7) STATE GUARANTY AGENCY INFORMATION REQUEST OF STATE LICENSING BOARDS.—Each guaranty agency is authorized to enter into agreements with each appropriate State licensing board under which the State licensing board, upon request, will furnish the guaranty agency with the address of a student borrower in any case in which the location of the student borrower is unknown or unavailable to the guaranty agency.".

SEC. 906. SPECIAL LIMITATION ON THE DEFERMENT OF PAYMENT OF PRINCIPAL AND INTEREST ON PLUS LOANS.

Section 428B(c)(1) of the Act is amended—

(1) by striking out "(A)"; and

(2) by striking out "; and (B) during any period during which the borrower has a dependent student for whom a loan obligation was incurred under the section and who meets the conditions required for a deferral under clause (i) of either such section".

SEC. 907. CREDIT BUREAUS.

(a) NOTICE OF DELINQUENCY.—Section 430A(a) of the Act is amended—

(1) by striking "and" at the end of paragraph (2);

(2) by redesignating paragraph (3) as paragraph (4); and

(3) by inserting after paragraph (2) the following:

"(3) with respect to any payment on a loan that has been delinquent for 90 days, information concerning the date the delinquency began and the repayment status of the loan; and".

(b) NOTICE TO BORROWER.—Section 430A(c) of the Act is amended—

(1) by striking "and" at the end of paragraph (3);

(2) by striking the period at the end of paragraph (4) and inserting "; and"; and

(3) by adding at the end the following:

"(5) with respect to notices of delinquency under subsection (a)(3), the borrower is informed that credit bureau organizations will be notified of any payment that is delinquent for 90 days or more.".

(c) LIMITATION ON REPORTING.—Section 463(c)(3)(B) of the Act is amended by striking ", if that account has not been previously reported by any other holder of the notes".

SEC. 908. REVISED DISCLOSURE REQUIREMENTS OF SLS LOANS.

Section 433(a) of the Higher Education Act is amended—

(1) in subsection (a) by inserting "and except as specified in subsection (e) of this section" after "section 428C."; and

(2) by inserting the following new subsection after subsection (d):

"(e) SPECIAL RULES FOR SUPPLEMENTAL LOANS FOR STUDENTS.—Loans made under section 428A shall not be subject to the disclosure of projected monthly payment amounts required under subsection (a)(8) of this section, provided that the lender provides the borrower with sample projections of monthly repayment amounts assuming different levels of borrowing and interest accruals resulting from capitalization of interest while the borrower is in school.".

SEC. 909. REQUIRED INDEPENDENCE OF ACCREDITING AGENCIES FOR VOCATIONAL SCHOOLS.

Section 435(c) of the Act (20 U.S.C. 1085(c)) is amended by adding at the end thereof the following new sentence: "The Secretary shall not include on such list any accrediting agency or association any of whose officers or directors is affiliated, in any way, with a school seeking or obtaining eligibility under this subsection.".

SEC. 910. NOTICE ON DELINQUENT LOANS REQUIRED.

(a) PRE-CLAIMS ASSISTANCE.—Section 435(d) of the Act is amended—

(1) in paragraph (1) by striking "(5)" the first two places it appears and inserting "(6)"; and

(2) by adding at the end thereof the following new paragraph:

"(6) REQUEST FOR PRE-CLAIMS ASSISTANCE.—To be an eligible lender under this part, each eligible lender shall, if the agency that guaranteed the loan offers pre-claims assistance for default prevention, request pre-claims assistance within the first 10 days such assistance is available as specified by the guarantee agency.".

(b) NOTICE.—Section 428(k) of the Act is amended by—

(1) redesignating paragraph (2) as paragraph (3); and

(2) inserting the following new paragraph after paragraph (1):

"(2) PROVISION OF NOTICE OF REQUEST FOR PRE-CLAIMS ASSISTANCE TO ELIGIBLE INSTITUTIONS.—Each guaranty agency shall, within 30 days of receipt of the request for pre-claims assistance, notify each eligible institution, with respect to students who are delinquent on the repayment of any loan received for attendance at such institution, of the lender's request for pre-claims assistance for default prevention on such loan. Such information may be provided to the eligible institution by submission of a copy of the lender's pre-claims request or through other means.".

SEC. 911. ELIGIBLE INSTITUTION ACCREDITATION RULE.

Section 481(a) of the Act is amended by inserting after paragraph (2) the following new paragraph:

"(3) Whenever the Secretary determines accreditation for the purpose of paragraph (1), the Secretary shall not approve the accreditation of any eligible institution of higher education under this section if the eligible institution of higher education is in the process of receiving new institutional accreditation by a national or regional accreditation agency unless the eligible institution submits to the Secretary all materials relating to the prior accreditation, including the reasons, if applicable, for changing the accrediting agency or association.".

SEC. 912. ADDITIONAL BORROWER INFORMATION REQUIRED.

Section 484(b) of the Act is amended by adding at the end thereof the following new paragraph:

"(5) In order to be eligible to receive any loan under this title, a student shall provide to the lender at the time of applying for the loan the driver's license number of the student borrower, if applicable, and the name and address of the next of kin of the student borrower.".

SEC. 913. INDEPENDENT TESTING OF ABILITY-TO-BENEFIT STUDENTS.

Section 484(d) of the Act (20 U.S.C. 1091(d) is amended by adding at the end thereof the following new sentence: "The tests required by paragraph (3)(A) shall be administered by an agency or entity independent of the institution of higher education concerned at a location not owned or controlled by such institution.".

SEC. 914. EXIT INTERVIEW INFORMATION.

Section 485(b) of the Act (20 U.S.C. 1092(b)) is amended by inserting before the last sentence thereof the following new sentence: "Each eligible institution shall require that the borrower, at the completion of the course of study for which the borrower enrolled at the institution or at the time of departure from such institution, submit to the institution, the address of the borrower, the address of the next of kin of the borrower, and the driver's license number, if applicable, of the borrower during the interview required by this subsection.".

SEC. 915. TOLL-FREE CONSUMER HOTLINE.

Section 485 of the Act is amended by adding at the end thereof the following new paragraph:

"(e) TOLL-FREE CONSUMER HOTLINE.—(1) In addition to the toll-free telephone information provided for in section 483, the Secretary shall contract for, or establish, and publicize a toll-free telephone number for use by the public, in order to permit students who allege fraud or unfair practices by eligible institutions to inform the Department of such fraud or unfair practices.

"(2) The Secretary shall, directly or by way of contract or other arrangement, make the toll-free telephone number, and the availability of the consumer hotline established by this subsection, generally available to students receiving financial assistance under this title.".

SEC. 916. AUDIT OF GRADUATION AND PLACEMENT STATISTICS.

Section 487(a)(8) of the Act (20 U.S.C. 1094(a)(8)) is amended by inserting after "most recent available data" the following: ", certified on the basis of an audit performed by an independent public agency,".

SEC. 917. RESTRICTIONS ON INSTITUTIONAL PROMOTIONAL ACTIVITIES.

Section 487(a) of the Act (20 U.S.C. 1094(a) is further amended by adding at the end thereof the following:

"(11) The institution does not—

"(A) use any contractor or any person other than salaried employees of the institution or a volunteer to conduct any activities related to recruiting and admission of students, including canvassing, surveying, promotion, or similar activities; or

"(B) pay any commission, bonus, or other incentive payment based directly or indirectly on success in securing enrollments to any person engaged in any such activity.".

SEC. 918. ACADEMIC YEAR DEFINITION.

Section 487(a) of the Act is further amended by adding at the end thereof the following new paragraph:

"(12) The institution will use the same definition of 'academic year' for all programs authorized by this title.".

SEC. 919. TUITION REFUNDS.

(a) REFUND RULE.—Section 487(c)(2)(B)(i) of the Act is amended by adding at the end thereof the following new sentence: "In addition, the Secretary may require such eligible institutions to make refunds in accordance with division (iii).".

(b) REFUND PROCEDURES.—Section 487(c)(2)(B) of the Act is amended by adding the following new division after division (ii):

"(iii) When the Secretary determines there has been a violation, failure, or misrepresentation pursuant to division (i), the Secretary may require the institution to refund the student's tuition and fees. The Secretary shall establish procedures for refunding the tuition and fees. Such procedures shall—

"(I) first require the payment by the institution to the United States Government of any portion of the tuition and fees paid with Federal funds received under this title (other than funds under subpart 3 of part A and part B of this title); and

"(II) then require payment by the institution to the lender of that portion of the tuition and fees attributable to a loan made, issued, or guaranteed under part B of this title.".

SEC. 920. SPECIAL ACCREDITATION RULES.

Section 487(c) of the Act is amended—

(1) by redesignating paragraph (3) as paragraph (5); and

(2) by adding after paragraph (2) the following new paragraphs:

"(3) The Secretary is authorized to carry out the provisions of paragraph (1)(D), relating to limitation, suspension, or termination of an eligible institution whenever the institution withdraws from a nationally recognized accrediting agency or association during a show cause or suspension proceeding brought against that institution.

"(4)(A) Whenever a nationally recognized accrediting agency or association reports pursuant to subparagraph (B) that an eligible institution was denied institutional accreditation, the Secretary is authorized to carry out the provisions of paragraph (1)(D) relating to limitation, suspension, or termination of an eligible institution.

"(B) The Secretary is authorized to enter into such arrangements with accrediting agencies and associations as may be necessary to assure notice of the denial of institutional accreditation in order to carry out subparagraph (A).".

SEC. 921. REGULATIONS FOR INSTITUTIONAL DISCLOSURE OF BORROWER RECORDS.

The Secretary shall promulgate regulations specifying the legal restrictions and the requirements of eligible institutions relating to loan counseling and reporting requirements including but not limited to disclosure of borrower records to third parties, the Fair Debt Collection Practices Act, and any other applicable Federal law.

SEC. 922. STUDY OF DISCHARGE OF STAFFORD STUDENT LOANS IN BANKRUPTCY.

(a) STAFFORD STUDENT LOAN DISCHARGE STUDY.—The Comptroller General shall conduct a study relating to the discharge of student loan indebtedness in proceedings in bankruptcy. Such study shall include—

(1) an evaluation of the treatment of student loan debtors under chapter 13 of title 11, United States Code, including—

(A) the frequency of attempts to discharge or the discharging of such loans compared to such attempts to discharge or the discharging of other consumer loans by such students; and

(B) the number and amount of such loans discharged;

(2) an evaluation of the effect of students who attempt to or do discharge such loans relative to the costs of the Stafford Student Loan Program and the institutional costs of the Perkins Loans Program; and

(3) an evaluation of the behavior of student loan debtors who discharge such loans as compared to other debtors who discharge debts in bankruptcy by evaluating such factors as—

(A) the average age of the debtors in each group;

(B) the amounts and types of debts sought to be discharged by each group; and

(C) the percentage of discharge of other types of consumer debts by each group.

(b) STAFFORD STUDENT LOAN DISCHARGE REPORT.—The Comptroller General shall prepare a report of the study required by this section and shall submit the study of the Congress within 3 years after the date of enactment of this Act.

Mrs. ROUKEMA (during the reading). Mr. Chairman, I ask unanimous

consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from New Jersey?

There was no objection.

The CHAIRMAN. The gentlewomen from New Jersey [Mrs. ROUKEMA] will be recognized for 15 minutes, and a Member opposed will be recognized for 15 minutes.

Does the gentleman from California [Mr. HAWKINS] seek time?

Mr. HAWKINS. I am opposed to the amendment, Mr. Chairman.

The CHAIRMAN. The gentleman from California [Mr. HAWKINS] will be recognized for 15 minutes.

The Chair recognizes the gentlewoman from New Jersey [Mr. ROUKEMA].

Mrs. ROUKEMA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the amendment I now offer is identical to the provisions that were accepted by the Education and Labor Committee in 1988, during our discussions of default legislation in the last Congress. The Senate had also accepted these provisions in their corresponding default legislation in 1988. Since both the House and Senate bills were never acted upon, I introduced legislation in 1989, which contained a combination of provisions from those bills agreed to in 1988. The amendment I now offer contains the provisions of that legislation.

The first part of my amendment makes changes to the formula used to calculate student aid eligibility. The changes that I propose in my amendment are, in fact, the recommendations made to the Education and Labor Committee in 1988, by the Advisory Committee on Student Financial Assistance which was appointed by Congress to report on recommended changes to the Student Financial Aid Program. Let me stress that these are technical amendments recommended by the Advisory Committee and proviously accepted by the Education and Labor Committee, but were never passed into law because the default legislation we were then considering was tabled.

The need for these changes is real and is supported by the National Association of Student Financial Aid Administrators.

Mr. Chairman, the text of the letter of the National Association of Student Financial Aid Administrators is as follows:

NATIONAL ASSOCIATION OF STUDENT FINANCIAL AID ADMINISTRATORS,
Washington, DC, March 13, 1989.

Hon. PAT WILLIAMS,
Rayburn House Office Building, Washington, DC.

DEAR MR. CHAIRMAN: Last year, when you and your Subcommittee advanced your initiative on student loan defaults, H.R. 4986, you included in that legislation several important technical amendments needed to correct deficiencies in the existing statutory need analysis provisions. A number of factors contributed to a postponement of the basic default legislation last session. An environment has been created in which all of us want to wait and see if the Secretary's revised regulations are structured so as to reduce the necessity for Congress to take other legislative steps on the subject at this time. There is, however, an important and pressing need to take quick action on the other technical amendments that had been agreed to last year.

I would sincerely hope that you and your Subcommittee would consider introducing and acting upon a technical amendments bill as soon as possible. Since work is well underway on next year's student aid delivery system, it is important that these provisions be enacted this spring, to help students and to simplify the process for them.

Since most of these issues were contained in both H.R. 4986 and S. 2647 last year, I believe that there was a strong consensus that these changes were needed. Most were also recommended by the Advisory Committee on Student Financial Assistance as needed changes.

While I know that you and your staff are fully aware of these issues, I would simply like to restate those that we believe should be adopted and our reasons for seeking the changes.

ISSUE 1—INDEPENDENT STUDENT DEFINITION

The language in H.R. 4986 provided that married students, those with legal dependents, or graduate/professional students would be considered to be independent without declaring that they will not be claimed as a dependent. It further provided that single undergraduates under age 24 who were independent under the prior (current) statutory definition would be grandfathered, that the years for which a student must demonstrate self-sufficiency would be modified to correspond to the two calendar years preceding the first year of the award year, and that students could be considered to be independent even with annual total resources of less than $4,000 if they could demonstrate that they were able to sustain themselves and that remaining sources of financial support were not available from parents or guardians. The $4,000 resource threshold was also modified to exclude both parental support and student aid. These modifications would go far in addressing some of the problems that have been uncovered in the implementation of the current statutory definition.

The requirement that married and graduate students not be claimed as exemptions adds questions to the application form without significantly changing the number of otherwise dependent students who would be considered independent. The College Scholarship Service (CSS) reported that less than 1,000 students in approximately 2.6 million are married dependent students who would become independent based on this change alone. Approximately 9 percent of CSS graduate student applicants are dependent and would become independent. This represents less than 1 percent of all CSS applicants. The American College Testing Program (ACT) reported that less than 1 percent of its applicants are married students who would become independent. In addition, approximtely 8 percent of the graduate students are dependent students who would become independent. This represents only 1 percent of all ACT applicants. This information was included in the interim report by the Advisory Committee on Student Financial Assistance issued in April 1988. These statistics do not represent the programs as a whole, but do provide an indication of the effect of the change on a portion of the population.

The combination of grandfathering students considered to be independent under the statutory definition and modifying the years for which self-sufficiency must be demonstrated will accomplish a great deal in terms of simplifying the structure of the application form and the ability of students to complete it. The current statute provides that the demonstration of self-sufficiency is tied to the two calendar years preceding the award year in which the initial award is granted. This provision has the unintended effect of steadily increasing the number of questions which must be included on the student aid application, thereby increasing the difficulty students have in completing it. The 1990–91 draft Application for Federal Student Aid (AFSA), which was distributed by the Department for comment in early February, clearly illustrates the complexity and unnecessary additional questions that must be included to accommodate the current definition. A copy of the first page of the draft AFSA is provided for your review.

The exclusion of student aid from the $4,000 resource threshold avoids reclassifying numbers of otherwise dependent students as independent (particularly at high cost institutions) on the basis of student aid receipt. This exclusion would seem to put all students, whether aid recipients or non-aid recipients, on equal footing with regard to demonstrating self-sufficiency.

ISSUE 2—NUMBER IN POSTSECONDARY EDUCATION FOR NEED ANALYSIS PURPOSES.

The House provision required that, to be included in this number for purposes of the campus-based and Stafford Loan programs, parents had to be enrolled in a degree program.

This issue is particularly important as it relates to the Congressional Methodology because the parental contribution (for dependent students) and family contribution (for independent students) is divided by the number in postsecondary education. For the Pell Grant Program, a sliding percentage is used upon this number.

We suggest that the language in the House bill should be expanded to also include dependents of the student who may be enrolled in postsecondary education and to encompass the Pell Grant Program as well. This would ensure fair equitable treatment of all students, regardless of the student aid program for which they are eligible and regardless of who in their family is attending postsecondary education.

ISSUE 3—TAXATION OF DEPENDENT STUDENT EARNINGS UNDER THE CONGRESSIONAL METHODOLOGY.

NASFAA believes that this taxation rate, currently 70 percent, is too stringent and should be modified. This is an item for which NASFAA members have reported making numerous adjustments using professional judgment authority. The process would be more responsive to students if the taxation rate is modified to be not less than 50 percent.

NASFAA clearly believes that an underlying principle of need analysis is that students should contribute to their postsecondary education to the extent they can. Establishing a minimum contribution supports this concept and also recognizes that stu-

dents have certain expenses associated with their jobs. There are also circumstances under which individual students or groups of students do not have the same level of job-related expenses and may be able to contribute more than the 50 percent minimum to their education. This modification would provide aid administrators with flexibility in determining the assessment rate. This is also an area that I know has caused real hardships for many students whose earnings are being unreasonably assessed. As a result, we are almost discouraging students from working to contribute toward their educational expenses. Comments directly from affected students were expressed at your Subcommittee's field hearing held in New Jersey last June.

ISSUE 4—DOUBLE COUNTING OF INCOME IN ASSET COMPUTATIONS.

The House bill includes a provision to address the potential inclusion of income earned during the base year as an asset for purposes of determining need for the title IV programs. While we recognize the problem and appreciate the attempt to address it, we do not believe it can be solved through this proposed legislative language. The actual language included in the bill, if implemented, could have unintended consequences, inherently benefitting students who did not accumulate savings from their base year earnings. The proper identification of the students affected by this problem and appropriate treatment of these cases will be very difficult, and may best be addressed by the financial aid administrator's ability to make adjustments when warranted. Returning to the practice of using estimated year income in the student computation is another way to address this problem.

ISSUE 5—PROFESSIONAL JUDGMENT AUTHORITY.

The House bill specified an example of an appropriate professional judgment circumstance, that being adjustments for independent students with dependents. NASFAA supports this language. In light of provision contained in the FY-89 Labor/HHS/Education appropriations measure rescinding professional judgment authority for the Pell Grant Program, we believe that additional action is also necessary.

We believe that the reason professional judgment authority was rescinded for the Pell Grant Program was based upon the unsubstantiated estimate of costs associated with this authority that was advanced by the Education Department. We believe that the Department assumed that financial aid administrators would only use this authority to make more students more eligible. In reality, in discussing this matter with financial aid administrators, we would observe that most of them are not only using this authority only in circumstances which warrant a special review, but that in many cases the end effect has been to reduce the student's eligibility rather than to increase it. NASFAA maintains that there will be no cost savings realized by this change. In fact, analyses done a part of the recent Title IV Quality Control Studies (1985-86) showed that the overwhelming number of discretionary changes resulted in a reduction of need, and therefore, awards. This is the only available proxy for likely behavior under the current statute. NASFAA believes that the use of aid administrator's discretion may result in a slight decrease in overall costs, due to the ability of aid administrators to review and adjust awards downward, as well as upward, based upon all relevant facts.

An additional problem is procedural. Due to the date of enactment of the appropriations measure, it was not possible for the Department to develop and distribute a "Special Conditions Form." The Department has indicated that it plans to utilize the same special conditions that were used in the 1987-88 award year, however details of these conditions have not yet been revealed to the financial aid community. Further, it will be the responsibility of the financial aid administrator to facilitate identification and processing of applications for students with special conditions. If this is the case, the only difference between the current use of professional judgment and the Department's planned procedures for handling special conditions is that ED is now limiting the circumstances under which changes can be made. This clearly limits the ability of financial aid administrators to effectively respond to the special circumstances of individual students which are not included in ED's special condition guidelines.

One example of this limitation involves dependent student earnings for the Pell Grant Program. The current statutory formula uses base year income for these students. Previously, a comparison of base year and estimated year income determined the appropriate income to be used in the analysis, thereby providing dependent students with an unofficial "special condition" which allowed sensitivity for individual students. If the Department follows through with its announced plans to use the same special conditions that were previously used, then this category of adjustment will not be possible, even though it is often justified. Further, we believe that this is the kind of sensitivity that Congress wanted to be part of the Pell Grant methodology when it authorized aid administrators to exercise professional judgment for this program. Therefore, we would strongly recommend that this authority be reinstated as soon as possible.

ISSUE 6—VETERANS EDUCATIONAL BENEFITS

The House bill provision required all veterans educational benefits to be included in the determination of need for Stafford Loans. NASFAA believes this provision should be expanded to include all veterans educational benefits as a resource in the need determination for all of the Title IV programs. This modification would standardize the treatment of these benefits that is currently governed by both law and regulations and varies by program. Such an approach would simplify the current complicated administrative procedures which result in potential inconsistent handling of students.

ISSUE 7—NON-LIQUID ASSETS

The House bill excluded the principal place of residence, family farm, and family-owned and managed small business from asset considerations for campus-based and Stafford Loan programs.

NASFAA believes the Congress should very carefully evaluate the effects upon families with differing financial circumstances before automatically eliminating categories of assets from the need analysis for the campus-based and Stafford Loan programs. In discussing this matter with our members, several suggestions have been made. One suggestion would be to exclude the consideration of home equity only from the Stafford Loan Program eligibility determination, thereby enabling students from many of these families to have access to low interest subsidized loans. An additional suggestion is to provide some further sensitivity to the programs by only excluding home equity for families with adjusted gross incomes of $25,000 or less, and/or perhaps excluding various percentages of home equity under a formula which relates to income. While we recognize the political pressures that the Congress faces on this issue, we believe that if changes are to be made, our possible solutions should be given serious consideration. We would be happy to work with you to develop another alternative if you so desire.

ISSUE 8—TREATMENT OF AWARD YEAR WORK-STUDY EARNINGS.

The provision in the House bill clarifies that when income from need-based employment (including non-work-study or both) is in excess of the student's need by more than $200, continued employment may not be subsidized with work-study funds. Currently, the statute provides that all income, whether need-based or non-need-based, must be considered in making this determination. This modification is necessary to acknowledge the use of base year income in the Congressional Methodology analysis and to clarify that only need-based employment must be monitored for College-Work Study employees.

Again, we appreciated your willingness to address many of these issues through H.R 4986. We hope that you will recognize the need to consider a separate legislative measure to accommodate these changes as soon as possible. NASFAA stands ready to assist with additional rationale or legislative language as you deem necessary. We look forward to continuing to work with you on these important issues. Please feel free to contact me if you have any questions.

Sincerely,

DALLAS MARTIN,
President.

Right here in this letter dated March 13, 1989, to the Subcommittee on Postsecondary Education they state their "sincere hope that the subcommittee would consider acting upon a technical amendment bill as soon as possible." They go on to say, and I quote, "since most of these issues were contained in both H.R. 4986 and S. 2647 last year, I believe that there was a strong concensus that these changes were needed."

My amendment contains the recommended changes listed in this letter. I which has been included for printing in the RECORD with this debate.

First, my amendment addresses the confusion created by congressional methodology regarding counting of veterans benefits in the determination of student aid eligibility. My proposal will treat all veterans benefits equally by categorizing them as resources in awarding aid. This is necessary to eliminate confusion and inequity in the system.

Second, my amendment addresses the inequity of double counting of student income in the asset computation of the formula which creates a disincentive to save. My amendment will correct this problem by eliminating the counting of cash on hand.

Third, my amendment closes a loophole in the definition of independent student. My amendment will ensure that only those students truly independent of their parents will be considered for higher aid awards.

For the sake of brevity, the rest of the sections of my amendment clear up other definitions, place restrictions on needs analysis for parents enrolled in degree programs and clarify the discretionary powers of financial aid officers in determining need.

Clearly, these amendments have been thoroughly discussed before today. The advisory committee on student financial assistance has recommended these changes and we should implement them. They should have been implemented 2 years ago when we first discussed them. Let's not waste any more time.

DEFAULTS

In addition to changes in the congressional methodology, my amendment adds a new title to the bill to address the student loan default problem head-on. As I stated earlier, these provisions are taken from the default bill passed by this committee in 1988. Many of these defalut measures were included in the Senate's version of the President's education bill, S. 695, which was passed by the Senate in February of this year. Let me stress again that there is precedent for the enactment of my amendments. The Senate is willing to take action to cure the default problem—why shouldn't we be willing to take the same action?

These sections of my amendment are essential if we are to stem the flow of dollars out of the student loan program and shore up public and congressional support.

The Department of Education default regulations adopted last year do not go far enough fast enough to stop the ever-increasing tide of red ink in the student loan program. I have been told repeatedly that we should wait until next year to consider legislative solutions to the default problem when we take up reauthorization of the Higher Education Act. We have a crisis here! Why do we want to wait until next year to do what should have been done long ago? The hemorrhaging in the student loan program must stop now! Further postponement will erode public support and cost the American taxpayer another $2 billion this year.

This default scandal has grown since 1981 from a $200 million problem to a $2 billion problem this year. The total amount of defaulted student loans now outstanding totals over $7 billion. Do we need to allow this problem to fester out of control until we have another savings and loan scandal on our hands?

And if you think I am the only one concerned about defaults, think again. The Appropriations Committee stated in the Labor, HHS, Education appropriations bill last year and again this year that neither students nor taxpayers are as well served as they should be by the current system of student aid. The more than $2 billion in defaults, they state, is a critical problem which unduly burdens the Treasury and which undermines basic support for Federal student aid programs.

There is ample support for the enactment of default legislation this year. The recently released semiannual report to Congress from the inspector general of the Department of Education identifies the student financial assistance program as the most vulnerable to waste, fraud and abuse in the department. We have the means to correct this finding.

Many of us know that defaulted student loans are highest with the proprietary schools. The inspector general recognizes this, too. The report states, and I quote,

Many participating institutions, particularly proprietary schools, have abused the programs at the expense of students, who are the intended beneficiaries. In these cases, students are often left without the skills to secure a job that would enable them to repay their student loans. Ultimately, it is the taxpayers who suffer the costs associated with student loan defaults.

Several of the provisions contained in my amendment address the abuses of the student loan program by proprietary schools and complement the efforts of the Department of Education in their default regulations.

Among these are tougher accreditation standards which would prevent an owner of a trade school from serving on the very accrediting board which certifies his school. Does anyone think that resolving this inherent conflict of interest is not in the best interests of students and the financial aid system? Is it not the duty of Congress to protect students from scam schools that only have one goal in mind—to rob the Treasury of student aid money.

In addition, I would require an independent audit of graduation and placement statistics and tuition refunds when a school misrepresents its educational program. The amendment prohibits the use of commissioned recruiters who are paid by the number of people they bring into the school. It also requires independent testing to determine whether a student has the ability to benefit from the courses taught at the school. There have been too many instances of unqualified students recruited for trade schools that couldn't care less whether the student can complete the training or if there is even a need for the job for which they are being trained.

I should think the distinguished chairman of the Education and Labor Committee would be very interested in this letter I received yesterday from the California attorney general's office. When they found out about my amendment, they wrote to tell me of their endorsement of its provisions and told me of the actions the State of California has recently taken to attack the scandalous rip-off of students and the Federal Government being perpetrated by bogus trade schools.

Let me quote from this letter:

We have recognized vocational school problems as one of the most significant consumer problems of this decade, harming students, the Federal and State governments and legitimate schools hurt by unfair competition. Taxpayers have unnecessarily lost billions of dollars because of vocational school abuses. Effective Federal legislation will aid the Federal Government and the States in their attempts to curb vocational school abuses without adversely affecting schools with good educational practices.

Mr. Chairman, the full text of the letter from the California Attorney General to me dated July 19, 1990 is as follows:

STATE OF CALIFORNIA,
DEPARTMENT OF JUSTICE,
Los Angeles, CA, July 19, 1990.

Re Your proposed amendment to H.R. 5115.

Hon. MARGE ROUKEMA,
Cannon House Office Building,
Washington, DC.

DEAR CONGRESSWOMAN ROUKEMA: The California Attorney General's office is pleased to note that many of the provisions of your proposed amendment seek to remedy major problems our office has investigated, problems we have also sought to remedy at a state level in legislation enacted last year, legislation we have proposed this year and in our investigations and civil and criminal prosecutions. Under separate cover, we have sent a copy of California's current legislation.

We have recognized vocational school problems as one of the most significant consumer problems of this decade, harming students, the federal and state governments and legitimate schools hurt by unfair competition. Taxpayers have unnecessarily lost billions of dollars because of vocational school abuses. Effective federal legislation will aid the federal government and the states in their attempts to curb vocational school abuses without adversely affecting schools with good educational practices. Of particular interest to us are the following proposed amendments involving issues found in our investigations.

Section 904 relates to a general problem not restricted to vocational schools, the selling or trading of lists without consent of the consumer. In this instance, these sales or trades sometimes lead students into transactions which may assure defaults. In our investigations, we have discovered that the sale of these lists create substantial invasions of privacy as well as creating consumer problems.

Section 909 addresses a major problem, the independence of private accrediting agencies. Our state felt it necessary to go even a step beyond your recommendation and we have created more state supervision of the accrediting process. As long as student loans are funded because of acceptance of schools by private organizations, it is most important that those private organizations are independent. Our investigations have revealed that some of these organizations are not at all independent.

Section 911 relates to a problem we have been investigating—that of schools forum shopping when a private accrediting group, trying to do a good job, is about to terminate accreditation. Our investigation revealed that schools in trouble with an accrediting agency attempting to enforce a reasonable standard face little difficulty in quickly finding another agency willing to accept the school.

Section 913 addresses the growing practice of giving advance answers to ability-to-benefit students or giving tests that do not measure the ability to benefit. We have found hundreds of examples of this problem.

Section 915 addresses the need for a toll-free consumer hotline. many vocational school students do not know to whom to complain and they often do not recognize that federal or state agencies are intrerested in their complaints.

Section 916 requires an audit of graduation and placement statistics. California has recognized that one of the best methods for determining whether a vocational school is fulfilling its function is to require graduation and placement standards and to obtain valid statistical information.

Section 917 addresses one of the most widespread abuses, the advertisements and actions of commissioned recruiters. We have examined ads by such recruiters which appear to be employment ads and sales scripts which state, in effect: "Do you think an employer would hire you? You are a loser. We would lose our reputation if we sent you to a job. However, employers look favorably on those who are attempting to become trained. We will send you to—. After two weeks, come back and see us."

Section 918 addresses, in part, the problem of translating hours and units and semesters in a manner often related less to reality than to the maximization of loans and grants.

Section 919 addresses one of saddest problems we have encountered, a student attempting to be a productive member of society and not only deprived of meaningful training by deceptive and unfair practices of the school but thereafter deprived of further educational opportunities and hounded for payment for an education not received.

Section 920 addresses the need to take prompt action when it appears that schools are not fulfilling their educational promises. Too often, schools delay the investigative process until additional large sums have been collected from unwary students. These sums disappear and the schools eventually close or file bankruptcy. Prompt action would prevent these additional losses. California has utilized several approaches to solve this problem, prompt action and requiring ample reserves are two of those approaches.

Please let us know if we can be of assistance in identifying further vocational school problems we have encountered or in supporting your efforts to combat vocational school abuses while not adversely affecting good programs.

Please

Yours truly,

JOHN K. VAN DE KAMP,
Attorney General.

by

HERSCHEL T. ELKINS,
Senior Assistant Attorney General.

The letter then goes on to explain why they endorse my amendment with examples of the need for tighter regulations. One case that the California Attorney General's office prosecuted involved an accrediting agency that accredited a school before it was even licensed to do business.

These abuses are not limited to California. In Florida, a fruit stand was accredited as a trade school able to participate in the Federal student aid program. In another case, an officer of an accrediting agency filled out the paperwork for a school that was applying for accreditation with that officer's agency. In my own State of New Jersey and in cases in New York, several schools have been investigated, indicted, and found guilty of racketeering, falsification of documents and theft of Federal funds. There is more work out there than the inspector general can keep up with.

But we are making it easy for these rip-offs to occur. We have the chance to do something about it now. Let's do it.

My amendment also requires that more information be obtained from the borrower and that more information be given to the borrower about how much he or she will owe and what monthly payments will need to be made.

This all seems like common sense procedures that should have been in the law from the beginning. Certainly we can make these necessary changes now.

Every Member of Congress must find the courage and integrity to correct this scandal. In the other committee on which I serve, the Banking Committee, we have had to deal with failed savings and loans which have cost the taxpayer infinitely more money than student loan defaults. Yet, it is incumbent upon this Congress to take action to close down the scam schools, just as Congress is now closing down the scam savings and loans. If we act now, maybe the taxpayer will not have such a large bill to pay for student loan defaults and maybe more deserving students, going to schools which provide worthwhile training and education, will be able to receive student loans.

Mr. Chairman, I ask that my colleagues join me in correcting the scandalous student loan default problem and making the necessary and recommended changes to congressional methodology so that truly deserving students who repay their loans are able to fully participate in this valuable and needed program.

□ 1200

Mr. Chairman, I reserve the balance of my time.

Mr. HAWKINS. Mr. Chairman, I rise in opposition to the amendment of the gentlewoman from New Jersey [Mrs. ROUKEMA], and it is obviously unpleasant to oppose the gentlewoman from New Jersey, a member of the committee. However, Mr. Chairman, it is largely because she is a member of the committee that I think we should place her amendment in proper focus.

Several months ago we announced, in conjunction with the request of the minority member of the committee, ranking minority member, the gentleman from Pennsylvania [Mr. GOODLING], that everyone who had an amendment or had a problem that was felt we should seek a solution to, would offer the amendments so that the Committee on Education and Labor could scrutinize them and try to perfect a suitable adjustment in such a way as to have, before the committee reported to the House, a package that could move ahead without being jeopardized. Mr. Chairman, the gentlewoman from New Jersey [Mrs. ROUKEMA], a member of the committee, did not at any time offer an amendment such as she is doing today.

So, we have an amendment which has a great deal of merit, but which has not been scrutinized and which should be perfected. Even the wording of the amendment might in some way jeopardize the support for a package that otherwise has strong bipartisan support.

The gentleman from Michigan [Mr. FORD] in conjunction with the gentleman from Pennsylvania [Mr. GOODLING] did receive those suggestions, and I will yield 3 minutes to the gentleman from Michigan and also commend him on the manner in which he proceeded to accept amendments, to look at them, to share them with the minority and to try to bring before the House only those amendments which have been clearly structured, carefully looked at and, we thought, would fit under the target, the umbrella, of having wide acceptance.

Mr. Chairman, there are many problems in education. This bill does not presume to solve every problem in education. But certainly, I think, we should want to commend the gentleman from Michigan [Mr. FORD] for the manner in which he scrutinized the amendments and looked them over in conjunction with the minority.

Mr. Chairman, I yield 3 minutes to the gentleman from Michigan [Mr. FORD].

Mr. FORD of Michigan. Mr. Chairman, I thank the gentleman from California [Mr. HAWKINS] for yielding this time to me.

Mr. Chairman, the Roukema amendment contains 28 substantive provisions. These are highly technical changes to very complex programs including the Guaranteed Student Loan Program and the system of needs analysis that determine a student's eligibility for student aid.

This very complex Roukema amendment has not been the subject of hearings or consideration by the Education and Labor Committee. Mrs. Rouke-

ma's "Dear Colleague" of July 12, 1990, claims that, "Most of the provisions of my amendment were part of default legislation which was approved by the Education and Labor Committee back in 1988, but never acted upon before the end of the 100th Congress."

This is simply untrue.

The gentlewoman from New Jersey [Mrs. ROUKEMA] is comparing her amendment to H.R. 4986, the Student Default Initiative Act of 1988. Of the 28 provisions in the Roukema amendment, 2 are identical to provision contained in H.R. 4986, 6 are modifications of provisions contained in H.R. 4986, and 20 did not appear in any form in H.R. 4986. Thus, 93 percent of the provisions in the Roukema amendment are completely new or modified in comparison to the provisions of H.R. 4986. Among the new provisions is the section dealing with lender risk sharing, the most controversial provision in the amendment.

In addition, since H.R. 4986 was reported by the Education and Labor Committee in 1988, the Department of Education implemented its default reduction initiative regulations in June 1989 and the fiscal year 1990 budget reconciliation enacted major default reduction measures. Therefore, the fact that a few of the provisions of the Roukema amendment are similar to those considered by the Education and Labor Committee in 1988 does not establish their continuing relevance given the passage of time and the implementation of major antidefault measures by both the Congress and the Department of Education.

There is a very real danger that if this amendment, which has not been considered by the Education and Labor Committee, is adopted, there will be substantial dislocations and disruptions in the delivery of nearly $20 billion in student aid to over 6 million students this fall.

In addition, in the next Congress the Education and Labor Committee and the House will be considering the reauthorization of the Higher Education Act. There will be exhaustive hearings and consideration by the committee. That is the appropriate forum to consider changes in the student aid programs.

I urge my colleagues to reject this amendment. It is an ad hoc collection of provisions that do not comprehensively or effectively address the problem of loan defaults. In addition, it threatens to disrupt the delivery of all student aid.

Mrs. ROUKEMA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I simply want to state in response to the statement of the gentleman from California [Mr. HAWKINS], the chairman, that I was informed as a member of the committee that in the interests of cooperation between the chairman and the ranking member, I could not present my amendments during consideration of the bill, and that they would have to be considered either prior to floor action or as amendments brought up before the Committee on Rules, and I complied with the requests of the chairman and ranking member at that time.

Mr. Chairman, I yield 4 minutes to the gentleman from Ohio [Mr. KASICH].

Mr. KASICH. Mr. Chairman, I want to congratulate the gentlewoman from New Jersey [Mrs. ROUKEMA] on offering this amendment, and I want to tell my colleagues what this reminds me of.

I say to my colleagues, "I don't know how many people in this body play golf, but, when you get up on the first tee and hook the first three shots out of bounds, generally, if you have a friend, the friend will say, 'Now you know you're not straightening your arm the right way. You better change your swing a little bit.' "

Mr. Chairman, the approach this committee has taken for the last 10 years on student loans represents the way I see it in this illustration of golf, and it is that we have hooked the first three shots out of bounds, and those guys keep saying, "Let's just keep on hooking the next 10 out of bounds."

We have a default right now on student loans that is reaching $7.8 billion, $7.8 billion. It is going to be up to $807 billion by 1991, and the increase has been staggering, an eightfold increase in student loan defaults since 1981.

Mr. Chairman, the response of the committee is, "Well, we'll get around to it later," and, when later comes, they will absolutely oppose the idea of reducing the loan guarantee.

Now, why do we favor the loan guarantee? Well, because we now give the banks in this country a 100-percent guarantee on student loans.

Do my colleagues know what I would do if I were a banker? I would set up a stand in front of my bank, and, when people drove by in their cars, I would see if I could throw money in the window and say, "Just take it and spend it, and, if we don't collect it, who cares? The Federal Government will pay for it. The taxpayers will take care of it."

□ 1210

This is the only program that exists in the Federal Government that gives a 100-percent guarantee on a loan from the Federal Government, and all that the gentlewoman from New Jersey [Mrs. ROUKEMA] is trying to do is to take the guarantee from 100 percent down to 95 percent.

Do you know why? So that the banks can be like a chicken in a chicken dinner, so that the banks can be committed like the chicken is in a chicken dinner, and that we do not let bankers make a 100-percent repayment. They do not care who they loan money to. They do not care if they collect the money. Why should they? A 100-percent guarantee guarantees fiscal irresponsibility. That is the only thing it guarantees.

Now, people will say that if you lower the guarantee from 100 to 95 percent, the banks will not make loans. That is baloney. Every time we reduced the sugar that we have put in the pot to help the banks out and they cry, "Wolf," and say, "Woe is us. We won't make any loans." They come back and the number of loans they actually process increases.

Now, in addition to that, for the students who cannot get loans, the States have to establish a loan of last resort within each State agency. If a student cannot get a loan from that institution, then the Sally Mae kicks in with the Federal Government and a loan is ultimately provided.

What this does, this guarantees that the lending institutions in this country will become more committed to the idea of running their Federal loan program in some kind of a sane way and some kind of a responsible way.

Do you know? This will be rejected, of course it will; but I just want to tell you something. I remember when we kept rejecting base closings. What we need to do in this country is to bring this to the attention of the American people, and when we do this will become a national scandal, and when student loans get to be reduced we are going to come on this floor and lay the blame where it ought to be, on the committee that refused to put responsibility in the loaning of this Federal money, and I am going to tell you, this is going to happen. We are going to reduce the loan guarantee. It is not going to be today and maybe it will not be next year, but I am going to tell you, we are going to make you so sick and tired of listening to this amendment that sooner or later you will cave in and you will do what is right for the loan program, for the students who want loans, and for the taxpayers of this country.

Mr. Chairman, I urge adoption of the Roukema amendment.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania [Mr. GOODLING].

Mr. GOODLING. Mr. Chairman, I want to make sure that everyone understands that you do not have to say anything over and over again to get us to want to do something that has to be done. We all know there are problems in higher education. We know that we have reauthorization of the program next year. That is the time we do these kind of things, not in a piecemeal effort. Nothing that wants to be done today can take effect until 1992-

93. What is the rush? It cannot take effect until 1992-93.

Now, all we are saying basically if we act hastily is several things. First of all, I am very concerned about the amendment's lender risk sharing provision, which will have the effect of discouraging lenders participating in the Guaranteed Student Loan Program from making loans to high-risk borrowers. Those borrowers who are low income educationally disadvantaged students seeking to enroll in postsecondary educational training programs are the ones affected.

We can sit here and say what lending institutions will do. We do not know what lending institutions will do, but I know who will suffer if we do not look at this carefully next year when we reauthorize. Those most in need will be those who suffer.

So I would hope that when you do not define what a high default rate institution is that you will realize that redlining will not prevent loans from being made to students attending those high default rate schools. It will be.

Nor will this risk-sharing provision reduce default costs, because it will only result in shifting the burden to State guarantee agencies who act as the lender of the last resort, and boy, that is the wrong place for that to go; however, guarantee agencies are not designed to be direct lenders of loans to large numbers of borrowers, nor do they have the cash reserves to carry out this function.

So again I would ask everyone to get behind the gentlewoman from New Jersey next year when we reauthorize all of the higher education issues, and then we will not have a piecemeal effort. We will have a joint effort and the gentlewoman will play a leading role in bringing about that joint effort.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes to the gentleman from Missouri [Mr. COLEMAN].

Mr. COLEMAN of Missouri. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, I think the gentlewoman from New Jersey has the right amendment at the wrong time, the wrong time because several years ago she suggested most of this was in legislation, but something has happened in those several years that has addressed some of the issues that she has talked about; others that have not should be addressed in a comprehensive fashion and several months in the comprehensive 5-year reauthorization for the Higher Education Act.

Let me remind the body that the Department of Education through the pushing of our committee and through the introduction of default legislation that we have had in the past has gone after some of these schools that she is concerned about, because they have limited, suspended, or terminated some 638 schools with default rates above 60 percent. They have required delayed disbursement to recipients so they do not get all the money and leave school.

We have talked about and had enforced by the Department loan counseling disclosure of graduation rates and job placement rates to prospective students.

Last year this body in the 1990 reconciliation bill saved over $400 million in the SLS Program by eliminating schools with default rates of over 30 percent in this program, by requiring the GED to receive eligibility benefits, and it goes on and on.

We have restricted accreditation hopping. If you lose your accreditation, you cannot hop to another one and continue in this program. You have to be out for 24 months.

We are doing something. This amendment is well-intentioned, but I would have to say that all the discussion about saving money flies in the face of reality. The CBO actually says this amendment costs money over 4 or 5 years of $175 million. That is not to say that in the context of a more comprehensive approach that you might not want to include some of it, but it has been suggested that this bill does nothing. This bill does something. It would recalculate in the next several months everybody's student aid going into the 1990 fall tuition and academic year, so it does do something. It does something very mischievous in the next several months to millions of families.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes to the gentleman from Montana [Mr. WILLIAMS], the chairman of the subcommittee.

Mr. WILLIAMS. Mr. Chairman, I thank the gentleman for yielding me this time.

I am surprised and somewhat disappointed that the gentlewoman has persisted in bringing this amendment.

This House is less than a year away from beginning consideration of full reauthorization of the Higher Education Act, and yet I call to the attention of this House that the gentlewoman's amendment is 24 pages.

□ 1220

It is, in effect, a mini-reauthorization of the Higher Ed Act, and the surprising thing is she does it without a single hearing, without any committee consideration, without even technical assistance from the Department of Education. Let me draw also the Members' attention to this fact, which would mean that the law goes into effect immediately upon passage. That would have severe implications on the Federal Student Aid Program this year.

More than 60 percent of students who will apply for aid to attend school this fall have already applied and have received their award notices and are planning accordingly. Because the gentlewoman's amendments change the need analysis formula for student aid, it would mean that all of these students and their families, more than 6 million students if the gentlewoman's amendments become law, would be forced to reapply for aid. Our offices will be strangled with complaints from students who have already received their announcements and now must reapply. New forms would have to be developed and tested and distributed. New contracts would have to be issued. That is not something that I think the Members of this House want to do.

Quickly, now, with regard to cost, the gentlewoman's amendment, according to CBO, and that is who we go by, that is the institution that decides this for us, estimates that the gentlewoman's amendment will cost by 1995 $177 million. Surely, you do not want to spend that much money in this kind of a thoughtless approach without a single committee hearing.

I ask my colleagues to defeat the gentlewoman's amendment.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania [Mr. GAYDOS].

Mr. GAYDOS. Mr. Chairman, I rise in strong opposition to this amendment.

This amendment is a package of 28 separate elements. Some of the sections may be worthwhile and workable, but others have the potential for absolute catastrophe. Without an opportunity for full discussion of these elements separately, we have no idea of the general impact on higher education.

Last November, for example, as part of the budget reconciliation process, Congress without hearings and over my objection, made a number of changes in the Supplemental Loans for Students Program.

We are now just beginning to see the dire circumstances of that decision: 15 percent of all career schools closed—more than three times the number of schools that closed in the previous 2 years combined; and an 11-percent decrease in the total enrollment of career training schools—more than 200,000 students.

Are we to believe that these 200,000 students—mostly older, very often high school dropouts, many single parents, and almost all poor and underskilled—will rush to attend more traditional institutions of education or will miraculously be accepted into other job training programs? I doubt either of those results.

I fear that by accepting the present amendments, we could be worsening an already critical problem.

I am concerned about many elements in this package, but one that requires dislocated workers to include unemployment compensation and other benefits as income on their loan applications, poses a serious threat to the existing system.

These men and women who have lost their jobs are desperately in need of training. By listing unemployment benefits as income, they could very easily be excluded from the student loan programs—just when they need that extra boost.

Who would be hurt? Almost 40 percent of those receiving such compensation have already been out of work for more than 20 weeks. Many, like the former steelworkers in my area, have already been listed by the Department of Labor as among the most difficult to retrain for new jobs.

These Americans and others like them, who want career school training may be left out in the cold.

These students often are over the age of 25, minority, women, and single parents. Further, many are on welfare and need this educational opportunity to better their lives and the lives of their families.

As others have said today, this obviously is the wrong time and the wrong place for this discussion.

Next year, the Committee on Education and Labor will consider reauthorization of the Higher Education Act.

That is the right tme to fully examine these proposals and that is the right place to debate these issues.

I urge all of my colleagues to defeat this amendment.

I intend to take special orders next week to address this issue in detail and ask any interested members to participate.

Mrs. ROUKEMA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this is the third year in a row that I have been asked to wait until next year. No longer can we wait. The defaults are spiraling out of control.

With respect to the effective date of the bill, the Senate has the provision in its bill, and we can reconcile it in conference.

But I want to call the attention of all you people who rail against waste, fraud, and abuse, and I want the attention of all of you people who are pointing fingers of blame at those who are responsible for the S&L looters. If you vote against this amendment, you are part of the problem and part of the scandal. You are protecting the con artists, the frauds, the scam operators for yet again another year. And for those of you who want to cry crocodile tears for the banks, let me remind you of the "60 Minutes" program which outlined the problem beautifully. Your voters watched that program, and your voters know about the S&L disaster. No one is going to cry over the problems of the banks.

Are we going to be cowards yet again in this House by caving into another set of special interest groups? I say no.

The trade associations are protecting the rotten apples in the barrel while the reputable schools and the States that are doing a good job are being denied.

This vote is a vote for fiscal sanity, and it is a vote to restore the integrity of the student loan program.

Mr. Chairman, I yield back the balance of my time.

Mr. HAWKINS. Mr. Chairman, I yield the remainder of my time, 1 minute, to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Chairman, I take no position on this amendment. It is long and complicated. There are good things that I like about it and things that I like less.

My problem, however, is that this amendment violates section 303(a)(4) of the Budget Act, because it creates new entitlement authority first effective in a fiscal year for which Congress has not adopted a budget resolution. Therefore, from the standpoint of process alone, even though the Budget Act has been waived by the Committee on Rules, I must vigorously oppose the amendment.

Mr. OWENS of New York. Mr. Chairman, I rise in strong opposition to the Roukema amendment. This amendment is a very broad reaching amendment which would effect many aspects of higher education including student access—especially for disadvantaged and minority students, financial aid and the issue of student loan defaults, lender responsibility, institutional accreditation and many more.

In short, the scope of this amendment is too broad for debate to occur only on the House floor, before adequate committee consideration.

The Higher Education Act will be reauthorized next year, and all of these issues are already on the table for the reauthorization process. That is the proper forum for issues which are of such crucial importance to the success of the higher education system for so many of our students.

Some of the most important and potentially devastating components of this amendment seek to solve the highly complex issue of student loan defaults in a singly comprehensive and devastating swipe.

The issue of student loan defaults is one which has been debated in the past, in H.R. 4986 a full 2 years ago. Since that time efforts have been made to put controls on the issuance of student loans; nearly 30 changes in the Higher Education Act and Department of Education loan regulations have been made in the past 2 years.

These controls and new regulations have not yet had time to fully take effect or to be studied either by the Department of Education or by the Education and Labor Committee. We need this time to look at the new data and to refocus our efforts before we take action that could drastically effect the ability of thousands of students to attend school and provide the basis to lead a successful life.

Meanwhile, the effects of the Roukema amendment could be devastating:

The Roukema amendment changes the method of "need analysis" which is used to determine eligibility for Federal student financial aid. Not only will this be costly, but it will also take considerable time to rework the necessary regulations, to redraft the forms, to train the personnel, and to recompute all of the financial aid forms. This would effect students this fall, and no one knows how long it might take to put the new regulations into effect—but students who rely on Federal aid to attend school definitely would not be able to do so this fall.

The Roukema amendment's "risk-sharing" provisions would effectively prevent thousands of disadvantaged and low-income students from going to school by discouraging lenders from financing their loans. These are the students who need the most encouragement and assistance to attend school—we should not be impeding their progress.

Approximately 6 million students will be attending approximately 8,000 institutions this fall—and their plans could be ruined by being forced to reapply for Federal student aid.

Access to student loans at one-third of the schools of the United Negro College Fund could be terminated along with loan access for low-income students at 1,000 other institutions such as community colleges, historically black colleges and urban universities.

Finally, the purpose of cutting down on loan defaults is to save the Government money. However, CBO says not only would no money be saved by this amendment, but it would increase student aid costs by $175 million in the first 5 years.

Mr. Chairman, this amendment is misguided and untimely. The motives are sound, the methods are wrong. The Committee on Education and Labor must have time to explore these proposals in depth—not under the 5-minute rule with 400 extra players.

These proposals will be fully addressed in the coming year as we reauthorize the Higher Education Act and revisit all of these programs with current, up-to-date data, and the proper perspective. And without upheaving the lives of possibly millions of students.

I implore my fellow colleagues to defeat this amendment.

Mr. DENNY SMITH. Mr. Speaker, today I rise in support of my esteemed colleague's amendment to combat the student loan default crisis. I feel strongly enough about this issue to have introduced similar legislation, and submit to my colleagues that Congresswoman ROUKEMA's amendment is a good vote for education and worthy of bipartisan support.

President Bush wants to make the United States No. 1 in math and science by the year 2000. This means more and better teachers, and many of these future teachers will depend on guaranteed student loans to help pay their college costs.

But we may not be able to meet their needs because we spend 37 cents out of every dollar appropriated for GSL's financing unpaid student loans.

As my colleagues have previously stated, next year the United States will add another $2 billion to the mountain of defaulted student loans.

Mrs. ROUKEMA's amendment will bring about change now. Not tomorrow and not next year after the American public has swallowed another $2 billion in defaulted loans. Mrs. ROUKEMA has taken the initiative, and I support this amendment for several reasons.

First, this amendment cracks down on both negligent students and proprietary agencies. Students who have declared themselves independent but continue to accept money from their parents cost the taxpayer millions. This amendment will put a halt to this abuse by clearly defining an independent student.

Second, the amendment gives the Secretary more ammunition to combat the abuses of the Student Loan Program committed by proprietary schools.

This legislation, if enacted, is also designed to help students, including veterans. Current congressional methodology categories veterans' benefits as either available income or assets. This process is both confusing and unacceptable. Our veterans deserve more.

Mrs. ROUKEMA's amendment also helps those students trying to save for college by eliminating the double counting of student income. The current formula double counts prior year earnings that are saved for the coming school year, thus eliminating the incentive to save. This amendment changes this system.

The time has come for reform. America cannot afford to lose $2 billion a year in defaulted student loans when $2 billion could give others the chance to go to school. We need to attack this problem, and we need to do it now. Mrs. ROUKEMA's amendment addresses the very heart of this matter and if enacted, will help bring money back into education.

I stand in support of this amendment. Our students deserve more than 63 cents out of every GSL dollar, and I encourage my colleagues to support this amendment and our students.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from New Jersey [Mrs. ROUKEMA].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mrs. ROUKEMA. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 122, noes 264, not voting 46, as follows:

[Roll No. 254]

□ 1247

The Clerk announced the following pairs:

On this vote:

Mr. Stump for, with Mr. Tauzin against.

Mr. Dornan of California for, with Mr. Broomfield against.

Mr. Thomas of Wyoming for, with Mr. Thomas of Califorina against.

Mr. SAWYER and Mr. VOLKMER changed their vote from "aye" to "no."

Mr. BARTLETT changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. It is now in order to consider amendment No. 9 printed in House Report 101-588.

AMENDMENT OFFERED BY MR. PANETTA

Mr. PANETTA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PANETTA: Page 22, after line 19, insert the following:

PART C—ACADEMIC AREAS OF NATIONAL IMPORTANCE

SEC. 331. FINDINGS AND STATEMENT OF PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) students in the United States have demonstrated deficiencies in knowledge of foreign languages; and

(2) the Federal Government has a vested interest in ensuring that all students learn about the diverse cultural heritage of the Nation and the world community so that the Nation's ability to compete in the global marketplace is preserved.

(b) STATEMENT OF RESPONSIBILITY.—It is the responsibility of the Federal Government to—

(1) expand foreign language programs in elementary schools, secondary schools, and institutions of higher education; and

(2) equip students with the necessary language skills for productive employment in the global marketplace.

SEC. 332. AMENDMENTS TO THE FOREIGN LANGUAGE ASSISTANCE ACT OF 1988.

(a) In General.—The Foreign Language Assistance Act of 1988 (as contained in part B of title II of the Elementary and Secondary Education Act of 1965) is amended—

(1) by inserting before section 2103 the following:

"Subpart 1—Grants to States for Improvement and Expansion of Foreign Language Study";

(2) by redesignating sections 2103 and 2104 as sections 2111 and 2112, respectively;

(3) by redesignating section 2105 as section 2103 and moving such section so that it appears following section 2102; and

(4) by adding at the end the following:

"Subpart 2—Teacher Training and Instructional Materials

"SEC. 2121. FOREIGN LANGUAGE INSTITUTES.

"(a) PROGRAM AUTHORIZED.—The Secretary is authorized to provide grants on a matching basis to States, through their State educational agencies, for the establishment and operation of foreign language institutes for the professional development and retraining of elementary and secondary school teachers in the areas of foreign languages, foreign culture, and international studies.

"(b) PROGRAM PARTICIPATIONS.—Programs operated with grants under this section shall—

"(1) provide a preference for elementary teacher development and the retraining of secondary teachers for elementary schools;

"(2) provide preservice elementary and secondary teacher education in the areas of foreign language, foreign culture, and international studies; and

"(3) allow teachers from other fields to retrain as foreign language teachers.

"(c) GRANT LIMITATIONS.—Grants pursuant to this section shall—

"(1) not exceed $3,000 per teacher;

"(2) not exceed 300 teachers per institute; and

"(3) not exceed $200,000 to any institution.

"(d) BYPASS PROVISION.—In any State where the State educational agency does not submit an application, the Secretary may consider applications from the local educational agencies, institutions of higher educations, or a consortia thereof. A consortia of State educational agencies may also apply to provide a regional institute.

"(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $30,000,000 to carry out this section for each of the fiscal years 1991, 1992, and 1993.

"SEC. 2122. DEVELOPMENT OF FOREIGN LANGUAGE AND CULTURE INSTRUCTIONAL MATERIALS.

"(a) GRANTS AUTHORIZED.—The Secretary of Education is authorized to provide grants on a competitive basis to qualified State and local educational agencies, institutions of higher education, private nonprofit foreign language organizations, nonprofit education associations, or a consortia thereof, to act as a resource center for—

"(1) coordinating the development of, and disseminating, foreign language and culture instructional material, including children's literature in foreign languages, videotapes, computer software, and teacher's instructional kits relating to international study; and

"(2) expanding the use of technology in teaching foreign languages and culture at the elementary and secondary school level.

"(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section $5,000,000 for each of the fiscal years 1991, 1992, and 1993.

"SEC. 2123. REGULATIONS.

The Secretary shall prescribe such regulations as may be necessary to carry out this subpart within 90 days after the date of the enactment of this subpart. Such regulations shall establish procedures for the selection of grant recipients for the distribution of funds, and for the evaluation and review of the results of the programs authorized by this subpart.".

(b) CONFORMING AMENDMENT.—Sections 2111 and 2112 of the Foreign Language Assistance Act of 1988 (as redesignated by subsection (a)(2) of this section) are amended by striking the term "part" each place it appears and inserting "subpart".

Mr. PANETTA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. The gentleman from California [Mr. PANETTA] will be recognized for 5 minutes and a Member opposed will be recognized for 5 minutes.

The Chair recognizes the gentleman from California [Mr. PANETTA].

□ 1250

Mr. PANETTA. Mr. Chairman, I yield myself 1½ minutes.

Mr. Chairman, the Education and Labor Committee has developed a strong, comprehensive, bipartisan bill that will indeed help address our educational agenda to meet our future challenges in the global marketplace.

The bill was designed to maintain global leadership, and foreign language competency definitely plays a role in that. There will be many chances to enhance that role as we enter into this new decade of change. The exciting events taking place in Eastern Europe will afford even greater opportunity. Also, the next 2 years will play a critical role as we look toward the merging of the European Economic Community in 1992.

The Panetta-Sangmeister amendment would add an additional provision, called Academic Areas of National Importance, to the Student Achievement title in H.R. 5115 in order to highlight foreign language and international education as important subjects of achievement to ensure this Nation's future economic leadership role.

The amendment adopts two important provisions from both my bill H.R. 2188, the Foreign Language Competence for the Future Act, and Mr. Sangmeister's. bill, H.R. 4144, the Global Elementary Education Act, which collectively have garnered the support of 100 cosponsors. The Foreign Language Assistance Act, as contained in the Elementary and Secondary Education Act which focuses on model programs at the elementary and secondary levels, would be amended to provide matching grants to State education agencies for the creation of foreign language institutes to retrain elementary and secondary teachers in the areas of foreign languages and culture, and international studies. The authorization level is $30 million for fiscal years 1991, 1992, and 1993.

The second provision would provide for grants for the development of foreign language and culture instructional materials by State and local education agencies, private, nonprofit foreign language organizations, institutions of higher education, nonprofit education associations or a consortia, which would then act as a resource center to coordinate and disseminate instructional material. The authorization level is $5 million for fiscal years 1991, 1992, and 1993.

The focus of our efforts is foreign language instruction and materials development at the K-12 levels. Studies have consistently shown that basic language and culture orientation should begin at the elementary school level, yet only 17 percent of public elementary schools offer any form of foreign language instruction, and 33 States report a shortage of foreign language teachers at the elementary and secondary school levels.

There is no Federal support for such programs at these levels currently in existence. Over 48 percent of elementary schools, which do not currently teach foreign languages, are interested in offering them. However, the pool of qualified foreign language teachers has not increased to meet the new demands of educating students to function in a global society.

With four out of five new jobs in the United States being created as a result of foreign trade, the President's Commission on a Foreign Languages and International Studies, the National Governor's Association, and the Council of Chief State School Officers have all recognized and stressed the need for increased training in foreign languages and international studies to enhance our national security and economic competitiveness. The current U.S. trade deficit reflects the inadequate state of American international training and cultural awareness.

In fact, one of the education goals agreed upon by President Bush and the Governors, and incorporated into H.R. 5115, was student achievement and citizenship. This goal includes increasing the percentage of students who are competent in more than one

language, and that all students will be knowledgeable about the diverse cultural heritage of this Nation and about the world community.

We need to make these words and ideas a reality now. The time is now. I urge you to join me in supporting the Panetta-Sangmeister amendment to prepare our children for an increasingly competitive and interdependent world, and to ensure our future economic prosperity.

Mr. Chairman, I yield 1½ minutes to my cosponsor, the gentleman from Illinois [Mr. SANGMEISTER].

Mr. SANGMEISTER. Mr. Chairman, our amendment is a modest one that will authorize $30 million in matching grants to States to set up institutes to retrain elementary and secondary teachers in the areas of foreign languages and cultures, and international studies. It also gives $5 million to competing organizations to coordinate and disseminate foreign language and cultural instructional material, including teacher's kits, children's literature in foreign languages and videotapes.

Why is it important for Americans to learn other languages? Because learning a second language translates into business profits for Americans. Currently, more than 6,000 U.S. firms have at least some of their operations abroad and four out of five new jobs are created as a result of foreign trade. We lose an important advantage when we are forced to rely on the skill and knowledge of others in business transactions and negotiations. More importantly, we send the wrong signal to our trade partners when we can't take the time to learn their language and customs. A Japanese Member of Parliament summed up his frustration when he stated: "I still spend an hour a day studying English. How many Americans speak Japanese? It's a very basic question."

A personnel agency in Los Angeles recently reported it has between 500 to 600 job orders circulating daily for bilinguals. A senior planning coordinator at the firm simply stated: "Bilingual skills translate into higher starting salaries and a better chance to move up rapidly in a company." Learning another language offers the job seeker a host of opportunities in a multitude of areas. An exclusive department store based in Manhattan now employs sales associates who speak Japanese to cater to their new "valued" customers. People who speak Spanish are needed as bank tellers, journalists, hospital workers, hotel managers, and travel agents. International diplomatic organizations, import/export companies, and banks need to fill translator and interpreter spots, and bilingual secretarial positions. The demand for people who speak foreign languages is clearly rising. Unfortunately, the United States is facing a severe shortage of foreign language teachers in 29 States.

Fewer than 17 percent of public elementary schools offer any form of foreign language education. Yet over 48 percent of schools that do not currently teach foreign languages are interested in offering them. Moreover, many State legislatures have recently passed laws mandating foreign language training at the elementary and secondary levels. The Panetta-Sangmeister amendment will help States comply with these mandates and eliminate the shortages by giving States the necessary resources to retrain elementary and secondary teachers in this area.

Mr. PANETTA. Mr. Chairman, I yield 1 minute to the gentleman from Georgia [Mr. DARDEN].

Mr. DARDEN. Mr. Chairman, I rise in support of the amendment and ask unanimous consent to revise and extend my remarks.

In his State of the Union address to Congress this year, President Bush set goals to make the United States the leader in math and science education. I agree with the President's call for excellence in math and science education, and the bill before us incorporates many of the President's proposals to assure overall academic achievement in American schools. But I believe another goal should be added—all U.S. students should be committed to the study of foreign language.

As the political shape of the world changes dramatically, the United States should be prepared for the accompanying new challenges. Now, especially, our progress depends upon our ability to compete effectively in the international arena. To improve our economic position, both domestically and abroad, Americans must learn foreign languages and customs.

We cannot allow citizens of other nations or those with limited American interests to assume responsibility for our economic development. Without a clear sense of international awareness and the ability to express convincingly our democratic goals, our international stature could be diminished.

Like others, I have emphasized competitiveness for a long time. I believe Americans must begin to reach out to the rest of the world, and I consistently have encouraged young people to learn a foreign language. My children both are fluent in Spanish, my daughter in French as well. And, along with many colleagues, I have become a student of Spanish through the Foreign Service Institute—with mixed results.

My experiences, and those of my children, have convinced me that the key to promoting global understanding and effective bilingual education is through the public schools. The earlier children are taught foreign languages and customs, the better able they are to grasp both the fundamental principles of language and the broader implications of cultural differences.

I am submitting for the RECORD a copy of an editorial I wrote for my local newspapers in commemoration of National Foreign Language Week. I received subsequently many positive comments about foreign language education, and many schools in my district have included foreign language courses in their curricula.

However, many of our public schools cannot afford to offer foreign language education, and we must not ask them to sacrifice other equally important academic concentrations to finance the necessary teacher training and materials development for this purpose. The Federal Government's responsibility in public education is to supplement and enhance State and local initiatives. accordingly, the Panetta-Sangmeister proposal to provide grants for teacher training and the dissemination of resource material for foreign language education is particularly appropriate. Tangible assistance will be most effective in encouraging the schools to offer foreign language and culture instruction, and I urge my colleagues to support this important provision.

[From the Washington Update, March 11, 1990]

FOREIGN LANGUAGE EDUCATION AIDS AMERICAN INTERESTS

(By Congressman George (Buddy) Darden)

Few people care that March 4–10 was "National Foreign Language Week." However, most are aware of the sweeping changes taking place all over the world. In just one year, Communist governments in Europe have toppled and totalitarian regimes in Central America are being replaced by elected governments. Our world has changed with a swiftness and intensity unimaginable months ago, and we must be ready to capitalize on these developments. Now, especially, our progress depends upon our ability to compete effectively in the international arena. To improve our economic position both domestically and abroad, Americans must learn foreign languages and customs.

Unfortunately, we have no provided appropriate opportunities for international education for our children. Only one in five American high school graduates takes more than two years of a foreign language, while Japanese school children must take at least six years. Furthermore, recent studies indicate that American students have only a minimal knowledge of geography and international affairs. Twenty-six states report a shortage of foreign language teachers at the elementary or secondary level; as a result, only 17 percent of U.S. public elementary schools are able to offer any type of language instruction.

Partly because of the trade deficit, the issue of economic competitiveness has become increasingly important. With Japanese technology rendering American products obsolete, and with foreign manufacturing increasing its share of the international market, many have called for improvements in our educational system. In his state of the union address, President Bush men-

tioned specifically our gaps in science, math and foreign language education.

I believe any educational improvements must include programs to expand both foreign language skills and international awareness. To remain competitive, American businesses and industries must expand into foreign countries. And foreign markets will only be open to those who understand their needs and can communicate with the business and political leaders who control them.

In my travels to other countries, I have always found many willing and able to speak English to visiting Americans. However, Americans who do not understand the native tongue are necessarily dependent upon those who do. We cannot allow foreigners or those with limited American interests to assume responsibility for our economic development.

As a member of the House Armed Services Committee, I am dedicated to maintaining a strong national defense, and I believe we have been effective in securing American military interests abroad. However, without a clear sense of international awareness and the ability to express convincingly our democratic goals, our international stature could be jeopardized.

Global understanding enriches us all. Children who develop foreign language skills will be able to offer creative solutions to international problems, and they will be better prepared to lead America into strong competition in international markets. My own experiences, and those of my children who also study foreign languages in the Georgia public schools, indicate that foreign language education has significant value. As we reflect on "National Foreign Language Week," I hope that education, business and community leaders will join me in taking this opportunity to encourage our young people to expand their knowledge of foreign languages and cultures.

Mr. PANETTA. Mr. Chairman, I yield 30 seconds to the gentleman from Missouri [Mr. EMERSON].

Mr. EMERSON. Mr. Chairman, I rise in strong support of the Panetta-Sangmeister foreign language amendment to H.R. 5115. As my colleagues are no doubt aware, I am actively involved in an effort to declare English the official language of the Federal Government. I firmly believe that we should maintain a common bond among our many diverse peoples—it is that quality that makes us uniquely American.

Some of you may be surprised to learn that I feel just as strongly about the importance of foreign language education. These two issues complement each other. The central idea is communication. There is no reason why Americans should lack an ability to communicate—either among themselves or with people of other nations, cultures, and traditions. Having mastered the English language, we should encourage our students to broaden their horizons. We should encourage them to explore new cultures and new ideas. National economies are increasingly interdependent, and the ability to communicate is a valuable skill that cannot be underestimated in today's shrinking world.

I am confident that a broader knowledge of foreign languages will do much to boost our Nation's competitiveness. But the results of the Panetta-Sangmeister amendment will also have a profound impact on an individual level. Knowledge of a foreign language can open new and exciting doors for our students. It can provide increased opportunities for travel. It lends itself to a better understanding of the history and cultures of this world we all share. It can encourage respect for and tolerances of the differences among diverse peoples. In fact, Mr. Chairman, the sky's the limit on the benefits that can be gained from improved communication among the nations of the world. For these reasons and others, I stongly urge my colleagues to adopt the Panetta-Sangmeister foreign language amendment. Let us open some doors.

Mr. PANETTA. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas [Mr. GEREN].

Mr. GEREN of Texas. Mr. Chairman, I rise in support of H.R. 5115.

Mr. PANETTA. Mr. Chairman, I yield the remaining 30 seconds to the gentleman from Oregon [Mr. DEFAZIO].

Mr. DEFAZIO. Mr. Chairman, I rise in strong support of this amendment. This is a modest investment in the use of America, in the future international competitiveness of our Nation.

In my district, Eugene School District 4-J is preparing for a Japanese immersion program for the students in the elementary schools, and a program such as this will assist School District 4-J and Oregon and other school districts across the country to move ahead and begin to educate our youth for the competitiveness the United States needs for the 21st century.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. PANETTA].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. SOLOMON

Mr. SOLOMON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SOLOMON: At the end of the bill, add the following new title:

TITLE X—SUSPENSION OF ELIGIBILITY FOR DRUG-RELATED OFFENSES

SEC. 1001. SUSPENSION REQUIREMENTS.

(a) AMENDMENT.—Section 484 of the Higher Education Act of 1965 (20 U.S.C. 1091) is amended by adding at the end thereof the following new subsection:

"(k) SUSPENSION OF ELIGIBILITY FOR DRUG-RELATED OFFENSES.—

"(1) IN GENERAL.—An individual student who has been convicted of any offense under any Federal or State law involving the possession or sale of a controlled substance shall not be eligible to receive any grant, loan, or work assistance under this title during the period beginning on the date of such conviction and ending after the interval specified in the following table:

"If convicted of an offense involving:	Ineligibility period is:
The possession of a controlled substance:	
1st offense	1 year.
2nd offense	2 years.
3rd offense	Indefinite.
The sale of a controlled substance:	
1st offense	2 years.
2nd offense	Indefinite.

"(2) REHABILITATION.—A student whose eligibility has been suspended under paragraph (1) may resume eligibility before the end of the period determined under such paragraph if the student satisfactorily completes a drug rehabilitation program that complies with such criteria as the Secretary shall prescribe for purposes of this paragraph.

"(3) DEFINITIONS.—As used in this subsection, the term 'controlled substance' has the meaning given in section 102(6) of the Controlled Substances Act (21 U.S.C. 802(6)).".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply with respect to financial assistance to cover the costs of attendance for periods of enrollment beginning after the date of enactment of this Act.

Mr. SOLOMON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The gentleman from New York [Mr. SOLOMON] will be recognized for 5 minutes in support of his amendment, and a Member in opposition will be recognized for 5 minutes.

The Chair recognizes the gentleman from New York [Mr. SOLOMON].

Mr. SOLOMON. Mr. Chairman, the academic community is already familiar with the Solomon amendment—a law which conditions Federal higher education assistance with the requirement to register with the selective service.

Today I am offering an amendment which uses the same approach to help solve a much more menacing problem facing our country—the possession and sale of illegal drugs.

The U.S. Supreme Court, in upholding the Solomon amendment, maintained that Federal education benefits are a benefit not a guaranteed right to individuals. If we condition the privilege of receiving Federal education benefits to the responsibility of staying drug-free, it will send a meaningful message to our youth.

Obey the laws of our country by staying away from drugs and reap the benefits of this great country. But, if you disobey our laws—if you become a drug user or pusher—don't expect the American taxpayers to help pay for your college. Suspending Federal education benefits is a way for us to show we are not going to tolerate casual drug use.

Last week the Washington Post carried an article about the just released Rand Corp. study entitled, "Money from crime: a study of the economics of drug dealing in Washington, DC." The study findings, regarding the poor inner-city youth were particularly dismaying. It reported that each succeeding group of inner-city youngsters entering adulthood is becoming more likely to get involved in drug dealing.

Currently, 1 out of every 6 inner-city youths is arrested and charged with drug distribution. Based on the Rand study that means the arrest rate would climb to approximately 1 in 3 over the next 10 years.

The Hurst Times Union, one of the larger newspapers in my congressional district, recently discussed the Rand study in an editorial that stated

More emphasis should be placed on cutting demand especially since so much of the illegal drugs purchased are consumed in suburban communities—that is to say, by white and relatively affluent people. In fact, according to Rand, 78 percent of the D.C. area casual cocaine users live in the suburbs. Obviously, without that market, there would not be the need for anything like the 24,000 D.C. street dealers.

The Rand study confirms without doubt that we must reduce demand. Without a market, no business can survive. It is simple economics, but in this market, it will save lives.

Due to the backlog of drug related cases in our courts, casual drug users face minimal sentencing, if any. My amendment would suspend Federal higher education benefits to individuals who are convicted of drug use or possession. The penalties would vary depending on the type of offense and would be nullified, if the individual successfully completed a rehabilitation program.

Let me again emphasize the fact that this amendment is targeted at the casual drug users. They finance the bulk of the illegal drug trade in our country. They are a large percentage of the drug epidemic. They are one of the biggest reasons why we continue to see drug trafficking in this country and they should be held accountable.

My proposal is not bloated with money or bloated with rhetoric—it is simply an effective way to dramatically reduce the demand for illegal drugs in this country.

□ 1300

Mr. Chairman, I would hope that I would ask unanimous consent to change the effective date from "upon enactment" to the request made by the National Association of School Financial Aid Officers to our own Education Department and Justice Department, to July 1, 1991, and I would make that unanimous consent request.

The CHAIRMAN. Does the gentleman make that as a unanimous consent request?

Mr. SOLOMON. I do, Mr. Chairman.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. WILLIAMS. I object, Mr. Chairman.

The CHAIRMAN. Objection is heard.

Mr. SOLOMON. Mr. Chairman, I would at this time say that it is my intent to change the date in conference to July 1, 1991.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. SOLOMON. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I thank the gentleman for yielding.

I am disappointed that the gentleman did not get his unanimous-consent request. I want to thank him for offering his amendment. As the gentleman is well aware, the drug-free work place language already applies to the universities and forces them to have a policy in place. They have been the most uncooperative places in the country, other than the U.S. Congress, in implementing the drug-free work place.

The universities in many cases have flatly said they do not intend to obey the law. In other cases they say they intend to have the language which is necessary under the bill but they have no intention whatsoever of enforcing the provisions. They have make it quite clear that they have no intention of having their students have to pay any penalties under the drug-free work place law.

I find that disturbing, particularly since we now have a Smith-Kline study within the last couple of weeks which indicates that those bsuinesses that have put into place drug-free work place policies have seen a dramatic decrease in the amount of drugs that are being used in the workplace. So it is having a positive impact across the country. Yet the universities refuse to comply.

Mr. Chairman, I thank the gentleman for his amendment. I think it will assure university compliance to a greater extent.

Mr. SOLOMON. Mr. Chairman, I certainly thank the gentleman from Pennsylvania for his remarks.

The CHAIRMAN. A Member opposed to the amendment will be recognized for 5 minutes. Is the gentleman from Montana [Mr. WILLIAMS] opposed?

Mr. WILLIAMS. I am, Mr. Chairman.

The CHAIRMAN. The gentleman from Montana [Mr. WILLIAMS] is recognized for 5 minutes.

Mr. WILLIAMS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the question here, of course, is not whether we are all opposed to the serious as well as the casual drug use which is visiting hardship and terror on the United States. We are. The question is, what is the most effective means by which we can combat this scourge?

The gentleman is sincere. He believes he has the most effective means. I believe that the current law is the most effective means, and that current law says that a student may be denied eligibility for any student financial aid, but at the discretion of the court, to be decided on a case-by-case basis.

Let me read to my colleagues the warning that is on the current student aid report. It says this:

Warning: As set out more fully under section 5301 of the Anti-Drug Abuse Act of 1988, if you are convicted of drug distribution or possession, the court may suspend your eligibility for title IV financial aid. If you are convicted 3 or more times for drug distribution you may become permanently ineligible to receive title IV financial aid.

We now allow the courts in their discretion on a case-by-case basis dealing with individual students to decide whether to add this punishment also along with the punishment that the student receives.

The gentleman from New York [Mr. SOLOMON] would have this Congress simply establish by statute that anyone convicted of possession or drug use, no matter how casual, shall lose their right to student financial aid. So we would in effect place a cul-de-sac on the educational opportunity road for anyone so convicted.

This means that poor students or poor people who have been convicted and are jailed as the result of a drug offense, because they are poor, and, therefore, eligible for student financial aid, shall not receive.

The gentleman does have one part of his amendment which mitigates it considerably, and I want to commend him for that. That is that he adds: "Until they finish a drug rehabilitation program." That is the good part of his amendment. I think with the addition of that, he will find that most Members of the House, as they have in the past and probably will again today, will accept his amendment.

But I ask the gentleman to just consider this: This statute would apply to everyone, giving the courts no discretion, and this statute would say that a person having been convicted who has not yet completed a rehabilitation program and finds school is beginning and wants to apply for student aid lest they lose the opportunity for that year will be denied it, blindly denied it because they are still there and have not yet finished the drug rehabilitation program.

Mr. KOSTMAYER. Mr. Chairman, will the gentleman yield? Will the gentleman yield in order that I may ask a question of the gentleman from New York?

Mr. WILLIAMS. Yes, I yield to the gentleman from Pennsylvania.

Mr. KOSTMAYER. Mr. Chairman, is the gentleman from New York right? Is this this existing law, and do the courts have the right to do this already and the gentleman would mandate or require that they do it?

Mr. SOLOMON. Mr. Chairman, if the gentleman from Montana will yield, let me say that the gentleman is partially right. The U.S. Department of Justice, the Office of Justice Programs, has such a program in effect. There has not been one court that has denied one student any aid due to drug possession or sale as yet. The Justice Department now has its program in effect. They are able to accumulate this information, and that is why it will work. That is why they support it. That is why the education department supports it, and that is why, if I had had the time, I would have read a letter from the National Association of Student Financial Aid Office, which has worked all the problems.

Mr. KOSTMAYER. Mr. Chairman, if the gentleman will yield further and if I might ask my friend one further question, is the gentleman from Montana correct in his assertion that a youngster can now be denied Federal higher college assistance if arrested for drug use? Is that the current law?

Mr. SOLOMON. It is not right now. That is not the law. We need to codify that into law to make that the situation. For a student who is in the midst of a 3 or 4 month rehabilitation program, that falls within that purview. He would not be denied the next college loan grant that would be coming up. That is why I wanted to make July 1, 1990 the effective date, and each year thereafter, but unfortunately I was denied that opportunity when I made my unanimous-consent request.

Mr. KOSTMAYER. Mr. Chairman, if the gentleman will yield further, I would like to ask my friend, the gentleman from New York, a second question. That question is whether or not a controlled substance includes marijuana.

Mr. SOLOMON. No, it does not.

Mr. KOSTMAYER. Mr. Chairman, I thank the gentleman.

Mr. WILLIAMS. Mr. Chairman, reclaiming my time, I just want to make a point to the gentleman who asked the question, as well as to the Members of the House, and state that it is the law now because we passed it in the Anti-Drug Abuse Act of 1988. It has in fact taken a while for the department to come up to speed on it. It has taken a while for all the courts, of course, to understand that they have this authority. But it is the law. They do have the authority, and I think that works better on a case-by-case basis than blindly requiring this in all cases.

Mr. RANGEL. Mr. Chairman. I wish to offer my support for H.R. 5115, the Equity and Excellence in Education Act of 1990, as it is now constituted. This is exactly the kind of important legislation that is needed to lift our education system out of the mire in which it has been stuck for so long, to be able to hold our heads high, to stand proudly among nations and once again proclaim that our youth, indeed, our people are among the most literate, best educated in the world.

This comprehensive package reaches out to all segments of our society, providing incentives to many who have been shortchanged, educationally, in the past. It returns the teaching profession to its rightful place as a cornerstone of our society as it provides incentives for our best and brightest to pursue and dedicate themselves to this most honorable profession.

It opens up the teacher recruitment process by providing for nontraditional routes to teacher licensure. It accomplishes this by supporting the development and implementation of programs which assist talented professionals who work in subject areas outside of the education profession and who wish to pursue careers in education, meet State licensing requirements.

Dropout prevention, adult literacy, awards for achievement and citizenship, it's all there. The bill encourages a return to greater substance in the content of the subject matter that is taught with authorizations for the "We the People * * * The Citizen and the Constitution" program. It encourages expansion of the Dwight D. Eisenhower Mathematics and Science Act and authorizes scholarships for excellence and outstanding academic achievement in mathematics, science, and engineering.

Of course, I do not wish to forget the safe, disciplined, and drug free schools provisions which calls for the expansion of the Drug Free Schools and Communities Act to ensure that all students receive drug abuse prevention and counseling services by the year 1993. This is in line with the goal established by the President that, by the year 2000, every school in America will be drug and violence free and will offer a disciplined environment conducive to learning.

This bill is what is needed to give hope and a chance for a productive future to every last one of the citizens of this great Nation.

I must, however, speak out against the amendment to be offered by Mr. SOLOMON, which would suspend eligibility for student loans and other Federal educational assistance under the Higher Education Act for those who have been convicted of drug related crimes.

Two years ago, as part of the Anti-Drug Abuse Act of 1988, Congress passed a comprehensive user accountability statute denying a broad range of Federal benefits including student loans and other student assistance programs, to persons convicted of State or Federal drug crimes. I questioned the wisdom of those provisions at the time because of the potential, indeed the likelihood, that the harshest impact of these user sanctions would be felt, not by drug traffickers or middle class casual users, but by the most disadvantaged of our citizens—minorities, the poor, the young, the addicted. To deny them help through Federal programs such as student loans would be to deny them the best—and, perhaps, their only—chance to escape the vicious cycle of poverty, despair, and drugs and become productive, drug-free members of society.

Fortunately, the final version of the 1988 law rejected the mandatory denial of Federal benefits passed by the House and gave the courts discretion to impose these, or other sanctions, on drug users.

The amendments we passed in 1988 did not go into effect until this fiscal year, which began last October. Now, before we have any evidence of their effectiveness, the amendment offered by the gentleman from New York would establish a different set of rules for one class of Federal benefits—student aid programs. Regrettably, the amendment would eliminate, entirely, judicial discretion to determine whether denial of student aid is an appropriate sanction in a particular case.

Mr. Chairman, drug users should be held accountable. They must be given the message that drug use is unacceptable. If user sanctions can help, the legislation we passed in 1988 is more than adequate to do the job. This amendment, however, is not the way. It is just piling on. This kind of sanction will only have a chilling effect on an otherwise exemplary piece of legislation, and will certainly limit the good it was designed to accomplish.

I, therefore, urge rejection of this amendment.

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from New York.

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 315, noes 59, not voting 58, as follows:

[Roll No. 255]

□ 1330

Messrs. SABO, PEASE, MOODY, and TOWNS changed their vote from "aye" to "no."

Messrs. NEAL of Massachusetts, SCHUMER, SMITH of Florida, HERTEL, BEILENSON, CARDIN, DICKINSON, SIKORSKI, and KENNEDY changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

□ 1330

The CHAIRMAN. It is now in order to consider amendment No. 11 printed in House Report 110-558.

AMENDMENT OFFERED BY MR. MACHTLEY

Mr. MACHTLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MACHTLEY: Page 121, after line 15, insert the following new section:

SEC. 805. STUDENT MENTOR PILOT PROGRAM.

Part C of title IV of the Higher Education Act of 1965 is amended by adding at the end thereof the following new section:

"STUDENT MENTOR PILOT PROGRAM

"SEC. 448. (a) PURPOSE.—The purpose of this section is to establish a pilot program to test the feasibility of using work-study funds to provide incentives to eligible students at institutions of higher education to encourage those students to engage in mentor activities for the benefit of disadvantaged youths who are at risk of dropping out of elementary or secondary school.

"(b) PROGRAM AUTHORIZED; AGREEMENTS.—The Secretary is authorized to designate not less than 10 or more than 100 institutions of higher education that may use a portion of their allocations under this part to establish a program under this section. Each such institution shall enter into an agreement with the Secretary for purposes of this section. Such agreement shall—

"(1) contain or be accompanied by such information and assurances as the Secretary may require by regulation;

"(2) specify the methods and rates of compensation of the mentors, which may include incentive bonuses based on the satisfactory academic progress of the eligible youth;

"(3) describe the methods—

"(A) to be used by the institution of higher education to identify and select suitable students to serve as mentors;

"(B) to be used by elementary and secondary schools to identify and select eligible youth;

"(4) provide that the eligible youth, his or her teacher, and the mentor shall enter into an agreement—

"(A) which provide attainable goals for the eligible youth to pursue with the advice and assistance of the mentor; and

"(B) which identifies the stages at which progress toward such goals will be evaluated.

"(c) USE OF FUNDS.—An institution with which the Secretary has an agreement under subsection (b) may use funds provided under this part to pay students to engage in activities as a mentor for an eligible youth for the purpose of—

"(1) tutoring the youth in subjects in which the youth is experiencing difficulty;

"(2) supporting the youth educational and recreational on activities;

"(3) counseling the youth on career, ethical, and social choices;

"(4) otherwise encouraging the youth to stay in school, to develop his or her aptitudes, and to follow the mentor student into a successful college and adult career; and

"(5) developing in the student a better self-awareness and a self-motivated desire to academically excel.

"(d) APPLICABILITY OF GENERAL PROVISIONS.—Funds provided under this section to a mentor student shall be subject to all the conditions and requirements of this part, except that funds provided under this section may, notwithstanding part F of this title, be counted as part of a student's expected family contribution and not be counted as student assistance in the computation of need for other student assistance under this title.

"(e) EVALUATION AND REPORTS.—Not later than 3 years after the enactment of this section, the Secretary shall submit to the Congress a report evaluating the program under this section. Such report shall include such recommendations as the Secretary considers appropriate concerning such program, and may include proposals for legislative changes.

"(f) DEFINITIONS.—The term 'eligible youth' means an individual who is—

"(1) aged 5 to 18, inclusive;

"(2) enrolled but failing to maintain satisfactory progress in an elementary or secondary school, as determined under the standards of that school;

"(3) determined by a teacher or other qualified staff of that school to be likely to benefit from participation in the program under this section.".

Mr. MACHTLEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

Mr. MACHTLEY. Mr. Chairman, as we all know, our educational system is, quite frankly, facing some very serious challenges.

I want to commend the chairman of the committee and the other committee members for the work that they are doing to meet those challenges.

In many areas in our country, youngsters are dropping out of school

at an alarming rate while at the same time we find that the cost of higher education is shockingly inaccessible for many people.

My amendment addresses these problems. It pairs a college student, an advantaged student who has the opportunity to go to college, with a disadvantaged student, someone whose school has determined that they are at risk and will probably drop out of school; the older student will serve as a mentor. The older student will, through a living example, show the younger student how to stay in school and how to succeed in their academics.

This amendment allows the college mentor to receive work-study funds through their college to work in their community. It authorizes the Secretary of Education to develop a pilot program to follow the results of this and to use a portion of existing work-study funds to fund the college student. This provision, I believe, focuses attention on the benefits of national and community service.

We all recognize the need to have community service. We also recognize the need to have a literate and educated population.

Working through an existing program, I believe this amendment will help our students. Unfortunately, too many of our youngsters are slipping through the cracks.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. MACHTLEY. I am happy to yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, I would like to commend the gentleman from Rhode Island on this amendment of his. It is an excellent amendment, and we, on this side, are willing to accept it.

Mr. GOODLING. Mr. Chairman, will the gentleman yield?

Mr. MACHTLEY. I am happy to yield to the gentleman from Pennsylvania.

Mr. GOODLING. Mr. Chairman, of course, we on this side think it is an excellent amendment and are happy to accept it.

Mr. MACHTLEY. Mr. Chairman, I thank the gentleman.

I will just close by saying that I think that this amendment recognizes two important issues; first, that we can help the dropout rate which is 31 percent in most schools and, second, we must instill in our college students the fact that it is important that they help those who are less fortunate.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Rhode Island [Mr. MACHTLEY].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ROE

Mr. ROE. Mr. Chairman, I offer an amendment.

Mr. CHAIRMAN. Is the gentleman from New Jersey [Mr. ROE] the designee of the gentleman from North Carolina [Mr. VALENTINE]?

Mr. ROE. I am, Mr. Chairman.

The Clerk read as follows:

Amendment offered by Mr. ROE: Page 24, strike out line 15 and all that follows through line 16 on page 32 and insert the following:

"SUBPART 7—NATIONAL SCIENCE SCHOLARS PROGRAM

"PURPOSE; APPROPRIATIONS AUTHORIZED

"SEC. 419L. (a) PURPOSE.—It is the purpose of this subpart—

"(1) to establish a National Science Scholars Program to recognize student excellence and achievement in the physical, life, and computer sciences, mathematics, and engineering;

"(2) to provide financial assistance to students under paragraph (1) to continue their postsecondary education in such fields of study at sustained high levels of performance;

"(3) to contribute to strengthening the leadership of the United States in these fields;

"(4) to strengthen the United States science, mathematics, and engineering base by offering opportunities to pursue postsecondary education in life, physical, and computer sciences, mathematics, and engineering;

"(5) to encourage role models in scientific, mathematics, and engineering fields for young people;

"(6) to strengthen the United States scientific, mathematics, and engineering potential by encouraging equal participation of women with men in scientific, mathematics, and engineering fields; and

"(7) to attract talented students to teaching careers in science and mathematics in elementary and secondary schools.

"(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Department of Education $4,350,000 for fiscal year 1991 for awards to National Science Scholars.

"SCHOLARSHIPS AUTHORIZED

"SEC. 419M. (a) PROGRAM AUTHORITY.—The Secretary is authorized, in accordance with the provisions of this subpart, to carry out a program of awarding scholarships to students for the study of the physical, life, or computer sciences, mathematics, or engineering, and who—

"(1) are selected by the President;

"(2) have demonstrated outstanding academic achievement in the physical, life, or computer sciences, mathematics or engineering; and

"(3) show promise of continued outstanding academic performance in such field of study.

"(b) PERIOD OF AWARDS.—

"(1) PERIOD OF INITIAL AWARD.—A student who satisfies the requirements of section 419O(a) may receive a scholarship, for a period of 1 academic year, for the first year of undergraduate study at an institution of higher education.

"(2) CONTINUATION AWARDS.—A student who satisfies the requirements of section 419O(b) may receive additional scholarships, each awarded for a period of 1 academic year, in order to complete his or her undergraduate course of study. A student may receive additional scholarships for up to 3 academic years of undergraduate study, except that, in the case of a student who is enrolled in an undergraduate course of study that requires attendance for 5 academic years, the student may receive additional scholarships for up to 4 academic years of undergraduate study.

"(c) USE AT ANY INSTITUTION PERMITTED.—A student awarded a scholarship under this subpart may attend any institution of higher education, as defined in section 1201(a) of the Act.

"(d) NATIONAL SCIENCE SCHOLARS.—Students awarded scholarships under this section shall be known as 'National Science Scholars'.

"SELECTION OF SCHOLARS

"SEC. 419N. (a) SELECTION CRITERIA FOR INITIAL AWARDS.—

"(1) SELECTION CRITERIA.—The Director of the National Science Foundation shall develop and submit to the Secretary criteria to be used in the selection of National Science Scholars for initial year awards under section 419M(b)(1). Such criteria shall provide for the selection of such scholars on the basis of potential to successfully complete a postsecondary program in the physical, life, or computer sciences, mathematics, or engineering, and on the basis of motivation to pursue a career in such fields. In addition, consideration may be given to the financial need of the individual, and to promoting participation by minorities and individuals with disabilities. The Director shall determine the criteria for measuring the potential and motivation of nominees.

"(2) PUBLICATION.—The Secretary shall review the Director's recommendations and, after consultation with the Director, publish appropriate selection criteria in the Federal Register.

"(b) SELECTION PROCESS FOR INITIAL AWARDS.—

"(1) NOMINATING COMMITTEE.—Each State desiring to qualify its students for selection as a National Science Scholar shall establish a nominating committee. Such committee shall be appointed by the chief State elected official, acting in conjunction with the State educational agency, or by an existing grant agency or panel designated by such official, and shall be approved by the Secretary. The nominating committee shall be a broad-based committee composed of educators, scientists, mathematicians, and engineers, who shall serve as volunteers without compensation.

"(2) NOMINATIONS.—The nominating committee in each State shall submit to the President the nominations of at least two individuals from each congressional district in the State, at least one of whom is female. Such selections shall be ranked in order of priority.

"(3) SELECTION.—The President, after consultation with the Secretary and the Director of the National Science Foundation, shall select two National Science Scholars for each academic year from each congressional district, at least one of whom shall be female.

"(4) CONGRESSIONAL NOTIFICATION.—The Secretary shall notify each Member of Congress of selections made from such Member's district before public announcement of such selections is made.

"(c) CONTINUATION AWARDS.—The Secretary shall award additional scholarships under section 419M(b)(2) to recipients of initial awards under section 419M(b)(1) who the Secretary determines meet the requirements of section 419O(b).

"(d) DISBURSAL OF SCHOLARSHIP PROCEEDS.—Scholarship proceeds shall be disbursed on behalf of students who receive

scholarships under this subpart to the institutions of higher education at which the students are enrolled. No scholarship proceeds shall be disbursed on behalf of a student until the student is enrolled at an institution of higher education.

"ELIGIBILITY OF SCHOLARS

"SEC. 419O. (a) REQUIREMENTS FOR INITIAL AWARD.—To be eligible to receive a scholarship under section 419M(b)(1), a student shall—

"(1) be scheduled to graduate from a public or private secondary school, or to obtain the equivalent of a certificate of graduation (as recognized by the State in which the student resides), during the school year in which the award is made, or be scheduled to so graduate or obtain such equivalent within three months after the date of the award;

"(2) have demonstrated outstanding academic achievement in secondary school in physical, life, or computer sciences, mathematics, or engineering;

"(3) have been accepted for enrollment at an institution of higher education as a full-time undergraduate student (as determined by the institution); and

"(4) have declared a major in 1 of the physical, life, or computer sciences, mathematics, or engineering, or provided a written statement to the State of his or her intent to major in 1 of these fields of study, if it is the policy of the institution at which the student has been accepted for enrollment that students not declare a major until a later point in their course of study.

"(b) REQUIREMENTS FOR CONTINUATION AWARDS.—A student who has received a scholarship under section 419M(b)(1) may receive a scholarship for a subsequent academic year of undergraduate education under section 419M(b)(2) if the student—

"(1) maintains a superior level of academic achievement, as determined in accordance with the regulations of the Secretary;

"(2) continues to major in, or provides a statement to the State as described in subsection (a)(4) of his or her continuing intent to major in, one of the physical, life, or computer sciences, mathematics, or engineering; and

"(3) continues to be enrolled at an institution of higher education as a full-time undergraduate student (as determined by the institution).

"(c) WAIVER OF FULL-TIME ATTENDANCE REQUIREMENT.—The Secretary may waive the full-time attendance requirements in this section in unusual circumstances.

"(d) FAILURE TO MEET ELIGIBILITY REQUIREMENTS.—In the event that the student fails to meet the requirements of this section, the student's eligibility to receive further scholarships (or scholarship proceeds) under this subpart shall be suspended in accordance with the regulations of the Secretary.

"(e) REINSTATEMENT OF ELIGIBILITY.—The Secretary shall determine circumstances under which eligibility of a scholarship recipient under this Act could be reinstated if the recipient seeks to reenter school after an interruption of schooling for personal reasons, including, but not limited to, pregnancy, child-rearing, and other family responsibilities.

"(f) NOTIFICATION OF SECONDARY SCHOOLS.—The Secretary shall notify all public and private secondary schools in the United States annually of the availability of scholarships under this Act.

"SCHOLARSHIP AMOUNT

"SEC. 419P. (a) AMOUNT OF AWARD.—Except as provided in subsections (b) and (c), the amount of a scholarship awarded under this subpart for any academic year shall be $5,000.

"(b) RELATION TO COST OF ATTENDANCE.—Notwithstanding subsection (a), the amount of a scholarship awarded under this subpart shall be reduced by the amount that the scholarship exceeds the student's cost of attendance, as defined in section 472 of this Act. A scholarship awarded under this subpart shall not be reduced on the basis of the student's receipt of other forms of Federal student financial assistance, but shall be taken into account in determining the eligibility of the student for those other forms of Federal student financial assistance.

"(c) ADJUSTMENTS FOR INSUFFICIENT APPROPRIATIONS.—In the event that funds available in a fiscal year are insufficient to fully fund all awards under this subpart, the amount paid to each student shall be reduced proportionately.

"SUMMER EMPLOYMENT OPPORTUNITIES FOR SCHOLARS

"SEC. 419Q. (a) PRIORITY FOR SUMMER EMPLOYMENT.—To the extent that they are otherwise qualified, students receiving scholarships under this part shall be given priority consideration for federally financed summer employment in federally funded research and development centers, that, to the maximum extent practicable, complements and reinforces the educational program of these students.

"(b) FEDERAL AGENCY COOPERATION.—Federal agencies shall cooperate fully with the Secretary and participate actively in providing appropriate summer employment opportunities for such students.".

(b) CONFORMING AMENDMENTS.—

(1) Section 401(b) of the Higher Education Act of 1965 is amended by striking out "subparts 1 through 8," and inserting in lieu thereof "subparts 1 through 9,".

(2) Section 481(a)(1) of such Act is amended by striking out "except subpart 6" and inserting in lieu thereof "except subparts 6 and 7".

(3) Section 483(f) of such Act is amended by striking out "subparts 4, 5, and 7" each place it appears and inserting in lieu thereof "subparts 4, 5, and 8".

(c) EFFECTIVE DATE.—The amendments made by this section shall be effective on July 1, 1991.

SEC. 403. SCIENCE CAREER SCHOLARSHIPS.

(a) PROGRAM AUTHORIZED.—There is established a scholarship program for students in a baccalaureate degree program in physical, life, or computer science, mathematics, or engineering who are willing to commit themselves to—

(1) teaching elementary or secondary school science or mathematics; or

(2) service described in subsection (m)(2).

(b) PERIOD OF AWARDS.—

(1) PERIOD OF INITIAL AWARD.—A student who satisfies the requirements of subsection (g)(1) may receive a scholarship, for a period of 1 academic year of undergraduate study at an institution of higher education.

(2) CONTINUATION AWARDS.—

(A) FIRST CONTINUATION AWARD.—A student who satisfies the requirements of subsection (g)(2) may receive an additional scholarship, awarded for a period of 1 academic year, in order to complete his or her undergraduate course of study.

(B) SECOND CONTINUATION AWARD.—An additional period of scholarship support, not to exceed 1 year, shall be available to recipients of scholarships under subsection (a)(1) who have completed requirements for the baccalaureate degree but require additional education courses in order to obtain certification to teach.

(c) USE AT ANY INSTITUTION PERMITTED.—A student awarded a scholarship under this section may attend any institution of higher education.

(d) DESIGNATION.—The individuals awarded scholarships under subsection (a)(1) shall be referred to as the "Robert Noyce Mathematics and Science Teacher Corps".

(e) SELECTION.—

(1) SELECTION PROCESS FOR INITIAL AWARDS.—

(A) SELECTION CRITERIA.—The Director shall develop and submit to the Secretary application procedures and criteria to be used in the selection of nominees under this section. Such criteria shall provide for the selection of such nominees on the basis of academic merit and demonstrated accomplishment in physical, life, or computer science, mathematics, or engineering, and on the basis of motivation to pursue a career in science, mathematics, or engineering. In addition, consideration may be given to the financial need of the individual, and to promoting participation by minorities and individuals with disabilities.

(B) PUBLICATION.—The Secretary shall review the Director's recommendations and, after consultation with the Director, publish appropriate application procedures and selection criteria in the Federal Register.

(C) MERIT REVIEW PANEL.—Award recipients shall be nominated from among applicants by a merit review panel composed of 8 individuals, 4 of whom shall be appointed by the Director and 4 of whom shall be appointed by the Secretary. Members of the panel shall not be employees of the United States and shall serve as volunteers without compensation. Nominees shall be selected on the basis of selection criteria, which shall be developed and established in accordance with subparagraph (A). The panel shall rank the nominees in order of priority.

(D) AWARDING OF SCHOLARSHIPS.—The panel shall submit its nominees to the President, who shall, after consultation with the Director and the Secretary, award not more than 500 scholarships under subsection (a)(1) and, with any remaining funds, not more than 500 scholarships under subsection (a)(2).

(2) CONTINUATION AWARDS.—The Secretary shall award additional scholarships to recipients of initial awards under this section who the Secretary determines meet the requirements of subsection (g)(2) or (b)(2)(B).

(f) DISBURSAL OF SCHOLARSHIP PROCEEDS.—Scholarship proceeds shall be disbursed on behalf of students who receive scholarships under this section to the institutions of higher education at which the students are enrolled. No scholarship proceeds shall be disbursed on behalf of a student unless the student is enrolled at an institution of higher education.

(g) ELIGIBILITY.—

(1) INITIAL ELIGIBILITY.—Only individuals who are—

(A) citizens or nationals of the United States, or who are aliens lawfully admitted to the United States for permanent residence;

(B) majoring in the physical, life, or computer sciences, mathematics, or engineering;

(C) in the last 2 years of a baccalaureate degree program; and

(D) enrolled in an institution of higher education,

shall be eligible for awards under this section.

(2) REQUIREMENTS FOR FIRST CONTINUATION AWARDS.—A student who has received a scholarship under this section may receive a first continuation award under subsection (b)(2)(A) for a subsequent academic year of undergraduate education if the student—

(A) maintains a superior level of academic achievement, as determined in accordance with the regulations of the Secretary;

(B) continues to major in one of the physical, life, or computer sciences, mathematics, or engineering; and

(C) continues to be enrolled at an institution of higher education as a full-time undergraduate student (as determined by the institution).

(h) WAIVER OF FULL-TIME ATTENDANCE REQUIREMENT.—The Secretary may waive the full-time attendance requirements in this section in unusual circumstances.

(i) FAILURE TO MEET ELIGIBILITY REQUIREMENTS.—In the event that the student fails to meet the requirements of this section, the student's eligibility to receive further scholarships (or scholarship proceeds) under this section shall be suspended in accordance with the regulations of the Secretary.

(j) REINSTATEMENT OF ELIGIBILITY.—The Secretary shall determine circumstances under which eligibility of a scholarship recipient under this section could be reinstated if the recipient seeks to reenter school after an interruption of schooling for personal reasons, including, but not limited to, pregnancy, child-rearing, and other family responsibilities.

(k) NOTIFICATION OF SCHOOLS.—The Secretary shall notify all institutions of higher education in the United States annually of the availability of scholarships under this section.

(l) SCHOLARSHIP AMOUNT.—

(1) AMOUNT OF AWARD.—Except as provided in paragraph (2), the amount of a scholarship awarded under this section for any academic year shall be $5,000.

(2) RELATION TO COST OF ATTENDANCE.—Notwithstanding paragraph (1), the amount of a scholarship awarded under this section shall be reduced by the amount that the scholarship exceeds the student's cost of attendance, as defined in section 472 of the Higher Education Act of 1965. A scholarship awarded under this section shall not be reduced on the basis of the student's receipt of other forms of Federal student financial assistance, but shall be taken into account in determining the eligibility of the student for those other forms of Federal student financial assistance.

(m) SERVICE REQUIREMENT.—

(1) TEACHING SCHOLARSHIPS.—(A) Each recipient of an award under subsection (a)(1) shall, as a condition of the receipt of such award, agree to complete, within 6 years after graduation from the baccalaureate degree program for which the award was made or within 6 years after completion of the additional period of scholarship support, if applicable, at least 2 years of service as an elementary or secondary science or mathematics teacher for each year of scholarship support under this section, except that such requirement shall not exceed a total of 4 years. Service required under this paragraph shall be performed at a school receiving assistance under chapter 1 of title I of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2701 et seq.).

(B) As part of the agreement required under subparagraph (A), each recipient shall agree, in the event of failure to complete the service obligation described in subparagraph (A), to repay an amount equal to—

(i) the total amount of awards received by such individual under this section; plus

(ii) the interest on such amounts which would be payable if at the time the amounts were received they were loans bearing interest at the maximum legal prevailing rate, as determined by the Treasurer of the United States,

except that such payment shall be reduced, for each year of service that the individual has successfully completed, by a fraction equal to 1 divided by the number of years of service the student is obligated to perform. Such repayment shall be made within 1 year after the recipient has ceased to perform the service obligation described in subparagraph (A).

(2) CAREER OPTION SCHOLARSHIPS.—(A) Each recipient of an award under subsection (a)(2) shall, as a condition of the receipt of such award, agree to complete—

(i) two years of—

(I) service in a physical, life, or computer science, mathematics, or engineering related capacity in the employ of the United States or any corporation or other entity, organized under the laws of the United States or of a State of the United States, at least 50 percent of which is owned by United States nationals, and which is engaged in scientific or engineering research or endeavor;

(II) postgraduate education in physical, life, or computer science, mathematics, or engineering at an institution of higher education; or

(III) a combination of service and education described under subclauses (I) and (II); or

(ii) a postgraduate degree program in physical, life, or computer science, mathematics, or engineering at an institution of higher education.

(B) As part of the agreement required under subparagraph (A), each recipient shall agree, in the event of failure to complete the service obligation described in subparagraph (A), to repay an amount equal to—

(i) the total amount of awards received by such individual under this section; plus

(ii) the interest on such amounts which would be payable if at the time the amounts were received they were loans bearing interest at the maximum legal prevailing rate, as determined by the Treasurer of the United States.

Such repayment shall be made within 1 year after the recipient has ceased to perform the service obligation described in subparagraph (A).

(3) EXCEPTIONS.—The Secretary may provide for the partial or total waiver or suspension of any service obligation or payment by an individual under this section in the same manner as is permitted under section 558 of the Higher Education Act of 1965 with respect to scholarships under subpart 1 of part D of title V of the Higher Education Act of 1965, except that pregnancy, child-rearing, or comparable family responsibilities shall also be grounds for deferral.

(n) DEFINITIONS.—For purposes of this section—

(1) the term "Director" means the Director of the National Science Foundation;

(2) the term "institution of higher education" has the meaning given such term in section 1201(a) of the Higher Education Act of 1965; and

(3) the term "Secretary" means the Secretary of Education.

(o) AUTHORIZATION OF APPROPRIATIONS.—In addition to any other amounts authorized to be appropriated, there are authorized to be appropriated to the National Science Foundation, for transfer to the Secretary for carrying out this section—

(1) $5,000,000 for fiscal year 1991;

(2) $10,000,000 for fiscal year 1992; and

(3) $12,500,000 for fiscal year 1993.

SEC. 404. EFFECT OF CERTAIN CONTROLLED SUBSTANCE AND FELONY CONVICTIONS.

(a) GENERAL RULE.—Except as provided in subsection (b), or by a court under the authority of section 5301 of the Anti-Drug Abuse Act of 1988 (102 Stat. 4310), if any person is convicted under Federal or State law of the illegal use, possession, or distribution of a controlled substance (as such term is defined in the Controlled Substances Act), or of any crime which is a felony under Federal law or for an act which, if committed in a Federal jurisdiction, would be a felony under Federal law, and such crime was committed during a period with respect to which such person has received an award under this title or the amendments made by this title, such person shall not be eligible to receive any further such awards, and shall be liable to the United States for the repayment, within 1 year after such conviction, of all amounts received pursuant to such awards, plus the interest on such amounts which would be payable if at the time the amounts were received they were loans bearing interest at the maximum legal prevailing rate, as of the time of such conviction, as determined by the Treasurer of the United States.

(b) EXEMPTION.—A person subject to the provisions of subsection (a) may be exempted from those provisions in whole or in part if—

(1) that person, within 90 days of a conviction described in subsection (a), petitions the Secretary of Education for a good cause exemption from subsection (a); and

(2) the Secretary of Education approves the petition.

SEC. 405. REPORT.

The National Science Foundation shall prepare and submit to the Congress no later than 1 year after the date of enactment of this Act a report examining current efforts to improve the quality of elementary and secondary mathematics and science education and career potential for the underprivileged through joint efforts of business, school districts, and institutions of higher education, and recommending ways the Federal Government could encourage such efforts. The report shall include, to the extent possible, a comprehensive list of existing efforts, an assessment of what factors have made some such efforts more successful than others, and a review of the extent to which such efforts have drawn on Federal programs.

Mr. ROE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. ROE. Mr. Chairman, I have an amendment at the desk and ask for its immediate consideration. I offer the

amendment on behalf of myself; Mr. VALENTINE, the chairman of the Subcommittee on Science, Research and Technology; Mr. WALKER, the ranking Republican member of the Committee on Science, Space, and Technology; and Mr. BOEHLERT, the ranking Republican member of the subcommittee. I also want to acknowledge the contribution and interest of Mr. LEVINE in the portion of the amendment dealing with scholarships for teachers.

Mr. Chairman, the Committee on Science, Space, and Technology has worked closely with the Committee on Education and Labor to produce a jointly agreed to amendment to title IV of H.R. 5115, the Equity and Excellence in Education Act of 1990. The amendment will establish scholarship programs for undergraduate students pursuing degrees in science, mathematics, and engineering.

Because of the excellent cooperation of Chairman HAWKINS and his entire committee, we have been able to exchange letters relating to the jurisdiction of the two committees and thereby, expedite consideration of the bill without need for a sequential referral to the Science Committee. I request that copies of those letters be inserted in the RECORD at this point:

COMMITTEE ON SCIENCE,
SPACE, AND TECHNOLOGY,
Washington, DC, July 10, 1990.

Hon. AUGUSTUS F. HAWKINS,
Chairman, Committee on Education and Labor, U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: I am writing in regard to H.R. 5115, the "Equity and Excellence in Education Act of 1990", which was referred to your Committee. Title IV of the bill establishes a federal program of scholarships for undergraduate students pursuing degrees in science, mathematics, and engineering.

Based on Rule X clause 1(g) of the Rules of the House of Representatives, the Committee on Education and Labor has jurisdiction over "Measures relating to education or labor generally" and has ". . . the special oversight function provided for in clause 3(c) with respect to domestic educational programs and institutions, and programs of student assistance, which are within the jurisdiction of other committees." Based on Rule X clause 1(r), the Committee on Science, Space, and Technology has jurisdiction over "all bills . . . relating to . . . (7) Science scholarships." Under normal circumstances, we would seek a sequential referral of H.R. 5115. However, we recognize the importance of H.R. 5115 and your desire to move the bill expeditiously. Therefore, in a spirit of cooperation we will not seek sequential referral of H.R. 5115, but will expect representatives from our Committee to be included in any future discussions or conference on this bill.

It is my understanding that the staff of the two Committees are working together on a floor amendment regarding the National Science Scholars program, which is in Title IV of H.R. 5115. This amendment will contain some provisions of H.R. 996, "Congressional Scholarships for Science, Mathematics, and Engineering Act" which passed the House in September 1989. The amendment will include provision for two scholarships from each congressional district, with at least one to a female recipient; will add two other science scholarships with payback provisions requiring teaching at the precollege level or pursing a career in science; and will provide for the Director of the National Science Foundation to play a role in the scholarship selection process.

Our two Committees have worked together harmoniously in the past on legislation of joint interest. I am confident we will continue to do so in the future.

Sincerely,

ROBERT A. ROE,
Chairman.

COMMITTEE ON EDUCATION AND
LABOR,
Washington, DC, July 10, 1990.

Hon. ROBERT A. ROE,
Chairman, Committee on Science, Space, and Technology, U.S. House of Representative, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your recent letter concerning your Committee's interest in Title IV of H.R. 5115, the Equity and Excellence in Education Act of 1990. We appreciate your decision not to seek sequential referral of H.R. 5115 and we agree that representatives from the Science, Space and Technology Committee should be included in any future discussion or conference regarding the bill.

The Committee on Education and Labor recognizes your Committee's specific jurisdiction relative to Title IV of H.R. 5115 under House Rules regarding science scholarships. We also note that you recognize the Education and Labor Committee's general jurisdiction over education and the Committee's special oversight function on programs of student assistance which are within the jurisdiction of other Committees, pursuant to the Rules of the House of Representatives.

I share your understanding that our staffs are working together on a floor amendment to Title IV of the bill which would include some provisions from H.R. 996, Congressional Scholarships for Science, Mathematics and Engineering Act, including provisions for scholarships to be awarded to at least one female from each congressional district, provisions for two additional types of science scholarships, and a provision for the Director of the National Science Foundation to play a role in the scholarship selection process.

I look forward to working with you in the future on issues which both of our Committees have an interest.

Sincerely,

AUGUSTUS F. HAWKINS,
Chairman.

I also want to express my appreciation to Chairman HAWKINS and Mr. GOODLING, the ranking Republican member, of the Education and Labor Committee, for their cooperation and assistance in arriving at the compromise amendment being offered now which takes into account the concerns of our two committees on this important set of provisions. Also, I want to recognize the leadership of Mr. VALENTINE, and Mr. BOEHLERT, chairman and ranking Republican member, respectively, of the Subcommittee on Science, Research and Technology in working out the provisions of the compromise amendment.

The undergraduate scholarship programs created by the amendment represent an important investment in the Nation's future. The amendment addresses the critical problem of attracting more students to careers in science, mathematics, and engineering, including careers as science and mathematics teachers in elementary and secondary schools.

Mr. Chairman, better teachers are the key to raising the performance levels of American students in science and math. The amendment is an important step toward this goal, but more needs to be done. We must upgrade the skills of current teachers and assist them with the integration of computers in the classroom. In this regard, I want to commend the efforts of the center for improved engineering and science education at Stevens Institute of Technology in New Jersey. This center is working with several school systems in New Jersey to develop software and train teachers to use computers in math instruction. This is a long-term effort leading toward fundamental improvements in math instruction, which will also produce fully documented materials that can be replicated elsewhere.

A continuous supply of scientific talent is the basic requirement for sustaining the scientific and technological enterprise of the United States. Nothing less than the quality of life of our people and the security of the Nation is at issue. The scholarship program is designed to have high visibility throughout the country in order to encourage role models in science, mathematics, and engineering for young people and, particularly important, more role models for women.

The joint committee amendment combines features of title IV of H.R. 5115, as introduced, which establishes a program of 4-year scholarships at the Department of Education and provisions from H.R. 996, Congressional Scholarships for Science, Mathematics, and Engineering Act, which was reported by the Committee on Science, Space, and Technology and which passed the House last session. H.R. 996, which established 4-year and 2-year scholarship programs to be administered by the National Science Foundation, grew out of the separate legislative initiatives of Mr. WALGREN, the former chairman of the Subcommittee on Science, Research and Technology, and of Mr. BOEHLERT and Mr. SLAUGHTER also members of the subcommittee. I want to acknowledge the important contributions of these colleagues on the Science, Space, and Technology Committee which provided the foundation for the amendment under consideration.

Under the compromise language of the amendment, merit-based, competitive undergraduate scholarship pro-

grams would be established and administered by the Department of Education. The National Science Foundation would be responsible for formulating selection criteria for the awards and would have a consultive role in the selection process. Clearly, close collaboration between the Department of Education and the National Science Foundation will be necessary. This is appropriate since these two Federal agencies have the greatest responsibility for ensuring that our national requirements for scientists and engineers and for science and mathematics teachers are met.

Three distinct types of undergraduate scholarships would be established, patterned on H.R. 996. Four-year scholarships would be awarded for two students from each congressional district, one of whom must be a female. Also, up to 500 scholarships for the junior and senior years would be awarded each year for students willing to commit to teaching science or mathematics at the elementary or secondary level. Finally, up to 500 additional 2-year scholarships would be awarded for students who commit to careers or to pursue graduate degrees in science or engineering. The 2-year awards would require payback of the scholarship amounts if the awardee failed to meet the service commitments.

An important goal of the scholarship program is to raise national awareness of the importance of science and technology to our future. To achieve a high level of visibility for the program, the Department of Education is charged to publicize widely the availability of the scholarships, to establish committees at the State level to nominate candidates for the 4-year scholarships.

Mr. Chairman, the amendment to title IV of H.R. 5151 will increase the number of scientists, engineers, and science teachers in America, while providing a highly visible symbol of the national stake in science, mathematics, and engineering education. I urge my colleagues to support passage of the joint committee amendment to H.R. 5115.

Mr. VALENTINE. Mr. Chairman, will the gentleman yield?

Mr. ROE. I am happy to yield to the gentleman from North Carolina.

Mr. VALENTINE. Mr. Chairman, I rise in support of the amendment offered by Mr. ROE to title IV of H.R. 5115. I congratulate Mr. HAWKINS and Mr. ROE for their leadership which resulted in the compromise amendment on the science scholarship provisions in the bill.

The amendment incorporates many features of H.R. 996, Congressional Scholarships for Science, Mathematics, and Engineering Act, which was passed by the House last session. H.R. 996 was crafted by the Subcommittee on Science, Research and Technology while under the able leadership of Mr. WALGREN, and I want to acknowledge the good work of Mr. WALGREN and Mr. BOEHLERT, the ranking Republican member of the subcommittee, on this important legislative initiative.

The amendment before us establishes a program of undergraduate scholarships to attract more students to studies in science, mathematics, and engineering. In addition to providing education support to the individual recipients, the scholarships are intended to be prized awards, having high visibility throughout the Nation to encourage role models in science for young people.

A key element in our ability to compete as a nation in the world economy is our strength in science and technology—the ability to create new knowledge and apply it in new products and services. That in turn depends on our human capital—the quality and quantity of our scientists and engineers.

We have seen a decline in interest among college students in pursuing careers in science and engineering, and we have ample evidence of a shortfall of math and science teachers in elementary and secondary schools, who are well grounded in science and mathematics discipline. We must seek solutions to attract more students to the study of science, and we must in particular, attract more women and members of minority groups, which have traditionally been underrepresented in science.

The amendment to title IV of H.R. 5115 charges the Department of Education, in collaboration with the National Science Foundation, to establish two kinds of scholarship programs. The first comprises 4-year scholarships for graduating high school students for undergraduate study in science, math, and engineering. The second type of scholarships are for the final 2 years of undergraduate instruction for students willing to commit to careers as science teachers or as practicing scientists or engineers. The 4-year scholarship program is structured to involve scientists, engineers, and educators at the State level in identifying nominees for scholarships. Two candidates from each congressional district, at least one of whom must be a female, will be selected by the President, after consultation with the Secretary of Education and the Director of the National Science Foundation.

Students will be selected for scholarships on the basis of academic merit and motivation for pursuing science, math, or engineering careers. The amendment provides that, in deciding among students of relatively equal merit, consideration may be given to financial need and to increasing representation by minorities, individuals with disabilities, and women.

Mr. Chairman, the amendment will help address the need for attracting more students to careers in science and engineering and will focus public attention on the critical importance of science, math, and engineering education to the Nation's long-term well-being. I urge support for passage of the Roe amendment to title IV of H.R. 5115.

Mr. BOEHLERT. Mr. Chairman, will the gentleman yield?

Mr. ROE. I am happy to yield to the gentleman from New York.

Mr. BOEHLERT. Mr. Chairman, I will spare my colleagues the reading of this eloquent prose.

But I cannot resist the temptation to report very briefly on the fact that this bill establishes for the first time a teacher scholarship program to provide incentives for the best and the brightest from our academic world to enter into teaching so that our youngsters for the future will have qualified science and math teachers.

□ 1340

We have got a long way to go in the United States of America. We do not measure up nearly as well as we should in terms of the competitiveness of our youngsters in science and mathematics. This bill goes a long way toward remedying that situation.

I rise in support of the Valentine amendment, and I want to thank the Education and Labor Committee for working with us on this matter. While—as in all compromises—no one is completely satisfied with the result, I think we have gone a long way toward sorting out the appropriate roles of the Department of Education and the National Science Foundation in operating the scholarship programs that will now be a part of H.R. 5115.

I am especially pleased that this amendment incorporates in H.R. 5115 the teacher scholarship proposal that began life as my bill, H.R. 1293. The provisions of H.R. 1293 were made a part of H.R. 996, a bill the House passed last fall that is the basis of the Valentine amendment. I want to thank Mr. LEVINE, who recently introduced a similar bill, for working with us on the Valentine amendment.

The teacher scholarship program recognizes a basic fact of education—the key factor determining the quality of a student's education is the quality of his or her teacher. When we think back on our own education, it is the outstanding teachers we remember, not the outstanding textbooks or equipment.

But in recent years, we have found it difficult to attract our brightest students into teaching, and we have been presented with a cascade of statistics indicating many of our science and math classes are being taught by teachers with little or no background in those fields. This situation is not exactly a recipe for attracting more students to science, math, and engineering.

The teacher scholarships included in the Valentine amendment would attract top math, science, and engineering students into teaching—at least for a few years. Many of these students are interested in teaching now, but they are told by friends and parents that they would be nuts to pursue that career because of the lack of prestige and the competing opportunities. This scholarship would supply the prestige and the financial incentive to send them into the classroom.

Mr. Chairman, it is the Nation's teachers who will determine whether we meet the education goals for the year 2000 enunicated by the President and the Congress. The Valentine amendment will help ensure that we have the teachers needed to spur our students to achieve those goals.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from California [Mr. HAWKINS].

Mr. HAWKINS. Mr. Chairman, may I indicate, not because we have been complimented, but I think the proposal being submitted in this amendment is a very excellent one. We commend the authors and we accept the amendment.

Mr. GOODLING. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Pennsylvania.

Mr. GOODLING. Mr. Chairman, I want to compliment the authors. We think this is an important part and piece of our legislation today. We thank the gentlemen for it.

Mr. WALGREN. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Pennsylvania.

Mr. WALGREN. Mr. Chairman, I rise today to support the Valentine-Roe amendment and to express my appreciation to Chairmen ROE and HAWKINS, Congressman VALENTINE, and ranking minority members WALKER and GOODLING for recognizing the critical need to strengthen the Nation's science and math base. The amendment before us today includes a new scholarship program—National Science Scholars—which will provide opportunities for students to pursue a college education in science, math, and engineering. This program parallels a proposal I authored in the last two sessions of Congress that was supported by the President in his State of the Union Address. The House approved my bill, H.R. 996, last September.

The amendment would create two annual scholarships of at least $5,000 each for two scholars in every congressional district in the country. At least one of the scholars would have to be female and students would have to commit to study math, science, or engineering at the undergraduate level. Nominations would be made by a broad-based citizens committee of educators, scientists, mathematicians, and engineers in each State. The final selection would be made by the President after consultation with the Director of the National Science Foundation and the Secretary of Education.

Mr. Chairman, we cannot take our supply of scientific talent for granted. As a nation, we are in a serious and uphill struggle to improve our ability to compete in the international economy. Clearly, the foundation of our competitiveness is our strength in science and technology, the ability to create new knowledge and apply it in new products. That ability depends on our human capital—the quality and quantity of our scientists and engineers.

Fewer students are choosing to study science and math. For example, the American Council on Education found that from 1966 to 1987, college freshmen planning to major in biological sciences, engineering, physical sciences and mathematics fell from 21 percent to 14 percent. Interest in mathematics dropped by more than four-fifths, from 4.5 percent to 0.6 percent. Freshmen selecting engineering careers dropped by more than one-fourth, from 12 percent to 8.5 percent between 1982 and 1987. Although degrees in computer sciences are on the increase, baccalaureate degrees in math, science, physics and biology are declining.

According to NSF, in 1984–85, 77,871 bachelor degrees were awarded in engineering, in the United States and 334,970 in the Soviet Union. This means that the United States graduated one-fifth as many engineers as the Soviet Union. Japan, with half our population, graduated almost as many engineers as the United States, 71,396. Reports that American students are outcompeted by students of other countries seem to emerge almost weekly.

An education testing service study shows American 13-year-olds scoring last in math performance when compared to students in five other countries. Another study showed that the highest-scoring American fifth graders performed worse than the Japanese. Our best high school students, who are college bound, scored near the bottom in a 13-country comparison in chemistry and physics.

It is particularly important to develop more role models for women who now receive only 38 percent of the total science and engineering undergraduate degrees—these are concentrated in the social and life sciences. Significantly, since 1984, the share of undergraduate science and engineering degrees obtained by women has leveled off; in engineering, the computer, physical, and biological sciences, women receiving degrees is actually declining slightly. We cannot succeed in fulfilling our national requirements for scientists and engineers if we fail to attract half the available talent pool.

Because of their broad geographic distribution, National Science Scholars scholarships would serve as highly visible stimulus and source of role models for high school students—especially if they come to symbolize the national stake in science and engineering. The award of these scholarships would remind Members of Congress and the public of the importance of science to our national goals.

I am pleased the House today is recognizing the critical need to address the Nation's science gap and taking a big step toward strengthening the human element in our effort to regain our international competitiveness in the global economy.

The CHAIRMAN. The time of the gentleman from New Jersey [Mr. ROE] has expired.

Mr. GOODLING. Mr. Chairman, I yield such time as she may consume to the gentlewoman from Maryland [Mrs. MORELLA].

Mrs. MORELLA. Mr. Chairman, I rise in support of the Valentine-Roe amendment that would provide congressional scholarships in science, mathematics, and engineering. I am an original cosponsor of the measure which was approved by the Science Committee and the Education and Labor Committee, thus reflecting our national concerns about the poor performance of American students in science and math on international tests.

As a former teacher, I believe that students will excel in math and science only if they are inspired by an interested teacher. I know and understand the role that a skilled and dedicated teacher can play to encourage greater interest and participation in science and math education. However, our talented math and science professionals rarely select teaching as their chosen career. We can begin to reverse that trend by providing college scholarships to students who, in return, will make a commitment to teach at the high school level.

Women and minorities traditionally have been underrepresented in science and math education. It is time for us to make an effort to attract more women and minority students to pursue careers in science, math, and engineering. The Valentine-Roe amendment would provide a 4-year-school scholarship for two students from each congressional district. This bill specifies that at least one of the recipients from each district must be a woman. Minority participation will be encouraged.

By passing this amendment we will be sending a message to all of our students that math, science, and engineering are respected, worthwhile and valued pursuits. We will be raising awareness that upgrading science and math education is vital to our Nation's competitiveness in the world. American students do not deserve to be at the bottom when compared to their counterparts in other countries. We have the opportunity to encourage American students to rise to the top, where they belong. We can make this happen by passing the Valentine-Roe amendment of the equity and Excellence in Education Act of 1990.

Mr. MINETA. Mr. Chairman, I rise today in strong support of the National Science Scholars Program amendment. I commend my colleagues, Mr. ROE and Mr. VALENTINE, on their efforts on this amendment.

It is especially significant that a scholarship program in the amendment will be called the Robert Noyce National Math and Science Teachers Corps, in honor of Robert Noyce, the inventor of the computer chip. This program will award scholarships to undergradute students who are willing to commit to teaching science or math in elementary or secondary schools for at least 2 years.

Mr. Chairman, our schools simply are not doing enough to provide our children with a basic science and mathematics education necessary to prepare them for the modern, high-technology work force. It is essential for

the United States to begin supplying schools with well-prepared teachers to teach science and math if we are to regain our competitive position in the world economy.

This amendment to the National Science Scholars Program recognizes the importance of technically literate teachers to our children's future. The scholarship program serves as a fitting tribute to Bob Noyce, the Edison of the informaton age.

Bob Noyce was responsible for the revolution of genius that laid the foundation of California's Silicon Valley. His vision lead to the growth of the electronics industry which today employs more Americans than our auto, steel, and aerospace industries combined. The scholarship program that has been named in his honor will help to keep his dreams alive.

Mr. GOODLING. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey [Mr. ROE].

The agreement was agreed to.

The CHAIRMAN. The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

Mr. STOKES. Mr. Chairman, I rise today in support of H.R. 5115, the Equity and Excellence in Education Act of 1990. I want to commend our esteemed colleagues and chairman, Congressman AUGUSTUS HAWKINS, for his leadership in bringing this bill to the floor. Our youth of today, growing up in a very troubled society, need a dedicated advocate like him to ensure educational opportunities on their behalf. This bill is a concerted effort to meet this objective and is especially important when we take a close look at the failing educational achievement of today's students.

In 1988, 25 percent of U.S. high school students left public schools without graduating; between now and the year 2000, it is estimated that one out of seven preschoolers is at risk of dropping out of school. Furthermore, only 50 percent of high school seniors read at levels considered adequate for performing moderately complex tasks, and 80 percent have inadequate reading skills. This situation is further complicated by a declining pool of educators who have received inadequate support at all levels from our society.

Thus, we are facing a crisis in education that not only determines the quality of the future for our children, but one that determines how well we as a nation will compete in a global economy.

Mr. Chairman, this situation prompted my introduction of the Gateway bill, H.R. 916, which has been incorporated into H.R. 5115 as part of a national literacy package which was initially proposed by my distinguished colleague from Ohio, Representative TOM SAWYER.

Basically, the Gateway program, as included as part of H.R. 5115, directs the States to provide 2-year grants to public housing authorities. The purpose of the program is to make available to residents of public housing projects programs of information and outreach, literacy training, basic skills training, and the development of work habits.

Child care services also would be provided in order to allow young parents to participate in education and training programs leading to meaningful employment. Child care is an indispensable element of the program. The majority of families living in public housing are headed by single, young women. Oftentimes, the prohibitive cost of, and the lack of, quality day care have prevented many of these young mothers from going on to obtain the skills which would help them and their children pursue and enjoy the many opportunities our Nation has to offer. Child care services would include services for daytime care of child dependents not attending school as well as adult dependents of eligible individuals.

Mr. Chairman, my own personal experiences help me to understand the significant role a program like Gateway can play. My brother and I spent 10 years in public housing. My mother took us into public housing when I was 13 years of age and we remained in public housing until I was 23 years of age, after I had returned from the armed services and took advantage of the G.I. bill.

When my mother took us into public housing, it was because she was a widow raising two boys. She was a domestic worker, a woman with an eighth-grade education who could not really make enough money as a domestic worker to support us. So, she went on AFDC to try and make enough money to be able to raise two young boys. During these times, we were not the only ones in this dilemma. Many people who lived in public housing during those days were good people, decent people, but they were poor people.

This is the situation we basically have today in public housing. We find people who do not have the advantage I had of being able to take advantage of the G.I. bill and go to college, and on to law school. Many of them are good and decent people. But, they, too, are poor people. They need some help if they are to be able to escape going from one generation to another, living in public housing, dependent upon public assistance, with no opportunity whatsoever of escape.

Public housing serves the very poor, the most vulnerable segment in our society. By design, public housing is generally restricted to tenants with incomes below 50 percent of the median income. Many of the residents lack a high school diploma. Many have never held a job. Many of them have less than eighth grade level skills in reading and math. Consequently, they are disqualified from some federally funded training programs.

The Gateway program attempts to remedy this phenomenon in a uniquely focused way. It differs from welfare reform proposals pending in Congress in that it targets assistance to persons in a common environment where services can be effectively and efficiently delivered. In this environment, the success of an individual in the Gateway program would be magnified as a role model for others.

Mr. Chairman, illiteracy affects every aspect of our Nation. It is a problem which disproportionately affects our Nation's poor. Therefore, if we are to effectively tackle problems associated with illiteracy, we must direct our efforts toward those most in need of assistance, the economically disadvantaged. In this regard, as we attempt to draft remedies for those problems affecting our Nation's poor, it would not be wise to ignore the role public housing can play.

Mr. Chairman, I want to thank the distinguished chairman, Mr. HAWKINS, the ranking minority member, Mr. GOODLING, and my colleague from Ohio, Mr. SAWYER, for including this very important initiative in this bill. And, I ask my colleagues to join me in voting for the final passage of H.R. 5115.

Mrs. JOHNSON of Connecticut. Mr. Chairman, I am pleased to have the opportunity to extend my support to H.R. 5115, the Equity and Excellence in Education Act of 1990. This is the most exciting and substantial education legislation Congress has produced in a long time. The combination of initiatives from President Bush's education package which promotes excellence through a variety of incentives like merit schools, math/science schools, and teacher awards, along with its many bipartisan measures to promote literacy, strengthen teacher training, and most significantly, create new local flexibility, is a move toward providing a quality education that is the right of every child in this country.

The value of education, and its link to the future, remains constant, yet I can tell you from my conversations with parents throughout my district that concern for the cost and quality of education for their children has reached extraordinarily high levels.

Mr. Chairman, this legislation is a constructive, progressive response to those concerns.

H.R. 5115 also responds to the shocking rate of illiteracy across our Nation, helps our young people steer clear of drug abuse and will lower the one-in-four rate of those students at the risk of dropping out of school.

This bill is also very important because it is the first to grant flexibility in the means of achieving educational goals for our children without compromising those goals. It encourages greater flexibility for Connecticut school districts. Not only can school systems have access to planning grants if they want to try such new approaches as open enrollment programs, but we can also move forward with innovative programs, like the early intervention program that has been very successful in my district, to better serve children with special needs without fear of losing funding.

The opportunity a free society offers its people is a false promise without education and the power of knowledge it provides. I support the excellence in education this bill provides because it is fundamental to the continued growth of our Nation, as our leaders of tomorrow are in our schools today.

Mr. BORSKI. Mr. Chairman, I rise today in strong support of H.R. 5115, and I would like to commend Chairman HAWKINS for drafting this timely, comprehensive legislation. His efforts to improve the education of our children will be sorely missed when he retires at the end of this year.

As you know, various statistics from recently published studies—such as "The Nation's Report Card" and "Shortchanging Education"—reflect the disparaging state of our educational system. According to the U.S. Department of Education, over 25 percent of 13-year-olds are unable to perform simple addition, multiplication, and division. The high

school dropout rate nationally is between 15 to 20 percent overall, and nearly 40 percent in some urban areas.

Nevertheless, the United States ranks in 14th place among industrialized countries in public and private spending on primary and secondary education. Only Ireland and New Zealand spend less than the United States does on such a high priority.

When our Nation's Governors convened the historic education summit last September, they were conscious of and disturbed by these alarming statistics. They realized that goals must be set on a national level to address the continuing crisis in educational performance and standards among our children. They also acknowledged that all sectors of society must participate, and leadership must be provided by Congress and the President.

Recognizing these challenges, the Governors agreed to work with the Bush administration to establish six bold national goals for education. These include readiness for school, school completion, student achievement in critical skills, improved math and science skills, increased literacy, and safe and drug-free schools.

The summit was a critical first step along the difficult path of restoring excellence and equity in America's education. Since that time, education leaders, business executives, teachers, and parents throughout the Nation have been working hard to accomplish these ambitious goals.

Today, Mr. Chairman, it is our turn. It is now incumbent upon Congress to respond to these efforts and demonstrate the leadership necessary to make these initiatives a reality. For this reason, I am strongly committed to the passage of H.R. 5115 to provide the framework and resources to achieve the Governors' goals.

H.R. 5115 is a comprehensive measure designed to coordinate the Federal Government's actions to improve the education of both children and adults. This legislation would assist States, local school districts, and institutions of higher education to meet these six goals.

In addition, H.R. 5115 would proclaim two additional national goals—teacher recruitment and retention and equal opportunity for post-secondary education—and would establish new programs to meet them. This legislation would also enable 50,000 more students to be able to attend higher education institutions by exempting the value of homes and farms from need-based analysis in computing financial aid eligibility.

Most importantly, H.R. 5115 would establish incentives for higher achievement in our schools by providing public acknowledgment and financial reward for excellence in education. In the past, our Nation's leaders have responded to educational problems by focusing only on our students' and teachers' inadequacies and failures—not on their strengths and accomplishments.

In short, H.R. 5115 will help to provide our children with the necessary science, math, and literacy skills they will need for the highly competitive international marketplace of the future. As economic strength becomes the new measure of international leadership, generous investment in education will become crucial to the national security of our country.

I am hopeful that 1990 will be remembered as the year that America realized that a well-educated citizenry helps to improve a nation's national security and economic competitiveness. I urge my colleagues to help make this possible by supporting H.R. 5115.

Mr. ALEXANDER. Mr. Chairman, I rise today in support of this bill. It is an important step in addressing the serious problems facing our Nation's educational system.

All of us agree that a sound school system is necessary for our children to enjoy a successful future and for our Nation's work force to remain competitive in a global economy.

But sometimes we don't agree on how to pay the bill for education. This legislation will ensure that Federal assistance is available to States and communities for educational reforms.

Federal aid for education is especially critical to more impoverished parts of the country.

In my district of north and east Arkansas, less than half of the residents have a high school diploma. Only 4 percent have received college degrees.

Economic development in regions like the Lower Mississippi Delta simply cannot succeed until this trend is reversed. Right now, one out of every four students drops out of high school. Adult literacy rates are the lowest in the country. Students lag behind the rest of the country in test performance. Schools have trouble hiring teachers.

The programs authorized in this bill can turn this situation around.

For example, full funding for Head Start will mean a better beginning for the 20 percent of Arkansas children who are in poverty. Comprehensive literacy programs will boost regional economic competitiveness. And expanded funding for drug-free schools and communities projects will help students say no to the dangers of substance abuse.

These are just a few ways in which H.R. 5115 can give our children a fair chance at building a future for themselves. I urge my colleagues to join me in supporting this legislation.

Mr. CRAIG. Mr. Chairman, the Equity and Excellence in Education Act of 1990 is being considered today. This bill authorizes programs that are intended to work toward the achievement of our Nation's goals in education. Unfortunately, this bill is filled with excessive spending.

Throwing billions of dollars at this Nation's education systems will not solve its problems. Only by providing well-thought-out programs targeted at problem areas can the United States achieve excellence in education. The President's Excellence in Education Act, H.R. 1675, provides a sound approach to improving education in a fiscally responsible manner. Even though that is not the bill before us today, my colleague, Mr. GOODLING, will give us the opportunity to vote for this fiscally responsible approach.

Two days ago, some Members of this Congress discussed the "backbone of Congress": Our ability to resolve the problem of the budget deficit without a constitutional amendment. Today Members of Congress can work toward improving education while keeping their promise to Americans to be fiscally responsible. Mr. GOODLING will offer an amendment that I fully support—an amendment that works toward our goals in education without contributing to the spiralling budget deficit.

I want to urge my colleagues to vote for Mr. GOODLING's amendment. Show that Congress can be fiscally responsible and still provide adequate funding for those programs that are so desperately needed.

Mr. GEREN of Texas. Mr. Chairman, I rise today to state my support for H.R. 5115, the Excellence in Education Act.

Mr. Chairman, America has always been a shining city on a hill. We have always been the world's best and brightest, models of excellence in every endeavor from athletic pursuits to technological advancement. We became the best because our forefathers gave us the means and the opportunity to be No. 1. We worked hard because we were taught the fruits of hard work; we were ingenious because we were given the gift of freedom of thought; we remained free because we were endowed with the spirit of freedom.

But if future generations of Americans are mediocre, it will be because we offered them mediocrity.

We are traveling toward that mediocrity today, and our vehicle is our decaying educational system. In spite of the Herculean efforts of our dedicated teachers, study after study shows that our educational system has reached the crisis stage, producing an entire generation of people besieged by drugs, unable to provide for themselves, unprepared for the responsibilities of democracy, and unprepared for the challenge of global competition.

The evidence of this decline is astounding. When the NEA gave its latest round of progress tests, it found that American children in the 4th, 8th, and 12th grades are sorely deficient in reading and writing skills. Our young people face a perilous future unless their skills improve. In my own home of Tarrant County, 41 local businesses surveyed said they required reading and writing skills that were intermediate or better for the majority of their jobs. But this same survey echoed the widening gap between the skills employers need and the skills American workers have.

Efforts are underway on the local level to bring about change. In my community of Fort Worth, over 100 businesses are participating in an adopt-a-school program to offer tutoring and other services to the schools. There is also a program called Project C–3 for classroom/corporation/community. This program allows businesses to analyze the skills needed for jobs now and in the future and allows the schools to review their instruction with that in mind.

These local programs are critical to getting us back on track in educating our kids, but the Federal Government must do its part as well. The time is now to renew our commitment to public education in this country, and the Excellence in Education Act is the right place to start. This legislation attacks the decline of our educational system from every angle and at the very core. It provides the incentives needed for excellence, and the means to achieve it.

The Excellence in Education Act adopts a goal that, by 1994, every child eligible for the Head Start Program will have access to those services and a similiar goal that the Women, Infants, and Children's Program be sufficiently funded by 1995. These goals are founded on the premise that, for a child to become a productive adult, he must be given the tools from the beginning. We have learned the hard way that young children who start from behind may never catch up.

The legislation demands that we go back to the basics of a quality education. By the year 2000, American students in the 4th, 8th, and 12th grades must demonstrate competency in English, math, science, history, and that every school will sponsor activities promoting responsible citizenship. The legislation also establishes a renewed commitment to the teaching of geography. We can little ask our newest generation of American workers to help us regain our lead in global competition if they do not even know where our competitors live.

We are the pioneers of some of the world's greatest inventions—the light bulb, the telephone, the automobile—but we will be the dinosaurs of the past if we do not get ourselves back on track technologically. We have fallen toward the back of the pack in our knowledge of science and math in this country, a fact with serious ramifications for our ability to compete in the world.

The Excellence in Education Act renews our commitment to math and science instruction in our Nation's schools by providing scholarships for promising students in those areas. But our students can only take what our teachers have to give, and the legislation also provides programs to help teachers update and improve their skills.

The Excellence in Education Act reestablishes an age old tenent that is too often forgotten today, the idea that incentives bring results, the belief that if you strive to be the best, you get rewarded. The legislation establishes Presidential schools of distinction to recognize those schools that have improved student achievement, created a drug-free environment, and reduced the dropout rate. We need to provide incentives for change, and reward those that make a difference.

The legislation also seeks to reestablish another age-old tenet, and that is that being a teacher is something special. We have lost sight of that fact in this country. We don't pay our teachers enough and we don't give them the proper tools. This country's best and brightest are turning elsewhere for careers, and the result is a teaching population that is graying more rapidly than we can replace them. Today, over 48 percent of this country's teachers are 40 years old or older.

The Excellence in Education Act does not leave it to chance that equally qualified teachers will appear to take their place. It provides incentive programs for students planning to teach, especially those who will teach in schools in low-income, rural, and geographically isolated areas. The legislation also provides grants to schools to help them in recruiting, retaining, and graduating highly qualified teachers. And in another effort to bring out the best in education, Presidential teacher awards are providing for this Nation's outstanding teachers.

Finally, the Excellence in Education Act seeks to help those Americans still living in the shadows, the 20 million adults who cannot read a job application or an election ballot, the 20 million adults that have been failed by this Nation's educational system. It would establish large-scale public/private partnerships on literacy, teaching training, model literacy program, State and regional literacy resource centers, and scholarships to students planning careers in adult literacy.

Mr. Chairman, Americans have never shrunk from a challenge. We have fought wars, diseases, and economic catastrophe, and we have always won the battle. To reinstill the passion and excellence of yesterday in our educational system may be our greatest challenge yet. But it is a challenge we must overcome if we are to regain our ability to compete in the world, our ability to remain the champions of democracy, and provide our children with a future rich with hope and opportunity. We must create our new beginning today—tomorrow may be too late.

Mr. COLEMAN of Texas. Mr. Chairman, I rise today in support of H.R. 5115, the Equity and Excellence in Education Act of 1990. I would like to commend Chairman AUGUSTUS HAWKINS for fashioning an outstanding piece of legislation that will serve as a foundation for the Federal Government in ensuing years to ensure that a quality education is made available to all of our children. In fact, H.R. 5115 adds two additional and very important goals regarding teacher recruitment and retention and equal opportunity for postsecondary education that go beyond the goals presented by the President and the Nation's Governors.

In addition, I am particularly pleased that this legislation incorporates many of the provisions of H.R. 3161 and H.R. 3365, two bills that I introduced to address our Nation's dropout rate. As in my legislation, H.R. 5115 establishes a goal to increase the country's high school graduation rate and takes action, without stifling initiatives at the State and local level, by calling for additional resources to be committed to assist in preventing students from dropping out of school and encouraging students who have left school without a diploma or certificate, over 4.2 million children last year, to reenter school. It has been estimated that each year's class of dropouts costs the Nation more than $240 billion in lost earnings and foregone taxes over their lifetimes. Without a high school education, these children are destined for a permanent economic underclass. Our democratic ideals mean little to those who have no hope for the future. Therefore, we must, all of us, do everything we can to ensure that we, as a caring society, join together and invest in these children's and our Nation's future. Like other types of meaningful investment, this legislation is ultimately revenue saving in nature. In addition to the $240 million in lost earnings and foregone taxes caused by dropouts, add to that the fact that it costs far less to keep a child in school for a year than it does to keep him/her in prison for crimes motivated by poverty and we certainly have compelling justification for the short-term costs involved in enacting such meaningful legislation. The cost of ignorance is far more expensive.

Moreover, keeping in mind that a majority of all jobs will require a postsecondary education by the year 2000, H.R. 5115 establishes the important goal that "no qualified student shall be denied the opportunity for postsecondary education because of financial or other barriers." This legislation calls for the reversal of a trend in Federal policy through the 1980's—the declining purchasing power in student grants and the shift to loan—that has made higher education less accessible to our Nation's youth. For example, the typical student no longer is able to graduate from college in 4 years and most students at the University of Texas at El Paso [UTEP] take 6 years to graduate as approximately 40 percent of UTEP students either drop out, or "stop out" for a period of time, between their freshman and sophomore years. These students and many others who never enter college are denied the opportunity of formal education because of lack of adequate resources. For many students, particularly the poor and disadvantaged with extensive family financial obligations, loan programs are not tenable alternatives. For this reason, the policy goals set by H.R. 5115 to increase appropriations annually in the Pell Grant Program, the cornerstone of the Federal financial aid programs, and the TRIO programs, so that those successful recruitment and intervention efforts can be made available to greater numbers of low-income, first-generation-in-college, and minority students. Students served by TRIO are twice as likely to complete the first year of college and four times as likely to earn a degree as are those who are not involved in TRIO. In light of the fact that 55 percent of UTEP students are Hispanic, the largest university in the United States with a majority Hispanic student population, and 75 percent are the first in their families to seek a college education, these programs are of significant importance to the people in west Texas as well as students all across the Nation.

By ensuring our children have the support necessary to have the opportunity to complete both a high school and college education means we are ensuring a better future for the entire Nation. I, therefore, urge support for H.R. 5115.

Mr. MILLER of Washington. Mr. Chairman, I rise today to commend the Smith-Bartlett-Gingrich amendment to the Equity and Excellence Act of 1990. This measure incorporates two innovative and effective approaches to education: choice and local flexibility.

Choice empowers students, parents, and teachers. Choice gives parents more to say in choosing the right school for their child. And choice gives teachers and principles more control in running their school. It provides wider options for students to best meet their individual needs and interests. Choice promotes parental involvement, an important ingredient for a child's successful education.

Regulations often stifle a teacher's ability to provide students the most effective and creative education possible. This amendment allows selected education authorities to combine specified program funds. It also allows authorities to receive exemptions from corresponding Federal and State laws and regulations. This is currently being done very suc-

cessfully in my District. The Mukilteo School District has developed a comprehensive learning support system grouping students on their academic need rather than categorical eligibility. By combining resources, they have improved student achievement—and saved money. It also allows students who need remedial help to be placed in the system immediately without waiting for the bureaucratic process to be completed.

The time has come to allow schools the flexibility to implement programs that combine funds and trim bureaucracy. A recent report published by Brookings Institution researchers John E. Chubb and Terry M. Moe clearly endorses the concept of public school choice. The future of education depends on choice and local flexibility.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. MURTHA) having assumed the chair, Mr. OBERSTAR, Chairman of the Committee of the Whole House on the State of the Union, reported that Committee, having had under consideration the bill (H.R. 5115), to improve education in the United States, pursuant to House Resolution 430, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. GOODLING. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device and there were—yeas 350, nays 25, not voting 57, as follows:

[Roll No. 256]

□ 1402

Mr. HEFLEY changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 5115, EQUITY AND EXCELLENCE IN EDUCATION ACT OF 1990

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that in the engrossment of the bill, the clerk be authorized to make corrections in section numbers, punctuation, and cross-references and to make such other technical and conforming changes as many be necessary to reflect the actions of the House in amending the bill just passed, H.R. 5115, the Equity and Excellence in Education Act of 1990.

The SPEAKER pro tempore (Mr. MURTHA). Is there objection to the request of the gentleman from California?

There was no objection.

GENERAL LEAVE

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on H.R. 5115, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

PERSONAL EXPLANATION

Mr. PORTER. Mr. Speaker, I was unavoidably absent, I did not vote on rollcall votes No. 253, No. 255, and No. 256, pertaining to H.R. 5115, the Equity and Excellence in Education Act of 1990. Had I been present, I would have voted "aye" on each of these measures: The Hawkins en bloc committee amendments, the Solomon amendment, and final passage of the bill, respectively. In addition, I was paired against the Roukema amendment regarding student loan defaults on rollcall vote No. 254.

PERSONAL EXPLANATION

Mr. STUMP. Mr. Speaker, it was unfortunately, not possible for me to be in Washington, DC because of the death of my father.

Had I been present and voting, I would have voted "aye" on rollcall No. 242, "nay" on rollcall No. 244, "aye" on rollcall No. 247, "aye" on rollcall No. 255, and "nay" on rollcall No. 256.

PERSONAL EXPLANATION

Mr. NELSON of Florida. Mr. Speaker, had I been present, I would have voted "aye" on rollcall No. 253, No. 255, and No. 256, and "nay" on rollcall No. 254.

PERSONAL EXPLANATION

Mrs. VUCANOVICH. Mr. Speaker, I was not able to be present during the vote for final passage on H.R. 5115, the Equity and Excellence in Education Act. I wish to have the RECORD indicate that had I been here, I would have voted "aye."

PERSONAL EXPLANATION

Mr. MORRISON of Connecticut. Mr. Speaker, I was unavoidably absent and missed a number of votes on H.R. 5115, the Equity and Excellence in Education Act. Had I been present, I would have voted "aye" on rollcall 253, the Hawkins amendment; "no" on rollcall 254, the Roukema amendment; "aye" on rollcall 255, the Solomon amendment; and "yea" on rollcall 256, final passage.

PERMISSION TO SUBMIT AMENDMENTS TO H.R. 3950, THE FOOD AND AGRICULTURE RESOURCE ACT OF 1990

Mr. HALL of Ohio. Mr. Speaker, I ask unanimous consent that Members have until 5 p.m. tonight to submit their amendments to H.R. 3950, the Food and Agriculture Resource Act of 1990, for printing in the CONGRESSIONAL RECORD of July 20, 1990.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3950, FOOD AND AGRICULTURAL RESOURCES ACT OF 1990

Mr. HALL of Ohio, from the Committee on Rules, submitted a privileged report (Rept. No. 101-609) on the resolution (H. Res. 439) providing for the consideration of the bill (H.R. 3950) the "Food and Agricultural Resources Act of 1990," which was referred to the House Calendar and ordered to be printed.

REPORT IN THE MATTER OF REPRESENTATIVE BARNEY FRANK

Mr. DIXON, from the Committee on Standards of Official Conduct, submitted a privileged report (Rept. No. 101-610) on the resolution (H. Res. 440) in the matter of Representative BARNEY FRANK, which was referred to the House Calendar and ordered to be printed.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Mr. Speaker, I ask to proceed for 1 minute so that I might inquire of the acting majority leader of the program for next week.

Mr. HOYER. Mr. Speaker, will the distinguished minority leader yield?

Mr. MICHEL. I yield to the gentleman from Maryland [Mr. HOYER].

Mr. HOYER. Mr. Speaker, I thank the distinguished minority leader for yielding.

We will be going in on Monday, July 23, at 12 noon. There will be 15 suspensions on the calendar. At the conclusion of the suspension calendar we will do the rule and general debate only for the Food and Agriculture Resource Act of 1990, the farm bill. We hope on Monday that there will be perhaps no more than three votes. If there are any more than three or four votes, we will probably roll those until Tuesday.

Members ought to be aware of the fact that there will be a vote on the rule, quite possibly a rollcall vote on the rule. On Tuesday we will be going in at 11 a.m. and take up consideration of the farm bill. On Wednesday, we will again go in at 10 a.m., continue on the farm bill and complete the consideration on that date. We will then take up H.R. 770, the veto override question of the Family and Medical Leave Act. On Thursday we will again go in at 10 a.m. We will have the D.C. appropriations bill before the House for full consideration, and that will be subject to a rule. On Friday, on July 27, we will be meeting and we will have votes. We will take up the Arts, Humanities, Museum amendments of 1990, again subject to a rule. Then we will complete consideration of the amendments to Airport and Airway Improvement Act of 1982.

Mr. MICHEL. Mr. Speaker, might I inquire on Monday's schedule, assuming all 15 suspensions are considered, there would be quite some debate time there, and then on the votes on those ordered would come at the end of the consideration of all 15 bills, right?

Mr. HOYER. If the gentleman will continue to yield, the gentleman is correct, and we would certainly expect no votes prior to 3 o'clock.

Mr. MICHEL. And then we would take up the rule on the Ag bill immediately following?

Mr. HOYER. The minority leader is correct.

Mr. MICHEL. Then may I inquire, on Wednesday, when we have a vote to override or sustain the President's veto of the Family and Medical Leave Act, when would that be actually up for consideration on Wednesday? Normally, something of that nature is on the docket front on, even though we are carrying over other pieces of legislation. Are we so sure that we will get through with the Ag bill in good time Wednesday to be able to predict when that vote will be on the veto, so Members will be sure and record themselves one way or the other?

Mr. HOYER. I think the honest answer is, we will have to see what we do on the Ag bill to know the answer. However, the minority leader is correct that Members ought to know, and we will try on Monday afternoon, to set a time certain for that veto override vote. So as the minority leader indicates, all Members will have clear notice when that will come before the body.

Mr. MICHEL. Let me inquire now about campaign reform. There is no mention of it here. There is no mention of it here, although the chairman of the Democratic Caucus, I think, knows that the Speaker and I have had some conversations in the past that would indicate that he would commit himself to our considering it during the month of July.

□ 1410

Now, the days are running out, and then we run into our recess date in August, and I have to pose that question now because we are getting down to where push comes to shove on the issue of campaign reform.

Mr. HOYER. Mr. Speaker, the gentleman is correct, and he also characterizes it from the point of view of the leadership. Particularly from the

Speaker's point of view, I know he would like to bring a bill to the floor before the August break, and as soon as we have an agreement on how that can be done, we will give the information to the gentleman. He intends to do that. But I can candidly say to gentleman honestly that that agreement has not yet been reached.

Mr. MICHEL. Mr. Speaker, I appreciate that information.

Now, how about civil rights? I knew at one time if there were to have been an agreement on the other side of the Capitol, we might very well have been in a better position to take it up. If there is difference, as there obviously is considerable difference, on that issue, are we to assume that may be laid off until after we get back from our August recess?

Mr. HOYER. Mr. Leader, I really believe that Members ought to be prepared for that bill to be considered prior to the recess. We expect the civil rights bill to be reported quite possibly next week, not necessarily scheduled but reported next week, but we cannot guarantee that. I would not want to inform Members that there is not some desire to see that bill resolved before the break.

Mr. MICHEL. Then that raises another question. We were talking earlier about making sure that we were out of here by the first weekend in August—I think that is August 4—so that Members with families could make appropriate arrangements.

I am hearing from the other side of the Capitol that that time might be extended 1 week, and we have not really signed in blood on this side, although I have been attempting to assure our Members that we meant to stick by our agreement.

Now, there is another element here. I guess I have to say quite frankly that I refer to our President's displeasure in our not being able to move expeditiously on our so-called summit. So I am trying to carry water on both shoulders here by catering to the membershp because we would like to honor their commitments on the August recess. By the same token, we have to be concerned when it is as important an issue as the President feels it is, and frankly as some of us feel it is, that we do come to a quick resolution on whether or not it is feasible at least to have a summit agreement.

How does the gentleman look at that? Are we absolutely sure of getting out of here on the 4th or would the gentleman say there is an element of uncertainty there on that second week?

Mr. HOYER. Mr. Speaker, I think again in candor the latter would be correct, in that there is an element of uncertaintly.

As the gentleman has observed, not only is the summit outstanding but the debt ceiling must pass before we leave. The Secretary of the Treasury has, of course, advised us that the debt ceiling will run out during the course of the proposed recess, and, therefore, we need to act on that prior to leaving.

However, I want to assure the gentleman that the talk he hears is coming from the other side of the Capitol, not this side, there is a very strong desire on the part of the Speaker and the leadership on our side of the aisle that we stick to the August 3 date. Quite obviously, we all agree there are certain things we have to do, and we could not responsibly leave town without having them. Nonetheless we are hoping we will be able to accomplish that which we need to accomplish by the weekend of the 4th.

Mr. WEBER. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I am happy to yield to the gentleman from Minnesota.

Mr. WEBER. Mr. Speaker, I thank the distinguished minority leader for yielding.

I have two questions of the distinguished acting majority leader. First of all, regarding the farm bill that is going to be considered, as I understand it, on Tuesday and Wednesday, I am trying to get an idea as to how much of that bill we might dispose of on Tuesday. Is that a targeted time, or is there some time on that date when the committee might rise on Tuesday, or are we going to go into the evening and try to conclude the bulk of that bill before going home Tuesday night?

I think the answer to that question is that for those days when certainly we will be meeting the next day, Members ought to expect the possibility of later than usual sessions.

Mr. WEBER. I see. And along that line, if the gentleman will continue to yield, we will take up the override veto vote after final passage of the farm bill on Wednesday? Is that assured?

Mr. HOYER. The minority leader, as the gentleman heard, raised what I thought was a good question. I will need to talk to the leadership or the Speaker about it. This refers to setting a time certain in effect for the veto override. That may occur. I do not want to commit to that because I have not had the opportunity to discuss it. However, that may occur. That decision will be made in conjunction with the majority leader, who is now in the summit, by the way, which is why the majority leader is not here. We will try to give notice to each side as to when that vote may occur. It may occur at the conclusion of the agriculture bill or we may suspend the consideration for the purpose of taking that vote.

Mr. WEBER. Mr. Speaker, if the gentleman will continue to yield, I have one final question on a different matter.

The chairman of the Committee on Standards of Official Conduct just filed a report with the Clerk. I wonder if there is any indication of when we might be considering that report?

Mr. HOYER. It is a privileged matter, as the gentleman knows. Therefore, it is before the House, and our expectation is that we would probably bring that up next week.

Mr. MICHEL. This coming week?

Mr. HOYER. Yes.

Mr. MICHEL. Is there any date the gentleman is thinking about?

Mr. HOYER. I do not believe that has been resolved. Again we want to see how we can get the business of the House done and nevertheless deal with that important issue as well. So we will try to schedule it as best we can.

Mr. MICHEL. The thought occurred to me that Tuesday night is the night for the participation by both parties in an extracurricular game called the National Pastime. I do not know if that would be a time for having the House adjourn at a reasonable hour on Tuesday or not.

Mr. HOYER. I am sure there will be significant lobbying activities on both sides of the aisle to effect a timely departure from the Hill.

Mr. MICHEL. As the gentleman knows, some of us are getting a little bit older and we hung up our spikes long ago, but I know there is a sufficient number of younger Members who will be badgering us on both sides of the aisle as to what our program will be. So I thought if we could give them a little bit of a lead time, we might be able to prepare for it.

Mr. HOYER. Mr. Speaker, I think we will do what we can to try to accommodate that activity.

Mr. WEBER. Mr. Speaker, will the gentleman yield further?

Mr. MICHEL. I yield further to the gentleman from Minnesota.

Mr. WEBER. Mr. Speaker, I thank the minority leader for yielding.

On the matter of the report of the Committee on Standards of Official Conduct, there has been some indication given our side informally that that matter would not be taken up until after consideration of the farm bill. It certainly would not be taken up on Monday when we are dealing with suspensions, would it? Are either or both of those thoughts consistent with the gentleman's understanding?

Mr. HOYER. Again this is a privileged motion before the House, but again there is no intention whatsoever to take that matter up on Monday. As it relates to the consideration of the agriculture bill, we again want to finish that bill. So I think the gentleman is probably correct in surmising that we would want to complete that before we take up the privileged report.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I am happy to yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, there has been quite a bit of unhappiness on our side of the aisle about this business of filing amendments with the Rules Committee and only being given brief notice of it. Is the gentleman aware of any of the rules mentioned on this list that may be subject to a filing with the Rules Committee that Members should be aware of now?

Mr. HOYER. That is a good question. I am not aware of any. We will check, and maybe if there are other questions, we will try to check during the course of this period right now. Let me see if that is the case.

Mr. WALKER. That would be helpful. I have just one more thing, if the gentleman will yield further, and maybe the gentleman from Illinois can help me answer this question.

I am hearing from a number of Members that the real problem with the month of August and the vacation period is that people are in positions right now about having to make deposits and buying nonrefundable tickets relating to deposits for vacations and all this kind of thing. Am I hearing correctly that if Members are doing that for the second week in August, they might better hesitate and not put those kinds of things in place?

Mr. MICHEL. Mr. Speaker, I guess I always err on the side of caution, because if we were to just sign in blood that commitment, I would want to hold to it. I am not altogether sure, with that uncertainty, as I mentioned before, that I could give Members that kind of assurance, as much as we have been talking all along about making absolutely sure that the month of August was supposed to be secure for those Members with families who had made needed prior reservations and all the commitments we usually make for vacations. I must say I cannot be sure, and obviously the question is more readily answered by the majority side that does the scheduling around here. But I think in our exchange the gentleman from Maryland has kind of indicated, along with the gentleman from Illinois, that there is an element of uncertainty about what we have gotten accomplished around here before we break.

□ 1420

It is absolutely essential, as the gentleman indicated, to get a debt ceiling passed. Probably be in a temporary debt ceiling, not one that would run the full gamut of the year, but even at that, as the gentleman well knows, there are very few sweetners around, as my colleagues know, to get the kind of vote we need for a debt ceiling package. So, we cannot give the gentleman, I do not think, that kind of assurance.

Mr. HOYER. Mr. Speaker, if the gentleman will yield, I think I have an answer to his prior question.

Mr. WALKER. OK.

Mr. HOYER. I have asked the Committee on Rules. As my colleagues know, by unanimous consent, with agreement between both sides of the aisle, 5 o'clock tonight is the deadline for submission of amendments to the agriculture bill. That was done by unanimous consent.

In addition, I will give notice right now. The Committee on Rules will be considering the Arts, Humanities, and Museum Act of 1990, the amendments, on Tuesday, and amendments to that bill need to be filed by 5 o'clock Monday.

Mr. WALKER. Mr. Speaker, I thank the gentleman from Maryland [Mr. HOYER].

Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Pennsylvania.

Mr. WALKER. As my colleagues know, this is something which is really becoming a pattern, which is very, very unsetting to many people on this side of the aisle, I would say to the gentleman. We find out now: Here it is; it is afternoon. Some of the Members have already begun to scatter. For Members who might have an interest in that, what we are being told is that we have got notice now, that we have to have it in Monday after a day of suspensions. Now it happens that we will probably be voting on Monday. This one may not be quite as bad, but it is really short notice for Members who are not on the committees and familiar with the schedule to——

Mr. HOYER. Mr. Speaker, before the gentleman from Pennsylvania [Mr. WALKER] gets too far into this short notice——

Mr. WALKER. OK.

Mr. HOYER. Notice of this was given on Tuesday. I just did not know about it.

Mr. WALKER, I see. OK. That is far more——

Mr. HOYER. The point of the gentleman from Pennsylvania [Mr. WALKER] is well taken, and we want to try to give, and that is why the gentleman from Massachusetts [Mr. MOAKLEY] did, in fact, on Tuesday give such notice. I just did not know about it.

Mr. WALKER. Mr. Speaker, if the gentleman will yield just further on the question of August, I guess my concern is on behalf of Members, that if reservations are in place and so on, whether or not they ought to begin the process of even canceling it, and doing some things like that and rearranging their schedules. I know that there is no possibility of giving a firm answer on this, but I think it would be helpful if we knew which way the thing was even bending so that Members had some feel for what they ought to be doing. It is very difficult to operate in uncertainty. We would be better off to say that we are leaning in the direction of being here that——

Mr. HOYER. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Maryland.

Mr. HOYER. Having spoken to the Speaker about this, and the majority leader, I can tell my colleagues there is an element of certainty in this, and the certainty is that we will not leave town without passing a debt ceiling extension of some duration that gets us through the recess. It would be irresponsible to do otherwise, and we have no intentions of doing so, so that in all honesty I suppose the Members ought to be aware that is a consequence which may occur.

It is a very thorny issue confronting us. The summit is going on, and that has some impact on it, although it is not dispositive of it. But I will also add again that the leadership on this side of the aisle, and I believe the leadership on the other side of the aisle, would very much like to see us meet the schedule that we gave to Members before so they could, in fact, be with their families and comply with the reservations and plans they have made to be with their families on the vacation during the school break with their children.

Mr. WALKER. Mr. Speaker, I have no doubt about the hope. I am a little concerned about the followthrough.

Mr. MICHEL. Mr. Speaker, maybe with that kind of deadline out there and the apprehension on the part of the Members, it might be helpful with that kind of pressure out there to help expedite the program. I am not sure. There are always some elements that are outside our control here, but it just might help to do that, and, if so, we would all be better off.

ADJOURNMENT TO MONDAY, JULY 23, 1990

Mr. HOYER. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore (Mr. BRYANT). Is there objection to the request of the gentleman from Maryland?

There was no objection.

HOUR OF MEETING ON TUESDAY, JULY 24, 1990

Mr. HOYER. Mr. Speaker, I ask unanimous consent that when the House adjourns on Monday, July 23, it adjourn to meet at 11 a.m. on Tuesday, July 24, 1990.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. HOYER. Mr. Speaker, I ask unanimous consent the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF HOUSE RESOLUTION 418

Mr. HARRIS. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of House Resolution 418 as my name was listed in error.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

AMENDING FAIR LABOR STANDARDS ACT RELATING TO AMERICAN SAMOA

(Mr. FALEOMAVAEGA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous material.)

Mr. FALEOMAVAEGA. Mr. Speaker, I rise today to introduce legislation which will correct an inadvertent change made last year to the minimum wage law of American Samoa.

Mr. Speaker, last year this Congress passed Public Law 101-157, amending the Fair Labor Standards Act of 1938. The primary effect of this law was to increase the Federal minimum wage.

Section 4 of the act addressed special industry committees in Puerto Rico, the Virgin Islands, and American Samoa. In this section the jurisdiction of the special committees to Puerto Rico and the Virgin Islands was removed. Section 4 of the 1989 amendments inadvertently made a provision in section 8 of the Fair Labor Standards Act applicable to American Samoa. This section of the Fair Labor Standards Act had never previously been applicable to Samoa. The 1989 change requires the industries in Samoa to provide substantial documentary evidence as to why the minimum wage in Samoa should not be the Federal minimum wage.

Mr. Speaker, my district is unfortunately a one-industry community, and that industry is the canning of tuna. American Samoa processes approximately 30 percent of the canned tuna consumed in the United States, and the industry employs about one-third of the territory's work force.

While I very much want to see improved benefits for the people in Samoa, I am afraid that the disclosure of the detailed financial affairs of this industry, which would, I believe, be required under current law, would hurt the only industry in Samoa by possibly disclosing confidential, proprietary information to foreign competition which pays its tuna canning employees as little as 20 cents an hour. This information, together with cheap foreign labor, could be used to the detriment of our already beleaguered domestic tuna canning industry. Should Samoa lose this industry, the economic and social impact on the people in Samoa would be devastating.

Mr. Speaker, I hope this bill can become law before the September minimum wage hearings administered by the U.S. Department of Labor.

H.R. 5329

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 8(b) of the Fair Labor Standards Act of 1938 (29 U.S.C. 208(b)) is amended by striking out the semicolon in the last sentence and all that follows in that sentence and inserting in lieu thereof a period.

THE "GET SERIOUS" BASE CLOSING PLAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin [Mr. ASPIN] is recognized for 5 minutes.

Mr. ASPIN. Mr. Speaker, I rise today to discuss closing military bases and facilities. It's something we must do given the declining military threat in Eastern Europe and the Soviet Union, and serious fiscal constraints at home. Our force structure will be smaller in several years. Our base structure should be, too.

It's tough to overstate how difficult it is to close bases. The last 20 years of base closing history shows a lot more failures than successes.

The trouble began in 1973. That was the year President Nixon submitted a base closure proposal that targeted almost all the Navy's coastal installations from Maine to Long Island, including the Boston Navy Yard. Because Massachusetts was the only State to deny Nixon its electoral vote, the list was considered a payback. Thus politicization of base closings was born.

Congress balked increasingly at successive base closure proposals. Resistance culminated in 1977 when Congress passed a law requiring congressional acquiescence before a major installation could be closed or realigned.

Two base closure plans were submitted by the Carter administration in the years immediately following passage of this law. The smaller realignments and closures on the list were implemented; however, the larger ones were blocked. If Carter's entire list had been implemented, more than 20,000 jobs would have been moved or eliminated. As it was, only 5,400 jobs were affected.

Congress wasn't the only group resisting base closures. Communities that stood to lose bases to closure or realignment also began to fight back. They found they could use the courts to tie up action on closures—sometimes for years—by challenging the conclusions of the environmental study required for each proposed closure.

During the eighties, the Reagan administration chose not to submit any base closure proposals to Congress at all on the grounds that it was by then impossible to close bases.

In 1988, however, a successful vehicle for closing bases was found—the bipartisan commission. The idea originated with the Grace Commission in the early eighties. Several years later, Representative DICK ARMEY, a Republican from Texas, introduced legislation to create a commission.

Then Defense Secretary Frank Carlucci created a commission on his own authority in 1988. He outlined his plans to me and the chairman of the Senate Armed Services Committee, Mr. NUNN. We understood he would need legislation to give the commission power to do something besides write another 200-page dust-gathering report. There were objections, but I believed this was a process that would get results.

So we passed a law chartering Carlucci's group and made sure the law had two features to ensure bases would get closed. The first provision said that whatever list the bipartisan commission recommended would have to be approved or rejected in its entirety by the Defense Secretary and both Houses of Congress. There couldn't be any additions or deletions for any reason.

The second provision was aimed at preventing closures from getting tied up in legal challenges. The National Environmental Protection Act [NEPA] was modified to say that lawsuits against an Environmental Impact Statement, a study required for each closure site, be filed within 60 days.

In December 1988, the Commission recommended 86 bases be closed. Shortly after that, Carlucci, who could have scuttled the list, approved it. Then the House, which also could have rejected the list, approved it. The Senate did likewise. There were three opportunities for scrapping the list, but no one did. Now the bases are being closed.

What all of this shows is that Congress is willing to close bases if the procedure is fair. It also paints a pretty good picture of what that fair procedure is.

By contrast, Secretary Cheney is trying to close bases in the wrong way. All of the problems that plagued administrations during much of the seventies and eighties will be revisited on Cheney. That includes accusations of politics, legal challenges, and, ultimately, congressional vetoes.

My own informal analysis of the current situation shows a two-part Cheney action plan that guarantees bases won't be closed.

One. Stir up the pot by submitting "candidate" lists which don't meet the requirement of current base closing law.

Two. Choose bases located predominantly in the districts of members of the opposing political party.

To see how this strategy has worked, let me review each element in more detail.

At the end of January, Cheney submitted a proposed closure list of 46 bases. Current law requires the Secretary to notify Congress of his intent to undertake a large closure or realignment, which by definition involves more than 300 civilian employees at a given base in the United States. Approximately 20 of the 35 domestic bases on the list are large. Notification must come with the annual budget and must be accompanied by the results of six impact analyses for each facility: fiscal; local economic; budgetary; environmental; strategic; and operational.

The list Secretary Cheney submitted in January didn't meet the criteria. It wasn't submitted with the budget, and the impact analyses weren't done. So without official status, the list merely signified candidate bases to be closed. Facilities can be removed from the list at any time and others perhaps added. That creates potential hostages for the administration whenever they need support for something in Congress. That possibility still exists now.

Then whole new lists appeared. In April, a list of Navy facilities surfaced at an Armed Services subcommittee hearing. Another list was published several weeks later. Some facilities only appeared on the Cheney list, some only on the Navy list, and some only on the third list. Some bases appeared on two lists. Only three appeared on all three lists.

Multiple lists, none with formal standing, suggest that this is not a real attempt to close bases. Multiple lists suggest multiple opportunities to stir up the pot and criticize Congress for protesting.

The second component of Cheney's plan, partisanship, was particularly apparent in his January list. Twenty-nine of the 35 bases also turned out to be in Democratic Members' districts. Such a composition places the list squarely in an old tradition of Republican administrations trying to close Democratic bases and vice versa. If members feel politics has motivated the Secretary, they make sure his closure proposal is voted down.

If we've learned anything about closing bases, we know we need a process that inspires confidence. The current procedural stalemate must give way to a rational, bipartisan procedure.

I've been working with Representative PAT SCHROEDER, chairwoman of the Subcommittee on Military Installations and Facilities, to flesh out such a procedure. Our goal is to close facilities based on a military plan, not politics.

I suggest we follow a five-point plan.

First, there must be a force structure plan to form the foundation of the base closure decision. These are times of great change and uncertainty. To suggest base closures without knowing where we are going with force structure makes no sense. Guessing troop levels or missions or equipment needs means we'll be guessing which are the right bases to close.

It would be a mistake and a waste to cut the budget without closing bases. At the same time, it would be a mistake to close bases before the force structure that should accompany budget cuts has been thoroughly reviewed. Closing a facility only to decide to reopen it a year later would cost taxpayers extra money and hurt the local community.

Second, once the force structure has been determined, a bipartisan way of selecting a base structure consistent with that force structure should be established. I recommend a bipartisan commission. It worked last time. But other ways may be possible.

Third, an expedited process to prevent legal challenges again should be instituted to prevent protracted court battles on the decision to close a base.

Fourth, until the Commission recommends its closure list, bases should be adequately maintained during the review period. Draining operations and maintenance budgets could let bases fall into disrepair—a possible pretext for closure. Bases ought to be closed according to the needs dictated by the force structure plan, not the disrepair of the physical plant.

Fifth, the Commission's work should include an assistance plan to help affected communities. We need to consider retraining workers who will lose jobs when bases are closed. We also need to consider procedures for new uses of military property no longer needed for military purposes.

Our force structure will be reduced. The base structure that supports those forces should come down as well. There's no argument about that from Congress. The only argument is over how to do it. Dick Cheney is playing at base closings while playing politics. The approach he has taken will not close bases. It hasn't in the past and it won't in the future. We should close bases when we know which bases to close. And the only way to do it is with a bipartisan process that takes politics out of the equation.

BASE CLOSURES

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Colorado [Mrs. SCHROEDER] is recognized for 5 minutes.

Mrs. SCHROEDER. Mr. Speaker, Defense Secretary Cheney started the base closure process off on the wrong foot. In January he put out a base closure list which was based more on partisan politics than on a sound future force structure. This forces Congress to set the process right.

I am confident we will do so this summer. I have been working with Chairman ASPIN and others to develop a responsible way to close bases. The key elements of a responsible plan are:

A detailed future force structure plan must be set out before any bases are proposed for closure;

First priority should go to closing bases overseas, where the threat has been reduced;

The selection of domestic bases for closure must be based on the force structure plan, must be based on objective criteria, and must be totally free of any hint of politics, and

Communities must not be harmed by bleeding bases which have not been formally selected for closure.

The size of the American military will decline and bases will have to be closed. The American people have the right to expect that bases will be selected for closure on the merits, not based on partisan politics. That is the goal of the Aspin-Schroeder base closure plan.

TOUGH CHOICES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia [Mr. GINGRICH] is recognized for 60 minutes.

Mr. GINGRICH. Mr. Speaker, I will not take all of my time, but I do want to take some time talk about tough decisions, courage, and the spending process.

As my colleagues know, we had a constitutional amendment offered this week to require a balanced budget. We had a very lively debate on that amendment. I have it here, and it was fascinating.

Mr. Speaker, the amendment ultimately was defeated. One hundred sixty-nine Republicans voted in favor of it. Five voted against. One hundred ten Democrats voted in favor of it. One hundred forty-five Democrats voted against. The consistent theme among liberal Democrats, as they explained why they were going to vote against the balanced-budget amendment, was that we needed the courage to make tough choices, that we had to be willing to control spending here in the Capitol and that a balanced-budget amendment was an excuse to avoid the tough choices.

Mr. Speaker, since the balance budget amendment was defeated, we have had nine opportunities to cut spending on tough choices. We have had a series of recorded votes which allow us to look at nine opportunities to cut spending. We had an agricultural appropriatons bill, which had four amendments to cut spending, and we had a Labor, Health and Human Services, and Education appropriation bill which had five recorded votes on cutting spending. Having been promised by the liberal Democrats that if only we would avoid a balanced-budget amendment to the Constitution, that now was the time for courage, now was the time for hard choices, how did the people vote?

Mr. Speaker, let me first give my colleagues the general vote. On the agriculture appropriation there was a Frenzel amendment to reduce the discretionary spending in the bill back to last year's numbers. That is, if we are faced with a budget crisis, if there is too much spending, if the President needs to call a budget summit, what if we were to control spending to the 1990 level in discretionary agriculture? And it required a 7.7-percent across-the-board cut in discretionary. That is, the bill which is coming out in the

middle of the budget summit was 7.7 percent higher that last year's spending on discretionary. The gentleman from Minnesota [Mr. FRENZEL] offered his amendment. He was defeated by a vote of 305 to 115.

A moment later the gentleman from California [Mr. DANNEMEYER] offered an amendment which gave them some growth, 2.7 percent growth over last year's discretionary. Again, we are in the middle of a so-called budget crisis. We have too much spending, the debt is too big, and the time has come, as our liberal Democrat friends promised us, for courage. What happened to the Dannemeyer amendment? We got the same 115 votes as the gentleman from Minnesota [Mr. FRENZEL]. Three hundred voted against him. Five people apparently failed to vote.

Then there was the amendment of the gentleman from Minnesota [Mr. PENNY] to reduce the discretionary spending in the bill by 2 percent, exempting the Women, Infants, and Children's Program; that is, taking away, not cutting at all in the most sensitive humanitarian program in the bill, could we cut 2 percent, and remember now this is not a bill which has a 7.7-percent increase, so a better way to say it would be the gentleman from Minnesota [Mr. PENNY] was offering to increase spending by 5.7 percent over last year.

□ 1430

That was defeated by 202 to 216. Even an increase of 5½ percent was not big enough for the big spending liberal Democrats.

Now, we finally come to the Walker amendment. In a moment of frustration, having seen three consecutive efforts to cut spending, to cut the increase in spending, to slow down the rate of growth, the gentleman from Pennsylvania [Mr. WALKER] offered to reduce the discretionary spending in the bill by .0000000002 percent. If I count correctly, that is nine zeros and 2, or $19.90. He was offering this to make the point that the urge to spend, the passion for increased spending is so great that even at $19.90 it would be impossible to cut spending.

I want to come back a moment to the debate which ensued, because there was an absolutely hysterical moment in that debate where one of the liberal Democratic leaders jumped up and began to argue against the bill on the grounds that it was too deep a cut, that you could not really accept even a $19.90 cut. Remember, this is a $19.90 cut on a massive increase, on a 7.7-percent increase. That was defeated 175 to 214.

The following day, remember, all this is the same week that we had been promised in the balanced budget amendment that now is the time for courage, now is the time for tough choices. The following day the Appropriations Committee brought to the floor the Labor, Health and Human Services, and Education appropriations. First we began with two amendments on which there was no vote, offered by the gentleman from Pennsylvania [Mr. WALKER]; but then we went to a very specific amendment to freeze the Physician Payment Review Commission to the 1990 level. Notice, not a cut, just a freeze, something that most American households have done, most American businesses have done, to say we will spend the same amount next year as we spent this year. He was defeated by a vote of 115 in favor and 293 opposed.

Now, this was a $65,000 cut in a Commission which most Members of Congress do not know even exists. It was an automatic reflexive spend-more vote.

Following that, there was an amendment by the gentleman from Pennsylvania [Mr. WALKER] to freeze the total appropriations for the U.S. Institute of Peace to 1990 levels. This cut $450,000 in increase out of the U.S. Institute of Peace. You would think with everything happening in Eastern Europe, with all the extraordinary changes happening in the Soviet Union, that last year's amount for the U.S. Institute of Peace might be adequate; but oh, no, this was defeated by 194 to 220.

Then the gentleman from Minnesota [Mr. FRENZEL], having watched four consecutive votes, two of them by voice, to cut specific proposals back to the 1990 level, none of them noticed a cut below—that is, in three other cases it was back to 1990, and in the fourth case there was the sum of $10 million appropriated that never existed before for the education summit, which was $10 million they had not spent last year, a brand new effort to waste money.

At that point we come to the Frenzel amendment to reduce discretionary spending to the 1990 level.

Let me again emphasize that none of these are cuts in real spending. These are stopping the increase. This is freezing that last year's amount, something which every American family has done when it has had to tighten its budget.

The gentleman from Minnesota [Mr. FRENZEL] noted that the discretionary spending was increasing by 15.2 percent; that is, in the middle of a budget summit, with President Bush talking about the debt, with the American people overwhelmingly in favor of a balanced budget amendment, we have a 15.2-percent increase in discretionary spending in the Labor, Health and Human Services, and Education appropriations bill.

Now, freezing at last year's level was so Draconian, so difficult, that the gentleman from Minnesota [Mr. FRENZEL] got 85 yes, and 333 no.

He was followed by the gentleman from Minnesota [Mr. PENNY], who decided that he would try for a 2-percent across-the-board cut in all discretionary spending, except, he said, let us not cut spending on chapter 1 compensatory education, education for the handicapped, higher education, student financial assistance, or library assistance programs. In other words, he took what he thought were the politically most sensitive areas, took them out of his amendment, and then said, let us only accept a 13.2-percent increase. Notice, 13.2 percent. For most American families if you could increase your spending 13.2 percent a year, you would think you were doing fine.

The U.S. Congress voted 160 yes to 253 no.

Finally, the liberal Democrats, the more activist Members who had gotten frustrated having to vote no all these times, they came up with a good one. They said, "Let's freeze the Offices of the Secretary of Labor and Education and the Office of the Secretary of Health and Human Services." In other words, let us stick it to the Republican Cabinet Secretaries, figuring, I guess, that the Democrats would all be willing to stick it to the Cabinet Secretaries and freeze their offices and that would give them a good yes vote. They were wrong.

Even in an effort narrowly targeted to the administrative offices of the three Secretaries, they lost by 204 to 212.

In other words, they found that they could carry the Republicans. Republicans were willing to vote 92 in favor, 74 against, to cut $2 million from the Offices of the Secretary of Labor and Education, and $2.8 million from the Office of the Secretary of Health and Human Services. Even though those are Republican appointees, the Democrats voted 112 in favor and 138 against.

Now, I want to walk you through each vote how the party line broke down so you will appreciate why those of us who are concerned about reducing spending and those of us who favor a balanced budget amendment and those of us opposed to raising taxes have great doubts about this Congress and great doubts about allowing the Democrats to have more money.

Let me carry you back to the agricultural appropriations. The Frenzel amendment, which remember, froze discretionary spending at last year's amounts, in other words, did not allow them to increase spending, did not cut a dime below last year, Democrats voted 11 in favor and 238 against freezing.

Republicans voted 104 in favor and 67 against.

The Dannemeyer amendment, Democrats voted 13 in favor. This you will remember was going to allow a 2.7-percent increase in spending. The Democrats voted 13 in favor, 233 against. The Republicans voted 102 in favor, 67 against.

The Penny amendment which allowed a 5.7-percent increase and exempted the Women, Infants, and Children's Program, clearly designed to be sympathetic to try to maximize the vote, the Democrats voted 58 in favor and 190 against. The Republicans voted 144 in favor and 26 against.

The Walker amendment, clearly designed to highlight the problem, $19.90. The Democrats voted 19 in favor and 203 against. The Republicans voted 156 in favor and 11 against, and as I remember, I do not have the number here, but as I remember there were 23 Members so confused by the offer that they did not even agree to vote. They voted "present" because they were not sure how to vote.

Mr. MOODY. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I am glad to yield to the gentleman from Wisconsin.

Mr. MOODY. Mr. Speaker, is the gentleman referring to the $19.90 cut?

Mr. GINGRICH. Yes.

Mr. MOODY. Well, I thought it was a pretty demagogic thing to do.

Mr. GINGRICH. Cheap is a legitimate term.

Mr. MOODY. I was not going to use the word cheap, because I would not describe a Member's motives, but I think it is at best demagogic, because we all know we spent several thousand dollars in printing costs, not to mention the time of the staff in the House here, and the debate was at best on a ridiculous amendment.

I also heard the gentleman on my monitor in my office describing the $65,000 cut in FPRC as evidence of how Democrats just could not bear to cut spending because of an irresistible desire to spend, and then the gentleman went on to say that most Members of the House do not know what FPRC is. Well, I do know what it is, because I serve on the committee that FPRC reports to.

FPRC, I say to the Republican whip, advises Congress on how to cut spending.

□ 1440

It advises Congress on how to restrain medical costs, the most rapidly rising part of the budget other than interest costs. There is probably no money more better spent in this body than on something like FPRC which tells us how to get on top of medical costs. For the gentleman to stand in the well and say that this is a misguided vote to not want to cut those dollars would be like saying let us not cut a dollar so that we can save $100.

Mr. GINGRICH. Let me walk the gentleman through there. There are nine votes here. How does the gentleman imagine he voted on the Frenzel amendment to freeze discretionary spending in agriculture? My guess is the gentleman voted no. How would the gentleman guess?

Mr. MOODY. I voted no.

Mr. GINGRICH. The gentleman voted on the Dannemeyer amendment to allow a 2.7-percent increase on discretionary spending.

Mr. MOODY. When I say I voted "no," I did not vote for a freeze. These are cuts in real terms. When the gentleman stands on the floor as he did a few minutes ago to say to simply survive on what we had last year is not a cut, that indicates to me that the gentleman knows a lot more about history than he knows about economics.

Mr. GINGRICH. Now, wait a second. Wait, I reclaim my time on that.

Mr. MOODY. May I finish my sentence?

Mr. GINGRICH. Go ahead.

Mr. MOODY. If you give the same budget to someone who is in an environment that has inflation, you are not giving them the same dollars. The gentleman himself has argued that way for military spending. He voted that way for military spending, because to give the military the same money in the past as they have had in the years before is to cut them.

Mr. GINGRICH. What about working Americans?

Mr. MOODY. So do not stand here, Mr. Whip, and say that it is the same amount of money to give someone the same dollars when the gentleman knows that they buy 5, 6, 8 percent less.

Mr. GINGRICH. Let me reclaim my time for a second, because I am fascinated. The gentleman did not like the Physician Payment Review Commission cut, because it was $65,000.

Mr. MOODY. I just explained why. The gentleman's comments were misleading.

Mr. GINGRICH. The gentleman did not like the Frenzel amendment on agriculture; he did not like the Dannemeyer amendment on agriculture. Does the gentleman remember offhand how he voted on the Penny amendment? His party voted 190 against.

Mr. MOODY. I have voted for many Penny amendments to cut 2 percent, but not on that one.

Mr. GINGRICH. All right, would the gentleman like to go down through the U.S. Institute of Peace cut?

Mr. MOODY. Let me tell the gentleman why. Is this an interrogation where I do not get to say any more than yes or no?

Mr. GINGRICH. Go ahead.

Mr. MOODY. The reason I voted no on those Ag cuts is that those were not targeted cuts by and large. The Frenzel one was, and some of the others were, but not the Frenzel, as I understand the Frenzel amendment or the Penny amendment, and while I often vote with Mr. PENNY on those 2-percent cuts, I did not in this case, and I did not with Mr. FRENZEL. They are across the board, and they are not discriminating for the most part with one minor exception, because they do cut, among the things they cut, they cut food stamps and they cut nutrition for the poor and an area which has been cut time and time again over the last 10 years. We have succeeded in this body that "shows no appetite to cut," as the gentleman has said, we have cut. We have cut nutrition programs. We have cut feeding programs for low-income people, a nation that was awash in extra food, which has one out of eight people that go to bed hungry every night, and I think that is unacceptable, and in a nation this rich, so I voted not to make those cuts. But I voted for the balanced budget. I voted for many cuts, Mr. GINGRICH.

Mr. GINGRICH. But my point is that if we look at nine consecutive votes in the last 2 days, the Democratic Party voted 238 to 11 for higher spending on the first vote, 233 to 13 in favor of higher spending on the second vote, the Democrats voted 190 to 58 on the third vote, 203 to 19 on the fourth vote, 243 to 3 on the fifth vote, 194 to 50 on the sixth vote, 247 to 2 on the seventh vote, 210 to 38 on the next vote, and on an amendment which would have cut money from the Secretaries of Labor, Education, and Health and Human Services who were Republican appointees, a Democratic offer designed to sort of stick it to the Republicans, the Democrats voted 138 to 112 in favor of spending more money. Now, I am suggesting, with nine consecutive recorded votes on spending cuts, and the gentleman's party is consistently in favor of bigger spending, it is fair to say the gentleman is in favor of bigger spending.

Mr. MOODY. Do I get to respond?

Mr. GINGRICH. Sure.

Mr. MOODY. Our party is probably more for spending on human needs than your party, that is true. We had a series of votes on nutrition, on health and education, and I think those are the departments we are looking at, but we voted not to cut on research on cancer. Does the gentleman remember the speech by the gentlman from Kentucky [Mr. NATCHER], which he gave on research on cancer? The gentleman's party was voting to cut, 24,000 people a year die, on cancer, and yet we want to cut spending on that, researching that is to save lives? Yes, we probably do want to spend more than the gentleman does on saving lives on cancer deaths. We probably do. The gentle-

man is probably right, but our party votes for less spending.

Mr. GINGRICH. Now, wait a second.

Mr. MOODY. When the gentleman says spending, there is spending and there is spending.

Mr. GINGRICH. All right.

Mr. MOODY. There is spending on humans, and there is spending on other things.

Mr. GINGRICH. Is there any part of the domestic welfare state that the gentleman's party is prepared to look at critically and cut?

Mr. MOODY. First of all, that term "domestic welfare state" is a ridiculous demagogic term in and of itself.

Mr. GINGRICH. Why? It is academically a very accurate term.

Mr. MOODY. This is not a welfare state. Because in America you are allowed to fail. We have many poor people who fail. We do not have a welfare state. This is not Sweden or Norway. This is the United States. We do not have a welfare state. We have no medical coverage for 37 million people. The gentleman calls that a welfare state?

Mr. GINGRICH. Wait a second, the gentleman does not regard Medicaid and food stamps and aids to families as welfare?

Mr. MOODY. We do not have a welfare state.

Mr. GINGRICH. I mean, do these things exist in Milwaukee?

Mr. MOODY. It is about time you start defining a welfare state. What is a welfare state?

Mr. GINGRICH. Well, I will tell the gentleman.

Mr. MOODY. A welfare state is not a state that lets 37 million people have no health care coverage.

Mr. GINGRICH. Mr. Speaker, I reclaim my time.

Mr. MOODY. The gentleman throws these terms around.

Mr. GINGRICH. I reclaim my time, Mr. Speaker.

Mr. MOODY. You do this with this veneer of sophistication.

Mr. GINGRICH. Let me just state, and you can tell me if I misunderstand Milwaukee, which many people thought of as a progressive city. My memory and my impression is that Milwaukee has aid to families with dependent children, Milwaukee has food stamps, Milwaukee has Medicaid so that the very poorest are covered in health care, that, in fact, Milwaukee has what would normally be called, and by any reasonable academic scholar, a framework that would be called a welfare state. Now, why are you so offended that I use the term that when I was teaching at West Georgia College would have been considered a perfectly reasonable term? People do get welfare. There is a safety net, and it happens to be extraordinarily destructive, and it happens to have crippled, I think, the inner city poor, but we do. In all fairness, can you not, at least, concede that, while you may not like the term, it is fair to suggest that if people are on aid to families with dependent children, living in public housing, getting Medicaid and getting food stamps, that that could be called welfare and is provided by the State?

Mr. MOODY. We do have a State which has some welfare. That is not what you mean by America, the welfare state, as you throw that term around. You mean America where we have a whole apparatus of protecting everyone, and that we do not have.

Mr. GINGRICH. I did not say that.

Mr. MOODY. What do you mean by welfare state? A State that has some welfare in it, or do you mean a State—let me finish my statement—or do you mean a State that has a total panoply like in Scandinavia? We do not have that. Milwaukee, yes.

Mr. GINGRICH. I did not use Scandinavia. The gentleman used Scandinavia.

Mr. MOODY. We do not have it. We have people on food stamps, Mr. GINGRICH. We have a lot of people who have no public housing. We have a lot of people who have no health care.

Mr. GINGRICH. Let me answer your question.

Mr. MOODY. Are you proposing to eliminate those that we have?

Mr. GINGRICH. Mr. MOODY, let me answer your question.

Mr. MOODY. Make yourself plain.

Mr. GINGRICH. I am going to try to make it very plain. Mayor Dinkins, of the largest city in America, has a $19 billion city budget. He has 300,000 full-time employees.

Mr. MOODY. Let us answer New York, that is easy. We can both do that, because we are not from there. When you say the welfare state, you refer to the United States of America, not Mr. Dinkins. Mr. Dinkins is not President.

Mr. GINGRICH. Can I finish my point? I am simply suggesting, analytically that when you look at the failure rate of the New York City schools or you look at the failure rate of the Chicago schools, that I am, in fact, closer to somebody who may be a constituent of yours, Polly Williams, who is a Democratic legislator, who has come to the conclusion that in the case of these large urban bureaucracies that they are not serving the poor, and she has offered a bill which this fall in Milwaukee will allow 1,000 children to have a choice of where they go to school. They are actually providing this choice at less than half the price of the Milwaukee public bureaucracy. It costs $5,900 for the average child in the Milwaukee public bureaucracy. The voucher is $2,500.

Mr. MOODY. What is your point?

Mr. GINGRICH. Polly Williams' argument would be that when you look at, and I used New York because the number is so obvious, $19 billion, but I will be glad to use Chicago. I do not know Milwaukee as well. I do know the Chicago situation pretty well. But when you get to these large urban bureaucracies that are trying to deliver welfare, that, in fact, the very structure of the system does not work, that the problem for a Mayor Dinkins is not $19 billion is too little, it is that the structure of the urban bureaucracy is failing. I will give you one example.

Mr. MOODY. But we do not even disagree, but we are not on the subject we were on a few minutes ago. We have changed subjects.

Mr. GINGRICH. Let me give one example, I am going to come back to the subject.

Mr. MOODY. I hope so.

Mr. GINGRICH. In New York it costs an estimated $250,000 to fire a teacher, with the result that they have teachers currently teaching in New York public schools who have been accused of child molesting and convicted of assault, but they cannot figure out how to get them dismissed.

Mr. MOODY. But you were talking about Democrats' appetite for spending a minute ago, and now you are talking about how hard it is to release a teacher in New York. I do not think they are related at all.

Mr. GINGRICH. They are very related. If you design a government so dumb that it costs you $250,000 to fire a child molester, it is no wonder you have to spend a lot of money on government.

Mr. MOODY. Is that really why we are spending a lot of money, because we cannot fire people in New York? I mean, please, Mr. GINGRICH, I am not a student at your university. I do not think that you can use that logic that you used there in that classroom in this classroom and expect to get away with it.

Mr. GINGRICH. Let me give you some examples. The gentleman from Pennsylvania [Mr. WALKER], who is here, may want to elaborate for a second. One of the amendments offered yesterday was to freeze "law school clinical experience to fiscal year 1990 levels." It is going up $65,000. It was defeated on a voice vote. I would just suggest to you that it takes a pretty bizarre standard to assume at a time that we are having a budget summit and we are being told we must talk about taxes and we cannot cut spending to assume that law school clinical experience has to have $65,000 extra.

□ 1450

Mr. MOODY. How do you know Democrats were a majority against it? It was a voice vote. How do you know Republicans didn't vote against it?

Mr. GINGRICH. Give me a break.

Mr. MOODY. Now just a moment, Mr. GINGRICH.

Mr. WALKER. I was on the floor. The Democrats were the ones who shouted "no;" and then voted it down.

Mr. MOODY. I think the gentleman should have asked for a recorded vote, if he wants to make partisan aspersions. If you want to make partisan charges, call for a record vote. If you are going to use voice votes now to make partisan charges, then we have got a new ball game. Start calling for a record vote if you are going to use those for partisan reasons. The gentleman is making a very partisan statement in the well. That is what brought me over here. Now you are resorting to voice votes to prove your points.

Mr. GINGRICH. I yield to Mr. WALKER, and then we will come back to recorded votes.

Mr. WALKER. I just want to make the point that a few minutes ago the gentleman stood up and I think referred to what I did as demogogic, and then he said that the reason why he had to vote "present," he could not make up his mind on a $19.90 cut——

Mr. MOODY. I did not say I could not make up my mind. I said it was a ridiculous vote.

Mr. WALKER. Could we have regular order here, Mr. Speaker? I thought I was the one yielded to.

Mr. MOODY. Point of personal privilege. The gentleman is referring to me. He is misquoting what I said.

Mr. WALKER. May we have regular order here, Mr. Speaker?

Mr. MOODY. I would appreciate the gentleman not misquoting me.

Mr. WALKER. Could we have regular order here, Mr. Speaker?

The SPEAKER pro tempore. (Mr. BRYANT). The gentleman will suspend. The time belongs to the gentleman from Georgia. He has yielded to the gentleman from Pennsylvania.

Mr. WALKER. I think that is the regular order. Thank you, Mr. Speaker.

The gentleman from Wisconsin seems to be getting very emotional and upset here, and I just need to clarify the record.

Mr. MOODY. I do not like to be misquoted.

Mr. WALKER. The point was that I think he said that he did not vote for the $19.90 vote because it cost thousands of dollars to print the CONGRESSIONAL RECORD.

Mr. MOODY. That is not what I said either.

Mr. WALKER. I am not sure exactly what the logic of that is. But the gentleman is now suggesting that vote should have been called. That also would have I suppose caused some additional printing costs to print up the record vote. I mean, the gentleman is being somewhat inconsistent in his desire.

This gentleman made a decision, as many Members do on the vote, to let a couple of these measures go by recorded vote. We could have done otherwise. But I can tell the gentleman, just from my own experience, I was here on the floor. I offered the amendment. I am just saying to him that it was in fact the majority of Democrats who voted no on that amendment.

Mr. GINGRICH. Let me just clarify for one second. That is while we are standing here, I added up nine votes. These are recorded votes in the last 2 days. There are nine of them. On those nine votes the Democratic Party voted 1,896 in favor of more spending, 306 to cut spending. That is an 86-percent record in favor of more spending.

These are recorded votes over a series of nine different proposals. Some were across the board, some were targeted.

I yield to the gentleman from Wisconsin [Mr. MOODY].

Mr. MOODY. I appreciate the gentlemen. They are both friends of mine and colleagues. I do not mean to be cantankerous. But first if I may, Mr. WALKER, I did not say I could not make up my mind. I said I considered it a frivolous amendment that wasn't offered in seriousness.

Mr. WALKER. Well, if the gentleman will yield, I think he said demagogic.

Mr. MOODY. Well, I will not quite yield yet. I said demagogic, and I thought it was, and therefore I did not want to dignify it with a yes or a no vote. But voting "present" showed my contempt for the motion.

The second point I want to make to the gentleman in the well is that the argument is not really about the level of spending. First of all, some of those votes were not for more spending, they were to prevent cuts. There is a semantic difference. There is a substantive difference too. Some of them were to prevent cuts, not more spending.

Some cuts are very cost-ineffective, Mr. GINGRICH. Some spending actually pays for itself. That is why we have government. To have no government would be very expensive, and that is why we have cancer research, that is why we have law enforcement, air traffic controllers, and a whole lot of other things. You can call it spending, but it is the things most people in this country want. For the most part, it is cost-effective. Some of it is not, and should be cut.

But most of the argument between our parties, if I could say this, and I think the gentleman would agree, is really not about the level of spending, because many speakers have taken the floor to show that the President wanted to spend and how, what we have wanted to spend has been not very different in total amounts.

The real argument is about the mix of spending, the composition of spending, Not on the amount. That is where we differ on parties.

Yes, if you roll a series of civilian spending votes on health care and education, I suspect we would vote against cuts at this time, because they have been cut. If you rolled a series of votes on military spending, I suspect your party would want more spending than us. It is not the level of spending that differs.

Mr. GINGRICH. I think what you just said is a very fair statement. Between the two parties I think it is fair to say the Republican Party has a deep bias in favor of letting people keep their own money and provide things for themselves.

Mr. MOODY. Unless it is for military.

Mr. GINGRICH. Unless we believe the national defense or drugs and crime, which are the two areas where we are probably the most willing to raise costs, if we think foreign danger or crime and drug dealers require us to be involved, we are more willing to spend on it.

Mr. MOODY. Not on education.

Mr. GINGRICH. On the other hand, if you want to make a good clear case for government spending, I think that is a legitimate argument. All I was suggesting was that whichever approach was taken in the last 2 days, we had heard from a number of liberal Democrats on the balanced budget amendment debate, that they were against the balanced budget amendment because that was not the right way to control spending. That if you wanted to control spending, they had to make, and this phrase appears over and over, and I have the RECORD here, it appears over and over in the debate that day, they had to make "tough choices."

Now you have nine tough choices.

Mr. MOODY. But they weren't. Could I take a minute? The problem, and I voted for the balanced budget amendment, I spoke for it, and frankly I resent your saying that "liberal Democrats" were for it. I consider myself liberal on some issues and conservative on others. I think this painting people with brushes and labels does not make sense. But if you insist on doing it, I would disagree.

Mr. GINGRICH. I do not mind being a conservative Republican.

Mr. MOODY. Fine. But I do not call you a conservative Republican, I simply call you a Republican and I will let you label yourself. I think we all appreciate that honor.

I think what we saw in the balanced budget amendment, the reason I supported and spoke for it, is it would force choices. It would force us to choose between money for cancer and other things. What we don't have now, unfortunately, in my judgment is we don't have simultaneity in the budget process. We vote that we want more

money for cancer research, yes or no, or do you want to cut cancer research money, yes or no. Most people say no. So a lot of Republicans say no, and some Democrats say no.

Do you want to cut money for education, yes or no. A lot of people say no. Do you want to cut money for this, yes or no.

Unfortunately, we are not at the same time forced to make decisions, do you want to raise taxes or raise money for that. The gentleman and I would agree that is the only way we can make decent choices, and this body does not have a structure to make us make those choices.

It is not that we crave spending, Mr. GINGRICH, which is I think the implication, that because we are Democrats somehow we have this urge, primeval urge to spend. It is because people in this body generally want to do what is right for the American public. We know there are needs out there, but we are not forced to trade off in a way that I wish we were, so we had to make the trades. You and I would agree we need to make tradeoffs.

Mr. GINGRICH. Let me come back on just two examples that we had that were voice voted, and I am not going to talk about partisanship. The education summit followup is getting $10 million. Now, as far as I am concerned, this may well be an administration request, but it is just goofy. The President put together a Governors' education summit on the cheap. He has an entire Department of Education down here. Why would you at a time when we are trying to balance the budget and trying to fight our way through a budget summit, why would we, the Congress, and here I am in part taking on the administration, why would we kick in $10 million for a new bureaucracy to arrange for Governors to hang out with each other once a year?

It seems to me you already have a Governors' Association to do this, you have already got the Department of Education to do this. This is just $10 million where the Congress could have courageously said no.

Then you add, as I said a while ago, the law school clinical experience. I am not a lawyer, so maybe I lack this. What does the law school clinical experience have to do with where we are at and why would we provide not just last year's amount, but $65,000 additional?

I am glad to yield to the gentleman from Minnesota [Mr. PENNY].

Mr. PENNY. They did not need the increase. I voted with the gentleman on that amendment. He did not push that to a recorded vote. I also voted with him on the $10 million reduction in the Governor's Conference on Education, because I did not see that that was a worthwhile request. He did not push that to a recorded vote.

We had several others in the course of those 2 days of votes. It is unfortunate that we are in a position now where after a series of nine votes we are drawing conclusions. We have got I think five more appropriation bills to come to the House floor, and there will certainly be opportunities to vote for spending reductions in Interior Department legislation, in legislation appropriations, in defense appropriations, and military construction appropriations. I think in fairness to the entire institution, Members on both sides of the aisle, it might be worthwhile to take a look at some of the votes as those additional bills come up. I am certain in at least a few categories that the numbers are going to shift from this side of the aisle to that side of the aisle in terms of who is for higher spending. So that would provide a little more balance than what we have seen in just the last 2 days of votes.

□ 1500

And I say that to someone who offered at least two of those spending reduction amendments in the last 2 days.

Mr. GINGRICH. Let me yield first to the gentleman from Wisconsin [Mr. MOODY].

Mr. MOODY. Mr. Speaker, I just wanted to say that I totally agree with the gentleman on the $10 million for the education summit. It sounded like an awful lot of money. The gentleman is aware, of course, that the administration's request was for $20 million, and the committee, controlled by Democrats, cut it in half. I still think it should have been cut some more. I would agree, if the gentleman would have asked for a recorded vote, I would have at least been with him on that one. I would be happy to prove that if the gentleman would——

Mr. GINGRICH. Let me close with this point because I am going to have to go. I do not think it is unfair as a broad statement, I thought it was sort of interesting, the week of the balanced budget amendment vote, that on nine votes the Democrats voted 1,896 in favor of either more spending or above last year's amount to 306 against, which is an 86-percent prospending bias. The Republicans voted 1,059 for less spending to 450 in favor of more spending, for a 70-percent antispending bias.

My only point was that when we approach the budget summit, when we approach the issue of more revenues, when we approach the whole question of why the American people are cautious about Congress, when you go through all 9 of those that were voted on plus the 2 that lost on a voice vote, 11 opportunities, and you go to any home in America and you try to say, "On none of these could we cut anything," I think the average American grabs his wallet a little closer. I think that leads them to be very much more cautious than assuming that Congress does not need a balanced budget amendment.

I would just say, coming in this week that we have been told by those who voted against the amendment that what we needed was courage and tough decisions now, that it was sort of remarkable and—I did not do it—but if one were to actually track the nine amendments that were voted on and see how often the people who voted against the balanced budget amendment voted in favor of more spending, having just said what we needed was to be tougher now, which is why they were voting "no" on the balanced budget amendment, we would be astonished, I think, at how often the antibalanced budget amendment votes were also pro-spending.

Mr. MOODY. Let me ask the gentleman a question. What if the first bill up after the balanced budget amendment had been the DOD appropriations, do you think the gentleman in the well would be giving the same speech about who voted which way?

Mr. GINGRICH. I think that this year's Department of Defense appropriations bill is going to involve a dramatic cut in spending. I fully expect the Department of Defense appropriations bill by the end of this year to be somewhere between $6 billion to $10 billion lower. I am prepared to support a $6 billion to $10 billion-plus cut in defense this year. I am prepared to support a $100 billion-plus cut in defense over the next 5 years. But if I turn to the other side of the aisle and say, "Now how much would you be willing to cut domestic entitlements, how much would you be willing to cut domestic discretionary spending?", I doubt very much if we could find anything like this same level of willingness to cut the domestic welfare state that we have had to cut defense.

Mr. Speaker, I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding. I would say to the gentleman from Wisconsin, the 2-percent across-the-board cuts, the Frenzel cut to maintain a freeze on this year, I think you are going to find Republicans perfectly willing to vote for those on DOD. The $65,000 cuts here and there to maintain a freeze, you are going to find a lot of Republicans willing to do that on DOD. And that will serve as a real contrast with the other side of the aisle.

Mr. MOODY. Let me have a moment.

Mr. GINGRICH. Sure.

Mr. MOODY. If we had had a decade in which we doubled discretionary civilian spending, I would feel very different. I probably would be arguing with the gentleman it is time for cuts.

But, no, we have not doubled discretionary spending, not in real terms. You got it for inflation. We have raised military spending enormously.

Mr. GINGRICH. Well, would the gentleman like to comment on how much we have increased entitlements, which have gone up far more than the military?

Mr. MOODY. I absolutely agree with the gentleman. I am on the committee that wrestles with entitlements. I remember the Buddy MacKay-Marvin Leath amendment on this floor that froze COLA's, I voted for that. I think we have to deal with entitlements as well as other things.

Only 54 had the courage, and very few on your side of the aisle had the courage to vote for that, I might add. If we had passed that Leath-MacKay budget amendment, we would not be in the fix we are in now.

So my credentials on the entitlements, I think, are in order.

Mr. GINGRICH. That is fair.

Mr. MOODY. I agree with the gentleman. Let me say this: Entitlements are largely based on demographics, unfortunately, because of the elderly population, the health care cost rises per patient, and the more-aging population. More people are becoming Social Security recipients. That is not something we can change. We have decided we want to cut the per capita of benefits to elderly people and figure out ways to get on top of the medical costs so that the Medicare can cover it. That is why we need things like this.

Mr. GINGRICH. I can report to the gentleman, if we have a successful budget agreement, you will have an opportunity to vote on a very complex package that will include some real spending cuts. I thank you very much for participating today, and I yield back.

CONTINUING HUMAN RIGHTS VIOLATIONS IN ROMANIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia [Mr. WOLF] is recognized for 30 minutes.

Mr. WOLF. Mr. Speaker, I would like to bring to the attention of my colleagues the situation of Mr. Marian Munteanu, a young, promising, student leader from Romania who has labored peacefully and earnestly for democratic reform in his country. I met Mr. Munteanu during a visit which he made to Washington in February this year. In fact we spoke just outside this Chamber. He is a very gentle and intelligent young man who is deeply committed to helping to form a free, democratic society, and multiparty system. He is also deeply committed to nonviolent, I stress nonviolent, demonstration as a means to pressure the Iliescu government to move forward toward a multiparty democracy.

We heard some disturbing news, however, that on June 14, Mr. Munteanu, along with nearly 200 fellow students and other demonstrators, was beaten severely by miners while peacefully, I stress peacefully, protesting on the streets of Bucharest. As they were being brutally assaulted, police officers stood by watching, without lifting a hand to stop this carnage. Now over 180 protestors are in jail, while not one single miner has been arrested as a result of their actions in mid-June.

During his beating, Mr. Munteanu was seriously injured, although the full extent of those injuries are not known. He reportedly suffered broken bones in his left hand and right ankle. Apparently Mr. Munteanu was arrested immediately after being beaten and taken to a hospital.

Since then, however, Mr. Munteanu has been moved to prison and is now being denied medical treatment. At last report, he was suffering from memory loss, dizziness, and nausea. Our Embassy staff in Bucharest, Romania requested permission to see Mr. Munteanu and other prisoners, but were denied. The Red Cross was given permission to visit them, but only on the condition that they not report on what they saw. They could visit but not report. Only Mr. Munteanu's mother has been allowed to see him, and she reports that his condition is deteriorating.

Unfortunately, this is only the latest in a series of blatant human rights violations under the Iliescu government in Romania. It is now very clear that not all of the old Ceausescu regime died with Ceausescu. More specifically, it is becoming widely acknowledged that a significant part of the old Securitate secret police force is becoming increasingly involved in the current government and its operations. In fact, the defense minister of Romania has even publicly admitted that part of their "new" internal security force will be made of former Securitate officers!

Now, everyone in this country, and certainly in Romania, knows how vicious and brutal the Securitate was under Ceausescu and how they are today under the Iliescu administration.

Mr. Speaker, it is also very clear that this same part of the old Securitate has been involved in intimidating and beating government opponents in Romania, During the elections in May, opposition political parties were harassed, their meetings were sometimes disrupted, offices were broken into, and, perhaps most importantly, they were often denied access to the state-controlled media.

It is time for the United States, and all decent people, East and West, to make it clear that these blatant violations of human rights will not be tolerated. While almost every other part of Eastern Europe is moving toward democratic reform, the Romanian Government is not.

I am before you today to ask that we, the United States Congress, urge that certain conditions be met before we even think about considering the issue of granting MFN status to Romania.

First, let us insist that a representative member of the American embassy in Bucharest be allowed to visit Mr. Munteanu with a physician to ensure that he receive adequate medical attention.

Also, that that physician ought to be able to examine all of the other prisoners that are held in the Romanian jails as a result of their arrest in this demonstration.

Second, if the Iliescu government is committed to upholding human rights and improving relations with the United States, let us see that the Government releases all, all 185 prisoners, including Mr. Munteanu, who were arrested in the June 14–15 protests.

□ 1510

This would be an opportunity for the Iliescu government in the spirit of reconciliation and peace and harmony to demonstrate its commitment to democracy, to show to the world that it really did care and was committed to democracy.

Again, it could be in reconciliation, in the reconciliation spirit, and we in the Western World will watch to see if they can seize that opportunity. Third, as a further sign that the Romanian Government is committed to an open, a multiparty democracy, let Members see that opposition parties are given equal access to the government-controlled radio and television stations, and see the establishment of new, independent radio and TV facilities. That access is essential for the growth and development of a healthy, multiparty system in the country. Also, the opposition press must be given the opportunity to have their own printing press, their own distribution system whereby the opposition press can get their newspapers around the country.

Mr. Speaker, in closing, if Romania wants to be accepted as a member of the international community, and I am sure it does, it must demonstrate to the world that it is serious about upholding the rights of its citizens. Nothing short of the release of all political parties and an end to the harassment of the opposition parties will suffice. The Romanian Government must shed its old ways of dealing with political opposition and commit itself to the pursuit of genuine democratic reform.

It is my sincere hope and prayer that the Romanian Government will

seize this opportunity and release all these political prisoners, will allow the press and the radio and the TV and independent systems and allow the opposition newspapers to distribute their papers and have their printing presses. That, I would say to Mr. Iliescu and to those in the Romanian Government, that would send one of the most positive messages that they could possibly send to those in the West and in the free world.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. TAUZIN (at the request of Mr. GEPHARDT), for today, on account of official business.

Mr. THOMAS of Wyoming (at the request of Mr. MICHEL), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HARRIS) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. ASPIN, for 5 minutes, today.

Mrs. SCHROEDER, for 5 minutes, today.

Mr. GAYDOS, for 60 minutes, on July 24 and July 25.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. DYMALLY, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,184.

(The following Members (at the request of Mr. WALKER) and to include extraneous matter:)

Mr. BARTLETT.

Mr. RINALDO.

Mr. BUNNING.

Mr. CRAIG.

Mr. GALLO.

Mr. PURSELL.

Mrs. MARTIN of Illinois.

Mr. BEREUTER.

Mr. RITTER.

(The following Members (at the request of Mr. HARRIS) and to include extraneous matter:)

Mr. NELSON of Florida.

Mr. BONIOR.

Mr. NOWAK.

Mr. PENNY.

Mr. CAMPBELL of Colorado.

Mr. SPRATT.

ADJOURNMENT

Mr. WOLF. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 12 minutes p.m.) under its previous order, the House adjourned until Monday, July 23, 1990, at 12 noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3589. A letter from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to amend the Social Security Act to increase the annual limit on the temporary assistance that may be provided to U.S. citizens returned from foreign countries; to the Committee on Ways and Means.

3590. A letter from the Comptroller General, transmitting copies of the financial audit of the Export-Import Bank's 1989 and 1988 financial statements, pursuant to 31 U.S.C. 9105; jointly to the Committee on Government Operations and Banking, Finance and Urban Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XXIV, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HALL of Ohio: Committee on Rules. H. Res. 439. A resolution providing for the consideration of H.R. 3950, a bill entitled the "Food and Agricultural Resources Act of 1990" (Rept. 101-609). Referred to the House Calendar.

Mr. DIXON: Committee on Standards of Official Conduct. H. Res. 440. In the matter of Representative Barney Frank (Rept. 101-610). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MARKEY (for himself, Mr. DINGELL, Mr. RINALDO, Mr. WYDEN, Mr. RICHARDSON, Mr. MOORHEAD, Mr. SLATTERY, Mr. MCMILLEN of Maryland, and Mr. BATES):

H.R. 5325. A bill to amend the Federal securities laws in order to provide additional enforcement remedies for violations of those laws and to eliminate abuses in transactions in penny stocks, and for other purposes; to the Committee on Energy and Commerce.

By Mr. APPLEGATE:

H.R. 5326. A bill to amend title 38, United States Code, to revise the rates of disability compensation for veterans with service-connected disabilities and the rates of dependency and indemnity compensation for survivors of such veterans, to make miscellaneous improvements in veterans' compensation and pension programs, to provide a presumption of service-connection between the occurrence of certain diseases incurred by veterans of active service in Vietnam during the Vietnam era and exposure to certain toxic herbicide agents used in Vietnam, and for other purposes; to the Committee on Veterans' Affairs.

By Mrs. BOXER (for herself and Mr. BERMAN):

H.R. 5327. A bill to authorize the Secretary of Labor to make grants to local governments to assist in the carrying out of community economic adjustment activities required by defense budget reductions; jointly to the Committees on Education and Labor and Armed Services.

By Mr. BUECHNER (for himself, Ms. SCHNEIDER, Mr. RAVENEL, Mr. MRAZEK, Mr. OBERSTAR, Mr. HASTERT, Mr. SCHEUER, Mr. WOLF, Mr. CONTE, Mr. DE LA GARZA, Mr. SMITH of Vermont, and Mrs. SAIKI):

H.R. 5328. A bill to provide for the development of a comprehensive plan for monitoring and research on migratory nongame birds in the Western Hemisphere, to request the President to seek the declaration of a World Decade of Ornithology, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. FALEOMAVAEGA:

H.R. 5329. A bill to amend the Fair Labor Standards Act of 1938 relating to wage order determinations in American Samoa; to the Committee on Education and Labor.

By Mr. GEKAS (for himself, Mr. FRANK, Mr. DEWINE, and Mr. TAUKE):

H.R. 5330. A bill to amend title 18, United States Code, to modify the power of Federal courts to issue restitution in criminal cases; to the Committee on the Judiciary.

By Mr. GEREN of Texas:

H.R. 5331. A bill to establish an advisory committee to investigate the feasibility of facilitating the transfer of excess, surplus, and other personal property of the Federal Government to State and local agencies to assist those agencies in carrying out their duties; to the Committee on Government Operations.

By Mr. HENRY:

H.R. 5332. A bill to require the Secretary of the Treasury to mint coins in commemoration of James Madison and the bicentennial anniversary of the signing of the Bill of Rights; to the Committee on Banking, Finance and Urban Affairs.

By Mr. LAUGHLIN:

H.R. 5333. A bill to amend title 10, United States Code, to reduce the active-duty service obligation for graduates of the U.S. Military Academy to 4 years and to extend the service obligations in the Ready Reserve; to the Committee on Armed Services.

By Mr. THOMAS A. LUKEN (for himself and Mr. WHITTAKER):

H.R. 5334. A bill to reauthorize the Asbestos School Hazard Abatement Act of 1984; to the Committee on Energy and Commerce.

By Mr. MCCLOSKEY (for himself, Mr. HERTEL, Mr. FORD of Michigan, Mr. DARDEN, Mr. BRUCE, Ms. LONG, Mr. JONTZ, Mr. MOODY, Mr. KENNEDY, Mr. GEJDENSON, Mr. DELLUMS, Mr. WOLPE, Mr. LEHMAN of California, Mr. DURBIN, Mr. COLEMAN of Texas, Mr. BOUCHER, Mr. SMITH of Florida, Mr. CARDIN, Mr. LAUGHLIN, Mr. KASICH, Mr. PERKINS, Mr. MRAZEK, Mr. RUSSO, Mr. DORGAN of North Dakota, Mr. MCDERMOTT, Mr. BROWN of California, Mr. KLECZKA, Mr. SPRATT, Mr. ACKERMAN, Mr. BIL-

BRAY, Mr. KOSTMAYER, Mr. HAMILTON, Mr. JACOBS, Mr. LANCASTER, and Mrs. SCHROEDER):

H.R. 5335. A bill to amend title 10, United States Code, to improve congressional oversight of Department of Defense programs, and for other purposes; to the Committee on Armed Services.

By Mr. McCOLLUM (for himself, Mr. STAGGERS, and Mr. STENHOLM):

H.R. 5336. A bill to impose certain requirements with respect to funds provided by the Legal Services Corporation; to the Committee on the Judiciary.

By Mr. MADIGAN:

H.R. 5337. A bill to extend and amend programs under the Developmental Disabilities Assistance and Bill of Rights Act; to the Committee on Energy and Commerce.

By Mr. MARTINEZ (for himself, Mr. ECKART, Mr. HERTEL, Mr. KENNEDY, Mr. LEVINE of California, Mr. MCCURDY, Mr. MCDERMOTT, and Mr. SERRANO):

H.R. 5338. A bill to amend the Higher Education Act of 1965 to permit the cancellation of Perkins loans for service in law enforcement or corrections; to the Committee on Education and Labor.

By Mr. MORRISON of Connecticut:

H.R. 5339. A bill to authorize appropriations for refugee and entrant assistance for fiscal years 1991 and 1992, and for other purposes; to the Committee on the Judiciary.

By Mr. PENNY (for himself Mr. LAFALCE, Mr. TOWNS, Mr. HENRY, Mr. PETRI, Mr. LANCASTER, Mr. BAKER, Mr. CHAPMAN, Mr. HAYES of Louisiana, Mr. LIVINGSTON, Mr. LEWIS of Florida, Mr. ROWLAND of Georgia, Mr. MILLER of Ohio, Mr. CAMPBELL of Colorado, Mr. SHUMWAY, Mr. EMERSON, Mr. VALENTINE, and Mr. SCHUETTE):

H.R. 5340. A bill to amend the Fair Labor Standards Act of 1938 to provide that coverage under that act shall only extend to employees of enterprises in commerce or in the production of goods for commerce; to the Committee on Education and Labor.

By Mr. SAXTON (for himself, Mr. ROE, Mr. SCHEUER, and Ms. SCHNEIDER):

H.R. 5341. A bill to provide for the National Academy of Sciences to conduct a study of the feasibility of an umbrella research arm to support research on a variety of environmental issues; to the Committee on Science, Space, and Technology.

By Mr. HENRY (for himself, Mr. ACKERMAN, Mr. ANNUNZIO, Mr. APPLEGATE, Mr. BILBRAY, Mr. BLILEY, Mr. BONIOR, Mrs. BOXER, Mr. COSTELLO, Mr. COUGHLIN, Mr. DARDEN, Mr. DORNAN of California, Mr. ESPY, Mr. FLIPPO, Mr. FROST, Mr. FUSTER, Mr. GALLEGLY, Mr. GONZALEZ, Mr. HANSEN, Mr. HEFLEY, Mr. HUGHES, Ms. KAPTUR, Mr. KENNEDY, Mr. LENT, Mr. LEWIS of California, Mr. LOWERY of California, Mr. DONALD E. LUKENS, Mr. MADIGAN, Mr. MCGRATH, Mr. MCNULTY, Mr. MICHEL, Mr. MILLER of California, Mr. NATCHER, Mr. NEAL of North Carolina, Ms. OAKAR, Mr. PARRIS, Mr. PEASE, Mr. PURSELL, Mr. RAHALL, Mr. RANGEL, Mr. RAVENEL, Mr. ROBERTS, Mr. ROWLAND of Connecticut, Mr. SAWYER, Mr. SHUMWAY, Ms. SLAUGHTER of New York, Mr. TALLON, Mr. UPTON, Mr. VANDER JAGT, Mr. WOLF, and Mr. YOUNG of Florida):

H.J. Res. 628. Joint resolution designating October 27, 1990, as "National Hostage Awareness Day"; jointly, to the Committees on Post Office and Civil Service and Foreign Affairs.

By Mr. SCHUETTE:

H.J. Res. 629. Joint resolution to ensure that foreign corporations pay their fair share of tax; to the Committee on Ways and Means.

By Mr. PORTER:

H. Con. Res. 354. Concurrent resolution expressing the sense of Congress regarding GATT negotiations affecting certain intellectual property rights; to the Committee on Ways and Means.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

472. By the SPEAKER: Memorial of the Legislature of the State of Louisiana, relative to funding for in-home services for the elderly; to the Committee on Education and Labor, July 20, 1990.

473. Also, memorial of the Legislature of the State of Louisiana, relative to the United Houma Nation Indian community; to the Committee on Interior and Insular Affairs.

474. Also, memorial of the Legislature of the State of Louisiana, relative to taxes; to the Committee on the Judiciary.

475. Also, memorial of the Legislature of the State of Florida, relative to compensation of Senators and Representatives; to the Committee on the Judiciary.

467. Also, memorial of the Legislature of the State of Louisiana, relative to oil spilled in the Gulf of Mexico; to the Committee on Merchant Marine and Fisheries.

477. Also, memorial of the Legislature of the State of Louisiana, relative to Federal excise taxes; to the Committee on Ways and Means.

478. Also, memorial of the Legislature of the State of Louisiana, relative to provisions of the Social Security Act; to the Committee on Ways and Means.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 173: Mr. BEREUTER, Mr. JONES of North Carolina, Mr. TORRICELLI, Mr. RAHALL, Mr. PICKETT, Mr. PACKARD, Mr. MCCRERY, Mr. ROWLAND of Connecticut, Mr. SISISKY, Mr. MARKEY, Mr. DICKINSON, Mr. SMITH of Vermont, Mr. DERRICK, Mr. SLAUGHTER of Virginia, and Mr. DEWINE.

H.R. 201: Mr. PARRIS and Mr. BOSCO.

H.R. 708: Mr. CLINGER.

H.R. 857: Mr. TORRICELLI.

H.R. 1185: Mr. LEWIS of California.

H.R. 1200: Mr. MURTHA.

H.R. 2608: Mr. GOODLING and Mr. GUARINI.

H.R. 3099: Ms. SCHNEIDER and Mr. OWENS of New York.

H.R. 3200: Mr. SCHEUER and Mr. ANNUNZIO.

H.R. 3251: Mr. MATSUI and Mr. YOUNG of Alaska.

H.R. 3547: Mr. OWENS of New York.

H.R. 3864: Mr. TORRICELLI.

H.R. 3914: Mr. WELDON, Mr. LIPINSKI, Mr. ROBERT F. SMITH, Mr. GEKAS, and Mr. UPTON.

H.R. 3979: Ms. SCHNEIDER and Mr. DYMALLY.

H.R. 3996: Mr. FOGLIETTA and Mr. GILLMOR.

H.R. 3999: Mr. DIXON.

H.R. 4156: Mr. FRANK, Mr. LAGOMARSINO, Mr. PICKLE, and Mr. FAZIO.

H.R. 4269: Mr. FISH, Mr. MRAZEK, Mr. GOSS, Mr. HARRIS, Mr. MINETA, and Mrs. ROS-LEHTINEN.

H.R. 4330: Mr. ANDERSON, Mr. BROWN of California, Mr. CARDIN, Mr. CONTE, Mr. DOWNEY, Mr. GIBBONS, Mr. HOAGLAND, Mr. JOHNSTON of Florida, Mr. KOSTMAYER, Mr. MCMILLEN of Maryland, Mr. MCNULTY, Mr. NELSON of Florida, Mr. PRICE, Mr. ROWLAND of Georgia, Mr. SHAYS, Mr. TANNER, and Mr. VENTO.

H.R. 4368: Mr. KOLTER.

H.R. 4369: Mr. JOHSON of South Dakota.

H.R. 4424: Mr. KASICH and Mr. Callahan.

H.R. 4480: Mr. DICKS, Mr. MORRISON of Washington, Mr. MILLER of Washington, Mr. NEAL of Massachusetts, Mr. POSHARD, Mr. TOWNS, Mrs. UNSOELD, and Mr. BOEHLERT.

H.R. 4492: Mr. GUARINI, Mrs. SAIKI, Mr. SANGMEISTER, Mrs. LOWEY of New York, Mr. CONYERS, Mr. ROYBAL, Mr. GOSS, Mr. ALEXANDER, and Mr. GEREN of Texas.

H.R. 4514: Ms. PELOSI..

H.R. 4683: Mr. LEWIS of California, Mr. UPTON, Mr. CHANDLER, and Mr. WHITTAKER.

H.R. 4864: Mrs. BYRON, Mr. HOCHBRUECKNER, Mr. LEWIS of Florida, Mr. EMERSON, Mr. GEJDENSON, Mr. PANETTA, and Ms. SCHNEIDER.

H.R. 4865: Mr. Hochbrueckner, Mr. LEWIS of Florida, Mr. EMERSON, Mr. TAUKE, Mr. PANETTA, and Ms. SCHNEIDER.

H.R. 4962: Mr. HOCHBRUECKNER, Mrs. LOWEY of New York, Mr. BOEHLERT, Ms. SLAUGHTER of New York, Mr. LAFALCE, Mr. MANTON, Mr. SCHULZE, Mr. HOUGHTON, Mr. DOWNEY, Mr. SCHUMER, Mr. ANTHONY, Ms. MOLINARI, and Mr. SCHEUER.

H.R. 5025: Mr. STARK, Mr. WALSH, Mr. LIPINSKI, Mr. HILER, Mr. BARNARD, Mr. BAKER, Mr. LEWIS of Florida, Mrs. JOHNSON of Connecticut, and Mr. KYL.

H.R. 5101: Mr. BUSTAMANTE.

H.R. 5129: Mr. BERMAN.

H.R. 5156: Mr. JACOBS, Mr. WALSH, Mrs. SCHROEDER, and Mr. LAUGHLIN.

H.R. 5163: Mr. FAZIO.

H.R. 5169: Mr. JONTZ.

H.R. 5206: Mrs. BENTLEY.

H.R. 5208: Mrs. BOXER and Mr. EVANS.

H.R. 5250: Mr. RAHALL.

H.R. 5281: Ms. MOLINARI.

H.J. Res. 369: Mr. STALLINGS, Mr. SMITH of New Hampshire, Mr. FAWELL, Mr. BUECHNER, Mr. MCMILLEN of Maryland, Mr. BOSCO, Mr. PERKINS, Ms. OAKAR, Mr. LIPINSKI, Mr. APPLEGATE, Mrs. LLOYD, and Mr. FOGLIETTA.

H.J. Res. 439: Mr. QUILLEN and Mr. CLEMENT.

H.J. Res. 509: Mr. MURTHA, Mr. MRAZEK, Mr. MFUME, Mr. MATSUI, Mr. LIPINSKI, Mr. BORSKI, Mr. BUSTAMANTE, Mr. ESPY, and Mr. NOWAK.

H.J. Res. 515: Mr. WEISS, Mrs. PATTERSON, Mr. SMITH of Texas, Mr. YOUNG of Florida, Mr. BATES, Mr. MCDADE, Mr. SAXTON, Mr. BOUCHER, Mr. SCHUMER, Mr. HALL of Texas, Mr. HALL of Ohio, Mr. WOLF, Mr. LEHMAN of California, Mr. SLATTERY, Mr. HENRY, Mr. ESPY, Mr. FISH, Mr. BEILENSON, Mr. DERRICK, Mr. GAYDOS, Mr. KOLTER, Mr. GEJDENSON, Mr. PURSELL, Mr. STANGELAND, Mrs. UNSOELD, Mr. ROSE, Mr. BILBRAY, Mr. CARPER, Mr. GREEN, Mr. BONIOR, Mr. MINETA, Mr. WHEAT, Mr. LIPINSKI, Mr. TRAXLER, Mr.

OBEY, Mr. OWENS of New York, Mr. THOMAS A. LUKEN, Mr. SAWYER, Mr. MOODY, Mr. WISE, Mr. HUBBARD, and Mr. BOSCO.

H.J. Res. 525: Mr. HARRIS, Mr. WEISS, Ms. LONG, Mr. LEVIN of Michigan, Mr. KOLTER, Mr. YATES, Mrs. JOHNSON of Connecticut, Mr. HAMMERSCHMIDT, Mr. COSTELLO, Mr. LEHMAN of Florida, Mrs. MARTIN of Illinois, Mr. STUDDS, Mr. WALSH, Mr. FORD of Tennessee, Mr. FAUNTROY, Mr. FUSTER, Mr. GINGRICH, Mr. ALEXANDER, Mrs. BOGGS, Mr. HASTERT, Mr. BOSCO, Mr. HENRY, Mr. GUARINI, Mr. HERTEL, Mr. GRANDY, Mr. PICKETT, Mr. QUILLEN, Mr. SPRATT, Mr. SCHEUER, Mr. KASTENMEIER, Mr. LANTOS, Mr. GORDON, Mr. PAYNE of New Jersey, Mr. SAVAGE, Mr. RAVENEL, Mr. ROBINSON, Mrs. SAKI, Mr. SKEEN, Mr. SMITH of New Hampshire, Mr. TALLON, Mr. TAUKE, Mr. TAUZIN, Mr. SERRANO, Mr. WYLIE, Mr. CARPER, Mr. BEVILL, Mr. YOUNG of Florida, Mr. GEPHARDT, Mr. HOCKBRUECKNER, Mr. HUTTO, Mr. JONES of North Carolina, Mr. HAYES of Louisiana, Mr. DE LUGO, Mr. WILSON, Mr. WYDEN, Mr. ESPY, Mr. FAWELL, Mr. COURTER, Mr. CLEMENT, Mr. DWYER of New Jersey, and Mr. MONTGOMERY.

H.J. Res. 583: Mr. LEWIS of Georgia, Mr. MANTON, Mr. DURBIN, Mrs. BOXER, Mr. HUGHES, Mr. ERDREICH, Mr. JONTZ, Mr. SHARP, Mr. ATKINS, Mr. MRAZEK, Ms. OAKAR, Mr. TAUKE, Mr. ORTIZ, Mr. LEHMAN of Florida, Mr. MCDADE, Mr. KLECZKA, Mr. RICHARDSON, Ms. KAPTUR, Mr. QUILLEN, Mr. GUARINI, Mr. OWENS of Utah, and Mr. PRICE.

H.J. Res. 603: Mr. RICHARDSON, Mr. DELAY, Mr. WILSON, Mr. KILDEE, Mr. JENKINS, Mr. FAWELL, Mr. ERDREICH, Mr. LEWIS of California, Mr. DORNAN of California, Mr. MACHTLEY, Mr. FOGLIETTA, Mr. TRAFICANT, Ms. SLAUGHTER of New York, Mr. PRICE, and Mr. KLECZKA.

H. Con. Res. 316: Mr. FLAKE, Mr. KASTENMEIER, and Mr. SHAYS.

H. Res. 371: Mr. UPTON, Mr. MILLER of Washington, Mr. SYNAR, Mr. SCHEUER, Mr. LIPINSKI, Mr. FORD of Michigan, Mr. HUGHES, AND Mr. LANCASTER.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H. Res. 418: Mr. HARRIS.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

214. By the SPEAKER: Petition of the Pacific Northwest Annual Conference of the United Methodist Church, Seattle, WA, relative to conditions in El Salvador; to the Committee on Foreign Affairs.

215. Also, petition of city of Cocoa Beach, FL, relative to taxes; to the Committee on Government Operations.

216. Also, petition of city of Dennewick, WA, relative to the flag of the United States; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3950

By Mr. ACKERMAN:

—Insert the following after section 1719:

SEC. 1720. ELIMINATION OF EFFECT OF MINIMUM WAGE CHANGE.

Section 5(d) of the Food Stamp Act of 1977 (7 U.S.C. 2014(d)) is amended—

(1) by striking "and (15)" and inserting ", (15)", and

(2) by inserting before the period the following: ", and (16) wages payable after October 1, 1990, attributable to any increase in the minimum wage under section 6 of the Fair Labor Standards Act of 1938, occurring after November 16, 1989".

—Insert the following after section 1719:

SEC. 1720. ELIMINATION OF EFFECT OF MINIMUM WAGE CHANGE.

Section 5(d) of the Food Stamp Act of 1977 (7 U.S.C. 2014(d)) is amended—

(1) by striking "and (15)" and inserting ", (15)", and

(2) by inserting before the period the following: ", and (16) wages payable after October 1, 1991, attributable to any increase in the minimum wage under section 6 of the Fair Labor Standards Act of 1938, occurring after November 16, 1989".

By Mr. ALEXANDER:

—In the matter proposed to be added by section 1121 of the bill as a new section 503(c)(1) of the Agricultural Act of 1949:

Strike "or" at the end of subparagraph (D); strike the period at the end of subparagraph (E) and insert "; or"; insert after subparagraph (E) the following:

"(F) any annual crop, herbaceous crop, or short-rotation woody crop the production of which the Secretary deems desirable to meet demand or anticipated demand for feedstocks for ethanol or other biofuels."

and, in paragraph (2), strike "(1)(D) and (E)" and insert "(1)(D), (E), and (F)".

—At the end of title XI, insert the following new subtitle:

Subtitle C—Encouraging Surface Water Storage

SEC. 1131. DEFINITIONS.

As used in this subtitle—

(1) the term "producer" means a producer of a program crop who, in the year the crop is produced, participates in the price support and acreage reduction program for such crop established by the Agricultural Act of 1949;

(2) the term "surface reservoir" means a reservoir, pond, or other facility constructed on a farm for the primary purpose of storing surface water for the irrigation of crops produced on the farm, for the watering of livestock, or for such other agricultural purpose as the Secretary may by regulation allow;

(3) the term "program crop" means any crop of wheat, feed grains, upland cotton or rice; and

(4) the term "wetland" has the meaning given such term in section 1201(a)(16) of the Food Security Act of 1985.

SEC. 1132. SURFACE RESERVOIR ENCOURAGEMENT PROGRAM.

(a) IN GENERAL.—A producer may construct a surface reservoir on land which is part of a flexible acreage base for a farm, as determined by the Secretary pursuant to section 503 of the Agricultural Act of 1949.

(b) EFFECT ON ACREAGE REDUCTION PROGRAMS.—Land on which a surface reservoir has been constructed pursuant to subsection (a) shall be considered to be devoted to conservation uses if the land was planted or considered planted to a program crop or an oilseed crop in at least 3 of the immediately preceding 5 years.

SEC. 1133. SPECIAL PROGRAM FOR AREAS OF SEVERE GROUNDWATER DEPLETION.

Notwithstanding section 1132, the following provisions shall apply in counties which are designated by the Secretary, after consultation with the U.S. Geologic Survey, as areas of severe groundwater depletion:

(1) RESERVOIRS CONSTRUCTED ON FLEXIBLE ACREAGE BASES.—

(A) IN GENERAL.—A producer may construct a surface reservoir on land which is part of a flexible acreage base for a farm, as determined by the Secretary pursuant to section 503 of the Agricultural Act of 1949, as amended by this Act.

(B) EFFECT OF RESERVOIR CONSTRUCTION ON ACREAGE REDUCTION PROGRAMS.—Each acre of a flexible acreage base which is devoted to the construction of a surface reservoir shall count as two acreas towards meeting any acreage reduction or set-aside requirement for that crop which may be imposed by the Secretary for a crop year under the Agricultural Act of 1949 or any amendments thereto; Provided, that such acreage was planted or considered planted to a program crop or an oilseed crop during at least three of the preceding five years.

(C) PERMITTED ACREAGE.—Each acre of a flexible acreage base which is not devoted to the construction of a surface reservoir and which, as a result of subparagraph (B), would otherwise not be considered either permitted acreage or acreage conservation reserve acreage, shall be deemed to be permitted acreage, and may be planted in the same manner as flexible crop acreage planted pursuant to section 503(c) of the Agricultural Act of 1949, as amended by this act; *Provided, that any extra permitted acreage planted under this subparagraph shall not count against any limitation on the amount of flexible crop acreage on a farm which may be provided for in section 503(c) of the Agricultural Act of 1949, as amended by this act.*

(2) CONSTRUCTION OF RESERVOIRS ON LAND NOT PART OF A FLEXIBLE ACREAGE BASE.—

(A) IN GENERAL.—A producer may construct a surface reservoir on land which is owned or leased by the producer and which is adjacent to land which comprises the flexible acreage base for a farm, as determined by the Secretary pursuant to Section 503 of the Agricultural Act of 1949, as amended by this act.

(B) EFFECT OF RESERVOIR CONSTRUCTION ON ACREAGE REDUCTION PROGRAMS.—Each acre of land devoted to construction of a surface reservoir pursuant to subparagraph (A) shall count as one acre towards meeting any acreage reduction or set-aside requirement for a program crop produced on the farm which may be imposed by the Secretary under the Agricultural Act of 1949 or any amendment thereto.

(C) PERMITTED ACREAGE.—Each acre of a flexible acreage base for a farm which, as a result of subparagraph (A), would otherwise not be considered either permitted acreage or acreage conservation reserve acreage, shall be deemed to be permitted acreage, and may be planted in the same manner as flexible crop acreage planted pursuant to section 503(c) of the Agricultural Act of 1949, as amended by this act; *Provided,* that any extra permitted acreage planted under this subparagraph shall not count against any limitation of the amount of flexible crop acreage on a farm which may be pro-

vided for in section 503(c) of the Agricultural Act of 1949, as amended by this Act.

SEC. 1134. LIMITATIONS.

(a) GENERAL LIMITATIONS.—No producer may receive acreage reduction or set-aside requirement credit under this subtitle unless—

(1) the surface reservoir for which such credit is claimed is in compliance with an established conservation plan approved by the Soil Conservation Service; and

(2) the Soil Conservation Service certifies that the producer has not converted any wetland not previously designated as prior converted wetland or farmed wetland for the purpose of constructing the reservoir.

(b) SPECIAL LIMITATION FOR AREAS OF SEVERE GROUNDWATER DEPLETION.—No producer may receive acreage reduction or set-aside credit under section 1133 unless such producer can demonstrate to the satisfaction of the Secretary that water needs which would be met by the water in the surface reservoir have been met on the same farm by groundwater in at least three of the last five years.

By Mr. ARMEY:

—Strike out title VIII (page 153, line 1 through page 189, line 22), and insert in lieu thereof the following:

TITLE VIII—PEANUTS

SEC. 801. REPEAL OF MARKETING QUOTA PROGRAM FOR PEANUTS.

(a) MARKETING QUOTAS.—Part VI of subtitle B of title III of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1357-1359), relating to peanuts, is repealed.

(b) PRICE SUPPORT LEVELS.— The Agricultural Act of 1949 (7 U.S.C. 1441 et seq.) is amended—

(1) in section 101(b) (7 U.S.C. 1441(b)), by striking "and peanuts";

(2) in section 408(c) (7 U.S.C. 1428(c)), by striking "peanuts,"; and

(3) by repealing sections 108, 108A, and 108B (7 U.S.C. 1445c, 1445c-1, and 1445c-2).

(c) CONFORMING AMENDMENTS.—(1) Sections 361, 371(a), 371(b), 373(a), 373(b), and 375(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1361, 1371, 1373, and 1375) are amended by striking "peanuts," each place it appears.

(2) Section 373(a) of such Act (7 U.S.C. 1373(a)) is further amended—

(A) by inserting "and" in the first sentence after "from producers,"; and

(B) by striking ", all producers engaged in the production" and all that follows through "peanut-threshing machines".

(3) Section 8(b)(2) of the Agriculture Adjustment Act (7 U.S.C. 608b(b)(2)), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, is amended by striking ", as determined under section 108B of the Agricultural Act of 1948 (7 U.S.C. 1445c-2),".

SEC. 802. PRICE SUPPORT PROGRAM.

The Agricultural Act of 1949 (7 U.S.C. 1441 et seq.) is amended by inserting after section 107F (7 U.S.C. 1445b-5) the following new section:

"SEC. 108. PRICE SUPPORT PROGRAM FOR PEANUTS.

"(a) IN GENERAL.—Except as provided in subsection (c), the prices of the 1991 and subsequent crops of peanuts shall be supported at such level as the Secretary determines to be appropriate.

"(b) FACTORS.—In making the determination, the Secretary shall take into consideration—

"(1) the factors specified in paragraphs (1) through (8) of section 401(b);

"(2) the cost of production;

"(3) any change in the index of prices paid by farmers for production items, interest, taxes, and wage rates during the period beginning January 1 and ending December 31 of the calendar year immediately preceding the crop year for which the level of support is being determined;

"(4) the demand for peanuts for domestic edible use, peanut oil, and meal;

"(5) expected prices of other vegetable oils and protein meals; and

"(6) the demand for peanuts in foreign markets.

"(c) LIMITATION.—The level of price support determined by the Secreary for a crop of peanuts shall not result in a net loss to the Federal Government in excess of the average net loss to the Federal Government from supporting the 1987, 1988, and 1989 crops of peanuts.".

SEC. 803. EFFECTIVE DATE.

The amendments made by this title shall take effect beginning with the 1991 crop of peanuts.

—After section 1120, insert the following new section:

SEC. 1121. ELIGIBILITY REQUIREMENT.

(a) GENERAL RULE.—(1) A producer who has gross revenue in excess of $500,000 in the current or previous year, as determined by the Secretary of Agriculture, shall not be eligible to receive in the current year any payments, loans, or purchases under the Agricultural Act of 1949 or the Commodity Credit Corporation Charter Act.

(2) A producer which is not an individual shall be subject to a program reduction in payments, loans, and purchases to the extent that a person with such gross revenues in excess of $500,000 in the current or previous year, owns or controls a direct or indirect interest in the producer. Such reduction shall proportion to such person's interest in the producer, as determined by the Secretary of Agriculture.

(b) DEFINITION.—For purposes of this section, the term "person" shall have the same meaning it has for purposes of section 1001 of the Food Security Act of 1985.

Redesignate the succeeding section accordingly.

—In section 603, strike "1995" the first time it appears and insert "1992".

—In the amendment to section 201(b) of the Agricultural Act of 1949 made by section 603 strike paragraph (1) and insert the following:

"(b)(1) For each of the 1991 and 1992 crops of honey, the price of honey shall be supported through loans, purchases, or other operations as follows:

"(A) at not less than 43 cents per pound for the 1991 crop; and

"(B) at not less than 32.3 cents per pound for the 1992 crop.

—In section 201(e) (2)(A) of the Agricultural Act of 1949, as added by section 402 of the bill, strike "During" and insert "Except as provided in paragraph (3), during".

—In section 201(e) (3) of the Agricultural Act of 1949, as added by section 402 of the bill—

(1) strike subparagraph (D); and

(2) redesignate subparagraph (E) as subparagraph (D).

—In the amendment made by section 901 to section 107A(a)(2)(B) of the Agricultural Act of 1949, strike "85 percent" and insert "75 percent".

—In the amendment made by section 901 to section 107A(a)(2)(B) of the Agricultural Act of 1949, strike "85 percent" and insert "65 percent".

—In the amendment made by section 1001 to section 105A(a)(2) of the Agricultural Act of 1949, strike "85 percent" and insert "75 percent".

—In the amendment made by section 1001 to section 105A(a)(2) of the Agricultural Act of 1949, strike "85 percent" and insert "65 percent".

—At the end of subtitle A of title XI, insert the following new section:

SEC. 1121. ELIGIBILITY REQUIREMENT.

(a) GENERAL RULE.—(1) A person shall not be eligible to receive, directly or indirectly, any payment, purchase, or loan for wheat, feed grains, cotton, honey, rice, oilseeds, wool, and mohair under the Agricultural Act of 1949 if that person has adjusted gross income of at least $100,000 for the taxable year during which such payment, purchase, or loan is made available to that person or the preceding taxable year.

(2) Except as provided by paragraph (4), in the case of a person who is not an individual, paragraph (1) shall be applied by substituting "taxable income" for "adjusted gross income".

(3) For purpose of this section, a partnership shall be treated as a person who is not an individual.

(4) In the case of any person who is exempt from tax under chapter 1 of the Internal Revenue Code of 1986, that person shall not be eligible to receive any payment, purchase, or loan under the Agricultural Act of 1949 if that person has gross revenues of at least $1,000,000 for the calendar year during which such payment, purchase, or loan is made available to that person or the preceding calendar year.

(5) In the case of estates and trusts, the Secretary of Agriculture shall prescribe rules based on the principles of paragraph (1) to carry out this section.

(b) DEFINITIONS.—For purposes of this section:

(1) The terms "adjusted gross income" and "taxable income" shall have the meanings given such terms by the Internal Revenue Code of 1986.

(2) The term "person" shall have the same meaning it has for purposes of section 1001 of the Food Security Act of 1985.

(c) RULES.—The Secretary of Agriculture shall prescribe rules to carry out this section.

(d) EFFECTIVE DATE.—This section shall apply to the 1991 crop and all subsequent crops.

Redesignate the succeeding section accordingly.

By Mr. BENNETT:

—At the end of title 18, insert the following:

Subtitle E—Veal Calf Protection

SEC. 1861. PROHIBITIONS.

Efective 4 years after the date of enactment of this Act, no person shall raise a calf for the production of veal unless the following requirements are complied with:

(1) The calf is free to turn around without difficulty, lie with its legs outstretched, and groom itself, without any impediment such as too small an enclosure of chaining or tethering.

(2) The calf is fed a daily diet containing sufficient iron and, if the calf is more than 14 days old, sufficient digestible fiber to prevent anemia and to sustain full health.

SEC. 1862. ENFORCEMENT.

A person who violates this subtitle shall be subject to the same remedies, civil and criminal, as are provided in subsections (b) and (d) of section 19 of the Animal Welfare

Act (7 U.S.C. 2131 et seq.) for violations of that Act. The same procedure shall apply with respect to remedies under either that Act or this subtitle. For purposes of enforcement of this subtitle, the Secretary of Agriculture of any representatives duly designated by the Secretary may inspect any facility where calves are kept for the production of veal.

By Mr. BEREUTER:

—At the end of title XVI add:

SEC. 1620. STUDY OF THE EFFECTS OF CONSERVATION COMPLIANCE PROVISIONS ON CHEMICAL USE AND GROUNDWATER DEGRADATION.

(a) ESTABLISHMENT.—The Secretary shall establish a research program to study the effects of conservation compliance provisions on the use of agricultural chemicals by farmers and the resulting impact on groundwater quality.

(b) PURPOSE.—(1) To determne if conservation compliance requirements are causing increased use of agricultural chemicals.

(2) If conservation compliance requirements are found to cause increased use of agricultural chemicals: is this increase causing degradation of groundwater quality and the environment generally.

—In title XIII, at the end of subtitle G, add:

SEC. 1355B. STUDY OF THE IMPACT ON U.S. MEAT EXPORTS OF ALLOWING DESTINATION BASED GRADING.

(a) ESTABLISHMENT.—The Secretary shall establish a research program to study the effects of grading meat destined for export, under the grading system of the country of final destination.

(b) PURPOSE.—To determine if allowing meat destined for export to be graded by persons or under the system of the country of final destination shall facilitate the export of U.S. meat products, improve the competitive position of U.S. meat exports or provide other benefits.

—Add the following new part at the end of subtitle I of title XIII:

PART 3—AGRICULTURE ENVIRONMENTAL RESTORATION

SEC. 1376A. ENVIRONMENTAL RESTORATION PROGRAM.

(a) ENVIRONMENTAL RESTORATION PROGRAM.—(1) IN GENERAL.—The Secretary of Agriculture shall establish an environmental restoration program in the Department of Agriculture to provide for the cleanup of release of hazardous substances, including groundwater contaminants, from facilities operated or formerly operated by the Department of Agriculture (including grain storage facilities).

(2) COST ESTIMATE.—The Secretary shall prepare a cost estimate and work schedule for those sites where the Department of Agriculture has been found to be the potentially responsible party, by the Environmental Protection Agency, for chemical contaimination of such a site.

(3) CONSULTATION WITH EPA.—The program shall be carried out in consultation with the Administrator of the Environmental Protection Agency

(b) PROGRAM REQUIREMENTS.—(1) Locate and identify each facility or site operated or formerly operated by the Department of Agriculture, including grain storage facilities or sites, at which hazardous substances were used, stored, or disposed of and determine whether the hazardous substances present at such facilities or sites may have contaminated the groundwater.

(2) Provide warning to persons living within two miles of the boundaries of any facility or site identified under paragraph (1) of any possible contamination of drinking water.

(3) Submit a report to Congress each year on progress in implementing this section.

—In title XVI, at the end of section 1604, add the following subsections:

(e) FEDERAL FARM COMMODITY PROGRAM ACREAGE BASE PROTECTION. This subsection shall apply to subsection (b) and (c). Notwithstanding title V of the Agricultural Act of 1949 (7 U.S.C. 1461 et seq.), the historical acreage base of a farm shall not be reduced as the result of planting cropland to indigenous trees, shelterbelts, windbreaks, wildlife corridors, or filter strips for the purpose of protecting crops, livestock or the reduction of soil and water erosion.

(f) NATIONAL GOALS FOR WINDBREAKS, SHELTERBELTS, WILDLIFE CORRIDORS, AND SUSTAINABLE AGROFORESTRY SYSTEMS.—

(1) SHELTERBELTS, WINDBREAKS, WILDLIFE CORRIDORS OR FILTER STRIPS.—The Secretary shall, within one year after the date of enactment of this Act, establish a national goal of, and begin implementation programs for developing by December 31, 2001, 50,000 linear miles of additional shelterbelts, windbreaks, wildlife corridors or filter strips.

(2) SUSTAINABLE AGROFORESTRY SYSTEMS.—The Secretary shall, within one year after the date of enactment of this Act, establish a national goal and implementation program to convert, to the extent practicable, at least 12,000,000 acres of highly erodible lands to sustainable agroforestry systems by December 31, 2001."

In section 1604, subsection (b), page 835, line 8, following "nutrient needs," insert "supplemental watering,".

In section 1604, at the end of subsection (b) add the following:

(3) SUPPLEMENTAL WATERING.—Cost share assistance for supplemental watering shall only be available in semi-arid areas where annual average rainfall (as determined by the Secretary) is 25 inches or less."

At the end of title 16, add the following Sections:

SEC. 1618. ESTABLISHMENT OF SHELTERBELTS OR WINDBREAKS UNDER AGRICULTURAL CONSERVATION PROGRAM.

The third paragraph of section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) is amended by adding at the end the following new sentence: "Notwithstanding the preceding provisions of this paragraph, if an agricultural producer establishes or restores a shelterbelt or windbreak, the amount of financial assistance provided under this subsection shall be—

(i) during the 1-year period beginning on the date of the establishment or restoration of the shelterbelt or windbreak—

(I) 80 percent of the cost of establishing or restoring the shelterbelt or windbreak; and

(II) if the shelterbelt or windbreak is part of an approved wind erosion control system that is included in the conservaton compliance plan of the producer, an additional 10 percent of the cost of establishing or restoring the shelterbelt or windbreak; and

(ii) during the subsequent 3-year period, at least 50 percent of the cost of maintaining the shelterbelt or windbreak, including the cost of weed control, supplemental watering, livestock fencing, and rodent control.".

SEC. 1619. ESTABLISHMENT OF SHELTERBELTS OR WINDBREAKS UNDER GREAT PLAINS CONSERVATION PROGRAM.

The last paragraph of section 16(b)(1) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590p(b)(1)) is amended by adding at the end the following new sentence: "Notwithstanding the preceding provisions of this paragraph, if an agricultural producer establishes or restores a shelterbelt or windbreak, during the 3-year period following the contract year during which the shelterbelt or windbreak is established or renovated, the amount of financial assistance provided under this subsection shall be at least 50 percent of the cost of maintaining the shelterbelt or windbreak, including the cost of weed control, supplemental watering, livestock fencing, and rodent control."."

—At the end of title X, add:

SEC. 1005. PREVENTED PLANTINGS DUE TO CHINCH BUG INFESTATIONS.

The Secretary shall make a determination to allow the County Office Committee to approve, in advance, grain sorghum prevented plantings because of chinch bugs.

(1) This determination shall be based on recommendations from the Cooperative Extension Service and State Entomologist that there is a chinch bug infestation severe enough, prior to planting, that would destroy the crop and cause producers economic hardship.

(2) Program base acres shall not be reduced due to the planting of alternative crops as a method of controlling damage to farm profitability due to the presence of chinch bugs prior to planting.

—In title XIII, subtitle F, add:

SEC. 1350. STUDY OF THE BIOLOGY AND BEHAVIOR OF CHINCH BUGS: FACTORS LEADING TO CROP LOSS AND DEVELOPMENT OF IMPROVED MANAGEMENT PRACTICES.

(a) ESTABLISHMENT—The Secretary shall establish a research and education program to study the biology and behavior of chinch bugs in Nebraska. The purpose of this study shall be to:

(1) Characterize the relationship between environmental/climatic factors and chinch bug outbreaks in an attempt to predict when these outbreaks occur.

(2) Determine chinch bugs dispersal habits, overwintering habitat preferences, and overwintering survival in native and introduced grasses.

(3) Describe the population dynamics of chinch bugs in small grain and noncrop grass hosts in the spring and assess yield losses in small grain crop hosts.

(4) Investigate various aspects of chinch bug behavior (including host habitat preferences, oviposition, and pheromones) that may result in the development of novel management strategies.

(b) COORDINATION.—The project shall be coordinated between the Entomology Departments at the University of Nebraska and Kansas State University.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section.".

—Insert in section 1206, after "SEC. 105A.":

SEC. 105B. DEBT-FOR-DEVELOPMENT SWAPS FOR LATIN AMERICA AND THE CARIBBEAN.

(a) DEBT CONVERSION.—To the extent provided for in an agreement meeting the requirements of subsection (b), the President may reduce the debt obligations of an eligible country owed to the Commodity Credit Corporation of the United States under sales agreements under this title.

(b) DEBT REDUCTION AGREEMENT.—The agreement referred to in subsection (a) is an agreement between the United States Government and the government of the eligible

country which includes the following requirements:

(1) REPAYMENT OF INTEREST IN LOCAL CURRENCY.—Interest payments due on the principal remaining following the reduction of debt obligations under subsection (a) shall be made in local currency at an agreed rate.

(2) TRUST.—A trust shall be established for each country in the U.S. Government to receive the interest payments described in subsection (b)(1).

(3) USE OF FUNDS FOR POVERTY REDUCTION PURPOSES.—Amounts paid to the trust shall be made available by the trustee, in accordance with the agreement, to—

(A) indigenous nongovernmental charitable, educational, scientific, cooperative, or other appropriate organizations, or

(B) other appropriate nonprofit entities.

for use in increasing educational opportunities or improving the agricultural productivity, nutrition, health, or income-producing abilities of the countries' poorer citizens, particularly women.

(c) CRITERIA FOR SELECTING COUNTRIES.—In determining the countries with respect to which the authority of this section will be exercised, the President shall take into account—

(1) the needs for financial resources for use in the activities referred to in subsection (b)(3); and

(2) the commitment of the government of that country to measurably increasing access to educational opportunity or improving the agricultural productivity, nutrition, health, and income-producing abilities of the poor.

(d) ELIGIBILE COUNTRIES.—For purposes of this section, the term 'eligible country' means a country in Latin American or the Caribbean which the President determines:

(1) is operating under a heavy debt burden,

(2) has adopted a strong economic reform program in conjunction with multilateral agencies such as the IMF, the World Bank, and the Inter-American Development Bank,

(3) and, as appropriate, has concluded a financing package with commercial banks including debt and debt service reduction.

(e) CONSULTATION REQUIREMENTS.—The President shall consult with nongovernmental organizations having expertise in development matters—

(1) in identifying countries with respect to which the authority of this section should be exercised,

(2) during the negotiation of an agreement pursuant to subsection (b) with respect to the uses of funds pursuant to subsection (b)(3); and

(3) with respect to whether funds paid to the trust are being used for the intended purpose.

(f) ANNUAL REPORTS.—The President shall annually report to Congress the debt-for-development agreements entered into under this section during the preceding fiscal year.

(g) APPROPRIATIONS ACTION REQUIRED TO IMPLEMENT AGREEMENTS.—The authority of subsection (a) may be exercised only to such extent such amounts as are provided in advance in appropriations Acts.

(h) RELATION TO SECTION 105.—This section should not be construed to limit the authority of the President to provide debt forgiveness under section 105 of this Act for eligible countries (as defined in this section).

(i) APPLICABILITY.—The authority of this section applies with respect to credit sales agreements entered into before the enactment of the Mickey Leland Food For Peace Act.

By Mr. CONTE:

—The amendment made by section 603 to subsection (b) of section 201 of the Agricultural Act of 1949 is amended by striking paragraph (1) and inserting the following:

"(b)(1) For each of the 1991 through 1995 crops of honey, the price of honey shall be supported through loans, purchases, or other operations as follows:

"(A) For the 1991 crop, the loan and purchase level for honey shall be 51.3 cents per pound.

"(B) For each of the 1992, 1993, 1994, and 1995 crops, the loan and purchase level for honey shall be the same as the level established for the preceding crop year reduced by 5 percent.

—Strike subtitle A of title VI.

Strike the heading of subtitle B of title VI and redesignate sections 611 through 617 as section 601 through 607, respectively.

—Section 1101 is amended by inserting at the end the following new subsection:

(e) ATTRIBUTION OF PAYMENTS.—(1) Section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended by striking paragraph (5)(C) and insert the following:

"(C) In the case of corporations, partnerships, and other entities included by subparagraph (B), the Secretary shall attribute payments to natural persons in proportion to their ownership interest in the entity and any other entity which owns or controls the entity receiving such payment.".

(2) Section 609 of the Agricultural Act of 1949 (7 U.S.C. 1471g) is amended by striking subsections (c) and (d) and inserting the following:

"(c) In the case of corporations, partnerships, and other entities included in section 1001(5)(C) of the Food Security Act of 1985, the Secretary shall attribute payments to natural persons in proportion to their ownership interest in the entity.".

—Strike section 1101 and insert the following:

SEC. 1101. LIMITATION ON PAYMENTS.

(a) Section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended by striking "provision of law" and inserting "provision of law, subject to sections 1001A and 1001C".

(b) Section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended by inserting "(a)" before "Notwithstanding", by redesignating paragraphs (3), (4), and (5) as subsections (d), (e), and (f), respectively, and by striking paragraphs (1) and (2) and inserting the following:

"(1) For each of the 1991 through 1995 crops, the total amount of deficiency payments (excluding any deficiency payments described in paragraph (2)) and land diversion payments that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 for wheat, feed grains, upland cotton, extra long staple cotton, and rice shall not exceed $50,000.

"(2) For each of the 1991 through 1995 crops, the total amount of—

"(A) any gain realized by a producer from repaying a loan for a crop of wheat, feed grains, upland cotton, rice, and honey at the rate permitted under section 107D(a)(5), 105C(a)(4), 103A(a)(5), 101A(a)(5), or 201(b)(2), respectively, of the Agricultural Act of 1949, or any gain realized by a producer from repaying a loan for a crop of any other commodity at a lower level than the original loan level established under the Agicultural Act of 1949;

"(B) any loan deficiency payment received for a crop of wheat, feed grains, upland cotton, or rice under section 107D(b), 105C(b), 103A(b), or 101A(b), respectively, of the Agricultural Act of 1949;

"(C) any deficiency payment received for a crop of wheat or feed grains under section 107D(c)(1), 105C(c)(1), respectively, of the Agricultural Act of 1949 as a result of the reduction of the price support level for such crop under section 107D(a)(4) or 105(a)(3) of such Act;

"(D) any inventory reduction payment for a crop of wheat, feed grains, upland cotton, or rice under section 107D(g), 105C(g), 103A(g), or 101A(g), respectively, of the Agricultural Act of 1949; and

"(E) any part of any payment that is determined by the Secretary of Agriculture to represent compensation for resource adjustment (excluding land diversion payments) or public access for recreation,

shall not exceed $50,000.

"(3) For each of the 1991 through 1995 crops, the total amount of disaster payments made under one or more of the annual programs established under the Agricultural Act of 1949, or under any other act which authorizes the Secretary or the Commodity Credit Corporation to make a payment with respect to loss of production of an agricultural commodity due to natural disaster or other condition beyond the control of a producer (excluding indemnities paid by the Federal Crop Insurance Corporation), shall not exceed $100,000.

"(4) For each of the 1991 through 1995 marketing years, the total amount of payments that a person shall be entitled to receive under the annual program established under the National Wool Act of 1954 for wool and mohair shall not exceed $50,000. For purposes of subsection (b), such payments shall be considered to be made on a crop year basis.

"(5) For each of the years 1991 through 1995, the Secretary shall provide that payments made under title VI of the Agricultural Act of 1949 shall be considered to be made on a crop year basis for purposes of subsection (b).

"(6) For each of the 1991 through 1995 crops, no certificate redeemable for stocks of commodities held by the Commodity Credit Corporation may be redeemable for honey held by the Corporation.".

(c) Section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended by adding at the end thereof the following new subsections:

"(b) For each of the 1991 through 1995 crops, the total amount of all payments specified in subsection (a) shall not exceed $250,000. For the purposes of this section and sections 1001A through 1001C, the term payment includes marketing loan gains.

"(c) For any of the 1991 through 1995 crops, the total amount of marketing gains and payments specified in subsection (a)(2)(A) and (B) when combined with the value of commodities for which a marketing gain may be realized which is forfeited to the Commodity Credit Corporation shall not exceed $50,000.".

—Section 1101 is amended to read as follows:

SEC. 1101. PAYMENT LIMITATIONS.

(a) ATTRIBUTION OF PAYMENTS.—(1) Section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended by striking paragraph (5)(C) and inserting the following:

"(C) In the case of corporations, partnerships, and other entities included by subparagraph (B), the Secretary shall attribute payments to natural persons in proportion

to their ownership interest in the entity and any other entity which owns or controls the entity receiving such payment.".

(2) Section 609 of the Agricultural Act of 1949 (7 U.S.C. 1471g) is amended by striking subsections (c) and (d) and inserting the following:

"(c) In the case of corporations, partnerships, and other entities included in section 1001(5)(C) of the Food Security Act of 1985, the Secretary shall attribute payments to natural persons in proportion to their ownership interest in the entity.".

(b) LIMITATION ON PAYMENTS.—(1) Section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended by striking "provision of law" and inserting "provision of law, subject to sections 1001A and 1001C".

(2) Section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended by inserting "(a)" before "Notwithstanding", by redesignating paragraphs (3), (4), and (5) as subsections (d), (e), and (f), respectively, and by striking paragraphs (1) and (2) and inserting the following:

"(1) For each of the 1991 through 1995 crops, the total amount of deficiency payments (excluding any deficiency payments described in paragraph (2)) and land diversion payments that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 for wheat, feed grains, upland cotton, extra long staple cotton, and rice shall not exceed $50,000.

"(2) For each of the 1991 through 1995 crops, the total amount of—

"(A) any gain realized by a producer from repaying a loan for a crop of wheat, feed grains, upland cotton, rice, and honey at the rate permitted under section 107D(a)(5), 105C(a)(4), 103A(a)(5), 101A(a)(5), or 201(b)(2), respectively, of the Agricultural Act of 1949, or any gain realized by a producer from repaying a loan for a crop of any other commodity at a lower level that the original loan level established under the Agricultural Act of 1949;

"(B) any loan deficiency payment received for a crop of wheat, feed grains, upland cotton, or rice under section 107D(d), 105C(b), 103A(b), or 101A(b), respectively, of the Agricultural Act of 1949;

"(C) any deficiency payment received for a crop of wheat or feed grains under section 107D(c)(1), 105C(c)(1), respectively, of the Agricultural Act of 1949 as a result of the reduction of the price support level for such crop under section 107D(a)(4) or 105(a)(3) of such Act;

"(D) any inventory reduction payment for a crop of wheat, feed grains, upland cotton, or rice under section 107(D)(g), 105C(g), 103A(g), or 101A(g), respectively, of the Agricultural Act of 1949; and

"(E) any part of any payment that is determined by the Secretary of Agriculture to represent compensation for resource adjustment (excluding land diversion payments) or public access for recreation,

shall not exceed $50,000.

"(3) For each of the 1991 through 1995 crops, the total amount of disaster payments made under one or more of the annual programs established under the Agricultural Act of 1949, or under any other act which authorizes the Secretary or the Commodity Credit Corporation to make a payment with respect to the loss of production of an agricultural commodity due to natural disaster or other condition beyond the control of a producer (excluding indemnities paid by the Federal Crop Insurance Corporation), shall not exceed $100,000.

"(4) For each of the 1991 through 1995 marketing years, the total amount of payments that a person shall be entitled to receive under the annual program established under the National Wool Act of 1954 for wool and mohair shall not exceed $50,000. For purposes of subsection (b), such payments shall be considered to be made on a crop year basis.

"(5) For each of the years 1991 through 1995, the Secretary shall provide that payments made under title VI of the Agricultural Act of 1949 shall be considered to be made on a crop year basis for purposes of subsection (b).

"(6) For each of the 1991 through 1995 crops, no certificate redeemable for stocks of commodities held by the Commodity Credit Corporation may be redeemable for honey held by the Corporation.".

(3) Section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended by adding at the end thereof the following new subsections:

"(b) For each of the 1991 through 1995 crops, the total amount of all payments specified in subsection (a) shall not exceed $250,000. For the purposes of this section and sections 1001A through 1001C, the term payment includes marketing loan gains.

"(c) For any of the 1991 through 1995 crops, the total amount of marketing gains and payments specified in subsection (a)(2)(A) and (B) when combined with the value of commodities for which a marketing gain may be realized which is forfeited to the Commodity Credit Corporation shall not exceed $50,000.".

(c) TECHNICAL AND CONFORMING AMENDMENTS.—(1) Section 1001(d) of the Food Security Act of 1985 (7 U.S.C. 1308), as redesignated by subsection (a), is amended by striking "paragraph (2)" and inserting "subsection (a)(2)(A) of this section".

(2) Subsection (f) of section 1001 of the Food Security Act of 1985 (as redesignated by section 3) (7 U.S.C. 1308) is amended by striking subparagraph (A) and by inserting the following:

"(f)(1)(A) The Secretary shall issue regulations—

"(i) defining the term 'person'; and

"(ii) prescribing such rules as the Secretary determines necessary to assure a fair and reasonable application of the limitations established under this section and sections 1001A through 1001C.".

(3)(A) Section 1001A of the Food Security Act of 1985 (7 U.S.C. 1308-1) is amended by striking "1001(5)(B)(i)" each place it appears and inserting "1001(f)(1)(B)(i)".

(B) Section 1001A of the Food Security Act of 1985 (7 U.S.C. 1308-1) is amended by striking "1001(5)(B)(i)(II)" each place it appears and inserting "1001(f)(1)(B)(i)(II)".

(C) Section 1001A(b)(1) of the Food Security Act of 1985 (7 U.S.C. 1308-1) is amended by striking "paragraphs (1) and (2)" and inserting "subsection (a)(1) through (3)".

(D) Section 1001B of the Food Security Act of 1985 (7 U.S.C. 1308-2) is amended by striking "paragraphs (1) and (2)" and inserting "subsection (a)(1) through (3)".

(E) Section 1001C of the Food Security Act of 1985 (7 U.S.C. 1308-3) is amended by striking out "1989 and 1990" and inserting "1991 through 1995".

—In section 1281(d)(3) of subtitle I as contained in section 1608, strike "the Secretary," and all that follows through "easements" and insert in lieu thereof "the Secretary, through the Chief of the Soil Conservation Service, and in agreement with the Director of the U.S. Fish and Wildlife Service, shall place priority on acquiring individual easements".

—At the end of subtitle I as contained in section 1608, strike the closing quotation marks and period and insert the following new section:

"SEC. 1286. ASSETS CONSIDERED.

"For the purpose of calculating the value of restructured loans under section 353(c) of the Consolidated Farm and Rural Development Act, the Secretary shall consider all the assets of the borrower, including the value of conservation easements. In determining the net recovery value of the property for purposes of new recovery buy-out under the provisions of section 353 of such Act, the Secretary shall make two calculations: one that takes into consideration the potential reduction in delinquent debt pursuant to section 349(e) of such Act resulting from the placement of wetland conservation easements as provided under section 335(g) of such Act and the other without consideration for the easements. The borrower may select to have his loan obligations restructured based on either calculation, except that if the borrower chooses to accept the restructuring agreement based on the calculation that included the placement of wetland conservation easements, the borrower must agree to accept the easements on the property within the limitations of such section 335(g). The Secretary shall inform the borrower that the option for the net-recovery value calculation taking into consideration wetlands conservation easements is available and must make clear to the borrower all terms and conditions associated with the easements.".

—At the end of subtitle I as contained in section 1608, strike the closing quotation marks and period and insert the following new section:

"SEC. 1286. WETLAND EASEMENTS FOR CERTAIN PROPERTY.

"(a) ESTABLISHMENT.—In the disposal of real property under the jurisdiction of the Secretary of Agriculture, the Secretary shall establish perpetual wetland conservation easements to protect and restore wetlands or converted wetlands as recommended by the United States Fish and Wildlife Service that exist on such inventoried property.

"(b) AVOIDANCE OF ADVERSE IMPACTS.—In establishing such wetland conservation easements on land that is considered to be cropland as of the date of enactment of this section, the Secretary shall avoid, to the extent practicable adverse impact on the productivity of such croplands, as provided in this subsection.

"(c) LIMITATIONS.—If a particular parcel of inventoried property is to be sold or leased to a borrower described in section 335(e)(1)(C)(i)-(iii) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1985) the Secretary shall—

"(1) not establish such wetland conservation easements with respect to wetlands that were converted prior to December 23, 1985, and that have been in cropland use, as determined by the Secretary, in excess of 25 percent of the existing cropland available for production of agricultural commodities on the particular parcel of inventoried property;

"(2) not establish such wetland conservation easements with respect to wetlands that have been frequently planted to agricultural commodities and those in paragraph (1), in excess of 25 percent of the existing cropland available for production of

agricultural commodities on the particular parcel of inventoried property;

"(3) ensure that the buffer area adjacent to the wetland is generally not less than 100 nor more than 200 feet in average width;

"(4) ensure that access to other portions of the property for farming and other uses is provided;

"(5) not establish such wetland conservation easements with respect to wetlands that have a history of haying and grazing in excess of 50 percent; and

"(6) ensure that all haying and grazing practices permitted under the easement shall conform to forage management standards designed to protect wetlands.

"(d) NOTIFICATION.—The Secretary shall provide prior written notification to a borrower considering preservation loan servicing that a wetland conservation easement may be placed on land for which the borrower is negotiating a lease or lease option.

"(e) APPRAISED VALUE.—The appraised value of the farm shall reflect the value of the land due to the placement of wetland conservation easements.

"(f) VOLUNTARY WAIVER.—Notwithstanding the limitations described under subsection (c), the limitations may be voluntarily waived by any person with respect to real property described in subsection (c).".

—At the end of subtitle I as contained in section 1608, strike the closing quotation marks and period and insert the following new section:

"SEC. 1286. WETLAND EASEMENTS FOR CERTAIN PROPERTY.

"(a) ESTABLISHMENT.—In the disposal of real property under Consolidated Farm and Rural Development Act, the Secretary shall establish perpetual wetland conservation easements to protect and restore wetlands or converted wetlands as recommended by the United States Fish and Wildlife Service that exist on such inventoried property.

"(b) AVOIDANCE OF ADVERSE IMPACTS.—In establishing such wetland conservation easements on land that is considered to be cropland as of the date of enactment of this section, the Secretary shall avoid, to the extent practicable, adverse impact on the productivity of such croplands, as provided in this subsection.

"(c) LIMITATIONS.—If a particular parcel of inventoried property is to be sold or leased to a borrower described in section 335(e)(1)(C)(i)-(iii) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1985) the Secretary shall—0

"(1) not establish such wetland conservation easements with respect to wetlands that were converted prior to December 23, 1985, and that have been in cropland use, as determined by the Secretary, in excess of 25 percent of the existing cropland available for production of agricultural commodities on the particular parcel of inventoried property;

"(2) not establish such wetland conservation easements with repect to wetlands that have been frequently planted to agricultural commodities and those in paragraph (1), in excess of 25 percent of the existing cropland available for production of agricultural commodities on the particular parcel of inventoried property;

"(3) ensure that the buffer area adjacent to the wetland is generally not less than 100 nor more than 200 feet in average width;

"(4) ensure that access to other portions of the property for farming and other uses is provided;

"(5) not establish such wetland conservation easements with respect to wetlands that have a history of haying and grazing in excess of 50 percent; and

"(6) ensure that all haying and grazing practices permitted under the easement shall conform to forage management standards designed to protect wetlands.

"(d) NOTIFICATION.—The Secretary shall provide prior written notification to a borrower considering preservation loan servicing that a wetland conservation easement may be placed on land for which the borrower is negotiating a lease or lease option.

"(e) APPRAISED VALUE.—The appraised value of the farm shall reflect the value of the land due to the placement of wetland conservation easements.

"(f) VOLUNTARY WAIVER.—Notwithstanding the limitations described under subsection (c), the limitations may be voluntarily waived by any person with respect to real property described in subsection (c).".

By Mr. De FAZIO:

—Add the following new title at the end of the bill:

TITLE 19—ORGANIC CERTIFICATION STANDARDS

SEC. 1901. SHORT TITLE.

This title may be cited as the "Organic Foods Production Act of 1990".

SEC. 1902. PURPOSES.

The purposes of this Act are—

(1) to establish national standards governing the marketing of certain agricultural products as organically produced products;

(2) to assure consumers that organically produced products meet a consistent standard; and

(3) to facilitate interstate commerce in fresh and processed food that is organically produced.

SEC. 1903. DEFINITIONS.

As used in this title:

(1) AGRICULTURAL PRODUCTS.—The term "agricultural products" means any agricultural commodity or product whether raw or processed, including nay commodity or product derived from livestock, or fowl that is marketed in the United States for human and livestock consumption.

(2) BOTANICAL PESTICIDE.—The term "botanical pesticide" means natural pesticides derived from plants.

(3) CERTIFYING AGENT.—The term "Certifying Agent" means the chief executive official of a State or, in a State that provides by law for statewide election of a Commissioner of Agriculture, the Commissioner of Agriculture or an individual (including private entities) who is accredited by the Secretary as a Certifying Agent for the purpose of certifying a farm or handling operation as an organically certified farm or handling operation in accordance with this title.

(4) CERTIFIED ORGANIC FARM.—The term "certified organic farm" means a farm, or portion of a farm, that is certified by the Certifying Agent under this title as utilizing a system of organic farming as established by the Secretary in accordance with this title.

(5) CERTIFIED ORGANIC HANDLING OPERATION.—The term "certified organic handling operation" means any operation, or portion of any handling operation, that is certified by the certifying agent under this title as utilizing a system of organic handling as described under this title.

(6) CROP YEAR.—The term "crop year" means the normal growing season for a crop as determined by the Secretary.

(7) GOVERNING STATE OFFICIAL.—The term "governing State official" means the chief executive official of a State or, in a State that provides by law for statewide election of a Commissioner of Agriculture, the Commissioner of Agriculture who administers the organic certification program established under section 1904.

(8) HANDLE.—The term "handle" means to sell, process, or package organically produced agricultural products, except such term shall not include final retailers of agricultural products that do not process agricultural products.

(9) INDIVIDUAL.—The term "individual" means a person, group of people, corporation, association, organization, cooperative, or other entity.

(10) NATIONAL LIST.—The term "National List" means a list of approved and prohibited substances as provided for in section 1918 of this title.

(11) ORGANICALLY PRODUCED.—The term "organically produced" means an agricultural product that is produced using organic farming methods as described in this title, on an organically certified farm and handled by organically certified handling operations.

(12) PESTICIDE.—The term "pesticide" means any substance which alone, in chemical combination, or in any formulation with one or more substances, is defined as a pesticide in the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. Sec. 136 et seq.).

(13) PROCESSING.—The term "processing" means cooking, baking, heating, drying, mixing, grinding, churning, separating, extracting, cutting, fermenting, eviscerating, preserving, dehydrating, freezing, or otherwise manufacturing, and includes the packaging, canning, jarring, or otherwise enclosing such food in a container.

(14) PRODUCER.—The term "producer" means an individual who engages in the business of growing or producing food for consumption by humans or livestock.

(15) SECRETARY.—The term "Secretary" means the Secretary of Agriculture.

(16) SYNTHETIC.—The term "synthetic" means a substance that is formulated or manufactured by a process which chemically changes a substance extracted from naturally occurring plant, animal, or mineral sources, excepting microbiological processes.

SEC. 1904. NATIONAL ORGANIC PRODUCTION PROGRAM.

(a) IN GENERAL.—The Secretary shall establish national minimum standards for producers and handlers of agricultural products that have been produced using organic methods as provided in this title.

(b) STATE PROGRAM.—In establishing standards under subsection (a), the Secretary shall permit each State to implement a State organic certification program for producers and handlers of agricultural products that have been produced using organic methods as provided in this title.

(c) CONSULTATION.—In developing standards under subsection (a), and the National List under section 1918, the Secretary shall consult with the National Organic Standards Board established under section 1919.

(d) CERTIFICATION.—The Secretary shall implement the program established under subsection (a) through Certifying Agents that may certify a farm or handling operation that meets the requirements of this title as an organically certified farm or handling operation.

SEC. 1905. COMPLIANCE REQUIREMENTS.

(a) IN GENERAL.—

(1) On or after October 1, 1993, no individual may affix a label to an agricultural

product that infers, directly or indirectly, that such product is produced, grown or processed using organic methods or otherwise indicate that such product is produced, grown, or processed using organic methods, except in accordance with this title and under an approved organic certification program implemented under this title.

(2) Such label or other market information may indicate that the product meets USDA standards for organic production and may incorporate the United States Department of Agriculture seal.

(b) IMPORTED PRODUCTS.—Imported organically produced agricultural products shall be deemed to be in compliance with paragraph (a)(1) if the Secretary determines that such products have been produced and handled under an organic certification program that provides safeguards and guidelines governing the production and handling of such products that are at least equivalent to the requirements of this title.

(c) EXEMPTIONS FOR PROCESSED FOOD.—Subsection (a) shall not apply for the purpose of describing the organically produced ingredients in the case of products that—

(1) contain at least 50 percent organically produced ingredients by weight, excluding water and salt, if the Secretary, on the recommendation of the National Organic Standards Board, and in consultation with the Secretary of Health and Human Services, has determined to permit the word "organic" to be used on the principal display panel of such products only for the purpose of describing the organically produced ingredients; or

(2) contain less than 50 percent organically produced ingredients by weight, excluding water and salt, if the Secretary, on the recommendation of the National Organic Standards Board, and in consultation with the Secretary of Health and Human Services, has determined to permit the word "organic" to appear on the ingredient listing panel to describe those ingredients that are organically produced in accordance with this title.

(d) SMALL FARMER EXEMPTION.—Subsection (a) shall not apply to individuals who sell no more than $5,000 annually in value of agricultural products.

SEC. 1906. GENERAL REQUIREMENTS.

(a) IN GENERAL.—A program established under this title shall—

(1) provide that each organically produced agricultural product must—

(A) be produced only on organically certified farms and handled only through organically certified handling operations in accordance with this title; and

(B) be produced and handled in accordance with such program;

(2) require that producers and handlers desiring to participate under such program to establish an organic farm plan under section 1914;

(3) provide for procedures that allow producers and handlers to appeal an adverse administrative determination under this title;

(4) require each organic farming operation or each organic handling operation to certify to the Secretary, the governing State official (if applicable), and the Certifying Agent on an annual basis, that such producer or handler has not produced or handled any organically produced agricultural product except in accordance with this title and any applicable State program;

(5) provide for annual on-site inspection by the Certifying Agent of each farm and handling operation that has been certified under this section;

(6) provide for periodic residue testing of agricultural products that have been produced on organically certified farms and handled through organically certified handling operations to determine whether such products contain any pesticide or other nonorganic residue or natural toxicants and, upon detection of pesticide residues in excess of tolerance, or any residue of a pesticide which is unregistered or for which the registration has been canceled, or unhealthful levels of other residues or toxicants, provide for the notification of appropriate governmental health agencies;

(7) provide for appropriate and adequate enforcement procedures, as determined by the Secretary to be necessary and consistent with section 1908;

(8) protect against conflict-of-interest as specified under section 1916(h);

(9) provide for public access to certification documents and laboratory analyses that support certification;

(10) require such other terms and conditions as may be determined by the Secretary to be necessary; and

(11) provide for the collection of reasonable fees from producers, Certifying Agents and handlers who participate in such program.

(b) DISCRETIONARY REQUIREMENTS.—An organic certification program established under this title may provide for the certification of an entire farm or handling operation or specific fields of a farm or parts of a handling operation if—

(1) in the case of a farm, the fields to be certified have distinct, defined boundaries and buffer zones separating the land being operated through the use of organic methods from land that is not being operated through the use of such methods;

(2) the operators of such farm or handling operation maintain separate records of all operations and make such records available at all times for inspection by the Secretary, the Certifying Agent, and the governing State officials; and

(3) appropriate physical facilities, machinery, and management practices are established to prevent the possibility of a mixing of organic and nonorganic products or a penetration of prohibited chemicals or other substances on the certified land or area.

SEC. 1907. STATE ORGANIC CERTIFICATION PROGRAM.

(a) IN GENERAL.—The governing State official may prepare and submit a plan for the establishment of a State organic certification program to the Secretary for approval. A State organic certification program must meet the requirements of this title to be approved by the Secretary.

(b) ADDITIONAL REQUIREMENTS.—

(1) AUTHORITY.—Such State organic certification program may contain more restrictive requirements governing the organic certification of farms and handling operations and the production and handling of organic agricultural products in accordance with this title than are contained in the program established by the Secretary under this title.

(2) CONTENT OF REQUIREMENTS.—Such additional requirements must—

(A) further the purposes of this title;

(B) not be inconsistent with this title;

(C) not be discriminatory toward agricultural commodities produced in other States that are certified under this title; and

(D) be approved by the Secretary.

(c) REVIEW AND OTHER DETERMINATIONS.—

(1) SUBSEQUENT REVIEW.—The Secretary shall review programs established under plans approved by the Secretary not less than once during each 5-year period following the date of the approval of such program.

(2) CHANGES IN PROGRAM.—The governing State official, prior to implementing any substantive change to such program, must submit such change to the Secretary for approval.

(3) TIME FOR DETERMINATION.—The Secretary shall make a determination concerning any plan, proposed change to a plan, or a review of a plan no later than 6 months after the receipt of such plan, such proposed change, or the initiation of such review.

SEC. 1908. NATIONAL STANDARDS FOR ORGANIC PRODUCTION.

(a) ORGANICALLY PRODUCED PRODUCTS.—To be sold or labeled as an organically produced agricultural product under this title, such commodity shall meet the minimum standards established under this title.

(b) SYNTHETIC CHEMICALS.—To be sold or labeled as an organically produced agricultural product under this title, an agricultural commodity shall have been produced and handled without the use of synthetic chemicals, except as provided in section 1918.

(c) TRANSITION PERIODS.—To be sold or labeled as an organically produced agricultural product under this title, an agricultural commodity shall not be produced on land to which any prohibited substances, including synthetic chemicals, have been applied during the 3 years immediately preceding the harvest of such agricultural product.

(d) COMPLIANCE WITH ORGANIC PLAN.—To be sold or labeled as an organically produced agricultural product under this title, an agricultural commodity shall be produced and handled in compliance with an organic plan agreed to by the producer and handler of such product and the Certifying Agent.

SEC. 1909. PROHIBITED CROP PRODUCTION PRACTICES AND MATERIALS.

(a) SEED, SEEDLINGS AND PLANTING PRACTICES.—For a farm to be certified under this title, producers on such farm shall not apply materials to, or engage in practices on, seed or seedlings that are determined by the Secretary or by the applicable governing State official to be contrary to, or inconsistent with, this title or the applicable State organic certification program.

(b) SOIL AMENDMENTS.—For a farm to be certified under this title, producers on such farm shall not—

(1) use any fertilizers containing synthetic ingredients or any commercially blended fertilizers containing materials prohibited under this title or under the applicable State organic certification program; or

(2) use as a source of nitrogen: phosphorous, lime, potash, or any materials determined by the Secretary or the governing State official to be inconsistent with the purposes of this title.

(c) CROP MANAGEMENT.—For a farm to be certified under this title, producers on such farm shall not—

(1) use natural poisons such as arsenic or lead salts that have long-term effects and persist in the environment, as determined by the applicable governing State official or the Secretary;

(2) use plastic mulches, unless such mulches are removed at the end of each growing or harvest season; or

(3) use annual transplants that are treated with any synthetic or prohibited material.

SEC. 1910. ANIMAL PRODUCTION PRACTICES AND MATERIALS.

(a) IN GENERAL.—Any meat, poultry, wild or domesticated game, or other nonplant life that is to be slaughtered and sold as organically produced shall be raised in accordance with this title.

(b) BREEDER STOCK.—Breeder stock may be purchased from whatever source if such stock is not in the last third of gestation.

(c) FEED.—For a farm that produced livestock to be certified under this title, producers on such farm—

(1) shall feed such livestock organically produced feed that meets the requirements of this title; and

(2) shall not use the following feed—

(A) plastic pellets for roughage;

(B) manure refeeding; or

(C) feed formulas containing urea.

(d) SUPPLEMENTS.—For a farm that produces livestock to be organically certified under this title, producers on such farm shall not use growth promoters and hormones, whether implanted, ingested, or injected, including antibiotics and synthetic trace elements used to stimulate growth or production of livestock covered by this title.

(e) HEALTH CARE.—

(1) PROHIBITED PRACTICES.—For a farm that produces livestock to be organically certified under this title, producers on such farm shall not—

(A) use subtherapeutic doses of antibiotics;

(B) use synthetic internal parasiticides on a routine basis; or

(C) administer medication other than vaccinations in the absence of illness.

(2) STANDARDS.—The National Organic Standards Board shall recommend to the Secretary standards in addition to those in paragraph (1) for the care of livestock to ensure that the animal is organically produced.

(e) ADDITIONAL GUIDELINES.—

(1) POULTRY AND LIVESTOCK.—With the exception of day old poultry, all poultry from which meat or eggs will be labeled as organically produced shall be managed in accordance with this title prior to and during the period in which such meat or eggs are sold.

(2) DAIRY LIVESTOCK.—A dairy cow from which milk or milk products will be labeled as organically produced shall be raised in accordance with this title for not less than the 12-month period immediately prior to the sale of such milk and milk products.

(3) OTHER SLAUGHTER LIVESTOCK.—Other meat, from wild or domesticated game, or other nonplant life that is to be slaughtered and sold as organically produced shall be raised in accordance with this title.

(f) LIVESTOCK IDENTIFICATION.—

(1) IN GENERAL.—In order for a farm that produces livestock to be certified under this title, producers shall keep adequate records and maintain a detailed, verifiable audit trail so that each animal or flock can be traced back to such farm.

(2) RECORDS.—In order to carry out paragraph (1), each producer shall keep accurate records on each slaughter animal including—

(A) amounts and sources of all medications administered; and

(B) all feeds and feed supplements bought and fed.

SEC. 1911. HANDLING.

(a) IN GENERAL.—For a handling operation to be certified under this title, each individual on such handling operation shall not, with repsect to any agricultural product covered by this title—

(1) add any synthetic ingredient during the processing or any post harvest handling of the product;

(2) add any ingredient known to contain the levels of nitrates, heavy metals, or toxic residues in excess of those permitted by the Secretary of applicable governing State official;

(3) add any sulfites, nitrates, or nitrites;

(4) add any ingredients that are not organically produced in accordance with this title and the applicable State organic certification program, unless such ingredients are included on the National List and represent not more than 5 percent of the weight of the total finished product (excluding salt and water);

(5) use any packaging materials that contain fungicides, preservatives, or fumigants;

(6) use any bag or container that had previously been in contact with any substance that would compromise the organic quality of such product; or

(7) use, in processed food to be labeled organically produced, water that does not meet Safe Drinking Water Act requirements.

(b) MEAT.—For a farm or handling operation to be organically certified under this title, producers on such farm or individual on such handling operation shall ensure that organically produced meat does not come in contact with nonorganically produced meat.

SEC. 1912. ADDITIONAL GUIDELINES.

(a) IN GENERAL.—The Secretary, the governing State official, or the Certifying Agent shall use a system of residue testing of products labeled as organically produced under this title to assist in the enforcement of this title.

(b) PREHARVEST TESTING.—The Secretary, the applicable governing State official, or the Certifying Agent may require preharvest tissue testing of any crop grown on soil suspected of harboring contaminants.

(c) PRODUCT RESIDUE TESTING.—

(1) INSPECTION.—If the Secretary, the applicable governing State official, or the Certifying Agent determines that an agricultural product sold or labeled as organically produced under this title contains any detectable pesticide or other non-organic residue or prohibited natural substance, the Secretary, the applicable governing State official, or the Certifying Agent shall conduct an investigation to determine if the organic certification program has been violated, and may require the producer or handler to prove that any prohibited substance was not applied to such product.

(2) NONCOMPLIANCE WITH ORGANIC CERTIFICATION.—If, as determined by the Secretary, the applicable governing State official, or the Certifying Agent, the investigation conducted under paragraph (1) indicates that the residue is—

(A) the result of intentional application of a prohibited substance; or

(B) present at levels that are greater than unavoidable residual environmental contamination as prescribed by the Secretary or the applicable governing State official, in consultation with appropriate environmental regulatory agencies; such agricultural product shall not be labeled or sold as organically produced under this title.

(c) RECORDKEEPING REQUIREMENTS.—Producers who operate certified farming or handling operations under this title shall maintain records for 5 years concerning the production or handling of organically produced agricultural products by such operation, including—

(1) a detailed history of substances applied to fields or agricultural products;

(2) the names of persons who applied such substances, dates, the rate and method of application of such substances; and

(3) for handlers, records of the sources, handling, and disposition of all ingredients or production aids acquired for the production of organically produced products.

SEC. 1913. OTHER PRODUCTION AND HANDLING PRACTICES.

If a production or handling practice is not prohibited or otherwise restricted under this title, such practice shall be permitted unless the Secretary or the applicable governing State official determines that such practice would be inconsistent with the purposes of this title.

SEC. 1914. CONTENTS OF ORGANIC FARM PLAN.

(a) IN GENERAL.—A producer seeking certification under this title must submit an organic farm plan to the Certifying Agent which meets all the requirements of this title, and such plan must be reviewed by the Certifying Agent and be determined to meet the requirements of such programs.

(b) CROP PRODUCTION FARM PLAN.—

(1) SOIL FERTILITY.—An organic farm plan shall contain provisions designed to foster soil fertility, primarily through the management of the organic content of the soil through proper tillage, crop rotation, and manuring.

(2) MANURING.—

(A) INCLUSION IN ORGANIC FARM PLAN.—An organic farm plan shall contain terms and conditions that regulate the application of manure to crops.

(B) APPLICATION OF MANURE.—Such organic farm plan shall provide for the application of raw manure only to—

(i) any green manure crop;

(ii) any perennial crop;

(iii) any crop not for human consumption; and

(iv) any crop for human consumption,

but only if such crop is harvested after a reasonable period of time after the most recent application of raw manure, determined by the Certifying Agent to ensure the safety of such crop, but in no event shall such period be sooner than 60 days after such application.

(C) CONTAMINATION BY MANURE.—Such plan shall provide that raw manure may not be applied to any crop in a way that significantly contributes to water contamination by nitrates or bacteria.

(c) LIVESTOCK PLAN.—An organic livestock plan shall contain provisions designed to foster the organic production of livestock consistent with the purposes of this title, as determined appropriate by the Secretary and the applicable governing State official.

(d) MIXED CROP LIVESTOCK PRODUCTION.—An organic plan may encompass both the crop production and livestock production requirements in subsections (b) and (c) if both activities are conducted by the same producer.

(e) HANDLING PLAN.—An organic handling plan shall contain provisions designed to ensure that organically produced agricultural products are processed or packaged in a manner that is consistent with the purposes of this title, as determined appropriate by the Secretary and the applicable governing state official.

(f) MANAGEMENT OF WILD CROPS.—An organic plan for the harvesting of wild crops shall—

(1) designate the area from which the wild crop will be gathered or harvested;

(2) include a 3 year history of the management of the area showing that no prohibited substances have been applied;

(3) include a plan for the harvesting or gathering of the wild crops assuring that such harvesting or gathering will not be destructive to the environment and will sustain the growth and production of the wild crop; and

(4) include provisions that no prohibited substances will be applied by the producer.

(g) LIMITATION ON CONTENT OF PLAN.—An organic farm plan shall not include any production practices that are inconsistent with this title and the applicable State organic certification program.

SEC. 1915. ACCREDITATION PROGRAM.

(a) IN GENERAL.—The Secretary of Agriculture shall implement a program whereby a governing State official or a private individual that meets the requirements of this section shall be accredited as a Certifying Agent for the purpose of certifying a farm or handling operation as an organically certified farm or handling operation.

(b) REQUIREMENTS.—In order to be designated as a Certifying Agent under this title, a governing State official or private individual must—

(1) prepare and submit, to the Secretary, an application for such accreditation;

(2) have sufficient expertise in organic farming and handing techniques as determined by the Secretary; and

(3) fully comply with the provisions of this title.

(c) DURATION OF DESIGNATION.—An accreditation under this title shall be for a period not to exceed 5 years, or for a shorter period, as determined by the Secretary.

(d) FEES.—The Secretary may provide for the collection of reasonable fees from Certifying Agents seeking accreditation or reaccreditation under this section to assist in defraying the costs of the program established under this title.

SEC. 1916. REQUIREMENTS OF CERTIFYING AGENTS.

(a) ABILITY TO IMPLEMENT REQUIREMENTS.—To be accredited as a Certifying Agent under section 1915, a governing State official or an individual must be able to fully implement the organic program established under this title.

(b) INSPECTORS.—Any Certifying Agent must employ a sufficient number of inspectors to implement the program established under this title, as determined by the Secretary.

(c) RECORDKEEPING.—

(1) MAINTENANCE OF RECORDS.—Any Certifying Agent must maintain all records concerning its activities under this title for a period of not less than 10 years.

(2) ACCESS FOR SECRETARY.—Any Certifying Agent must allow representatives of the Secretary and the governing State official access to any and all records concerning the Certifying Agent's activities under this title.

(3) TRANSFERENCE OF RECORDS.—If any private individual that was certified under this title is dissolved or loses its accreditation, all records concerning such individual's activities under this title shall become the property of the Secretary and shall be transferred to the Secretary and made available to the applicable governing State official.

(d) AGREEMENT.—Any Certifying Agent must enter into an agreement with the Secretary under which such agent shall—

(1) agree to carry out the provisions of this title; and

(2) agree to such other terms and conditions as the Secretary determines appropriate.

(e) PRIVATE CERTIFYING AGENT AGREEMENT.—Any Certifying Agent that is a private individual, in addition to the agreement required in subsection (e), shall—

(1) agree to hold the Secretary harmless for any failure on the part of the agent to carry out the provisions of this title; and

(2) furnish reasonable security, in an amount determined by the Secretary, for the purpose of protecting the rights of participants in the program established under this title.

(f) COMPLIANCE WITH STATE PROGRAM.—Any Certifying Agent must fully comply with the terms and conditions of the applicable State organic certification program implemented under this title.

(g) CONFIDENTIALITY.—Except as provided in section 1906(a)(9), any Certifying Agent must maintain strict confidentiality with respect to its clients under this program and may not disclose to third parties (with the exception of the Secretary or the applicable governing State official) any business related information concerning such client obtained while implementing this title.

(h) CONFLICT OF INTEREST.—Any Certifying Agent shall not—

(1) carry out any inspections of any operation in which such agent, or employee of such agent has, or has had, a commercial interest, including the provision of consultancy services;

(2) accept payment, gifts, or favors of any kind from the business inspected in excess of prescribed fees; or

(3) provide advice concerning organic practices or techniques for a fee, other than fees established under such program.

(i) ADMINISTRATOR.—A Certifying Agent that is a private individual shall nominate the person who cotrols the day to day operation of the agent.

(j) LOSS OF ACCREDIATION.—

(1) NONCOMPLIANCE.—If the Secretary or the governing State official (if applicable) determines that a Certifying Agent is not properly adhering to the provisions of this title, the Secretary or such governing State official may suspend such Certifying Agent's accreditation.

(2) EFFECT ON CERTIFIED OPERATIONS.—If the accreditation of a Certifying Agent is suspended under paragraph (1), the Secretary or the governing State official (if applicable) shall promptly determine whether farming or handling operations certified by such agent may retain their organic certification.

SEC. 1917. PEER REVIEW OF CERTIFYING AGENTS.

(A) PEER REVIEW.—In determining whether to approve an application for accreditation submitted under section 1916, the Secretary shall consider the report concerning such applicant prepared by a peer review committee established in accordance with subsection (b).

(b) PEER REVIEW COMMITTEE.—In order to assist the Secretary in evaluating applications under section 1916, the Secretary may establish a panel consisting of no less than 3 persons who have expertise in organic farming and handling methods for the purpose of evaluating the State or private individual seeking approval as a Certifying Agent under this title. At least 2 members of such committee shall not be employees of the United States Department of Agriculture or of the applicable State government.

SEC. 1918. NATIONAL LIST.

(a) IN GENERAL.—The Secretary shall establish a National List of approved and prohibited substances that shall be included in the standards for organic production established under this Act in order for such products to be labeled "organically produced" under this title.

(b) CONTENT OF LIST.—The list established under subsection (a) shall contain an itemization, by specific use or application, of each synthetic substance permitted under subsection (c)(1) or each natural substance prohibited under subsection (c)(2).

(c) GUIDELINES FOR PROHIBITIONS OR EXEMPTIONS.—

(1) EXEMPTION FOR PROHIBITED SUBSTANCES.—The National List may provide for the use of substances in an organic farming or handling operation that are otherwise prohibited under this title only if—

(A) the Secretary of Agriculture determines, in consultation with the Secretary of Health and Human Services and the Administrator of the Environmental Protection Agency, that the use of such substances—

(i) would not be harmful to human health or the environment;

(ii) is necessary to the production or handling of the crop because of the unavailability of wholly natural substitute products; and

(iii) is consistent with organic farming and handling; and

(B) the substance (i) is used in production and contains an active synthetic ingredient in the following categories: copper and sulfur compounds; toxins derived from bacteria; pheremones, soaps, horticultural oils, fish emulsions, treated seed, vitamins and minerals; livestock paraciticides and medicines;

(ii) is used in handling and is non-synthetic but is not organically produced; and

(C) the specific exemption is developed using the procedures described in subsection (d).

(2) PROHIBITION ON THE USE OF SPECIFIC NATURAL SUSBSTANCES.—The National List may provide for the prohibition on the use of specific natural substances in an organic farming or handling operation that are otherwise allowed under this title only if—

(A) the Secretary of Agriculture determines, in consultation with the Secretary of Health and Human Services and the Administrator of the Environmental Protection Agency, that the use of such substances—

(i) would be harmful to human health or the environment; and

(ii) is inconsistent with organic farming and handling, and the purposes of this title; and

(B) the specific prohibition is developed using the procedures specified in subsection (d).

(d) PROCEDURE FOR ESTABLISHING NATIONAL LIST.—

(1) IN GENERAL.—The National List established by the Secretary shall be based upon a proposed national list or proposed amendments to the National List developed by the National Organic Standards Board.

(2) NO ADDITIONS.—The Secretary may not include exemptions for the use of specific synthetic substances in the National List other than those exemptions contained in the Proposed National List or Proposed Amendments to the National List.

(3) PROHIBITED SUBSTANCES.—In no instance shall the National List include any substance, the presence of which in food has been prohibited by Federal regulatory action.

(4) NOTICE AND COMMENT.—Before establishing the National List or before making any amendments to the National List, the Secretary shall publish the Proposed National List or any Proposed Amendments to the National List in the Federal Register and seek public comment on such proposals. The Secretary shall include in such Notice any changes to such proposed list or amendments recommended by the Secretary.

(5) PUBLICATION OF NATIONAL LIST.—After evaluating all comments received concerning the Proposed National List or Proposed Amendments to the National List, the Secretary shall publish the final National List in the Federal Register, along with a discussion of comments received.

(e) SUNSET PROVISION.—No exemption or prohibition contained in the National List shall be valid unless the National Organic Board has reviewed such exemption or prohibition as provided in this section within 5 years of such exemption or prohibition being adopted or reviewed.

SEC. 1919. NATIONAL ORGANIC STANDARDS BOARD.

(a) IN GENERAL.—The Secretary shall establish a National Organic Standards Board (in accordance with the Federal Advisory Committee Act (5 U.S.C. App. 2 et seq.)) to assist in the development of standards for substances to be used in organic production and to advise the Secretary on any other aspects of the implementation of this title.

(b) COMPOSITION OF BOARD.—The Board shall be composed of 15 members, of which—

(1) 4 shall be individuals who own or operate an organic farming operation;

(2) 2 shall be individuals who own or operate an organic handling operation;

(3) 1 shall be an individual who owns or operates a retail establishment with significant trade in organic products;

(4) 3 shall be individuals with expertise in areas of environmental protection and resource conservation;

(5) 3 shall be individuals who represent public interest or consumer interest groups;

(6) 1 shall be an individual with expertise in the fields of toxicology, ecology, or biochemistry; and

(7) 1 shall be an individual who is a certifying agent as identified under section 1916(i).

(c) APPOINTMENT.—Not later than 180 days after the date of enactment of this Act, the Secretary shall appoint the members of the Board from nominations received from organic certifying organizations, States, and other interested persons and organizations.

(d) TERM.—A member of the Board shall serve for a term of 5 years, except that the Secretary may shorten the terms of the original members of the Board in order to provide for a staggered term of appointment for all members of the Board. Members cannot serve consecutive terms unless they are members whose terms have been reduced by the Secretary.

(e) MEETINGS.—The Secretary shall convene a meeting of the Board not later than 60 days after the appointment of its members and shall convene subsequent meetings on a periodic basis

(f) COMPENSATION.—A member of the Board shall serve without compensation, but may be reimbursed by the Secretary for transportation expenses incurred in performing duties as a member of the Board.

(g) CHAIR.—The Board shall select a Chairperson for the Board.

(h) QUORUM.—A majority of the members of the Board shall constitute a quorum for the purpose of conducting business.

(i) DECISIVE VOTES.—Two thirds of the votes cast at a meeting of the Board at which a quorum is present shall be decisive of any motion.

(j) OTHER TERMS AND CONDITIONS.—The Secretary shall authorize the Board to hire a staff director and shall detail staff of the Department of Agriculture or allow for the hiring of staff and may, subject to necessary appropriations, pay necessary expenses incurred by such Board in carrying out the provisions of this title, as determined appropriate by the Secretary.

(k) RESPONSIBILITIES OF THE BOARD.—

(1) IN GENERAL.—The Board shall provide recommendations to the Secretary regarding the implementation of this title.

(2) NATIONAL LIST.—The Board shall develop the proposed National List or proposed amendments to the National List or proposed amendments to the National List for submission to the Secretary in accordance with section 1918.

(3) TECHNICAL ADVISORY PANELS.—The Board shall convene technical advisory panels to provide scientific evaluation of the materials considered for inclusion in the National List. Such panels may include experts in agronomy, entomology, health sciences and other relevant disciplines.

(4) SPECIAL REVIEW OF BOTANICAL PESTICIDES.—The National Organic Standards Board shall, prior to the establishment of any list, review all botanical pesticides used in agricultural production and consider whether any such botanical pesticide should be included in the list of prohibited natural substances.

(5) PRODUCT RESIDUE TESTING.—The board shall advise the Secretary concerning the testing of organically produced agricultural products for residues as a result of unavoidable residual environmental contamination.

(l) REQUIREMENTS.—In establishing the proposed National List or proposed amendments to the National List, the National Organic Standards Board shall—

(1) review available information from the Environmental Protection Agency, the National Institute of Environmental Health Studies, and such other sources as appropriate, concerning the potential for adverse human and environmental effects of substances considered for inclusion in the proposed National List;

(2) work with manufacturers of substances considered for inclusion in the proposed National List to obtain a complete list of ingredients and determine whether such substances contain inert materials that are synthetically produced; and

(3) submit to the Secretary, along with the proposed National List or any proposed amendments to such list, the results of the National Organic Standards Board evaluation and the evaluation of the technical advisory panel of all substances considered for inclusion in the National List.

(m) EVALUATION.—In evaluating substances considered for inclusion in the proposed National List or proposed amendment to the National List, the National Organic Standards Board shall consider—

(1) the potential of such substances for detrimental chemical interactions with other materials used in organic farming systems;

(2) the toxicity and mode of action of the substance and of its breakdown products or any contaminants, and their persistance and areas of concentration in the environment;

(3) the probability of environmental contamination during manufacture, use, misuse or disposal of such substance;

(4) the effect of the substance on human health;

(5) the effects of the material on biological and chemical interactions in the agroecosystem, including the physiological effects of the substance on soil organisms (including the salt index and solubility), crops and livestock;

(6) the alternatives to using the substance in terms of practices or other available materials; and

(7) its compatibility with a system of sustainable agriculture.

(n) PETITIONS.—The National Organic Standards Board shall establish procedures under which individuals may petition the Organic Standards Board for the purpose of evaluating substances for inclusion on the National List.

(o) CONFIDENTIALITY.—Any business sensitive material obtained by the National Organic Standards Board in carrying out this section shall be treated as confidential business information by such Board and shall not be released to the public.

SEC. 1920. VIOLATIONS OF TITLE.

(a) MISUSE OF LABEL.—Any individual who knowingly sells or labels a product as organic, except in accordance with this title, shall be subject to a civil penalty of not more than $10,000.

(b) FALSE CERTIFICATION.—Any individual who issues a false certification under this title to the Secretary, a governing state official, or a Certifying Agent shall be subject to the provisions of section 1001 of title 18, United States Code.

(c) INELIGIBILITY.—

(1) IN GENERAL.—Except as provided in paragraph (2), any producer who—

(A) issues a false certification;

(B) attempts to have an organically produced label affixed to an agricultural product that such producer knows, or should have reason to know, to have been produced in a manner that is not in accordance with this title;

or

(C) otherwise violates the purposes of the national organic certification program established under section 1904(a) as determined by the Secretary or the applicable governing state official, after notice and an opportunity to be heard, shall not be eligible, for a period of 5 years from the date of such occurrence, to receive certification under this title with respect to any farm or handling operation in which such producer has an interest.

(2) WAIVER.—Notwithstanding paragraph (1), the Secretary may reduce or eliminate such period of ineligibility if the Secretary determines that such modification or waiver is in the best interests of the national organic certification program established under this title.

(d) REPORTING OF VIOLATIONS.—A Certifying Agent shall immediately report any violations of this title to the Secretary or the governing State official (if applicable), and shall decertify any individual determined to be in violation of this title.

(e) VIOLATIONS BY CERTIFYING AGENT.—A Certifying Agent that is a private individual that violates the provisions of this title or that falsely or negligently certifies any farming or handling operation and that does not meet the terms and conditions of the applicable organic certification program as an organic operation, as determined by the Secretary or the governing State official (if applicable) after notice and an opportunity to be heard, shall—

(1) lose its accreditation as a Certifying Agent under this title; and

(2) be ineligible to be accredited as a Certifying Agency under this title for a period of not less than 3 years subsequent to such determination.

(f) EFFECT OF OTHER LAWS.—Nothing in this title shall alter the authority of the Secretary of Agriculture under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) and the Poultry Products Inspection Act (21 U.S.C. 451 et seq.) concerning meat and poultry products, nor any of the authorities of the Secretary of Health and Human Services under the Federal Food, Drug and Cosmetic Act (21 U.S.C. 301 et seq.).

SEC. 1915. ADMINISTRATIVE APPEAL.

(a) EXPEDITED APPEALS PROCEDURE.—The Secretary shall establish an expedited administrative appeals procedure under which persons may appeal an action of the Secretary, the applicable governing State official, a Certifying Agent, or a certified farming or handling operation under this title that—

(1) adversely affects such person; or

(2) is inconsistent with the organic certification program established under the title.

(b) APPEAL OF FINAL DECISION.—A final decision of the Secretary under such process may be appealed to the United States Court of Appeals of the District in which such person is located.

SEC. 1921. ADMINISTRATION.

(a) REGULATIONS.—Not later than 180 days after the date of enactment of this title, the Secretary shall issue proposed regulations to carry out this title.

(b) ASSISTANCE TO STATE.—

(1) TECHNICAL AND OTHER ASSISTANCE.—The Secretary shall provide technical, administrative, and Extension Service assistance to each state that implements an organic certification program under this title.

(2) FINANCIAL ASSISTANCE.—The Secretary may provide financial assistance to any state that implements an organic certification program under this title.

SEC. 1922. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated for each fiscal year such sums as necessary to carry out this title.

By Mr. DORGAN of North Dakota:

—At the end of subtitle A of title XI, insert the following new section:

SEC. 1121. SENSE OF THE CONGRESS.

It is the sense of the Congress that any future reduction in spending provided by any budget reconciliation bill that affects agricultural commodity support programs should be made by Congress on a targeted basis to protect the support prices for the amount of commodities produced by family-sized farms, and should achieve budgetary savings, to the extent possible, through lower support prices on production from the largest farms.

Redesignate the succeeding section accordingly.

—Amend section 1101(a) by striking "and" at the end of paragraph (5), by striking the period at the end of paragraph (6) and inserting "; and", and by inserting at the end the following new paragraph:

(7) by striking subparagraph (A) of paragraph (5) and inserting the following:

"(5)(A) The Secretary shall issue regulations defining the term 'person', and prescribing such rules as necessary to assure a fair and reasonable application of the limitations established under this section, except that as the term applies to section 1001 (1) and (2) of this Act—

"(i) each person must meet the requirements of material participation within the meaning of section 469(h) of the Internal Revenue Code of 1986 as prescribed in section 1.469-5T of the Internal Revenue Code of 1986, and

"(ii) each person and any related terms, such as individual, joint operation, and entity shall be defined in such manner that no combination of farming or business organization shall result in any one natural person qualifying as more than one person.".

—In the amendment made by section 901 to section 107A of the Agricultural Act of 1949, at the end of the subsection (c)(1)(A) insert the following:

The farm program payment yield times the acreage used to compute payments to a producer under this paragraph shall not exceed 15,000 bushels of wheat.

—In the amendment made by section 901 to section 107A(c)(1)(E)(i) of the Agricultural Act of 1949, strike "$4" and insert "$4.50".

—In the amendment made by section 1001 to section 105A of the Agricultural Act of 1949, at the end of subsection (c)(1)(A) insert the following:

The farm program payment yield times the acreage used to compute payments to a producer under this paragraph shall not exceed 21,000 bushels of corn or, in the case of other feed grains, a comparable amount, as determined by the Secretary.

—In the amendment made by section 1001 to section 105A(c)(1)(E)(i) of the Agricultural Act of 1949, strike "$2.75" and insert "$3.10".

By Mr. DOWNEY:

—Strike title II and insert the following:

TITLE II—SUGAR

SEC. 201. SUGAR PRICE SUPPORT.

(a) Section 901 of the Food Security Act of 1985 (7 U.S.C. 1446 nt) is amended by striking "1986 through 1990 crops" and inserting "1986 through 1991 crops".

(b) Section 201(j) of the Agricultural Act of 1949 is amended by striking "1990" and inserting "1991" each place it appears.

—Strike subtitles A and B of title II and insert the following:

TITLE II—SUGAR

SEC. 201. SUGAR PRICE SUPPORT.

(a) Section 901 of the Food Security Act of 1985 (7 U.S.C. 1446 nt) is amended by striking "1986 through 1990 crops" and inserting "1986 through 1991 crops".

(b) Section 201(j) of the Agricultural Act of 1949 is amended by striking "1990" and inserting "1991" each place it appears.

Redesignate the succeeding sections accordingly.

—Strike title II and insert the following:

TITLE II—SUGAR

SEC. 201. SUGAR PRICE SUPPORT.

Effective only for the 1991 through 1995 crops of sugar beets and sugarcane, section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended by—

(1) striking "honey, and milk" in the first sentence and inserting "honey, milk, sugar beets, and sugarcane"; and

(2) amending subsection (h) to read as follows:

"(h)(1) The price of each of the 1991 through 1995 crops of sugar beets and sugarcane, respectively, shall be supported in accordance with this subsection.

"(2) The Secretary shall support the price of domestically grown sugarcane through nonrecourse loans at such level as the Secretary determines appropriate but not less than 16 cents per pound for raw cane sugar, except that such level may be increased under paragraph (4).

"(3) The Secretary shall support the price of domestically grown sugar beets through nonrecourse loans at such level as the Secretary determines is fair and reasonable in relation to the loan level for sugarcane.

"(4)(A) The Secretary may increase the support price for each of the 1991 through 1995 crops of domestically grown sugarcane and sugar beets from the price determined for the preceding crop based on such factors as the Secretary determines appropriate, including changes (during the 2 crop years immediately preceding the crop year for which the determination is made) in the cost of sugar products, the cost of domestic sugar production, and other circumstances that may adversely affect domestic sugar production.

"(B) If the Secretary makes a determination not to increase the support price under subparagraph (A), the Secretary shall submit a report containing the findings, decision, and supporting data for such determination to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

"(5) The Secretary shall announce the loan rate to be applicable during any fiscal year under this subsection as far in advance of the beginning of that fiscal year as is practicable consistent with the purposes of this subsection.

"(6) Loans under this subsection during any fiscal year shall be made available not earlier than the beginning of such fiscal year and shall mature before the end of such fiscal year.".

—Strike subtitles A and B of title II and insert the following:

TITLE II—SUGAR

SEC. 201. SUGAR PRICE SUPPORT.

Effective only for the 1991 through 1995 crops of sugar beets and sugarcane, section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended by—

(1) striking out "honey and milk" in the first sentence and inserting "honey, milk, sugar beets, and sugarcane"; and

(2) amending subsection (h) to read as follows:

"(h)(1) The price of each of the 1991 through 1995 crops of sugar beets and sugarcane, respectively, shall be supported in accordance with this subsection.

"(2) The Secretary shall support the price of domestically grown sugarcane through nonrecourse loans at such level as the Secretary determines appropriate but not less than 16 cents per pound for raw cane sugar, except that such level may be increased under paragraph (4).

"(3) The Secretary shall support the price of domestically grown sugar beets through nonrecourse loans at such level as the Secretary determines is fair and reasonable in relation to the loan level for sugarcane.

"(4)(A) The Secretary may increase the support price for each of the 1991 through 1995 crops of domestically grown sugarcane and sugar beets from the price determined for the preceding crop based on such factors as the Secretary determines appropriate, including changes (during the 2 crop years immediately preceding the crop year for which the determination is made) in the cost of sugar products, the cost of domestic sugar production, and other circumstances that may adversely affect domestic sugar production.

"(B) If the Secretary makes a determination not to increase the support price under subparagraph (A), the Secretary shall submit a report containing the findings, decision, and supporting data for such determination to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

"(5) The Secretary shall announce the loan rate to be applicable during any fiscal year under this subsection as far in advance of the beginning of that fiscal year as is practicable consistent with the purposes of this subsection.

"(6) Loans under this subsection during any fiscal year shall be made available not earlier than the beginning of such fiscal year and shall mature before the end of such fiscal year.".

Redesignate the succeeding sections accordingly.

By Mr. DURBIN:

—At the end of title XIII (relating to research, page 614, after line 10) insert the following new section:

SEC. 1396. PUBLIC EDUCATION CONCERNING THE DANGERS OF TOBACCO USE.

"(a) PUBLIC EDUCATION.—The Extension Service of the Department of Agriculture, in consultation with the Office on Smoking and Health in the Centers for Disease Control in the Department of Health and Human Services, shall carry out a program of public education (with a special emphasis on reaching children and minorities) on the hazards of tobacco use and the advantages of quitting or not starting tobacco use.

"(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $5,000,000 for each of the fiscal years 1991 through 1995 to carry out this section.

—At the end of title XII (relating to trade, page 385, after line 22) insert the following new section:

SEC. 1243. PROHIBITION OF USE OF PROGRAMS WITH RESPECT TO THE EXPORT OF CERTAIN COMMODITIES AND PRODUCTS.

No program authorized or extended by this title shall be used to assist or encourage the export of tobacco in its raw or processed form.

—At the end of title XIII (relating to research, page 614, after line 10) insert the following new section:

SEC. 1396. PUBLIC EDUCATION CONCERNING THE DANGERS OF TOBACCO USE.

(a) PUBLIC EDUCATION.—The Extension Service of the Department of Agriculture, shall carry out a program of public education (with a special emphasis on reaching children and minorities) on the hazards of tobacco use and the advantage of quitting or not starting tobacco use.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $5,000,000 for each of the fiscal years 1991 through 1995 to carry out this section.

—At the end of title XIII (relating to research, page 614, after line 10) insert the following new section:

SEC. 1396. PUBLIC EDUCATION CONCERNING THE DANGERS OF TOBACCO USE.

(a) PUBLIC EDUCATION.—The Extension Service of the Department of Agriculture, using methods and materials such as those of the Office on Smoking and Health in the Centers for Disease Control in the Department of Health and Human Services, shall carry out a program of public education (with a special emphasis on reaching children and minorities) on the hazards of tobacco use and the advantage of quitting or not starting tobacco use.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $5,000,000 for each of the fiscal years 1991 through 1995 to carry out this section.

By Mr. DYSON:

—Page 821, after line 17, insert the following:

"(4) CONSERVATION PRIORITY AREAS.—(A) Upon application by the appropriate State agency, the Secretary shall designate watershed areas of the Chesapeake Bay Region (Pennsylvania, Maryland, and Virginia), the Great Lakes Region, and other areas of special environmental sensitivity as conservation priority areas.

"(B) Watersheds eligible for designation under subparagraph (A) shall include areas with actual and significant adverse water quality or habitat impacts related to agricultural production activities.

"(C) Conservation priority area designation under subparagraph (A) shall expire after 5 years, subject to redesignation, except that the Secretary may withdraw a watershed's designation—

"(i) upon application by the appropriate State agency; or

"(ii) in the case of areas specified in subparagraph (B), if the Secretary finds that such areas no longer contain actual and significant adverse water quality or habitat impacts related to agricultural production activities."

—Page 825, line 3, strike "and"." and insert ";"; and insert after line 3 the following:

(3) by striking the period at the end of paragraph (3) and inserting "; and"; and

(4) by adding the following at the end:

"(4) maximize water quality and habitat benefits by ensuring that program participation in each conservation priority area is equal to at least 50 percent of the national average rate of program participation measured by the ratio of participating acres to eligible acres, which the Secretary may accomplish by—

"(A) providing a one-time cash bonus or an annual rental premium to eligible owners or operators;

"(B) accepting filter strips of less than 66 feet, but not less than 25 feet;

"(C) entering into contracts for not less than 5, and not more than 15 years;

"(D) paying up to 50 percent of the costs of establishing conservation measures and practices as provided for in section 1234(b); or

"(E) promoting program participation in any other fashion that the Secretary deems appropriate that is consistent with the purposes of this title.".

By Mr. FORD of Michigan (or his designee):

—In subsection (a) of section 1842 of the bill—

(1) insert after "Secretary" the following: ", in consultation with the Secretary of Education"; and

(2) strike "physical".

—In section 1382 of the bill—

(1) in subsection (b), insert after "such as" the following: "the Occupational Safety and Health Administration,"; and

(2) in subsection (f)—

(A) insert after "Agriculture" the following: "and the Committee on Education and Labor"; and

(B) insert after "Forestry" the following: "and the Committee on Labor and Human Resources".

—In subsection (a) of section 1842 of the bill—

(1) insert after "Secretary" the following: ", in consultation with the Secretary of Education"; and

(2) strike "physical".

By Mr. FRENZEL:

—Strike section 1705 (and redesignate references and succeeding sections as may be necessary).

—Strike section 1711 (and redesignate references and succeeding sections as may be necessary).

—In section 1794 of the bill, strike "1711,".

—In section 1795 of the bill, strike "1711," each place it appears.

—Strike section 1701 (and redesignate references and succeeding sections as may be necessary).

—In section 1795(b) of the bill, strike "1701,".

—Strike section 1712 (and redesignate references and succeeding sections as may be necessary).

—In section 1795 of the bill, strike "1712," each place it appears.

—Strike subsection (d) of section 1715 (and redesignate references and succeeding sections as may be necessary).

—In section 1795 of the bill, strike "1715(d)," each place it appears.

—Strike section 1717 (and redesignate references and succeeding sections as may be necessary).

—In section 1794 of the bill, strike "1717,".

—Strike section 1721 (and redesignate references and succeeding sections as may be necessary).

—In section 1794 of the bill, strike "1721,".

—Strike section 1728 (and redesignate references and succeeding sections as may be necessary).

—In section 1794 of the bill, strike "1717, and 1728" and insert "and 1717".

—In section 1795 of the bill, strike "1728" each place it appears.

—In section 1729(a)(2) of the bill, strike subparagraph (B) (and make such technical corrections as may be necessary).

—Strike section 1733 (and redesignate references and succeeding sections as may be necessary).

—Strike section 1734 (and redesignate references and succeeding sections as may be necessary).

—Strike section 1745 (and redesignate references and succeeding sections as may be necessary).

—In section 1794 of the bill, strike "1733 and 1745" and insert "and 1733".

—In section 1795 of the bill, strike "1728 and 1745" each place it appears and insert "and 1728".

—Strike section 1751 (and redesignate references and succeeding sections as may be necessary).

—Strike section 1752 (and redesignate references and succeeding sections as may be necessary).

—In section 215(e) of the Temporary Emergency Food Assistance Act of 1983, as added by the bill—

(1) amend the first sentence to read as follows: "There are authorized to be appropriated to purchase, process, and distribute additional commodities under this section, $175,000,000 for fiscal year 1991 and $190,000,000 for fiscal year 1992."; and

(2) in the last sentence strike "1993" and insert "1991".

—In section 19(a)(1)(A) of the Food Stamp Act of 1977, as added by section 1782 of the bill—

(1) strike "$985,000,000" and insert "$974,000,000",

(2) strike "$1,029,000,000" and insert "$1,014,000,000",
(3) strike "$1,074,000,000" and insert "$1,054,000,000",
(4) strike "1,121,000,000" and insert "$1,096,000,000", and
(5) strike "$1,170,000,000" and insert "$1,140,000,000".

—Strike section 1702 (and redesignate references and succeeding sections as may be necessary).

—In section 1795 of the bill, strike "1702," each place it appears.

—Strike section 1703 (and redesignate references and succeeding sections as may be necessary).

—In section 1794 of the bill, strike "1703,".

By Mr. GIBBONS:

—At the end of the bill, insert the following new title:

TITLE XX—EFFECTIVE PERIOD

SEC. 2001. TERMINATION OF AUTHORITY.

Notwithstanding any other provision of law, any amendment made by, or provision of, titles I through XI of this Act (except subtitle B of title VI) that extends or authorizes any program, project, or activity until the end of calendar, fiscal, or crop year 1995 or through the 1995 crop of a commodity shall instead only extend or authorize that program, project, or activity until the end of calendar, fiscal, or crop year 1992 or through the 1992 crop of that commodity, and in the case of title XII, that title (except sections 1222 through 1236) and all amendments made by it shall be deemed to authorize programs, projects, and activities only until the end of fiscal year 1992.

By Mr. GLICKMAN:

—On page 266, after line 21, insert the following new subsection:

"(e) DEFICIENCY PAYMENT INELIGIBILITY.—Effective beginning with the 1991 crops, the Food Security Act of 1985 is amended by inserting after section 1001D (as added by subsection (d)) the following new section:

'SEC. 1001E. DEFICIENCY PAYMENT INELIGIBILITY.

'(a) IN GENERAL.—Any person that has qualifying gross revenues in excess of $1,000,000 annually shall be ineligible to receive deficiency payments on program crops.

'(b) DEFINITIONS.—(1) Qualifying gross revenues.—For purposes of this section, the term 'qualifying gross revenues' means the gross income derived by a person from the sale of program crops.

'(2) DEFICIENCY PAYMENTS.—For purposes of this section, the term 'deficiency payments' means payments authorized to be made to producers of program crops under sections 107A(c)(1), 105A(c)(1), 103B(c)(1), 103(h)(3)(A), and 101A(c)(1) of the Agricultural Act of 1949.

'(3) PROGRAM CROPS.—For purposes of this section, the term 'program crops' means wheat, feed grains, upland cotton, extra long staple cotton, and rice.'.".

—Strike out paragraph (5) of section 1204(d) of the amendment reported by the Committee on Agriculture and insert in lieu thereof the following:

(5) in paragraph (2) of subsection (b) (as so redesignated)—

(A) by striking the last sentence of subparagraph (B), and

(B) by adding at the end the following:

"(C)(i) Local currency proceeds used for private sector development activities pursuant to this paragraph may not be used to finance the production for export of agricultural commodities (or products thereof) that would compete, as determined by the President, in world markets with similar agricultural commodities (or products thereof) produced in the United States if such competition would cause substantial injury to United States producers, subject to clause (ii).

"(ii) Clause (i) does not apply to the use of such local currency proceeds in a major illicit drug producing country (as defined in section 481(i)(2) of the Foreign Assistance Act of 1961) for the purpose of reducing dependence on the production of crops from which narcotic and psychotropic drugs are derived.".

—Strike out subparagraph (E) of section 1204(e)(2) of the amendment reported by the Committee on Agriculture (page __ through line __ on page __) and insert in lieu thereof the following:

(E) by amending paragraph (5) to read as follows:

"(5)(A) Currency made available under this section may not be used to finance the production for export of agricultural commodities (or products thereof) that would compete, as determined by the President, in world markets with similar agricultural commodities (or products thereof) produced in the United States if such competition would cause substantial injury to United States producers, subject to subparagraph (B).

"(B) Subparagraph (A) does not apply to the use of currency proceeds in a major illicit drug producing country (as defined in section 481(i)(2) of the Foreign Assistance Act of 1961) for the purpose of reducing dependence on the production of crops from which narcotic and psychotropic drugs are derived."; and

In section 1207(e) of the amendment reported by the Committee on Agriculture—

(1) in paragraph (2) (page ___, line ___) strike out "(g)" and inset in lieu thereof "(h)"; and

(2) in paragraph (3), strike the closing quotation marks and the second period at the end of proposed new subsection (f) of section 408 (page ___, line ___), and after proposed new subsection (f) of section 408 (page ___, after line ___) insert the following:

"(g) Not later than February 15 of each year, the President shall submit to the Congress a report containing—

"(1) an assessment of the effectiveness of the use in major illicit drug producing countries of local currencies made available pursuant to section 106(b)(4)(C)(ii) or 108(c)(5)(B) in reducing dependence upon the production of crops from which narcotic and psychotropic drugs are derived; and

"(2) an analysis of the impact of exports of agricultural commodities whose production is financed under those sections on the competitive position in world markets of United States agricultural exports.".

By Mr. GLICKMAN:

—On page 1006, after line 20, add the following new Title XIX:

SECTION 1901. SHORT TITLE AND TABLE OF CONTENTS.

(a) SHORT TITLE.—This title may be cited as the "Soybean Promotion, Research, and Consumer Information Act".

(b) TABLE OF CONTENTS.—The table of contents for this title is as follows:

Sec. 1. Short title and table of contents.
Sec. 2. Findings and declaration of policy.
Sec. 3. Definitions.
Sec. 4. Issuance and amendments of orders.
Sec. 5. Required terms in orders.
Sec. 6. Referenda.
Sec. 7. Petition and review.
Sec. 8. Enforcement.
Sec. 9. Investigations; power to subpoena; aid of courts.
Sec. 10. Administrative provisions.
Sec. 11. Regulations.
Sec. 12. Authorization.

SEC. 1902. FINDINGS AND DECLARATION OF POLICY.

(a) FINDINGS.—Congress finds that—

(1) soybeans are an important source of nutritious foods that are a valuable part of the human diet and are an important feedstuff for the livestock industry;

(2) the production of soybeans plays a significant role in the economy of the United States in that soybeans are produced by thousands of soybean producers, processed by numerous processing entities, and soybeans and soybean products produced in the United States are consumed by people and livestock throughout the United States and foreign countries;

(3) soybeans and soybean products should be readily available and marketed efficiently to ensure that consumers have an adequate supply of soybean products at a reasonable price;

(4) the maintenance and expansion of existing markets and development of new markets for soybeans and soybean products are vital to the welfare of soybean producers and processors and those concerned with marketing soybeans and soybean products, as well as to the general economy of the United States, and are necessary to ensure the ready availability and efficient marketing of soybeans and soybean products;

(5) there exist established State and national organizations conducting soybean promotion, research, and consumer education programs that are valuable to the efforts of promoting the consumption of soybeans and soybean products;

(6) the cooperative development, financing, and implementation of a coordinated national program of soybean promotion, research, consumer information, and industry information are necessary to maintain and expand existing markets and develop new markets for soybeans and soybean products; and

(7) soybeans and soybean products move in interstate and foreign commerce, and soybeans and soybean products that do not move in such channels of commerce directly burden or affect interstate commerce in soybeans and soybean products.

(b) POLICY.—Congress declares that it is in the public interest to authorize the establishment, through the exercise of the powers provided in this title, of an orderly procedure for developing, financing through assessments on domestically-produced soybeans, and implementing a program of promotion, research, consumer information, and industry information designed to strengthen the soybean industry's position in the marketplace, to maintain and expand existing domestic and foreign markets and uses for soybeans and soybean products, and to develop new markets and uses for soybeans and soybean products.

(c) CONSTRUCTION.—Nothing in this title may be construed to provide for the control of production or otherwise limit the right of individual producers to produce soybeans.

SEC. 1903. DEFINITIONS.

As used in this title:

(1) The term "Board" means the United Soybean Board established under section 1905(b) of this title.

(2) The term "commerce" includes interstate, foreign, and intrastate commerce.

(3) The term "consumer information" means information that will assist consumers and other persons in making evaluations and decisions regarding the pruchase, preparation, and use of soybeans or soybean products.

(4) The term "Department" means the Department of Agriculture.

(5) The term "first purchaser" means—

(A) except as provided in subparagraph (B), any person buying or otherwise acquiring from a producer soybeans produced by such producer, or

(B) the Commodity Credit Corporation, in any case in which soybeans are pledged as collateral for a loan issued under any price support loan program administered by the Commodity Credit Corporation.

(6) The term "industry information" means information and programs that will lead to the development of new markets, new marketing strategies, or increased efficiency for the soybean industry, and activities to enhance the image of the soybean industry.

(7) The term "marketing" means the sale or other disposition of soybeans or soybean products in any channel of commerce.

(8) The term "net market price" means—

(A) except as provided in subparagraph (B), the sales price or other value received by a producer for soybeans after adjustments for any premium or discount based on grading or quality factors, as determined by the Secretary, or

(B) for soybeans pleded as collateral for a loan issued under any price support loan program administered by the Commodity Credit Corporation, the principal amount of the loan.

(9) The term "order" means an order issued under section 1904.

(10) The term "person" means any individual, group of individuals, partnership, corporation, association, cooperative, buying or any other legal entity.

(11) The term "producer" means any person engaged in the growing of soybeans in the United States who owns, or who shares the ownership and risk of loss of, such soybeans.

(12) The term "promotion" means any action, including paid advertising, technical assistance, and trade servicing activities, to enhance the image or desirability of soybeans or soybean products in domestic and foreign markets, and any activity designed to communicate to consumers, importers, processors, wholesalers, retailers, government officials, or others information relating to the positive attributes of soybeans or soybean products or the benefits of importation, use, or distribution of soybeans and soybean products.

(13) The term "qualified State soybean board" means a State soybean promotion entity that is authorized by State law. If no such entity exists in a State, the term "qualified State soybean board" means a soybean producer-governed entity—

(A) that is organized and operating within a State,

(B) that receives voluntary contributions and conducts soybean promotion, resarch, consumer information, or industry information programs, and

(C) that meets criteria established by the Board relating to the qualifications of such entity to perform duties under the order, as determined by the Board, and is recognized by the Board as the soybean promotion and research entity within the State.

(14) The term "research" means any type of study to advance the image, desirability, marketability, production, product development, quality, or functional or nutritional value of soybeans or soybean products, including any research activity designed to identify and analyze barriers to export sales of soybeans and soybean products.

(15) The term "Secretary" means the Secretary of Agriculture.

(16) The term "soybean products" means products produced in whole or in part from soybeans or soybean by-products.

(17) The term "soybeans" means all varieties of Glycine max or Glycine soya.

(18) The terms "State" and "United States" consist of the fifty States of the United States of America, the District of Columbia, and the Commonwealth of Puerto Rico.

SEC. 1904. ISSUANCE AND AMENDMENT OF ORDERS.

(a) IN GENERAL.—To effectuate the declared policy of section 1902(b) of this title, the Secretary, subject to the procedures provided in subsection (b), shall issue orders under this title applicable to producers and first purchasers of soybeans. Any such order shall be national in scope, and not more than one order shall be in effect under this title at any one time.

(b) PROCEDURE.—(1) The Secretary may propose the issuance of an order under this title, or an association of soybean producers or any other person that would be affected by an order issued pursuant to this title may request the issuance of, and submit a proposal for, such an order.

(2) Not later than 30 days after the receipt of a request and proposal for an order pursuant to paragraph (1), or whenever the Secretary determines to propose an order, the Secretary shall publish a proposed order and give due notice and opportunity for public comment on the proposed order.

(3) After notice and opportunity for public comments are given as provided in paragraph (2), the Secretary shall issue an order, taking into consideration the comments received and including in the order provisions necessary to ensure that the order is in conformity with the requirements under this title. Such order shall be issued and become effective not later than 180 days following publication of the proposed order.

(c) AMENDMENTS.—The Secretary, from time to time, may amend any order issued under this section. Except as otherwise provided in sections 1905(b)(2)(F) and 1905(d)(1), no amendment to an order shall be effective until approved by a referendum of soybean producers and the provisions of this title applicable to orders shall be applicable to amendments to orders.

SEC. 1905. REQUIRED TERMS IN ORDERS.

(a) IN GENERAL.—Any order issued under this title shall contain the terms and conditions specified in this section.

(b) ESTABLISHMENT AND MEMBERSHIP OF THE UNITED SOYBEAN BOARD.—(1) The order shall provide for the establishment of, and appointment of members to, a United Soybean Board to administer the order. Members of the Board shall be soybean producers appointed by the Secretary, on a geographic basis, from State or combined units, as provided in this subsection. The cumulative number of seats on the Board shall be the total number of seats to which all the units are entitled.

(2) The Secretary shall establish State units and combined units and seats on the Board for such units, as follows:

(A) Except as provided in subparagraph (B), each State shall be considered as a unit.

(B) A State in which average annual soybean production is less than 3 million bushels shall be grouped with other States into a combined unit. To the extent practicable, each State with average annual soybean production of less than 3 million bushels shall be grouped with other States with average annual soybean production of less than 3 million bushels into a combined unit, in a manner prescribed in the order, and each combined unit shall consist of geographically contiguous States. Each combined unit shall have an average annual production of soybeans of at least 3 million bushels.

(C) Subject to subparagraph (F), each unit, as established under subparagraph (A) or (B)—

(i) if its average annual soybean production is less than 15 million bushels, shall be entitled to one seat on the Board;

(ii) if its average annual soybean production is 15 million bushels or more but less than 70 million bushels, shall be entitled to 2 seats on the Board;

(iii) if its average annual soybean production is 70 million bushels or more but less than 200 million bushels, shall be entitled to 3 seats on the Board; and

(iv) if its average annual soybean production is 200 million bushels or more, shall be entitled to 4 seats on the Board.

(D) At the end of each 3 year period beginning with the 3 year period starting on the effective date of the order, the Secretary, if necessary, shall adjust any unit to conform with subparagraphs (A) and (B) and any modifications pursuant to paragraph (F). If the Secretary makes such an adjustment, the Secretary shall re-establish the seats on the board to conform with subparagraph (C) and any modifications pursuant to paragraph (F).

(E) For purposes of subparagraphs (A), (B), (C), and (D), the Secretary shall determine average annual soybean production applicable to a crop year by using the average of the 5 previous crops of soybeans, excluding the crop in which production was the highest and the crop in which production was the lowest.

(F) At the end of each 3 year period beginning with the 3 year period starting on the effective date of the order, the Board may recommend to the Secretary, to the extent it determines appropriate, changes in the levels of production used in subparagraphs (A), (B), and (C) to determine per-unit representation on the Board. The Secretary may amend the order to make such changes in levels of production used to determine per-unit representation. Any such amendment to the order shall not be subject to a referendum of producers. A unit may not, as a result of any modification under this subparagraph, lose Board seats to which it is entitled at the time the order is initially issued unless its average annual production, as determined under subparagraph (E), declines below the levels required for representation, as specified in subparagraphs (A), (B), and (C).

(3)(A) The Secretary shall appoint soybean producers to seats established under paragraph (2) from nominations submitted by each unit. Each unit shall submit to the Secretary at least 2 nominations for each appointment to the Board to which such unit is entitled.

(B)(i) The Secretary shall solicit nominations for each seat on the initially-established Board to which a State unit is entitled from the State soybean board in the State that submits satisfactory evidence to

the Secretary that such board meets the criteria of section 1903(13), other than section 1903(13)(C), of this title. If no such organization exists in the unit, the Secretary shall solicit nominations for appointments in such manner as the Secretary determines appropriate.

(ii) The Secretary shall solicit nominations for each seat on the initially-established Board to which a combined unit is entitled in such manner as the Secretary determines appropriate, taking into consideration the recommendations of any State soybean board operating in the unit that submits satisfactory evidence to the Secretary that such board meets the criteria of section 1903(13), other than section 1903(13)(C), of this title.

(C)(i) The Secretary shall solicit nominations for each subsequent appointment to a seat on the Board to which a State unit is entitled from the qualified State soybean board in the unit. If no such organization exists in the unit, the Secretary shall solicit nominations for such appointment in such manner as the Secretary determines appropriate.

(ii) The Secretary shall solicit nominations for each subsequent appointment to a seat on the Board to which a combined unit is entitled in such manner as the Secretary determines appropriate, taking into consideration the recommendations of any qualified State soybean board operating in the unit.

(4) The Secretary may reject any nomination submitted by a unit. If there are insufficient nominations from which to appoint members to the Board as a result of the Secretary rejecting the nominations submitted by a unit, the unit shall submit additional nominations, as provided in paragraph (3).

(5) The Secretary shall ensure, to the extent practicable, that at leasts 5 of the members appointed to the Board are members in good standing, and were members for a least 3 years prior to appointment to the Board, of a national general farm organization. Each of the 5 members shall be a member of a different national general farm organization.

(6) Each appointment to the Board shall be for a term of 3 years, except that appointments to the initially-established Board shall be proportionately for 1 year, 2 years, and 3 year terms. No person may serve more than 3 three-year-terms. Board members shall serve without compensation, but shall be reimbursed by the Board for their reasonable expenses incurred in performing their duties as members of the Board.

(7)(A) Notwithstanding the foregoing provisions of this subsection, the Secretary, under procedures established by the Secretary, may appoint to the initially-established Board up to 3 temporary members to serve in addition to the members appointed as otherwise provided in this subsection, as the Secretary determines appropriate for transition purposes under the criteria set out in subparagraph (B). Each such temporary member shall be appointed for a single term not to exceed 3 years.

(B) The Secretary, in making any temporary appointments to the initially-established Board, shall ensure, to the extent practicable, that each State with a State soybean board that, prior to the enactment of this title, was contributing State soybean promotion and research assessment funds to national soybean promotion and research efforts has representation on the intially-established Board that reflects the relative contributions of such State to the national soybean promotion and research effort.

(8) The order shall provide for at least one meeting of the Board annually and specify the circumstances in which additional special meetings of the Board may be held.

(c) POWERS AND DUTIES OF THE BOARD.—The order shall define the powers and duties of the Board and shall include the following powers or duties:

(1) to administer the order in accordance with its terms and provisions;

(2) to make regulations to effectuate the terms and provisions of the order;

(3) to elect members of the Board to serve on committees;

(4) to submit budgets to the Secretary for the Secretary's approval or disapproval;

(5) to contract with appropriate persons to implement plans or projects;

(6) to contract with qualified State soybean boards to implement programs in their States;

(7) to receive, investigate, and report to the Secretary complaints of violations of the order;

(8) to provide the Secretary with prior notice of meetings of the Board to allow the Secretary, or a designated representative, to attend such meetings;

(9) to recommend to the Secretary amendments to the order;

(10) to provide at least annually a report to producers accounting for funds and describing programs implemented and make such report available to the public upon request; and

(11) to ensure, in carrying out the order, that the development of the budget and activities conducted under the order do not cause a duplication of efforts of, or ineffective use of resources under, any other soybean promotion, research, consumer information, or industry information program on the State or national level.

(d) BOARD VOTING PROCEDURES.—(1) The order shall establish procedures for the conduct of voting by the Board, as specified in this subsection. At the end of the 3 year period beginning on the effective date of the order, the Board may recommend to the Secretary changes in such procedures for the conduct of voting by the Board, and the Secretary may amend the order to make such recommended changes in voting procedures. Such amendment to the order shall not be subject to a referendum of producers.

(2) Each member of the Board shall be entitled, in any vote conducted by the Board, to cast the number of votes determined under the following rules;

(A) Each member shall be entitled to cast one vote unless a roll call vote is conducted. On a roll call vote, each member shall be entitled to cast such additional votes as are assigned to the member under subparagraph (B).

(B) The additional votes that each member is assigned for roll call votes shall be computed as follows:

(i) Except as provided in clause (ii), each unit shall be allotted one vote for each percent, or portion of a percent, of the total amount of assessments remitted to the Board that was remitted from the unit, net of any refunds made under subsection (j)(2), on the average, during each of the 3 previous fiscal years of the Board.

(ii)(I) During the first fiscal year of the Board, each unit shall be allotted one vote for each percent, or portion of a percent, of the total production of soybeans in the United States that was produced in the unit, on the average, during each of the 3 immediately preceding crop years.

(II) The order shall provide appropriate adjustments of the procedures for the allotment of votes under clause (i) to apply to allotments of votes during the second and third fiscal years of the Board.

(iii) A unit's total votes under clause (i) or (ii) shall be divided equally among all the members representing that unit. The procedures established by the order shall provide for the equitable disposition of fractional votes assigned to a member under such division of a unit's votes.

(3)(A) Except as provided in subparagraph (B), a motion shall carry if approved by a simple majority of members of the Board casting votes.

(B) Any member of the Board may call for a roll call vote on any motion. Except as otherwise provided in the bylaws adopted by the Board, whenever a roll call vote is conducted, the motion shall carry only if approved by a simple majority of all votes cast and a simple majority of all units voting, with the vote of each unit determined by a simple majority of all votes cast by members in that unit.

(4) In any vote conducted by a committee of the Board, each member of the committee shall have one vote.

(5) A member may not cast votes by proxy.

(e) BUDGETS.—The order shall provide that the Board shall develop budgets on a fiscal year basis of anticipated expenses and disbursements under the order, including probable costs of administration and promotion, research, consumer information, and industry information projects. The Board shall submit such budgets or any substantial modification thereof to the Secretary for the Secretary's approval. In approving or disapproving such budget or modification, the Secretary shall, among other considerations, ensure that the activities conducted under the order do not cause a duplication of efforts of, or ineffective use of resources under, any other soybean promotion, research, consumer information, or industry information program on the State or national level. Each such budget or modification shall be approved or disapproved by the Secretary within 45 days after the Secretary receives the budget or modification. No expenditures of funds may be made by the Board unless such expenditure is authorized under a budget or modification approved by the Secretary.

(f) PLANS AND PROJECTS.—The order shall provide that the Board shall review or, on its own initiative, develop plans or projects of promotion, research, consumer information, and industry information, to be paid for with funds received by the Board.

(g) ADMINISTRATION.—(1) The order shall provide that the Board shall be responsible for all expenses of the Board.

(2)(A) The order shall provide that the Board may establish an administrative staff or facilities of its own or contract for the use of the staff and facilities of national, nonprofit, producer-governed organizations that represent producers of soybeans.

(B) If the Board establishes an administrative staff of its own, the Board is authorized to expend for administrative staff salaries and benefits an amount not to exceed one percent of the projected level of assessments to be collected by the Board, net of any refunds to be made under subsection (j)(2), for that fiscal year.

(C) If the staff of national, nonprofit, producer-governed organizations that represent producers of soybeans are used by the Board, the staff of such organizations shall

not receive compensation directly from the Board, but such organizations shall be reimbursed for the reasonable expenses of their staffs, including salaries, incurred in performing staff duties on behalf of, and authorized by, the Board.

(3) The order shall provide that costs incurred by the Board in administering the order (including the cost of staff but not including administrative costs incurred by the Secretary) during any fiscal year shall not exceed 5 percent of the projected level of assessments to be collected by the Board, net of any refunds to be made under subsection (j)(2), for that fiscal year.

(h) CONTRACTS AND AGREEMENTS.—To ensure coordination and efficient use of funds, the order shall provide that the Board may enter into contracts or agreements for the implementation and carrying out of the activities authorized by this title with national, nonprofit, producer-governed organizations that represent producers of soybeans, and for the payment thereof with funds received by the Board under the order.

(2) To enhance coordination, the Board, when entering into contracts or agreements for the implementation and carrying out of activities authorized by this title, shall ensure that all plans or projects implemented for consumer information, industry information, promotion, or research are implemented by a single entity. There shall not be in force, at any one time, more than one contract or agreement for implementation or plans or projects for consumer information for industry information, for promotion, or for research, except that, upon approval of the Secretary, the Board may contract with qualified State soybean boards to implement plans or projects within their respective States.

(3) Any such contract or agreement shall provide that—

(A) the contracting party shall develop and submit to the Board a plan or project together with a budget or budgets that shall show estimated costs to be incurred for such plan or project;

(B) the plan or project shall not become effective unless it has been approved by the Secretary, and

(C) the contracting party shall keep accurate records of all of its transactions, account for funds received and expended, including staff time, salaries, and expenses expended on behalf of Board activities, make periodic reports to the Board of activities conducted, and make such other reports as the Board or the Secretary may require.

(i) BOOKS AND RECORDS OF THE BOARD.—The order shall require the Board to—

(1) maintain such books and records, which shall be available to the Secretary for inspection and audit, as the Secretary may prescribe,

(2) prepare and submit to the Secretary, from time to time, such reports as the Secretary may prescribe, and

(3) account for the receipt and disbursement of all funds entrusted to the Board.

The Board shall cause its books and records to be audited by an independent auditor at the end of each fiscal year and a report of such audit to be submitted to the Secretary. The Secretary shall make such report available to the public upon request.

(j) ASSESSMENTS.—(1)(A)(i) The order shall provide that each first purchaser of soybeans from a producer shall collect, in the manner prescribed by the order, an assessment from the producer and remit the assessment to the Board. If a qualified State soybean board is operating in the State, the Board shall permit such State board to collect such assessments on behalf of the Board from first purchasers in the State in which such board is operating.

(ii) The rate of assessment prescribed by the order shall be one-half of 1 percent of the net market price of soybeans bought or otherwise acquired by the first purchaser from the producer.

(iii) No more than one assessment shall be made with respect to any particular soybeans.

(iv) The order shall provide that no person may engage in any scheme or device regarding the net market price of soybeans for purposes of affecting the assessment under the order.

(B) The order shall provide that any person processing soybeans of that person's own production and marketing such soybeans or soybean products made from such soybeans shall remit to the Board or the qualified State soybean board, in the manner prescribed by the order, an assessment established at a rate equivalent to the rate provided for in subparagraph (A)(ii).

(2)(A) The order shall provide that, during the period prior to the approval of the continuation of the order in the referendum provided for in section 1906(a), as determined by the Secretary, each producer shall have the right to demand and receive from the Board a refund of any assessment collected from such producer if—

(i) such producer is responsible for paying the assessment; and

(ii) such producer does not support the programs, projects, or activities implemented under the order.

(B) Subject to the provisions of subparagraph (C)(i), any demand by a producer for a refund of an assessment under this paragraph shall be made in accordance with regulations, on a form, and within the time period, not to exceed 90 days from the date of collection, prescribed by the Board.

(C)(i) In each State in which a qualified State soybean board collects assessments, as provided in paragraph (1)(A)(i), producers shall submit demands for refunds of assessments to the qualified State soybean board. Such board shall process such submissions under procedures established under State statute applicable to refunds of assessments on soybeans, except that if no refunds are allowed under State statute, such submissions shall be processed under procedures established under this paragraph.

(ii) In each State not specified in clause (i), producers shall submit demands for refunds of assessments directly to the Board.

(D) Subject to the provisions of subparagraph (C)(i), each refund to a producer of an assessment under this paragraph shall be made as soon as practicable, but in no case more than 60 days, after submission of proof satisfactory to the qualified State soybean board or the Board that the producer paid the assessment for which refund is demanded.

(3) The assessments shall be used for payment of the expenses incurred in implementation and administration of the order, the establishment of a reasonable reserve, and reimbursement to the Secretary of administrative costs incurred by the Secretary after the order has been proposed.

(4) A producer who can establish that such producer is contributing to a qualified State soybean board shall receive credit, in determining the assessment due to the Board from such producer, for contributions to the qualified State soybean board of up to one-quarter of 1 percent of the net market price of soybeans or the equivalent thereof. A producer may receive a credit under this paragraph only if the contribution is to the qualified State soybean board in the State in which the soybeans are produced, except that the Board, with the approval of the Secretary, may authorize exceptions to such State-of-origin rule as appropriate to ensure effective coordination of collection procedures among States.

(5) The procedures in the order for the collection of assessments shall ensure, to the extent practicable, that such soybeans are subject to a single process of assessment under the order.

(k) CREDIT FOR CERTAIN COSTS TO STATES.—The order shall provide that the Board may provide a credit against the amount of collected assessments due from each qualified State soybean board of an amount not to exceed one-half of any fees paid to State governmental agencies or first purchasers for collection of the assessments if the payment of such fees by the qualified State soybean board is required by State statute enacted prior to the date of enactment of this title. Any credit provided to any qualified State soybean board under this subsection may not exceed 2.5 percent of the amount of assessments collected and remitted to the Board under subsection (j).

(l) MINIMUM LEVEL OF ASSESSMENTS TO STATES.—(1) The order shall contain provisions to ensure that, during the period prior to conduct of the referendum provided for in section 1906(a), each qualified State soybean board retains annually an amount of money equal to the average amount that the State board collected from assessments during each of the State board's fiscal years 1984 through 1988, excluding the year in which such collections were the highest and the year in which such collections were the lowest, as determined by the Secretary and subject to paragraph (3).

(2) The order shall provide, effective after the conduct of the referendum provided for in section 1906(a), subject to paragraph (3), that the Board annually shall provide a credit to each qualified State soybean board of an amount by which—

(A) the amount equal to one cent times the average number of bushels of soybeans produced in the State during each of the preceding 5 years, excluding the year in which the production is the highest and the year in which the production is the lowest, exceeds

(B) the total amount collected by the qualified State soybean board from assessments on producers under this title and State law minus the amount of assessments remitted to the Board during such year under subsection (j).

(3) The total amount of assessment funds retained by a qualified State soybean board under paragraph (1) or (2) and subsection (j)(4) for a year may not exceed the total amount of assessments collected in the State under subsection (j), net of any refunds made under subsection (j)(2), for that year.

(m) INVESTMENT OF FUNDS.—The order shall provide that the Board, with the approval of the Secretary, may invest funds received by the Board under the order, pending their disbursement, only in obligations of the United States or any agency thereof, in general obligations of any State or any political subdivision thereof, in any interest bearing account or certificate of deposit of a bank that is a member of the Federal Reserve System, or in obligations fully

guaranteed as to principal and interest by the United States. Income from any such investment may be used only for such purposes as the invested funds may be used.

(n) PROHIBITION.—(1) Except as otherwise provided in paragraph (2), the order shall prohibit any funds collected by the Board under the order from being used in any manner for the purpose of influencing any action or policy of the United States Government, any foreign, State, or United States territory or possession government, or any political subdivision thereof.

(2) The prohibition in paragraph (1) shall not apply to—

(A) the development and recommendation of amendments to the order;

(B) the communication to appropriate government officials of information relating to the conduct, implementation, or results of promotion, research, consumer information, and industry information under the order; or

(C) any action designed to market soybeans or soybean products directly to a foreign government or political subdivision thereof.

(o) BOOKS AND RECORDS OF FIRST PURCHASERS AND CERTAIN PRODUCERS.—(1) The order shall require that each first purchaser of soybeans and any person processing soybeans of that person's own production maintain and make available for inspection by the Board or the Secretary such books and records as may be required by the order and file reports at the time, in the manner, and having the content prescribed by the order. The order shall exempt small producers processing soybeans of their own production from such recordkeeping and reporting requirements if they are not required to pay assessments under the order.

(2)(A) Information maintained under paragraph (1) shall be made available to the Secretary as is appropriate for the administration or enforcement of this title, or any order or regulation issued under this title.

(B) The Secretary shall authorize the use under this title of information regarding first purchasers that is accumulated under a law or regulation other than this title or regulations under this title.

(3)(A) Commercial or financial information obtained under paragraphs (1) and (2) and that is privileged or confidential shall be kept confidential by all officers and employees of the Department, the Board, and agents of the Board, subject to the provisions of subparagraph (B).

(B) Information obtained under the authority of this title shall be made available to any agency or officer of the Federal Government for—

(i) the implementation of this title;

(ii) any investigatory or enforcement action necessary for the implementation of this title; or

(iii) any civil or criminal law enforcement activity if the activity is authorized by law.

(4) Any person who intentionally or knowingly violates the provisions of this subsection, upon conviction, shall be subject to a fine of not more than $1,000, or to imprisonment for not more than one year, or both, and if an agent of the Board or an officer or employee of the Department, shall be removed from office.

(p) INCIDENTAL TERMS AND CONDITIONS.—The order shall provide terms and conditions, not inconsistent with the provisions of this title, as necessary to effectuate the provisions of the order, including provisions for the assessment of a penalty for each late payment of assessments under subsection (j).

SEC. 1906. REFERENDA.

(a) INITIAL REFERENDUM.—Not earlier than 18 months nor later than 36 months following the issuance of an order under section 1904 of this title, the Secretary shall conduct a referendum for the purpose of ascertaining whether the order then in effect shall be continued. Such referendum shall be conducted among producers who, during a representative period as determined by the Secretary, have been engaged in the production of soybeans. Such order shall be continued only if the Secretary determines that the order has been approved by not less than a majority of the producers voting in the referendum. If continuation of the order is not approved by a majority of those voting in the referendum, the Secretary shall terminate the collection of assessments under the order within 6 months after the referendum and shall terminate the order in an orderly manner as soon as practicable.

(b) ADDITIONAL REFERENDA.—(1)(A) After the initial referendum on an order, the Secretary shall conduct additional referenda, as described in subparagraph (C), if requested by a representative group of producers, as described in subparagraph (B).

(B) An additional referendum on an order shall be conducted if requested by 10 percent or more of the producers who during a representative period have been engaged in the production of soybeans, of which group of requesting producers not in excess of one-fifth are producers in any one State, as determined by the Secretary.

(C) Each additional referendum shall be conducted among all producers who, during a representative period, as determined by the Secretary, have been engaged in the production of soybeans to determine whether such producers favor the termination of the order.

(2) If the Secretary determines, in any referendum conducted under paragraph (1), that termination of the order is favored by a majority of the producers voting in the referendum, the Secretary shall terminate, as appropriate, collection of assessments under the order within 6 months after such determination and shall terminate the order, as appropriate, in an orderly manner as soon as practicable after such determination.

(3)(A) To facilitate the periodic determination as to whether producers favor the conduct of an additional referendum under this subsection, the Secretary, 5 years after the conduct of a referendum under this section and every 5 years thereafter for as long as an order is in effect, shall provide soybean producers an opportunity to request an additional referendum, as provided in this paragraph.

(B)(i) To implement the requirements of subparagraph (A), the Secretary shall establish a procedure under which producers may request a reconfirmation referendum in person at county extension offices during a period established by the Secretary, or as provided in clause (ii).

(ii) In lieu of making such requests in person, producers may make requests by mail. Mail-in requests must be postmarked no later than the end of the period established under clause (i) for in-person requests. To facilitate such submission of requests by mail, the Secretary may make mail-in request forms available to producers.

(C) The Secretary shall publish a notice in the Federal Register, and the Board shall provide written notification to producers, not later than 60 days prior to the end of the period established under subparagraph (B)(i) for in-person requests, of the producers' opportunity to request the additional referendum. Such notification shall explain the producers' rights to, and the procedures specified in this subsection for, the conduct of an additional referendum, the purpose of the referendum, and the date and method by which producers can act to request the additional referendum under this paragraph. The Secretary shall take such other actions as the Secretary determines necessary to ensure that producers are made aware of the opportunity to request an additional referendum on the order.

(D) As soon as practicable following the submission of requests for a reconsideration referendum, the Secretary shall determine whether a sufficient number of producers have requested an additional referendum, and take other steps to conduct an additional referendum, as required under paragraph (1).

(E) Any additional referendum requested under the procedures provided in this paragraph shall be conducted not later than one year after the Secretary determines that a representative group of producers, as described in paragraph (1)(B), have requested the conduct of such referendum.

(c) PROCEDURES.—(1) The Secretary shall be reimbursed from assessments collected by the Board for any expenses incurred by the Secretary in connection with the conduct of any activity required under this section, except for the salaries of Government employees.

(2) Each referendum shall be conducted for a reasonable period (not to exceed 3 days) established by the Secretary, under a procedure whereby producers intending to vote in the referendum shall certify that they were engaged in the production of soybeans during the representative period and, at the same time, shall be provided an opportunity to vote in the referendum.

(3) Referenda shall be conducted at county extension offices and provision shall be made for absentee mail ballots to be provided upon request.

SEC. 1907. PETITION AND REVIEW.

(a) PETITION.—Any person subject to an order issued under this title may file with the Secretary a petition stating that such order, any provision of such order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or an exemption from the order. The petitioner shall be given an opportunity for a hearing on the petition, in accordance with regulations issued by the Secretary. After such hearing, the Secretary shall make a ruling on the petition.

(b) REVIEW.—The district courts of the United States in any district in which a person who is a petitioner under subsection (a) resides or carries on business are hereby vested with jurisdiction to review the ruling on such person's petition, if a complaint for that purpose is filed within twenty days after the date of the entry of a ruling by the Secretary under subsection (a). Service of process in such proceedings shall be conducted in accordance with the Federal Rules of Civil Procedure. If the court determines that such ruling is not in accordance with law, the court shall remand the matter to the Secretary with directions either (1) to make such ruling as the court shall determine to be in accordance with law, or (2) to take such further action as, in the opinion of the court, the law requires.

SEC. 1908. ENFORCEMENT.

(a) IN GENERAL.—(1) Each district court of the United States shall have jurisdiction specifically to enforce, and to prevent and restrain a person from violating, an order or regulation issued by the Secretary under this title.

(2) A civil action authorized to be brought under this subsection shall be referred to the Attorney General for appropriate action, except that the Secretary is not required to refer to the Attorney General a violation if the Secretary believes that the administration and enforcement of this title would be adequately served by providing a suitable written notice or warning to the person who committed such violation or by administrative action under subsection (b).

(b) ADMINISTRATIVE REMEDIES.—(1)(A) A person who willfully violates an order or regulation issued by the Secretary under this title may be assessed by the Secretary—

(i) a civil penalty of not more than $1,000 for each such violation; and

(ii) in the case of a willful failure to pay, collect, or remit an assessment as required by the order, an additional penalty equal to the amount of such assessment.

(B) Each such violation shall be a separate offense.

(C) In addition to or in lieu of such civil penalty, the Secretary may issue an order requiring such person to cease and desist from violating such order or regulation.

(D) No order assessing a penalty or cease and desist order may be issued by the Secretary under this paragraph unless the Secretary gives the person against whom the order is issued notice and opportunity for a hearing on the record with respect to such violation.

(E) An order assessing a penalty or cease and desist order issued under this paragraph by the Secretary shall be final and conclusive unless the person against whom the order is issued files an appeal from such order with the appropriate district court of the United States, as provided in paragraph (2), not later than 30 days after the date of such order.

(2)(A) A person against whom an order is issued under paragraph (1) may obtain review of such order in the district court of the United States for the district in which such person resides or does business, or in the United States district court for the District of Columbia, by—

(i) filing a note of appeal in such court not later than 30 days after the date of such order; and

(ii) simultaneously sending a copy of such notice by certified mail to the Secretary.

(B) The Secretary shall file promptly in such court a certified copy of the record on which the Secretary found that the person had committed a violation.

(C) A finding of the Secretary shall be set aside only if the finding is found to be unsupported by substantial evidence.

(3)(A) A person who fails to obey a valid cease and desist order issued under paragraph (1) by the Secretary, after an opportunity for a hearing, shall be subject to a civil penalty assessed by the Secretary of not more than $500 for each offense.

(B) Each day during which such failure continues shall be considered a separate violation of such order.

(4)(A) If a person fails to pay a valid civil penalty imposed under this subsection by the Secretary, the Secretary shall refer the matter to the Attorney General for recovery of the amount assessed in the district court of the United States in any district in which the person resides or conducts business.

(B) In such action, the validity and appropriateness of the order imposing such civil penalty shall not be subject to review.

(c) OTHER REMEDIES UNAFFECTED.—The remedies provided in subsections (a) and (b) shall be in addition to, and not exclusive of, other remedies that may be available.

SEC. 1909. INVESTIGATIONS; POWER TO SUBPOENA; AID OF COURTS.

(a) INVESTIGATIONS.—The Secretary may make such investigations as the Secretary deems necessary—

(1) for the effective administration of this title, or

(2) to determine whether any person subject to the provisions of this title has engaged or is about to engage in any act that constitutes or will constitute a violation of any provision of this title, or of any order or regulation issued under this title.

(b) POWER TO SUBPOENA.—For the purpose of any such investigation, the Secretary may require the production of any records that are relevant to the inquiry. The production of any such records may be required from any place in the United States.

(c) AID OF COURTS.—In case of contumacy by, or refusal to obey a subpoena to, any person, the Secretary may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, in requiring the production of records. The court may issue an order requiring such person to appear before the Secretary to produce records. Any failure to obey such order of the court may be punished by such court as a contempt thereof. Process in any such case may be served in the judicial district in which such person resides or conducts business or wherever such person may be found.

SEC. 1910. ADMINISTRATIVE PROVISIONS.

(a) CONSTRUCTION.—Except as provided in subsection (b), nothing in this title may be construed to—

(1) preempt or supersede any other program relating to soybean promotion, research, consumer information, or industry information organized and operated under the laws of the United States or any State; or

(2) authorize the withholding of any information from Congress.

(b) STATE LAWS.—(1) In order to ensure the proper administration of this title, any provision of State law automatically requiring a State referendum relating to the continuation or termination of a qualified State soybean board shall, to the extent it automatically requires such a referendum, be suspended for the period beginning on the date an order is issued under section 1904 and ending 18 months after the referendum on such order is conducted under section 1906(a). Such suspension shall not be construed to apply to any State referendum regarding a State soybean promotion program that is originated by soybean producers.

(2) In order to ensure adequate funding of the operations of qualified State soybean boards under this title, whenever an order is in effect under this title, no State law or regulation that limits the rate of assessment that the qualified State soybean board in the State may collect from producers on soybeans produced in such State, or that has the effect of limiting such rate, may be applied to prohibit such State board from collecting, and expending for authorized purposes, assessments from producers of up to the full amount of the credit authorized for producer contributions to qualified State soybean boards under section 1905(j)(4).

SEC. 1911. REGULATIONS.

The Secretary may make such regulations as may be necessary to carry out the provisions of the title.

SEC. 1912. AUTHORIZATION.

There are hereby authorized to be appropriated annually such funds as are necessary to carry out the provisions of this title. The funds so appropriated shall not be available for payment of the expenses or expenditures of the Board in administering any provision of any order issued under this title.

By Mr. GUNDERSON:

—Strike section 402 and insert in lieu thereof the following:

"Section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended by amending subsection (e) to read as follows:

"(e) Notwithstanding any other provision of law—

"(1) During the period beginning on January 1, 1991 and ending on December 31, 1991, the price of milk shall be supported as provided in this subsection.

"(2)(A) During the period beginning on January 1, 1991 and ending on December 31, 1991, the price of milk shall be supported at a rate not less than $10.10 per hundredweight for milk containing 3.67 percent milkfat.

"(B)(i) The price of milk shall be supported through the purchase of the products of milk.

"(ii) The Commodity Credit Corporation price support for each of the products butter, cheese and nonfat dry milk, respectively, shall be the same for all of that product sold by persons offering to sell such product to the Corporation. Such purchase prices shall be sufficient to enable plants of average efficiency receiving such price for dairy products to pay producers, on average, a price not less than the rate of the price support for milk in effect during calendar year 1991.

—Strike section 403 and insert in lieu thereof the following:

SEC. 403. MILK MANUFACTURING MARGIN ADJUSTMENT.

The Secretary of Agriculture shall prohibit any State from using an allowance to establish a Grade A price for milk for manufacturing butter, nonfat dry milk and cheese greater than the allowance established by the Department.

—Strike section 403 and insert in lieu thereof the following:

SEC. 403. MILK MANUFACTURING MARGIN STUDY.

(a) STUDY.—The Secretary of Agriculture shall conduct a study of state milk pricing programs for submission to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, not later that one year after enactment of this act.

(b) EVALUATION.—The study submitted under subsection (a) shall evaluate—

(1) whether the current federal manufacturing allowance is at a level that enables plants of average efficiency in manufacturing butter and nonfat dry milk or cheese to pay the support price when they market these products to the CCC;

(2) whether the provisions under Section 401(e) (7 USC 1446(d)) are adequate to ensure that producers are receiving the maximum benefits from the price support program;

(3) the impacts on the federal government dairy price support program, the dairy in-

dustry, and consumers, of state manufacturing allowances in states currently operating under state milk pricing programs, including a comparative analysis under the alternative allowance levels on farm and retail prices, production levels, and the supply-demand balance;

(4) the extent to which over-order premiums under federal milk marketing orders compensate for the low federal manufacturing allowance;

(5) comparative weighted average plant operating cost data, including labor, utilities, product yields, by-product revenues, and other specialized factors in any state that produces manufactured dairy products for purchase by CCC.

(c) PROHIBITION OR ADJUSTMENT.—If the Secretary finds, as a result of the study conducted pursuant to subsection (a), and after considering all the factors enumerated in subsection (b), that a state's use of a manufacturing allowance that is different from the federal manufacturing allowance used for purposes of price support purchases under section 201 of the Agricultural Act of 1949 (7 USC 1446) has an adverse effect on the efficient and effective operation of the federal dairy program from a national perspective, then the Secretary may, after conducting public hearings nd providing for a public comment period not less than 90 days from the conclusion of such hearings, prohibit that state from using an allowance which is different from the federal manufacturing allowance to establish a price for Grade A milk used for manufacturing cheese, butter and nonfat dry milk, or establish an alternative allowance for that state. The Secretary may authorize a state to use an allowance which is different from the federal manufacturing allowance if the weighted averages of the manufacturing cost, by-product revenue, and yield data from that same state justifies an alternative manufacturing allowances in that state and will not adversely affect the efficient and effective operation of the federal price support program from a national perspective. The adjusted manufacturing allowance shall be no greater than the weighted average cost of producing cheese, butter and nonfat dry milk during 1990 by all plants in the state. Returns received by manufacturers from by-products sold should be included in the calculation of costs.

(d) APPEAL.—Any state that is prohibited from establishing a manufacturing allowance different from the federal manufacturing, or if a state's allowance is adjusted, may file an appeal with the Secretary under procedures provided for under title 5 of the USC 556 et seq.

By Mr. HEFNER:

—On page 614, insert after line 10 the following:

SEC. 1396. STUDY OF THE COST OF PRODUCTION OF HIGH FRUCTOSE CORN SYRUP.

(a) STUDY.—The Secretary of Agriculture shall conduct a study of the cost of production of high fructose corn syrup. The Secretary shall compare such cost to the price support level for sugar under title II and shall analyze whether the differential between the two amounts will impair the operation of the sugar program.

(b) REPORT.—Not later than 6 months after the date of the enactment of this Act, the Secretary shall publish a report of such study and submit the report to Congress.

(c) AUTHORIZATION OF APPROPRIATIONS.—For the purpose of fulfilling the study under this section, there is hereby authorized to be appropriated such as may be necessary.

—1. On page 328, line 5, strike "INGREDIENTS OF TITLE II COMMODITIES.—" and insert "TITLE II COMMODITIES.—(1) INGREDIENTS".

—2. On page 328, after line 8, add the following:

(2) Section 402 is further amended in the second sentence by striking the word "not".

By Mr. HENRY:

—On page 582, line 23, after the word "as", insert "the Occupational Safety and Health Administration,".

—On page 584, line 7, after "Agriculture" insert "and the Committee on Education and Labor".

—On page 584, line 8, after "Forestry", insert "and the Committee on Labor and Human Resources".

By Mr. HUCKABY:

—In section 1101—

(1) strike paragraphs (1) through (6) of subsection (a) and insert the following:

"(1) in paragraph (1)—

"(A) by inserting '(A)' after '(1)';

"(B) by striking '1987 through 1990' and inserting '1991 through 1995';

"(C) by adding at the end the following new subparagraphs:

'(B) Subject to sections 1001A through 1001C, for each of the 1991 through 1995 crops, the total amount of payments set forth in clauses (i) through (iv) that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 for wheat, feed grains, oilseeds, upland cotton, extra long staple cotton, and rice shall not exceed $100,000. For purposes of this subparagraph, the term 'payments' includes—

'(i)(I) any gain realized by a producer from repaying a loan for a crop of wheat, feed grains, oilseeds, upland cotton, or rice at the rate permitted under section 107A(a)(4), 105A(a)(4), 201(g)(4), 103B(a)(5), or 101B(a)(5) respectively, of the Agricultural Act of 1949, or (II), except as provided in subparagraphs (C) and (D), any gain realized by producer from repaying a loan for a crop of any other commodity at a lower level than the original loan level established under the Agricultural Act of 1949;

'(ii) any loan deficiency payment received for a crop of wheat, feed grains, oilseeds, upland cotton, or rice under section 107A(b) or 105A(b), 201(g)(5), 103B(b), or 101B(b) respectively, of the Agricultural Act of 1949;

'(iii) any inventory reduction payment received for a crop of wheat, feed grains, upland cotton, or rice under section 107A(g)(1), 105A(g)(1), 103B(f), or 101B(f), respectively, of the Agricultural Act of 1949; and

'(iv) any deficiency payment received for a crop of wheat or feed grains under section 107A(c)(1) or 105A(c)(1), respectively, of the Agricultural Act of 1949 as the result of a reduction of the loan level for such crop under section 107A(a)(3) or 105A(a)(3) of such Act.

'(C) Subject to sections 1001A through 1001C, for each of the 1991 through 1995 crops, the total amount of payments that a person shall be entitled to receive under the annual program for honey established under section 201(b) of the Agricultural Act of 1949 shall not exceed $200,000. For purposes of this subparagraph, the term 'payments' includes—

'(i) any gain realized by a producer from repaying a loan for a crop of honey at a lower level than the original loan level established under section 201(b)(2) of the Agricultural Act of 1949; and

'(ii) any loan deficiency payment received for a crop of honey under the Agricultural Act of 1949.

'(D) Subject to sections 1001A through 1001C, for each of the 1991 through 1995 marketing years, the total amount of payments that a person shall be entitled to receive under the annual program established under the National Wool Act of 1954 for wool and mohair shall not exceed $200,000.';

"(2) in paragraph (2) (A)—

"(A) by striking '1987 through 1990' and inserting '1991 through 1995'; and

"(B) by inserting 'oilseeds,' after 'feed grains,';

"(C) by inserting 'wool and mohair,' after 'honey';

"(D) by striking '(with respect to clause (iii) (II) of subparagraph (B))'; and

"(E) by striking '$250,000' and inserting '$200,000';

"(3) in paragraph (2)(B) by striking clauses (iii) through (vi);

"(4) by amending paragraph (5)(B)(i)(I) to read as follows:

'(I) an individual, including any individual participating in a farming operation as a partner in a general partnership, a participant in a joint venture, a grantor of a revocable trust, a beneficiary of an irrevocable trust, or a participant in a similar entity (as determined by the Secertary), and, except for purposes of deficiency payments and land diversion payments (as described in paragaaph (1)(A)), the term person shall also include any individual holding a substantial beneficial interest in any entity described in subclause (II);';

"(5) in paragraph (5)(B)(i)(II) by inserting 'only for purposes of deficiency payments and land diversion payments described in paragraph (1)(A),' beeore 'a corporation';

"(6) in paragraph (5)(B)(ii)(I) by inserting 'irrevocable trust or any' before 'cooperative'.

"(7) in paragraph (5)(B)(ii)(II) by—

"(A) striking 'irrevocable trusts and; and

"(B) striking 'trusts and'.";

—(2) insert the following new subsection after subsection (b):

"(c) AMENDMENT OF SECTION 1001A OF THE FOOD SECURITY ACT OF 1985.—Section 1001A(a) of the Food Security Act of 1985 (7 U.S.C. 1308-1(a)) is amended—

"(1) by striking 'farm program payments (as described in paragraphs (1) and (2) of this section' and inserting 'deficiency payments and land diversion payments (as described in section 1001(1)(A)';

"(2) by striking paragraph (2);

"(3) by redesignating paragraph (3) as paragraph (2); and

"(4) by redesignating paragraph (4) as paragraph (3).";

—(3) redesignate subsection (c) as subsection (d); and

—(4) redesignate subsection (d) as subsection (e).

—1. Strike section 207(b)(4)(A) and (B) and insert the following:

"(A) The acreage base for any crop shall be the number of acres that is equal to the average of the acereage planted and considered planted for harvest for sugar or seed on the farm in each of the 5 crop years preceeding such crop year.".

—2. Redesignate section 207(b)(4)(C) as section 207(b) (4) (B).

—Strike all of subtitle C of title II.

—Strike all of subtitle C of title II and insert the following:

Subtitle C—Sugar for Re-Export

SEC. 221. DEFINITIONS.

For purposes of this subtitle, the term—

(1) "Corporation" shall mean the Commodity Credit Corporation.

(2) "eligible country" shall mean—

(A) any country whose per capita gross national product was less than $1500 in 1987 if such country received an allocation under additional U.S. note 3.(c)(i) of chapter 17 of the Harmonized Tariff Schedule of the United States as of April 1, 1990; and

(B) any beneficiary country, as defined in section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2702).

(3) "market" means to sell or otherwise dispose of in commerce.

(4) "processor" shall mean any person engaged in the processing of—

(A) sugarcane to produce raw cane sugar;

(B) sugar beets; or

(C) corn to produce a corn sweetener.

(5) "program" shall mean the special sugar re-export program required to be established and implemented pursuant to section 222.

(6) "Secretary" shall mean the Secretary of Agriculture.

(7) "United States" shall consist of each of the States, the District of Columbia, and Puerto Rico.

SEC. 222. ESTABLISHMENT OF PROGRAM.

(a) IN GENERAL.—(1) The Secretary, in accordance with the provisions of this subtitle, shall establish and implement a special sugar re-export program for sugar imported from eligible countries. Such program shall be operated—

(A) during each of the fiscal years 1992 through 1996, as required under paragraph (2); and

(B) using the funds and facilities of the Corporation.

(2)(A) Subject to the limitation under subsection (b), the program shall be implemented for a fiscal year whenever the Secretary determines that imports of sugar into the United States for domestic human consumption during such fiscal year will be less than 1,700,000 short tons, raw value. The Secretary shall make such determination for a fiscal year, and publish such determination in the Federal Register, not later than 30 days prior to the beginning of such fiscal year.

(B) In implementing the program for a fiscal year, the Secretary shall ensure, to the extent practicable, if funds are available for such purpose under section 225 and there are acceptable bids, that there is imported and re-exported during such fiscal year under the program a quantity of sugar that, when combined with the quantity of sugar otherwise imported into the United States for domestic human consumption during such fiscal year, will cause the total quantity of sugar imported into the United States during such fiscal year to be 1,750,000 short tons. In no event may the quantity imported and re-exported under the program for the fiscal year be less than 100,000 short tons, raw value, or more than 500,000 short tons, raw value, subject to such availability of funds and acceptable bids.

(b) LIMITATION.—The program implemented for a fiscal year shall be suspended whenever the Secretary determines that the 10-day moving average future price for raw cane sugar under the Number 11 contract, New York basis (or successor contract), of the closest trading month equals or exceeds the current national average loan rate for raw cane sugar, as established under section 201(h) of the Agricultural Act of 1949. The program shall remain in suspension until such time as the 10-day moving average Number 11 or successor contract price, as determined under the preceding sentence, falls below such national average loan rate. Any such suspension shall not affect any bid already accepted by the Secretary under the program. If the Number 11 or successor contract price is not available, the Secretary may use an equivalent price, as determined by the Secretary.

SEC. 223. IMPORTS OF SUGAR.

(a) PAYMENTS.—(1) The Corporation shall make payments available under the program each fiscal year, as provided in section 222, in connection with the importation of sugar from eligible countries. Such payments for a fiscal year shall be—

(A) made out of the fund established under section 225(d); and

(B) in a total amount not to exceed the amount of funds available in such fund at the beginning of the fiscal year, less administrative expenses.

(2) The payment to any sugar processor, operator, or refiner for an importation under the program shall be—

(A) in an amount determined on a competitive bid basis; and

(B) in an amount determined by the Secretary to be sufficient to permit the payment of the premium specified in subsection (b) and the re-exportation of an equivalent quantity of sugar under this subtitle.

(3) For purposes of ranking bids received from sugar processors, operators, and refiners, the Secretary shall make appropriate adjustments in such bids to reflect differing transportation costs based on refinery and factory location.

(b) PREMIUM.—The Secretarty shall ensure that the price paid for the sugar imported into the United States to the person exporting the sugar to the United States under the program reflects a premium above the world market price, as determined by the Secretary, equal to the lesser of—

(1) 7 cents per pound, or

(2) the current national average loan rate for raw cane sugar, as established under section 201(h) of the Agricultural Act of 1949, less the world market price (but in no event less than zero), where such difference is computed as of the time of the bid.

(c) EXEMPTION—Imports of sugar from an eligible country under the program shall be exempt from any provisions of law restsricting the importation of sugar and shall not be included in determining the amount of any sugar imported for purposes of any such law.

(d) PRORATION.—The Secretary shall prorate imports under the program among eligible countries based on those countries; share of total imports of sugar to the United States during a previous representative period, taking into consideration any special factors that may have afected or be affecting such trade.

SEC. 224. EXPORTS OF SUGAR.

The Secretry shall ensure that, no later than 60 days after a quantity of sugar is imported under the program, as equivalent quantity has been exported under the program.

SEC. 225. MARKETING CERTIFICATES.

(a) IN GENERAL.—Effective for each of the fiscal years 1991 through 1995, no processor may market in the United States any sugar or fructose sweetener processed by such processor unless such processor has a marketing certificate for such sugar or fructose sweetener under this section.

(b) PURCHASE OF CERTIFICATES.—A processor shall require each marketing certificate by purchase from the Corporation. The price of each such certificate shall be an amount computed by multiplying the pounds of sugar or equivalent amount of fructose sweetener covered by the certificate by a uniform per pound rate that the Secretary determines will ensure that the total amount collected from certificates purchases during the fiscal year will equal—

(1) one-third cent times the number of pounds of sugar or equivalent amount of fructose sweetener the Secretary estimates will be marketed from domestic sources during such fiscal year, minus

(2) any amount in the fund established under subsection

(d) as of the beginning of the fiscal year. In no event may the price of any certificate exceed one-third cent per pound for each pound of sugar or equivalent amount of fructose sweetener covered by the certificate.

(c) NON-TRANSFERABILITY OF CERTIFICATES.—Marketing certificates under this section may not be transferred.

(d) PROCEEDS FROM SALE—The Corporation shall establish a separate interest-bearing fund into which it shall deposit the proceeds from all sales of marketing certificates under this section. Such fund may be used only to make payments under section 223 or to pay the administrative costs of operating the program.

(e) REMAINING FUNDS.—Any money remaining in the fund establsihed udner subsection (d) after all re-export agreements under the program have been honored shall be available for use in any successor program or, if no successor program is in effect when such agreements have been honored, shall be covered into the general account of the Corporation.

SEC. 226. REGULATIONS.

(a) REQUIREMENT.—The Secretary shall promulgate, after notice and an opportunity for public comment, regulations to implement this subtitle. Such regulations shall require, among other things, that—

(1) a certification be provided from an appropriate agency of the government of the eligible country exporting sugar to the United States that the exporter of the sugar was paid the premium under section 223 for the sugar; and

(2) a performance bond be provided to the Corporation with respect to the importation of sugar under this subtitle, in an amount equal to the value of a quantity of refined sugar equivalent to the corresponding quantity of sugar imported under this subtitle, conditioned on the export of sugar from the United States in accordance with the provisions of this subtitle.

(b) DEADLINE FOR ISSUANCE.—The Secretary shall issue proposed regulations to implement this subtitle no later than 180 days after the date of enactment of this Act.

SEC. 227. RECORD AND REPORTS.

This section shall apply to all persons required to obtain marketing certificates pursuant to section 225 and to all persons importing sugar or exporting sugar under the program. Any such person shall keep such records and, from time to time on request of the Secretary, report to the Secretary such informaton, as the Secretary finds to be necessary to enable the Secretary to carry out the provisions of this subtitle. Such information shall be reported and such recordss shall be kept in such manner as the Secretary shall prescribe. The Secretary is

authorized to examine such books, records, accounts, or any other documents as the Secretary has reason to believe are relevant and are within the control of any such person for purposes of implementing this subtitle.

SEC. 228. ENFORCEMENT.

(a) CIVIL PENALTIES.—The Program Fraud Civil Remedies Act of 1986 (31 U.S.C 3801 et seq.) shall be applicable to the program carried our pursuant to subtitle B.

(b) CRIMINAL PENALTIES.—Any person who knowingly violates or attempts to violate or who knowingly participates or aids in the violation of any provision of this subtitle or of any regulation issued under the authority of this subtitle or who knowingly fails to make any report or keep any records as required by this subtitle shall be deemed guilty of a misdemeanor and upon conviction thereof shall be subject to a fine of not more than $5,000 for each violation.

By Mr. JOHNSON of South Dakota:

—At the end of the title, insert the following section:

SEC. —. TRIBALLY CONTROLLED COMMUNITY COLLEGES.

(a) The Secretary of Agriculture is authorized to make annual grants to accedited tribally controlled community colleges, as defined in section 2(4) of the Tribally Controlled Community Colleges Assistance Act of 1976 (25 U.S.C 1801(4)), in the amount of $50,000 per institution for the purposes of carrying out the agriculturally-related research and higher education programs of such institutions.

(b) There are authorized to be appropriated in each fiscal year such sums as may be necessary to carry out the activities described in this section.

—At the end of the title, insert the following section:

SEC. . RESERVATION EXTENSION AGENTS.

(a) ESTABLISHMENT.—The Secretary of Agriculture, through the Extension Service, shall establish appropriate extension education programs on Indian Reservations and tribal jurisdictions. In establishing these extension programs, the Secretary shall consult with the Bureau of Indian Affairs, the Intertribal Agriculture Council, and the Southwest Indian Agriculture Association, and shall make such interagency cooperative agreements or memoranda of understanding as may be necessary. The programs to be developed and delivered on Reservations, and within tribal juridictions, shall be determined with the advice and counsel of Reservation or tribal program advisory committees.

(b) ADMINISTRATION AND MANAGEMENT.—Extension agents shall be employees of and administratively responsible to the Cooperative Extension Service of the state within which the Reservation or tribal jurisdiction is located, and employment and personnel management responsibilities shall be vested with the State Cooperative Extension Service. In cases where a Reservation or tribal jurisdiction is located in two or more states, the Secretary shall make the determination of administrative responsibility, including possible divisions along state boundaries.

(c) ADVISORY COMMITTEES.—With the assistance of the Tribal authorities, an advisory committee shall be formed to give overall policy and program advice to the State Extension Director with regard to programs conducted on reservations or within tribal jurisdictions. Program advisory committees may be formed to assist extension staff in development and conduct of program activities.

(d) STAFFING.—Insofar as possible, agent and specialist staff shall include individuals representative of the tribal grouping being served. Programs will emphasize training and employment of local people as program aides, master gardeners, volunteers, etc. Staffing at a particular location will be dependent on the needs and priorities as identified by the advisory committees and the State Extension Director, and may make use of existing personnel and facilities as appropriate.

(e) PLACING OF AGENTS.—The number of offices and their placement shall be jointly determined by the Secretary and the State Extension Directors and tribal authorities of the respective States by taking into consideration the agricultural acreage within the boundaries of an Indian Reservation or tribal jurisdiction, the soil classifications of such acreage, and the population of such Reservation or tribal jurisdiction.

(f) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out this section.

By Mr. JONTY:

—At the end of subtitle A of title XI, insert the following:

SEC. 1121. BUDGET BASE EQUITY ADJUSTMENT.

There are authorized to be appropriated such sums as may be necessary to adjust payments to producers participating in any annual program under the Agricultural Act of 1949 for any program crop as defined in section 502 of such Act by an amount determined by the Director of the Office of Management and Budget to be equitable considering increased costs to producers and increased costs reflected in other budget baseline adjustments. The Secretary of Agriculture is authorized to make payment adjustments to producers to carry out this section, but any such adjustment shall only be to the extent as is provided in advance in appropriation Acts. The payment is to be calculated by multiplying the percentage increase in the budget baseline adjustments referred to in the first sentence of this section by $4.00 per bushel for wheat, $2.75 per bushel for corn, with appropriate adjustments for other feed grains, $10.71 per hundred weight for rice, and $0.729 per pound for cotton, multiplied by yield per acre determined by the average of the farm program payment yields for the farm for the 1981 through the 1985 crop years, excluding the year in which the yield was the highest and the years in which the yield was the lowest, multiplied by the planted acreage of each producer participating in annual programs under the Agricultural Act of 1949.

Redesignate the succeeding section accordingly.

—In the amendment made by section 1121 to title V of the Agricultural Act of 1949, at the end of section 505, insert the following new subsection:

"(e) OFFSETS.—In order to offset any cost of the use of the actual yield per harvested acre in establishing farm program payment yields for feed grains under subsection (a), the Secretary shall increase the uniform percentage reduction to the crop acreage base applied to each crop of feed grains under any acreage limitation program under this Act by an amount sufficient to result in a reduction of program costs equal to any costs associated with such use of actual yields.".

—In the amendment made by section 1121 to title V of the Agricultural Act of 1949, in section 505(a), after "1985 crop years" insert the following: "(or, at the option of the producer, the actual yields for the 1986 through 1990 crop years in the case of feed grains)".

—In the amendment made by section 1121 to title V of the Agricultural Act of 1949, in section 505(b)(1), after "1985" each place it appears insert the following: "(or 1990 in the case of feed grain producers who elect the 1986 through 1990 crop years)".

—In the amendment made by section 1121 to title V of the Agricultural Act of 1949, in section 505(b)(2), after "1981 through 1985" insert the following: "(or 1986 through 1990 as appropriate)".

—At the end of Title XIII insert the following:

PESTICIDE RECORD KEEPING

SEC. 1397. RECORD KEEPING PESTICIDE USE.

(a) REQUIREMENTS.—Any person using pesticides for agricultural production, including post-harvest treatment of agricultural products, or other commercial purposes shall maintain records of each pesticide application. Such records shall include at least the product name, amount and rate of application, method of application, target pest, crop or site treated, date and approximate time of application, and location of application of each pesticide used for a 2-year period after use.

(b) ACCESS.—Information maintained under subsections (a) and (f) shall be made available to the principal State pesticide regulatory agency. Upon the request of any Federal, State, or local agency that deals with pesticide use, or any health or environmental issues related to the use of pesticides, the principal State pesticide regulatory agency shall provide such information to such federal, state, or local agency. Information maintained under this section by any government agency shall be subject to the public disclosure under the Freedom of Information Act, 5 U.S.C. section 552 or any similar State law. The principal state pesticide regulatory agency shall compile, maintain, and make publicly available information on pesticide use by county, provided that such information protects the identity and address of individual record keepers.

(c) HEALTH CARE PERSONNEL.—When health professional (as defined in 29 C.F.R. 1910.1200) determines that perticide information maintained under this section is necessary to provide medical treatment or first aid to an individual who may have been exposed to such pesticides. Any persons covered by this section shall immediately provide record and label information to that health professional.

(d) INFORMATION.—Upon the request of an employee, such persons covered by this section shall provide label information on a pesticide to which such employee has come into contact.

(e) PENALTY.—The Secretary of Agriculture shall be responsible for the enforcement of subsections (a), (b), c), and (d). A violation of this section shall—(1) in the case of the first offense, be subject to a fine not more than $500; and (2) in the case of subsequent offenses, be subject to a fine of not less than $1,000 for each violation, except that the penalty shall be less than $1,000 if the Secretary determines that the person made a good faith effort to comply with the section.

(f) FEDERAL OR STATE PROVISIONS.—The requirements of this section shall not affect provisions of other Federal or State laws.

(g) SURVEYS AND REPORTS.—The Secretary of Agriculture and the Administrator of the Environmental Protection Agency, shall

survey the records maintained under this section to develop and maintain a database that is sufficient to enable the Secretary and the Administrator to publish annual comprehensive reports concerning agricultural and nonagricultural pesticide use. Such report shall be filed April 1 of each year.

(h) REGULATIONS.—The Secretary of Agriculture in consultation with Administrator of the Environmental Protection Agency, shall promulgate regulations implementing this section within 180 days after enactment of this provision.

By Mr. KASTENMEIER:

—Strike all of section 402 and insert the following:

SEC. 402. ALTERNATIVE MILK PRICE SUPPORT PROGRAM.

(a) MILK PRICE SUPPORT PROGRAM.—Paragraph (1) of section 201(d) of the Agricultural Act of 1949 (7 U.S.C. 1445(d)(1)) is amended to read as follows:

"(1)(A) During the period beginning January 1, 1991, and ending December 30, 1995, the price of milk shall be supported in accordance with this paragraph.

"(B)(i) During the period beginning on January 1, 1991, and ending on December 31, 1995, the price of milk shall be supported at a rate equal to $10.60 per hundredweight of milk containing 3.67 percent milkfat, as adjusted in accordance with clause (ii).

"(ii) On January 1 of each of the calendar years 1992, 1993, 1994, and 1995, the Secretary shall adjust the level of price support for milk in effect immediately before such date, to reflect the percentage change in the general level in the preceding calendar year of prices for articles and services that milk producers buy, wages paid hired farm labor, interest on farm indebtedness secured by farm real estate, and taxes on farm real estate.

"(C)(i) For each of the calendar years 1991 through 1995, the Secretary shall determine individual milk marketing bases of milk producers.

"(ii) For each calendar year and subject to subparagraph (D), each milk producer shall have a milk marketing base equal to the product of—

"(I) 99 percent of the milk marketing history of the producer; and

"(II) the milk marketing allocation factor for the calendar year;

but not to exceed 99 percent of the milk marketing history.

"(D)(i) In addition to any quantity of marketing base determined for a producer under subparagraph (C), a producer shall have any quantity of marketing base transferred to the producer under clause (iii) by the county committee.

"(ii) There shall be available for each calendar year to the county committee for transfer among producers in accordance with clauses (iii) and (iv) an aggregate quantity of milk marketing base equal to the sum of—

"(I) a pro rata share of the product of the allocation factor and 1 percent of the aggregate of the milk marketing histories determined for the calendar year for all producers in the United States;

"(II) if the production allocation factor for the calendar year exceeds 100 percent, a pro rata share of the product of the percentage of the allocation factor in excess of 100 percent and the aggregate quantity of the milk marketing histories determined for the calendar year for all producers in the United States;

"(III) the product of the allocation factor and any quantity of milk marketing history of a producer in the county who does not engage throughout the calendar year in the production of milk and who does not transfer such quantity under clause (vii) to another person; and

"(IV) during the period beginning January 1, 1991, and ending December 31, 1991, a pro rata share of the product of the allocation factor and 1 percent of the aggregate of the milk marketing histories determined for the calendar year for all producers in the United States.

"(iii) Subject to clause (v) and to the extent practicable, the county committee shall transfer any milk marketing base of a producer on a farm that is available under subclause (I), (II), or (III) of clause (ii) to persons in the following order of priority:

"(I) A family member who wishes to assume operation of the farm.

"(II) Subject to clause (vi), a new milk producer in the county.

"(III) Subject to clause (vi), a beginning milk producer in the county.

"(IV) An existing milk producer in the county who demonstrates to the committee that the producer is using sound management practices and that the additional milk marketing base is necessary to enable the producer to earn a net income that is at least as great the average net income of milk producers in the State.

"(V) An existing milk producer in the county who demonstrates to the committee that the additional milk marketing base is necessary to permit a family member to form or join a partnership for the purpose of producing milk.

"(VI) A new milk producer in the State.

"(VII) A beginning milk producer in the State.

"(VIII) An agricultural commodity producer in the county.

"(IX) An agricultural commodity producer in the State.

"(X) An agricultural commodity producer in the United States.

"(iv) Subject to clause (v) and to the extent practicable, the county committee shall transfer any milk marketing base of a producer that is available under subclause (IV) of clause (ii) to milk producers who as determined by the committee—

"(I) demonstrate a need for additional milk marketing base as a result of unusual or special circumstances; or

"(II) subject to clause (vi), are beginning milk producers.

"(v) Subject to clause (vi), not less than 25 percent of the quantity of milk marketing base available under subclauses (II) through (IV) of clause (ii) shall be available for transfer by the county committee to new milk producers or beginning milk producers.

"(vi) For purposes of carrying out clauses (iii), (iv), and (v), in any county in which at least 5 percent of the milk producers are members of a socially disadvantaged group and to the extent practicable, the county committee shall transfer to producers who are members of such group not less than the quantity of milk marketing base that bears the same ratio to the quantity of milk marketing base available under subclauses (II) through (IV) of clause (ii) for transfer by the county committee as the number of such milk producers in such county bears to the number of agricultural commodity producers in such county who are members of such group.

"(vii) Notwithstanding any other provision of this paragraph, no additional milk marketing base may be transferred under this subparagraph by a county committee to a nonfarm corporation or investor.

"(viii) A producer may transfer the milk marketing history of the producer to a new milk producer or a beginning milk producer by devise, sale, or lease of that portion of the farm on which is located the milk production facility owned by the producer. Except as provided in the preceding sentence, no producer may transfer a milk marketing history by sale, lease, exchange, or other means.

"(ix) The State director of the Agricultural Stabilization and Soil Conservation Service shall select an Appeal Committee composed of 5 milk producers who are members of county committees. The Appeal Committee shall be responsible for the prompt hearing and judgment of appeals of milk marketing base determinations and base transfers made under this paragraph.

"(E) In any calendar year for which a national milk marketing base program is in effect under this paragraph, the Secretary shall provide for a reduction to be made in the price to be received by each producer for any quantity of milk produced in the United States and marketed by such producer, for commercial use, in excess of the milk marketing base of such producer for the calendar year.

"(F) The amount of the reduction under subparagraph (E) in the price received by such producer shall be equal to the product of—

"(i) 75 percent of the level of price support per hundredweight of milk having 3.67 percent milkfat in effect for the calendar year involved; and

"(ii) the quantity of milk (measured in hundredweights) that exceeds the milk marketing base of such producer for the calendar year involved.

"(G) The funds represented by the reduction in price, required under subparagraph (F) to be applied to the marketings of milk by a producer, shall be collected and remitted to the Commodity Credit Corporation, at such time and in such manner as prescribed by the Secretary, by each person making payment to a producer for milk purchased from such producer, except that in the case of a producer who markets milk of the producer's own production directly to consumers, such funds shall be remitted directly to the Corporation by such producer.

"(H) The funds remitted to the Corporation under this paragraph shall be considered as included in the payments to a producer of milk for purposes of the minimum price provisions of the Agricultural Adjustment Act (7 U.S.C. 601 et seq.), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937.

"(I) Funds remitted to the Corporation under this paragraph shall be available to the Secretary for expenditure without fiscal year limitation to carry out title II of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1721 et seq.), to the extent provided in advance in appropriations Acts.

"(J) Each milk producer and each county committee shall provide to the Secretary such information and records as the Secretary may require to permit the Secretary to determine the milk marketing base of the producer.

"(K) For purposes of this paragraph:

"(i) The term 'beginning milk producer' means a milk producer who is in the process of establishing a milk production operation and who has not assumed the full control

and risk of such operation for longer than 5 years, except that such term excludes a new milk producer.

"(ii) The term 'county committee' means the county committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) for the county in which the farm is located.

"(iii) The term 'family member' means the spouse, parent, sibling, child, or grandchild.

"(iv) The term 'milk marketing allocation factor' means the ratio of—

"(I) the aggregate quantity of milk, as estimated by the Secretary, necessary to satisfy domestic consumption (including Government purchases for its own consumption and Government purchases to carry out domestic food assistance programs) and exports of milk and the products of milk in the calendar year during which a milk marketing base program is in effect under this paragraph; to

"(II) the aggregate quantity of milk produced in the United States in the calendar year.

"(v) The term 'milk marketing history' means—

"(I) the average annual quantity of milk marketed by a producer for commercial use in the calendar years 1985 through 1989, excluding the calendar year in which the largest quantity is marketed and the calendar year in which the smallest quantity is marketed; or

"(II) the quantity of milk marketed by a producer for commercial use in calendar year 1989;

whichever is greater.

"(vi) The term 'new milk producer' means a person who has no milk marketing history.

"(vii) The term 'nonfarm corporation' means a corporation that obtains less than 50 percent of its gross annual earnings from agricultural production.

"(viii) The term 'socially disadvantaged group' means a group of individuals that has been subjected to racial or ethnic discrimination, or adverse cultural bias, in the United States.

"(L) The price of milk shall be supported through the purchase of milk and the products of milk.".

(b) CONFORMING AMENDMENTS.—Section 201(d) of the Agricultural Act of 1949 (7 U.S.C. 1446(d)) is amended—

(1) in paragraph (5)(B)(i)—

(A) by striking "paragraph (2)" and inserting "paragraph (1) or (2)", and

(B) by striking "paragraph (2)(B)" and inserting "paragraph (1)(H) or (2)(B)", and

(2) in paragraph (6) by striking "(2) and (3)" and inserting "(1), (2), and (3)".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 1991.

Section 405 is amended by adding the following:

REPEALER.

Section 8c(5)(A) of the Agricultural Adjustment Act (7 U.S.C. 608c(5)(A)), enacted with amendments by the Agricultural Marketing Agreement Act of 1937, is amended by striking "Throughout the 2 year period" and all that follows through "handlers."

—Strike all of section 402 and insert the following:

SEC. 402. ALTERNATIVE MILK PRICE SUPPORT PROGRAM

(a) MILK PRICE SUPPORT PROGRAM.—Paragraph (1) of section 201(d) of the Agricultural Act of 1949 (7 U.S.C. 1446(d)(i)) is amended to read as follows:

"(1)(A) During the period beginning January 1, 1991, and ending December 30, 1995, the price of milk shall be supported in accordance with this paragraph.

"(B)(i) During the period beginning on January 1, 1991, and ending on December 31, 1995, the price of milk shall be supported at a rate equal to $13.10 per hundredweight of milk containing 3.67 percent milkfat, as adjusted in accordance with clause (ii).

"(ii) On January 1 of each of the calendar years 1992, 1993, 1994, and 1995, the Secretary shall adjust the level of price support for milk in effect immediately before such date, to reflect the percentage change in the general level in the preceding calendar year of prices for articles and services that milk producers buy, wages paid hired farm labor, interest on farm indebtedness secured by farm real estate, and taxes on farm real estate.

"(C)(i) For each of the calendar years 1991 through 1995, the Secretary shall determine individual milk marketing bases of milk producers.

"(ii) For each calendar year and subject to subparagraph (D), each milk producer shall have a milk marketing base equal to the product of—

"(I) 99 percent of the milk marketing history of the producer; and

"(II) the milk marketing allocation factor for the calendar year;

but not to exceed 99 percent of the milk marketing history.

"(D)(i) In addition to any quantity of marketing base determined for a producer under subparagraph (C), a producer shall have any quantity of marketing base transferred to the producer under clause (iii) by the county committee.

"(ii) There shall be available for each calendar year to the county committee for transfer among producers in accordance with clauses (iii) and (iv) an aggregate quantity of milk marketing base equal to the sum of—

"(I) a pro rata share of the product of the allocation factor and 1 percent of the aggregate of the milk marketing histories determined for the calendar year for all producers in the United States;

"(II) if the production allocation factor for the calendar year exceeds 100 percent, a pro rata share of the product of the percentage of the allocation factor in excess of 100 percent and the aggregate quantity of the milk marketing histories determined for the calendar year for all producers in the United States;

"(III) the product of the allocation factor and any quantity of milk marketing history of a producer in the country who does not engage throughout the calendar year in the production of milk and who does not transfer such quantity under clause (vii) to another person; and

"(IV) during the period beginning January 1, 1991, and ending December 31, 1991, a pro rata share of the product of the allocation factor and 1 percent of the aggregate of the milk marketing histories determined for the calendar year for all producers in the United States.

"(iii) Subject to clause (v) and to the extent practicable, the county committee shall transfer any milk marketing base of a producer on a farm that is available under subclause (I), (II), or (III) of clause (ii) to persons in the following order of priority:

"(I) A family member who wishes to assume operation of the farm.

"(II) Subject to clause (vi), a new milk producer in the county.

"(III) Subject to clause (vi), a beginning milk producer in the county.

"(IV) An existing milk producer in the county who demonstrates to the committee that the producer is using sound management practices and that the additional milk marketing base is necessary to enable the producer to earn a net income that is at least as great as the average net income of milk producers in the State.

"(V) An existing milk producer in the county who demonstrates to the committee that the additional milk marketing base is necessary to permit a family member to form or join a partnership for the purpose of producing milk.

"(VI) A new milk producer in the State.

"(VII) A beginning milk producer in the State.

"(VIII) An agricultural commodity producer in the county.

"(IX) An agricultural commodity producer in the State.

"(X) An agricultural commodity producer in the United States.

"(iv) Subject to clause (v) and to the extent practicable, the county committee shall transfer any milk marketing base of a producer that is available under subclause (IV) of clause (ii) to milk producers who as determined by the committee—

"(I) demonstrate a need for additional milk marketing base as a result of unusual or special circumstances; or

"(II) subject to clause (vi), are beginning milk producers.

"(v) Subject to clause (vi), not less than 25 percent of the quantity of milk marketing base available under subclauses (II) through (IV) of clause (ii) shall be available for transfer by the county committee to new milk producers or beginning milk producers.

"(vi) For purposes of carrying out clauses (iii), (iv), and (v), in any county in which at least 5 percent of the milk producers are members of a socially disadvantaged group and to the extent practicable, the county committee shall transfer to producers who are members of such group not less than the quantity of milk marketing base that bears the same ratio to the quantity of milk marketing base available under subclauses (II) through (IV) of clause (ii) for transfer by the county committee as the number of such milk producers in such county bears to the number of agricultural commodity producers in such county who are members of such group.

"(vii) Notwithstanding any other provision of this paragraph, no additional milk marketing base may be transferred under this subparagraph by a county committee to a nonfarm corporation or investor.

"(viii) A producer may transfer the milk marketing history of the producer to a new milk producer or a beginning milk producer by devise, sale, or lease of that portion of the farm on which is located the milk production facility owned by the producer. Except as provided in the preceding sentence, no producer may transfer a milk marketing history by sale, lease, exchange, or other means.

"(ix) The State director of the Agricultural Stabilization and Soil Conservation Service shall select an Appeal Committee composed of 5 milk producers who are members of county committees. The Appeal Committee shall be responsible for the prompt hearing and judgment of appeals of milk marketing base determinations and base transfers made under this paragraph.

"(E) In any calendar year for which a national milk marketing base program is in effect under this paragraph, the Secretary shall provide for a reduction to be made in the price to be received by each producer for any quantity of milk produced in the United States and marketed by such producer, for commercial use, in excess of the milk marketing base of such producer for the calendar year.

"(F) The amount of the reduction under subparagraph (E) in the price received by such producer shall be equal to the product of—

"(i) 75 percent of the level of price support per hundredweight of milk having 3.67 percent milkfat in effect for the calendar year involved; and

"(ii) the quantity of milk (measured in hundredweights) that exceeds the milk marketing base of such producer for the calendar year involved.

"(G) The funds represented by the reduction in price, required under subparagraph (F) to be applied to the marketings of milk by a producer, shall be collected and remitted to the Commodity Credit Corporation, at such time and in such manner as prescribed by the Secretary, by each person making payment to a producer for milk purchased from such producer, except that in the case of a producer who markets milk of the producer's own production directly to consumers, such funds shall be remitted directly to the Corporation by such producer.

"(H) The funds remitted to the Corporation under this paragraph shall be considered as included in the payments to a producer of milk for purposes of the minimum price provisions of the Agricultural Adjustment Act (7 U.S.C. 601 et seq.), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937.

"(I) Funds remitted to the Corporation under this paragraph shall be available to the Secretary for expenditure without fiscal year limitation to carry out title II of the Agricultural Trade Development and Assistant Act of 1954 (7 U.S.C. 1721 et seq.), to the extent provided in advance in appropriations Acts.

"(J) Each milk producer and each county committee shall provide to the Secretary such information and records as the Secretary may require to permit the Secretary to determine the milk marketing base of the producer.

"(K) For purposes of this paragraph:

"(i) The term 'beginning milk producer' means a milk producer who is in the process of establishing a milk production operation and who has not assumed the full control and risk of such operation for longer than 5 years, except that such term excludes a new milk producer.

"(ii) The term 'county committee' means the county committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) for the county in which the farm is located.

"(iii) The term 'family member' means the spouse, parent, sibling, child, or grandchild.

"(iv) The term 'milk marketing allocation factor' means the ratio of—

"(I) the aggregate quantity of milk, as estimated by the Secretary, necessary to satisfy domestic consumption (including Government purchases for its own consumption and Government purchases to carry out domestic food assistance programs) and exports of milk and the products of milk in the calendar year during which a milk marketing base program is in effect under this paragraph; to

"(II) the aggregate quantity of milk produced in the United States in the calendar year.

"(v) The term 'milk marketing history' means

"(I) the average annual quantity of milk marketed by a producer for commercial use in the calendar years 1985 through 1989, excluding the calendar year in which the largest quantity is marketed and the calendar year in which the smallest quantity is marketed; or

"(II) the quantity of milk marketed by a producer for commercial use in calendar year 1989;

whichever is greater.

"(vi) The term 'new milk producer' means a person who has no milk marketing history.

"(vii) The term 'nonfarm corporation' means a corporation that obtains less than 50 percent of its gross annual earnings from agricultural production.

"(viii) The term 'socially disadvantaged group' means a group of individuals that has been subjected to racial or ethnic discrimination, or adverse cultural bias, in the United States.

"(L) The price of milk shall be supported through the purchase of milk and the products of milk.".

(b) CONFORMING AMENDMENTS.—Section 201(d) of the Agricultural Act of 1949 (7 U.S.C. 1446(d)) is amended—

(1) in paragraph (5)(B)(i)—

(A) by striking "paragraph (2)" and inserting "paragraph (1) or (2)", and

(B) by striking "paragraph (2)(B)" and inserting "paragraph (1)(H) or (2)(B)", and

(2) in paragraph (6) by striking "(2) and (3)" and inserting "(1), (2), and (3)".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 1991.

Section 405 is amended by adding the following:

REPEALER.

Section 8c(5)(A) of the Agricultural Adjustment Act (7 U.S.C. 608c(5)(A)), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, is amended by striking 'Throughout the 2 year period' and all that follows through 'handlers.'."

By Mr. LANCASTER:

—On page 1006, after line 20, add the following:

SEC. 1856. PASS THROUGH OF SAVINGS FROM PRICE REDUCTIONS.

It shall be unlawful for any individual, manufacturer, processor, retailer, or wholesaler of an agricultural product to fail to pass through all savings, achieved as a result of reduction in prices paid to farmers, to the ultimate consumer of such agricultural product. Violations of this section shall be punishable by a $5,000 fine and/or 1 month in prison.

—1. On page 357, after line 2, insert the following new subparagraph:

"(C) MAXIMUM LEVEL OF ASSISTANCE.—Assistance provided under this section to any single private organization shall not exceed—

"(i) $7,000,000 in the case of an organization carrying out activities in the promotion of a program crop; and

"(i) $3,500,000 in the case of any other organization.

—2. On page 352, line 18, strike "case of an unfair trade practice." and insert "case of—

"(A) an unfair trade practice;

"(B) program crops in surplus supply; or

"(C) other program crops."

By Mr. LEACH of Iowa:

—At the end of title XIII (page 614, after line 10) insert after section 1395 the following new section:

SEC. 1396. SCRAPIE ERADICATION AND RESEARCH PROGRAM.

(a) FINDINGS.—Congress finds that—

(1) scrapie, a fatal disease of the central nervous system of sheep and goats, has no known cure and cannot be detected until the infected animal becomes symptomatic;

(2) countries other than the United States that have significant sheep industries, such as Australia, New Zealand, and the United Kingdom, have determined that the most effective approach to dealing with the problem of scrapie is through eradication of the infected populations;

(3) there is a substantial possibility that scrapie may be spread laterally among sheep and goat flocks as well as vertically through sheep and goat bloodlines;

(4) there is a possibility that scrapie can spread to other forms of livestock; and

(5) the Secretary of Agriculture (hereinafter in this section referred to as the "Secretary") should implement a national program to eradicate scrapie in the United States.

(b) ERADICATION PROGRAM.—(1) The Secretary shall establish and carry out a program—

(A) to control and eradicate the disease of scrapie in sheep and goats;

(B) to examine flocks of sheep and goats for the presence of scrapie and to certify those flocks that are free of scrapie; and

(C) to indemnify the owners of any sheep or goats destroyed under the program.

(2) The Secretary may consult, cooperate with, and involve State and local agencies, farmers' associations, and other interested organizations and individuals, in establishing and carrying out the program established under this subsection.

(3) The Secretary shall provide for the appraisal of sheep and goats destroyed under the program established under this subsection to determine their fair market value.

(4) The amount paid to an owner for each sheep or goat destroyed under the program established under this subsection shall be the lesser of—

(A) 80 percent of the amount equal to the fair market value of the sheep or goat, as determined by appraisal under paragraph (3); and

(B) $500.

(c) RESEARCH PROGRAM.—(1) The Secretary shall establish and carry out a program to conduct research regarding the disease of scrapie in sheep and goats. The program shall include research regarding the following:

(A) Methods for detecting infection of animals with scrapie before the animals become symptomatic.

(B) Methods for treatment, prevention, and cure of scrapie.

(C) Methods for controlling the spread of scrapie.

(2) In carrying out the research program established under this subsection, the Secretary of Agriculture may make grants to and contract with Federal, State, and local agencies and any other organizations that are experienced in research regarding animal diseases.

(3) The Secretary shall coordinate the research program established under this subsection with other research programs regarding encephalopathies, in particular re-

search regarding bovine spongiform encephalopathy in cattle.

(d) REGULATIONS.—The Secretary may issue such regulations as the Secretary considers necessary to carry out this section.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated for each fiscal year—

(1) $9,000,000 to carry out subsection (b); and

(2) $2,000,000 to carry out subsection (c).

By Ms. LONG:

—Subtitle A of title XI is amended by adding at the end the following new section:

SEC. 1121. FAMILY FARM PROTECTION PROVISION.

It is the sense of the Congress that to achieve necessary savings which may be required of the Committee on Agriculture as a result of budget reconciliation instructions for fiscal year 1991, the committee should, pursuant to such instructions, report legislation to establish a floor below which deficiency payments may not be reduced in order to protect family farming operations by requiring that the first $20,000 of annual deficiency payments to be paid at a rate of 100 percent and that additional payments be paid at graduated declining rates to 60 percent.

Redesignate the succeeding section accordingly.

By Mrs. LOWEY of New York:

—At the end of title XIII, add a new section as follows:

SEC. . DEER TICK ECOLOGY AND RELATED RESEARCH.

There are authorized to be appropriated $250,000 for each of the fiscal years 1991 through 1995 to be used by the Agricultural Research Service to assist research in the field of population ecology of deer ticks and other insects and pests which transmit Lyme Disease. This research is to be conducted at the New York Medical College located in Valhalla, New York.

—At the end of title XIII, add a new section as follows:

SEC. . DEER TICK ECOLOGY AND RELATED RESEARCH.

There are authorized to be appropriated $250,000 for each of the fiscal years 1991 through 1995 to be used by the Agricultural Research Service to assist research in the field of population ecology of deer ticks and other insects and pests which transmit Lyme Disease.

By Mr. McCANDLESS:

—Section 1411 is amended by inserting "(a)" before "Section 3(b)" and by inserting at the end the following new subsection:

(b) Section 2(5) of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499b(5)) is amended—

(1) by striking "or deed" and inserting "deed, or failure to mark,";

(2) in subparagraph (B), by inserting ", or failure to mark," after "label"; and

(3) by striking "$2,000" and inserting "$50,000".

By Mr. MACHTLEY:

—At the end of the bill, insert the following new title:

TITLE —TOBACCO DEREGULATION

SEC. 0001. SHORT TITLE.

This Act may be cited as the "Tobacco Deregulation Act of 1990".

SEC. 0002. REPEAL OF PROVISIONS OF LAW CONCERNING PRICE SUPPORT FOR TOBACCO.

(a) PRICE SUPPORT LEVELS.—(1) Section 101(a) of the Agricultural Act of 1949 (7 U.S.C. 1441(a)) is amended by striking "tobacco (except as otherwise provided herein), corn," and inserting "corn".

(2) Section 101(c) of such Act (7 U.S.C. 1441(c)) is repealed.

(3) Section 101(d)(3) of such Act (7 U.S.C. 1441(d)(3)) is amended—

(A) by striking ", except tobacco", and

(B) by striking "and no price support shall be made available for any crop of tobacco for which marketing quotas have been disapproved by producers;".

(b) NO NET COST PROVISIONS.—Sections 106, 106A, and 106B of the Agricultural Act of 1949 (7 U.S.C. 1445, 1445-1, 1445-2) are repealed.

(c) DEFINITIONS.—Section 408(c) of the Agricultural Act of 1949 (7 U.S.C. 1428(c)) is amended by striking "tobacco,".

SEC. 0003. REPEAL OF PROVISIONS OF LAW CONCERNING TOBACCO ACREAGE ALLOTMENTS AND MARKETING QUOTAS.

(a) DECLARATION OF POLICY.—Section 2 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1282) is amended by striking "tobacco,".

(b) DEFINITIONS.—Section 301(b) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1301(b)) is amended—

(1) in paragraph (3) by striking out subparagraph (C),

(2) in paragraph (6)(A) by striking "tobacco,",

(3) in paragraph (7) by striking

"Tobacco (flu-cured), July 1-June 30;

"Tobacco (other than flue-cured), October 1-September 30;",

(4) in paragraph (10) by striking subparagraph (B),

(5) in paragraph (11)(B) by striking "and tobacco,",

(6) in paragraph (12) by striking "tobacco,",

(7) in paragraph (14)—

(A) by striking "(A)", and

(B) by striking subparagraph (b),

(8) by striking paragraph (15), and

(9) in paragraph (16) by striking subparagraph (B).

(c) PARITY PAYMENTS.—Section 303 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1303) is amended by striking "rice, or tobacco," and inserting "or rice,".

(d) MARKETING QUOTAS.—Part I of subtitle B of title III of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1311 et seq.) is repealed.

(e) ADMINISTRATIVE PROVISIONS.—Section 361 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1361) is amended by striking "tobacco,".

(f) ADJUSTMENT OF QUOTAS.—(1) Section 371(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1371(a)) is amended by striking "peanuts, or tobacco" and inserting "or peanuts".

(2) Section 371(b) of such Act (7 U.S.C. 1371(b)) is amended by striking "peanuts, or tobacco" and inserting "or peanuts".

(g) REPORTS AND RECORDS.—(1) Section 373(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1373(a)) is amended—

(A) in the first sentence—

(i) by striking "peanuts, or tobacco, and" and inserting "or peanuts, and",

(ii) by striking "peanuts, or tobacco from" and inserting "or peanuts from", and

(iii) by striking "all persons engaged in the business of redrying, prizing, or stemming tobacco for producers,", and

(B) in the last sentence by striking "$500;" and all that follows through the end thereof and inserting "$500.".

(2) Section 373(b) of such Act (7 U.S.C. 1373(b)) is amended by striking "peanuts, or tobacco" and inserting "or peanuts".

(h) REGULATIONS.—Section 375(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1375(a)) is amended by striking out "peanuts, or tobacco" and inserting "or peanuts".

(i) SPECIAL PROVISION RELATING TO BURLEY TOBACCO.—Section 378(f) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1378(f)) is repealed.

(j) BURLEY TOBACCO ACREAGE ALLOTMENTS.—The Act entitled "An Act relating to burley tobacco farm acreage allotments under the Agricultural Adjustment Act of 1938, as amended", approved July 12, 1952 (7 U.S.C. 1315), is repealed.

(k) ACREAGE-POUNDAGE QUOTAS.—Section 4 of the Act entitled "An Act to amend the Agricultural Adjustment Act of 1938, as amended, to provide for acreage-poundage marketing quotas for tobacco, to amend the tobacco price support provisions of the Agricultural Act of 1949, as amended, and for other purposes", approved April 16, 1965 (7 U.S.C. 1314c note), is repealed.

(l) TRANSFER OF ALLOTMENTS.—Section 703 of the Food and Agriculture Act of 1965 (7 U.S.C. 1316) is repealed.

SEC. 0004. EXCLUSION OF TOBACCO FROM CONCESSIONAL EXPORT SALES PROVISIONS OF PUBLIC LAW 480.

The proviso to the first sentence of section 402 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1732) is amended by striking ", and for the purposes of title II of this Act," and inserting in lieu thereof "or".

SEC. 0005. PROHIBITION AGAINST COMMODITY CREDIT CORPORATION USING POWERS WITH RESPECT TO TOBACCO.

Section 5 of the Commodity Credit Corporation Charter Act (15 U.S.C. 714c) is amended by adding at the end the following new undesignated paragraph:

"Notwithstanding any other provision of law, the Corporation may not exercise any of the powers specified in this section or in any other provision of this Act with respect to tobacco.".

SEC. 0006. PROHIBITING AGAINST TOBACCO MARKETING ORDERS.

Section 8c(2) of the Agricultural Adjustment Act (7 U.S.C. 608c(2)), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, is amended—

(1) by striking "tobacco,",

(2) by inserting "tobacco" after "(B) any agricultural commodity (except honey,", and

(3) by adding at the end the following new sentence: "Notwithstanding any other provision of law, no order concerning tobacco may be issued or enforced under this Act.".

SEC. 0007. WITHDRAWAL OF CONSENT RELATING TO COMPACTS AMONG STATES FOR REGULATING TOBACCO PRODUCTION AND COMMERCE.

(a) REPEAL.—The Act entitled "An Act relating to compacts and agreements among States in which tobacco is produced providing for the control of production of, or commerce in, tobacco in such States, and for other purposes", approved April 25, 1936 (7 U.S.C. 515 et seq.), commonly known as the Tobacco Control Act, is repealed.

(b) WITHDRAWAL ON CONSENT.—The Congress hereby withdraws its consent to any compact or agreement entered into under the Act referred to in subsection (a).

SEC. 0008. FEDERAL FINANCIAL ASSISTANCE TO FARMERS SWITCHING FROM TOBACCO TO OTHER CROPS.

The Secretary of Agriculture shall establish and administer a program of Federal financial assistance to encourage persons who are producers of tobacco to switch to the production of other agricultural commod-

ities. The Secretary shall by rule establish the terms and conditions of such assistance, and the procedures for obtaining it.

SEC. 0009. EFFECTIVE DATES.

(a) IN GENERAL.—Except as otherwise provided by this Act, the amendments made by this Act shall apply with respect to the 1991 and subsequent crops of tobacco.

(b) SECTION 7.—Section 0007 shall take effect January 1, 1991.

By Mr. MADIGAN:

—Section 107A of the Agricultural Act of 1949, as amended by section 901 of the bill, is amended by:

In subsection (a)(3)(C) (page 193, lines 4 and 5) striking "not to exceed 5 percent" and inserting "not to exceed 10 percent"; and

In subsection (c)(1)(E)(ii) (page 200, at lines 11 and 12 and at lines 16 and 17) striking "7.5 percent (10 percent in the case of the 1994 and 1995 crops)" and inserting at those two points "22.5 percent".

—Section 105A of the Agricultural Act of 1949, as amended by section 1001 of the bill, is amended by:

In subsection (a)(3)(C) (page 226, lines 16 and 17) striking "not to exceed 5 percent" and inserting "not to exceed 10 percent"; and

In subsection (c)(1)(E)(ii) (page 233, lines 17 and 18, and line 22) striking "15 percent and inserting at those two points "17.5 percent".

By Mr. MARLENEE:

—At the end of title XVIII, add the following new section:

SEC. . (a) Not later than 240 days after the date of enactment of this Act, the Secretary of Agriculture shall prepare and submit to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate a report which contains specific proposals for reducing and simplifying the recordkeeping and other paperwork required of agricultural producers and cooperatives (hereinafter referred to in this section as "producers") who apply for participation in, or in complying with the requirements of—

(1) agricultural price and income support programs administered by the Secretary, including programs under the Agricultural Act of 1949 (7 U.S.C. 1421, et seq.);

(2) voluntary or mandatory soil or water conservation programs administered by the Secretary, including programs under the Food Security Act of 1985 (7 U.S.C. 1281, note); and

(3) any other related programs administered by the Secretary, including programs under the Consolidated Farm and Rural Development Act (7 U.S.C. 1981, et seq.) marketing order programs, and programs of crop insurance under the Federal Crop Insurance Corporation.

(b)(1) In the report required by subsection (a) of this section, the Secretary shall set forth the results of a thorough examination of the feasibility of reducing current levels of paperwork and recordkeeping required of producers by providing such producers with access to a computerized Departmental network or system (including the utilization of computer capability and equipment which has been or will be acquired by the Department of Agriculture and its various agencies) and which network or system could be used by producers: (A) to communicate voice, data, video, or a combination thereof for the purpose of submitting electronically all of (or a significant portion of) any necessary and appropriate applications, reports, or other documentation, and (B) to provide updated electronic information and data pertinent to the producer's agricultural operation and marketing activities, or information-sharing by means of video conferencing. For the purpose of preparing the report required by this section, the Secretary shall retain the consulting services of at least one private sector business firm having experience and possessing technical expertise in the fields of wide area computer network design, function, installation, and maintenance, integrated video conferencing, and data base management systems and may in his discretion award a contract for such services on a sole source basis.

(2) In determining the feasibility and costs of providing a computerized network or system as described in paragraph (1) of this subsection, the Secretary may also recommend a schedule of nominal fees which could be charged to producers and others for a pro-rata share of a portion of the costs associated with access to and use of such system, which fees would partially or entirely defray the costs (after taking into consideration any ongoing savings to the Department) associated with the operation and maintenance and future expansion of such portion of the network or system and its capabilities, but not to include any reimbursement for existing equipment and capabilities nor for the costs associated with the initial establishment of the network or system. The report should also contain initial recommendations outlining additional categories of users who might be also permitted access to the network or system for a fee, and the types of safeguards which would be reasonably necessary to limit file access as may be necessitated in accordance with provisions of the Privacy Act of 1974 (5 U.S.C. 552a) and other relevant authorities governing the disclosure of individual or proprietary information.

(c)(1) Insofar as practicable, in preparing the report required by subsection (a) of this section, the Secretary of Agriculture shall take into consideration and incorporate the recommendations of the commission created by title V, section 501 of the Farm Credit Amendments Act of 1985 as contained in the Report of the National Commission on Agricultural Finance, dated February 22, 1989, insofar as such recommendations relate to the need to develop a universal loan application form and uniform accounting standards for farm businesses. In considering such recommendations, the Secretary shall strive to design and adopt forms and standards which are as brief and succinct as possible, and shall consult with representatives of the Farm Credit System and with representatives of the commercial banking system as well as with those representing other significant providers of farm ownership and operating credit.

(2) In order to increase the efficiency of agricultural programs administered by the Department of Agriculture and to reduce the burden of paperwork on participants in such programs, the Secretary shall design and adopt, insofar as practicable, one brief application form to be used by applicants for participation in the agricultural programs of the Department of Agriculture, including, but not limited to, the programs described in subsection (a) of this section. The report required by subsection (a) shall include information with regard to the progress made by the Department toward compliance with this subsection, and shall also identify any statutory impediments to the use of such single brief form.

(d) Notwithstanding the foregoing provisions of this section, the Secretary shall take appropriate action to integrate the various data bases of the Department of Agriculture relating to agricultural program data, and shall facilitate the sharing of relevant data among the various agencies of the Department, including, but not limited to, the Agricultural Stabilization and Conservation Service and the Soil Conservation Service and the Farmers Home Administration.

—At the proper place in the bill, add the following new sections:

SEC. . Notwithstanding any other provision of law or of this Act, the amount of any reductions in farm program payment outlays (as compared to outlays which would have been made in accordance with program eligibility requirements and/or individual payment limitations levels which were in existence on the date of enactment of this Act) which reductions are attributable to any provisions of this Act which limit farm program participation based on income levels of otherwise eligible individuals or which reduce the total payments available to an eligible individual to an amount less than an eligible individual could have received prior to the date of enactment of this Act shall be utilized by the Secretary of Agriculture for the purpose of funding the following section.

SEC. . (a) SHORT TITLE.—This section may be referred to as the Farm Spouse Fairness and Equity Act of 1990.

(b) Effective beginning with the 1991 crops, section 1001(5)(B)(iii) of the Food Security Act of 1985 (7 U.S.C. 1308(5)(B)(iii)) is amended by striking out in its entirety all of clause (iii) and inserting in lieu thereof the following:

"(iii) Such regulations shall provide that, with respect to any married couple, the husband and wife shall be considered to be one person, except—

"(I) in the case of a married couple which owns or operates a farming operation otherwise eligible for farm program payments under paragraph (1) of this section, the couple may designate one spouse as the 'primary recipient' for the purpose of receiving such payments and the other spouse (secondary recipient) shall be considered to be a separate person actively engaged in farming for the purpose of receiving farm program payments not to exceed the per-person limitation amount contained in paragraph (1) of this section, provided such other spouse makes a significant contribution (based on the total value of the farming operation) of active personal management or personal labor; or

"(II) in the case of a married couple consisting of spouses who, prior to their marriage, were separately engaged in unrelated farming operations, each spouse shall be treated as a separate person actively engaged in farming with respect to the farming operation brought into the marriage by such spouse, so long as such spouse continues to provide a significant contribution of active personal management or labor in relation to the farming operation brought into the marriage; or

"(III) in the case of a married couple wherein, following their marriage, either of the spouses shall become the owner of an unrelated farming operation by way of gift (in anticipation of death or upon disability of the donor), devise, or descent, such spouse shall be treated as a separate person actively engaged in farming with respect to the acquired farming operation, so long as such spouse shall provide a significant con-

tribution of active personal management or labor in relation to the farming operation so acquired.".

By Mr. MOLLOHAN:

—At the end of subtitle J of title XVII of the bill add the following new section:

SEC. 1796. AMENDMENTS TO THE NATIONAL SCHOOL LUNCH ACT.

(a) IN GENERAL.—Subsection (a) of section 17 of the National School Lunch Act (42 U.S.C. 1766) is amended—

(1) in the second sentence—

(A) by inserting after "Social Security Act" the following: "or pursuant to a State's job opportunities and basic skills training program under section 402(a)(19) and part F of title IV of such Act"; and

(B) by inserting after "under such title" the following: "or pursuant to such program"; and

(2) in paragraph (1), by inserting after "Social Security Act" the following: "or pursuant to a State's job opportunities and basic skills training program under section 402(a)(19) and part F of title IV of such Act".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall take effect on October 1, 1990.

By Mr. NAGLE:

—In the amendment made by section 1001 to section 105A insert at the end of subsection (a)(3) the following new subparagraph:

"(E) Notwithstanding paragraph (3), the loan rate for corn shall not be less than $1.76 per bushel, unless such rate would exceed 85 percent of the five-year average market price determination, in which case loan rates shall not be less than 85 percent of such average.".

—In the amendment made by section 901 to section 107A insert at the end of subsection (a)(3) the following new subparagraph:

"(E) Notwithstanding paragraph (3) and except as provided by paragraph (2)(A), the loan rate for wheat shall not be less than $2.42 per bushel, unless such rate would exceed 85 percent of the five-year average market price determination, in which case loan rates shall not be less than 85 percent of such average.".

—Section 1382 (relating to the National Farm Safety Study), insert after subsection (d)(2) (page 503, after line 24) the following new paragraphs:

"(3) The Secretary shall use the information gathered pursuant to subsection (a) to prepare a listing of farm injuries and disease-related hazards showing the frequency of such injuries and hazards. The list shall be updated annually by the Secretary.

"(4) The Secretary shall establish prioritized objectives for reducing farm accidents, provide a method to evaluate the improvement in farm safety and health achieved, and implement education programs to meet those objectives. The objectives, methods of evaluation, and programs shall be reviewed annually by the Secretary. Any educational program conducted under this paragraph shall be prioritized consistent with the list prepared under paragraph (3).".

By Mr. NEAL of North Carolina:

—Notwithstanding any other provision of law, any authorization that may be construed to authorize the appropriation of funds for the National Soybean Research Lab or any soybean research conducted at the University of Illinois located at Champaign-Urbana is, as it relates to such research at such facility, hereby repealed.

—On page 614, insert after line 10 the following:

SEC. 1396. STUDY OF THE COST OF ETHANOL PROMOTION.

The Secretary shall conduct a study on the taxpayer costs associated with the promotion of ethanol production. Such study shall include a determination of—

(1) the amount of federal assistance ethanol producers receive from any and all sources, giving due consideration to the relationship of all federal programs;

(2) whether or not any hidden subsidies exist; and

(3) whether ethanol production incentives are necessary in light of recent revisions of the Clean Air Act.

—On page 224, line 11, insert after "producers" the phrase", other than producers of alcohol who receive an alcohol fuels credit under section 232(b)(1) of the Act of April 2, 1980.".

By Mr. OLIN:

—On page 440, line 10: strike "'six'" and insert "'five'".

—On page 440, strike lines 12-16.

—On page 442, strike lines 6-18 and insert the following:

SEC 1476. AQUACULTURE RESEARCH FACILITIES.

(a) GRANTS AUTHORIZED.—In order to gain further knowledge of intensive water recirculating aquaculture systems, the Secretary may make grants for the purpose of further developing and expanding aquaculture research facilities at Illinois State University in Normal, Illinois, and Virginia Polytechnic Institute and State University in Blacksburg, Virginia, and to conduct such programs as are necessary to do basic and applied research for intensive water recirculating aquaculture systems.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized, in the event the Secretary decides to take action under subsection (a), to be appropriated $500,000 for each of the two facilities for fiscal years 1991 through 1995 to carry out this section.

By Mr. PENNY:

—Proposed research purposes amendment:

SEC. 1403A. STATEMENT OF PURPOSES

(a) PRIMARY PURPOSE.—The primary purposes of Federal involvement in agricultural research and extension activities are to—

(1) enhance the sustainability, profitability, and competitiveness of the food production and agricultural system of the United States; and

(2) ensure that research and extension education will not only benefit farmers and the agricultural system, but will also contribute to environmental, human health, social, food security, and international interests of the United States

(b) SPECIFIC PURPOSES.—Subject to the varying conditions and needs of States, to carry out subsection (a), Federally funded agricultural research and extension programs should, among other things—

(1) provide research knowledge and education programs to users that are designed to increase income, employment and entrepreneurial opportunities in agricultural and rural communities, support the family farm system of agriculture, enhance the economic viability of U.S. farms (including emphasis as appropriate on small, moderate sized and minority operated farms), and increase the competitiveness of U.S. agriculture in global markets;

(2) provide research knowledge and educational programs on methods and systems of production and resource management that can be used by farmers and citizens to protect the environment and natural resources, including reducing soil erosion, enhancing wildlife habitat and populations and protecting ground water and surface water from pollution.

(3) provide research knowledge and educational programs that help to increase availability, quality, variety, safety, and affordability of food products and also provide consumers with authoritative information on nutritional value, selection, and preparation of foods that meet their needs, preferences, and budgets;

(4) develop, test, demonstrate, and disseminate research-based knowledge on production practices, technologies, and systems of agricultural production for U.S. and developing nation farmers that—

(A) provide alternatives to the use of nonrenewable resources, including petroleum, for which few (if any) economic alternatives exist;

(B) preserve, enhance, and sustain the productivity of natural resources, including farmland;

(C) maintain genetic and species diversity while allowing for the introduction of new discoveries, including those derived through biotechnology;

(D) have the capability for meeting future food and fiber needs of an expanding national and world population;

(E) reduce the potential for adverse impacts on the health and safety of consumers, farmers, farmworkers, and other persons involved in the food and fiber system;

(5) provide U.S. citizens, state and local government leaders, and public employees as well as leaders in developing countries with research knowledge and education programs that enable them to improve rural, social, and economic conditions and the quality of life in rural communities;

(6) provide research knowledge and education programs that can be used to enhance the efficiency, profitability, and competitiveness of United States agriculture through the development of production systems that address site specific and economic constraints and that allow producers to reduce production costs and risks through more intensive application and use of management, skilled labor, and other means;

(7) conduct research and provide for the transfer of technology relating to the commercialization of new agricultural crops, new food and industrial products using agricultural products as feedstocks, and new processes and marketing methods that increase utilization, expand markets, and increase incomes to the farming and agribusiness sectors; and

(8) provide research-based knowledge and educational programs that can be used by individuals and families both in the U.S. and the developing world to develop their personal potential, achieve economic goals, improve social and environmental conditions within their communities, and that particularly enhance human development programs for young people by emphasizing personal, social, and economic opportunities.

(c) APPLICATION.—This Section shall not apply to basic research, except for that which is integrated with or designed to contribute to, particular areas of applied research. Nor shall it be construed to prohibit individual projects in conflict with Section 1403A(a) and (b). However, the total federally funded agricultural research and extension program shall have the effect of advancing each of these purposes and projects consistent with these purposes shall be prioritized and emphasized.

SEC. 13. PROCEDURES TO ASSURE IMPLEMENTATION OF PURPOSES OF AGRICULTURAL RESEARCH AND EXTENSION PROGRAMS.

(a) IN GENERAL.—The National Agricultural Research, Extension and Teaching Policy Act of 1977 (7 U.S.C. 3101 et seq.) is amended by inserting after section 1406 the following new section:

"SEC. 1406A. PROCEDURES TO ASSURE IMPLEMENTATION OF PURPOSES OF AGRICULTURAL RESEARCH AND EXTENSION.

"(a) GUIDELINES REQUIRED.—Not later than 18 months after the date of enactment of this Section, the Secretary shall adopt guidelines that implement and make specific the purposes stated in Section 1403A to agricultural research and extension projects sponsored by the Secretary and inform persons participating in the program of the purposes. The Secretary may, but need not, promulgate guidelines in accordance with Subchapter II of Chapter 5, United States Code. If they are not so promulgated, the Secretary shall disseminate the proposed guidelines as broadly as possible to persons and organizations who might reasonably be expected to have an interest in commenting thereon. The proposed guidelines shall be accompanied by an explanatory preamble comparable to that used pursuant to Subchapter II. Sixty days shall be allowed for public comment. Final guidelines shall be accompanied by a statement of basis and purpose which shall include the Secretary's response to the major salient public comments.

"(b) The Secretary shall report annually to the Congress on action taken and progress made toward implementation and fulfillment of the purposes specified in Section 1403A.

"(c) REQUESTS FOR PROPOSALS.—(1) Requests for proposals issued by the Secretary as part of the competitive grants programs shall include a comprehensive analysis which—

"(A) identifies the purpose or purposes under Section 1403 (a) and (b) of this title which the project seeks to further and significant effects of the project on any other of those purposes.

"(B) explains to the extent reasonably possible the extent to which, and the manner by which, a successful project would further or affect the identified purpose or purposes.

"(d) DUTIES OF APPLICANTS.—(1) Before the Secretary undertakes or approves an agricultural research or extension project to be funded in whole or in part under this title, with the exception of proposals for competitive grants and that basic research exempted under Section 1403(a), the project proposal shall in a succinct but comprehensive manner—

"(A) identify the purpose or purposes under Section 1403A (a) and (b) of this title which the project seeks to further and significant effects of the project on any other of those programs.

"(B) explain to the extent reasonably possible the extent to which, and the manner by which, a successful project would further or affect the identified purpose or purposes.

"(2) Section 1406A(d) shall be implemented in a manner which does not require the involvement of professionals in technology assessment nor add excessively to the time and paperwork burdens of proposal preparation.".

—Competitive grants:

Insert in Section 1301 at the appropriate place:

(a) Title 7 U.S.C., Section 4501(b), is amended by adding the following:

"(a) To better assure attainment of the objectives of Section 1403A, the Secretary shall expand an appropriate portion of the funds appropriated for grants under this Section for grants to conduct research to assess the effects of existing and emerging farm technologies and farming systems on attainment of the purposes expressed in 1403A.".

—Section 1101(a) is amended to read as follows:

(a) LIMITATION ON PAYMENTS.—(1) Section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended by striking "provision of law" and inserting "provision of law, subject to sections 1001A and 1001C".

(2) Section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended by inserting "(a)" before "Notwithstanding", by redesignating paragraphs (3), (4), and (5) as subsections (d), (e), and (f), respectively, and by striking paragraphs (1) and (2) and inserting the following:

"(1) For each of the 1991 through 1995 crops, the total amount of deficiency payments (excluding any deficiency payments described in paragraph (2)) and land diversion payments that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 for wheat, feed grains, upland cotton, extra long staple cotton, and rice shall not exceed $50,000.

"(2) For each of the 1991 through 1995 crops, the total amount of—

"(A) any gain realized by a producer from repaying a loan for a crop of wheat, feed grains, upland cotton, rice, and honey at the rate permitted under section 107D(a)(5), 105C(a)(4), 103A(a)(5), 101A(a)(5), or 201(b)(2), respectively, of the Agricultural Act of 1949, or any gain realized by a producer from repaying a loan for a crop of any other commodity at a lower level that the original loan level established under the Agricultural Act of 1949;

"(B) any loan deficiency payment received for a crop of wheat, feed grains, upland cotton, or rice under section 107D(b), 105C(b), 103A(b), or 101A(b), respectively, of the Agricultural Act of 1949;

"(C) any deficiency payment received for a crop of wheat or feed grains under section 107D(c)(1), 105C(c)(1), respectively, of the Agricultural Act of 1949 as a result of the reduction of the price support level for such crop under section 107D(a)(4) or 105(a)(3) of such Act;

"(D) any inventory reduction payment for a crop of wheat, feed grains, uplan cotton, or rice under section 107D(g), 105C(g), 103A(g), or 101A(g), respectively, of the Agricultural Act of 1949; and

"(E) any part of any payment that is determined by the Secretary of Agriculture to represent compensation for resource adjustment (excluding land diversion payments) or public access for recreation,

shall not exceed $100,000.

"(3) For each of the 1991 through 1995 crops, the total amount of disaster payments made under one or more of the annual programs established under the Agricultural Act of 1949, or under any other act which authorizes the Secretary or the Commodity Credit Corporation to make a payment with respect to the loss of production of an agricultural commodity due to natural disaster or other condition beyond the control of a producer (excluding indemnities paid by the Federal Crop Insurance Corporation), shall not exceed $100,000.

"(4) For each of the 1991 through 1995 marketing years, the total amount of payments that a person shall be entitled to receive under the annual program established under the National Wool Act of 1954 for wool and mohair or under the program established for honey shall not exceed $100,000. For purposes of subsection (b), such payments shall be considered to be made on a crop year basis.

"(5) For each of the years 1991 through 1995, the Secretary shall provide that payments made under title VI of the Agricultural Act of 1949 shall be considered to be made on a crop year basis for purposes of subsection (b).

"(6) For each of the 1991 through 1995 crops, no certificate redeemable for stocks of commodities held by the Commodity Credit Corporation may be redeemable for honey held by the Corporation.".

(3) Section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended by adding at the end thereof the following new subsections:

"(b) For each of the 1991 through 1995 crops, the total amount of all payments specified in subsection (a) shall not exceed $250,000. For the purposes of this section and sections 1001A through 1001C, the term payment includes marketing loan gains.

"(c) For any of the 1991 through 1995 crops, the total amount of marketing gains and payments specified in subsection (a)(2)(A) and (B) when combined with the value of commodities for which a marketing gain may be realized which is forfeited to the Commodity Credit Corporation shall not exceed $100,000.".

(4)(A) Section 1001(d) of the Food Security Act of 1985 (7 U.S.C. 1308), as redesignated by subsection (a), is amended by striking "paragraph (2)" and inserting "subsection (a)(2)(A) of this section".

(B) Subsection (f) of section 1001 of the Food Security Act of 1985 (as redesignated by section 3) (7 U.S.C. 1308) is amended by striking subparagraph (A) and by inserting the following:

"(f)(1)(A) The Secretary shall issue regulations—

"(i) defining the term 'person'; and

"(ii) prescribing such rules as the Secretary determines necessary to assure a fair and reasonable application of the limitations established under this section and sections 1001A through 1001C.".

"(C)(i) Section 1001A of the Food Security Act of 1985 (7 U.S.C. 1308-1) is amended by striking "1001(5)(B)(i)" each place it appears and inserting "1001(f)(1)(B)(i)".

"(ii) Section 1001A of the Food Security Act of 1985 (7 U.S.C. 1307-1) is amended by striking "1001(5)(B)(i)(II)" each place it appears and inserting "1001(f)(1)(B)(i)(II)".

"(iii) Section 1001A(b)(1) of the Food Security Act of 1985 (7 U.S.C. 1308-1) is amended by striking "paragraphs (1) and (2)" and inserting "subsection (a)(1) through (3)".

"(iv) Section 1001B of the Food Security Act of 1985 (7 U.S.C. 1308-2) is amended by striking "paragraphs (1) and (2)" and inserting "subsection (a)(1) through (3)".

"(v) Section 1001C of the Food Security Act of 1985 (7 U.S.C. 1308-3) is amended by striking out "1989 and 1990" and inserting "1991 through 195".

—Section 1101(a) is amended by striking "and" at the end of paragraph (5), by striking the period and inserting "; and" at the end of paragraph (6), and by inserting at the end of the following new paragraphs:

(7) in paragraph (5)(A) by striking clause (i) and inserting the following:

"(i) defining the term 'person' so that no combination of farming as an individual or participation in any combined farming venture shall result in an individual qualifying as more than one person; and"; and

(8) in paragraph (5)(B) by striking clause (iii) and inserting the following:

"(iii) The regulations shall provide that, with respect to any married couple, the husband and wife shall be considered to be one person, except that, for the purpose of the application of the limitations established under this section—

"(I) in the case of any married couple consisting of spouses who, prior to their marriage, were separately engaged in unrelated farming operations, each spouse shall be treated as a separate person with respect to the farming operation brought into the marriage by the spouse so long as the operation remains as a separate farming operation; and

"(II) in the case of any married couple consisting of spouses who do not hold, directly or indirectly, a substantial beneficial interest in more than one entity (including the spouses themselves) engage in farm operations that also receives farm program payments (as described in paragraphs (1) and (2)) as separate persons, the spouses may be considered as separate persons if each spouse meets the other requirements established under this section and section 1001A to be considered to be a separate person".

—At the end of subtitle A of title XI, insert the following new section:

SEC. 1121. COMMODITY PROGRAM ELIGIBILITY.

(a) PROGRAM ELIGIBILITY.—A producer who has gross revenues in excess of $1,000,000 annually from sales of program crops, as determined by the Secretary of Agriculture, shall not be eligible to receive any loans, purchases, or payments under any commodity program for a program crop or oilseeds under the Agricultural Act of 1949.

(b) DEFINITION.—As used in this section, the term "program crop" has the same meaning as under section 502 of the Agricultural Act of 1949.

Redesignate the succeeding section accordingly.

—The amendment made by section 1108 to section 113 of the Agricultural Act of 1949 is amended by inserting after the last sentence of such section 113 the following: "Producers shall be allowed to meet acreage limitation or set-aside requirements by idling end rows, regardless of whether they meet the minimum acreage limitation or set-aside width and acreage if—

"(1) the end rows are planted to a perennial cover crop;

"(2) it would result in substantial soil loss reductions, relative to idling other land, as determined by the Soil Conservation Service; and

"(3) each area idled under this provision shall count as .9 acres toward meeting the acreage limitation or set-aside requirement.".

—In the amendment made by section 201(a) to section 210(h)(2)(A) of the Agricultural Act of 1949, strike "18 cents per pound for raw cane sugar" and insert "17.6 cents per pound for raw cane sugar for the 1991 crop. For each of the 1992, 1993, 1994, and 1995 crops, the loan level shall be the same as the level established for the preceding crop year reduced by .4 cents.".

By Mr. ROSE:

—Amend section 1001 on page 258, after line 18, by inserting the following new paragraph:

"(3) ETHANOL PRODUCERS.—The Secretary may not make available any loans, purchases, payments, or other benefits under this section to producers who sell feed grains to producers of alcohol who receive an alcohol fuels credit under section 232(b)(1) of the Act of April 2, 1980,".

—On page 1006, after line 20, add the following:

SEC. 1856. MEAT PRODUCTS CONTAINING SOYBEANS.

Notwithstanding any provision of law, it shall be unlawful for any individual to label meat or meat products containing any soybean product as a meat or meat product. Such products shall bear a label stating that such product is an imitation meat product.

—On page 1006, after line 20, add the following:

SEC. 1856. MEAT PRODUCTS CONTAINING SOYBEANS.

Notwithstanding any provision of law, it shall be unlawful for any individual to label meat or meat products containing any soybean product as a meat or meat product. Such products shall bear a label stating the percentage of soybean products contained therein.

—On page 354, strike lines 4 through 8.

—1. On page 357, line 3, insert after "LEVEL.—"the heading "(1) TOTAL ASSISTANCE.—".

—2. On page 357, after line 6, insert the following:

"(2) STATE LEVEL.—In no event may the aggregate allocation to all eligible trade organizations in any one State exceed $4 million.".

—On page 353, after line 7, insert the following:

"No organization, State agency, or private organization promoting the sale of pork, pork products or pork by-products, if ethanol by-products have been used to produce such pork or pork products, shall be eligible to receive funding under this provision.".

—On page 1006, after line 20, add the following:

SEC. 1856. MEAT PRODUCTS CONTAINING SOYBEANS.

Notwithstanding any provision of law, it shall be unlawful for any individual to label meat or meat products containing any soybean product as a meat or meat product. Such products shall bear a label stating the percentage of soybean products contained therein.

By Mr. SARPALIUS:

—Page 39, line 21, insert after the period the following: "The Secretary may not exclude irrigated or irrigatable acreage not planted in alfalfa when exercising the discretion of the Secretary under this clause.".

—Page 103, line 10, insert after the period the following: "The Secretary may not exclude irrigated or irrigatable acreage not planted in alfalfa when exercising the discretion of the Secretary under this clause.".

—Page 214, line 15, insert after the period the following: "The Secretary may not exclude irrigated or irrigatable acreage not planted in alfalfa when exercising the discretion of the Secretary under this clause.".

—Page 250, line 12, insert after the period the following: "The Secretary may not exclude irrigated or irrigatable acreage not planted in alfalfa when exercising the discretion of the Secretary under this clause.".

By Mr. SCHUETTE:

—1. Title XVIII—Improvement of the Agricultural Economy is amended by inserting after section 1847 the following new section:

SEC. 1848. COMMODITY REPORTS.

(a) CROP REPORTS.—The Secretary shall gather from producers a monthly crop report, which shall be printed and distributed on or before the twelfth day of each month, and shall contain statements of the conditions of crops by States, with such explanations, comparisons, and information as may be useful for illustrating such reports. Reports shall be submitted to and officially approved by the Secretary before being issued or published.

(b) SPECIAL REPORTS.—(1) In addition to the reports compiled pursuant to paragraph (a), the Secretary shall survey producers for information for reports regarding supply, acreage, production, disposition, and prices for the following commodities as determined by the Secretary:

(a) fresh market vegetables;

(b) processing vegetables;

(c) fruits and nuts;

(d) forage and turf seeds;

(e) vegetable seeds; and

(f) maple syrup.

(2) The Secretary shall conduct and report the results of the surveys described in paragraph (1) at least annually in such states as determined by the Secretary. Reports shall be submitted to and officially approved by the Secretary before being issued or published.

(c) TREE INVENTORIES.—The Secretary shall survey producers for information for reports regarding fruit and nut tree inventories. Such surveys and reports shall be conducted, printed, and distributed on a regular basis every three to five years as determined by the Secretary. Reports shall be submitted to and officially approved by the Secretary before being issued or published.

(d) CONFORMING AMENDMENTS.—The proviso under the heading "Bureau of Crop Estimates" in the Act of March 4, 1917 (Chapter 179; 39 Stat. 1157) and the first proviso under the heading of the "Bureau of Statistics" in the Act of March 4, 1909 (Chapter 301; 35 Stat. 1053) (7 U.S.C. 411a) are repealed.

By Mr. SCHUMER:

—In section 503—

(1) insert "(1)" after "LIMITATION.—",

(2) strike "$250,000" and insert "$50,000",

(3) strike the close quotation marks and the period at the end, and

(4) add the following at the end:

"(2) For purposes of determining who is a producer referred to in paragraph (1), sections 1001(5), 1001A, and 1001B of the Food Security Act of 1985 (7 U.S.C. 1308(5), 1308-1, 1308-2) shall apply in the same manner as such sections apply for purposes of determining who is a person under such sections.".

—In section 101(6)(B)(ii) of the Agricultural Trade Act of 1978, as contained in section 1211 of the bill, strike the period at the end of subclause (III) and insert a comma, and add the following after subclause (III): "except that the percentage of agricultural components not entirely produced in the United States that are contained in a product designated by the Secretary under this clause may not exceed such percentage as the Secretary shall establish.".

—In section 103(a) of the Agricultural Trade Act of 1978, as contained in section 1211 of the bill, redesignate paragraph (4) as paragraph (5), strike "and" at the end of para-

graph (3), and insert after paragraph (3) the following:

"(4) establish criteria to monitor the operations of financial institutions making loans eligible for guarantees by the Commodity Credit Corporation, so as to ensure that the Corporation does not assume undue risk in providing such guarantees; and".

—Add the following at the end of subtitle B of title XII:

SEC. 1214. PROHIBITION ON LOAN GUARANTEES FOR SALES TO IRAQ.

No guarantees may be made by the Commodity Credit Corporation for the repayment of loans made to finance export sales of agricultural commodities or products thereof to Iraq.

—At the end of subtitle A of title XI, insert the following new section:

SEC. 1121. ELIGIBILITY REQUIREMENT.

(a) GENERAL RULE.—(1) a person shall not be eligible to receive, directly or indirectly, any payment, purchase, or loan for wheat, feed grains, cotton, honey, rice, oilseeds, wool, and mohair under the Agricultural Act of 1949 if that person has adjusted gross income of at least $100,000 for the taxable year during which such payment, purchase, or loan is made available to that person or the preceding taxable year.

(2) Except as provided by paragraph (4), in the case of a person who is not an individual, paragraph (1) shall be applied by substituting "taxable income" for "adjusted gross income".

(3) For purposes of this section, a partnership shall be treated as a person who is not an individual.

(4) In the case of any person who is exempt from tax under chapter 1 of the Internal Revenue Code of 1986, that person shall not be eligible to receive any payment, purchase, or loan under the Agricultural Act of 1949 if that person has gross revenues of at least $1,000,000 for the calendar year during which such payment, purchase, or loan is made available to that person or the preceding calendar year.

(5) In the case of estates and trusts, the Secretary of Agriculture shall prescribe rules based on the principles of paragraph (1) to carry out this section.

(b) DEFINITIONS.—For purposes of this section:

(1) The terms "adjusted gross income" and "taxable income" shall have the meanings given such terms by the Internal Revenue Code of 1986.

(2) The term "person" shall have the same meaning it has for purposes of section 1001 of the Food Security Act of 1985.

(c) RULES.—The Secretary of Agriculture shall prescribe rules to carry out this section.

(d) EFFECTIVE DATE.—This section shall apply to the 1991 crop and all subsequent crops.

Redesignate the succeeding section accordingly.

—In section 202(e)(4) of the Agricultural Trade Act of 1978, as contained in section 1211 of the bill, strike "may provide" and insert "may not provide" and strike "under such terms and conditions as may be established by the Secretary".

—In section 202(f) of the Agricultural Trade Act of 1978, as contained in section 1211 of the bill, add the following new paragraph at the end:

"(6) PHASING OUT OF ASSISTANCE.—Assistance under this section to an eligible trade organization for export promotion activities relating to an agricultural commodity in a particular country may not be provided for a period of more than 5 years. The Secretary shall establish criteria for phasing out such assistance before such assistance is terminated under this paragraph.".

—In section 202(g) of the Agricultural Trade Act of 1978, as contained in section 1211 of the bill, strike "$200,000,000" and insert "$110,000,000".

—In section 202 of the Agricultural Trade Act of 1978, as contained in section 1211 of the bill, add the following new subsection at the end:

"(i) COMBINING OF PROGRAMS.—In order to more effectively carry out export promotion programs, in particular by avoiding duplication of effort, the Secretary shall, by the beginning of fiscal year 1995, combine the cooperator market development program of the Foreign Agricultural Service and the program established under this section.".

By Mr. SLATTERY:

—At the end of section 1601, insert the following:

(e) RESOURCE-CONSERVING CROP.—(1) Notwithstanding any other provision of law, that portion of a producer's crop base acreage that—

(A) is highly erodible cropland (as defined by section 1201(a) of the Food Security Act of 1985);

(B) is devoted to a resource-conserving crop (as defined in section 1611 of this Act) in accordance with a conservation plan (referred to in section 1212(a)(2) of the Food Security Act of 1985); and

(C) does not exceed 25 percent of the producer's total base acreage,

shall be taken into account, for the purpose of determining crop acreage base and farm program payments, as if such acreage had been planted to the program crop for which the resource-conserving crop was substituted, except as provided by paragraph (2).

(2) The Secretary shall eliminate any farm program payment a producer is otherwise eligible to receive with respect to acreage planted to resource-conserving crops under this subsection if such producer hays or grazes such acreage during the 5-month period in each State during which haying and grazing of conserving use acres is not allowed under the provisions of the Agricultural Act of 1949, or, if the crop plant is a small grain, before the producer harvests the small grain crop in kernel form, whichever is sooner.

(3) The Secretary shall not reduce a producer's farm program payment yields as a result of planting resources-conserving crops under this subsection.

By Mrs. SMITH of Nebraska:

—Section 1327(c) is amended on page 477 line 12 by inserting after the word "subtitle." the following: "Such training may occur at a college or university located within each state as designated by the coordinator designated under this section.".

—1. Section 1315(b)(2) page 450, line 22 is amended by striking the words "other research institutions and organizations,".

—2. Section 1315(b)(2) page 450, line 22 is amended by striking the words "private organizations or corporations, and individuals.".

—3. Section 1322(c) page 462, line 7 is amended by striking the words "nonprofit organizations with demonstrable expertise,".

—4. Section 1322(d)(2)(F) page 463, line 8 is amended by striking the words "nonprofit organizations with demonstrable expertise,".

By Mr. STAGGERS:

—At the end of the bill, add the following new title:

TITLE XIX—IMPROVEMENT OF WATER SYSTEMS IN AGRICULTURAL COMMUNITIES

SEC. 1901. IMPROVEMENT OF WATER SYSTEMS IN AGRICULTURAL COMMUNITIES.

The first sentence of section 306(a)(2) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(2)) is amended by inserting "and ending before October 1, 1991," after "commencing after September 30, 1981,".

—At the end of subtitle C of title XIII, insert the following new section:

SEC. 1848. IMPROVEMENT OF WATER SYSTEMS IN AGRICULTURAL COMMUNITIES.

The first sentence of section 306(a)(2) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(2)) is amended by inserting "and ending before October 1, 1991," after "commencing after September 30, 1981,".

By Mr. STANGELAND:

—1. Section 17(a)(2)(A)(i)(I) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 1360) is amended by striking the phrase "that pesticide is" and inserting in lieu thereof "the active ingredients in that pesticide are".

—On page 189 after line 22 add the following new section:

SEC. 810. AMENDMENTS TO SECTIONS 358 AND 359 OF THE AGRICULTURAL ADJUSTMENT ACT OF 1938.

(a) Section 358(v)(3) (7 U.S.C. 1358) of the Agricultural Adjustment Act of 1938 is amended by adding after "and seed" the following: ", and use for processing for distribution by private non-profit food banks for food to needy people".

(b) Section 359(m)(1)(c) of that Act is further amended by striking the "or" after subsection (iii) and the "." after the words "subsection (q)" and adding the following: "(iv) used for processing for distribution by private non-profit food banks for food to needy people."

(c) Section 359(q)(1) of that Act is further amended by striking the "." after the word "both" and adding the following: ", and use for processing for distribution by private non-profit food banks for food to needy people.

By Mr. STENHOLM:

—At the end of title XIV, add the following new subtitle:

Subtitle D—Organic Food Standards

SEC. 1494. SHORT TITLE AND FINDINGS.

(a) SHORT TITLE.—This subtitle may be cited as the "Organic Food Standards Development Act of 1990".

(b) FINDINGS.—It is the sense of Congress that—

(1) a number of consumers are seeking fresh and processed foods that have been produced using organic methods;

(2) producers and processors of food desire a single set of national standards to define the term "organic food" and to govern the production and processing of organic food;

(3) significant differences of opinion exist among consumers, producers, and processors with respect to what production and processing practices are organic practices;

(4) several States have adopted standards governing the production and processing of organic food that conflict and may hamper interstate commerce;

(5) the United States Department of Agriculture possesses the resources to create a

forum by which to achieve the resolution of the conflicts among the various opinions regarding the nature of organic food and among the various governmental approaches to certifying food as having been organically produced; and

(6) without resolution of the current conflicts regarding the labeling of organic food, consumers have inadequate assurance that such food is organically produced.

SEC. 1495. PURPOSES.

It is the purpose of this subtitle to—

(1) achieve, through public hearings and formal rulemaking conducted by the Secretary of the Department of Agriculture, adoption of standards to govern the production and processing of food that is to be labeled as organically produced;

(2) established a national definition of the term "organic" in connection with food;

(3) determine what definition should be employed for the term "organic" in connection with food;

(4) determine what consumers expect constitutes an organic food or food product and what "organic" characteristics would affect their purchasing patterns and to provide consumers with reliable information concerning organic food products;

(5) determine the cost to the Federal and State governments, to producers, processors, and consumers of an organic food labeling program;

(6) determine impact of labeling recommendations by the National Academy of Sciences in its efforts to harmonize labeling activities among agencies;

(7) evaluate the impact that a national organic food label would have on consumer purchasing decisions and organic food markets;

(8) assess whether availabiity of a national organic food label would provide a significant incentive to motivate farmers to adopt organic farming practices;

(9) determine the size and projected growth of the organic industry;

(10) determine which organic farming and processing methods are commonly used;

(11) determine criteria for a National List of acceptable farming inputs and methods to be used in the production of organically produced foods and the feasibility of applying organic standards to the meat and poultry industries;

(12) determine need for a producer—financed national program of research, promotion, and consumer education; and

(13) determine the most appropriate regulatory mechanisms.

SEC. 1496. ADMINISTRATION.

(a) The Secretary of Agriculture shall hold public hearings and conduct a study to enable the Secretary to prepare and submit recommendations, to be submitted in the form of reports, on the purposes set forth in section 3, to the Committee on Agriculture of the United States House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate. An interim report shall be submitted not later than 1 year, and a final report not later than 2 years, after the date of enactment of this subtitle.

(b) The Secretary shall establish an organic food standards program by regulation, based on the findings and purposes of this subtitle and the recommendations submitted under subsection (a), within 3 years after the date of enactment of this subtitle.

SEC. 1497. AUTHORIZATION OF APPROPRIATIONS

There are authorized to be appropriated such sums as may be necessary to carry out this subtitle.

By Mr. TALLON:

—Page 1002, after line 21, insert the following new sections:

SEC. 1848A. AMENDMENTS TO THE DISASTER ACT OF 1989.

(a) DOUBLE CROPPING OF NONPROGRAM CROPS GROWN IN A PRESIDENTIAL DISASTER AREA.—Section 104(a) of the Disaster Assistance Act of 1989 (Public Law 101-82; 103 Stat. 570) is amended by adding at the end the following new paragraph:

"(5) DOUBLE CROPPING.—

"(A) TREATED SEPARATELY.—In the case of a 1989 nonprogram crop that is historically doubled cropped by the producers on a farm, the Secretary shall treat each cropping separately for purposes of determining under paragraph (1)—

"(i) whether the crop was affected by damaging weather or related conditions in 1989; and

"(ii) the total quantity of the crop that the producers are able to harvest.

"(B) APPLICATION OF PARAGRAPH.—This paragraph shall—

"(i) apply only in the case of 1989 nonprogram crop that is grown in a county declared to be a Presidential disaster area for that crop; and

"(ii) not apply in the case of a replacement crop described in section 110.".

(b) EXCLUSIONS FROM HARVESTED QUANTITIES.—Section 104(a)(4) of that Act is amended by adding at the end the following new sentence: "For a 1989 nonprogram crop that is grown in a county declared to be a Presidential disaster area for that crop, the exclusion required by the preceding sentence shall be 100 percent.".

(c) APPLICATION OF AMENDMENTS.—Section 152(a) of that Act is amended by adding at the end the following new paragraph:

"(3) EXTENDED APPLICATION PERIOD.—In the case of producers of a nonprogram crop affected by the amendments made to section 104(a) of subtitle A by section 1105 A of the Food and Agricultural Resources Act of 1990, the Secretary shall—

"(A) allow such producers to submit applications for payments under section 104 until December 31, 1990, and

"(B) in the case of applications submitted by such producers before the date of the enactment of that Act, recompute (not later than 90 days after such date) the payment to such producers under section 104 in light of those amendments.".

SEC. 1848B. HURRICANE HUGO FORESTRY ASSISTANCE ACT.

(a) COST-SHARING ASSISTANCE.—

(1) ESTABLISHMENT.—For the purpose of encouraging tree owners to reestablish stands of trees damaged by Hurricane Hugo, the Secretary of Agriculture shall develop and implement a cost-share program to provide financial assistance to owners of private timber stands that were damaged, as determined by the Secretary, in 1989 by Hurricane Hugo. This assistance shall only be made available in those counties in South Carolina, North Carolina, Virginia, Puerto Rico, and the United States Virgin Islands declared by the President to be disaster areas as a result of Hurricane Hugo and any county contiguous to those counties.

(2) ELIGIBLE PRACTICES.—Practices eligible for cost-share assistance under this title are—

(A) reforestation;

(B) site preparation; and

(C) such other timber stand reestablishment practices as may be prescribed by the Secretary.

(3) PRIVATE TIMBER STANDS.—

(A) For the purpose of this title, the term "private timber stand" means a stand of trees damaged by Hurricane Hugo held continuously during the period described in paragraph (b) for commercial purposes by a private individual, group, association, corporation, Indian tribe or other native Indian group, or other legal entity, owning 1,000 acres or less of land planted to trees, except agencies of Federal, State, or local governments. Such term does not include a stand of trees transferred after the date on which such stand was damaged by Hurricane Hugo except for a stand of trees transferred by bequest, devise or inheritance, or acquired from a decedent by reason of death because of the form of ownership or other condition (including trees acquired through the exercise or nonexercise of a power of appointment).

(B) The period referred to in paragraph (a) is the period beginning on the date on which such trees were damaged by Hurricane Hugo and ending at the time the request is made for assistance under this title.

(4) INDIVIDUAL FOREST MANAGEMENT PLANS.—The Secretary may provide assistance under this title only after a management plan for the private timber stand has been developed by the holder of the stand in cooperation with, and approved by, the State forester or equivalent State official. Such management plan shall—

(A) include provision for the replacement of the timber stand through reforestation by tree plantings or other means; and

(B) be the basis for an agreement between the holder and the Secretary under subsection (e).

(5) COST SHARE.—The Secretary shall enter into agreements to share the cost of implementing eligible practices set forth in the agreement with holders who agree to implement those eligible practices. The amount of the Federal cost-share (including labor) for an eligible practices shall be 75 percent of the total cost of implementing eligible practices. The Secretary may consider, in determining the total cost of implementing eligible practices, any revenues from the sale of timber from private timber stands.

(6) DEADLINE.—Requests for assistance under this title must be filed with the Secretary not later than December 31, 1993.

(7) PAYMENT LIMITATION.—The total amount of payments that a person shall be entitled to receive under this title may not exceed $50,000. The Secretary shall issue regulations defining the term "person" which shall conform, to the extent practicable, to the regulations defining the term "person" issued under section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308).

(8) REGULATIONS.—The Secretary shall issue regulations to implement the provisions of this title as soon as practicable after the date of the enactment of this title, without regard to the requirement for notice and public participation in rulemaking prescribed in section 553 of title 5, United States Code.

(9) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this Act such sums as needed for fiscal years 1990, 1991, 1992, 1993, 1994 and 1995.

By Mr. THOMAS of Wyoming:

TITLE X—FEED GRAINS

Section 1001 is amended—

—(1) by inserting on page 237, line 14 after the word "producers" the following: "includ-

ing such condition resulting from the adjudication of Indian water settlement disputes,".

—(2) by inserting on page 238, line 11 after the word "producers" the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

—(3) by inserting on page 239, line 13 after the word "producers" the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

TITLE IX—WHEAT

Section 901 is amended—

—(1) by inserting on page 203, line 1 after the word "producers" the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

—(2) by inserting on page 203, line 22 after the word "producers" the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

—(3) by inserting on page 204, line 23 after the word "producers" the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

TITLE III—RICE

Section 301 is amended—

—(1) by inserting on page 96, line 21 after the word "producers" the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

—(2) by inserting on page 97, line 18 after the word "producers" the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

—(3) by inserting on page 98, line 20 after the word "producers" the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

TITLE I—COTTON

Section 101 is amended—

—(1) by inserting on page 32, line 11 after the word "producers" the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

—(2) by inserting on page 33, line 7 after the word "producers" the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

—(3) by inserting on page 34, line 9 after the word "producers" the following: "including such condition resulting from the adjudication of Indian water settlement disputes,".

By Mr. TOWNS:

—On page 389, after line 14, add the following new section:

"(4) CONTINUATION OF SMALL FARMER TRAINING AND TECHNICAL ASSISTANCE PROGRAM.—Section 1328 of that Act (7 U.S.C. 1918 note) is amended by striking "1988" and inserting "1995"."

—On page 411, after line 2, add the following new section:

"(3) The Secretary may set-aside a portion of funds appropriated for the award of grants under this section and make such amounts available only for grants to eligible colleges and universities that the Secretary determines have unique capabilities for achieving the objective of full participation of minority groups in research in the nation's schools of veterinary medicine.'

—On page 418, after line 9, add the following new section:

"(c) The Secretary may set-aside a portion of funds appropriated for the award of grants under this section and make such amounts available only for grants to eligible colleges and universities that the Secretary determines have unique capabilities for achieving the objective of full participation of minority groups in research on the production and marketing of alcohols and industrial hydrocarbons from agricultural commodities and forest products."

—On page 420, on line 20 after the word "farmers" add the following: ", including small and limited resource farmers,"

—On page 440, on line 22, add the following new section:

"(E) To the extent practicable, one of the centers established under this subsection shall be at a college eligible to received funds under the Act of August 30, 1890 (7 U.S.C. 321 et seq.), including Tuskegee University."

—On page 473, on line 3, after the word "farms" add the following: ", including small amd limited resource farms,"

By Mr. TRAFICANT:

—Add at the end of the bill the following:

TITLE XX—BUY AMERICA

SEC. 2001. SENSE OF CONGRESS.

It is the sense of the Congress that a recipient (including a nation, individual, group, or organization) of any form of farm subsidy, aid, or other Federal assistance under this Act should, in expending that assistance, purchase American-made equipment and products.

SEC. 2002. NOTICE.

The Secretary of Agriculture shall provide to each recipient of farm subsidy, aid, or other Federal assistance under this Act a notice describing the sense of the Congress stated under section 2001.

By Mr. VOLKMER:

—Strike section 1509 and insert the following in lieu thereof:

SEC. 1509. AMERICA THE BEAUTIFUL FOUNDATION.

(a) PURPOSE.—The purpose of this section is to authorize the President to designate a private non-profit Foundation as eligible to receive a grant from the Department of Agriculture to be used—

(1) to provide grants, including matching grants, to qualifying nonprofit organizations, municipalities, counties, towns and townships for the implementation of programs to promote public awareness and a spirit of volunteerism in support of tree planting, maintenance, management, protection, and cultivation projects in rural areas, communities and urban areas, communities and urban areas throughout the United States;

(2) to solicit public and private sector contributions through the mobilization of individuals, businesses, governments, and community organizations with the goal of increasing the number of trees planted, maintained, managed, and protected in rural areas, communities and urban environments;

(3) to accept and administer public and private gifts and make grants, including matching grants, to encourage local participation, for the planting, maintenance, management, protection, and cultivation of trees; and

(4) to ensure that our descendants will be able to share their ancestors' pride when referring to their land as "America the Beautiful".

(b) AUTHORITY.—The President is authorized to designate a private nonprofit organization, hereafter in this section referred to as the "Foundation", as eligible to receive funds pursuant to subsections (d) and (e), upon determining that such organization can, consistent with its charter, carry out the purposes stated in subsection (a), and that the officers of such organization have the experience and expertise necessary to direct the activities of the organization. Nothing in this section shall be construed to make officers, employees, or members of the board of directors of the Foundation officers or employees of the United States. The Foundation shall be a private and nonprofit organization and not an agency or establishment of the United States.

(c) IMPLEMENTATION.—The Foundation shall carry out this section in accordance with the purposes stated in subsection (a).

(d) FUNDING.—For fiscal year 1991, the Secretary is authorized to make a grant of not to exceed $25,000,000 to the Foundation.

(e) USE OF FUNDS.—Funds made available pursuant to subsection (d) shall be granted to the Foundation by the Secretary to enable the Foundation to carry out the purposes specified in subsection (a).

(f) INTEREST.—Notwithstanding any other provision of law, the Foundation may hold funds made available pursuant to subsection (e) in interest-bearing accounts, prior to the disbursement of the funds for purposes specified in subsection (a), and may retain to carry out such purposes any intereest earned on the deposits.

(g) LIMITATIONS ON USES OF FUNDS.—(1) IN GENERAL.—The Foundation may use funds provided by this section only for making grants to qualified organizations, municipalities, counties, towns and townships for the implementation of projects and activities that are consistent with the purposes specified in subsection (a).

(2) QUALIFIED ORGANIZATIONS.—For the purposes of this section, qualified organizations shall consist of those organizations that meet the requirements of section 501(c)(3) of the Internal Revenue Code (26 U.S.C. 501(c)(3)) and have demonstrated a capability to implement the project or activity for which the Foundation funds will be used.

(h) COMPENSATION FROM OUTSIDE SOURCES.—An officer or employee of the Foundation may not receive any salary or other compensation for services rendered to the Foundation from any source other than the Foundation.

(i) STOCK AND DIVIDENDS.—The Foundation shall not issue any shares of stock or declare or pay any dividends.

(j) LOBBYING.—The Foundation shall not engage in lobbying or propaganda for the purpose of influencing legislation and shall not participate or intervene in any political campaign on behalf of any candidate for public office.

(k) SALARY; TRAVEL AND EXPENSES; CONFLICTS OF INTEREST.—(1) PERSONAL BENEFIT FROM FUNDS.—No part of the funds of the Foundation shall inure to the benefit of any board member, officer, or employee of the Foundation, except as salary or reasonable compensation for services or expenses.

(2) TRAVEL AND EXPENSE REIMBURSEMENT.—Compensation for board members shall be limited to reimbursement for reasonable costs of travel and expenses.

(3) CONFLICTS OF INTEREST.—No director, officer, or employee of the Foundation shall participate, directly or indirectly, in the consideration or determination of any question before the Foundation affecting—

(A) the financial interests of the director, officer, or employee; or

(B) the interests of any corporation, partnership, entity, or organization in which such director, officer, or employee—

(i) is an officer, director, or trustee; or

(ii) has any direct or indirect finanical interest.

(l) RECORDS; AUDITS.—The Foundation shall ensure that—

(1) each recipient of assistance provided through the Foundation under this section maintains, for at least 5 years after the receipt of the assistance, separate accounts with respect to the assistance and such records as may be reasonably necessary to disclose fully—

(A) the amount and the disposition by the recipient of the proceeds of the assistance;

(B) the total cost of the project or undertaking in connection with which the assistance is given or used;

(C) the amount and nature of that portion of the cost of the project or undertaking supplied by other sources; and

(D) such other records as will facilitate an effective audit; and

(2) the Foundation and any duly authorized representative of the Foundation shall have access, for the purpose of audit and examination, to any books, documents, papers, and records of the recipient that are pertinent to assistance provided through the Foundation under this section.

(m) AUDITS.—(1) INDEPENDENT AUDITS.—For the fiscal year in which the Foundation receives the grant awarded under subsection (e), and for the succeeding 5 fiscal years, the accounts of the Foundation shall be audited annually in accordance with generally accepted auditing standards by an independent certified public accountant or an independent licensed public accountant certified or licensed by a regulatory authority of a State or other political subdivision of the United States. The report of each such independent audit shall be included in the annual report required by subsection (n).

(2) AGENCY AUDITS.—For the fiscal year in which the Foundation receives the grant awarded under subsection (d), and for the succeeding 5 fiscal years, the financial transactions undertaken pursuant to this section by the Foundation may be audited by any agency designated by the President.

(n) ANNUAL REPORT.—(1) IN GENERAL.—Not later than 3 months after the conclusion of each fiscal year, the Foundation shall publish an annual report that includes a comprehensive and detailed report of the operations, activities, financial condition, and accomplishments of the Foundation under this Act during the fiscal year.

(2) TERMINATION.—The obligation of the Foundation to publish annual reports pursuant to this subsection shall terminate after publication of the report incorporating the findings of the final audit required by subsection (1).

(o) PROHIBITION ON COMMERCIAL HARVEST.—Trees planted pursuant to a program receiving funds under this section may not be commercially harvested and sold for Christmas trees.

(p) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $25,000,000 to be granted by the Secretary of Agriculture to the Foundation. All funds appropriated under this section remain available until expended.

—On page 117, after line 19, insert the following:

"(4)(A)(i) Notwithstanding any other provision of this subsection, if for any of the fiscal years 1991, 1992, 1993, 1994, and 1995 the level of purchases under this subsection of milk and the products of milk, less sales under section 407 for unrestricted use, as estimated by the Secretary on August 1 of each year, will exceed 6 billion pounds, milk equivalent total solids basis, during such year, beginning October 1 of such year the Secretary shall provide for a reduction to be made in the price received by any producer for milk produced in the United States and marketed for commercial use by such producer in excess of such producer's individual base for milk marketing during such year. In estimating the level of purchases of milk and the products of milk under this subsection, the Secretary shall deduct an amount equal to the difference between the milk equivalent of total milk solids of all dairy products imported into the United States during the most recent year, and the annual average of the milk equivalent of total milk solids of all dairy products imported into the United States during the period January 1, 1986, through December 31, 1990.

"(ii) The reduction made under this paragraph shall be assessed and collected by the purchaser of milk from the producer. The purchaser shall remit within 30 days all amounts so collected from producers to the Commodity Credit Corporation.

"(B) If the Secretary provides for a reduction to be made in the price received by producers for milk under this paragraph, the price received by any producer may not be reduced under this subsection for milk marketed for commercial use in total quantity not in excess of such producer's base for milk for effect during such year.

"(C) The amount of the reduction under subparagraph (A) shall be 65 percent of the support price.

"(D)(i) Each producer's marketing history shall, at the option of the producer, consist of the marketings of milk by such producer for commercial use during the most recent year, or the average marketings of milk by the producer for commercial use during the two most recent years.

"(ii) A producer's marketing history established under this paragraph shall not be transferable to any other person, unless the producer's entire dairy herd is transferred.

"(E)(i) The Secretary shall establish a national milk marketing base for each year from October 1, 1991 through September 30, 1995. The national marketing base shall consist of the total quantity of milk producer's marketing histories of milk for commercial use, less the purchases of milk and the products of milk made by the Commodity Credit Corporation under this section, less sales under section 407 for unrestricted use, that exceed 6 billion pounds of milk, plus an additional amount determined by the Secretary each year to reflect increased milk use based on historical data. The Secretary shall announce the national milk marketing base not later than October 1 each year.

"(ii) If the Secretary is required to provide for a reduction in price under this paragraph for any year, the Secretary shall establish a national milk production factor by dividing the national milk marketing base for such year by the total milk production for the previous year.

"(iii) The Secretary shall establish each individual producer's base by multiplying the producer's marketing history by the national milk marketing base.

"(iv) In the case of individual producers that have no marketing history, the Secretary shall establish such producer's base at 75 percent of the annualized total milk marketed for commercial use by the producer in the month immediately prior to implementation of the reduction in price provided under this paragraph.

"(F) If the Secretary is required to provide for the reduction in price under this paragraph, the Secretary shall so advise the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry of the Senate by August 1 of the previous year.

"(G) Any money remitted to the Commodity Credit Corporation by purchasers of milk under this paragraph shall be utilized to purchase dairy products for use in the domestic food programs to the extent that net outlays under paragraphs (2) and (3) of this subsection do not exceed $725 million annually. Net outlays shall consist of the total amount expended by the Commodity Credit Corporation for the price support program under this section less remittances received from purchasers of milk under this paragraph."

Page 117, line 20, strike "(4)" and insert in lieu thereof "(5)".

Page 119, beginning on line 12, strike all that follows through page 120, line 24.

By Mr. WALSH:

—In section 201(e)(4)(C)(i) of the Agricultural Act of 1949, as amended by section 402 of the bill (page 119, lines 17-18), strike "7 billion" and insert "6 billion".

By Mr. WOLPE:

—Add the following subsection at the end of section 1101:

(e) IRRIGATION WATER SUBSIDY.—Effective beginning with the 1991 crops, section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308), as amended by subsection (a), is further amended by amending paragraphs (1) and (2)(A) to read as follows:

"(1) Subject to sections 1001(A) through 1001(C) for each of the 1987 through 1990 crops, the total amount of deficiency payments (excluding any deficiency payments described in paragraph (2)(B)(iv) of this section) and land diversion payments that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) for wheat, feed grains, upland cotton, extra long staple cotton, and rice, and irrigation water subsidies, may not exceed $50,000.

"(2)(A)(i) Subject to sections 1001A through 1001C for each of the 1991 through 1995 crops, the total amount of payments set forth in subparagraph (B) that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 for wheat, feed grains, upland cotton, extra long staple cotton, rice, honey, and (with respect to subparagraph (B)(iii)(II)) other commodities, when combined with payments for such crop described in paragraph (1), and irrigation water subsidies, shall not exceed $250,000.

"(ii) As used in paragraphs (1) and (2)—

"(I) the term 'irrigation water subsidy' means the amount which is the difference between the contract rate of irrigation water and full cost for such water, plus all operation, maintenance, and replacement charges required under Federal reclamation law allocated to such water; and

"(II) the terms 'contract rate', 'full cost', and 'Federal reclamation law' have the same meaning given such terms under the Reclamation Reform Act of 1982.".

—Add the following subsection at the end of section 1101:

(e) IRRIGATION WATER SUBSIDY.—Effective beginning with the 1991 crops, section 1001 of the Food Security Act of 1985 (7 U.S.C.

1308), as amended by subsection (a), is further amended by amending paragraph (1) and (2)(A) to read as follows:

"(1) Subject to sections 1001(A) through 1001(C) for each of the 1987 through 1995 crops, the total amount of deficiency payments (excluding any deficiency payments described in paragraph (2)(B)(iv) of this section) and land diversion payments that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) for wheat, feed grains, upland cotton, extra long staple cotton, and rice, and irrigation water subsides, may not exceed $50,000.

"(2)(A)(i) Subject to section 1001A through 1001C for each of the 1991 through 1995 crops, the total amount of payments set forth in subparagraph (B) that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 for wheat, feed grains, upland cotton, extra long staple cotton, rice, honey, and (with respect to subparagraph (B)(iii)(II)) other commodities, when combined with payments for such crop described in paragraph (1), and irrigation water subsidies, shall not exceed $250,000.

"(ii) As used in paragraphs (1) and (2)—

"(I) the term 'irrigation water subsidy' means the amount which is the difference between the contract rate of irrigation water and full cost for such water, plus all operation, maintenance, and replacement charges required under Federal reclamation law allocated to such water; and

"(II) the terms 'contract rate', 'full cost', and 'Federal reclamation law' have the same meaning given such terms under the Reclamation Reform Act of 1982.".

EXTENSIONS OF REMARKS

SECURITIES ENFORCEMENT AND PENNY STOCK REFORM ACT OF 1990

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. MARKEY. Mr. Speaker, today I am introducing the Securities Enforcement and Penny Stock Reform Act of 1990. This bill combines the precise texts of H.R. 4497, the Penny Stock Reform Act of 1990, and H.R. 975, the Securities Law Enforcement Remedies Act of 1990, both of which were reported from the Committee on Energy and Commerce on June 27, 1990. The purpose of this introduction is to facilitate House floor consideration of both of these original bills on Monday, July 23.

I would like to thank my good friend and colleague and ranking minority member of the Subcommittee on Telecommunications and Finance, Mr. RINALDO, for his help in bringing this merged measure to the floor, and note the extraordinary leadership of Chairman DINGELL, who introduced H.R. 975 and cosponsored H.R. 4497. This combined measure is cosponsored by Representatives WYDEN, RICHARDSON, MOORHEAD, MCMILLEN of Maryland, SLATTERY, and BATES.

Attached is a brief summary of the provisions of this legislation, which reflects the combination of H.R. 975 (in Titles I–IV) and H.R. 4497 (Title V):

BRIEF SUMMARY OF PROVISIONS OF THE SECURITIES ENFORCEMENT AND PENNY STOCK REFORM ACT OF 1990

(Combined Text of H.R. 975 and H.R. 4497)

[Titles I-IV Are the Text of H.R. 975]

TITLE I—AMENDMENTS TO THE SECURITIES ACT OF 1933

Section 101. Authority of federal court to impose money penalties and to prohibit persons from serving as officers and directors.

Fining Authority

This section amends section 20 of the Securities Act of 1933 ("Securities Act") to provide the Securities and Exchange Commission ("Commission") with the authority to ask the federal courts to impose penalties in civil proceedings. A court may impose such a penalty in any case in which it finds a violation of the federal securities laws or a violation of a Commission cease-and-desist order (see Sec. 102).

The Insider Trading Sanctions Act of 1984 gave the Commission the authority to seek civil penalties against those who have engaged in insider trading, and was amended in 1988 to provide for penalties to be imposed against "controlling persons" who fail to take reasonable measures to prevent their employees from engaging in insider trading. The Commission believes that additional authority is needed to respond to increasing violations in such areas as the fraudulent sales techniques and price manipulation of the penny stock market, violation of disclosure of ownership rules including "parking," and short-selling violations such as those committed by Salomon Brothers during the market break of 1987. Because many of the charges in the most prominent securities fraud cases of the 1980's have involved violations other than insider trading, the Commission maintains that it needs the additional authority contained in this legislation to attack the wide range of potential fraudulent activity.

The penalties would be limited to $100,000 for natural persons and $500,000 for all other persons, or the gross amount of pecuniary gain to the defendant as a result of the violation, whichever is greater. The court would be allowed to assess penalties on a discretionary basis, and may impose them in addition to other sanctions. The court may also assess a penalty even when an injunctive action is not deemed necessary.

Officer and Director Bar

This section also amends the Securities Act to affirm expressly the authority of the federal courts to enter orders barring or suspending persons found to have violated Section 17(a)(1) of the Securities Act from serving as officers or directors of reporting companies. Section 17(a)(1) makes unlawful any fraud, untruthful statements, or omission of material information, in the issuance of new securities. Although some courts have imposed this remedy in prior cases, the securities laws do not expressly grant this authority. This legislation grants express statutory authority for such action. As revised, the proposed legislation would limit the federal court's authority to impose this remedy only to cases involving violations of securities-based fraud provisions. This requirement was not included in the original version of the bill.

This additional power is intended to protect public investors from persons who have already demonstrated, by engaging in fraudulent conduct, that they should not be entrusted with the custody of investor funds. The Commission has confirmed its intention to request this relief only in cases of particularly egregious violations or of repeat offenders. This relief may be sought in addition to other forms of relief which may be deemed necessary.

As originally introduced, this bill would have granted the Commission the authority to bar violators of federal securities laws from serving as officers or directors of reporting companies in its own administrative proceedings without going through the federal courts. The revised Commission proposal removes this language from the legislation.

Section 102. Cease-and-Desist Authority.

The revised Commission proposal adds Section 8A to the Securities Act which grants the Commission authority to issue both permanent and temporary cease-and-desist orders to enforce the provisions of the that Act.

A permanent cease-and-desist order directs the respondent to refrain from future violations, and may also order the respondent to take affirmative steps to ensure compliance, and to make disgorgement. The Commission is required to provide a respondent with notice and an opportunity for a hearing before an administrative law judge prior to issuing a permanent order. A respondent has the right to appeal an adverse decision to the full Commission. An adverse decision by the full Commission may be appealed to a U.S. Court of Appeals in the same way as any other Commission order.

A temporary cease-and-desist order may require the respondent to refrain from a violation, or may require the respondent to take action to prevent a violation in order to prevent dissipation or conversion of assets, or significant harm to investors or to the public interest. The availability of this remedy will enable the Commission to take emergency action before the completion of a cease-and-desist proceeding. The proposal would give the Commission the needed authority to commence enforcement actions rapidly, which could be of great consequence, especially in those instances where ongoing conduct places investors in continuing jeopardy.

The temporary cease-and-desist provisions have been devised to ensure that a respondent's due process rights are fully protected. At any time after a respondent has been served with a temporary cease-and-desist order, he may apply to the Commission to have the order set aside. Furthermore, if the Commission enters the order without notice, the Commission must, in response to a motion by the respondent within 10 days, provide a hearing and render a decision at the earliest possible time. A respondent may obtain, also within 10 days of the issuance of a temporary order, a review in a federal district court.

TITLE II—AMENDMENTS TO THE SECURITIES EXCHANGE ACT OF 1934

Section 201. Enforcement of Title.

This section makes amendments to the Securities and Exchange Act of 1934 ("Exchange Act") paralleling those made to the Securities Act by Section 101 of this bill. It adds a new paragraph to expressly affirm the authority of the federal courts to prohibit persons found to have violated Section 10(b) of the Exchange Act from serving as an officer or a director of a reporting company. Section 10(b) broadly prohibits fraud in the purchase or sale of securities. It also contains a special provision requiring a court to impose a penalty of not less than $100 per day for noncompliance with a cease-and-desist order against violations of the reporting requirements of the 1934 Act.

Section 202. Civil Remedies in Administrative Proceedings

This section adds new Section 21B to the Exchange Act to authorize the Commission or other appropriate regulatory agency to impose civil penalties in administrative proceedings. It authorizes the Commission to assess a penalty against persons found to have violated federal securities laws or found to have willfully aided, abetted, or counseled such a violation, or failed reasonably to supervise another person who has

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

committed such a violation, if the violator was subject to his supervision. The Commission does not currently possess the authority to impose civil penalties itself. It seeks the ability to impose civil remedies for the same reasons as those outlined to justify the additional authority granted in section 101.

The penalties would be limited to $100,000 for natural persons and $500,000 for all other persons. The legislation does not require that any particular penalty be imposed for any specific violation. Therefore, the Commission will maintain the needed flexibility to deal effectively with the vast array of violations that it encounters.

Additionally, this section provides that the Commission or the appropriate regulatory agency may enter an order requiring an accounting and disgorgement, including reasonable interest, in any proceeding where a penalty may be imposed under this section.

Section 203. Cease-and-Desist Authority

This section makes amendments to the Exchange Act paralleling those made to the Securities Act in Section 102 by authorizing the provisions of the Exchange Act.

Section 204. Procedural Rules for Cease-and-Desist Proceedings

This section instructs the Commission, within one year of enactment of this legislation, to establish rules providing for expeditious conduct of hearings and rendering of decisions in cease-and-desist proceedings.

Section 205. Conforming Amendment to Exchange Act

This section requires the Commission to inform the appropriate regulatory agency for a municipal securities dealer where the Commission is seeking to impose a penalty against the dealer pursuant to those powers granted by section 202 of this legislation.

TITLE III—AMENDMENTS TO THE INVESTMENT COMPANY ACT OF 1940

Section 301. Civil Remedies in Administrative Proceedings

This section makes amendments to the Investment Company Act paralleling those made to the Exchange Act in Section 202 by granting the Commission the authority to assess monetary penalties in administrative proceedings instituted pursuant to the Investment Company Act, and by providing that the Commission may enter an order requiring accounting and a disgorgement, including reasonable interest, in any proceeding in which a penalty may be imposed under this section.

This section also makes amendments paralleling those made to the Securities Act in Section 102 by authorizing the Commission to issue both temporary and permanent cease-and-desist orders to enforce provisions of the Investment Company Act.

Section 302. Money Penalties in Civil Actions

This section makes amendments to the Investment Company Act paralleling those made to the Securities Act in Section 101 by permitting the Commission to seek and a court to impose monetary penalties in injunctive actions for violations of the Investment Company Act of the Commission cease-and-desist orders issued pursuant to that Act.

TITLE IV—AMENDMENTS TO THE INVESTMENT ADVISERS ACT OF 1940

Section 401. Civil Remedies in Administrative Proceedings

This section makes amendments to the Investment Advisers Act parelleling those made to the Exchange Act in Section 202 by granting the authority to the Commission to assess monetary penalties in administrative proceedings instituted pursuant to the Investment Advisers Act, and by providing that the Commission may enter an order requiring an accounting and disgorgement, including reasonable interest, in any proceeding in which a penalty may be imposed under this section.

Section 402. Money Penalties in Civil Actions

This section makes amendments to the Investment Advisers Act paralleling those made to the Securities Act in Section 102 by authorizing the Commission to issue both temporary and permanent cease-and-desist orders to enforce the provisions of the Investment Advisers Act.

Section 403. Conforming Amendment

This section amends Section 214 of the Investment Advisers Act to expand the jurisdiction of the federal district courts in this area to include actions at law, as well as equitable or injunctive actions under the Act.

[Title V is the text of H.R. 4497]

TITLE V—PENNY STOCK REFORM

Section 501. Short Title

This Act is formally titled the "Penny Stock Reform Act of 1990."

Section 502. Findings.

The findings lay out the rationale underlying this legislation. They include the need to establish and maintain an honest and healthy secondary market for securities offerings; to provide investors with better information concerning low-priced penny stocks; to broaden Commission authority to regulate and redress wrongdoing in the penny stock market; to enhance Commission authority to sanction "promoters" and "consultants," among others, who operate at the fringes of the penny stock market; and to prohibit the use of certain practices, such as the issuance of blank check offerings, whose inherent characteristics promote fraud.

Section 503. Definition of Penny Stock

This section adds a new paragraph 51 to Section 3(a) of the Exchange Act by defining the term "penny stock" and thus setting the scope of securities covered under this Act. The definition focuses largely upon the non-exchange-listed and non-NASDAQ-quoted market, also known as the "pink sheet" market. This is the area of the securities markets furthest outside the scope of adequate regulation and surveillance.

The definition of penny stock largely follows the Commission's definition of "designated security" contained in its penny stock rule adopted last fall (Exchange Act Rule 15c2-6). It would exempt from the definition of penny stock any security which is registered or approved for registration on a national securities exchange, such as the New York or American, among others, which met operating criteria established by the Commission. The rule would also exempt securities traded on the National Association of Securities Dealers NASDAQ/NMS and NASDAQ system; investment company securities; and other securities the Commisison may exclude based on other relevant criteria, such as high trading price, low trading volume, or net assets of the stock issuer.

Section 504. Authority of Commission to Police Disqualified "Promoters" and "Consultants"

The hearings in the Subcommittee on Telecommunications and Finance last fall indicated that there currently exists a substantial problem in the large numbers of individuals who are barred from working as brokers, dealers or exchange or NASD members, but who emerge nonetheless as promoters or consultants operating illegally in the penny stock market. This section amends Section 15(b)(6) of the Exchange Act. It expands the scope of the Commission's authority to bar individuals from the securities business to include "promoters," "consultants" and others who work in the penny stock market yet may evade Commission sanction by avoiding formal registration as brokers and dealers. The section also includes within the definition of a broker those individuals associated with issuers, even if no formal association with a broker could be established.

Section 505. Requirements for Brokers and Dealers of Penny Stocks: Automated Quotations, Enhanced Disclosure

Subsection (a) of Section 505 adds a new paragraph (g) to Section 15 of the Exchange Act and thus establishes a system for more comprehensive disclosure and regulatory oversight for the operation of the penny stock market, from the initiation of broker-customer contact through the trading of these stocks and the maintenance of customer accounts in such stocks.

The section mandates that the Commission adopt rules to impose additional broker and dealer disclosure obligations prior to transactions, at the time of confirmation, and through monthly account statements. At a minimum, these rules require that prior to effecting any penny stock transactions, a broker or dealer must provide customers with a specific "risk disclosure" document. Brokers and dealers would also have to disclose the bid and ask prices at the time of the transaction or other comparable information if the bid and ask prices are unavailable, the number of shares to which such prices apply or other comparable information relating to the depth and liquidity of the market for that stock, the amount of commissions or other compensation the broker or dealer will receive if the investor consents to the transaction, and any additional information the Commission may deem necessary.

The "risk disclosure" document mandated under this section must contain a description of the nature of risk involved in the penny stock market, the method of pricing markups in that market, identification of means to receive information on broker-dealer disciplinary histories, and a description of other significant terms used which would assist customers in their understanding of the penny stock market.

At the time of confirmation, the section requires brokers and dealers to provide in writing similar price and volume information as that mandated prior to the purchase or sale of any penny stock. In addition, the monthly account statement required under this section must contain the present market value of a customer's holdings in penny stocks if firm quotes are available.

This section makes the effective date of these new requirements for brokers and dealers one year from the date of enactment of this Act.

Section 506. Development of automated Quotation Systems for Penny Stocks

Section 506 mandates that the Commission, at the earliest feasible time, facilitate the establishment and continued use of an automated quotation system ("AQS") to collect and provide information regarding all penny stocks. It requires that the AQS be operated by a national securities exchange or a registered securities association (such as the NASD), and that it gather and disseminate pricing and trading information

such as firm bid and ask quotations of participating brokers and dealers. It also requires that the Commission include in each of its first five annual reports submitted after enactment of this bill a status report regarding the development of this system.

Section 507. Review of Regulatory Structures and Procedures

Section 507 instructs the Commission to conduct a broad review of the enforcement and oversight activities of the self-regulatory organizations which monitor the penny stock market and to present this report and concurrent recommendations to the Congress within one year of enactment. The subjects of this review include an analysis of the adequacy of SRO resources devoted to penny stock regulation; cooperative efforts of SROs with state and federal regulators; present SRO rules to prevent excessive spreads and markups; and the adequacy of listing and maintenance standards in preventing evasion of penny stock regulations.

Section 508. Voidability of Contracts In Violation of Section 15(c)(2) of the Exchange Act

Section 508 effectively would void securities contracts made in violation of the Commission's penny stock rule and all other rules adopted pursuant to Section 15(c)(2) of the 1934 Act. This section would amend Section 29(b) of the 1934 Act to specify that any contract in violation of rules adopted under Section 15(c)(2) of the 1934 Act, which includes prohibition of fraudulent, deceptive or manipulative practices, would be deemed automatically void. The Commission would have the authority to exempt certain rules from this mandate.

Section 509. Restrictions of Blank Check offerings

Blank check companies are those in their development stage and in which the offeror discloses no specific business plan or purpose, or merely identifies an intent to engage in mergers and acquisitions but does not identify the business line of the anticipated merger or the anticipated management of the proposed merged entity. To combat the fraudulent and manipulative schemes associated with blank check offerings, this section requires the Commission to adopt rules to address this problem. These rules would include measures to require greater disclosure before the effective date of blank check company registration, and to place limitations on the use of the proceeds of the offering until the required disclosures are made. The rule would also include a right by shareholders to rescind a transaction after this disclosure was made.

Section 510. Broker/Dealer Disciplinary History

This section mandates that the NASD or other registered securities association establish a toll-free telephone listing to receive customer inquiries concerning the disciplinary history of its members and associated persons. The agency which provides this service is directed to respond to such inquiries promptly and in writing. Additionally, this section also provides immunity from liability regarding actions taken pursuant to this section.

A RESOLUTION AFFECTING THE GATT NEGOTIATIONS ON INTELLECTUAL PROPERTY RIGHTS FOR GENETIC AND BIOLOGICAL RESOURCES

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. PORTER. Mr. Speaker, today I am introducing a resolution which asks the United States Trade Representative to discontinue current negotiations at the Uruguay round of the GATT regarding the extension of intellectual property right protection to items or processes with biological or genetic content. No other negotiations regarding intellectual property rights would be affected.

It is my understanding that the impetus for negotiations on intellectual property rights was to curb piracy of goods manufactured or created in the United States and protected by U.S. law. However, anyone who deciphers the U.S. proposal on the matter will find that the implications of the proposal reach far beyond that goal.

The difficulty with the U.S. proposal on trade related aspects of intellectual property rights is that it fails to consider the value of biological and genetic material and processes in developing nations, as well as the invaluable and historic contributions of local people in the use of that material.

Since these people typically do not have access to representation to ensure that their interests are protected in the GATT process, we have an obligation to recognize their rights. If the trade related aspects of intellectual property rights, or TRIPS, provisions are finalized in their present form, their interests will be compromised.

We also cannot deny that international trade accords have immediate and significant consequences for sound natural resource use and for the practice of sustainable development. Mr. Speaker, none of these consequences have been considered during the negotiations.

I hope that the U.S. negotiators will heed this recommendation and following the conclusion of the GATT in December will conduct a much needed study to consider the social, environmental, economic and political ramifications of developing an international system for trade and ownership of biological and genetic resources.

Research on these matters should include participation of a wide variety of interests and should be conducted in full cooperaiotn with concerned agencies, trade, development and environmental experts, and nongovernmental organizations.

I am pleased that the National Wildlife Federation, Friends of the Earth, the Community Nutrition Institute, the Institute for Agriculture and Trade Policy, the National Toxics Campaign Fund, Greenpeace, and the Development GAP support this initiative.

I look forward to working with my colleagues and the administration to ensure an equitable and environmentally sensitive completion of the Uruguay round and continued discussions concerning genetic and biological resources.

HAZEL DAREN, THE U.S.-CONGO FRIENDSHIP COMMITTEE; THE NEW ALLIANCE PARTY; THE NATIONAL ALLIANCE NEWSPAPER; AND THE RAINBOW LOBBY

HON. MARVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. DYMALLY. Mr. Speaker, as part of my effort to expose a campaign of harassment against me by the U.S.-Congo Friendship Committee, Hazel Daren, coordinator; the New Alliance Party and the Rainbow Lobby, I bring to the attention of Members some background information about the organizations and individuals involved in this campaign of harassment:

WHO IS HAZEL DAREN?

Hazel Daren, listed as the coordinator of the U.S.-Congo Friendship Committee, can be traced back to an obscure document dated August 26, 1974. This document herealded the break between Fred Newman and his followers from LaRouche's National Caucus of Labor Committees (NCLC). (See the CONGRESSIONAL RECORD, 5/24/1990, page E1722-1723)

Even though the document remains unsigned, it has never been denied by Newman or his followers, the Newmanites. The document is significant because it establishes the link between the Newmanites and LaRouche, as well as revealing the names of many key Newmanites who are the leaders of the different front organizations established by Newman over the years. It also documents the creation of the International Workers Party (IWP)—a communist group purporting to be a leftist party. The first name which appears on this document, even before Newman himself, is that of Hazel Daren. Also appearing are Nancy Ross (Excutive Director of the Rainbow Lobby, the New Alliance Party (NAP) coordinator in 1982, its Vice Presidential candidate in 1984, and NAP's candidate for Governor of New York in 1982), Cathy Sadell, Cathy Salit, Ann Green, Harry Kresky, Gail Elberg, and Eunice Stronger. These are but a few of the hardcore followers of Newman who have stayed with him since 1974.

In a 1988 book Far Left of Center: The American Radical Left Today, published by Transaction Books, author Harvey Klehr traced the roots of the New Alliance Party to Fred Newman, a former philosophy instructor who is 1968 formed "a radical collective called If-Then which boasted that its pamphlets and brochures were the more obscence in New York. "(See the CONGRESSIONAL RECORD, May 24, 1990, page E1722-1723)

However, an indepth investigative report published in the Village Voice, by Joe Conason (June 1, 1982) traced Daren to the "Centers For Change" (CFC) which was incorporated in 1969. According to Conason, by 1972, the Centers For Change became a success after people who were in therapy themselves were trained to do therapy for profit, "With a staff of 28, CFC was run by an executive body of four who still dominate

much of NAP's activities: Newman, Hazel Daren, Gail Elberg, and Ann Green." Apparently, "Though many of the CFC members were "doing" therapy by this point, they were under the supervision of Newman, Green, Daren, and Sema Salit, the mother of Jacqueline Salit, now the editor of the weekly NAP organ, the New York Alliance. "[Jacqueline Salit is currently editor of the National Alliance Newspaper] Daren, also was helpful in formulating some of Fred Newman's writings. Conason wrote that Newman after supposedly resigning from LaRouche's organization worked on a "split document" with Daren, "Newman's document, written with the assistance of Hazel Daren, was a 64-page booklet called A Manifesto on Method. It admitted the failure of the effort to improve the NCLC and announced the formation of the 'International Workers Party,' a new organization which retained a substantial portion of LaRouchian ideology-including the Rockefeller/CIA road-to-fascism analysis. Indeed, Manifesto shows that even after leaving NCLC, Newman and company were still focused on LaRouche, despite public attacks emanating from NCLC accusing the IWP group of psychotic sexual practices and bestiality." (Exhibit #3)

Hazel Daren's closeness to cult leader Fred Newman is amply documented by serveral individuals. Klehr maintains that "A small core of people have been closely associated with Newman for many years and appear to have major roles in the NAP. They include Hazel Daren, Gail Elberg, Ann Green, and Nancy Ross." (Exhibit #2) In February 1990, a research report of the Anti-Defamation League of B'nai B'rith, titled The New Alliance Party: A Study in Deception, identified Fred Newman as the power behind the organization and the role played by his most trusted associates. The report quoted from Dennis Serrette's May 29, 1987 testimony in the lawsuit of NAP plaintiff Emily Carter against the Black-owned Mississippi newspaper Jackson Advocate. The report identified Hazel Daren as one of the small group of people who have actual power within the organization's structure by saying, "The inner circle to me was only Fred and those who Fred may have had to share his thinking, who carry out his bidding . . . his wives . . . I think Hazel Daren, Gail Elberg . . . and Debra Greene." (Congressional Record, 5/22/90, p. E1652-1656).

In a paper titled the New Alliance Party AKA Rainbow Alliance AKA Institute for Social Therapy and Research AKA East Side Center for Short Term Therapy AKA IWP 2AKA AKA AKA AKA AKA Dennis Serrette, a long-time black union activist and NAP's presidential candidate in 1984, explains what the nature of the Organization is by saying, "Most members join the organization through politics, therapy or sex. An individual who has been drawn close is met by two lieutenants and told that there is a secret underground organization, the International Working [sic] Party (IWP), allegedly a left party organization. Membership in the organization requires that you reveal all your resources, and that you turn over everything to the organization. (Even personal relationships are said to belong to the organization, so it is not uncommon for a member to report on the "deviations", etc. of his/her partner.) Bimonthly dues are assessed, but anything may be demanded at any time." (CONGRESSIONAL RECORD, 5/21/90, page E1626-1628)

Perhaps most chilling is the absolute control exerted by cult leader Newman on the recruits, according to Serrette: "When Newman is happy, everybody is happy. When Newman is mad, everyone is terrified. Members are kept busy from sun-up, way past sun down. Family ties, at best, are strained. Members no longer have time to call family, to visit, even to attend funerals, holiday, or other special events. When members do visit their families, more often than not, another IWP member accompanies them."

Serrette's two and one-half year experience on the Central Committee (CC) of the IWP conclusively reveals who controls the IWP, "The IWP has been chaired by Newman since its inception." According to Serrette, Daren's closeness to Newman is demonstrated by an exercise initiated by Newman "who once asked who would rule if something happened to him. The CC chose a body of three. Newman said that they were wrong; Hazel Daren (his woman partner for the longest period), would be chair. It was so ordained."

Hazel Daren's relationship with Fred Newman and her participation in other organizations he established earlier can be seen from the following:

According to reports filed with the Federal Election Committee, Hazel Daren contributed $3,500 to the New Alliance Party on June 3, 1987. While this shows a facet of her relationship to NAP, another more revealing fact is further information included on that form. Daren's occupation was listed as a "Partner" of the Institute for Social Therapy and Research, one of Newman's organizations for therapy which many cult insiders maintain is used for recruitment, manipulation, and control of cult members.

Hazel Daren's role as a therapist can be traced back to a newsletter called "Matter Over Mind" and published by the New York Institute of Social Therapy. The first issue of this newsletter is dated December 1977, its main feature is an editorial "In Defense of Progressive Social Science" written by Fred Newman, the Therapeutic Director for the New York Institute of Social Therapy. The editorial is devoted to the rebuttal of a negative article by Dennis King, a journalist who became famous for his expose on Lyndon LaRouche. Listed as members of the New York Institute therapy collective were Ann Green, Nancy Ross, Fred Newman, and Hazel Daren.

In a New Alliance Party promotional booklet, circulated in 1982, Hazel Daren is listed on page 36 as Chief Organizer of the "Association of Public Service Workers", one of nine groups listed as "Affiliated Organizations" of NAP. The address of this organization was listed as P.O. Box 1298, Cathedral Station, NY, NY 10025.

Within the same NAP promotional booklet, Hazel Daren's photo (captioned Winter 1982) is featured on page 66 presenting an award.

It is apparent that Daren faithfully participates in almost all enterprises of the Newmanites. For instance, her name appears together with other cult regulars like Gail Elberg, Lenora Fulani, Deborah Green, Harry Kresky, Fred Newman, and Jacqueline Salit on the editorial board of "Practice: The Journal of politics, economics, psychology, sociology and culture." Other familiar names which were advertised as part of the Practice staff included Abukari (whose business card identifies him as a legislative aide for the Rainbow Lobby) and Mike Klein of the National Alliance Newspaper. According to the Spring 1986 issue of Practice, subscription checks should be made payable to the "Institute for Social Therapy and Research".

One of the Classified ads listed in the June 2, 1988 issue of The National Alliance Newspaper under the headline Women, Anger, & Change, reads, "Social Therapist with 20 years experience with women's issues. Hazel Daren, (212) 362-1446."

THE ORGANIZATIONS

The U.S.-Congo Friendship Committee is a little known group which came to light first as one of the many groups demonstrating outside the Democratic National Convention in Atlanta in 1988. The Committee lists its address as 250 West 57th Street, Suite #317, New York, NY 10019 (January 10, 1990, letter to Ralph Lotkin signed by Hazel Daren. The same address appears on their early letter to the Committee on Official Standards dated September 7, 1989. However, the same address is listed by New Alliance Productions as both the owner and publisher of The National Alliance Newspaper on an October 1, 1989, (PS Form 3526) the U.S. Postal Service Statement of Ownership, Management and Circulation, and published on page 7 of the October 12, 1989, National Alliance Newspaper.

In an advertisement which appeared in the February 2, 1989, issue of The National Alliance Newspaper, the same address (250 W. 57th St., Suite 317, NY, NY 10019) is also listed as that of the "National Membership Department" of the New Alliance Party. The relationship between the New Alliance Party, and the Rainbow Lobby is detailed later on in this report.

Although, care has always been taken in all these organizations to list different addresses in order to perpetuate the appearance that they are separate and distinct groups (for instance, the New Alliance Party lists a different Suite # within the same Building housing the Rainbow Lobby in Washington, D.C.). In this case, all three organizations the New Alliance Party, its newspaper, The National Alliance Newspaper, and the U.S.-Congo Friendship Committee operate from the same suite. This should not come as a surprise once one examines the evidence linking all the groups and their officers to Fred Newman, who according to the following evidence is the "cult" leader.

To understand all these seemingly diverse groups, it is important to consider their historical development and the individuals purporting to be its leadership.

The best insight into the party comes from Dennis Serrette. In another unpublished paper titled Inside the New Alliance Party AKA Rainbow Alliance AKA Rainbow Lobby AKA the Organization AKA . . . (eventually, shortened, edited, and printed in the September/October 1987, issue of Radical America) Serrette, who served on the "Central Committee" of the New Alliance Party (NAP) explains who all these organizations really are: "I believe I have a responsibility to reveal the intense psychological control and millions of dollars Newman employs to get well-meaning individuals into our communities (they target the Black community) to *viciously attack Black leaders,* Black institutions, and progressive organizations for purposes of building Newman's power base." (Emphasis added.)

Dennis Serrette explains that all the organizations such as the Rainbow Lobby, and the New Alliance Party are ". . . one of many front organizations controlled by Fred Newman." He maintains that, "I have inter-

changeably used the names NAP, the organization, the International Workers Party (IWP), etc., for they are all run by, and consist of the same people."

Serrette sheds further light on this issue in a footnote saying,

"Others include New York Institute of Social Therapy and Research, Rainbow Alliance, East Side Center for Short Term Therapy, the Harlem Institute, Association of Better Communities, the New York City Unemployed and Welfare Council, George Jackson-Rosa Luxemberg Cultural Center, the National Alliance Newspaper, the New Black Alliance, Coalition of Grass Roots Women, the International Workers Party, and more. *All are created and put to rest by Newman, according to the group or person he is targeting.* (i.e. When they decided to go after me, they created the New Black Alliance (NBA). Once I agreed to be the presidential candidate, the NBA was disbanded. Similarly, Newman created the New York City Unemployed and Welfare Council to pull in some welfare activists and attack the National Welfare Rights Organization. When Newman decided to switch focus to electoral politics, he disbanded the New York City Unemployed and Welfare Council, deeply disappointing many of the "leaders" who had no say in the matter. [sic] James Scott, Alma Brooks, and Neter Brooks, whose names Newman continues to use, all left the organization. Newman creates the organization, chooses who among the inner circle will "lead" it, how it will be run, what it will do, and when it is no longer needed." (Emphasis added.)

In the same article Serrette refers to who is in charge of the operation of all the front organizations by saying,

"Newman controlled all the resources, personnel, and policies of the organizations. When I left in 1984, he was living with three "wives". One was in charge of all the organization's finances, which Newman boasted well-surpassed $1 million; another controlled all personnel/members; and the third was in charge of "national operations."

Serrette reveals that within the NAP there is a clandestine body called the International Worker's Party (IWP). According to Serrette, the abusive cult nature of the organization is obvious once the financial abuse of its members is known, he maintains, "Membership in the organization requires that you reveal all your resources, and that you turn over everything to the organization."

The Rainbow Lobby was initially registered under the name of the Rainbow Alliance according to papers filed with the Clerk of the House. The document signed by Nancy Ross was dated October 3, 1985. No other records were filed until October 16, 1986, when the organization was registered under its new name the Rainbow Lobby. Deborah Green signed the form as an officer with the Lobby, and one of the two lobbyists named was Nancy Ross. All quarterly reports for 1988 through the fourth quarter of 1989 show Eunice Stronger as the signer, and Nancy Ross continues to be one of the lobbyists.

In examining the NAP's Federal Election Reports and the reports filed by the Rainbow Lobby with the Clerk of the House, it is evident that both Ms. Eunice Stronger and Deborah Green filed these papers for both organizations at one time or the other. Ms. Eunice Stronger is listed as the Treasurer of the New Alliance Party—National Organizing Committee (Exhibit #20: FEC quarterly report dated April 14, 1987). However a January 6, 1987, letter sent to FEC from the New Alliance Party was signed by "Deborah Green for Eunice Stronger, Treasurer" at the same time that Deborah Green appears as an officer of the Rainbow Lobby. This conclusively shows that both organizations (like the rest of Newman's front organizations) are one and the same, and are run by the same small circle of individuals.

There is no doubt that each organization was formed with a certain design in mind: the New Alliance Party for election campaign work, and the Rainbow Lobby for lobbying and fundraising. However, in order to understand what the Rainbow Lobby and the New Alliance Party are, it is important to examine their historical development and the main players who are identified as its leaders. Following is a brief history:

In an article published in Radical America, Dennis Serrette explains the role played by cult leader Fred Newman in controlling all front organizations, their leadership and personal lives of his followers: "It was the IWP/Newman that assigned Nancy Ross to head NAP. It was Newman who decided that Ross would be moved into the Rainbow Alliance and that Emily Carter would be the head of NAP. It was Newman who decided that Carter would leave her child in New York, causing great pain to Emily, and be the Black face in the South. It was Newman who, as Lenora Fulani's therapist, decided he would shape her to become a front face for the organization."

Nancy Ross, the Executive Director of the Rainbow Lobby, is reported by Joe Conason in the Village Voice, to have been one of the earliest patients of Newman's therapy, "Among CFC's first therapy patients was Nancy Ross, NAP's coordinator and at large candidate for City Council from Manhattan last year."

Perhaps most terrifying about this cult is not only its vast resources but its potential danger. According to Serrette in Inside The New Alliance Party AKA Rainbow Alliance AKA Rainbow Lobby AKA the Organization AKA, ". . . in the last organization-wide meeting I attended in December, 1984. The theme of this meeting was 'to Kill.' Members were given readings and attended small group sessions prior to the meeting to rev up their zeal for the two day event. The theme was that it was not enough to give your life for the cause, you had to be ready to kill for it. In an analogue to a religious revival meeting, member after member stood up and gave witness to the fact that they would not just give their lives for 'Fred', they would kill for him also."

ATTACKS AGAINST OPPONENTS AND SMEAR CAMPAIGNS

Perhaps the frivolous nature of the ethics complaint by "the U.S.-Congo Friendship Committee' is best understood when the pattern of attacks by NAP and its other fronts is examined. According to Serrette, "When progressive newspapers and individuals fail to support Newman, they become legitimate targets for destruction, even those he previously acclaimed." Serrette states that when he spoke against Newman's racism and exploitation of Blacks, he was labelled a "nationalist" (a term that connotes a derogatory meaning within leftist circles, but for Newman this may carry a stronger meaning since he labelled black nationalism as facist in the 70's). Serrette, continues to explain the pattern of attack on him by saying, "When I spoke honestly about NAP to persons outside the organization, articles began to appear in the National Alliance that would have made J. Edgar Hoover proud." But this was not all, Serrette, continues by saying; "I even received calls from friends that NAP was calling up women friends of mine from years past to see if they could contribute "sexual" dirt to a paper about me. When they couldn't find the dirt, Lenora Fulani authored the article under the auspieces of the "Women's Caucus," another paper committee."

This pattern is witnessed in attacks on other individuals who broke with NAP, but in recent years with the extension of NAP's operations to the nation's capitol through the "Rainbow Lobby," these attacks were extended to members of the Congressional Black Caucus. The first subject of NAP's attacks was Rep. William Gray (D-PA). NAP ran a candidate, Linda Ragin, against him in 1986. Note the headlines which accompanied one article published in the National Alliance Newspaper of August 22, 1986: "Is Bill Gray Worth Dumping? Linda Ragin Says "Yes"!" The maliciousness of the attack can be seen in the caption "Linda Ragin is not a professional politician, which means she's not a crook." Later on Del. Walter Fauntroy (D-DC) became the subject of the NAP's criticism on the issue of Haiti. Their newspaper, this time, attempted to show on November 13, 1987 that there was a split within the Congressional Black Caucus between Rep. Mervyn Dymally (D-CA) and Rep. John Conyers (D-MI), and Rep. Floyd Flake (D-NY) on one side and Fauntroy on the other, claiming that all three members "pledged themselves to challenging Fauntroy's support of the CNG [Haiti's National Council of Government]."

A month later, the National Alliance Newspaper went further to claim that, "Up until the eve of the aborted election Congressman Walter Fauntroy (D-D.C.) a member of the Congressional Black Caucus and chair of the Congressional Task Force on Haiti, had supported U.S. military aid to the CNG. After a "fact finding" junket to Haiti earlier this month . . ." (Dec. 11, 1987)

Another Congressional Black Caucus Member who was a subject to the Newmanites' harassment is the late Rep. Mickey Leland who because of not cosponsoring a resolution to cut off aid to Zaire was written up more than once in the cult's newspaper The National Alliance. On December 22, 1988, under the headline "Mobutu's Lobby & the Politics of Hunger" Michael Klein wrote: "The poor of central Africa's Zaire don't get much of anything under the dictatorship of self-appointed President-for-Life Mobutu Sese Seko, but some international "businessmen" are making a killing from the food aid racket. And investigations by the National Alliance have revealed that two congressional Democrats—Mervyn Dymally of California and Texas Mickey Leland, who have ardently opposed the cutoff of aid to Mobutu—are closely tied to individuals who profit handsomely from the Food for Peace program."

Klein, an investigative journalist whose name appears on most cult publications such as Probe, Practice, and the National Alliance Newspaper, continued to say,

"When the program [PL480, Food for Peace] resumed in 1987, the contracts for the lion's share of the rice shipped to Zaire went to Connell Rice and Sugar, one of America's largest independent brokers of the two commodities. Connell's 1988 contract totals $3,948,892.

"The Alliance has discovered that company President Grover Connell, Jr. made a campaign contribution of $1,000 to Leland

in 1987, and that the Texas legislator received a $2,000 honorarium—the maximum allowed by law—from Connell Rice and Sugar in 1986. Connell was also instrumental in arranging a trip to Zaire for Leland in August, 1987."

To demonstrate the opportunism of the cult (and the absence of any consistent ideological line of this group) which pretends to be concerned for the working class or African Americans, one need only examine newspaper clippings from West Virginia which show that upon separating from LaRouche's organization, this cult entered into a coalition with the KKK in order to ban textbooks written either by Blacks authors or describing the Black experience in the U.S. (CONGRESSIONAL RECORD, 6/20/1990, pages 15051-15053

Finally, careful observer, may see several questionable activities practiced by cult members. First, the Rainbow Lobby's budget of $1,200,000 in 1989 is difficult to explain. Where did they get the money? What is hard to believe is that the money is supposedly collected at street corners or $5-$25 solicitations through the mail. When the group started in 1987 its budget was $765,329, this dramatically increased to $1,203,846.53 in no time. The group surpassed the amount spent by the AFL/CIO, AIPAC, and the League of Savings and Loan according to an AP wire story. It should be noted that their attempts to deceive the public, this cult established an organization initially called "The Rainbow Alliance" which is closer to the name of their New Alliance Party only to drop that and instead to use "The Rainbow Lobby" which not only plays on the term Rainbow as in Reverend Jackson's Rainbow Coalition, but also implies that this "Rainbow Lobby" is an arm or an extension of Rev. Jackson's Rainbow Coalition. It is evident from many sources that the cult plays on the confusion to raise funds.

The cult is also feared in journalistic circles for the ease of initiating law suits against their adversaries. It is worthy of note that when cult leaders felt that filing an ethics complaint against Representative Dymally, and placing negative stories in the media was not sufficient harassment, they resorted to initiating a $2,000,000 law suite to prevent Rep. Dymally from discussing or disseminating two cult memos revealing the fact that they have been peddling stories to reporters about him. The judge refused to accept a gag order on the Congressman and instead denied permission to one cult attorney, Alvaader Frazier, to appear before his court. (See the CONGRESSIONAL RECORD, June 13, 1990, page 14010

THE NATIONAL ADVISORY COMMITTEE FOR THE REVIEW OF THE FEDERAL EXCESS AND SURPLUS PERSONAL PROPERTY ACT

HON. PETE GEREN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. GEREN of Texas. Mr. Speaker, today I am introducing the National Advisory Committee for the Review of the Federal Excess and Surplus Personal Property Act. This legislation would establish an advisory committee within the General Services Administration [GSA] to investigate the system we now use to provide Federal excess and underutitlized property to the State and local governments.

Mr. Speaker, the Pentagon announced in February that it has a problem. It has stockpiled $30 billion in spare parts, uniforms, and other equipment for which it has no immediate use. There is another $1.8 billion on order that its auditors say should be canceled for the same reason.

Mr. Speaker, law enforcement officials in Tarrant County have a problem, too. They must somehow fight the war on drugs even though they do not have the funds to buy all of the hardware they need to get the job done. This shortfall may only get worse, since as the Federal pockets shrink, States and localities will no doubt feel the pinch first. Our State and city governments are already reeling from a decade in which Federal aid to them was cut 11 percent.

Many State and local agencies cannot afford much of the equipment they need to do their jobs and have attempted to make up for this budget shortage by asking that the excess property held by many Federal agencies be transferred to them. All too often, however, they are met by an impenetrable bureaucracy, cumbersome regulations, and confusion. There is also no accurate list of what Federal surplus property is available for transfer.

The GSA already has an Ad Hoc Interagency Committee on Property Management Systems which has done an excellent job of reviewing property management within the various agencies. It is not within the scope of this committee, however, to review whether the current system by which property is transferred to the States and localities is adequate. My advisory committee would do just that.

This advisory committee would develop a current inventory of excess and underutilized property held by Federal agencies and look into the methods these agencies use to make their surplus available. Do these methods adequately meet the needs of State and local agencies around the country trying to serve their citizens? Could the application procedures be simplified to help even the smallest departments and agencies compete?

The advisory committee would also investigate where our States and cities sit on the pecking order to receive this property. Under current law, foreign governments often receive property before it is classified as "excess" or "surplus." Our own Federal agencies and State and local governments, however, cannot touch this property until it is classified as excess or surplus.

This is a policy that must be changed. If valuable equipment is sitting idle in a government warehouse, it should not be gift-wraped for foreign countries already receiving millions in Federal aid; instead, it should be given back to the people who paid for if—the American taxpayers.

Local officials in Tarrant County have told me how vital this excess property could be to their efforts to not only fight the drug war, but to educate our children and repair our failing infrastructure. This property is not just dilapidated equipment dating back to World War II. Much of it is quite new, since the practice of overstocking equipment is routine in the Federal Government; doing so is often the only way to get the best price.

Our educational institutions, however, are only as effective as the resources they have at their disposal, and local school districts could benefit greatly from surplus computers, desks, and typewriters that are wasting away in Government warehouses. Our side can only win the war on drugs if it is well-armed. Local law enforcement could gain a significant advantage with the weapons, ammunition, vehicles, night surveillance equipment, and uniforms which the Pentagon owns but says it cannot use.

These warehouses filled with surplus property will certainly begin to bulge over the coming years if troops are brought home, military bases around the world are closed, and programs are scaled back. We must address this problem now before we waste more taxpayer money at the Federal level while depriving our States and communities of the tools they need.

Interest in how our surplus property system works is sweeping the country right now. My friend and colleague, Congressman JOHN MURTHA, has begun a pilot program in his district to provide surplus machinery to municipalities for infrastructure improvement. The job of this advisory committee would be to ask what is the best method of making this property available to States and localities nationwide?

Mr. Speaker, the issue of how we handle our inventory of Federal surplus property in a changing world cuts across many lines. It's a budget issue. It's a foreign aid issue. It's a federalism issue. Most importantly, though, it's an issue of good government and plain common sense.

FAIR LABOR STANDARDS EXEMPTION FOR SMALL BUSINESS

HON. TIMOTHY J. PENNY

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. PENNY. Mr. Speaker, along with my principal cosponsor, the chairman of the House Small Business Committee, Congressman JOHN LAFALCE, I am today introducing legislation to clarify the intent of Congress that American firms with gross sales of $500,000 or less are exempt from the Fair Labor Standards Act [FLSA] even if one or more employees is engaged in interstate commerce. This change is necessary to restore a vigorous and expanded small business exemption many of us thought we had voted for in the minimum wage bill passed during 1989.

Mr. Speaker, our colleagues may not realize that many very small businesses, once exempted from the FLSA, will soon be required to pay the Federal minimum wage and adhere to Federal overtime and paperwork requirements because of an oversight in the new Federal minimum wage law. In an effort to simplify the law and to ensure its uniform application to all industries, an important section of the FLSA was deleted which has the unintended result of rendering the $500,000 small

business exemption virtually useless in most instances. Until the effective date of the changes to the minimum wage passed last year, businesses grossing less than $362,500 annually were exempt from FLSA coverage. When Congress passed the minimum wage bill amendments, that threshold was increased to $500,000. But because a section of the old law was deleted, the new statute, which took effect April 1, 1990, requires that all employees engaged in interstate commerce be fully covered by the FLSA regardless of their employer's gross level of sales.

Department of Labor officials indicate that they see no choice but to enforce the law as written and that they lack the flexibility to interpret the statute as originally intended by Congress. As a result, small firms that want to take advantage of the small business exemption will have to determine each week whether any of their employees were engaged in interstate commerce. By commonly used definitions, foods service workers involved in unloading trucks that have crossed State lines, waiters and cashiers handling or processing credit card charges and even workers answering or placing calls will now be covered by the FLSA.

Clearly, this law, which was meant to broaden and simplify the small business exemption, imposes tremendous complications on the very people it was intended to help. As one member involved in the early committee consideration of a minimum wage increase, I can attest that this result was never intended. The problem, while significant for small firms, can be cured with the legislation I am offering today.

I urge my colleagues to join me in restoring a true small business exemption to the FLSA.

H.R. —

A bill to amend the Fair Labor Standards Act of 1938 to provide that coverage under that Act shall only extend to employees of enterprises engaged in commerce or in the production of goods for commerce

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. COVERAGE.

Section 3 of the Fair Labor Standards Act of 1938 (2 U.S.C. 203) is amended by adding at the end the following:

"(y) 'Employee who in any workweek is engaged in commerce or in the production of goods for commerce' means an employee who in any workweek is employed by an enterprise engaged in commerce or in the production of goods for commerce.".

REGULATORY ACCOUNTING PRINCIPLES ARE THE WRONG PRINCIPLES

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. OWENS of New York. Mr. Speaker, regulatory accounting principles [RAP] is a set of rules invented during the Reagan administration as one of the kingpin codes of deregulation. Before RAP was concocted there were only the general accounting principles [GAP] which have governed the accounting and financial world for many decades. But the Reagan regulators decreed that RAP should supersede GAP. This new set of accounting principles was really an invitation to fiscal conspiracy, a tool for deception and fraud, a vehicle for the perpetuation of elite stealing. RAP guaranteed the monumental expansion of phony bookkeeping. RAP made the present savings and loan debacle inevitable.

The S&L RAP is an amazing creation. In summary, it was an admission that the books could not be balanced and time-honored standards could not be met. The bureaucratic solution was to redefine the meaning of balanced books and set the standards lower. Instead of solving the problem a decision was made to hide the problem in a grand embrace.

A transfusion of new official jargon gave new life to the network of racketeering enterprises which infested the country. The day of reckoning was delayed with a device offered by that same government which would later have to pay the bill. More time was granted for new schemes and conspiracies. New opportunities were provided for the massive siphoning operations to be executed. The great swindlers knew that the day of reckoning was coming but RAP gave them a new extension.

RAP was an unfortunate and very damaging innovation. The folly of this phenomenon may be summarized with a rap poem, an interesting merger of form and substance.

THE S AND L RAP

Do the S and L RAP!
Live it up
Reach and grab
Fat Uncle Sam
Will pay the tab
Private jets
Soft blonde pets
Steal it all
Reach and grab
Let the country fall
Never mind the mother nation
We're a smart greedy generation.
Stay away from GAP!
Do the S and L RAP!
Don't be a fool!
Learn the millionaire's rule!
Stay away from honest GAP
Be smart and cool—
Do the S and L racketeer's RAP.
When Congress took a nap
Ronald Reagan concocted the S and L RAP:
GAP means General Accounting Principles
RAP means Regulatory Accounting Principles
RAP equals Reagan Allowed Pilfering
With our brilliant S and L RAP
We caught dumb taxpayers
In a tight fiscal trap.
Do the S and L RAP!
Grab it all
Let the economy fall
Money's not a care
We buy high priced china
And priceless silverware,
Drinks for the whole house!
A whore on every lap!
We got all decent people
In a patriotic trap.
Don't use the GAP!
Go for the S and L RAP!
With the S and L RAP
You can pay your sons
In dollars tons
Invest in Grandma
Contracts to Grandpa
Enjoy the good life
Send a hefty salary
Home to your wife
Pay your family the best
Practice savage fiscal incest
Don't let the big bucks roam
Keep a few million at home.
Why let the FBI play cop?
Who wants this giant orgy to stop?
Do the S and L RAP!
Reach and grab
Grab and reach
You learned a little lesson
That you have to teach
Crime does pay!
Just do it the S and L way.
When Congress took a nap
Ronald Reagan invented the S and L RAP.
Do the S and L RAP!
Live it up
Reach and grab
Fat Uncle Sam
Will pay the tab
Private jets
Soft blonde pets
Steal it all
Reach and grab
Let the country fall
Never mind the mother nation
We're a smart greedy generation.
Stay away from GAP!
Do the S and L RAP!

A TRIBUTE TO CHARLES M. VEST

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. PORTER. Mr. Speaker, it is my distinct pleasure to congratulate Charles M. Vest upon his election to the presidency of the Massachusetts Institute of Technology.

Dr. Vest's credentials speak for themselves. His training and experience both as a mechanical engineer and as a former dean of engineering affirm his ability to guide the institute through the 1990's. Dr. Vest is presently completing his term as provost and vice president for academic affairs at the University of Michigan. He will be the 15th in a distinguished line of MIT presidents when he assumes office in mid-October.

I commend Dr. Vest for his outstanding achievements in the field of technological education and wish him all the best in this new endeavor.

FINANCIAL SCRUTINY OF MEMBERS OF CONGRESS

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. DYMALLY. Mr. Speaker, I bring to the attention of Members details of financial scrutiny of some Members of Congress by the media and individuals representing the Rainbow Lobby and the National Alliance Party. Most of the Members whose financial statements were requested are members of the Congressional Black Caucus; two other Members visited Zaire.

REQUESTS OF FINANCIAL DISCLOSURE FORMS AND THE RESULTING MEDIA STORIES

DATE, NAME, AND REPRESENTATIVE(S)

10/7/87. Richard Sokolow, 170 T St. NW, "Journalist." Leland and Dymally.

2/18/88. "Bob Shapiro", 110 Constitution Ave., NW, Washington, DC, "Journalist." Leland.

2/19/88. Rep. Dymally, then-Chairman of the Congressional Black Caucus issues a memorandum to the Black Caucus explaining the difference between the Rainbow Coalition and the Rainbow Lobby/National Alliance Party and pointing out the negative campaign waged by the latter against Caucus members including Reps. Leland, Fauntroy, and himself. Chairman Dymally described the group as a divisive force and that it should be declared persona non grata.

7/28/88. Sara Fritz, Los Angeles Times, 1875 Eye St. NW., Dymally.

12/22/88. The National Alliance Newspaper publishes article critical of both Representatives Dymally and Leland. "Mobutu's Lobby and the Politics of Hunger."

2/10/89. Zairegate Press Conference by Rainbow Lobby: attended by Steve Askin, The Washington Post, The LA Times.

2/23/89. The National Alliance Newspaper admits that Dymally had been "the subject of a year and a half long Alliance investigation."

4/17/89. Steve Askin, 529 14th St, NW. Leland, Dymally, Savage, Burton,[1] Orduna K.[2]

5/1/89. Steve Askin writes first critical article in mainstream media (Business Week) "Suddenly the Business of Angola is Business."

5/18/89. The National Alliance Newspaper publishes first critical article of Rep. Savage after his trip to Zaire.

5/24/89. Howard Abramson, Journal of Commerce, 740 National Press, DC., Dymally.

5/26/89. Stan Harris, J. Anderson, 1531 P St. NW 20005. William Gray.

6/15/89. Howard Abramson & Rose Horowitz write two front page articles in the Journal of Commerce. One article focus is the Food for Peace program.

6/16/89. Another front page article by Abramson and Horowitz in the Journal of Commerce.

6/28/89. Rich Sokolow, (500 Greenwich St. NY), "Journalist." Dymally and Savage.

6/28/89. Ried Sokolow, (500 Greenwich St. NY, "Journalist." Savage.

7/19/89. Jim McGee writes front page story in the Washington Post about Rep. Savage.

7/24/89. Melissa Mathis, Researcher, Washington Post. Savage '86.

7/27/89. Rep. Dymally inserts in the Congressional Record "Clouds Blur the Rainbow" a critical report of the Rainbow Lobby, and other front organizations of political cult of Fred Newman.

7/27/89. Melissa Mathis. Dymally.

8/2/89. Jim McGee of the Washington Post writes another story of Rep. Savage.

8/17/89. Dan Morgan, "31 Oxford St, Chevy Chase, MD." Dymally & Leland (89, 88, 87, 86, 85, 84).

9/7/89. Rainbow Lobby retaliates against Rep. Dymally by filing an ethics complaint.

1/2/90. Jim McGee writes a lengthy Federal page story on Rep. Dymally using six-month old stories by Steven Askin & Abramson/Horowitz as the basis.

1/2/90. William J. Eaton, Los Angeles Times, 1875 Eye St. NW. Dymally.

1/4/90. Paul Houston, LA Times, 1875 Eye St. NW, DC 20006. Dymally.

1/25/90. Jim McGee writes a front-page story in the Washington Post linking Rep. Dymally to Maurice Tempelsman (a link discussed by the Rainbow Lobby almost a year ago).

1/29/90. Steven Askin, writing the first of several articles in Africa News repeating charges in the 12/22/88 issue of the National Alliance Newspaper and other issues of the paper receives credit for being the first to write up Rep. Dymally in a major publication.

2/8/90. Alan Frank, ABC News. Dymally.

6/1/90. "Bob Shapiro", (210 Mass Ave NE), "Congressional News Sender," "Journalist." Dymally, Savage, Conyers, Mrazek[1].

Richard Sokolow is a member of the security contingent of the Fred Newman cult. This cult can be traced to Lyndon LaRouche who organizes on the right of the political spectrum, while the Newman cult organizes on the left. Richard Sokolow is the author of an August 4, 1989 memo to other cult members which explains his peddling of stories to Dan Morgan, and Jim McGee of the Washington Post as well as his relationship with Steve Askin.

A comparison of handwriting on the requests for financial disclosure slips by Sokolow and a "Robert Shapiro" shows that both are identical.

Richard Sokolow's name appears nowhere on any of the cult's numerous publications despite reference recently that he is a staffer of Probe one of their magazines.

The only time Sokolow was positively identified on paper was in a Federal Election Report showing a reimbursment of $428.67 on 11/11/1987.

TRIBUTE TO SAM KEITH, BUSINESS AND CIVIC LEADER

HON. PETE GEREN

OF TEXAS

IN THE U.S. HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. GEREN of Texas. Mr. Speaker, Fort Worth, TX, suffered a tremendous loss on Wednesday, July 11. It was on that day that civic and business leader Sam E. Keith, Jr. passed away. Sam was the essence of the Great American, a man fully dedicated to his family, his country, and his community.

Sam Keith taught us all a lesson in living life to its fullest by dedicating his life to doing the thing he loved—aviation. Sam began his professional career at Consolidated Vultee—now known as General Dynamics—by building PBY "flying boats" for the U.S. Navy during World War II. After serving on the frontlines of U.S. industry fueling the war effort, Keith then joined the U.S. Army and served his country in Okinawa and Korea.

When Sam left the Army, he did not leave his love of aviation behind. In 1982, he retired from General Dynamics, where he had risen through the ranks from chief of traffic to plant engineer. But throughout his life, Sam was much more than a builder of planes. He was a man with a deep love for community, and he lived as an example of that commitment throughout his life.

Sam served two-terms as chairman of the board for the 200,000-member Air Force Association, and also completed two terms as national president of that fine organization. He was a winner of that organization's Man of the Year Award in 1986 and was bestowed with the Exceptional Service Medal in 1988, the highest award the Air Force gives to a civilian.

Along the way, Sam always found the time to give to others. He was active in many charitable civic pursuits and had been president of Goodwill Industries. He had also cochaired the Fort Worth military ball and was vice president of the Greater Fort Worth Civic Leaders Association.

Sam Keith numbered many prominent individuals among his friends, including former House Speaker Jim Wright, former Defense Secretary Caspar Weinberger, and former Air Force Secretary Edward C. Aldridge, Jr. I am proud to say that I was among that circle of friends as well. He was admired and respected by all who knew him.

He will be sorely missed.

FAMILY FARM AMENDMENTS

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. DORGAN of North Dakota. Mr. Speaker, it has long been a goal of Tim Johnson and myself to change the priority of price support programs for wheat and feed grains. We think those programs should be, foremost, a safety net for family sized farms so that, when market prices are low, a family farmer who operates efficiently can earn a modest wage for his labors.

In responding to the severe budget crunch in Congress, we think that safety net is first priority and that other goals, such as subsidizing all farm production at a cheaper price, should be sacrificed before the safety net is abandoned.

Therefore, we have offered three amendments to H.R. 3950, the farm bill. They will guarantee a family sized farm a higher price for wheat and feed grains, but for only a limited amount of grain per farmer. And, our amendments tighten rules that now allow large farmers to, in effect, double-dip on Government price support payments.

In addition, we will offer an amendment requiring, in the case of cutbacks on farm program payments resulting from budget reconciliation, that the budget savings be taken primarily from the Government payments to large farms, keeping intact the safety net to family farms to the extent possible.

The amendments follow:

AMENDMENTS TO H.R. 3950, AS REPORTED, OFFERED BY MR. DORGAN OF NORTH DAKOTA

In the amendment made by section 1001 to section 105A of the Agricultural Act of 1949, at the end of subsection (c)(1)(A) insert the following: "The farm program payment yield times the acreage used to compute payments to a producer under this paragraph shall not exceed 21,000 bushels of corn or, in the case of other feed grains, a

comparable amount, as determined by the Secretary.".

In the amendment made by section 1001 to section 105A(c)(1)(E)(i) of the Agricultural Act of 1949, strike "$2.75" and insert "$3.10".

In the amendment made by section 901 to section 107A of the Agricultural Act of 1949, at the end of subsection (c)(1)(A) insert the following: "The farm program payment yield times the acreage used to compute payments to a producer under this paragraph shall not exceed 15,000 bushels of wheat.".

In the amendment made by section 901 to section 107A(c)(1)(E)(i) of the Agricultural Act of 1949, strike "$4" and insert "$4.50".

Amend section 1101(a) by striking "and" at the end of paragraph (5), by striking the period at the end of paragraph (6) and inserting "; and", and by inserting at the end the following new paragraph:

(7) by striking subparagraph (A) of paragraph (5) and inserting the following:

"(5)(A) The Secretary shall issue regulations defining the term 'person', and prescribing such rules as necessary to assure a fair and reasonable application of the limitations established under this section, except that as the term applies to section 1001(1) and (2) of this Act—

"(i) each person must meet the requirements of material participation within the meaning of section 469(h) of the Internal Revenue Code of 1986 as prescribed in section 1.469-5T of the Internal Revenue Code of 1986, and

"(ii) each person and any related terms, such as individual, joint operation, and entity shall be defined in such manner that no combination of farming or business organizations shall result in any one natural person qualifying as more than one person.".

At the end of subtitle A of title XI, insert the following new section:

SEC. 1121. SENSE OF THE CONGRESS.

It is the sense of the Congress that any future reduction in spending provided by any budget reconciliation bill that affects agricultural commodity support programs should be made by Congress on a targeted basis to protect the support prices for the amount of commodities produced by family-sized farms, and should achieve budgetary savings, to the extent possible, through lower support prices on production from the largest farms.

Redesignate the succeeding section accordingly.

NELSON MANDELA'S COMMENTS MERIT CLOSE SCRUTINY

HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. BEREUTER. Mr. Speaker, like almost all Americans, this Member was very favorably impressed when Nelson Mandela addressed a joint session of Congress. While there were many, including this Member, who had some concern about his willingness to associate himself with the likes of Colonel Qadhafi and Fidel Castro, his comments before this body session were statesmanlike, and his tone was moderate. His speech received well-deserved acclaim. For all appearances he appeared to be the ideal person to help put an end to the turmoil in South Africa.

But Nelson Mandela's subsequent activity has once again raised serious questions about his ultimate objectives. Traveling to Kenya on the final leg of his international tour, Mandela associated himself with a government that is engaged in a sweeping crackdown against pro-democracy forces. Mandela's defense of the totalitarian Kenyan Government suggests that his commitment to democracy is highly situational.

As an individual who helps shape world opinion, Nelson Mandela can do much to influence the human rights policies of African nations. That is why his failure to condemn the abuses in Kenya is so disturbing. By his silence, Nelson Mandela has added legitimacy to the Kenyan Government's efforts to suppress its black population.

Mr. Speaker, the July 18 edition of the Omaha World Herald published an insightful editorial on this issue. The World Herald warns that Mandela's attitude "is not likely to encourage African autocrats, who lead the majority of African countries, to allow their fellow black citizens to enjoy political freedom." There is substance to this concern, and I commend this editorial to my colleagues.

[From the Omaha World Herald, July 18, 1990]

MANDELA SINGS HIS OTHER TUNE

The hero's mantle that has been draped around Nelson Mandela's shoulders would look more appropriate if Mandela did not continue to defend dictators.

Praise has been heaped on Mandela's head by people in free society (the fact that he was invited to address a joint session of the U.S. Congress comes to mind). Much of it is deserved, but some of it seems questionable when one considers some of the positions taken by Mandela.

It will be recalled that earlier in his triumphal tour across a good deal of the world. Mandela praised, among others, Libyan dictator Moammar Gadhafi and Cuban dictator Fidel Castro.

Now comes another example of tolerance for authoritarian government.

In Nairobi, Kenya, where an authoritarian government is cracking down hard on pro-democracy forces, Mandela said that Western nations have no right to pressure African nations to accept democratic reforms.

Apparently it does not occur to Mandela that this kind of pressure is exactly what he has been advocating in the Free World in recent weeks. He has been asking free countries to pressure an African country, South Africa, to move faster toward democratic reforms.

Apparently Mandela sings a different tune when the pressure is on black African governments, as in Kenya.

The 71-year-old African National Congress deputy president was speaking in Kenya four days after violent clashes that followed government attempts to stop a pro-democracy rally. He said:

"What right has the West, what right have the whites anywhere, to teach us about democracy when they executed those who asked for democracy during the time of the colonial era?"

This attitude, expressed by a lionized black African leader, is not likely to encourage African autocrats, who lead the majority of African countries, to allow their fellow black citizens to enjoy political freedom.

CHRONOLOGY OF POLITICAL HARASSMENT

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. DYMALLY. Mr. Speaker, I bring to the attention of Members of Congress a chronology of harassment of certain Members of Congress by the Rainbow Lobby, the National Alliance Newspaper, and certain members of the media.

The National Alliance Newspaper attributes to a Dymally staffer negative statements about a Congressional Black Caucus member, Representative Bill Gray (D-PA). (August 22, 1986).

The National Alliance Newspaper attempts to show a rift in the Congressional Black Caucus by painting a picture of Members being at odds with one another over the issue of Haiti. (November 13, 1987 and December 11, 1987).

Representative Dymally, now Chairman of the Congressional Black Caucus refuses to schedule meetings with the Rainbow Lobby/the National Alliance Newspaper. (November 1987).

Representative Dymally disputes information provided to a Member of Congress, by the Rainbow Lobby about events in Zaire which took place during his visit to that country. (February 3, 1988).

The Afro-American newspaper (a weekly paper) using info. supplied from the Rainbow Lobby and the National Alliance Newspaper reports that Dymally received a $250 contribution from Maurice Templesman sent to the Dymally Campaign Committee. (February 16, 1988). Interestingly enough, Maurice Templesman described as a diamond magnate becomes the subject of a negative Washington Post front page story written by Jim McGee.

An individual listing himself as a Bob Shapiro requests financial disclosure information on Representative Leland. (February 18, 1988).

Representative Mervyn Dymally, Chairman of the Congressional Black Caucus issues a memorandum to the Black Caucus explaining the difference between the Rainbow Coalition and the Rainbow Lobby/National Alliance (Party) and pointing out the negative campaign being waged against some Members of the Caucus listing himself, and Representatives Leland and Fauntroy. Chairman Dymally said that this group has become a very divisive force, and that it should be declared persona non grata. (February 19, 1988).

The same Bob Shapiro requests financial disclosure inforamtion on both Representatives Leland and Dymally. (May 27, 1988).

Mile Klein writes in the National Alliance Newspaper that "two Congressional Democrats—Mervyn Dymally of California and Texas Mickey Leland, who have ardently opposed the cutoff of aid to Mobutu—are closely tied to individuals who profit handsomely from the Food for Peace program. (December 22, 1988).

Rainbow Lobby holds press conference "Zairegate" accusing Rep. Dymally of inviting Mobutu to Los Angeles. In attendance are major media reporters including the Washington Post, the Los Angeles Times, and Steve Askin a stringer who writes on African issues. (February 10, 1989.)

Steve Askin writes the first negative piece on Representative Dymally in Business Week, "Suddenly, The Business of Angola is Big Business." (May 1, 1989.)

Journal of Commerce publishes a series of negative articles on Representative Dymally focusing on the Food for Peace program. (June 15, 1989.)

Representative Dymally inserts into the Congressional Record information distinguishing the Rainbow Coalition from the Rainbow Lobby, and a report published by Political Research Associates detailing the origin of the Rainbow Lobby and the New Alliance Party. (July 26, 1989.)

The Lobby retaliates by filing an ethics complaint with the Committee on Official Standards of Conduct signed by Hazel Daren, Coordinator of the U.S.-Congo Friendship Committee. (September 7, 1989.)

Financial disclosure information on Representatives Dymally, Burton, Savage, and Leland are requested by Steve Askin. (April 17, 1989.)

Financial disclosure information on Representatives Dymally and Savage are requested by a Rich Sokolow (traced to the Rainbow Lobby and the New Alliance Party through an FEC refund). (June 28, 1989.)

Financial disclosure information on Representatives Dymally and Savage is requested by Melissa Mathis a researcher with the Washington Post. (July 24, 1989.)

An internal memo written by Rich (Sokolow) to Jackie (Salit), Cathy (Sadell), and Mike (Klein) documents how Rick Sokolow attempted earlier to interest Dan Morgan of the Washington Post with the Dymally story, who expressed interest, requested newspaper clips, and said that he would talk to Jim McGee. (August 4, 1989.)

Financial disclosure information on Representatives Dymally and Leland is requested by Dan Morgan of the Washington Post. (August 17, 1989.)

The Journal of Commerce publishes an article headlined "Activists Urge Probe of Dymally Conduct." (September 12, 1989.)

First critical article on Representative Dymally written by Jim McGee of the Washington Post appears on January 2, 1990.

Second critical article on Representative Dymally written by Jim McGee of the Washington Post appears on January 25, 1990.

Analysis of McGee's writings reveals a distinct racial bias. Described in the Rainbow Lobby's own memo as a "beat up on Black congressman specialist", McGee's articles predominantly target Black Members of Congress. Nine out of the 12 stories he wrote about Members of Congress were on Congressional Black Caucus members. Equally, three of the four members he targerted were Black; therefore making some of the 24-member Congressional Black Caucus, which as a whole comprises no more than 7% of the House of Representatives, the targets of 75% of his stories.

ESSAY WINNER

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. JACOBS. Mr. Speaker, the following is a winning essay submitted by David Marshall Wigington to the contest conducted by the Veterans of Foreign Wars of the United States.

It's no wonder the essay was a winner.

"WHY I AM PROUD OF AMERICA"

(1989/90 VFW Voice of Democracy Scholarship Program Indiana Winner David Wigington)

Although I am not much of an artist, I would like to paint a picture for you. The title of my painting is "Why I'm proud of America." Many reasons for my pride appear on this work, but four stand out from all the rest.

The first is represented on this painting by a book: not just any book, but an American history book. I am proud of America because of its great past. Never before has a country fought through so much adversity to rise to greatness. From its humble beginnings in a small building in Philadelphia to its domination of the modern world, I am proud of America. This portion of my painting is covered with tones of red which represent the 1,160,000 American soldiers who have died in our past to protect and defend American liberty. This portion of my painting is always fresh, for each day a new stroke of paint is applied by the Creator's brush which updates America's great past.

Overlapping the portion of my painting which represents the past, is a mass of faces. These faces, many of which are unknown, represent the second reason for my pride in America: people. These people, past and present, are made out of every color on my palette. They are the American race: red, yellow, black, and white. Nowhere else in this world can you find such cultural, racial and religious diveristy. 99% of America's population is made up of ordinary people just like you and me, but these ordinary people somehow find a way to combine and make one extraordinary nation. I am proud of America because of these people who are not afraid to stand up for what they believe, who always find a way to conquer their problems and fears, and who always join together in spite of any differences they may have.

Just to the right of the history book and the mass of faces is a large area of unpainted canvas. This blank space represents the future of our great nation and my third reason for being proud of it: its potential. that potential is found in the classrooms of the thousands of educational institutions in America. That potential is found in you and it is found in me. On July 4, 1776, King George III retired to his chambers after making an entry in his diary which read, "Nothing of significance happened today".

I am proud that those delegates in Philadelphia saw more potential in that day than King George. Every since that day when those Americans turned an ordinary British day into one which has changed the world, Americans have been known for their great deeds in times of little hope. Our inspiration is in the past, our duty is in the present, but our hope is in the future. I am proud of where America is today as a nation, but I am even more proud of where we have the potential to be tomorrow.

These reasons: Its past, its people, and its potential are all important to me, but the final reason I am proud of America is so important to me that I have taken my brush and painted its letters at the very top of my picture. There is an H for hope, and O for optimism, an M for miraculous, and an E for extraordinary. These words represent for my pride in America, and these letters, painted by my hand make up the one word which reveals why I an proud of America: because it is my home.

HONORING THE 134TH BIRTHDAY OF NIKOLA TESLA

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. NOWAK. Mr. Speaker, this year marks the 134th annivesary of the birth of Nikola Tesla, one of the world's greatest scientists and inventors. This anniversary was brought to my attention by Nicholas Kosanovich, the executive secretary and treasurer of the Tesla Memorial Society Inc., in Lackawanna, NY, located in the 33rd District of New York, which I am privileged to represent.

Nikola Tesla was born in July 1856 in what is now modern-day Yugoslavia. His natural talents in science and engineering matured during his 4 years at the Polytechnic School at Graz and 1 year at the University of Prague. After his graduation, he worked as a telegraph engineer for the government and it was here he made the first of many inventions, the telephone repeater. Furthermore, at this time he conceived the idea of the rotating magnetic field, which would eventually become the pinnacle of his efforts.

After short stays in Paris and Strasbourg he moved to New Jersey where he briefly teamed up with Thomas Edison, before a contractual agreement separated the two men and commenced a rivalry that lasted through out the decade.

The two men and their respective followers disagreed over the best way to transmit electric power. Edison believed it was best to use direct currents, while Tesla advocated the use of an alternating current system. In the end, the alternating current system was selected for the Niagara Falls power project and The Chicago World's Colombian Exposition, a major lighting project.

In the midst of tremendous success, Tesla remained quiet and modest. In 1912, Tesla refused to accept the Nobel Prize offered jointly to him and Edison, but he did accept the Edison Medal of American Institute of American Engineers in 1917. When he died on January 7, 1943, he left the world with hundreds of his fastastic inventions, such as the induction motor, the Tesla coil and fluorescent lights. He also laid the foundations for wireless transmission. Tesla died the holder of more than 700 patents.

At this point in the RECORD, I would like to insert the message New York's Gov. Mario Cuomo issued marking the 133d anniversary of Tesla's birth, a copy of which Mr. Kosanovich provided:

NIKOLA TESLA

This year marks the 133rd anniversary of the birth of the distinguished scientist and inventor, Nikola Tesla.

Born in 1856 of Serbian parents in what is now Yugoslavia, Tesla emigrated to the United States at the age of 28. He worked with Edison for a short time and then went into business for himself.

At that time many scientists did not accept Tesla's ideas or his solution to the

problems of applying alternating current in light and power systems. Working in his own laboratory, and with George Westinghouse of Pittsburgh, Tesla brought the Tesla system to market as the standard in electricity in the 20th century. Tesla also invented the principle of the rotary magnetic field embodied in the apparatus used in the transmission of power from Niagara Falls. Some of his other inventions included new forms of dynamos, transformers, induction coils, condensers, arc and incandescent lamps and other electrical apparatus.

It is fitting that the people of New York join with the members of the Tesla Memorial Society to recognize Nikola Tesla for his contributions to science and to his fellow man.

MARIO M. CUOMO,
Governor.

REASSESSING THE NEEDS OF THE ARMED SERVICES

HON. GREG LAUGHLIN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. LAUGHLIN. Mr. Speaker, as a result of improvement in world relations, the United States has reassessed the role of the U.S. Armed Forces in Europe. Therefore, many agree that significant reductions in the Active Duty component of the Armed Forces will occur, which will dictate a greater reliance on our Reserve component.

As a lieutenant colonel in the Army Reserves, I know the vital role that the Reserves have in our national defense. Today, I am introducing legislation along with HAMILTON Fish of New York to minimize defense costs and ensure the preservation of our total deterrent force.

Our bill amends the duty obligation for U.S. Military Academy graduates to reflect a minimum of 8 years of total service. However, each graduate would serve at least 4 years of active duty followed by up to 4 years of Reserve duty. This legislation is consistent with Active component promotion timing to the rank of captain. It allows for flexibility in terms of retention and separation of officers as the Army's needs dictate; and it supports the Reserve components by providing additional high-quality officer leadership in the company grades.

Mr. FISH and I believe that the 4 and 4 solution is a balanced approach, which is good for retention and recruitment of quality officers for the total force.

SALUTING THE SUNRUNNER

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. PURSELL. Mr. Speaker, I rise today as the proud Representative from the University of Michigan—home of that champion solar-powered racer, the Sunrunner.

Mr. Speaker, as many are aware, the 1,640-mile GM Sunrayce USA concluded yesterday. How fitting that the winning car was built and raced by a team from Michigan, the birthplace and capital of the automotive world. Let's face it, we know how to build cars in Michigan.

The 11-day race, which started at the Epcot Center in Florida and finished in at the General Motors Tech Center in Warren, MI, drew entries from colleges and universities across the Nation—32 teams in all. The top three finishers from this race will represent the United States this November in the 1990 World Solar Challenge in Australia.

According to the rules for the GM Sunrayce, each student team entered with its own design, its own crew, and its own strategy to win. And Mr. Speaker, after the long journey through America's heartland, I'm glad to report it was the conservative strategy which paid off.

Sticking to the slogan, "Slower Is Faster," the University of Michigan team demonstrated how slow but steady wins the race. The team paced themselves and recorded the best time for the overall race, 72 hours, 50 minutes and 47 seconds. The Michigan car benefited from superior design too, including a solar cell arrangement which also gathered light reflected from the pavement.

Aside from the immediate goals of winning, the race helps explore and demonstrate the advantages of solar power. This aspect of the race cannot go without emphasis. At a time when Members of this House are faced with decisions regarding power sources for the future of our Nation, the Sunrunner victory reminds us that solar power is a clean, nonexhaustible source of energy.

Mr. Speaker, as we pay tribute to the victors, I wish to mention the names of all those associated with the University of Michigan team: Joe Bartlo, Dave Bell, Justin Beres, Micael Blackman, Jeff Boyne, Matt Brown, Kevin Czajkowski, Susan Fancy, Paula Finnegan, Chris Gregory, Daniel Hauri, Bill Kaliardos, Harpreet Lavana, Chetan Maini, Mike McAlear, Rahul Naik, Dave Noles, Doug Parker, Jeffrey Pavlat, Scott Sbihli, David Smith, Frank Stagg, Andy Swiecki, and Cyril White.

To the University of Michigan team, Mr. Speaker, I extend congratulations best wishes for success in Australia this November. And to those Members of the House who represent the other 31 schools which competed, I say better luck next year.

SOLVING THE AIR NOISE PROBLEM—HOUSE REQUIRES ENVIRONMENTAL IMPACT STUDY

HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. GALLO. Mr. Speaker, I am pleased that New Jersey residents who have long suffered from the effects of the excessive air noise over our homes have finally won a victory in the House of Representatives. It is a small victory but a sign that people are finally listening to us.

As an original cosponsor, I strongly supported the amendment offered by Representative RINALDO. This amendment, which requires an environmental impact study of the east coast plan, gives the people of northern New Jersey an opportunity to be heard over the aggressive noise of large aircraft passing low over their heads.

Members of the New Jersey congressional delegation have been working in a bipartisan fashion for more than 2 years to get some action and, frankly, we have run into a stone wall.

This is not just a minor annoyance, Mr. Speaker. This is a recurring nightmare for thousands of people who have to keep their windows closed all summer and can't let their children play in their yards, because the noise is so oppressive.

Their lives have been changed dramatically as a result of a decision made in 1988 by the Federal Aviation Administration to send air traffic from all three major metropolitan airports directly over their homes at altitudes low enough that the wing markings are clearly readable from the ground.

This is not a problem confined to traffic from any single airport. It is a regional problem that involves flights from La Guardia and Kennedy Airports in New York, from Newark International Airport, and from traffic patterns used by flights from as far away as Logan Airport in Boston.

That 1988 FAA decision, known as the Expanded East Coast plan, was designed and implemented without the benefit of an environmental impact statement. In April 1988, six Members of the New Jersey delegation, including Mr. RINALDO, Mrs. ROUKEMA and myself, asked the General Accounting Office to review the plan and the decisionmaking process that was used to develop the plan.

The GAO concluded that an environmental impact statement should have been performed prior to implementation of the Expanded East Coast plan.

We have met repeatedly since that time with two successive Administrators of the FAA. I have personally pressed the case for rerouting these planes over the ocean repeatedly with the FAA and the Department of Defense, which hold joint review of the use of this airspace.

In spite of minor adjustments to the plan and promises of relief for the people of northern New Jersey, I am still getting a great number of angry calls and letters from people who are mad as hell and they aren't going to take it much more.

This amendment is the only way we have to require the Federal bureaucracy to hear the cries of our constituents for relief.

This amendment seeks to require an environmental impact statement, which frankly should have been done prior to the implementation of the Expanded East Coast Plan in February 1988.

We would not be pressing for this amendment as hard as we are today unless we had exhausted all other reasonable avenues to get relief for the people of northern New Jersey.

Mr. Speaker, the people of northern New Jersey are very angry and they are becoming very bitter because nothing has been done to give them relief.

I know I speak for all of the Members of Congress from northern New Jersey when I

say, we are sick and tired of talk and we want some action. Support this amendment so that we can get the action that we seek.

THE BUSINESS/EDUCATION CLEARINGHOUSE ACT

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. RINALDO. Mr. Speaker, today I am introducing legislation that provides an effective response to some of the serious educational problems we face in our Nation's schools. This legislation is necessary if we expect to improve the education and employment conditions of at-risk students.

As we enter the last decade of the 20th century, startling statistics confront us. Although we spend approximately $185 billion per year, 4.1 percent of our GNP, on public education, grades K–12, nearly 3,800 youngsters are leaving school every day. But it doesn't stop there; each year's dropout class costs the Nation about $260 billion in lost earnings and uncollected taxes.

Even when our schools do graduate young people and send them out into the work force, many are incapable of meeting the job qualifications. Increasingly, businesses are being burdened with an illiterate, unproductive workforce. But beyond the problems that businesses face recruiting skilled workers, disadvantaged school children who drop out of school are more likely than not to end up on unemployment or welfare. These at-risk youngsters also contribute to the high rate of urban crimes, drug abuse, and teen pregnancy.

My bill addresses the problems of illiteracy amongst disadvantaged children and encourages at-risk youth to stay in school and graduate on time.

The Business/Education Clearinghouse Act amends the Job Training Partnership Act [JPTA]. The act establishes a communications network that encourages State and local schools to organize partnership programs between students, community activists, schools, and businesses. Often, these types of partnership coalitions enter into contractual agreements or compacts. For instance, a student will enter into a "compact" agreement with his or her parents, the high school, and a corporate sponsor, who promises the student employment upon successful completion of an accredited high school education.

Not only do the compact participants establish a set of measurable objectives for students, but everyone benefits in some way from the program. Students who participate in a business/education partnership program attend school, improve grades, and graduate. Business, in return, is supplied with a skilled work force. And for the first time, parents, teachers, and the community itself are better able to follow a student's academic progress and react swiftly when a student is in danger of leaving school.

By amending the existing Job Training Partnership Act, the Business/Education Clearinghouse Act would attract and encourage cities to participate in partnership programs. To ensure the long-range participation of businessess, schools, and communities, this legislation would:

First, direct the State Job Training Coordinating Council [SJTCC] to provide informational assistance to those groups or organizations interested in establishing a Business/Education Partnership Program.

Second, design a comprehensive nationwide information network to encourage businesses, State and local government agencies, and community organizations to form partnership programs with elementary and secondary schools.

Third, designate an individual on the SJTCC, appointed by the Governor in each State, to provide information and direction to business leaders, school district superintendents, and community activists in establishing partnership programs.

Funds for this program will be provided through the existing JTPA title II—A Educational allotments to States. It is important to emphasize that the Business/Education Clearinghouse Act promotes partnerships within an existing network and provides opportunities for communities to consider the establishment of their own partnership programs.

LEGAL SERVICES PROGRAMS REFORMS

HON. HARLEY O. STAGGERS, JR.

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. STAGGERS. Mr. Speaker, I am pleased to join my colleagues, Mr. STENHOLM and Mr. MCCOLLUM, today in introducing a package of reforms to the Legal Services Program.

Having always been an advocate for the Legal Services Program, I am interested in seeing it be as strong a program as possible, meeting the needs of the economically underprivileged across the country.

It is for this reason that I join my colleagues in offering this package of reforms. I believe these changes will strengthen the program and help restore confidence in the good work which is being done by legal services attorneys.

Last year when Mr. STENHOLM and Mr. MCCOLLUM offered a reform package to the relevant appropriations conference report, I opposed the amendment because I had serious reservations about some of the provisions, and because I lacked confidence in the Board of Directors at the Legal Services Corporation which would have implemented these reforms.

This year significant improvements have been made in the package. I am submitting for the RECORD a brief summary of those changes. These improvements, combined with a new Board at the Corporation are sufficient for me to now lend my support to this effort.

I particularly commend my chairman of the Administrative Law and Governmental Relations Subcommittee. Chairman FRANK has moved on a reauthorization bill, with markup scheduled for tomorrow. I certainly prefer the authorization process over appropriations for making any changes in the law and I appreciate my chairman's good faith efforts in that regard.

MAJOR CHANGES MADE IN 1990 LSC REFORM LEGISLATION

SOLICITATION

The 1989 legislation restricted LSC-attorneys from personally soliciting clients for agricultural suits. The 1990 legislation requires LSC-funded attorneys to adhere to the same solicitation rules as all other attorneys, based on DR-2-104 of the ABA Model Code of Professional Responsibility.

PROCEDURAL SAFEGUARDS FOR AGRICULTURAL LITIGATION

The 1990 legislation requires that LSC-funded attorneys either exhaust administrative remedies or pursue alternative dispute resolution, compared to 1989 which required them to do both. While the 1989 language required that all plaintiffs be identified, the new language permits plaintiff anonymity through a court order.

LOBBYING AND RULEMAKING

This new provision removes a major loophole in the current lobbying restriction by eliminating the exception in the LSC Act which allowed LSC-funded attorneys to lobby legislatures and challenge agency rulemaking on behalf of eligible clients.

TIMEKEEPING

The 1990 bill makes it clear that LSC programs do not have to adopt a particular timekeeping plan or to perform functional accounting.

AUTHORITY OF LOCAL GOVERNING BOARDS

The 1990 legislation adds ABA Model Rule 6.3 which prohibits a board member from "knowingly" participating in a decision or action which would cause an attorney-client conflict of interest.

REGULATION OF NON-PUBLIC RESOURCES

The 1990 legislation makes it clear that LSC-recipients can use non-LSC funds to match money from the Older Americans Act and other government funds while stipulating that IOLTA funds, and other non-LSC funds, are covered by the same limitations and prohibitions as federal funds.

PROHIBITION ON DRUG-RELATED REPRESENTATION

The 1989 section earmarking funds for child support activities and anti-drug activities has been deleted and been replaced with language prohibiting LSC-funded attorneys from participating in drug-related proceedings, if the recipient's executive director determines drug-related activity is likely to be an issue.

LAWYER ACCOUNTABILITY

This new provision enables LSC to sanction individual employees of LSC-funded programs who violate the LSC Act, its regulations, or state codes of professional responsibility. This provides an alternative to defunding whole programs for the actions of individual attorneys.

ATTORNEY FEES

This new provision prohibits the recovery of attorney's fees from private parties. If the defendant prevails in a lawsuit the Legal Services Corporation is required to pay 90 percent of defendant's attorney's fees. If the amount recovered is less than ten percent of the amount of damages sought, the court may award attorney's fees to the defendant.

TIGHTER DOD OVERSIGHT NEEDED

HON. BEN NIGHTHORSE CAMPBELL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. CAMPBELL of Colorado. Mr. Speaker, if there is anyone not yet convinced that there are better ways of reducing the deficit than raising taxes or slashing social programs, I would recommend reading an article in the June 19, 1990, Washington Post entitled: "Memo Accuses Air Force of Ignoring B-2 Costs."

Mr. Speaker, this article is not for the weak at heart. If you have problems with high blood pressure, or have a thing for happy endings, then I suggest you read elsewhere. But if you want to see another example of why we need to take a serious look at Government waste and the Federal procurement process before we think about raising taxes, then I suggest you take a good look at this textbook example of DOD mismanagement.

A secret, 2-year-old memo from the Justice Department tells the entire story. According to the memo, the Northrop Corp., with the full knowledge of the Air Force, provided consistently inaccurate cost and scheduling information about the B-2 Stealth bomber that may cost U.S. taxpayers over $2 billion. While this sort of blatant attempt to fleece U.S. taxpayers should result in jail sentences for those Northrop employees involved in this fiasco, the Justice Department was unable to pursue false representation claims against Northrop because Northrop was acting with the full knowledge of the Air Force.

While I am frustrated by the Justice Department's continuing lack of interest in pursuing corporate criminals, whether they be defense contractors or S&L executives, most of my anger about this issue is reserved for the Air Force, and it is my strong feeling that someone over there ought to get a pink slip handed to them over this.

And while we're giving out pink slips, we ought to take care of the guys responsible for ordering the $999 pliers and the $421,000 underwater fax machines, the only use for which that I can see is to ask headquarters for a ride home when one of the Air Force's multimillion-dollar albatrosses drops into the ocean after an unforeseen mechanical failure.

Is it just me, or does something seem terribly wrong with all of this? Year after year we see well-documented cases of Defense procurement fraud, and year after year the Pentagon complains that it has sustained all the budget cuts that it can take. But what about its $50 billion slush fund? And how, after refusing for years to address the pressing problems of Government waste, can the administration really expect us to believe that raising taxes and continuing to underfund important social programs such as Head Start and Medicare is the only way to reduce our deficit?

Frankly, I don't buy it. We spend more on our military now than we did during the height of the cold war, and what do we have to show for it? Sure, we can out-fax any Communist dictatorship on the face of this Earth, and our capacity to unscrew aircraft bolts may make us the envy of the industrialized world, but what about our national defense? What about Trident missiles that flop around like wounded ducks, or Stealth fighters that miss their targets? Sure, they can penetrate radar-free airspace at night, but that may have more to do with the black paint than anything else.

Mr. Speaker, I have little patience for demands for tax increases or draconian budget cuts when it is clear that so many of our tax dollars are currently being wasted by lack of oversight in various Government departments. I urge Members of the House and Senate to take a good hard look at some of the proposals put forward to reduce Government waste before we ask the taxpayers to contribute to what is amounting to a bailout of a mismanaged executive branch run amuck.

TRIBUTE TO COMMEMORATE CAPTIVE NATIONS WEEK

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. BONIOR. Mr. Speaker, I rise today to announce the commemoration of Captive Nations Week at the Ukrainian Cultural Center in Warren, MI, this Sunday July 22d. This week marks the 32d commemoration of Public Law 86-90, which instructed "the President to issue a proclamation each year until such time as freedom and independence shall have been achieved for all captive nations." Although there have been reasonably fair elections in 7 Eastern bloc nations in the past few months, we must continue to remember the plight of those who still struggle for freedom and self-determination.

The people of Central and Eastern Europe have risked much in their courageous bid for freedom and independence. In these times of promise and possibility we are excited by the present reforms, however, we must remain vigilant. Though it has diminished, the Soviet military threat is still very real. The Soviet leadership must be made aware that intervention, or any type of interference in the captive nations' affairs, is not tolerable and will continue to damage their potential political and economic ties with the United States.

For far too many years, the blessings of freedom, liberty, and justice have been denied to the people of the captive nations. Now, with what appears to be a thaw in the long cold war, we should continue pressing the Soviet Union with respect to human rights. This is no time for the United States to waver in what has been our historical and traditional commitment to freedom and democracy.

One sign that the Soviets may be sincere about reform is that, unlike last year, legal guarantees of religious liberty are being put in place in a number of Central and Eastern European nations, as well as in the Soviet Union. Until only recently, the Soviet authorities have persistently sought to crush any form of religious practice. Presently there are several Western organizations beginning to assist in the rebuilding of a religious infrastructure. We are especially excited at this development but must insist that these efforts are not inhibited and that they are allowed in all the captive nations.

I am sure that one fact of particular interest to the members of the Ukrainian Cultural Center is that the new democratized Parliament of Ukraine has become the most recent Soviet Republic to declare its national sovereignty. Only this past Monday, Ukraine adopted a declaration of sovereignty pushing for self-determination and greater control of its natural resources.

As we bear witness to these unprecedented social and political changes, it is important to remember the many years of struggle. Without the persistent effort of many individuals, I believe the present liberalization would have never occurred. Captive Nations Week is important for reminding us of how fortunate we are, and for paying tribute to those on the front lines of the world democratic movement. I commend the Captive Nations Week Committee for its diligence in organizing this important event.

FREE GITOBU IMANYARA

HON. JOHN M. SPRATT, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. SPRATT. Mr. Speaker, last week, I sent a letter to President Moi of Kenya to protest the detention of a distinguished Kenyan journalist and attorney named Gitobu Imanyara. Mr. Imanyara founded and remains the head of the Nairobi Law Journal. He was jailed because he is an advocate for human rights and the rule of law. Apparently, the Kenyan Government found those ideas to be subversive and decided to place him in jail where he can be prevented from expounding on these dangerous principles. Mr. Imanyara is joined in Kenyan jails with at least 1,500 other political prisoners whose crime was to support democracy and human rights in Kenya. Kenyan forces are also responsible for the death of at least 22 other individuals who were killed during protests this month. Earlier this year, the Kenyan Foreign Minister was found dead under mysterious circumstances which the Government has termed a suicide and most others believe was a murder.

In my letter to President Moi, I asked a few basic questions about Mr. Imanyara's fate such as where he is being detained and what evidence exists, if any, to substantiate the charges against him. Since I sent my letter, I have received no reply and I frankly don't expect one any time soon. Since Kenya's birth, the United States and Kenyan Governments have had a long and close friendship. Kenya receives more United States foreign aid than any other sub-Saharan African nation. This year, it is slated for $46 million including $11 million in military assistance. The prospects for continued aid are very bleak and they ought to be. U.S. taxpayer money should not be going to governments which brutally repress their own citizens by denying them those fundamental human rights which Americans cherish. Unless the Kenyan Government immediately releases all political prisoners, in-

cluding Mr. Imanyara, and begins to respect the rule of law, the United States should consider sanctions, beginning with truncation of foreign aid.

EDUCATIONAL EXCELLENCE AT BALLARD HIGH

HON. JIM BUNNING

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. BUNNING. Mr. Speaker, in this body, we frequently discuss the shortcomings of education in our Nation as we search for solutions to this serious problem. However, we should never make the mistake of ignoring or overlooking the true success in our education system when they occur.

Five students from my district, who attend Ballard High School in Louisville, KY, recently provided us a very welcome success story for education in this country. Last month these high school seniors demonstrated extraordinary levels of knowledge, world-class wit and top-level technical expertise in winning the National Tournament of Academic Excellence in Orlando, FL.

Ballard High School's team, comprised of seniors Andy Colville, Daniel Frockt, Terran Lane, Ram Nagarajan, and Mark Roseberry, beat out teams from 40 States, from Guam and the Northern Mariana Islands in the 3-day competition to win the 1990 National Tournament of Academic Excellence Championship. I certainly believe that these five students, all of whom are national merit scholars, are to be commended for this outstanding accomplishment.

The team's coach, Mrs. Elaine Colley, and Ballard High School principal, Mrs. Sandy Allen, are to be congratulated for their efforts, leadership, and faith in their students which culminated in their becoming the national champions of this most prestigious tournament.

Each member of the team received a $2,000 scholarship, a computer, and a gold ring. Team members were also awarded the George Rogers Clark Award for outstanding contributions to Louisville, a key to the city, and June 28 was declared "Ballard High School Academic Team Day" in that city. Honors from Jefferson County and the Kentucky Board of Education are also forthcoming.

I think it fitting that these students, their families, their coach, and the high school principal also be recognized by this body of our Federal Government. I invite my colleagues to share in the pride I feel with the accomplishment of these outstanding students. They certainly proved that education excellence is possible in this Nation.

THE CONCORD

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. ROYBAL. Mr. Speaker, today I am pleased to recognize that hard work and sincere effort can succeed in overcoming abuse and mismanagement. Due to the constant efforts of a number of special individuals working with the city of Pasadena, an elderly housing complex was preserved as a viable senior citizen housing resource.

This victory comes after a long drawn out struggle that began when HUD approved the prepayment of the Concord-Pasadena. For 8 years the prepayment of the HUD loan created an environment where fear of dislocation of tenants, and escalating rents was constant. In 1982 I held a congressional hearing and introduced legislation to prevent future prepayments like the Concord-Pasadena. Eight years after the struggle began, the tenants, many in their eighties and nineties, and city officials were victorious.

On December 16, 1989, residents, local officials, past and present, and myself proudly rededicated this elderly housing complex.

The Concord has become a national role model for those trying to save the 300,000 low-income housing units this country may lose in the next decade. A comprehensive strategy to solve this problem has not been created, nor has a mechanism for funding new low-income housing units. Under an agreement with the Retirement Housing Foundation, a nonprofit sponsor, the city of Pasadena entered into a unique partnership. With their help and the use of funds from the city's fire and police retirement system, the city of Pasadena was able to purchase the Concord-Pasadena.

It would not be possible for me to recognize all of the people who contributed their time and concern, but I would like to mention a few very special people from the community and the city:

Active residents: Gordon Clements, Helen Goodrich, Naomi Haynes; city of Pasadena, board of directors; Mayor William Thomson, Vice Mayor Jess Hughston, Director Kathryn Nack, Director John Crowley, Director Rick Cole, Director Chris Holden; City Manager Donald McIntyre; development department, Director William Reynolds, Project Manager Gregory Robinson.

Retaining affordable housing is a critical goal for the country as the national housing crisis worsens. Saving the Concord has given communities all over the country incentive for saving their projects as well as creating new ones.

I would like to congratulate all the people whose hard work and valiant efforts saved the Concord-Pasadena.

LEGAL SERVICES REFORM PROPOSAL

HON. CHARLES W. STENHOLM

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 20, 1990

Mr. STENHOLM. Mr. Speaker, it gives me great pleasure to join my colleagues HARLEY STAGGERS and BILL MCCOLLUM in introducing our legal services reform legislation. I believe that our proposal will strengthen the Legal Services Program and ensure the maximization of its resources for the clients for whom it was created to serve.

First let me make it perfectly clear that I support Federal legal services, and I would not be a party of a legislative or any other attempt to abolish or cripple this valuable program for America's poor. The legislation that my colleagues and I are proposing would remedy some of the abuses in the program by a small group of misguided legal service providers.

This year's proposal is significantly improved over the 1989 MCCOLLUM-STENHOLM legal services reform package offered to the Commerce-Justice-State appropriation conference report. Even though last year's package lost by only seven votes, we reviewed our language and discoverd a few provisions which we could improve upon, most notably the agricultural provision. With the assistance of HARLEY STAGGERS, BILL and I made several changes in the reform package which we believe significantly improve the package.

Federal legal services has not been reauthorized since 1981. It has always been my belief that any meaningful reform of the legal services program should be considered before the committee of jurisdiction. Our purpose for introducing this legislation at this time is to encourage public discussion and to submit to the Judiciary Committee our package for their consideration. We have testified before that committee about our proposed reforms and we are eager and willing to cooperate in the reauthorization process.

Finally, on behalf of my two colleagues, I want to commend Chairman BARNEY FRANK for scheduling hearings and markup on this most important issue, and I want to assure the chairman of my desire to work within the committee process so that this year we will improve the program in a way that helps to ensure the stability and success of Federal legal services.

FDIC HEAD SAYS FUND IS UNDER STRESS

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday July 20, 1990

Mr. PEASE. Mr. Speaker, I call to my colleagues' attention a Washington Post article which appeared in last Monday's edition. The headline read: "FDIC Head Says Fund Is Under Stress." The article quotes FDIC Chairman William Seidman in a Sunday "Face the

Nation" appearance expressing his fears that the FDIC "would be in trouble" were the Nation to suffer a serious recession.

It appears that the deposit insurance fund, when viewed as a percentage of the total deposits it insures, is at a historically low point. The article points out that by the end of the year the FDIC will have less than 60 cents in reserves for every $100 in deposits it insures, less than half the cushion that Congress has recommended and "the lowest level of reserves in the FDIC's history."

The FDIC could probably weather a mild recession. By contrast, a severe recession, with a large number of banks going under, could cause serious problems. In short, the FDIC might run out of money with which to pay off depositors.

This unfortunate situation provides yet another reason why we need to reform our deposit insurance system. During the floor debate over the savings and loan legislation, I argued that our present system of unlimited deposit insurance was one major cause of the thrift debacle. Unlimited deposit insurance led to brokered deposits, with the big money chasing the highest interest rates, often located in the most poorly managed thrifts.

The strains that the FDIC is experiencing today also arise largely from our policy of ensuring multiple accounts of up to $100,000. This policy has created an enormous financial obligation for our Nation, one that is dangerous and unnecessary.

Last year, I introduced a bill, H.R. 1260, which would limit deposit insurance to $100,000 per person. I also tried, unsuccessfully, to offer my bill as an amendment to the Financial Institutions Reform, Recovery, and Enforcement Act of 1989.

Since that time, a consensus seems to have formed around the idea that we need to reform our deposit insurance system. The question is how. I'd like to urge my colleagues to join the debate, moving the discussions over deposit insurance reform into high gear. As our deposit insurance funds become less financially stable and the costs of the thrift bailout continue to grow, I contend that we can afford to wait no longer.

The Washington Post article follows:

[From the Washington Post, July 16, 1990]

FDIC Head Says Fund Is Under Stress

(By Jerry Kinght)

Federal Deposit Insurance Corp. Chairman L. William Seidman yesterday said the insurance fund that protects deposits in U.S. banks is "under considerable stress" and "would be in trouble" were the nation to suffer a serious recession.

An "ordinary recession" would not pose a threat to the banking system or the FDIC, Seidman said on CBS News's "Face the Nation." But "if it were a long, a deep recession, then we would be in trouble."

The deposit insurance fund, created after the Great Depression to restore confidence in the banking system, is "at a low point in history as a percentage of what it's insuring," Seidman said.

The FDIC insures deposits up to $100,000 in commercial banks. It is a separate fund from the one that insures deposits in the savings and loan industry, which experienced widespread failures in recent years as a result of adverse economic conditions, fraud and an excess of risky investments.

Seidman stressed that the nation's banks do not face the kinds of problems that led to the $300 billion rescue of the savings and loan industry.

"We can handle anything we can forsee right now," Seidman said on the program. "But if things come along, major failures that we're not able to foresee at this time, that would be another story."

"The system is under stress," he said, "there's no question about it and our insurance fund is under stress."

The U.S. economy has been growing slowly in recent months and economists fear that it could slip into a mild recession. But few economists anticipate the kind of severe recession that Seidman said would cause the FDIC serious problems.

During recessions, when the output of goods and services declines, there is an increase in the number of businesses, individuals and other borrowers who have trouble paying their loans on time or do not pay them at all. Most banks have sufficient reserves to absorb such losses.

But in a serious, long recession there might be so many companies going out of business and such high unemployment that a large number of banks would be unable to cope with loan losses. In such a serious economic downturn, there could be so many bank failures that the FDIC would run out of money ensuring that customers in those banks don't lose their deposits.

The Federal Reserve, the nation's central bank, Friday took steps to lower interest rates in an attempt to prevent even a mild recession.

Seidman's comments were his most negative public assessment of an issue that is lurking in the background of the growing political furor over the costly S&L debacle. The Bush administration and Congress are studying ways to revamp the deposit insurance system to prevent the kinds of abuses that caused a wave of failures in the S&L industry, the most costly financial scandal in the nation's history.

The General Accounting Office is nearing completion of a study of the health of the FDIC and by early fall expects to issue a report on the soundness of the insurance fund. "It's a concern and a valid one," said Robert Gramling, GAO's director of financial audits.

The FDIC has lost money for the last two years because of the worst series of bank failures since the Depression. It now has $13.2 billion to protect depositors in nearly all the nation's commercial banks.

The agency expects another $2 billion loss this year that will shrink its fund to only a little more than $11 billion, leaving the FDIC with less than 60 cents in reserves for every $100 in deposits it insures—roughly $1.9 trillion. That is less than half the cushion against losses that Congress wants the FDIC to maintain and the lowest level of reserves in the FDIC's history.

Economists hired by the Congressional Budget Office and the House Banking Committee to analyze the soundness of the deposit insurance system predict that to strengthen the fund the government will have to raise the premiums that banks pay for deposit insurance. They said the government might be forced to ask the taxpayers to pick up the tab for bank failures.

We are clearly at a point in which, in relatively short order, the taxpayers may have to make a contribution to the closure of insolvent banks," Stanford University economist Dan Brumbaugh, widely known in the financial industry for being one of the first to see the savings and loan crisis coming, said in an interview before Seidman's television appearance.

The House Banking subcommittee on financial institutions has commissioned a study of the soundness of the FDIC fund by Brumbaugh, Robert Litan of the Brookings Institution and James Barth of Emory University.

Litan and Brumbaugh warned Congress a year ago that banks have hidden losses that if made public would wipe out the FDIC's reserves. Professor Edward Kane of Ohio State University, a consultant on deposit insurance to the Congressional Budget Office, made a similar assessment.

Once you subtract expected losses from the FDIC's assets, "their net reserves are probably around zero," Kane said in an interview last week.

Rep. Frank Annunzio (D-Ill.), chairman of the banking panel that commissioned the study of the FDIC's soundness, plans to examine ways to replenish the insurance fund.

The FDIC insures all bank deposits of up to $100,000 by law. But when large banks get into trouble it pumps in enough cash to protect all depositors. The deposit insurance is financed by a small tax levied by the government on bank accounts, currently 12 cents for each $100 deposit.

The tax is described as an insurance premium, but the deposit "insurance" is not really insurance but a government guarantee that depositors will be paid if their bank fails, said banking consultant Bert Ely. Unlike conventional insurance, the deposit insurance premiums are not based on any mathematical calculation of how much it will cost to cover expected losses.

The premiums have historically covered all losses, but if the fund does not have enough money, the taxpayers must put up the money to keep the government's promise to protect depositors.

That is what happened with the Federal Savings and Loan Insurance Corp. fund, which ran out of money—leaving taxpayers to pick up an estimated $300 billion tab for the failure of hundreds of thrift institutions.

Although many banking experts disagree with their analysis, Kane and Brumbaugh contend that the depletion of the bank deposit insurance fund parallels the early stages of the collapse of the funds maintained by the Federal Savings and Loan Insurance Corp. to back deposits in savings and loan associations.

"We are in the midst of reliving the S&L crisis in the commercial banks," said Brumbaugh. "The stage we are in is about the same as 1984 and 1985 with the thrifts" when the problems at many savings and loan associations were far more serious than their financial reports revealed.

"We are moving down the same road" as the thrifts, said Kane, "but the road is not so steep and we are not so far along."

But FDIC officials and many private banking experts vigorously reject the comparison of the banking industry to the savings and loan industry.

"The thrift crisis is not a precursor to a bank crisis, the situation is very different," said Karen Shaw, head of the Institute for Strategy Development, a Washington consulting firm.

"The FDIC is a long way from a FSLIC-like problem. I don't subscribe to the theory that we have a crisis," said William Ferguson, president of Ferguson & Co., a Wash-

ington and Dallas firm specializing in analyzing bank finances.

Ferguson's firm provided much of the data on which Braubaugh and Litan based their conclusion last year that the FDIC is nearly broke. Ferguson said, "I looked at the same data and came to a different conclusion."

The most important difference between the bank and thrift situations, the analysis agreed, is that the three bank regulatory agencies—the FDIC, the Office of the Comptroller of the Currency and the Federal Reserve System—are far tougher than the Federal Home Loan Bank Board, which was considered so weak that Congress abolished it last year.

In addition to lax regulation, which allowed many savings and loans to make risky investments, the S&Ls were burdened with billions of dollars of low-interest mortgages on which they suffered huge losses when interest rates jumped after deregulation in the early 1980s.

FDIC officials challenge both the mathematics and the methodology of the studies suggesting the bank insurance fund is in trouble. Seidman has denounced previous research of Brumbaugh and Litan in congressional testimony and FDIC staff members have prepared a point-by-point rebuttal to comments made by Brumbaugh recently in the American Banker, the daily newspaper reporting on the industry.

"We disagree quite strenuously," said Seidman's deputy, John F. Bovenzi. "There's a big difference between concerns above weakness and stress on the system and a finding that it's insolvent."

Less than two months, Seidman said, "The decline in problem banks over the past year or so and fewer bank failures so far in 1990 suggest an improvement in the fund overall in 1990, provided no large bank failures occur."

But two weeks ago in a question-and-answer session following a speech, Bovenzi raised the possibility of another $2 billion drop in the fund this year. The $2 billion decline is "a possibility, not a prediction," he said in an interview Friday.

FDIC officials will not discuss their projections for bank failures this year, but the General Accounting Office is believed to be pressing the agency to set aside more funds to handle bank failures this year.

As Seidman stressed in the television interview yesterday, the fund has plenty of money to pay for all the bank failures now foreseen by the FDIC. The fund was never meant to be able to handle a repeat of the Great Depression, Bovensi said, but "I don't think anybody sees that happening now."

Before taxpayers would be called upon to pay off bank depositors, "our economy would be in such bad shape that would be the least of our problems," said Edward Yingling, a top executive of the American Bankers Association, the largest industry trade group.

Yingling said the bankers group believes Brumbaugh and Litan exaggerate the industry's ailments and has complained to Congress that they should not have been hired to research the soundness of the FDIC. By picking Brumbaugh, Litan and Barth, Yingling said legislators "are preordaining what the study will say" because the economists "have already testified that the FDIC fund is broke."

The ABA and two other bank lobbying groups—the Independent Bankers Association of America and the Association of Bank Holding Companies—said there is no need for additional increases in the premiums banks pay for deposit insurance. The premiums are already going up under provisions of the S&L cleanup law passed by Congress last year, from 8 cents for each $100 of deposits to 12 cents this year and to 15 cents next year.

The law says that if the bank insurance fund declines for two years in a row—as now appears likely—the FDIC can boost the premiums another 7.5 cents per $100 each year and can keep raising them until it builds up a reserve of $1.25 for each $100 of insured bank deposits. FDIC officials said they have not decided whether to raise the premium.

These rates are substantially higher than banks traditionally have paid. Until the early 1980s, the effective rate was less than 4 cents per $100.

SENATE—*July 23, 1990*

(Legislative day of Tuesday, July 10, 1990)

The Senate met at 12:30 p.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

The PRESIDENT pro tempore. As we reverence Almighty God, our Creator and our Heavenly Father, the prayer will be led by the Senate Chaplain, Reverend Dr. Richard C. Halverson.

Dr. Halverson, please.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

Gracious Father in Heaven, we unite our hearts in sympathy for Senator PRESSLER and his family in the loss of his father who died Saturday evening. Comfort those who grieve with the wonderful consolation of the Psalmist: "Yea, though I walk through the valley of the shadow of death, I will fear no evil: for thou art with me * * *"—Psalm 23:4.

"For promotion cometh neither from the east, nor from the west, nor from the south. But God is the judge: he putteth down one, and setteth up another."—Psalm 75:6,7.

"* * * For there is no power but of God: the powers that be are ordained of God."—Romans 13:1.

Eternal God, Lord of history, Ruler of the nations, we pray for the Senate of the United States, the most powerful deliberative body in the world, model for all nations, seeking to form democratic institutions. Protect this distinguished body of men and women, chosen by their peers to represent them and provide leadership to the Nation and the world. Protect the Senate from every influence, within or without, that jeopardizes its effectiveness and reputation. Rebuke those from within who, because of ambition or greed, would compromise the integrity of the Senate and bring it down to shame. Frustrate those from without who, because of self interests, would impose unjust and unfair pressures on public servants.

Sovereign Lord, rule in this place and in our minds and hearts, that truth and justice may prevail. In Jesus' name who is truth incarnate. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the standing order, the majority leader is recognized.

THE JOURNAL

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE

Mr. MITCHELL. Mr. President, this afternoon following the time for the two leaders, there will be a period for morning business not to extend beyond 1 p.m., with Senators permitted to speak therein for up to 5 minutes each. At 1 p.m. today, the Senate will resume consideration of S. 2830, the farm bill, and Senator GRASSLEY will be recognized to offer his amendment relating to rural safety education. Other amendments will be offered and debated today and rollcall votes are expected to occur today, although not prior to 6 p.m.

So for the information of Senators, in preparing their schedules for today, there are expected to be rollcall votes no earlier than 6 p.m. and sometime after that hour.

RESERVATION OF LEADER TIME

Mr. MITCHELL. Mr. President, I reserve the remainder of my leader time, and I reserve all of the leader time of the distinguished Republican leader.

The PRESIDENT pro tempore. Without objection, the time of the two leaders that is unused will be reserved.

MORNING BUSINESS

The PRESIDENT pro tempore. There will now be a period for the transaction of morning business to extend to the hour of 1 p.m. today, during which time Senators are permitted to speak for not to exceed 5 minutes each.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum having been suggested, the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Minnesota is recognized for not to exceed 5 minutes.

THE IMPORTANCE OF THE POPULATION GROWTH ISSUE

Mr. BOSCHWITZ. Mr. President, I read with great interest a recent article in the Washington Post, July 2, by Barbara Vobejda regarding the lack of attention paid by the United States to the world population problem. This article could not have been more timely, and I am inserting it in the RECORD in order that all my colleagues will be able to see it.

Ms. Vobejda's main point was that the issue of world population growth "has virtually disappeared from the public agenda." Indeed, I recently delivered a speech here on the Senate floor discussing the lack of attention given to this issue by both environmentalists and Congress alike. In light of the article in the Post, I thought that I would take this opportunity to reiterate some of my points.

The population problem truly lies at the heart of virtually all of our environmental problems. When I was born, there were 2 billion people on our planet. Now there are 5.4 billion people, and by the year 2000 that number will certainly exceed 6 billion, with the situation particularly acute in developing nations.

Each new person consumes additional energy and puts stress on resources and the world's ecological balance, and while people in the Third World use far less energy per capita than we do in developed countries, the practices in the Third World to scratch out a living are sometimes particularly harmful in the areas of deforestation and desertification. I chaired the panel on these subjects at the recent Interparliamentary Conference brilliantly organized and chaired by Senator AL GORE.

Yet the U.S. contribution to world population control program has declined over the past 5 years. Most of that and the lack of participation by the United States is due to the politics of abortion.

After the Interparliamentary Conference I sought out another Senator who expressed interest in the population problem. We agreed that together

we—who are on different sides of the abortion issue—should work to separate this issue from world population growth so the United States can become the lead player as it must if there is to be real progress. We must focus instead on promoting family planning, meaningful sex education and contraception.

The Washington Post is a powerful voice and Ms. Vobejda's article will be most useful in bringing this issue of issues to the forefront. I intend to help with that by delivering a series on the issue focusing as did Ms. Vobejda's article on different parts of the world.

I ask unanimous consent that the article by Ms. Vobejda be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, July 2, 1990]

AS GLOBAL POPULATION RISES, ATTENTION TO ISSUE IN U.S. DECLINES

(By Barbara Vobejda)

It has been a long time since Lewis Townsend, a local obstetrician, has heard a patient express any anxiety over world population. Some patients say they are limiting the size of their families for financial reasons; others, because of their age. But no one talks about doing her part for zero population growth.

"I heard 'zero growth' about 10 or 15 years ago," said Townsend. Now, "it's not a concern."

Two decades ago, overpopulation was widely perceived as an urgent global threat, a steady but volatile force fueling a host of other social, economic and environmental dangers. But today the issue has virtually disappeared from the public agenda, frustrating population specialists and environmentalists who argue that, if anything, the rapidly growing human population poses even more of a threat.

They point to several reasons for the diminished public concern, including a dramatic shift by the federal government in 1985 when the Reagan administration withdrew population-control funding from organizations it deemed had supported abortion in any country. The linkage to abortion has stifled efforts to control population internationally and chilled debate on the issue, these groups say.

Overpopulation also lost its immediacy because of the substantial decline in fertility rates in this country since the late 1960s, when rapid growth was cited frequently as a critical reason for American couples to limit the size of their families.

But while fertility is dropping in this and other developed countries, world population continues a steep expansion. Despite the link between population growth, pollution and resource depletion, environmentalists say the topic has been missing from the recent upsurge in environmental activism in this country.

"Public awareness about population issues has waned dramatically since the '60s," said Susan Weber, executive director of Zero Population Growth. She dated the change in attitude nationally to a CBS newscast in the early 1970s, when anchorman Walter Cronkite reported that fertility rates in this country had fallen below "replacement level."

"That was perceived as the end of our problems," she said. And as attention to the issue began to fade, the political climate of the Reagan and Bush administrations hastened the trend, she said. "All population birth control programs, even the notion that population is a problem," came under attack.

While the United States is still the major contributor to international population control, funding has dropped from more than $298 million a year in 1985 to about $256 million this year, according to the Agency for International Development.

Scientists do not agree on whether a crisis is imminent, but there is a consensus among demographers that rapid population growth, especially in certain "hot spots," is a serious global problem. And few dispute that the number of human beings on the planet is multiplying at breathtaking speed.

While world population in 1960 was just over 3 billion, there will be 3 billion people living in just the five largest countries by the turn of the century, and another 3 billion elsewhere around the globe.

Fertility rates have declined in about half of the Third World and virtually all industrialized countries. Globally, the rate of population growth has begun to decrease, from 2 percent in 1968 to 1.8 percent today.

Still, the current rate of growth means world population will double every 39 years. And the U.N. Population Fund estimated last year that world population—now 5.3 billion—would reach 14 billion before it stabilizes late in the next century. An earlier estimate said the stabilization would occur at 10 billion.

Numbers of such magnitude carry little meaning for the average American, however, and scientists hold a range of opinions on what conclusions should be drawn.

Most prominent among those who see disaster in the numbers is Stanford University biologist Paul Ehrlich, who launched the popular movement for zero population growth with his 1968 book, "The Population Bomb." In a new book published this spring with his wife, Anne, Ehrlich renewed his earlier warnings that overcrowding will lead to massive starvation and environmental catastrophe. Decreasing fertility in many industrialized countries should not bring complacency, he said.

"The biggest fallacy is that there is a population problem in Africa and India, but not here," he said. "It's not density, not numbers, it's what people do to the planet."

For example, the United States, with less than 5 percent of the world's population, produces more than 17 percent of the global "greenhouse" gases.

In his new book, "The Population Explosion," Ehrlich argues that couples in the United States should continue to limit their number of children to one, or at most two, because resource consumption is so much higher here.

"The birth of an American child is hundreds of times more of a disaster for Earth's life-support systems than the birth of a baby in a desperately poor nation," he writes.

At the other end of the spectrum are a handful of "pronatalists" who have issued admonitions that falling fertility in industrialized countries will lead to economic decline.

Economist Julian Simon, a professor of business at the University of Maryland, argues that population growth should be viewed as an economic stimulus because more people will mean greater innovation, production and market formation.

While the parameters may be defined by Ehrlich and Simon, the population debate is conducted elsewhere in more subtle tones.

"It's not as simply as either side would have you believe," said Michael Teitelbaum, a demographer at the Alfred P. Sloan Foundation.

"World population," said Teitelbaum, "doesn't mean that you're going to have a catastrophe next year. It doesn't mean you will have a world of catastrophes. But you could have some very serious problems in some countries and regions."

Demographers tend to focus on problems in south Asia and sub-Saharan countries. In Bangladesh, for example, 100 million people live in an area the size of Wisconsin.

Population-issue groups, which point to the political linkage between population control and abortion as a major barrier to addressing the problem spots, had hoped the election of George Bush would mean a change in policy. But Bush has continued to deny funding to organizations even for abortion referrals.

The decline of the U.S. fertility rate had little to do with overpopulation, according to experts.

Arthur Haupt, a population specialist at the Population Reference Bureau, said it is generally assumed that U.S. fertility fell—from 3.4 children per woman of child-bearing age in the early 1960s to 1.8 in the 1980s and 2 in the past year—because of the availability of contraceptives, higher educational levels among women, increased participation of women in the work force and other lifestyle changes such as delayed marriage.

Haupt suggested that the extraordinarily high fertility of the baby boom era may have been the reason for the attention devoted to overpopulation in the late 1960s.

Hundreds of Zero Population Growth chapters formed around the country, and Life magazine ran a cover story on the subject. The attention was heightened by the stark message in Ehrlich's "The Population Bomb," in which he declared that "the battle to feed all of humanity is over."

Ehrlich and others who have issued similar grim warnings have since been criticized as "doomsday theorists, and lingering skepticist created by that criticism may have further dampened public attention to population concerns.

Simon, for example, labled the warnings by Ehrlich and others as "nonexistent scares . . . every single prediction of the doomsayer has turned out wrong."

"Not as many died as we expected to die," Ehrlich said. But he defended his statement that "hundreds of millions" would starve, citing World Health Organization and U.N. estimates that between 10 million and 14 million people die each year from hunger and related diseases.

Alan Lopez, a statistician for the World Health Organization, said it is widely accepted that more than 14 million children under age 5 die each year worldwide, but a significant portion of those deaths are unrelated to hunger.

To assume that 10 million of the 14 million deaths are hunger related—as Ehrlich has done—is "taking the upper limit," Lopez said.

POPULATION PRESSURES IN THE NEAR EAST

Mr. BOSCHWITZ. Mr. President, I spoke recently in this Chamber on the link between the world population ex-

plosion and environmental degradation—and of my belief that the population problem lies at the heart of almost all of our environmental problems that we face today. Today I would like to examine that connection as it applies to the Near East.

With respect to the Near East, I am referring to 25 countries in northern Africa and western Asia, mostly Arab in ethnic origin and culture, with a population today of about 250 million. Their numbers, in other words, are about the same as those of the United States. But the similarity ends there.

The populations of those 25 countries are generally characterized by high fertility—about 5 children per woman. These countries have a very high rate of population growth—nearly 3 percent per year, compared to current growth rates, for instance, of 0.8 percent in our country, 0.4 percent in Japan, zero percent in West Germany, minus 0.2 percent in Hungary. A minus figure, by the way, means that total deaths each year exceed total live births.

These 3 percent population growth rates in the Middle East may not seem very dramatic at first hearing. But they translate into a doubling of population in these 25 countries in, on the average, about 25 years. The comparable number for the United States is 92 years.

Let us examine for a few moments the impact of these burgeoning numbers of resources, on economic development, and on the development, and on the daily quality of life of people in these countries. I am deeply concerned about these consequences.

First, sustained high fertility has led to a very young population in these countries. On average, more than 40 percent of the population in the Near East is under age 15. This creates a high burden on the working age population. It also severely taxes the ability of governments to provide adequate schooling, health services, and eventually, jobs for rapidly increasing numbers of children and young people.

Second, most of these countries are characterized by an arid climate. Rapid population growth has already resulted in per capita declines in arable land and usable water supplies for drinking, agriculture, and industry. Contention for land and water is a key underlying cause of much of today's strife in the Middle East.

Lastly, most of these countries are facing unplanned urbanization and very explosive growth in their largest cities. Approximately 50 percent of the population in this part of the world already live in urban areas. By the year 2025, this proportion will increase to nearly 70 percent. Cairo, to cite the region's most populous city, had 3.7 million inhabitants in 1960. Twenty years later, its population was almost 7 million. And, at current population growth rates, it will, unhappily, have close to 12 million by the end of this decade.

Why do I say "unhappily?" Because, even with all the hundreds of millions of dollars that our country, the World Bank, and other donors put into Egypt each year, we seem to consider ourselves very fortunate, very lucky indeed nowadays if Egypt's economic growth each year comes even close to the sheer growth of people—numbers that put ever increasing stress on both national infrastructure and natural resources, on its land, water, and air, on that proportionately very small fertile delta that precariously sustains most of Egypt's population.

The sheer size of a Cairo presents a situation for which we have no collective experience. Little precedent exists for feeding, sheltering, or transporting in a relatively poor country so many people in so dense an area, nor for removing their waste products or providing clean drinking water. The critical environmental degradation facing such cities will push to the limit their ability to sustain human life. And it is the urban poor who are the most vulnerable, the most subject to disease, starvation, and malnutrition.

The same phenomenon is, unfortunately, the case in many of the other countries of the Middle East. But there are some signs of improvement in parts of this gloomy scene, some rays of light.

The Agency for International Development provides significant population assistance in five Islamic Near East countries—Egypt, Morocco, Tunisia, Jordan, and Yemen. These programs have made some progress in improving access to family planning, increasing contraceptive use, and lowering fertility. In Tunisia, for instance, family planning is used by half of all women—and fertility has declined there by 25 percent in the last decade. In Egypt and Morocco, more than one-third of women today use contraception, up from less than one-quarter a decade ago.

But, obviously, a lot more needs to be done. Many challenges remain. Some have to do with local beliefs and customs. There's an urgent need to modify centuries-old attitudes. That a mother has to give birth eight, nine times, or more to ensure that half that number will survive until adulthood and provide needed farm labor. That family planning and the woman's ability to control conception will somehow reduce the husband's authority in his family. That family planning is unnatural.

Well, those attitudes are hard to change in the Middle East, and in most other developing regions of the world. But family planning is acceptable among many Islamic populations. The blocks are often sociological and cultural. AID's experience and that of other donors and researchers is, however, that change is possible, particularly if you can get the attention and public support of top leaders in the country and if you can provide an adequate network to make known and supply contraceptive devices.

Most Near Eastern countries still have official policies that are either neutral on the population issue or are pronatalist, that is, they intentionally favor having more children through provision of child allowances, tax incentives, or other means. AID and other donors will have to make the need for family planning an important part of their high level policy dialogs with leaders of those countries where burgeoning populations threaten to cancel out any fruits of economic development and bar for most people the possibility of a better life for their children.

The challenge is also one of financial resources. Demand for family planning services continue to grow. More funds are needed not only for contraceptive supplies, but also, of equal importance, for training and paying skilled local people, doctors, nurses, pharmacists, and other health care providers, who can enlighten their neighbors' consciousness on this subject and who can provide specific guidance and materials.

Mr. President, as I said in my remarks here a few weeks ago, I believe that AID needs and can effectively use more funds than the roughly $200 million they have requested for population programs this year. I will be working with some of my colleagues in this body to ensure some relatively modest, but important, increases for AID's population activities—but not at the expense of other AID programs. I look forward to your support.

POPULATION PRESSURES IN SUB-SAHARAN AFRICA

Mr. BOSCHWITZ. Mr. President, I make today a third statement about population because, as I have noted on the floor, there is a relationship between population pressures and environmental degradation in different parts of our globe.

I have just spoken about the problems of the Near East and North Africa, and now I wish to turn to the situation in sub-Saharan Africa.

The African countries south of the Sahara face an historic challenge. Never before have so many nations tried to modernize in the face of such extraordinary population growth. The combination of rapidly growing population and stagnating economies has made the issue of population and development in Africa one of the great unfolding dramas of our time.

The population of that region's 47 nations numbers over 500 million. It is

increasing by nearly 3 percent per year, faster than in any other region on Earth. According to U.N. estimates, nearly a billion persons will be added to Africa's population between 1990 and 2025.

Africa's population is growing rapidly because its birth rates are collectively the world's highest, about 6.5 children per woman. Any birth rate declines that have occurred have been proportionately smaller than declines in death rates.

Africa's population is extremely young, a result of the long history of high birth rates and, to a lesser extent, the more recent declines in infant and child mortality. According to U.N. estimates, at least 45 percent of the population is under age 15 in most African countries. The youthful age structure constitutes an economic burden because an exceptionally large share of development resources must go to meet the immediate needs of the young. Education, for example, commands 20 to 25 percent of government expenditures in many African countries.

Rapid population growth has had serious consequences for Africa's environment. It has contributed, for example, to deforestation and desertification, a particular concern of mine because of its relation to global warming.

Forests are being depleted at a disturbing rate due to encroachment of farm settlements onto forest land, and due to uncontrolled cutting, mostly for wood to be used for household fuel by poor people struggling to survive and feed their many children. In a country such as Niger, where only 1 percent of the land is forest, and the population of 8 million is growing at 3 percent per year, one can anticipate grave problems in the not too distant future.

In many countries, increasing numbers of people result in larger cattle herds, which lead to overgrazing on pasturelands, which leads, in turn, to erosion and desertification. These expanding herds also increase demands on increasingly limited water supplies.

Some experts think Africa is losing its forests at a rate of 50 acres per minute. At least 18 countries are facing acute firewood shortages. It takes a long time to replace a forest, 20 or more years. It takes a lot longer to replace topsoil that runs off due to erosion after vast amounts of trees are cut or burned—sometimes hundreds of years.

The consequences of rapid population growth are far-reaching. Rivers and lakes have died, due to serious overuse, silting from erosion, and pollution. Aquifers have been seriously deplenished. Some natural resources, like unique flora and fauna in the forest, can never be replaced. These losses of forests, arable farm and pasture lands, and water have seriously undermined the ability of many African nations to achieve sustainable development.

Most African leaders entered the 1980's with at best lukewarm attitudes toward developing population policies and programs. And most of them probably didn't think too much about the relationship between rapidly expanding populations and rapidly diminishing natural resources.

But attitudes change, as realities become more evident. By the end of the decade, throughout much of the region, a new, very favorable environment existed for population policies and programs designed to reduce growth. For example, in 1975 only four countries in Africa favored lower rates of population growth. Today, more than 30 countries do so.

The Agency for International Development supports and promotes voluntary family planning in many of its African programs. It encourages population growth consistent with the growth of economic resources and productivity. Its programs emphasize the advantages of family planning, benefits that make sense to me, and are beginning to make sense to many African leaders and to many more African couples.

These include the critical health benefits for mother and young children when women are able to limit or space their births, the decrease of illicit abortion through increased access to voluntary family planning services, and the decline of population growth rates to levels that can be supported by the economy and the environment.

Within the last 5 years, the first evidence of fertility decline within the region began to appear in three countries, Botswana, Kenya, and Zimbabwe. There, fertility has declined significantly. Contraceptive prevalence, especially of modern methods, has risen dramatically. In these countries, the governments support family planning, many women want smaller families, and the institutional structure exists to make contraceptives and health care available to the community.

Although these changes are important, they are representative of only a small proportion of the population of the region and considerable work remains to be done. For example, in Nigeria, the largest country in the region with nearly 120 million people—fully one-quarter of the population of all of Africa—women on average have more than 6 children, and only 1 percent of women are using effective contraceptives.

The World Bank has said of Africa:

> At no time in history has any group of nations faced the challenge of development in a situation of such rapid population growth.

In combination with stagnating economies, this imposing demographic reality has led African governments to adopt policies to reduce high fertility and high population growth rates. The 1990's will test the ability to implement new programs, increase contraceptive prevalence, and lower birth rates. The effort expended in confronting this challenge will determine if a new Africa can emerge in the 21st century, one free from hunger, disease, illiteracy, and poverty.

In 1989, AID projects provided $70 million in population assistance to 39 African nations. The needs are, in my view, greater than that funding level can handle. I will be working to try to get AID some additional funds for these crucial family planning programs, funds that won't have to be carved out of the Agency's other important development activities.

Mr. President, I am concerned that the United States has a responsibility, both a moral responsibility and a political responsibility, to help our African neighbors do something about their exploding populations. Keeping the population of Africa and other parts of the developing world at some reasonable levels will help prevent other kinds of explosions, and will help protect our precious natural heritage. I look forward to your support in this important endeavor.

THE BUDGET SUMMITEERS NEED AND DESERVE OUR SUPPORT: THE NATION NEEDS A GOOD SUMMIT AGREEMENT

Mr. BOSCHWITZ. Mr. President, the budget summit has been proceeding for many weeks now, and the results are certainly not clear. But I have been at least somewhat encouraged by the reports I have heard, including statements made in the public by some of the participants recently that the negotiators are finally getting down to business.

The PRESIDENT pro tempore. The time of the Senator has expired.

Mr. BOSCHWITZ. I ask unanimous consent, Mr. President, that I be granted another 1½ minutes.

The PRESIDENT pro tempore. Without objection, the Chair hears none, the Senator is recognized for an additional 2 minutes.

Mr. BOSCHWITZ. The negotiators must reach agreement on four basic points if their efforts will either be acceptable, as far as I am concerned, or accepted, in my judgment, by the majority of my colleagues.

The first agreement must be specific with respect to areas where spending will be constrained.

Second, it must be enforceable over several years and must, by fundamental reform of the budget process, protect, if not strengthen, the existing enforcement processes so that we cannot get back into this mess after we are freed from the specific constraints of the agreement.

Third, the agreement must not harm the national security; it should provide for a thought-out build-down of our defense establishment that maintains our deterrence and allows us to defend our vital national interests around the world. This includes, I would add, our vital assistance programs to allies who truly help us shoulder the burdens of being the world's leading democracy and force for stability, as well as our efforts to help developing countries control the growth of their populations and protect the environment we all share.

Fourth, any new revenues should be raised by means designed to stimulate growth. We can use tax policy to make the economy grow. A meaningful capital gains provision can increase GNP over 5 years by a total of 2.8 percent, increasing tax revenues by between $30 and $40 billion, according to Dr. Allen Sinai of the Boston firm "Economic Advisers."

For many years, I have supported constraints in all spending, other than that directed at helping the poorest Americans, so that it would increase at a rate somewhat less than the rate of inflation. Economic growth and inflation would drive government receipts up slightly faster than spending would increase. Combining some restraint in spending and economic growth means that we should be able to eliminate the budget deficit over just a few years.

With continued effort on the part of the members of the budget summit, Mr. President, we can achieve an agreement we can all be proud of, and that will help us achieve prosperity and security in the coming decades.

I ask unanimous consent that two articles on how economic stimulation can lead to additional revenues be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Times, July 18, 1990]

A BUM TRADE ON CAPITAL GAINS?

(By Warren Brookes)

Last week, the administration and Congress stumbled into gridlock over President Bush's desire to have a capital gains tax cut part of any budget deal.

On the one hand, Senate Majority Leader George Mitchell, Maine Democrat, insisted there be no capital gains cut without raising the top rate to 33 percent.

On the other hand Senator Robert Packwood, Oregon Republican, ranking member of the Senate Finance Committee and architect of the 1986 tax reform, said he won't accept such a trade, while the White House said without capital gains there will be no revenue agreement.

This may explain why the White House turned Vice President Dan Quayle loose at the Republican National Committee meeting in Chicago last Friday with some stakes-raising rhetoric:

"During the 1988 election President Bush and I campaigned across the country to reduce the capital gains tax to 15 percent, because we believe that small business and risktaking entrepreneurs are the motors of economic growth.

"Meanwhile, Governor Dukakis argued the case for income redistribution. The American people rejected that argument and gave us a resounding mandate. But today, nearly two years later, the Democratic congressional leadership have denied the voters that mandate. In fact, Congress' failure to pass the president's capital gains proposal last year is partly responsible for the current slowdown in economic growth.

"The fact is, ladies and gentlemen, a tax cut, the capital gains tax cut, not a tax increase is the single most important thing we can do for economic growth."

Mr. Quayle is absolutely right.

Ironically, his economic case was strongly endorsed the day before at a Joint Economic Committee hearing by Allen Sinai of the Boston Company Economic Advisers.

Mr. Sinai surprised his former liberal Keynesian colleague and JEC staff director Joe Minarik with a study projecting positive economic and revenue impacts of the full-scale 50 percent capital gains tax cut laid out by Mr. Bush in 1988 and now co-sponsored by Republican Senators Robert Kasten of Wisconsin and Connie Mack of Florida.

Mr. Sinai said that such a proposal would increase total GNP by 2.8 percent (or $155 billion in current dollars) by 1995. That's about 0.5 percent more GNP growth per year from present baseline projections. This is because the cut would raise total business investment by 1.3 percent per year, or 6.7 percent 1990–1995 (see table).

That in turn reflects Mr. Sinai's projection that the Kasten-Mack cut would lower the effective cost of capital, debt and equity by 4 percent a year and drive the stock market up 16 percent a year, a massive improvement in investment returns.

This would fuel a substantial 2.5 million expansion in jobs, or 500,000 new jobs a year. The result of all of this would not be a tax loss, as fraudulently argued by the Congressional Joint Committee on Taxation and others, but a substantial tax revenue increase of $30 billion to $40 billion over five years.

Since Mr. Sinai has been a harsh critic of Reaganomics, his projections are a reminder it's impossible to escape the evidence—namely, that taxing captial gains at high rates is both economically and fiscally self-defeating while cutting such rates as low as possible is not simply a "payoff to the rich."

Incidentally, because of the capital gains tax increase in 1986, for the first time in six years the share of the tax burden paid by the top 1 percent fell almost 2 percent in 1987, after soaring more than 42 percent from 1981 to 1986. Wealthy risktakers suddenly started pulling in job-creating horns and paid less.

The best proof: From 1982 to 1986 following the reduction of the capital gains rate to 20 percent in 1981, U.S. investment grew at an average annual real rate of more than 7 percent. Following the raise in capital gains taxes in 1986 to 28 percent, investment growth 1986–1989 fell by nearly 50 percent to 3.6 percent a year. From 1982 to 1986, new business formations rose 5.7 percent a year. Since 1986, they have actually fallen by about 3 percent.

A study by Federal Reserve economist Richard Kopcke in 1989 showed that raising the capital gains tax rate to 28 percent increased U.S. capital costs by 20 percent. He said, "This additional tax burden tends to increase the cost of equity financing and deter the growth of corporate enterprise."

There is no question that had Senator Mitchell not single-handedly thwarted the majority will of the Senate and the House last fall and blocked final passage of capital gains, the U.S. economy would be stronger today, the deficit would be far smaller and everyone but Democratic politicians better off.

Unfortunately, the administration has been too willing to trim its sails on this issue, cutting its original proposal from a 15 percent top rate to a 20 percent rate and raising the holding period for that best rate to three years. Precisely as they did this, the economic case for their proposal melted—so much so that both administration and Hill leaders are now considering abandoning the whole exercise unless the Democrats give up their demonic quest for raising income tax rates. Such a trade would be tragic, and lacks even a "fairness" premise.

As Sen. Bill Bradley, Democrat of New Jersey, told his colleagues in a recent letter: "Unfortunately many people believe—incorrectly—that taxpayers subject to the 33 percent rate [bubble] are being treated unfairly compared with higher income taxpayers. . . . In fact, the bubble does not reward the rich. On the contrary, it enhances the system's progressivity."

That is because the temporary 33 percent rate bubble is only a device to phase out a whole series of tax benefits to the very rich, including the personal exemption. In other words, the bubble, like so much liberal thinking, is a phoney issue.

Mr. Bush should go back to the people with the Kasten-Mack proposal, which stands on its own merits. It generates both economic growth and higher revenues and is likely the only proposal on the table that would actually cut the deficit.

Macro effects of a capital gains tax reduction

For all taxpayers, FY 1990–1995:	
Real GNP total change (percent)	+2.8
Per year (percent)	+.5
Employment total change (millions)	+2.5
Per year (million)	+.5
Business capital spending (percent)	+6.7
Per year (percent)	+1.3
Cost of capital (percent)	−18.9
Per year (percent)	−4.1
S & P 500 stock index (percent)	+112.8
Per year (percent)	+16.3
Total Federal tax revenues over 5 years (billions)	+$30–$40

WANT MORE MONEY, MR. BUSH? CUT TAXES

(By Alan Reynolds)

Those who spent the past week trying to divine the meaning of President Bush's words on taxes focused on one phrase. Early on—the first time the issue came up publicly—the president acknowledged a need for greater "tax revenues." Later, at the week's end, the president said that in his negotiations to solve the budget problem a number of things would be considered "including tax increases." The difference here between

"higher tax revenues" and "tax increases" is crucial. The important fact is that, the government's new posture notwithstanding, the two do not usually coincide.

One way to raise tax revenues, Mr. Bush's first stated goal, would be to cut the capital-gains tax. Ever since maximum tax rates on capital gains were increased by 62, after the 1986 reform, many more investors have preferred immediate interest income to possible future gains. Companies in recent years have catered to this preference by increasing their debt equity ratios through stock buybacks and leveraged buyouts. The result has been larger corporate interest deductions, and therefore smaller taxable profits.

A lower capital-gains tax would therefore raise corporate tax receipts by tilting the debt-equity decision back toward equity, while making it possible for credit-constrained small entrepreneurs to raise capital by selling stock. Interest rates would be held down by the reduced business demand for credit, as well as by the increased incentive for individuals to hold taxable bonds for capital gains, thus reducing the government's interest expense.

CAPITAL-GAINS ADVANTAGE

A lower capital-gains tax would also increase the pace at which capital gains were realized, raising revenues directly as well as through the increased economic growth arising from more efficient mobility of capital. It would bid up the value of assets subject to the capital-gains tax and thus raise the amount of taxable gain, move more ventures capital out of tax-exempt funds into the hands of taxable individuals, raise personal incentives to save and to take longer-term risks and greatly reduce the cost of the S&L bailout by raising the value of the thrifts' real estate and bonds. A lower capital-gains tax could shave tens of billions off the deficit.

As the chart shows, inflation-adjusted federal revenues have expanded at an unprecedented rate since fiscal 1983. Measured in constant 1982 dollars, tax revenues were nearly stagnant during the 1970s, hovering between $500 and $600 billion. Since 1980, real federal revenues have increased by more than one-third: Tax collections are about the same percentage of GNP as they were 10 years ago, but, thanks largely in the Reagan tax cuts, the U.S. economy is nearly one-third larger—largely because the 1980s were the years of important tax cuts.

If the government in 1960 had instead set out to increase taxes by one-third, average federal tax rates would have had to have been increased by one-third. It is hard to believe the economy could have grown at all in the 1980s under such an onerous tax increase, much less experienced, as it did, a huge increase in growth.

Even a seemingly modest increase in tax rates on incomes or sales can be self-defeating. In the short run, it can cause a recession. In the long run, it can slow economic growth. Yet the U.S. government's own budgetary accountants' revenue estimates from various increases in tax rates always assume that taxes do no damage whatsoever to the economy.

The Congressional Budget Office predicts, for example, that a one percentage point increase in the corporate tax rate would yield an extra $1.3 billion next year, on the untenable assumption that it would have no effect on corporate investment or employment. But if it really had no effect, then an extra $65 billion could be collected by simply raising the corporate tax rate to 84%. A $5 oil import fee is likewise supposed to raise $7.7 billion on the assumption that higher energy prices do no damage. If that made sense, we could raise $65 billion by imposing an oil import fee to raise prices to $60 a barrel.

Consider a less-extreme example, the $3.8 billion that is said to be available if the president and Democratic leaders opt for what is currently a popular "budget fix": Raising marginal tax rates on high-income families to 33% from 28%. This is proposed as a "trade" for a lower capital-gains tax, even though young professional couples with high salaries often have negligible capital gains, while people nearing retirement have large capital gains and small taxable incomes. Since tax reform made the average tax rate virtually the same as the marginal rate among the top-bracket taxpayers, an increase of 5 percentage points in marginal rates amounts to a brutal increase of nearly 18 percentage points in average tax rates. That increase would amount to a $10,000 added burden on a taxable income of $200,000.

To avoid that, though, affected taxpayers would hold more tax-exempt bonds and make greater use of the lower alternative minimum tax; many more salaried people would become self-employed; professionals would play more golf and retire earlier. The alleged $3.8 billion revenue increase, which assumes that people don't react to their taxes, would soon turn out to be an "unexpected" loss.

Raising the top rate to 33% could hurt the economy, and therefore the budget, in many different ways. The higher tax rate on interest income and dividends would raise interest rates and sink the stock market by reducing the demand for taxable securities. Those losses in the stock and bond markets would in turn damage the budget (through higher interest expense, lower capital-gains tax receipts, weak taxable sales and profits due to reduced wealth, etc.). The result of such a higher tax rate could easily widen the budget deficit by tens of billions of dollars for many years to come.

The alleged beneficial effect of higher tax rates on savings is another myth arising from static accounting. The whole idea assumes that higher tax rates would in fact yield higher revenues over time, that higher revenues would actually be devoted to reduced deficits and that increasing the government's revenue at the expense of the private sector would not reduce the private sector's ability or willingness to save. Not one of these assumptions is consistent with experience. Instead, the ability of private households and firms to save would be seriously undermined by higher tax rates on what people earn or buy, and the value of U.S. stocks, bonds and real estate would also be depressed by the reduction in prospective after-tax returns.

Actually, the U.S. has had some instructive expereince with trying to raise federal revenues by increasing the tax share of GNP, rather than by increasing GNP itself. The first major effort was in mid-1932, when individual income tax rates were roughly tripled. Revenues subsequently fell by 16%. The next experiment was the surtax of 1969–70. Interest rates rose sharply for many months after the higher rates were imposed, falling only as the economy was shoved into a recession that did not end until the surtax was removed.

MEASURING BY THE GNP

Then there were the unlegislated tax increases resulting from inflation and "bracket creep" in 1974–75 and 1981–82, when revenues once again declined with the contracting economy. In fact, federal tax receipts have never exceeded the current 19.6% of GNP since World War II without tipping the economy into recession. The option of attaining significant and sustained "tax revenue increases" through higher tax rates is a politician's illusion; it have never worked.

Couldn't the contractionary effect of higher tax rates be offset by an easier monetary policy? Not really. Even if higher tax rates generated more real revenue, which they do not, it makes no sense to argue that smaller deficits justify any easier monetary policy than would otherwise be appropriate. This amounts to saying that if the government sold fewer bonds, then it could safely print more money. But bonds and money are not at all the same. Higher tax rates would weaken the supply side of the economy, while an easy money policy merely stimulates spending or "demand." The result of that "policy mix" is always stagflation—witness Britain.

There is actually only one way in which real tax revenues can be significantly increased over the next decade, and that is the same way that real revenues were increased over the past decade—namely, by increases in employment, profits, capital gains and sales. That is why President Bush's proposed "growth incentives"—lower tax rates on capital gains—are not at all inconsistent with real and substainable "tax revenue increases." Higher tax rates, on the other hand, are inconsistent with growth incentive, and therefore with the preservation of the past decade's remarkable increase in real revenues.

(Mr. Reynolds is director of economic research at the Hudson Institute of Indianapolis.)

Federal tax receipts in billions of constant 1982 dollars

The PRESIDENT pro tempore. The Senator's time has expired.

Mr. BOSCHWITZ. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The point of no quorum having been raised, the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

NO NEW TRANSFER TAX ON SECURITIES

Mr. MOYNIHAN. Mr. President, as the distinguished Presiding Officer and other Members of the Senate will know, at one point this morning the Dow Jones average on the New York Stock Exchange had dropped 107 points. At that point a circuit-breaker program took effect, which halts trading for a temporary period when prices drop very sharply. This trading halt helps everybody get their wind and their perspective.

However, Mr. President, there is no doubt about the alarm that was evidenced in New York this morning. Mr. Chung Lew, who is the head trader at Kleinwort, Bentsen North America, is quoted in the Associated Press wire: "There was panic, without a doubt."

Panic. The situation of that panic, sir, calls to mind the situation on Black Monday, 2½ years ago, nearing 3, when the stock market went into a sudden free-fall. Before it was over, a trillion dollars in stock values had disappeared, the sharpest 1-day decline in the history of the New York Stock Exchange, an event that sent tremors around the world, as of course it would do.

I was in New York City, and in the course of that day I learned that one of the key events affecting investor behavior on Black Monday as it came to be known—the reference was to the 1929 crash—Black Tuesday was a little noticed tax measure which had been approved the previous Wednesday night by the Committee on Ways and Means. It was a measure offered by a Representative from North Dakota which limited the amount of interest charges that could be deducted for debt used in mergers and acquisitions. I think it is fair to say, sir, there was not any likelihood that this proposal would ever become law.

I would have been a conferee on the final version of any tax legislation. The Senate conferees would not have wanted it. I am not sure the House indeed would have wanted it once they'd fully considered some of the arguments against it. It was a measure of accommodation, and yet it cost the stock market a trillion dollars, which meant it cost every pension fund, every charitable foundation, every financial institution in the country and probably most in the world.

Efforts to say it would not pass, may have had some effect; they may not have. But by the time our reassurances were making their way onto the wires, as we say, the market had lost enormous sums of money.

A commission to study the crash was appointed by the President. It was headed by our now distinguished Secretary of the Treasury, Mr. Brady. He identified two triggering events: One was the announcement of an unexpectedly high merchandise trade deficit for August 1987, and the other was the rumor that a tax measure limiting interest deductions on merger and acquisition indebtedness might be adopted in the forthcoming reconciliation bill. It never became law. It was only rumor, but it was a rumor that cost $1 trillion.

I can report from conversations today that something very similar almost happened, and still could happen. The discussions going around financial centers are that the budget summit negotiations between the Executive and the Congress include consideration of a stock transfer tax of one-half of 1 percent to be imposed on securities trading on America's exchanges. This will raise—I have heard myself a range—$7 billion the first year and $11 to $12 billion in the fifth year out. So we have something like $50 billion or so to be gotten in the 5-year package that is being considered—$50 billion. But look at what the stock markets have lost in value today alone. And one of the events that may have triggered it, Mr. President, is a very fair-minded but forceful article in this morning's Wall Street Journal, on the editorial page, by Mr. Joseph Grundfest, who was formerly a Commissioner of the Securities and Exchange Commission, now a professor at Stanford Law School. It is entitled, "The Damning Facts of a New Stocks Tax."

Mr. Grundfest makes two points.

First of all, he makes the point that this tax is, for practical purposes, as difficult to collect as a tax could be. The millions of transactions, the endless regulations, the elusive nature of many of these activities is just a nightmare from the point of view of the IRS. But he also said this should not be the primary concern because the real effect will be to send stock trading abroad rapidly: abroad to London, abroad to Tokyo. It seems like a small sum of money, a small rate of taxation. It is nothing of the sort. It is a curious fact.

Mr. Grundfest cites an article in the Financial Times of London which says, "City Sees Advantage in U.S. Levy on Volume." The Financial Times piece says "If the U.S. Administration decides to go ahead with a securities turnover tax, it will have strong support in the City of London."

And why ought they not?

The Swedes imposed such a tax, I am informed by Mr. Chris Finn of the American Stock Exchange. The Swedes did this on an options exchange in Stockholm and the exchange promptly moved to London. There are, indeed, taxes on stock transfers in other countries. Almost every country in the world which has such a tax, that is a significant trading nation, is proposing to abolish it. Only the United States proposes to add it, or is considering doing so.

The fact that we are considering this arises in the context of the President's statement that everything should be on the table. This idea is on the table.

In contrast to Professor Grundfest, Prof. Lawrence Summers of Harvard University proposes in this morning's New York Times that we indeed impose a stock turnover tax. The New York Times says yes, the Wall Street Journal, no. They are both published in New York City. Barron's this morning says there's a 50/50 chance that a securities transaction tax will pass. The stock market was down 107 points before people went to lunch.

The point Mr. Grundfest makes very carefully is that the real tax is on the people who are taking part in pension funds, in mutual funds, who depend on charitable foundations, where the real costs of transactions will be very real. It sounds like a small tax: 20 cents on a $40 share. But the stock broker's price for that transaction will be about 5 cents. In effect the cost of transactions goes up by a factor of 400 percent.

I will read the concluding paragraph of Mr. Grundfest's statement. He says:

> Perhaps the best short criticism of a transaction tax was presented to the Senate Government Affairs Committee in January 1989:
>
> A stock transfer tax has no evident justification. It could cause distortions in the financial markets and could cause many investors, particularly institutions, to shift their equity trading away from organized exchanges and to foreign countries. Who—

Mr. Grundfest asks—

> Should have analyzed the issues so succinctly and so well? Only the head of the Office of Management and Budget, Richard Darman. Need we say more?

Mr. President, I hope my remarks are heard in New York, in Chicago, and elsewhere. This tax must not pass. We ought to stop even talking about it. One certain useful outcome of our summit would be for them to issue at the earliest possible date a statement they are not going to consider this self-destructive and dangerous proposal. They are not going to take this self-destructive and dangerous act.

Mr. President, I ask unanimous consent that Mr. Grundfest's article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, July 23, 1990]

THE DAMNING FACTS OF A NEW STOCKS TAX

(By Joseph A. Grundfest)

A decision has apparently been made to raise revenues through new taxes. The question facing Congress and the administration now is whose ox to gore and where to gore it. Needless to say, ox-goring is never pleasant or riskless. But, if you're going to gore, you should at least do it intelligently. And there lies the rub.

Budget negotiators are reportedly toying with the idea of a securities transfer tax

that would levy a fee of up to 0.5% on sales of stocks, bonds, futures and other instruments, with the exception of Treasury securities. The hope is that this tax will raise billions, while reducing volatility in financial markets. There is only one problem with this plan. It won't work.

In the course of its failure, this tax is likely to destroy part of the U.S. financial market, enrich foreign competitors, increase the cost of capital for U.S. firms, drive down U.S. stock and bond prices, hurt small investors and increase volatility in capital markets.

Let's march through the logic. The transaction tax has strong support from the British financial services sector. London's Financial Times led its coverage of the proposal with the headline "City Sees Advantages in U.S. Levy on Volume," and explained that "if the U.S. Administration decides to go ahead with a securities turnover tax, it will have strong support in the City of London."

The British are excited about the tax because, if it is set at a high enough level, it is certain to drive billions of dollars to London. It is easy for traders to shift their activities to any market via a phone line and a fax machine. A meaningful financial transaction tax in one jurisdiction can drive business to other, lower-tax jurisdictions in the shake of an electron's tail.

The natural bureaucratic response is to write rules that would gather the tax regardless of where the relevant transaction takes place. But even bureaucrats who might be charged with this Herculean task know they would fail.

The Congressional Budget Office recognizes, for example, that the tax "would be difficcult to administer." The CBO allows that "it would be difficult for the IRS to audit these transactions, so compliance would be low." The staff of the Joint Committee on Taxation joins in the chorus, explaining cautiously that it "may prove difficult to exert jurisdiction over foreign situs transfers," and that "transactions by U.S.-owned foreign intermediaries could present significant avoidance possibilities. Broadening the base of the tax to include such intermediaries may entail modifying tax treaties."

English translation: If the government adopts this tax it won't be able to collect a big piece of it. Even an army of bureaucrats producing a mind-numbing blizzard of regulations would fail. An informal survey shows that tax lawyers have already come up with several ideas for legally avoiding the tax. One example involves setting up investment vehicles offshore. U.S. taxpayers would hold interests in these vehicles for relatively long periods of time, but the vehicles' portfolios would trade rapidly in newly designed foreign securities that would be carefully structured to mimic highly taxed U.S. stocks and bonds. To reach these transactions, American authorities would have to tax foreign entities trading foreign securities in foreign markets. Good luck.

History unfortunately demonstrates that the government has the gumption to embark on such pointless ventures. Recall the Interest Equalization Tax adopted during the Kennedy administration and the baroque set of regulations designed to prevent capital flight in connection with that tax. That ill-fated experiment created the Eurodollar market—a market that is today the backbone of Europe's financial services industry.

Better yet, compare the American plan to what's going on overseas. Britain is now eliminating its transaction tax, as are West Germany and the Netherlands. Pressure is building on French and Swiss authorities to abolish their transfer taxes. The Swedish transfer tax was recently abolished after resourceful Swedes successfully transferred much trading to London from Stockholm. The U.S. is, at the moment, the only nation in the world thinking of bucking the trend by raising transaction taxes.

But suppose the inevitable doesn't happen, and the U.S. adopts a transaction tax that raises billions of dollars and doesn't drive business offshore. Is that the end of the matter? Hardly.

To start with, it is important to understand that a 0.5% transaction tax looks "bigger" to the world's capital markets than a 0.5% sales tax looks to consumers. On a $40 share of stock, a 0.5% sales tax amounts to 20 cents per transaction. Institutions, however, pay as little as 5.3 cents per share in brokerage fees. For these investors, a 0.5% tax on a $40 transaction would almost quadruple brokerage costs. The tax is even costlier for those in foreign-exchange and other markets that are more liquid than the U.S. stock exchanges. Consider transaction costs in the government securities industry, where primary dealers can earn as little as $312 on a $1 million bond transaction. A tax of 0.5% on $1 million amounts to $5,000—16 times the primary dealer's income on the trade.

There's another way a tax on financial transactions differs from a consumer sales tax. A sales tax is paid once, at the point of consumption. In contrast, a transaction tax is like a diamond—it is forever. It is paid again and again, every time a security is traded. To adjust for this compounded transactions cost, markets are likely to reduce the current price of all financial instruments subject to the tax. The Congressional Research Service estimates that such a tax would cause at least a 9.3% drop in the value of the stock market.

It seems clear that the administration also understands the harm its proposals can do. Notice that the proposals floating around Washington all exempt federal debt securities from the tax—so that the price of Treasury securities won't fall while other prices decline. But why would we want to raise capital costs for the private sector while effectively subsidizing federal debt creation. Sauce for the goose seems not to be sauce for the gander.

DISAPPOINTING REVENUE

As for those who believe the tax will raise substantial revenue, they are likely to be disappointed. One of the axioms of tax economics is that you should try to tax behavior that won't change much in response to the imposition of the tax. Here, the government is considering a tax on one of the world's most quickly moving targets. Even absent forcing migration, the imposition of the tax will reduce the volume of trading and lower value of the instruments traded, thereby reducing the Treasury's take.

The bulk of the tax burden is likely to fall on a silent but solidly middle class group of investors whose wealth is invested in pension funds, mutual funds, insurance companies and other collective investment vehicles. It will also weigh on charitable foundations and educational institutions, which will see the value of their endowments decline and the rate of return on their assets decrease. Hard hit too will be small investors who want to buy and sell but don't have the means to make sophisticated trades offshore. This is a middle-class tax that will be paid out of middle America's pockets. The burden won't fall on Wall Street fat cats.

To be fair, I must mention that there is a theory popular among some economists that low transaction costs lead to "trend-following" trading rules that exacerbate market volatility and promote excessive speculation. In theory the transactions tax will slow this type of trading, diminish speculation and reduce volatility.

CREATING A CHOPPY MARKET

The trouble with this theory is that it is at least as speculative as the speculation it hopes to drive from the market. As the CBO has noted, "The October 1987 crash seemed to be no less severe in Japan and the United Kingdom despite the existence of [transaction taxes] in both."

The anti-volatility argument also seems to fall apart once it is cast in the real world. If traders are able to engage in portfolio insurance in foreign markets, and if international pricing mechanisms transmit that selling pressure to back to the U.S. (in larger, more discrete "chunks" designed to avoid the cumulation of transaction tax payments), then the U.S. will still experience the price effects of portfolio insurance emanating from abroad.

Indeed, because the transaction tax will have to be paid by all investors—not just trend-followers, speculators and other vermin—it could well make the markets "choppier." Investors would be loathe to trade until markets have moved far enough for or against their positions to make it worthwhile for them to bear transaction tax costs.

Perhaps the best short criticism of a transaction tax was presented to the Senate Government Affairs Committee in January 1989: "A stock transfer tax has no evident justification. It could cause distortions in the financial markets, and could cause many investors, particularly institutions, to shift their equity trading away from organized exchanges and to foreign countries." Who could have analyzed the issue so succinctly and so well? Only the head of the Office of Management and Budget, Richard Darman. Need we say more?

(Mr. Grundfest, a former commissioner of the Securities and Exchange Commission, teaches at Stanford Law School.)

TIME FOR PROGRESS ON CYPRUS

Mr. KENNEDY. Mr. President, last Friday marked the 16th anniversary of the Turkish invasion of Cyprus and the illegal occupation of the northern part of the island which continues to this day.

It is time for all sides to redouble their efforts to bring about a prompt and peaceful resolution of this crisis. Unfortunately, over the past year, the intransigence of the Turkish Cypriots has continued. They have refused to negotiate in good faith with U.N. Secretary General Javier Pérez de Cuéllar and President Vassiliou of Cyprus. They appear to be feigning interest in negotiations as part of their strategy to maintain the status quo, which is unacceptable.

In his most recent report to the Security Council, the U.N. Secretary

General described his frustration with the lack of progress toward a solution. I continue to believe that the best hope for lasting peace in Cyprus lies with the efforts of the Secretary General. I urge the Bush administration to give higher priority to supporting these efforts, and to impress upon the Government of Turkey the importance of achieving a just and expeditious settlement of this crisis.

TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,955th day that Terry Anderson has been held in captivity in Beirut.

I would note also some important work being done on behalf of all the hostages by the Journalists' Committee to Free Terry Anderson. The committee has begun a campaign urging the public to send notes to President Bush to remind the administration that we cannot stop caring about the hostages and that we must contiue to press for their freedom.

The message on the committee's postcards reads:

A nation that chooses not to pursue freedom for an innocent captive resigns its own freedom. Those who choose not to listen will themselves cry out and never be heard.

Indeed. The ordeal of the hostages and their families is our ordeal as a nation. We cannot rest easy until it is over.

Mr. President, I ask unanimous consent that an AP wire story describing the committee's efforts be printed in the RECORD at this point.

There being no objection, the story was ordered to be printed in the RECORD, as follows:

POSTCARD CAMPAIGN SEEKS RELEASE OF U.S. HOSTAGES

(By Diane Duston)

WASHINGTON.—Organizers of a postcard campaign seeking the release of U.S. hostages in Lebanon are asking the public to send a new wave of cards to the White House in hopes of bringing home the remaining six American captives.

The first campaign in which 450,000 postcards were mailed to President Bush was started last year to show the administration that the public cares about the hostages and wants them released, said Anne Zickl, who is running the campaign for the Journalists' Committee to Free Terry Anderson.

Anderson, the Associated Press' chief Middle East correspondent, was taken hostage March 16, 1985. He has been held the longest of the six Americans and 10 hostages from other countries.

Zickl said White House statements about the hostages changed after the first postcard camapign began.

"From that time on, the administration has been saying what the Reagan administration never said that we will talk to anyone to bring about the release of these innocent people," she said.

"We do believe that the heightened awareness across the country helped bring about the release of (Robert) Polhill and (Frank) Reed," she said.

Reed, director of the Lebanese International School, was freed April 30 after 3 years in captivity. Polhill, assistant professor at Beirut University College, was held almost 2 years before being released April 22.

Zickl said the idea for the postcard campaign started with a journalist committee member who heard a State Department official say the American people didn't care about the hostages.

That's not true, said Zickl.

"The American people are not passive on issues of human rights if they are informed," she said. She said that once the campaign started getting publicity, she couldn't answer the telephone fast enough.

"I had people call me and say we didn't even know those people were still there," she said.

The new campaign began July 4. The postcard carries photographs of the hostages with the message:

"A nation that chooses not to pursue freedom for an innocent captive resigns its own freedom. Those who choose not to listen will themselves cry out and never be heard."

A note to Bush on the card urges him to intensify his administration's efforts to win freedom for the six U.S. hostages.

Besides Anderson, the remaining hostages and dates they were kidnapped are Thomas Sutherland, June 9, 1985; Joseph James Cicippio, Sept. 12, 1986; Edward Austin Tracy, Oct. 21, 1986; Jesse Turner and Alann Steen, both Jan. 24, 1987.

The committee includes journalists from the broadcast and newspaper industry, including network anchors and national news executives.

The postcards are being distributed by the journalists' committee at a cost of $14 for 250 cards and can be ordered by calling or writing Anne Zickl, P.O. Box 652, Batavia, N.Y. 14021, 716-343-6198.

CONCLUSION OF MORNING BUSINESS

The PRESIDENT pro tempore. Morning business is closed.

FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT OF 1990

The PRESIDENT pro tempore. Under the order, the Senate will resume consideration of S. 2830, which the clerk will report.

The legislative clerk read as follows:

A bill (S. 2830) to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes.

The Senate resumed consideration of the bill.

Pending:

Bradley amendment No. 2314, to extend the current sugar program for five years and decrease the loan rate from 18 cents to 16 cents.

The PRESIDENT pro tempore. Under the order, if the Senator from Ohio will withhold, Mr. GRASSLEY is to be recognized at this time to call up an amendment.

Mr. GLENN. I yield the floor to the Senator from Indiana.

Mr. LUGAR. Mr. President, I thank the Senator for yielding. Let me mention that Senator GRASSLEY will not be present for a few moments. In view of that, the managers of the bill would like for other business to proceed. I understand that the Senator from Ohio is prepared to do that. We would favor his proceeding.

The PRESIDENT pro tempore. Without objection and without prejudice to the Senator from Iowa [Mr. GRASSLEY] the Senate will proceed to consider the bill, during which time other Senators may be recognized.

Staff will please take seats.

The Senator from Ohio is recognized.

PRIVILEGE OF THE FLOOR

Mr. GLENN. Mr. President, I ask unanimous consent that Charlene Waggoner, an AAAS congressional science and engineering fellow assigned to my office, be granted the privileges of the floor during the Senate's consideration of S. 2830, the 1990 farm bill.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. GLENN. Mr. President, Senator DASCHLE has an amendment that he will be prepared to offer. I am here in support of that amendment. It involves a matter I have been involved in for a number of years when agricultural legislation has been before the body.

I understand Senator DASCHLE is on the way, and until he arrives, unless there is other business, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DASCHLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENT NO. 2325

(Purpose: To earmark a portion of the amount appropriated for the Agricultural Research Service for research that has the goal of increasing demand or utilization of farm and forest products)

Mr. DASCHLE. Mr. President, I have an amendment at the desk, and I ask for its immediate consideration.

The PRESIDENT pro tempore. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from South Dakota [Mr. DASCHLE], for himself, and Mr. GLENN, proposes an amendment numbered 2325.

Mr. DASCHLE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 661, line 2, insert after "1995" the following: ", and not later than October 1, 1993, and for each fiscal year thereafter, not less than 20 percent of the amount appropriated in each such fiscal year under this subsection shall be used for research that has the goal of increasing the demand or utilization of farm or forest products, with special emphasis on the development of new nonfood uses for traditional commodities and the development of alternative farm and forest products.".

The PRESIDENT pro tempore. First of all, the Chair should state the time of this amendment is limited to 3 hours to be equally divided between the mover of the amendment and manager of the bill, that being the usual form.

However, if the manager of the bill supports the amendment, then the time in opposition thereto is controlled by the minority leader or his designee.

Does the Senator from Oklahoma [Mr. BOREN], support the amendment?

Mr. BOREN. The managers of the bill, I understand, will support the amendment on both sides of the aisle; and the distinguished acting minority leader, I presume, controls time on that side.

The PRESIDENT pro tempore. Under the rules, the usual form means that if the manager of the bill supports the amendment offered, then the minority leader or his designee controls time in opposition thereto.

Therefore, Mr. LUGAR, being the designee of Mr. DOLE, will control the time in opposition thereto.

The Senator from South Dakota, [Mr. DASCHLE].

Mr. DASCHLE. Mr. President, I yield myself such time as I may consume.

The PRESIDENT pro tempore. The Senator is recognized for such time as he may consume.

Mr. DASCHLE. Mr. President, I am very satisfied with many of the aspects of the research title. We have made tremendous improvements with regard to ground water, sustainable agriculture, global climate change, and improved financial commitment for certain aspects of research. From a financial point of view, in particular, this bill represents a significant new commitment to research, and for that I am especially pleased.

Again, as I did last week, I should cite the contribution made by the ranking minority member of the Research Subcommittee, Senator BOND, the distinguished Senator from Missouri, for his cooperation, his efforts. As chairman of the committee, I feel very pleased with much of the progress we have made.

If I have one disappointment, it is in regard to the continuing overemphasis, in my view, on the research on increasing production. We are spending 34 percent of the Agricultural Research Service budget on production, $209 million during this fiscal year. We are spending $500 million in total. That is 50 percent of the total USDA budget is for production research.

Yet, we are only spending 9 percent, some $57 million to increasing the demand or developing alternatives of agricultural products. How much sense does it make to be making that kind of a commitment, I might say $2½ billion over the next 5 years on research to increase production at the very time we are spending over $9 billion over the period of the next 5 years to decrease production?

We will be spending $9 billion on the Conservation Reserve Program over the next 5 years, to set aside 34 million acres. We are going to require 22 million acres in set-aside. That is 6.6 million acres of wheat, and 15.4 million acres of feed grains. So all total, we are setting aside almost 22 million acres of land this year to control production. Ironically or coincidently, perhaps, this is equal to the State of Indiana, or I am sure many other States of equal size.

We are setting aside that much land at the time we are spending $2½ billion to find ways to produce more. It just does not make sense. As one who has been given some responsibility for research this year, it is unacceptable as we continue to try to cope with the fact that we are dealing with fewer dollars, and as those dollars are better understood the fact that we have to spend that much on continuing production at the very time when we are trying to discourage production to the scale that this year, $500 million is being spent on production research and almost 50 million acres, are being set aside. This is unacceptable, and as part of this bill, simply cannot be tolerated.

But it is not just the gross inconsistency we are perpetuating. It is also the lack of results which disturbs me. Setting aside, for the moment, whether it is right to encourage production and require supply controlled simultaneously, which is what we are doing in the farm bill right now, the fact is that we are getting the results in production research the way we once did.

It is not like it was in the forties and fifties and sixties. Back then, through production research, the United States became the world leader in production. The USDA and land grant colleges frankly should be applauded for that. If it were not for the emphasis of production over the last 50 years, we would not be in the position we are.

But times have changed. The dollars for production research are fast reaching diminishing returns. The current corn, soybean, and wheat yields in many parts of the country, including South Dakota, are the same as they were in the late 1970's. During the past decade, the yields of major commodities have reached a plateau. We are no longer in a production-oriented research program, which resulted year after year with the same result that we had in the last 20 years. We are not resulting any longer in the dramatic increases in yield that we had back then.

It should also be noted that the private sector is spending a great deal on research for production. Last year, that figure alone was $2½ billion. That means that the private sector is spending in 1 year on production what we are going to be spending in 5 years to enhance our research for production purposes. A majority of that research will continue to be spent on production, regardless of what we do in this bill.

I said there are many ways to increase income to farmers within the budgetary confines that we have been relegated, and I understand that. Last week, the Senate adopted an amendment which would increase the storage payments to farmers, which would equalize the storage payments provided to farmers and elevators. That is one very minor way of doing it. I am absolutely convinced there is another.

This week we are going to see a number of other proposals that work within the budget to make sure that we divide up the pie more equitably. But this amendment will do it, as well.

Income in the future is no longer purely a function of volume and availability of more supply through greater production. We have to come to that realization. Incomes will increasingly be determined by the quality of the product and the demand for that product over the next few years. The greater the demand, the greater the income.

So this amendment in part is designed to do that, to create an even greater demand, and greater demand comes in part from greater consumptive research. Already, we have seen some encouraging developments in consumptive research. We have developed alternatives to road salt which are biodegradable, the market for which ought to expand dramatically in the years ahead. We have produced soybean oil as a pesticide carrier. We have developed milkweed as a lightweight clothing fiber that appears to have great market opportunities. We have heard a good discussion about biodegradable plastics, and have now produced a nontoxic ink using soybeans.

Each one means more income and reduced cost to taxpayers, because as we create greater demand, there obviously is less need to provide subsidy. The General Accounting Office has reported by doubling ethanol consump-

tion, there would be a savings in farm bill cost of up to $800 million.

So not only does this research provide savings in farm bill outlays, and increased income opportunities to farmers, but in virtually every one of these products, there is also substantial environmental benefits to be realized as well. And we really cannot tell at this point, and cannot calculate what the environmental savings may be as a part of our budgetary consideration.

But by requiring ethanol blends in merely the nine most polluted cities in the United States, we would reduce carbon monoxide by 25 percent, and toxics and ozone by at least 15 percent, not to mention providing the much-needed balance to carbon dioxide as well.

In spite of our productive research, farmers increasingly appear to be locked into growing the same commodity crops year after year. Our research system has not succeeded in developing alternatives to today's major crops.

There has not been an alternative crop developed with any success since the soybean. As a result, throughout farm country there are miles and miles of monocultures of corn, wheat, and soybeans. Instead of focusing on solving the surplus problem through research, USDA continues to focus on squeezing out an additional bushel of corn, soybeans, wheat, cotton, or rice.

It is ironic that this farm bill would emphasize flexibility when farmers in this particular year, as we consider the farm bill for the next 5 years, have even fewer crops to choose from in maximizing their marketability. Farmers in much of the country are locked into planting the same crops year after year because the research system has not provided the alternatives to choose from. Nearly 20 percent of USDA research budget is for major commodity crops. Four-tenths of 1 percent is used for developing new crops today. It is time USDA uses its research system, the same one that has focused on production research for the past 50 years, to make major advances in demand and utilization.

The priority-setting language in the research title begins that effort, but earmarking a reasonable part of the Agricultural Research Service budget to conduct demand and utilization research will ensure that this happens over the next few years.

The amendment that is currently at the desk simply provides that 20 percent be directed to demand enhancement, to utilization, and to alternative crop and product research, and it does not make that requirement until 1993.

We realize this is something we cannot do overnight. We realize that this is going to be gradual; going from 9 percent to 20 percent cannot be done tomorrow. But we also realize that unless we mandate it, unless we take a larger share of that utilization budget and do what is right, create the kind of markets that will create the income that will ultimately reduce the subsidy, we just have no prospects of realizing that in this particular bill. It no longer makes sense to me to be spending $2.5 billion in production research and $9 billion in supply control. That is what we are doing, and that is the whole essence of this legislation.

How can we turn that around? How can we be in a position of not having to pay farmers $9 billion in an effort to increase price, and, also, at the same time, create a research program that recognizes the change in priority, the change in agriculture policy that this farm bill represents in many very applaudable ways?

This will be our best opportunity to change that formula, Mr. President. If the subsidy safety net is no longer what it was, then let us do all we can to develop the markets, which is what we all subscribe to. From a cost, from an income, environmental, and research point of view, this amendment makes sense, and I am very pleased that the managers of the bill have seen fit to support the legislation, and I am hopeful the Senate will do so as well.

I yield and retain the remainder of my time.

The PRESIDENT pro tempore. Who yields time?

Mr. DASCHLE. Mr. President, I yield such time as the distinguished Senator from Ohio may consume.

The PRESIDENT pro tempore. The Senator from Ohio [Mr. GLENN] is recognized for such time as he may require.

Mr. GLENN. Thank you, Mr. President, and I thank Senator DASCHLE.

Mr. President, I join my colleague, Senator DASCHLE, in sponsoring the amendment to earmark 20 percent of the agriculture research budget for increasing the demand or uses for farm or forest products. This research will emphasize the development of new nonfood uses for traditional commodities and the development of alternative farm and forest products.

Mr. President, before we get into more detail on this, let me back up a little bit and put this in historical perspective for our country. If we look at the United States of America and why we have catapulted ahead of most other nations around the world in our tiny little time frame in history, we would have to say education was one item. Education was not just for the kids from the castle but it was for all the young people in this country. We have not done a perfect job, but we wound up with a better educated citizenry than anywhere else in the world, at least up to now.

But in a different direction, we spent more on basic research. We tried to learn the new things first. Out of that research came inventions such as automobiles, roads, aviation, and plastics. These represent our finest examples of all of our efforts in research, that have paid off around this world. But what has done more for us and for the rest of the world is what this country has done through the years with agriculture research. It has been phenomenal. It is not only that we have the Great Plains and that we have a favorable area for producing food. A lot of places in the world have favorable areas for producing food. But what we had was a research service that improved how we produce food that was second to none in the world. It led the way.

I can give you a couple of examples, one in particular, that I think illustrates what has happened because of our research. Our farmers back home in Ohio around the area where I grew up in east central Ohio have the same land lying there today that they are farming as they did when I was a boy growing up. But what is the difference? When I was growing up there, a good corn crop was somewhere around 46, 48 bushels per acre. Now they are farming on that same land and per acre today do you know what they get out of that land? They get somewhere on average, depending on whether we have a good growing year to little less advantageous growing year, we average now somewhere from 120 and 130 bushels per acre.

Now we did not do that just because the farmers were all out there working that much harder. They are not working three times as hard as they were when I was a boy. But look at the production. Why do we have that kind of production coming off the same acreage? It is because of agriculture research.

The point I want to make is we are very good at research. When we put our minds to things in the laboratory or the fields in this country, there is no end to what we can do. And what we have done is concentrate on agriculture production, to grow more food, help furnish food for the rest of the world, not only for our people here, where we have surpluses.

Mr. President, this legislation addresses very directly that specific problem because it says that we want to channel some of this research over into utilization with emphasis on new nonfood uses for trational commodities. In other words, if you grow a bushel of corn, do you have to use it to eat? Do you have to eat whatever we can, like the sweet corn we like to get at this time of the year, or do we use it to feed the animals out there? How do we use it? Are those the only things it can be used for? We now have enthanol being produced, sometimes at too high a price to be fully competitive with gasoline and diesel fuel. And yet,

with some research, we are very confident we can do even more. Can we produce some kind of plastics out of this? I do not know. But I do know we should be doing the research in these areas.

So, Mr. President, it is with that thought in mind that I want to discuss the reasons we are offering this amendment.

I would like to congratulate Senators LEAHY and LUGAR and other members of the committee for their efforts in putting together this comprehensive bill. It does, indeed, set forth the basic food and fiber policies of our Nation for the next 5 years.

I want to especially congratulate the committee, and Senator DASCHLE in particular, the chairman of the Agriculture Research Subcommittee, the one that oversees this research effort I was just referring to.

There is a great need for new investment in agricultural research, and this bill addresses this need. First, it authorizes new funding to strengthen our competitive grants program. Second, it establishes ARCC, the Alternative Agriculture Research and Commercialization Corporation Program, which will provide competitive grants for the development of new industrial uses for agricultural and forestry commodities as well as business financing and technical assistance for the commercialization of these products. I am a cosponsor of the legislation which created ARCC.

The bill also establishes new priorities for research and extension for all research conducted by the Department of Agriculture. Among these is an enhanced emphasis on new product development.

I certainly agree that this is a priority but, Mr. President, at the same time I say it is a priority, and I agree with that priority, let me say with the past experience I and I believe members of the Agriculture Committee have had, I am not confident that the USDA's Agriculture Research Service will give this priority the consideration it deserves when it allocates its research dollars. That is the reason why I feel this amendment is necessary.

I have had personal, one-on-one conversations, over the past—I believe it is 5 years—with Secretaries of Agriculture Block and Lyng and Yeutter. And every single one of them sits there with their assistants when we discuss this particular matter and they say yes, we have to do utilization research, we really have to get into that research on new nonfood uses. That holds more promise than anything else. People and animals can only eat so much, but the other uses that might come up for some of these nonfood uses of agricultural products may well be unlimited if we just do what we are very good at, and that is do a little bit of the research on how to use these agricultural products for nonfood uses.

Utilization research, especially in the area of new nonfood uses for traditional crops such as corn and wheat and feedgrains, has been a major concern of mine for a number of years. While I certainly do commend USDA for its accomplishments in production research, I believe it is time we begin to shift the focus to utilization research. Research into new, nonfood products has remained stable over the last several years.

Mr. President, last year we spent somewhere above $600 million on agricultural research. I do not know whether you have an idea of how much of that went to nonfood uses research, but to bring it down to the bottom line the funding level of approximately $14 million out of that plus $600 million.

The picture is a little bit worse than even that because much more can be done within this service, if we look at this factor: Out of that $14 million, only about half went to research for traditional agricultural commodities of corn, wheat, and feedgrains.

That is $7 million we are talking about out of plus $600 million in the Agricultural Research Service. We are still way over lopsided, still trying to concentrate on production research that has given us these surpluses. I think it is high time, now, we started moving some of this research effort over into utilization research which holds the greatest promise, I believe, for our farmers and for a stable farming community in the future, for stable financing and for food for the whole world.

There is no reason why we should be cutting back on the planting the way we do. We are so good at increasing yields that we say we have to take acres out of production. And then what do we do at the same time?

We go out and do $200 million or so worth of production research each year to develop new methods to produce more on the acreage that is remaining in production, so next year there will probably be more surpluses, so we cut out more acreage.

By any test of logic, that has to be a crazy way to do things. You would think, with the surpluses we produce, we would have long ago have moved into researching areas that would show us how to use these commodities so it would not be a continual game of, as we say in the agriculture business, "slippage." Slippage means this. Because of whatever we predicted this year, a certain percent is taken out of production. Slippage occurs when we produce more on those acres remaining under production, so we end up with an unrealistic view of how much we are actually reducing production.

What we are saying is, we would like to see developed in this country an agricultural community where we produce everything we want to produce but we have plenty of other uses for it, quite apart from feed and from eating.

The funding level of approximately $14 million I mentioned, is seriously deficient, and I think much more can be done within the Agricultural Research Services' total budget, especially since this bill raises total budget authority for ARS to $730 million for 1991 through 1995. Mr. President, the mission of the ARS is to perform agriculture research and demonstration relating to production, utilization, marketing and distribution, home economics, nutrition, and consumer use.

In 1988 the ARS budgeted $14 million for new nonfood products research and in 1989–90 few additional dollars were budgeted for nonfood use research. But even the modest amount of $14 million currently being invested by the Department of Agriculture on new nonfood use research is not being targeted in the right direction.

As I said before, last year I met with Secretary Yeutter and ARS Administrator Dean Plowman on this issue and they provided me with detailed information that I had requested on projects being funded for new nonfood use research. I found that well over half of the $14 million expenditure is actually for research on improving production from traditional, nonfood commodities such as cotton and wool.

I believe that the department's understanding of the nonfood concept must be expanded. As far as I am concerned, new nonfood use research should focus on developing innovative nonfood production from food crops that have traditionally been used for food production. Research in this area offers the most promise for creating new and expanding markets for farm commodities.

There is potential for great gains in the development of new nonfood uses for agricultural commodities. Right now, corn starch is used, not just in producing alcohol but also in manufacturing paper products, building materials, textiles and adhesives. A component of corn starch can be used as an additive to polyethylene to create biodegradable plastics; soybean oil can be used to manufacture printer's ink. Industrial uses for corn byproducts also include application as a highway deicer, for desulfurizing coal, and improving the quality of motor fuel.

A commitment to develop these uses further will not only increase domestic demand for agricultural products, but may increase demand from overseas as well. And that is just with the little bit, comparatively small amount of nonfood uses research we have done to date.

In 1985 I introduced the Agricultural Research and Development Act along

with Senator LUGAR. Part of this legislation was incorporated in the 1985 farm bill. This legislation authorized not less than $10 million to be used to conduct a research and development program to formulate new uses for farm and forest products.

Since that time I have urged, in testimony before the Agriculture Appropriations Subcommittee and with officials at USDA, that we provide more funds for this program.

In 1988 I was successful in persuading the Senate Appropriations Committee to earmark $15 million of the ARS appropriation for nonfood uses. But unfortunately that provision was deleted in conference.

During this process I became acutely aware of the difficulty in moving ARS away from just production research that they have traditionally concentrated on. USDA officials kept telling me that new funding was not needed because the Department was already spending enough on alternative uses for agriculture commodities.

Last year, after looking at a detailed analysis of the ARS budget on utilization research for both food and nonfood, I found that the Department was spending over $50 million on utilization. However, only $14 million is related to new product research and only about half of the $14 million being used for new nonfood uses is used for development of new uses for traditional food crops such as corn, wheat and feed grains.

I would like to go over the figures for the ARS once more. Total funding for 1989 was a little over $600 million. The ARS budget includes seven program categories. Utilization research for both food and nonfood is $57 million, but only $14 million is for research into new nonfood uses and over half of this amount is for research for agricultural commodities such as cotton and wool.

I ask unanimous consent to have printed at this point in the RECORD the breakdown of the ARS budget on food and nonfood uses for 1988.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
Washington, DC, June 8, 1990.

Hon. JAMIE L. WHITTEN,
Chairman, Subcommittee on Rural Development, Agriculture, and Related Agencies, Committee on Appropriations, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to a directive in Senate Report No. 101-84, accompanying Public Law 101-161, making appropriations for Rural Development, Agiculture, and Related Agencies for Fiscal Year 1990, we are enclosing a report on research regarding new nonfood uses for traditional food commodities.

A similar letter and a copy of the report are being sent to Congresswoman Smith and Senators Burdick and Cochran.

Sincerely,

CLAYTON YEUTTER,
Secretary.

Enclosure.

ARS RESEARCH ON NEW USES FOR AGRICULTURAL COMMODITIES

This report is submitted by the Agricultural Research Service (ARS), U.S. Department of Agriculture, to the U.S. Congress in response to a directive contained in Senate Report 101-84, accompanying the Rural Development, Agriculture, and Related Agencies Appropriation Act, 1990, which reads:

"New nonfood uses: The Department is directed to initiate, and make substantial progress toward, the reallocation of no less than $50,000,000 of the ARS budget to research on new nonfood uses for traditional food commodities such as wheat, corn, and soybeans, as newly appropriated and previously committed funds become available. The Committee further directs ARS to report to Congress on its progress in achieving this objective no later than April 30, 1990. This allocation should help ensure a better balance between production and utilization research as well as higher prices for farmers, expanded international trade opportunities, and smaller Federal outlays for farm programs."

ARS has a long history of commitment to agricultural product utilization and development research. In 1990, the four ARS regional utilization laboratories at Peoria, Illinois, New Orleans, Louisiana, Albany, California, and Philadelphia, Pennsylvania are celebrating their 50th anniversaries. Originally authorized by the U.S. Congress in 1938, these regional laboratories were established in 1940 with the technological mission to increase the value and stimulate the use of agricultural commodities being produced by U.S. farmers in quantities in excess of market demands at that time. Since their beginning, the laboratories have developed an impressive array of agricultural technologies and contributed significantly to the use and marketability of U.S. agricultural commodities.

Now, five decades later at a time when U.S. agriculture is again experiencing record production, high cost farm programs, and soft market demands and prices, it is fitting that the ARS utilization research capability is once more being called upon to stimulate the development of and contribute technological solutions to problems of agricultural commodity utilization and marketing.

The ARS commitment to utilization is already strong at the present time. Currently, twenty percent, or $110 million, of the total ARS program is directed to all forms of commodity conversion and delivery research. This includes more than $14 million specifically allocated to research to develop nonfood uses of agricultural commodities.

Furthermore, ARS is committed to provide increased emphasis and to refocus additional resources to product development research. The ARS strategy for achieving this objective will be to carefully combine a reallocation of existing base resources with targeted budget increases over a period of several budget cycles. Caution will be taken to minimize disruption to ongoing programs before reallocation of resources occurs. This will permit ARS to achieve the objective through a cumulative series of incremental increases during the early 1990's. The specific ARS target for the fiscal years 1990 and 1991 will be to reallocate up to $10 million into value-added and product development research from base resources at the four regional research centers, as well as the Athens, Georgia, research center. The mission of the Athens center includes research on animal and plant physiology, poultry processing, food safety and quality evaluation.

In direct response to the Congressional directive, a comprehensive and systematic research planning process has been underway in ARS since September 1989. This process has involved strategic planning, identification of specific research project and development of plans to terminate some ongoing development research and enhanced technology transfer. Agency research managers and scientists have participated fully in this planning process and specific actions to effect increased product development research are being implemented. These planning activities provide the basis for ARS to move toward the $50 million long-term objective; in fact, the planned near-term reallocation of $10 million, plus the current base of $14 million, indicates that ARS will be appropriately halfway to meeting the Congressional directive in 1990.

The new research will include transforming renewable resources such as cereal starch, vegetable oils, and dairy materials to specialty industrial nonfood products. Examples are bioplastics from corn- and wheat-starch and soybean oil printing ink. Environmental issues are being addressed and oportunities identified within market movements worldwide towards the "greening" of business, e.g., starch is used to encapsulate chemical pesticides. These new formulated products permit lower pesticide application rates and reduced groundwater pollution. Fermentation processes for manufacturing biopesticides from starch as a substrate are being developed.

ARS also will continue to respond to the changing face of the food industry. Consumer demands for natural components are increasing. Biotechnological methods for manufacturing natural flavors, colors, textures, and preservatives are being exploited. Novel functional foods to minimize dietary risk of disease are being designed.

Mr. GLENN. Mr. President, I was disappointed with this level of funding and again with the Appropriations Committee. We were successful in incorporating report language which directed the Department of Agriculture:

To initiate, and make substantial progress toward, the reallocation of no less than $50 million of the ARS budget to research on new, non-food uses for traditional food commodities such as wheat, corn and soybeans as newly appropriated and previously committed funds become available.

I received a copy of the USDA's report on research regarding new nonfood uses for traditional food commodities this past June. I ask unanimous consent to have a copy of this report also printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

[Department of Agriculture, Agricultural Research Service [ARS]]

ALTERNATIVE USES FOR AGRICULTURAL COMMODITIES

BACKGROUND

Despite resilience in recovery from economic set-back, United States agriculture needs to be strengthened. There is room for improving our competitive position relative to mounting challenges from agricultural sectors in other developed countries and the developing world.

During the early 1980's a world recession, coupled with a sharp increase in the value of the dollar, resulted in agricultural commodity surpluses. Agricultural technology diffusion has led to expanded production in other countries. There is a worldwide trend toward national self-sufficiency in major food crops. Non-traditional subsidized competitors are entering the world marketplace leading to vigorous rivalry for global market share. Several countries are assiduously building up research programs as a key to sharpening their competitive positions.

The United States needs to recapture and expand its share of the world market. A solid base in agricultural research is a sure avenue to achieving this goal: it produces goods that provide for economic growth and exports.

Awareness of the need to but ress and advance the United States' competitive position in agriculture has fostered interest in the Congress and resulted in several Congressional initiatives toward that end.

ARS STRATEGY

ARS strategy is focused toward capturing markets for U.S. agricultural commodities through greater product diversification; satisfying consumer needs by means of new or modified products, in both food and nonfood product classes. The range of consumer needs in identified in market studies performed by USDA agencies and other sources of market information.

Harvested commodity conversion to diverse higher value products is thus a prime target. These novel products can be derived from conventional commodities by transforming them to value-added materials using, for example, new biotechnological methods.

There are additional opportunities for exploiting new crops, which synthesize compounds of possible strategic or commercial interest, and which can be cultivated in the United States.

A feature of ARS strategy is coupling innovative research with a system for facilitating technology transfer to the commercial sector. Such a mechanism is provided by the recent Public Law 99-502, the Federal Technology Transfer Act of 1986, already productively utilized by the ARS.

RESEARCH PROGRAM STRUCTURE

There is a tradition within the ARS of research efforts geared toward novel and diverse products. In this "utilization" research, conventional commodities such as surplus cornstarch, soybean oil, and dairy materials are transformed to novel products which are sought after, for example, by the plastics, detergent, paint, lubricants, and cosmetics industries. There are four ARS product utilization research centers: the Western, Eastern, Northern, and Southern Regional Research Laboratories located in Albany, California; Philadelphia, Pennsylvania; Peoria, Illinois; and New Orleans, Louisiana respectively. A number of other ARS laboratories are actively involved in this line of research work. In addition, there is a new crops research program. The programs are structured to utilize advanced biotechnology, chemistry, and bioprocess engineering techniques. The knowledge base created from these research efforts is available as a resource to solve problems related to developing novel, high value-added, products from agricultural commodities.

The FY 1990 ARS budget for developing novel agricultural products is $52,282,000, approximately equally divided between food and nonfood products. From this budget, new crops research work is funded to a level of $3,661,000.

FOOD PRODUCTS

The food products industry is changing rapidly. Health, convenience, novelty, and luxury demands are propelling the industry toward new opportunities. There are increasing demands for freshness, nutrition, and "natural" ingredients.

ARS research is directed toward controlling and extending shelf-life of fresh foods such as fruits, vegetables, meat, and fish. New techniques are being brought into play from modern biotechnology and molecular genetics to retard senescence in fruits and vegetables. Methods for removing cholesterol from dairy products are being devised. Through genetic manipulation of oilseed plants, profiles of fatty acids are being changed leading to reduced dietary risk for cardiovascular and cancer problems. Natural flavors, textures, colors, and preservatives are being designed, using biotechnological methods. Novel food products based on surplus non-fat dried milk are being developed. Taste, nutrition, and shelf-life are prime considerations.

NON-FOOD PRODUCTS

The product class chosen for research focus is based on product price-range and potential market volume. Large-volume, low-price bulk chemicals are excluded; the U.S. petrochemicals industry turns out these products with a cost-structure which, at present, tends to defy competition from agricultural sources. The very high priced market end (e.g. biomedical products) has little appeal because only small quantities of major agricultural commodities would be utilized.

In contrast, the intermediate price range products (greater than a dollar per pound) such as specialty chemicals appear to be an attractive category for agricultural commodity transformation. ARS has chosen such products as a focus for research work.

The commodity conversion research thrust includes both biological and chemical technology. Using these various tools, a resource base of technical know-how is being created. The projects which have been undertaken could open up large new multi-billion pound markets for cereal starch, soybean oil, and dairy materials (such as lactose and milk protein).

The ARS Northern Regional Research Center, Peoria, has developed technology for incorporating starch from corn or wheat into plastic films. This provides an agricultural mulch film that biodegrades. Other market possibilities include biodegradable trash can liners, grocery bags, and food packaging. Injection-molded articles such as beverage bottles are targets too. Substitutes for imported gums are being sought by altering starch structure biochemically to imitate gum-like characteristics.

Groundwater quality has become a nationwide concern. Starch can be mixed with pesticides to make granules which release the pesticide gradually. Pesticide losses through leaching and evaporation are diminished. The result is lower application rates for pesticides and reduced groundwater pollution.

There is increasing concern that chemical pesticides could pose health risks. Possible substitutes are biopesticides, such as fungal spores, that destroy noxious weeds. ARS research has been directed toward developing bioprocess systems for manufacturing natural pesticides from starch and other commodities. These biopesticides are expected to be future substitutes for a considerable portion of the $15 billion pesticide market worldwide.

Vegetable oils and dairy materials also offer opportunities for novel applications.

Useful soybean oil products are now being made: for example, printer's ink at present requires 300 million pounds per annum of petroleum-based oil; a soybean oil substitute would use about 25 million bushels/year of U.S. soybeans. Biochemical research is being applied to provide hydroxy acids from soybean oil and replace imports of castor oil (100 million pounds/yr.). Novel catalysts are being investigated for preparing lauric acid (for the detergents and lubricants industry) with the view of replacing coconut and palm kernel oil imports. Soybean oil is being developed as a fuel for farm tractors; also to make cosmetics, specialty lubricants, and other higher value products.

Lactose from the dairy industry is being upgraded, through fermentation systems, to health-care products. Experiments in which milk proteins are cross-linked have led to manufacture of thin, durable, and biodegradable films for packaging.

The United States annually imports natural rubber worth more than a half a billion dollars from tropical countries. To develop a U.S.-based source of natural rubber, the ARS has a collaborative research program with industry. The research thrust involves development of an industrial process in which rubber would be synthesized in a fermentation/bioreactor system based on genetically engineered microorganisms. This approach differs from that of the guayule program (see under "New Crops") in which an arid-zone crop is being developed agronomically to enhance its production of rubber latex.

There are projects for improving cotton products. Modifying the internal crystalline structure of cotton fibers has resulted in better processing and utilization characteristics. Wrinkle resistant fabrics amenable to dyeing have been made. Distinctive thermal storage properties have been built into cotton fibers using special polymers.

The conversion of hides to leather is being optimized, for example, by finding out how salts interact in the tanning process in leather manufacture. By removing grease, vegetable matter, stains, and dark fibers the quality of U.S. wool is being improved.

NEW CROPS

The United States needs less dependence on foreign sources for certain strategic and essential industrial materials. This has been a motivating force for developing new agronomic crops. USDA has screened thousands of wild plant species to find candidates for industrial materials production. The Office of Critical Agricultural Materials of the Cooperative State Research Service (CSRS) coordinates research and development of materials for industrial use. This initiative arose from the Critical Agricultural Materials Act of 1984 (PL 98-284).

Several crop species have been chosen by CSRS as candidates for commercial development: kenaf, guayule, winter rapeseed, and crambe.

Encouraged by the American Newspaper Publishers Association, a cooperative agreement has been set up between USDA and industry to promote kenaf as a fiber source for newsprint manufacture. Other uses for kenaf are being explored and appear to have potential.

The DOD and USDA have an agreement for a joint Guayule Domestic Rubber Project. This could provide a domestic source of natural rubber to satisfy 20% of DOD end-product needs. Research efforts are supplied by the ARS and State universities.

Erucic acid is needed for specialty lubricants. The practicality of developing an industrial supply of erucic acid using domestically grown winter rapeseed and crambe has been examined by the USDA and various State colleges. Under the Critical Agricultural Materials Act a market development program for lubricants, plastics, and other products has been set up by the CSRS with seven states involved.

The ARS has research efforts on other new crops as well. Meadowfoam produces long-chain fatty acids suitable for cosmetics and lubricants; the Oregon Meadowfoam Growers' Association has promoted extensive plantings and already a small amount of oil is being marketed to a cosmetics manufacturer.

The primary source at present of lauric acid for manufacturing soaps, detergents, lubricants, and related products is imported coconut and palm kernel oils. Moreover, the U.S. depends on imported castor oil for its total supply of hydroxy fatty acids: this strategic material is used in the production of plasticizers, coatings, lubricants, surfactants, and pharmaceuticals. Seed oils from species of Cuphea and Lesquerella are good candidates for a domestic production of lauric acid, and for hydroxy fatty acids respectively. Research toward agronomic development is in progress.

A species with promise is guar. The gum product is used in a variety of industries. Most of the guar is imported. There are, however, increasing plantings in Texas, Oklahoma, and Arizona. There is potential for agronomic improvement of this hardy crop.

TECHNOLOGY TRANSFER

The Federal Technology Transfer Act (Public Law 99-502) signed by President Reagan in October 1986, has provided a new avenue for the commercialization of ARS research results. The new Cooperative Research and Development Agreements differ from previous ARS research contracts and agreements by providing the cooperating industrialist/entrepreneur with a first right to exclusive licenses on patented inventions made under the agreement. ARS scientists work closely with companies to commercialize the technology arising from their research results.

The company either provides funds for specified ARS research expenses or enters into a Memorandum of Understanding which does not involve transfer of funds. ARS scientists seek opportunities for cooperative industry/ARS research and development agreements while ensuring that several conditions are met: i) consistency with the ARS research mission; ii) no conflicts of interest; iii) a fair chance has been provided to all potential cooperators interested in participating.

The ARS Office of Cooperative Interactions provides guidance and assistance. Members of the ARS National Program Staff are consulted to ensure that the collaborative project is in harmony with national program goals. The scientist/inventor, however, is essentially responsible for transferring the research work to the commercial sector.

Apart from one-to-one agreements, the ARS is permitted by P.L. 99-502 to establish consortia to enable industry to capitalize on scientific discoveries made by ARS and universities. Such a consortium has been formed in Illinois recently. Known as the Biotechnology Research and Development Corporation (BRDC) the major partners comprise six industrial companies, the State of Illinois, and ARS. Since the market interests of the shareholder companies are diverse, the research program has a broad-based charter. For example, core technologies are being developed through research on novel bioprocessing techniques, more efficient genetic engineering methods, process control sensors, and new separation systems for product recovery. These areas of work are consistent with ARS national program goals.

SUMMARY

There is need to recapture and expand the U.S. share of international commerce. A solid base in agricultural research and technology transfer is imperative to achieving this goal. ARS research is focused toward transforming conventional agricultural commodities to value-added materials using new biotechnological methods, exploiting new crops which synthesize compounds of strategic or commercial interest, and by developing new or modified food and nonfood products. Innovative research must be coupled with a system for facilitating technology transfer.

U.S. DEPARTMENT OF AGRICULTURE, AGRICULTURAL RESEARCH SERVICE, ARS RESEARCH ON UTILIZATION OF AGRICULTURAL COMMODITIES, SUMMARY TABLE

[In thousands of dollars]

Description	Fiscal year— 1988 estimated	1989 estimated	1990 budget
New products/process:			
Nonfood	$13,060	$12,879	$12,879
Food	10,296	9,822	9,822
Total, new products/process	23,356	22,701	22,701
Enzyme/microbial conversion:			
Nonfood	3,449	3,493	3,493
Food	1,422	1,683	1,683
Total, enzyme/microbial	4,891	5,176	5,176
Biotechnological manipulation to increase end use value:			
Nonfood	2,555	2,476	2,476
Food	7,069	7,665	7,665
Total, biotechnological manipulation	9,624	10,141	10,141
Processing/handling to increase end use value;			
Nonfood	2,671	2,770	2,770
Food	7,756	7,833	7,833
Total, process/handling	10,427	10,603	10,603
New crops	3,411	3,661	3,661
Total	51,709	52,282	52,282
Summary:			
Nonfood	25,146	25,279	25,279
Food	26,563	27,003	27,003
Total	51,709	52,282	52,282

U.S. DEPARTMENT OF AGRICULTURE, AGRICULTURAL RESEARCH SERVICE, ARS RESEARCH ON UTILIZATION OF AGRICULTURAL COMMODITIES, SUMMARY TABLE—Continued

[In thousands of dollars]

Description	Fiscal year— 1988 estimated	1989 estimated	1990 budget
New products/process—Nonfood	13,060	12,879	12,879
New products/process—Food	10,296	9,822	9,822
Enzyme/microbial conversion:			
Nonfood	3,449	3,493	3,493
Food	1,442	1,683	1,683
Subtotal, enzyme/microbial	4,891	5,176	5,187
Biotechnological manipulation to increase end use value	9,624	10,141	10,141
Processing/handling to increase end use value	10,427	10,603	10,603
New crops	3,411	3,661	3,661
Total	51,709	52,282	52,282

New Products/Process Nonfood

Engineering studies of triglyceride hydrolysis and restructuring in an immobilized enzyme reactor	407,436
Elimination of contaminants from greasy and scoured wool	389,945
Effect of structure of connective tissue on properties of products	514,817
Production of polyunsaturated fatty acid enriched lipids from carbohydrates by fermentation	177,911
Influence of noncollagenous component on cattlehide processing characteristics	510,433
Regulation of lipid behavior in mixtures and at phase interfaces	50,791
Property enhancement of cereal starch for expanded agricultural uses	615,591
Modifications of cereal starches, dextrins, and cycloamyloses and their derivatives for new uses	309,082
Vegetable oil as diesel fuel: fundamental properties and physical/chemical modifications	349,965
Chemical systems for soybean oil conversion to industrial products	464,864
Chemical and physical modification of starch in extruders for nonfood industrial application	448,015
Noncellulosic constituents and the fiber and processing quality of cotton	190,814
Pilot spinning laboratory evaluation of the fiber quality and processing performance of cotton	451,160
High volume instrument systems and techniques for cotton market quality measurement	333,545
Cotton fiber surface properties as related to quality	721,458
Cotton fiber quality as related to maturity and the tendency to form neps	824,149
High cotton-content core yarn fabrics with improved performance characteristics	425,045
Technique to produce quality all-cotton and cotton-rich core/wrap yarns of fine counts	598,736

New Products/Process Nonfood—Continued

Quality improvement by identification/control of fiber damage during mechanical processing	599,900
Better cotton products through improved opening/cleaning/carding technology	527,367
Structural features that maximize strength in chemically modified cotton	488,960
Dyeable durable-press resin-finished cotton fabric	339,074
Optimizing thermal properties of textiles for agricultural and consumer uses	470,001
Reactions of cotton applicable to low- or no-formaldehyde textile finishing	608,669
Improved permanent press cotton-containing fabrics	494,645
Use of cotton in nonwoven products	420,655
Processing cottonseed using aqueous ethanol to extract oil and remove gossypol and aflatoxins	763,874
Utilization of biotechnology to enhance value of agricultural commodities	333,552
Development of guayule super propagules	48,136
Total	12,878,589

Biotechnological Manipulation To Increase End Use Value Nonfood

Biotechnological systems for soybean oil conversion to industrial products	585,839
Application of recombinant DNA technology to enhance agricultural oleochemical utilization	572,663
Biochemical control of protein and starch synthesis during seed development and plant senescence	292,402
Biochemical control of oligosaccharide synthesis during soybean seed development	250,433
Plant cell transformation for consumer/processor quality improvement of vegetable crops	22,679
Physical behavior and deterioration of seed membranes	251,336
Utilization of biotechnology to enhance value of agricultural commodities	500,327
Total	2,475,679

Enzyme/Microbial Conversion Nonfood

Enzymatic and Microbial modifications of polymeric starch	398,899
Regulation and expression fungal genes for utilization of agricultural commodities	576,876
Bioreactor systems for efficient production of biocontrol agents	565,983
Utilization of plant polysaccharides by microorganisms	636,292
Cornstarch-based biodegradable molded plastics	408,790
Application of enzyme technology to enhance agricultural oleochemical utilization	281,360
Use of endogenous enzymes to obtain sugar from corn starch granules	49,623
Production of microbial polymers from sucrose-based substrates	133,540
Studies on mixed microbial cultures	441,845
Total	3,493,208

Processing/Handling To Increase End Use Value Nonfood

New technologies for cotton ginning research	392,699
Ginning and production methods to enhance fiber quality and producer income	583,296
Cotton gin system design and evaluation to maximize product quality and minimize processing costs	327,028
Cotton quality measurement and gin plant control and automation	228,233
Prevent quality losses during export of soybeans	294,535
Export quality evaluation, maintenance and improvement	169,252
Development of improved seed conditioning	226,937
Determining grading methods and end-use properties of grain for marketing	202,364
Computer-aided design and operation of grain handling and processing systems	57,782
Develop models to simulate the environment- cotton- plant-harvesting-processing interactions	138,465
Reduction of storage losses in oilseeds	149,317
Total	2,769,898

New Crops

New or alternative corps for production of critical materials and chemicals	570,702
Infrastructural evaluation of guayule as a source of natural rubber	137,490
Meadowfoam production and use for critical materials and chemicals	247,544
Germplasm maintenance, evaluation and enhancement of cuphea and other new crop species	263,663
Introduction, inventory, preservation, maintenance, evaluation and distribution of crop germplasm	119,635
Mechanism of bioregulation of synthesis of cos-polyisoprene rubber in plants	160,284
Germplasm and cultural management improvement of guayule and other new crops	445,215
Germplasm development and domestication of cuphea and other new crop species	180,685
Guayule production potential and technology for south Texas	169,057
Development of equipment and techniques for producing, harvesting and transporting kenaf	148,526
Germplasm development, environmental stresses and cultural practices for cuphea	107,550
Potential of rapeseed oil as a source of fuel for agriculture	95,257
Production practices and managing nematodes and root diseases on kenaf	148,526
Introduce, increase, evaluate, document, maintain and distribute plant germplasm	90,470
Conservation tillage practices for the great plains	55,615

New Crops—Continued

Weed management systems to improve conservation practices in corp production and range land	13,656
Development of guayule super propagules	48,136
Bioreactor production of natural rubber	214,896
Understanding water and thermal tolerance in species adapted to dryland agriculture	69,300
Kenaf	300,000
Kenaf 89 increase	75,000
Total	3,661,207

Processing/Handling To Increase End-Use Value Food

Reduction of storage losses in oilseeds	149,317
Basic rheological aspects of quality and processing	431,688
Improved tenderness and juiciness of meat	567,884
Effect of metabolic regulation of safety aspects and nutrient/antinutrient composition of meat	48,702
Physical-chemical changes in frozen CCC-owned cheddar cheese	245,503
Role in pectin structure as a determinant in fruit softening	240,543
Concentrating model liquid foods and effluents by freeze concentration; physical-chemical and eng. studies	526,542
Improve oxidative stability and flavor quality of vegetable oils	91,614
Prevent quality losses during export of soybeans	294,525
Predicting the effects of stress of handling and extended storage on potato quality	44,286
Export quality, evaluation, maintenance and improvement	169,252
Chemical, physical and microbial control monoliria and botrytis in stone fruits, grapes in marketing	47,937
Reduce phytotoxicity and physiological deterioration to nectarines, melon, citrus, grapes and sweetcorn	241,482
Reduction of senescence of whole and cut fruits, vegetables using environmental modification	77,213
Ripening and thermal sensitivity in tropical and subtropical fruits	154,671
Characterization of fresh tomato flavor	347,614
Bioreactor production of natural rubber	214,896
Determining grading methods and end-use properties of grain for marketing	101,182
Computer-aided design and operation of grain handling and processing systems	57,782
Flavor, quality and processing in catfish	60,011
Develop new or improved post-harvest practices for quality and shelf life extension	154,279
Muscadine grape processing research	40,995
Origin of off-flavors in peanuts	524,607
Etiology and control of undesirable flavors of meat, poultry and fish	696,138
Ecosystem related off-flavors in farm-raised catfish	664,523

Processing/Handling To Increase End-Use Value Food—Continued

Automated objective system for grading farmers stock and shelled peanuts	311,219
Improve flavor, texture and juiciness of processed poultry meat	246,607
Extending shelf life and reducing postharvest losses in stone fruits during maturation and senescence	249,596
Reduce losses and develop quarantine treatments for horticultural crops in domestic/export systems	378,559
Red. in losses caused by decay and external stress of sub fruits and vegs related to quarantine treatments	159,189
Critical control factors for the preservation of vegetables by fermentation or direct acidification	185,094
Biochem. basis of storage stability and text. prop. of processed prod. made from stored hort. crops	75,659
Quality changes in freeze-damaged peanuts	34,027
Total	7,833,136

Biotechnological Manipulation To Increase End-Use Value Food

Environmental control of lipid metabolism in soybeans	253,533
Effect of metabolic regulation of safety aspects and nutrient/antinutrient composition of meat	97,403
Regulation of metabolism to maintain quality and limit water loss of lightly processed vegetables	379,309
Reduce quality loss caused by effects of chilling on membranes and physiology of tomato and apples	189,432
Increasing shelf life and controlling senescence through an analysis of fruit cell wall metabolism	211,464
Induction and control of ACC synthase during tomato fruit ripening	419,636
Protein synthesis as related to tonoplast membrane-function and init. Steps of ripening in tomato fruit	140,248
Soybean oil body membrane proteins; regulation, expression, and trasfer to tobacco plants	223,325
Cellular regulation of the expression of dormant genes in cereal grains	175,075
Regulation of gene expression by ethylene	161,929
Role of pectin structure as a determinant in fruit softening	60,136
Physical behavior and deterioration of seed membranes	251,336
Biochemical control of protein and starch synthesis during seed development and plant senescence	292,402
Biochemical processes that control or influence market quality and losses from potatoes in storage	321,554
Reduce phytotoxicity and physiological deterioration to nectarines, melon, citrus, grapes and sweetcorn	241,482

Biotechnological Manipulation To Increase End-Use Value Food—Continued

Biochemical and physiological processes and phytohormal control and citrus fruit and juice quality	647,294
Wheat storage protein gene control systems	481,951
Lipid biosynthesis and metabolism in plants	360,556
Regulation of ripening and senescence in plants	466,248
Plant cell transformation for consumer/processor quality improvement of vegetable crops	128,512
Increasing U.S. winter wheat quality to allow it to be more competitive in export markets	474,198
Biotechnological approach to prevent expression of senescence pectinase/polyphenoloxidase activities	264,069
Retardation of biochemical processes of post-harvest senescence in fruits and vegetables	205,805
Molecular and biochemical regulation of wheat grain dormancy and pre-harvest sprouting	182,093
Biochemical mechanisms affecting quality and degeneration of fruit delivery storage and marketing	450,026
Biochemical and physical mechanisms regulating postharvest quality of horticultural crops	363,109
Growth physiology and quality/flavor development in peanuts	77,029
Regulatory role of lipids in developmental regulation of vegetables and fruits	145,528
Total	7,664,682

Enzyme/Microbial Conversion Food

Microbial and biochemical technology of cholesterol removal from dairy foods	569,009
Enzymatic removal of cholesterol from milk	204,233
Value added fruit and vegetable products made by enzyme processing	220,039
Production of microbial polymers from sucrose-based substrates	133,540
Vacuum infusion process to preserve fresh quality in fruit and vegetable products	136,875
Application of enzyme technology to enhance agricultural oleochemical utilization	281,360
Processing cottonseed using aqueous ethanol to extract oil and remove gossypol and aflatoxins	137,497
Total	1,682,553

New Products/Process Food

New improvements in slicing technology to maintain plant cell integrity	363,802
Prevention by microbial growth in lightly processed fruits and vegetables	406,964
Edible films for encasing cut fruit and vegetable surfaces	465,076
New processing concepts to improve marketing efficiency of fruits and vegetables	405,508
Physical-chemical changes in frozen CCC-owned cheddar cheese	245,503

New Products/Process Food—Continued

Enhanced textural properties of casein components	439,680
Coagulation/gelation phenomena of casein and other food proteins	422,268
New strategies to improve protein functionality of nonfat dry milk as a food ingredient	710,792
Mechanisms for the retention of quality of lightly processed fruits and vegetables	631,101
Optimum potato processing system—role of salient production parameters	577,917
Supercritical fluid systems for extraction and processing of agricultural products	486,707
Relationship of structure to thermal denaturation of soybean proteins	324,511
Stabilization and formulation of foods for expanded utilization of commodities in export programs	233,762
Improved oxidative stability and flavor quality of vegetable oils	366,455
Regulation of lipid behavior in mixtures and at phase interfaces	118,512
Predicting the effects of stress of handling and extended storage on potato quality	146,143
Improve flavor, texture and juciness of processed poultry meat	123,304
Reduction of senescence of whole and gut fruits, vegetables using environmental modification	98,833
Develop new or improved postharvest practices for quality and shelflife extension	30,856
Engineered foods from nonfat dry milk, vegetable proteins and other agricultural commodities	661,315
Soy protein conformation and its relationship to the physical properties of foods	369,237
Modification of soy proteins for improved functionality in foods	454,301
Improve stability of quality in aseptically packed orange and grapefruit juice products	532,383
Vacuum infusion process to preserve fresh quality in fruit and vegetable products	277,898
Edible films and coatings to sustain product freshness during storage	409,954
Quality changes in freeze-damaged peanuts	34,027
Critical control factors for the preservation of vegetables by fermentation or direct acidification	185,094
Characterization and prevention of gelation in milk concentrate	300,000
Total	9,821,903

Mr. GLENN. Mr. President, the report states:

ARS is committed to provide increased emphasis and to refocus additional resources to product development research.

The ARS strategy for achieving this objective will be to carefully combine a reallocation of existing base resources with targeted budget increases over a period of several budget cycles. Caution will be taken to minimize disruption to ongoing programs before reallocation of resources occurs. This will permit ARS to achieve the objective

through a cumulative series of incremental increase during the early 1990's. The specific ARS target for the fiscal years 1990 and 1991 will be to reallocate up to $10 million into value-added and production development research. * * *

In fact, we enhance the likelihood that the family farms will still be there decades to come as the family farm.

I believe it is time to give the ARS some direction in shaping its budget. Production research has made us the envy of the world.

There is not a nation around this world that does not envy the United States of America and what we have done with regard to agriculture.

We can outinvent, outproduce, and outresearch anyone in the world. It is time that we put this same energy into finding new uses for the abundant agricultural resources we have in this country. I urge my colleagues to join Senator DASCHLE and me in supporting a directive to the ARS to use this increased percentage of its research budget, 20 percent for utilization research.

I am particularly gratified that the floor managers of the bill have agreed that they will accept this legislation. Mr. President, I add I hope this is the minimum. I hope the Department of Agriculture takes this as the bare minimum that is to be put into these nonfood uses research programs.

I would personally like to see us go with a much higher percentage than 20 percent and then maybe increase at a certain percent per year. I would hope that the Agriculture Department, once they look into this and set their teeth into this, are going along with it so that we really can see them deciding on their own that a higher percentage of their research budget can very well be beneficially spent researching nonfood uses of our traditional agricultural commodiites.

Mr. President, if there are other people to speak, I will move in that direction. If not, I will be prepared to go to a vote, depending on the wishes of Senator DASCHLE.

Mr. DASCHLE. I yield such time as he may consume to the distinguished Senator from Oklahoma.

The PRESIDENT pro tempore. The Senator from Oklahoma [Mr. BOREN] is recognized.

Mr. BOREN. Mr. President, I thank my colleague from South Dakota and my colleague from Ohio for the outstanding remarks they have just made in explaining this amendment.

I am certainly in full sympathy with the aims of this amendment. I think it is an amendment that is needed. We do need to emphasize in our agricultural research programs the creation of new markets and new uses for agricultural products, as well as simply emphasizing production as we have done so often in the past.

This is a period of time of global change. There is a change in markets for our agricultural production. There is a change in terms of the economic mix of the agricultural sector. I think that it is wise that we move in this direction in terms of research. In the long run, it will be very, very beneficial to the farmers of this country that we explore additional uses for agricultural products, including nonfood uses for those products.

I want to commend the Senator from South Dakota, who does chair the reseearch subcommittee so ably and is a very effective member of the Agriculture Committee, a very farsighted member of the Agriculture Committee. I also want to commend my colleague from Ohio, Senator GLENN, who has long had an interest in this subject, as he has had an interest in many areas of research policy for this country. We would be in a much more competitive situation internationally, we would have a much stronger economy in this country if the ideas and the suggestions offered by the distinguished Senator from Ohio had been heeded by those making policy in this country over the last several years. So I commend both my colleagues for joining together and offering this amendment.

I have discussed this amendment with the chairman, the distinguished Senator from Vermont, Senator LEAHY, and it is fully acceptable to him. I believe that it is enthusiastically supported by a vast majority of the members of the Agriculture Committee.

Mr. President, I am pleased to join with my two colleagues in urging the adoption of this particular amendment and indicate that it has been cleared on this side of the aisle.

The PRESIDENT pro tempore. The Senator from South Dakota [Mr. DASCHLE].

Mr. DASCHLE. Mr. President, let me just thank the distinguished Senator from Oklahoma for his kind remarks, as well as his support. I am very grateful. He has been a tremendous partner in the effort to put together a comprehensive and a worthwhile piece of legislation. Obviously, his support in this amendment in particular is a very productive and helpful indication of the kind of support that we think exists in the Senate.

Let me also thank the Senator from Ohio for his comments. I do not know anyone who has fought this fight harder and longer than the distinguished Senator from Ohio. He has taken this issue up on many occasions and has made the case that he made so eloquently this afternoon on a number of occasions and I think has continually impressed the Senate as to the need in moving in this direction. Certainly given the case he made and given the fact that we must make some major changes in the way we look at research as we look to the next 5 years, this amendment deserves the support that he has indicated and he has shown.

At this time, I reserve the remainder of my time.

The PRESIDENT pro tempore. The Senator from Indiana.

Mr. LUGAR. I yield myself as much time as I may require.

The PRESIDENT pro tempore. The Senator is recognized for such time as he may require.

Mr. LUGAR. Mr. President, I commend the distinguished Senator from South Dakota who has offered excellent leadership in the Subcommittee on Research of the Agriculture Committee, and has produced another amendment which we believe is worthy of the Senate's attention and should be adopted this afternoon. I appreciate the explanation the Senator has given of his amendment and likewise the strong support given by the distinguished Senator from Ohio [Mr. GLENN].

I appreciate Senator GLENN's mention of collaboration with the two of us in the Glenn-Lugar effort of the 1985 farm bill, in which the amounts were sizably less than the amounts the Senator from South Dakota mentions today, but the thrust was very similar then. The distinguished Senator from Ohio, as has been pointed out by other colleagues, has offered leadership since that time and almost each year. I can recall his testimony before the Senate Committee on Agriculture on behalf of research on other uses of food products.

So it is with real pleasure on this side of the aisle that we commend the amendment and indicate our support. We look forward to watching the impact of this amendment come through the research laboratories, land grant universities and others that are working on these products in our Nation for the benefit of American citizens.

Mr. President, I know of no one else on our side of the aisle who wishes to speak on the amendment. Therefore, I yield back all time on our side.

Mr. DASCHLE. Mr. President, I see no request for time on this side. I yield back the remainder of my time, again reiterating my sincere thanks to the managers for their cooperation and support of the legislation.

The PRESIDENT pro tempore. All time has been yielded back.

The question is on agreeing to the amendment.

The amendment (No. 2325) was agreed to.

Mr. DASCHLE. Mr. President, I move to reconsider the vote.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BOREN. Mr. President, I ask unanimous consent that I might proceed as if in morning business for 3 minutes.

The PRESIDENT pro tempore. Is there objection? The Chair hears none and it is so ordered.

The Senator from Oklahoma will be recognized for 3 minutes as in morning business.

EXPORT ENHANCEMENT PROGRAM

Mr. BOREN. Mr. President, I rise this afternoon to bring to the attention of my colleagues a very serious matter. In the last few weeks, we have had a very steep decline in the price of wheat in this country, and I am convinced that part of the reason why we have had such a decline is that we have not been using the Export Enhancement Program as aggressively as we should have been using it.

Wheat prices in my home State of Oklahoma are $1 per bushel less than they were 1 year ago. More recently, Kansas City futures have declined 17 percent just since the first week in May. The reason for much of the current price erosion is the lack of export sales. The sales under the Export Enhancement Program have fallen dramatically since the first of the year.

During the first quarter of this year, the United States sold nearly 5 million metric tons of wheat under the Export Enhancement Program. But second quarter sales had fallen to just about half the level of the first quarter, to less than 2.7 million metric tons. So we have had very much of a curtailment in the use of the Export Enhancement Program, and that curtailment has been going on at the very same time that we have had a very severe erosion of per bushel prices for wheat.

Even more disturbing is the fact that our competitors have made very large export sales during just the last few weeks. Trade sources indicate that 70 to 80 percent of the Soviet and Chinese purchases through mid-October have already been booked primarily by the European Community and the Canadians.

I think immediate steps must be taken to capture exports for shipment through the last half of 1990. The low price of U.S. wheat will not only cause farm income to decline, it will dramatically increase program costs as well if we do not do something about it. During this age of budgetary constraints and budgetary difficulties, the U.S. Department of Agriculture can ill-afford to cause income support costs to increase without failing to aggressively utilize the Export Enhancement Program to expand exports and support prices.

This is a very critical period of time. This is a time of the year in which major sales are made. Our competitors are out there, obviously, as we look at what has happened with Soviet sales and with Chinese sales. We need to be out there in the market.

We have at least $300 million still available to us in terms of the Export Enhancement Program for this year. That is money that can be used. That is money that will help get farm incomes up. That is money that will help save the taxpayers' money in terms of keeping the cost of the farm program down because as market prices go down, the cost of the support program is going up. These are markets that we should not lose. These are sales that we should not be losing.

As many of my colleagues on my committee know and other colleagues in the Senate understand, the European Community, in particular, has a program which has been outspending our Export Enhancement Program sometimes as much as 10 to 1. They have been known to subsidize wheat sales in the neighborhood of $6 to $9 a bushel in order to steal sales away from the United States.

The GATT negotiations are going on right now. It is one of the reasons why I think it is very important that we work in a bipartisan fashion to enable ourselves to get a farm bill passed as soon as possible to strengthen the hand of those now negotiating in Geneva. But in the meantime, let us not allow wheat prices to erode further. Let us use the tools at hand.

I urge the Secretary of Agriculture and the Department to act right away to make full use of the Export Enhancement Program that is in effect available to them at this moment in order to regain our market share. Let us not have another quarter of declining use of the Export Enhancement Program while our market prices for wheat continue to fall.

I thank the Chair.

I suggest the absence of a quorum.

Mr. METZENBAUM addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Oklahoma withhold his suggestion?

Mr. BOREN. Mr. President, I withhold my suggestion.

The PRESIDENT pro tempore. The Senator from Ohio [Mr. METZENBAUM].

Mr. METZENBAUM. Mr. President, I ask unanimous consent to proceed at this time as if in morning business for a period not to exceed 15 minutes.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The Senator from Ohio [Mr. METZENBAUM] is recognized for not exceeding 15 minutes.

CIVIL RIGHTS ACT FOLLOWUP

Mr. METZENBAUM. Mr. President, I rise to call attention of my colleagues to an article that appeared on the front page of last Friday's New York Times regarding the Civil Rights Act of 1990. The article presents a clear, accurate summary of the issues surrounding the definition of "business necessity" that were the subject of intensive negotiations between the sponsors of the bill and the administration.

I ask unanimous consent that a copy of the article be printed in the RECORD at the conclusion of my statement.

The PRESIDENT pro tempore. Without objection, it is so ordered.

(See exhibit 1.)

Mr. METZENBAUM. I thank the Chair.

During the debate last week on the Civil Rights Act, there was a great deal of discussion about the possibility of reaching an accord with the White House. A number of Senators on the other side of the aisle claimed that a deal in fact had been agreed to but that Senator KENNEDY, the bill's chief sponsor, had reneged on the deal. I believe the New York Times article sets the record straight.

The article points out that it was the business community that prevented the White House from reaching agreement on the bill.

The article cites a memorandum from the executive director of the Labor Policy Association, a business lobbying group that took credit for scuttling an agreement in principle between Senator KENNEDY and the White House. The article states that a coordinated effort by the Labor Policy Association, the U.S. Chamber of Commerce, and the National Association of Manufacturers prevented a final agreement by the administration.

There you have it, Mr. President. The White House, not Senator KENNEDY, reneged on the deal. The Bush administration, regrettably, bowed to the political pressure of the business lobbyists and then sought to blame Senator KENNEDY.

Part of this coordinated business effort was to scare people into thinking that this bill would somehow mandate hiring and promotion quotas. All this talk about quotas has become a political game. But the red herring of the quotas should not divert attention from the fact that the White House gave in to the business lobbyists, who have made an all-out effort to kill the civil rights bill.

The Civil Rights Act of 1990 does not require quotas. The bill's language is absolutely clear on this point. The bill expressly restores the Griggs decision, which had been the law of the land from 1971 to 1989. No employer was required to adopt quotas because of the Griggs decision and no employ-

er will be required to do so by restoring Griggs and overturning the Wards Cove decision.

The act expressly provides that nothing in the act "shall be construed to require an employer to adopt a hiring or promotion quota."

Throughout the debate, we made a good-faith effort to address the legitimate concerns of Senators. Regarding the critical definition of "business necessity," we made a series of changes to alleviate concerns that we were placing too onerous a burden on employers.

We started out requiring that an otherwise discriminatory practice must be justified as "essential to effective job performance."

In response to Senator DANFORTH'S concerns, we reduced the burden to "bears a substantial and demonstrable relationship to effective job performance." Finally, we accepted the suggestion that there should be one standard for selection practices, such as hiring and promotion and another standard for practices unrelated to selection, such as layoffs resulting from a plant closing or a bankruptcy.

As enacted by the Senate, the bill allows employers to justify otherwise discriminatory practices by showing that those practices bear a significant relationship to successful job performance or to a significant business objective. That is a tough, but reasonable standard. In particular, the bill provides that for selection practices, the employer must show a significant relationship to successful job performance. For nonselection practices, the employer must show a significant relationship to a significant business objective.

This of course is not what the business community wants. They want a standard so weak that it amounts to the continuation of Wards Cove. But this bill is about overturning Wards Cove. If President Bush is serious about favoring civil rights, he should be ready to sign a bill that overturns Wards Cove. That is the bill Congress will give him.

We also made other changes. We added language to ensure protection of due process rights under the Wilks decision. We gave assurances to our colleagues that a cap on punitive damages—not to exceed the greater of $150,000 or the amount of compensatory damages including back pay—would be included in the bill. We also guaranteed that Senator PRYOR'S amendment would be included in the final bill to clarify that a mere statistical imbalance in the work force is not sufficient to create a prima facie case of disparate impact discrimination.

Mr. President, these changes are significant and they all favor employers. Yet the Republicans objected when we tried to add some of these provisions to the bill. I am confident that most Members of the Senate supported these changes.

As a matter of fact, I heard the distinguished Senator from Oklahoma [Mr. BOREN] trying to explain how the cap with respect to damages was reasonable, was the right approach, and how he and others on this side of the aisle, some on that side of the aisle as well, wanted to put these limiting provisions into the bill that Senator KENNEDY and I and others who were supporting the civil rights bill were prepared to accept but the Republicans would not permit us to do so.

What happened was that the Republicans used procedural tactics to block our ability to improve the bill, and to make improvements that were more important to the employer community than to the worker community.

Frankly, using procedural tactics to keep the sponsors from improving the bill in the direction of the opponents of the language is not the way to legislate if you are truly interested in having a civil rights bill.

Because of those tactics, there is a legitimate question whether the Republicans want a civil rights bill. President Bush still threatens to veto the legislation. Unfortunately he is receiving bad advice. Regrettably he is listening to the business lobbyists who want to kill this bill.

I urge him, instead, to listen to the women and minority workers in this country. Listen to the vast majority of Americans in this country. They need the Civil Rights Act of 1990 to restore fair treatment and equal opportunity in the workplace.

In the next few weeks, President Bush will face a moment of truth. He will have to choose between the naysaying corporate lobbyists, and millions of women and minority workers who are looking to him for support. He will have to decide if there will be a civil rights bill in 1990 protecting the minorities and women in this country. He will have to determine whether he wants to follow in the footsteps of Ronald Reagan, who was the first President in my memory to veto a civil rights bill. I am hopeful that President Bush will do the right thing, by signing the Civil Rights Act of 1990 into law.

Finally, Mr. President, I call your attention to this morning's New York Times, which contains an editorial that completely supports the position that the Civil Rights Act of 1990 has nothing to do with quotas. I ask unanimous consent that a copy of that editorial, entitled "A Red Herring in Black and White," be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the New York Times, July 23, 1990]

A RED HERRING IN BLACK AND WHITE

Calling the proposed Civil Rights Act of 1990 a "quota bill," as President Bush does, doesn't make it so. It may confuse some citizens and allow the Bush Administration to fool itself.

Scare words about quotas didn't fool the Senate, which passed the bill last week by a vote of nearly two-thirds. They won't fool the House as it takes up this needed legislation. Nor will they fool minorities that have a chance to regain rights in Congress that they have lost in the courts.

The provisions the President professes to be horrified by would only restore the nation's job discrimination law as it was applied from 1971 to 1989. That's hard to do precisely, but the bill comes close.

In the 1971 Griggs case a unanimous Supreme Court held that if a plaintiff could show that an employer disproportionately screened out blacks, the employer must show that its job policy was "significantly related to successful job performance." That was a fair, legally familiar assignment of burden to the party best equipped to provide the crucial evidence. But last year in the Wards Cove case, a 5-to-4 majority overruled Griggs and placed new, heavy burdens on civil rights plaintiffs.

The new bill would make clear that Congress thinks the Court, interpreting the 1964 Civil Rights Act in both cases, got it right the first time. It would require companies to show "a significant relationship to successful performance on the job."

The quota charge is a red herring, part speculation and part fabrication. The Administration speculates that companies will be driven to adopt reverse-discriminatory quotas to avoid the law's intolerable burden of proof.

The best evidence of that danger would be that from 1971 to 1989, many employers in fact adopted quotas. But the Administration cites no such evidence. It only complains that the Senate rejected Administration language—language the bill's supporters said resembled the Wards Cove decision more than the Griggs decision.

More seriously, Attorney General Dick Thornburgh claims that the bill permits lawsuits based solely on a statistical imbalance between the makeup of the employer's work force and that of the community. That's false. The bill requires a plaintiff to prove that a specific employment practice or group of practices results in a disparate impact by race, religion, sex or national origin. Only then does the burden shift to the employer to justify the challenged practice or practices.

President Bush enjoys remarkable support among black Americans compared with the chill inspired by President Reagan. But he risks that standing with his loose talk of quotas. On examination, calling this a "quota bill" does this remedial legislation a profound injustice. Mr. Bush needs to make that examination.

Mr. METZENBAUM. Mr. President, I yield the floor.

I want to publicly extend my appreciation to the managers of the bill for permitting the Senate to go into morning business for the purpose of making these remarks. I am very grateful to both of them.

EXHIBIT 1

WORK IS RENEWED FOR ACCORD ON CIVIL RIGHTS BILL—RIGHTS SUPPORTERS SEEK COMPROMISE TO AVERT A VETO

(By Steven A. Holmes)

WASHINGTON, July 19.—Supporters of a major bill to prevent job discrimination, approved by the Senate Wednesday night, said today that they would work with the White House to avert a veto.

But both sides were equally firm in suggesting that there was only limited room for compromise. At the heart of the dispute is the Bush Administration's argument that the measure in its current form would force businesses to adopt quotas to protect themselves from lawsuits that allege discrimination in the hiring and promotion of minority members, women and members of religious groups.

ALL DEMOCRATS BACKED BILL

The Senate passed the legislation by a vote of 65 to 34 in a victory that was important but far from conclusive because it left the bill's supporters two votes short of the margin needed to override a veto. All the Senate's 55 Democrats voted in favor of the bill, joined by 10 Republicans. One Senator, William L. Armstrong, a Colorado Republican, was absent and did not vote.

"We'll continue to consider any proposals from the President," said Senator Edward M. Kennedy, Democrat of Massachusetts, the chief sponsor. "But we're not going to sacrifice the essential principles of this legislation."

QUAYLE ASSAILS LEGISLATION

Vice President Dan Quayle used strong language to denounce the legislation today, saying, "The Administration is not going to have a quota bill crammed down its throat disguised as a civil rights bill." But the White House used noticeably milder language, saying President Bush still hoped to avoid a veto.

"We'll work to change it in the House," said Marlin Fitzwater, the White House spokesman, as he traveled today with Mr. Bush in Anaheim, Calif. "We still want a bill we can sign."

The bill moves to the House where approval by the House Judiciary Committee is expected, possibly next week. Speaker Thomas S. Foley said today that he doubted that the measure would be considered by the full House before the summer recess, which is scheduled to begin on Aug. 6. Passage by the House appears certain.

The White House hopes to avert a veto, in part because passage of the bill has been a top priority of civil rights groups and Mr. Bush has sought to reach out to minority voters. White House officials fear that a veto would be a severe setback to Mr. Bush's efforts to win black support, which have paid off in poll ratings that show the President with an extraordinary level of popularity among blacks, for a Republican President.

The bill, which has the backing of civil rights groups, women's organizations, unions and major Jewish organizations, seeks to reverse six decisions by the Supreme Court in recent years that advocates for civil rights and women's groups say greatly weakened Federal anti-job discrimination efforts. It would also increase the potential awards that juries could grant to plaintiffs who proved willful discrimination.

COOPERATION PROMISED

The chairman of the House Judiciary Committee, Jack Brooks, a Texas Democrat, said today that he believed there were enough votes in the House to pass the bill without any alterations even if the Administration was "still screaming about quotas."

But other Democrats said they were willing to work to reach an accommodation with the White House.

"We're going to discuss the one or two items that might make them feel a little better," said Representative Don Edwards, a California Democrat.

Participants in the negotiations say the differences between the Administration and the bill's backers were slight. Indeed, on the critical issue of the standard of proof that businesses must meet to successfully defend themselves in certain types of large-scale discrimination lawsuits, the differences come down to a few words. However, both sides are looking ahead to how these words will be interpreted by the Federal courts.

These types of lawsuits involve allegations that a concern's policies have the effect, though unintended, of excluding individuals on the basis of their race, sex, color, religion or national origin.

Plaintiffs would have grounds for bringing these suits if they could show a gap between the number of minorities or women who are actually working for the company and the number of minority and female applicants who are qualified to perform the job. Plaintiffs would also have to identify the policies that produced the disparity. For example, a height requirement that could bar many women, or a requirement for a high school diploma that excluded black applicants.

Under Mr. Kennedy's bill, companies could defend themselves against these charges by demonstrating that the practice or policies that caused the exclusion were needed to do business.

The argument continues to be over the standard of proof companies would have to meet to show the practice was necessary to do business. The higher the standard of proof that businesses have to meet, the more advantage the plaintiffs would have. Administration officials say that high standards of proof would cause companies to adopt quotas to bring their work force in line with the demographics of the local community.

Last week, Mr. Kennedy and the White House chief of staff, John H. Sununu, agreed in principle to a two-part definition of business necessity. But, the White House wanted language saying that business necessity "in the case of employment practices primarily intended to measure job performance" must "bear a significant relationship to successful performance of the job." This, experts in the field agree, is a rather tough standard for businesses to prove.

For all other employment policies, business necessity would be defined as having "a significant relationship to a significant business objective of the employer." This is a markedly less stringent standard, experts say.

Civil rights advocates objected to the use of the words "primarily intended to," asserting that by definition these cases have nothing to do with intent. More importantly, civil rights groups wanted the bill to specifically say policies like hiring, promotion, recruitment and job assignments are included in the definition with the higher standard of proof. The White House refused.

While the differences between the two sides seem slight, the Administration was under intense pressure from conservatives and business lobbyist not to agree to the deal.

Last week, the two sides reached their agreement in principle on the two-part definition. But the Labor Policy Association Inc. a research and lobbying organization, took credit for scuttling the deal. In a memorandum to his board of directors, Jeffrey C. McGuiness, the organization's executive director, said a coordinated effort on the part of his group, the United States Chamber of Commerce, the National Association of Manufacturers and other business groups had brought pressure on the White House and prevented a final agreement.

Mr. McGuiness memo also cited business's distrust of Mr. Sununu's efforts. "For Republicans, the negotiations have become something of a death watch, wondering when and if Sununu will cave," the memo said.

Mr. BOREN. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT OF 1990

The Senate continued with the consideration of the bill.

Mr. BAUCUS. Mr. President, I ask unanimous consent that I might offer an amendment at this point.

The PRESIDENT pro tempore. What is the Senator's request?

Mr. BAUCUS. I ask unanimous consent that I might be recognized for the purpose of offering an amendment to the underlying bill.

The PRESIDENT pro tempore. The Senator's name is not on the list with an amendment. Is he asking unanimous consent, notwithstanding that fact, that he be recognized to offer an amendment?

Mr. BAUCUS. The Chair is correct.

The PRESIDENT pro tempore. Is there objection to the Senator's request?

Hearing no objection, it is so ordered. The Senator may proceed to call up his amendment.

Mr. BAUCUS. Mr. President, I rise to offer an amendment to make wood products eligible for all agricultural export programs.

The forest products industry is critical to my State and it is critical to many other States. It is the largest industry in Montana and Oregon, and the second largest in Washington and Idaho.

Increasingly, the thousands of workers employed by the forest products industry depend upon exports. For example, currently, about 16 percent of U.S. wood products are exported.

Unfortunately, a disturbingly high percentge of those exports have been

raw, unprocessed logs instead of finished products. For example, until recently, about 70 percent of the United States forest product exports to Japan—the largest export market—were unprocessed. They were not linerboard, or paper, or fiberboard, but unprocessed raw logs.

This is a pattern that must change. Every time we export a shipment of raw logs, we export jobs right along with them. Instead, we must strive to keep the logs and the jobs in America.

In the last year, I have worked with other timber State Congressmen to shift U.S. forest product exports from logs to processed products, and we have had some major successes.

For example, our country recently reached a major trade agreement with Japan to remove many Japanese barriers to processed forest product exports. The industry predicts that this agreement will eventually increase American processed forest product exports by $1 billion annually and create 10,000 to 20,000 new jobs.

The Senate has also passed legislation to ban the export of logs from public land. Assuming this measure can be successfully agreed to with the House, it will shift forest product exports from logs to finished products and increase employment in the forest products industry.

But this goal, this shift from raw logs to processed forest products, does not seem to be shared by all parts of the U.S. Government. While we have worked to increase processed forest product exports, certain executive branch agencies, such as the Treasury Department and the Office of Management and Budget, have systematically excluded forest products from agricultural export programs—particularly export credit guarantee programs.

These agencies argue that forest products should be treated as manufactured products, not agricultural products, and as such should not have full access to agricultural export credit guarantee programs.

They take this position even though it directly contradicts the definitions of agricultural products established in the 1988 Trade Act. In addition, the intent of Congress as expressed in report language is clearly to include forest products in all agricultural export programs.

Further, there is a long precedent for treating forest products as agricultural products, not manufactured products. For example, in the ongoing negotiations on agriculture in the GATT talks the U.S. Government has taken the position that forest products should be treated as agricultural products.

Yet, these executive branch agencies have chosen to ignore these extensive precedents and instead cite guidelines for extending export credit established under the OECD. These guidelines hold that export financing for manufactured products should be extended for no longer than 2 years.

But there is nothing in these guidelines to define the term "manufactured products" to include forest products. Further, these guidelines are not binding and certainly would not take precedence over American law.

Obviously, this is just another example of certain executive agencies being pennywise and pound foolish.

As many representatives of the forest product industry testified before the Agriculture Committee, access to export credit guarantees is critical if U.S. forest product exports are to break into new markets. Even Foreign Agricultural Service officials have conceded that export credit financing is critical in making arrangements to sell processed forest products to developing countries.

By denying processed forest products access to export credit financing, these executive branch agencies are costing the United States hundreds of millions of dollars in exports and thousands of jobs.

To reverse this shameful situation, I am today offering an amendment to direct the executive branch to grant forest products access to all export credit programs. The amendment has two sections.

The first section defines the term "wood products" to include a full range of processed forest products. This definition is drawn directly from the 1988 Trade Act. The farm bill already defines wood products as agricultural products.

The second section mandates that all export credit guarantee programs—including both GSM 102 and 103—both be extended to forest products on terms no less favorable than those extended to other agricultural commodities. This provision should make it clear once and for all that forest products are eligble for both GSM 102 and 103.

At a time when the United States has undertaken a policy of expanding processed forest product exports, we must ensure that the left hand and the right hand work together.

Thousands of jobs in the forest product industry are now jeopardized by environmental concerns. If we are to keep those workers working, we must be ready to use all tools that are available, including all agricultural export programs.

I hope this amendment permanently puts to rest the issue of whether or not forest products are to have access to export credit guarantee programs.

AMENDMENT NO. 2326

(Purpose: To clarify provisions of the Agricultural Trade Act of 1978 affecting wood and processed wood products)

Mr. BAUCUS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDENT pro tempore. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Montana [Mr. BAUCUS] proposes an amendment numbered 2326.

Mr. BAUCUS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 429, between lines 2 and 3, insert the following paragraph:

"(6) WOOD AND PROCESSED WOOD PRODUCTS.—The term 'wood and processed wood products' includes logs, lumber (such as boards, timber, millwork, molding, flooring, and siding), veneer, panel products (such as plywood, particle board, and fiberboard), utility and telephone poles, other poles and posts, railroad ties, wood pulp, and wood chips.".

On page 445, between lines 19 and 20, insert the following new subsection:

"(n) CONDITIONS FOR WOOD AND PROCESSED WOOD PRODUCTS.—The Secretary shall make guarantees available under subsections (a) and (b) for wood and processed wood products under terms and conditions that are comparable to the terms and conditions that apply to guarantees provided with respect to other agricultural commodities under such subsections.".

Mr. BAUCUS. Mr. President, I have described the amendment. I understand the amendment has been agreed to by the managers of the bill, both on the majority and minority sides, and at the conclusion of their remarks, if any, I ask that the amendment be adopted.

Mr. BOREN addressed the Chair.

The PRESIDENT pro tempore. The Senator from Oklahoma.

Mr. BOREN. Mr. President, the staff on this side of the aisle and the chairman, Senator LEAHY, are aware of this amendment. We have had an opportunity to study it, and there is absolutely no objection to the adoption of this amendment from this side of the aisle.

I commend the Senator from Montana for his continued interest and attention to the needs of the forest product industry in this country. No one has fought harder than he for those that are employed in this industry, and no one has worked harder than he has to assure that the continued vitality of this industry will make a very strong contribution to the economy of our country.

Time and time again, in trade negotiations and in other circumstances, we have heard from the Senator from Montana on these kinds of issues. He has effectively presented the case of those who are employed in this great

industry. He has effectively taught the rest of us about the importance of this industry to the total economy of the country, to our balance of trade, and he has sensitized the need for fair trade practices in this area.

The offering of this amendment is just a continuation of a longstanding effort on his part. I commend him for it. The Senator has been sound and solid on the points he has made, and we are happy to endorse this amendment on this side of the aisle.

Mr. LUGAR addressed the Chair.

The PRESIDENT pro tempore. The Senator from Indiana.

Mr. LUGAR. This amendment emphasizes that wood products should be an integral part of our foreign aid and commercial export programs. It is in fact a very clear statement of the intent which Congress first established in the 1988 trade bill.

Wood products should be an important part of our foreign aid and trade efforts. This amendment makes that clear. I am pleased to accept it on our side.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Montana.

The amendment (No. 2326) was agreed to.

Mr. BAUCUS. Mr. President, I move to reconsider the vote.

Mr. BOREN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BOREN. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. LUGAR. Mr. President, I ask unanimous consent that an amendment might be eligible for consideration that is not on the list before the Chair.

The PRESIDENT pro tempore. Would the Senator repeat his request?

Mr. LUGAR. Yes. I will further clarify that the amendment is an amendment that the distinguished chairman of the committee, Senator LEAHY, has crafted and has asked me in his absence to offer dealing with options for debt forgiveness.

The PRESIDENT pro tempore. The Chair does not see on the list an amendment by Mr. LEAHY.

Mr. LUGAR. The Chair is correct. The amendment is an additional amendment that Senator LEAHY has crafted to be part of the consideration of the farm bill. At this point it seemed useful to offer the amendment and take action on it, if there would be unanimous consent for that procedure.

The PRESIDENT pro tempore. Is there objection to the request?

Without objection, it is so ordered.

Mr. LUGAR. I thank the Chair.

AMENDMENT NO. 2327

Mr. LUGAR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDENT pro tempore. The clerk will report the amendment.

The bill clerk read as follows:

The Senator from Indiana [Mr. LUGAR], for Mr. LEAHY (for himself and Mr. LUGAR), proposes an amendment numbered 2327.

Mr. LUGAR. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 415, (section 403(b))—
(a) line 12 strike "or".
(b) line 16 strike the period and insert "; or"; and
(c) between lines 16 and 17 insert:
"(4) if such an agreement, program or facility is not in effect, the country is pursuing national economic policy reforms that would promote democratic, market-oriented, and long term economic development.".

Mr. LUGAR. Mr. President, the distinguished chairman of the Agriculture Committee, Senator LEAHY, offers the amendment which I am delighted to cosponsor.

This amendment adds to the conditions under which the President may provide debt forgiveness for countries in debt to the Commodity Credit Corporation. In general, the existing provision allows debt forgiveness for those countries which have formal agreements for economic reform with major international financial institutions.

The amendment before the Senate says:

If such formal agreement, program or facility is not in effect, the country is pursuing national economic policy reforms that would promote democratic market-oriented development, and long term economic development.

The amendment would add to the President's flexibility and ability to respond to debt forgiveness requests thus encouraging the kind of free-market orientation that is badly needed in many developing countries. The amendment is a very positive addition to the bill.

Mr. President, I ask unanimous consent that I be added as a cosponsor with this legislation.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. LUGAR. Mr. President, I commend the amendment for adoption and yield to my distinguished colleague.

The PRESIDENT pro tempore. The Senator from Oklahoma [Mr. BOREN].

Mr. BOREN. Mr. President, the amendment just offered by the distinguished ranking minority member of the committee is enthusiastically supported on this side of the aisle. It has been offered on behalf of the chairman as well as on behalf of Senator LUGAR. It is sound policy. I ask unanimous consent that I might also be added as a cosponsor of the amendment.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BOREN. Mr. President, as I say there is no objection on this side of the aisle. It is strongly supported.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment (No. 2327) was agreed to.

Mr. BOREN. Mr. President, I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDENT pro tempore. The Senator from Oklahoma.

Mr. BOREN. Mr. President, I ask unanimous consent I be permitted to offer an amendment on behalf of the Senator from New York [Mr. MOYNIHAN] in spite of the fact that no amendment by the Senator MOYNIHAN in included in the list of those amendments previously cleared under the unanimous-consent agreement for action at this time.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Oklahoma is recognized for that purpose.

AMENDMENT NO. 2328

(Purpose: To require the Secretary of Agriculture to conduct a study of the New York-New Jersey Highlands)

Mr. BOREN. Mr. President, on behalf of Senator MOYNIHAN the distinguished Senator from New York, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDENT pro tempore. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from Oklahoma [Mr. BOREN], for Mr. MOYNIHAN, proposes an amendment numbered 2328.

Mr. BOREN Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 857, between lines 20 and 21, insert the following new chapter:

CHAPTER 6—NEW YORK-NEW JERSEY HIGHLANDS

SEC. 1545. STUDY CONCERNING NEW YORK-NEW JERSEY HIGHLANDS.

(a) IN GENERAL.—The Secretary of Agriculture shall conduct a study of the region known as the "New York-New Jersey Highlands", located in New York, New Jersey, and Pennsylvania, including the Sterling Forest in Orange County, New York (here-

inafter referred to in this section as the "region").

(b) SCOPE OF STUDY.—The study authorized under subsection (a) (hereinafter referred to in this section as the "study") shall include an identification and assessment of—

(1) the physiographic boundaries of the region referred to in subsection (a);

(2) forest resources of the region, including timber and other forest products, fish and wildlife, lakes and rivers, and recreation;

(3) historical land ownership patterns in the region and projected future land ownership, management, and use, including future recreational demands and deficits and the potential economic benefits of recreation to the region;

(4) the likely impacts of changes in land and resource ownership, management, and use on traditional land use patterns in the region, including economic stability and employment, public use of private lands, natural integrity, and local culture and quality of life;

(5) alternative conservation strategies to protect the long-term integrity and traditional uses of lands within the region; and

(6) the impact of forest land conversion to alternative uses on the surrounding area and any threats that this may pose.

(c) ALTERNATIVE CONSERVATION STRATEGIES.—The alternative conservation strategies referred to in subsection (b)(5) shall include a consideration of—

(1) sustained flow of renewable resources in a combination that will meet the present and future needs of society;

(2) public access for recreation;

(3) protection of fish and wildlife habitat;

(4) preservation of biological diversity and critical natural areas; and

(5) new local, State, or Federal designations.

(d) PUBLIC PARTICIPATION.—In conducting the study, the Secretary shall provide an opportunity for public participation.

(e) TIME LIMIT.—The study shall be complete not later than 12 months after the date on which funds are appropriated under subsection (f).

(f) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $250,000 to carry out this section.

Mr. MOYNIHAN. Mr. President, I offer this amendment to authorize a study of the New York-New Jersey Highlands area, including Sterling Forest, which is located less than 40 miles from New York City. This study is important to understand the value of this natural resources and the impact of alternative land use decisions.

Sterling Forest is 21,000 acres of wooded ridges, lakes, and wetlands in New York's Orange County and New Jersey. The study would identify and evaluate the natural, recreational, scenic, and cultural resources of undeveloped areas in the New York-New Jersey Highlands region and would predict what the impact of residential, commerical, and industrial development would be on those resources and on nearby communities.

As one of the last remaining large tracts of undeveloped land in the New York metropolitan area, Sterling Forest is a valuable natural resource. This study will simply permit us to make informed decisions on the future of Sterling Forest and other forest areas in the New York-New Jersey Highlands region. I thank the distinguished chairman of the committee, Senator LEAHY, and ranking member, Senator LUGAR, for their support.

I thank the Chair, and yield the floor.

Mr. BOREN. Mr. President, this amendment which I have sent to the desk on behalf of Senator MOYNIHAN is an amendment which provides for a $250,000 study to be conducted on the effects of deforestation in the New York-New Jersey highlands.

I think that the amendment is a particularly sound idea. A study of this kind has already been conducted on problems of deforestation in the Adirondack region of Vermont, New Hampshire, and Maine, the northern forest lands study and eventually some of the forested lands in New York and New Jersey might qualify for the Forest Legacy Program in our title of the farm bill.

We have had significant problems of changes in this area, the need to consider ways to protect the forest lands and return these areas to alternative economic uses.

There are a number of uses which could be considered, including recreational uses among them. As I have indicated, this kind of study has been particularly beneficial in the past in the Adirondack area.

I believe that this amendment has been cleared on both sides of the aisle. It is supported by the managers of the bill on this side of the aisle, and I urge the adoption of the amendment.

Mr. LUGAR. Mr. President, indeed, we do support the amendment.

As the distinguished Senator from Oklahoma has pointed out, such studies have already been conducted in the Adirondacks, specifically in Vermont, New Hampshire, and Maine, the so-called Northern Forest Lands Study. Eventually some of the forested highlands in New York and New Jersey might qualify for the Forest Legacy Program which has been included in the farm bill now before the Senate. Our Forest Legacy Program calls for Federal cost-sharing of up to 75 percent of the cost of permanent easements to keep forest lands specifically from being converted to nonforest uses.

We recommend strongly that the Senate adopt the Moynihan amendment.

Mr. BOREN. Mr. President, knowing no further debate on this particular amendment, I urge adoption of the amendment.

The PRESIDENT pro tempore. If no Senator seeks recognition, the Chair will automatically put the question.

The question is on agreeing to the amendment.

The amendment (No. 2328) was agreed to.

Mr. BOREN. Mr. President, I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDENT pro tempore. The Senator from Oklahoma.

Mr. BOREN. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BOREN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro termpore. Without objection, it is so ordered.

AMENDMENT NO. 2329

Mr. BOREN. Mr. President, I ask unanimous consent that, notwithstanding the fact that there is no amendment listed by Senator LEAHY under the previous unanimous-consent request, I might be recognized to send an amendment to the desk on his behalf at this time.

The PRESIDENT pro tempore. Is there objection? The Chair hears none.

The Senator from Oklahoma may send the amendment to the desk on behalf of Mr. LEAHY.

The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Oklahoma [Mr. BOREN], for Mr. LEAHY, proposes an amendment numbered 2329.

On page 1079, in section 1943, line 8, after "Secretary of Agriculture" insert ", in consultation with the Secretary of Energy,".

Mr. BOREN. Mr. President, this is a very simple amendment. There is already established in the farm legislation a demonstration project under which the Secretary of Agriculture will undertake to determine the benefits for energy production of biomass conversion, forest products essentially being converted into energy.

This amendment is offered at the request of the Energy Committee and, it is my understanding, also at the request of the Secretary of Energy. It merely requires that in carrying out this directive to study biomass conversion as a source of energy that the Secretary of Agriculture consult with the Secretary of Energy in the carrying out of this particular demonstration project. It is a very simple, straightforward amendment and it is supported on this side of the aisle and acceptable to the managers on this side.

Mr. LUGAR. Mr. President, we accept the amendment and support the amendment on this side of the aisle.

The PRESIDENT pro tempore. The question is on the adoption of the amendment.

The amendment (No. 2329) was agreed to.

Mr. BOREN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BOREN. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, I ask unanimous consent to speak as if in morning business.

The PRESIDENT pro tempore. Without objection, it is so ordered. The Senator from Montana is recognized.

AMENDMENT NO. 2314

Mr. BAUCUS. Mr. President, the Senate is considering an amendment to lower the price support for sugar. I strongly oppose the amendment.

If you listen to the supporters of this amendment, you would be left with the impression that the U.S. Sugar Program is a great affront to the principle of free trade. In their view, this is just another example of an inefficient industry being protected at the expense of consumers. But, Mr. President, this interpretation simply does not match the facts.

Look around the world. The U.S. sugar support system pales in comparison with those of our trading partners.

Our main competitor in world agriculture markets, the European Community, maintains a sugar program that makes ours appear anemic. The European Community program is complicated. It includes export subsidies, it includes import barriers, it includes price controls, and it includes minimum prices. It is very complicated. It is also, therefore, difficult to compare the European Community program directly with our American Sugar Program.

But most sugar in the EC was supported at a rate of about 30 cents per pound compared to 18 cents per pound in the United States.

While critics bemoan the fact that the U.S. program has decreased sugar imports, they should consider that the EC's Sugar Program has converted the Community from a major sugar importer to one of the world's largest sugar exporters.

The EC sells its high priced sugar by dumping it on the world market with the help of extensive export subsidies.

Certainly, the EC program is far more damaging to developing country exporters than the U.S. program.

OTHER NATIONS' PROGRAMS

And the EC is not alone. Many other nations, including Argentina, India, Poland, Cuba, China, and Japan all maintain sugar supports.

The International Trade Commission recently completed a study that compared relative sugar support in major nations. According to the ITC's analysis the Sugar Program in the EC provides European farmers with protection equivalent to a 360-percent tariff. The Japanese program is equivalent to a 170-percent tariff. The U.S. program was judged equivalent to a 102-percent tariff—quite modest by comparison.

In other words, our major trading partners provide two to three times as much support to their sugar farmers as we do.

U.S. SUGAR PRODUCERS ARE COMPETITIVE

In light of these figures it should come as no surprise that the U.S. sugar industry has supported dropping sugar subsidies if—and I emphasize if—our trading partners would do likewise.

In fact, a recent study by USDA indicates that U.S. sugar producers would fare well in a world in which the trade in sugar was completely free.

USDA found that U.S. producers had the seventh lowest production costs among the 31 nations that produce beet sugar. And the United States ranked 33d among the 61 nations that produce sugar from cane.

We are the low cost producers in beet sugar and we are in the middle or average among cane producers. Therefore we could very easily sustain and in fact we encourage a completely free trading system where no country supports the price of sugar.

UNILATERAL DISARMAMENT

But even the most competitive industry could not survive in a world in which the United States practices free trade and the rest of the world does not. Yet, that is exactly what the sponsors of this amendment are proposing.

For the last 4 years, the United States has been involved in an intense negotiation with our trading partners to lower agricultural subsidies under the rubric of the GATT. Those negotiations are expected to conclude in December this year. Just last week, President Bush personally attempted to convince our trading partners to move in these negotiations. But he was not successful.

The EC doggedly maintains that they will not accept elimination of agricultural subsidies. The EC has dragged its feet throughout these negotiations. Still our negotiators hope to force the EC to accept liberalization. I hope they succeed. But they will not succeed unless the United States keeps the pressure on our competitors with a strong farm program.

At such a critical stage in these negotiations, it shocks me that some—including the administration—would press for cuts in the Sugar Program.

Consumers, developing nations, and farmers would all benefit far more from a multilateral cut in sugar subsidies than in an American unilateral cut.

But, as in arms control negotiatons, the United States must be prepared to bargain from strength.

If the United States is willing to unilaterally eliminate its Sugar Program without any similar cuts in other nation's sugar programs, those other nations will have little incentive to negotiate. The United States will have signaled that it is willing to bear the burden of adjustment unilaterally without similar steps by our trading partners.

And believe me the EC would far rather have their cake and eat it. They would very much like us to make a unilateral cut when they do not have to make one themselves.

But if the United States keeps its Sugar Program and keeps the budgetary pressure on its competitors, other nations will have an incentive to come to the bargaining table and negotiate cuts.

From the perspective of developing nations and consumers, cutting our Sugar Program unilaterally at this stage amounts to taking a half step forward and four steps backward.

Not only will it do little to improve their situation, it will ensure that the real villains in the world sugar market—the EC—will continue to distort world markets.

If we are really interested in worldwide reform of the sugar trade, a unilateral cut is one of the most counterproductive steps I can imagine.

THE ADMINISTRATION'S POSITION

I am aware that proponents of this amendment will introduce statements from the Bush administration's leading trade negotiators indicating their support for this amendment. In my view, these statements represent a victory for ideology over common sense.

Apparently, this administration's negotiators are so committed to abolition of the Sugar Program that they are willing to do so at any cost—even if it jeopardizes its goals in the GATT negotiations and means sacrificing our farmers. I have worked with the administration's trade negotiators on many issues as chairman of the Senate Finance Committee's International Trade Subcommittee. I have generally found them to be quite capable. But endorsing this amendment is a serious

error on their part. We simply cannot bargain from a position of weakness.

CONCLUSION

If we are willing to cut back our agricultural supports and get nothing in return from our competitors, rest assured our competitors are more than willing to avoid making any sacrifices.

Farmers, consumers, and developing nation exports would all be better off if we focused our efforts on successful international negotiations rather than unilateral cuts.

Free trade principles apply to all nations, not just the United States. I urge my colleagues to keep focused on the long-term goal of worldwide agricultural reform and reject this amendment as counterproductive.

I yield the floor.

The PRESIDENT pro tempore. The Senator from North Dakota [Mr. CONRAD] is recognized.

AMENDMENT NO. 2330

(Purpose: To modify the repayment requirements for advance deficiency payments for certain producers)

Mr. CONRAD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDENT pro tempore. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from North Dakota, [Mr. CONRAD], proposed an amendment numbered 2330.

Mr. CONRAD. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 329, between lines 5 and 6, insert the following new subsection:

(c) REPAYMENT REQUIREMENTS.—

(1) IN GENERAL.—Notwithstanding any other provision of law, effective only for producers on a farm who received an advance deficiency payment for the 1988 or 1989 crop of a commodity and are otherwise described in paragraph (2), the Secretary of Agriculture—

(A) shall not charge an annual interest rate for any delinquent refund for the advance deficiency payment in excess of 9 percent;

(B) shall withhold no more than one-third in each of the next three crops years of farm program payments to the producers as a result of any delinquency in providing the refund; and

(C) shall permit the producers to make the refund in three equal installments during each of the crop years 1990, 1991, and 1992, if the producers enter into an agreement to obtain multiperil crop insurance for each of the crop years to the extent the Secretary determines is similar to section 107 of the Disaster Assistance Act of 1989 (7 U.S.C. 1421 et seq.).

(2) APPLICATION.—This subparagraph shall apply in the case of producers on a farm if—

(A) the producers received an advance deficiency payment for the 1988 or 1989 crop of a commodity under section 107C(a) of the Agricultural Act of 1949 (7 U.S.C. 1445b-2(a);

(B) the producers are required to provide a refund under subparagraph (G) or (H) of section 107C(a)(2) of such Act with respect to the advance deficiency payment; and

(C) the total quantity of the 1988 or 1989 crop of the commodity that the producers were able to harvest is less than the result of multiplying 65 percent of the farm program payment yield established by the Secretary for the crop by the sum of the acreage planted for harvest and the acreage prevented from being planted (because of natural disaster, as determined by the Secretary) for the crop.

On page 329, line 6, strike "(c)" and insert "(d)".

The PRESIDENT pro tempore. Time on this amendment is 1 hour to be equally divided and controlled in accordance with the usual form, which means that the Senator who has 30 minutes in opposition to the amendment is the manager of the bill. Does the manager of the bill oppose the amendment, the Chair inquires?

Mr. BOREN. Mr. President, the manager of this bill as of this moment in its current form is not prepared to accept the amendment and is obligated to oppose the amendment.

The PRESIDENT pro tempore. The Chair thanks the Senator.

The Senator from North Dakota [Mr. CONRAD] is recognized for 30 minutes.

Mr. CONRAD. Mr. President, this amendment allows farmers hit with drought or other natural disasters in 1988 or 1989 to repay excess advance deficiency payments in 1988 and 1989 over 3 years at a 9-percent rate of interest.

It requires farmers taking advantage of this delay to purchase multiperil crop insurance for the 3-year period.

Mr. President, the reason for the amendment is to give farmers already suffering from drought or other natural disasters in 1988 or 1989, a chance to repay USDA overpayments under reasonable terms and interest rates. In 1988 and 1989 the United States suffered the worst drought in 50 years. As production was cut by the drought, prices rose substantially. The rise in prices sharply reduced the advance payments due farmers, requiring them to return much of the payments that had been paid in advance. Unfortunately, farmers hit by the drought had little production to sell at the higher prices. Not only did they have no crop, they were required to pay back the advance payments.

Mr. President, what we have here, really, is a double whammy on already hard-pressed farmers. They were faced with a situation in which payments were made to them based on an estimation of what their deficiency payment would be for the year. Then came the drought. The drought wiped out much of the farm production in this country. As a result, prices rose wiping out the deficiency payment due farmers.

Unfortunately, the whole advance deficiency payment schedule is predicated on the notion that if prices rise, farmers will get the benefit of the price increase. In this case, farmers did not. They did not get the benefit because their crops had been destroyed, and so when the prices went up, they had no crop to sell.

While the drought has been broken in most of the northern plains, spots of drought continue in Montana, Minnesota, North Dakota, and South Dakota. In Texas, Arkansas, and Missouri, and Oklahoma, floods have reduced income again this year.

In my own State of North Dakota, the 1988 drought reduced the farm income by 50 percent below 1987 levels. The 1989 drought was not as severe but still reduced income from 1987 levels by 30 percent.

After the farm recession of the 1980's and two droughts, many family farmers simply do no have enough money to make the whole repayment this year. This legislation allows them 3 years to repay: One-third this year and one-third each of the next 2 years at 9 percent interest.

Mr. President, the Secretary of Agriculture currently has the authority to allow farmers to repay over 3 years without paying the penalty rate of interest. Unfortunately, the Secretary has not used this authority. If the Secretary had chosen to exercise his authority to allow farmers hard hit by natural disasters to repay over 3 years, this amendment would not be necessary.

This bill will not increase Government spending over the next 3-year period. I want to emphasize that. Over the 3-year period, it is budget neutral. It will, however, increase the deficit in fiscal year 1990 by about $150 million and reduce the deficits in fiscal years 1991 and 1992 by an equal amount, $75 million each year.

Mr. President, this amendment will help family farmers hit hardest by the drought and other natural disasters over the past few years. Instead of demanding an immediate repayment, it would give them 3 years to repay.

Mr. President, I want to acknowledge at this moment that the estimates that we have used from CBO are subject to some alteration and change because the underlying amendment has been altered somewhat. For that reason, I ask unanimous consent that we put off any vote on this amendment until tomorrow so that we have a chance to get CBO's new analysis so that my colleagues will be voting on the precise number that would result in the budget from this legislative enactment.

Mr. BOREN addressed the Chair.

The PRESIDENT pro tempore. The Senator from Oklahoma [Mr. BOREN].

Mr. BOREN. Reserving the right to object, and I will not object to this request, I stated just a few moments ago that as acting manager of the bill, I will be forced to oppose this amendment in its current form. The reason for my opposition is not lack of sympathy in regard to the plight of those farmers who have suffered in the State of North Dakota and the Plains States in general from the terrible drought of 2 years ago. I understand full well the devastating impact that it has had, the inability of the farmers through cash flow and this period of time over the last 3 years to bring themselves back to a position in which they are able to repay these funds to the Government.

So I have great sympathy for the difficulty of these famers who have been highlighted by the distinghished Senator from North Dakota who has so forcefully and ably given their case in the Agriculture Committee and on the floor of the Senate previously.

This bill has been carefully crafted to stay within the bounds of the budget available to us this year. We have all had to reach compromises. We have all had to strike out elements of the bill that we favor very strongly because of the cost of these particular proposals. So, therefore, unless we can find some way to bring this proposal back into budget with the new analysis, it will be very difficult for the managers of the bill to accept this amendment.

So I think the Senator's proposal is a reasonable one. We might have the latest analysis from CBO available to us before we actually bring this amendment to the floor for a vote.

I will not object on behalf of the managers on this side to the request that the vote be delayed until this latest analysis is available.

Mr. LUGAR addressed the Chair.

The PRESIDENT pro tempore. Is there objection to the request?

Mr. LUGAR. Reserving the right to object.

The PRESIDENT pro tempore. The Senator from Indiana.

The Chair would ask, is the time in speaking upon the reservation of the objection being charged to the Senator from Oklahoma? Or is it being charged to the Senator from North Dakota?

Mr. LUGAR. Mr. President, I ask the distinguished Senator from Oklahoma to yield to me 3 minutes that I might speak.

Mr. BOREN. I will be happy to yield to my distinguished colleague from Indiana and to request that the time that I have taken previously and the time of the Senator from Indiana be charged against this side.

The PRESIDENT pro tempore. Without objection, it is so ordered. The time will be so charged.

The Senator from Indiana.

Mr. LUGAR. Mr. President, I reserve the right to object because the arrangement of the Senate with regard to this amendment is that an hour of debate should occur today and then a vote pertaining to the amendment should occur not before 6 o'clock. Certainly, it was the intent of the managers that a certain number of amendments should be debated today. The distinguished majority leader had high hopes, and he so stated, that such debate would occur and that such amendments would be disposed of at the end of the day. Senators were on notice that that would occur.

My own judgment, in reserving the right to object, is that however one changes the impact of the costs of this amendment, whether it be for a year or spread out or other arrangements are made, there is still a substantial cost involved in the event that farmers do not repay their deficiency or advanced deficiency payments. That impact, as the Senator from North Dakota has pointed out, could be in the order of $150 million if these payments are not repaid. His assumption is that they will be repaid. I gather the intent of the amendment is to space out the payments so that they may occur.

I will argue this point further, Mr. President, with regard to the merits of the amendment itself, at least the experience of this Senator having noted that already the payment of these debts have been delayed three times. There is a growing assumption on the part of this Senator that the underlying intent is to make certain they are never repaid. In essence, by deleting or pushing back the date and the circumstances of repayment, the circumstances of repaying amounts stemming from the 1988 crop grow more dim all of the time. I argue the fact there is a fiscal impact and it is substantial. It comes at a very unfortunate time in the life of this country and this bill.

With regard to the procedure, Mr. President, my suggestion, I suppose, while I reserve the right to object to the procedure offered by the distinguished Senator from North Dakota, is that if we are to take up the new amendment on its merits tomorrow, then it ought to be offered tomorrow, time ought to be reserved for it so we can hear the argument and Senators coming to a vote will have some idea of the substance on which they are voting.

Therefore, respectfully, Mr. President, I object to the current request, having given this advice as to how the Senator might proceed.

The PRESIDENT pro tempore. Objection is heard.

Mr. CONRAD addressed the Chair.

The PRESIDENT pro tempore. The Senator from North Dakota.

Mr. CONRAD. Mr. President, I simply say to my colleague from Indiana that the amendment is not changing. The amendment that I am offering is the amendment that is at the desk. The fiscal analysis of the effect may be altered because what we have the CBO response to was a different amendment, not a great difference but somewhat different.

So the reason for my request was to try to honor the desire of the manager to have the debate occur today but the vote occur subsequent.

That was the reason for my request. It seemed to me that we would be able to debate the underlying question today but then vote at a later date.

I might add that there was no unanimous-consent agreement, as I understood it, that indicated we would vote on this amendment today. The unanimous-consent agreement was that we would debate this amendment today—and I have been trying to honor that by coming forward and debating it—but putting off the vote until we have the most recent CBO information.

Perhaps at this point it would be appropriate to put in a quorum call and have a chance to discuss this matter and perhaps that is the way we could make the most progress. With that, I note the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been noted. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CONRAD. I yield such time as the Senator from Montana may consume.

The PRESIDENT pro tempore. The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, I ask the Senator to yield, say, 10 minutes.

Mr. CONRAD. I yield 10 minutes to the Senator from Montana.

The PRESIDENT pro tempore. The Senator from Montana is recognized.

Mr. BAUCUS. I thank the Senator.

I rise in support of the Conrad amendment.

The effect of the amendment will be to defer the repayment of barley advance deficiency payments from 1988 to 1989 crops years. Under the amendment, any farmer who had suffered a 50-percent crop loss in 1988 or 1989 or a 25-percent loss in each of those years would be able to repay their advance deficiency payments over 3 years at 9 percent interest.

I believe this is the least we can do for our barley producers who suffered great crop losses as a result of the droughts of 1988 and 1989. I know that we have voted on this issue before and the position of the Senator from North Dakota and myself is well known. I urge my colleagues this time

to support us because this amendment will merely provide a delay in the repayment. It is not a forgiveness.

I repeat that point, Mr. President. This amendment merely provides for a delay in repayment. It is not a forgiveness. I wish the amendment did provide forgiveness because I believe that is what barley farmers deserve. This is not that amendment.

The farmers in my State have been greatly disadvantaged by the USDA's method of calculating deficiency payments. And now because of an unexpected decrease in the market price of barly as a result of droughts in 1988 and 1989, they are being asked to repay money they do not owe.

The basic flaw with the USDA's current system is that it fails to recognize that there are two types of barley, malting barley and feed barley. Malting barley is used for brewing beer and normally sells at a premium. Feed barley is primarily used for animal feed and sells at a much lower price. Much of the barley produced in my State is feed barley.

Currently, the USDA calculates the target price for barley based on the relative value of feed barley to corn. It assumes that the barley will be used to feed animals, not for malting. However, the USDA then calculates the market price by averaging the price of all barley sold on the market. Both feed and malting barley are therefore, grouped together. Malting barley normally sells for 25 to 35 cents per bushel more than feed barley. In most years, far more feed barley is produced than malting barley, so malting barley sells at a relatively small impact on the average price for barley.

However, due to the drought of 1988, the barley crop was much smaller than expected. Malt barley market prices skyrocketed to $3.24 a bushel as compared to $2.29 per bushel for feed barley. Consequently, the USDA calculated the national average market price for barley as a whole to be $2.83 or 32 cents a bushel above the actual market price of feed barley at $2.51.

This inequitable calculation places feed barley preoducers at a unique disadvantage. USDA estimated that the average market price for barley would be much lower and made advance deficiency payments assuming a lower market price. Remember, a lower market price means larger Government payments and vice versa.

It later became apparent that the USDA advance deficiency payment exceeded the value of the entire year's deficiency payment if the artificially high market price for barley was used.

Thus USDA demanded that feed barley producers repay a large portion of their deficiency payment because the market price was higher than expected. But including malting barley in USDA's calculation skewed the market price of barley up and forced producers to pay their deficiency payment even though the real market price was far lower than USDA's estimate.

This is an outrage. USDA's 32-cent miscalculation could put many Montana barley farmers out of business. The error will force 16,400 Montana barley producers to repay $19 million in advance deficiency payments for 1988 and 13,200 producers will have to repay $6,750,000 for 1989.

This error would be bad enough if it was not exacerbated by the drought.

Many barley farmers lost most of their crop to the drought in 1988 and 1989 but managed to survive. In northeastern Montana, they are now struggling to survive yet another drought year.

But instead of helping, the USDA has now delivered a knockout blow by demanding they repay money they do not really owe.

Because USDA is unwilling to own up to its mistake, many Montana barley farmers will be driven off the farms.

But we are not here even seeking to completely right this wrong with the amendment we should be debating. Instead, we are only asking a little more time for barley farmers to work out their finances to repay the advance deficiency payments. Surely, this is not too much to ask.

Fortunately, this problem will not likely recur in the future because the current farm bill that the Agriculture Committee reported out and is now before the floor recognizes the formula used to calculate barley deficiency payments is unfair and partially addresses the problem by calculating the average price of malt and feed barley together for deficiency payment purposes, that is, until the price difference reaches 22 cents.

For any price differential over 22 cents malt and feed barley will be calculated separately. While this formula does not completely fix the problem, it is a step in the right direction.

It was my initial plan to make this formula retroactive to the 1988–89 crop years so that feed barley producers would be treated more fairly, but unfortunately the Senate has passed no appropriations bills which could be utilized to offset such an amendment.

Therefore, delaying repayment is the best we can do for the time being, given our current budget situation.

I strongly urge my colleagues to support the amendment of the Senator from North Dakota. It will provide at least temporary relief to barley producers who have been penalized because of the faulty USDA formula.

Mr. President, I yield the remainder of my time. I yield the floor.

The PRESIDENT pro tempore. Who yields time?

Mr. LUGAR. Mr. President, I ask unanimous consent the distinguished Senator from Oklahoma yield to me 2 minutes to speak in opposition to the amendment.

Mr. BOREN. I am happy to yield.

The PRESIDENT pro tempore. The Senator from Indiana is recognized.

Mr. LUGAR. Mr. President, the distinguished Chair will recall that debate concerning repayment of these debts has occurred three times. As a matter of fact, the Senate has previously taken action that has been dramatic and substantial.

The Chair in fact was managing an appropriations bill on the last occasion on April 30 when by a vote of 52 to 43, an amendment by Senator CONRAD offering similar relief was defeated.

Mr. President, the dilemma presented by the distinguished Senator's amendment is that farmers were paid, as he has described, for crops that were to be harvested in due course. The advanced deficiency payment concept is to forward to farmers money that they can use for cash flow as they get into the planting of crops.

So the money was paid to the farmers, not only barley farmers, but corn farmers and wheat farmers. I make this point because there are others involved in this equation in addition to the barley farmers cited by the distinguished Senator from North Dakota. In fact, in his own State, there are farmers who produce other crops. But, barley farmers are the focus of our attention for the moment, and have been the focus of our attention several times already in committee and on the floor.

The dilemma came down to the fact that there was a great drought in 1988. It affected at least 20 States. This body considered emergency drought legislation in August 1988 and offered very substantial relief. We estimated at the time that the cost of that relief to farmers who were in need might be on the order of about $3.5 to $4 billion.

Indeed, that was a reasonably accurate estimate as payments were finally made to those who had suffered very substantial losses of over 35 percent of their crops. We made it a comprehensive bill covering, as the distinguished Senator from Kansas pointed out, as many as 400 or 500 different crops and commodities in this country.

So there was equity, and payments were made to try to compensate farmers for a substantial amount of those losses. There were grievous losses in the State of North Dakota. As I recall the figure, the North Dakota farmers received more than any other State save maybe one or two, and perhaps they received the absolute highest level of payments. That reflected very substantial drought, and in fact moisture deficiency in that State from the preceding year.

So therefore I understand the basis with which the Senator from North Dakota compassionately takes a look at farming devastated by that drought. I would simply point out that the farmers already have been helped in one way by having money in hand. Time, in money terms, is worth a lot—to have money in hand and to be able to use that capital prior to planting a crop by farmers in North Dakota and Indiana. Indiana also suffered a drought that was very, very devastating—the worst one we had seen since the 1930's.

So many, including those in Indiana, were beneficiaries of that drought legislation. I know how welcome those payments were, both the advanced deficiency payments we received in Indiana, as well as the drought payments.

But there comes a time, Mr. President, when the payments that are not merited, have to be returned. There are only two ways in which the payments would not have been merited. One is that the price of the crop rises, and therefore the advanced deficiency payment, the payment that contemplates that there will be a deficiency between the target price and the market price, diminishes. That is what the deficiency payment is all about—this gap between target price and market price.

If in fact there is not much of a gap, if in fact the market price rises up toward the target price to meet it, then a payment to a farmer for a deficiency that does not occur, results in a profit to the farmer from the fact that the price rose. The farmer profits again when he sells the crop at that point.

If the farmer did not have the crop to sell, he was protected when he received a disaster payment to cover a good part of his loss. We estimate coverage in most cases at about 65 percent of a normal loss.

So in due course, through the farm programs the farmer has the money, and the requirement, that he pay it back.

Not only has the Senator from North Dakota argued on other occasions, but so have other Senators, that given these disasters there ought to be a degree of forbearance. That has occurred. This is the reason in the middle of 1990 we are still in the process as a country of collecting back these payments made as advanced deficiency payments in the crop year of 1988—over 2 years ago.

How could this be? It could be because the Congress has delayed these payments or repayments from time to time.

Mr. President, in an earlier argument that I made, I reserved the right to object to the unanimous-consent request. I suggested that there is a growing suspicion on the part of some of us that to delay and to delay and to delay is almost to forgive and forget.

At some point, in all equity, that money ought to come back to the general taxpayers. Most other farmers paid it. Corn farmers in Indiana have repaid, and as far as I can tell, most of the advanced deficiency payments that were made to those farmers were made at about the same time as these barley payments in North Dakota.

That would be true of most other States in the Union.

Let me just point out, Mr. President, that the Senator from North Dakota can speak, and will very eloquently, to the condition of crops in his State. But of these reports that have been published nationally, say that as of July 10, a few days ago, 81 percent of North Dakota's spring wheat crop was in good to excellent condition; 84 percent of North Dakota's Durum wheat crop was in good to excellent condition. While the same was true of 89 percent of the barley crop, there is some distance to go before harvest. That is the challenge, and, likewise, the cause of the precarious existence of the farmer.

But I would suggest that there is a very good chance that relatively few North Dakota farmers who are involved in those three crops I have cited will have 35 percent losses this year.

The Senator from North Dakota has suggested that perhaps we ought to take a look at the accounting aspects of this. First of all, basically, who has not repaid the deficiency payments? Really, how much money is out there? That is a very important question. As of the 1st of June, our staff was advised that the repayments by farmers of all crops was somewhere on the order of $400 million.

We have tried to make a staff estimate applying it just to barley farmers and just to those who had had very substantial losses. In such cases it might be $150 million. But I suggest, Mr. President, that either of those figures—and I am inclined to think it is the smaller rather than the larger figure, because a lot of repayment has been occurring in June and July throughout the country—is still a substantial sum of money. If one argued that all of it will be repaid, one can argue it is merely an accounting problem in which year the money falls, therefore, which year suffers the deficit and which suffers the surplus.

My fear, frankly, is that a lot of this money will not be repaid. It will be delayed, perhaps, with the distinguished Senator from North Dakota coming before the body again. However, there may be other Senators suggesting there are great problems.

Mr. President, I ask that I might have 3 more minutes.

Mr. BOREN. I yield 3 more minutes.

The PRESIDENT pro tempore. The Senator is recognized for 3 additional minutes.

Mr. LUGAR. I fear that the argument will be made that the same farmers that had problems at that stage still have them. Why not? If a Senator has had success in delaying the repayment several times already, why not try it out again for the fourth, fifth, or sixth time? How many times is this body to be visited with the problem of 1988 deficiency payments for barley? I say, Mr. President, I hope not again.

I think that the occasion is at hand in which we are noticing a good year of crops, not only in North Dakota but in Indiana and in many States of our country. We pray that will continue to be the case. We pray we will not be visited with drought, disaster, and flood, that there will be the wherewithal to make repayments, as almost all farmers would prefer to do.

Therefore, Mr. President, I do not know at what point we shall vote on the question, or whether we shall have further debate or further accounting information in front of us. All of that is still to be decided. As the amendment stands, I oppose it. I ask the Senate to resolve the issue finally, once and for all, and to put behind us the 1988 crop year.

I yield the floor.

Mr. CONRAD addressed the Chair.

The PRESIDENT pro tempore. The Senator from North Dakota is recognized.

Mr. CONRAD. Mr. President, I yield myself 3 minutes.

The PRESIDENT pro tempore. The Senator is recognized for 3 minutes.

Mr. CONRAD. Mr. President, I ask unanimous consent to add Senators BURDICK, BAUCUS, and BURNS as original cosponsors of the amendment.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CONRAD. Mr. President, the Senator from Indiana has advanced a number of interesting arguments in opposition. I must say there are very few in this body for whom I have more respect than the Senator from Indiana. He is one who always does his homework, and I think he is very level-headed in the way he goes at these issues. In this one particular instance, I think perhaps he is a bit mistaken, but I certainly respect the difference.

Let me just say, Mr. President, we are not asking for forgiveness here. We are asking, basically, for a payment schedule. This is not some thing that is unusual or unique. In fact, it is in the law now. Past Congresses have seen the wisdom of allowing a payment schedule under unusual circumstances, and I assert that this is one of them, a situation in which we had absolutely devastating drought in this country in 1988 and 1989. In my State,

even with the payments that the Senator from Indiana referenced, even with hundreds of millions of dollars of payments, North Dakota's farm income was cut in half. That is how devastating the drought was in my State, and my State was not alone.

Mr. President, we are simply asking that what is already law be invoked. I must ask, under what circumstances would we invoke this law if not now, if not under this set of facts? My goodness, this is a devastating loss. Prices skyrocketed, but farmers did not have the production to sell. So they were forced to have advance payments repaid, when they had no money to make the repayments.

Now what we are saying under this amendment is, please, give us time; we will pay, but give us time.

Again, Mr. President, I ask unanimous consent that we hold off voting on this amendment until we have the most recent information and, hopefully, have time to work something out here, and that we leave 20 minutes of debate, 10 minutes on each side, for action on this at a later time.

The PRESIDENT pro tempore. Is there objection? The Chair hears no objection. It is so ordered.

Mr. CONRAD. I thank the Chair and yield the floor.

Mr. BOREN. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, when we discuss a farm bill, there are a lot of things related to the prosperity of agriculture that does not deal directly with price supports and things like that. In the committee report there is considerable discussion of the subject of cargo preference. There is considerable discussion of the subject of the negotiations going on in Geneva under the General Agreement of Tariffs and Trade. I want, for a few minutes, without offering an amendment, to discuss some of these issues at this point.

Mr. President, every time we try to engage in a discussion of cargo preference, maritime supporters come running in with the argument that since farmers get a subsidy, so should our seafarers and ship owners. After all, we are told, fair is fair. What is good for the goose is good for the gander.

Let me make it perfectly clear that I am quite willing to support maritime programs, but only if they prove to be reasonably related to the goals and policies upon which they rest, and only if they prove to be reasonably successful. Our maritime policies fail on both accounts, and I will explain what I mean by this very fully.

The problem with cargo preference is even far more perverse. Cargo preference is a hidden, back-door cost that rarely can be scrutinized by budget-deficit sensitive Members of Congress. It is one of those hidden items in the budget. You try to pick it out and you just cannot pick it all out.

Cargo preference is unaccountable and virtually untraceable. Cargo preference allows U.S.-flag operators a monopoly over certain government cargoes. They can charge Uncle Sam as much as they want with no fear of competition from far cheaper, more competitive foreign-flag vessels.

So let me say at the outset that I would be very happy, and am happy, to support the maritime industry, if they are willing to replace cargo preference with a subsidy program that requires the maritime interests to come to Congress every year to justify their costs and a program that renders itself to simple, clear accountability year in and year out. It is a little bit like the farmers of the United States of America who have to come to Congress to get some of their programs appropriated on a year-to-year basis and we have a way of keeping track pretty closely to the exact cost of those farm programs to the taxpayers. Not so with the maritime subsidy.

So how else can Congress and the administration determine whether or not our maritime programs are worth what they cost unless they are fully accounted for and fully appropriated subject to debate from year to year.

So, as far as this Senator is concerned, fair is fair, and I am willing to work toward that end.

But in view of what I have been reading recently from maritime interests, I have to wonder if they are really interested in fairness and equal treatment.

It has been no secret that for the last few years the United States has been leading the charge in the Uruguay round of General Agreement of Tariff and Trade, or GATT for short, and we have been doing this against the unfair domestic and export farm subsidies as well as protectionist trade barriers of our competitors.

Mr. President, U.S. farmers are the most productive and competitive in the world. On the average, one American farmer produces enough food and fiber for 123 people, 98 in the United States and 25 overseas. Our farmers believe, and rightfully so, that if all the unfair trade barriers and subsidies were eliminated, they could compete with anybody in the world. What they cannot compete with, however, are the treasuries and unfair protectionist policies of foreign governments.

Therefore, American farmers have been supportive of our efforts in the GATT to put these subsidies and policies on the table. I know that our farmers have not been willing to trade them for the income protections provisions, but I am talking about the European Community export subsidies with which we now have to compete. They know that if we succeed, American farmers will be better off; they know as well that the cost of farm programs to the U.S. Treasury will be less. There will not be the need for programs such as the Export Enhancement Program which the maritime union officials erroneously criticize as a ripoff for exporting companies.

But when it comes to GATT, the maritime industry cries out that it is special, that its subsidies and protectionist policies should not be left on the GATT table for negotiation at Geneva.

In one breath maritime supporters argue that they, too, prefer free and fair trade, but that the foreign governments with their policies and subsidies do not allow this ideal.

But in the next breath, maritime interests cry out that maritime problems relating to subsidies and policies must not be negotiated at GATT.

So, I say to them that you cannot have it both ways. If you truly want a free and fair trade, like American farmers want, where else besides GATT are you going to resolve these problems?

Mr. President, let me quote to my colleagues an editorial from the March 1990 edition of the American Maritime Officer, the official publication of District 2 MEBA-AMO of the AFL-CIO's Maritime Trades Department:

> If the international bulk shipping market were indeed free and fair, District 2 MEBA-AMO would encourage open competition. * * * But the fact is that foreign governments protect their bulk fleets, while the U.S. does not—direct and indirect subsidies, commercial cargo reservation, and state ownership—put the struggling American-flag dry bulk fleet at a built-in disadvantage.

Mr. President, if the maritime unions honestly, truly wanted a free and fair international shipping market with open competition, they would be demanding that the U.S. GATT negotiators put the maritime problems at the top of the priority list, so that there would be bargaining as far as maritime interests were concerned in Geneva just like they are bargaining on agricultural subsidies in Geneva.

But is this what they are pushing? No way whatsoever. They are demanding just the opposite. They want all maritime discussions to be taken off the GATT table.

The July 9, 1990, edition of the American Maritime Congress reported that 46 Senators had agreed to sponsor Senate Concurrent Resolution 63, a concurrent resolution calling upon the President to remove maritime

from the GATT negotiations. In view of the fact that our farm interests are so prominently debated at the GATT, I was surprised to see that a handful of farm State Senators would lend their support for special treatment for maritime.

Mr. President, I ask unanimous consent to print in the RECORD this article to which I referred.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[American Maritime Congress Washington Letter, July 9, 1990]

SUPPORT GROWS FOR BREAUX RESOLUTION TO EXCLUDE MARITIME FROM GATT

(July 5) Senate support for the exclusion of maritime from the services section of the General Agreement on Tariffs and Trade (GATT) is growing as negotiations reach a critical stage. Forty-six Senators have agreed to sponsor S. Con. Res. 63, introduced by Senator John B. Breaux (D-LA), chairman of the Senate Commerce, Science and Transportation Committee's Subcommittee on Merchant Marine.

S. Con. Res. 63 calls upon the President to remove maritime services from the General Agreement of Tariffs and Trade (GATT) negotiations. The co-sponsors of the resolution agree that the inclusion of maritime in GATT would have a devastating effect on the U.S.-flag Merchant Marine.

The resolution declares that ". . . a strong and economically healthy United States-flag merchant marine has been encouraged and promoted since the founding of this Nation to provide essential service to the national defense of the United States, and to promote our commerce in foreign and domestic markets." A draft text of the services section of GATT is scheduled to be completed by the end of July.

The Senate sponsors now are follows: Brock Adams (D-WA), Daniel K. Akaka (D-HI), Joseph R. Biden, Jr. (D-DE), John B. Breaux (D-LA), Richard H. Bryan (D-NV), Dale Bumpers (D-AR), Quentin N. Burdick (D-ND), Thad Cochran (R-MS), William S. Cohen (R-ME), Kent Conrad (D-ND), Alan Cranston (D-CA), Alfonse D'Amato (R-NY), Dennis DeConcini (D-AZ), J. James Exon (D-NE), Wendell H. Ford (D-KY), John Glenn (D-OH), Albert Gore, Jr. (D-TN), Slade Gorton (R-WA), Bob Graham (D-FL), Tom Harkin (D-IA), Mark O. Hatfield (R-OR), Orrin G. Hatch (R-UT), Howell Heflin (D-AL), Ernest F. Hollings (D-SC), Daniel K. Inouye (D-HI), J. Bennett Johnston (D-LA), Frank R. Lautenberg (D-NJ), Carl Levin (D-MI), Joe Lieberman (D-CT), Trent Lott (R-MS), Connie Mack (R-FL), John McCain (R-AZ), Howard M. Metzenbaum (D-OH), Barbara Mikulski (D-MD), Frank H. Murkowski (R-AK), Claiborne Pell (D-RI), David Pryor (D-AR), Harry Reid (D-NV), Donald W. Riegle, Jr. (D-MI), Charles S. Robb (D-VA), Jay Rockefeller (D-WV), Jim Sasser (D-TN), Paul S. Sarbanes (D-MD), Richard C. Shelby (D-AL), Paul Simon (D-IL), and John Warner (R-VA).

Mr. GRASSLEY. So, it appears, Mr. President, "what's fair is fair, what's good for the goose is good for the gander," really does not apply to the agriculture and maritime situation.

What Senate Concurrent Resolution 63 suggests is that some in Congress believe that a few thousand American seafarers are more important or more special, than America's millions of farm families.

But, of course, maritime supporters will argue, as it states in this resolution that "a strong and economically healthy U.S.-flag merchant marine has been encouraged and promoted since the founding of this Nation to provide essential service to the national defense of the United States, and to promote our commerce in foreign and domestic markets."

My response to that is, "So what?"

If our maritime industry is so important to national defense and foreign commerce, is that not all the more reason to fight unfair, damaging foreign maritime policies at this very moment during the GATT discussions so that our maritime industry has a level playing field with the industries in other countries? In other words, would not our maritime industry be better off if there were not subsidies of other foreign countries of their maritime industry? I would suggest what do we have to lose?

Our maritime programs and policies have been a colossal failure in meeting our national defense and foreign commerce objectives. Everyone knows that is the truth. The facts don't lie. Simply look at the fruits of our maritime policies during the last 40 years.

In 1950, our U.S.-flag fleet consisted of 1,050 vessels. Today, there are only about 360, and fewer than 200 of those are considered to have any military usefulness.

In 1950, we had 56,629 U.S. seafaring jobs. Today, there are fewer than 10,000.

If our U.S.-flag maritime sector is truly important to national security, you sure wouldn't know it from what has been produced by cherished maritime subsidies like cargo preference.

Maritime supporters in Washington should be clamoring to keep maritime on the GATT table to aggressively pursue a resolution of these problems. Maritime supporters should be clamoring to revamp the entire maritime government support mechanisms to eliminate cargo preference and replace it with a system where cost effectiveness can readily be assessed.

But that is not what is happening because people supporting these programs would like to have the arguments go away, would like to have the discussion go away. Instead, we get resolutions insisting on continued protectionist policies and more bills calling for more of the same—more cargo preference, more operating differential subsidies—and thus unfortunately, if history of the last 40 years is any evidence, continue these same Federal programs that unfortunately lead to more decay of the U.S.-flag fleet.

The objective of promoting foreign commerce has met similar, miserable failure. And again, the facts do not lie.

Since 1950, when we had those 1,050 vessels that I referred to and those 56,629 seafaring jobs sailing under the U.S.-flag, our American-flag merchant marine carried 43 percent of the volume of U.S. foreign trade.

Today, U.S.-flags carry less than 4 percent of our foreign commerce.

Thank goodness, the development of our foreign commerce did not depend upon U.S.-flag vessels and our maritime policies, because we would be an utter failure as a trading nation. We would be an utter failure as far as international trade is concerned.

From 1950 to 1985, our foreign trade skyrocketed from 117 million metric tons to 641 million metric tons. Our foreign commerce has thrived in spite of our merchant marine policies.

Since our maritime programs have failed miserably to promote national defense and foreign commerce, why have we allowed them to perpetuate this decay?

Unfortunately, a lot has to do with the political clout of the maritime union bosses whose aim is to protect the high-priced salaries of their seafaring union members.

So I was encouraged by some remarks I read by the former commander of the Military Sealift Command. His name was Vice Adm. Kent Carroll. He warned us that the outrageously high wages and benefits of U.S.-flag seafarers were crippling our U.S. merchant marine. He was quoted in the Defense and Foreign Affairs Daily as stating:

Why are we in such a mess? * * * One of the reasons is that U.S. crew costs continue to be the highest in the world. Monthly crew costs of U.S.-flag ships are as much as three times higher than those of countries with comparable standards of living, such as Norway. * * *

Vice Admiral Carroll once testified before the House Armed Services Subcommittee on Seapower that it took over $300,000 per year to support the master of some U.S.-flag commercial vessels, while in sharp contrast it took about $70,000 per year to pay the salary and benefits of a U.S. Navy aircraft carrier captain.

The vice admiral's warning about the crippling effect that the high priced cost of U.S.-flag seafarers was having on our national defense and foreign commerce needs fell at that time on deaf ears. And I hope that they do not fall upon deaf ears today because we should not be ignoring this problem any longer.

In the meantime, the maritime unions brag of their successes in negotiating even higher wage and benefit packages. Well, of course, that is the point of union negotiation. You cannot blame them for trying to get all that they can.

The June 1990 edition of the Seafarers Log, reported that Seafarers International Union was able to secure a

new contract guaranteeing them a 15-percent increase over the next 3 years, plus a cost-of-living increase during the 2d and 3d year of the contract for anything over 5-percent inflation. Furthermore, they were able to keep the high manning crew numbers. The U.S.-flag maritime operators had tried to hold the seafarers to a 6-percent increase over 3 years with a reduction in crew sizes. No luck there.

The seafarers bragged in their publication that this new contract exceeded the national average of wage increaes negotiated by unions around the country which averaged 3.3 to 3.8 percent annually.

But, as long as they can depend upon the taxpayers to foot the bill through hidden subsidies like cargo preference, who cares? Right? Mr. President, one final word about GATT and this fairness issue between farm programs and maritime programs. With the passage of the 1985 farm bill, Congress included language stating that Congress finds and declares that "a productive and healthy agricultural industry and a strong and active U.S. maritime industry are vitally important to the economic well-being and national security objectives of our Nation."

Again, I ask, since Congress thinks both are equally important to our economy and defense, why does maritime believe they should be excluded from GATT, while our farmers know it to be in their interests to fight protectionist policies at the GATT?

Mr. President, the evidence is clear. The fight to protect and expand cargo preference has nothing to do with national defense or the health of U.S. foreign commerce. It has nothing to do with fairness.

It has everything to do with protection of a gravy train for high priced union bosses and their seafaring members. The Des Moines Register said it best when it recommended:

> Scuttle cargo preference. Its alleged purpose is to keep a U.S. merchant marine intact in case of war, but the subsidy has more to do with political power and PAC donations of shipowners and maritime unions than any real military need.

Common Cause was very much involved in this issue in the 1970's. Common Cause argued that Americans should be protected from the maritime interests attempts to apply cargo preference to oil imports which would have shot up gasoline and heating costs even higher. We ought to thank Common Cause for their help in keeping oil imports free of the cargo preference requirement.

But we have not heard too much from Common Cause since then while efforts have been made to expand cargo preference to apply to additional Government cargo and foreign case assistance, and recently even to the grain that we sell to the Soviets.

Mr. President, hopefully it is not too late to keep maritime on the GATT table, just like we are keeping agriculture on the GATT table, but the President needs to know the facts and needs to know that not all Members of Congress agree with Senate Concurrent Resolution 63.

I yield the floor.

Mr. THURMOND addressed the Chair.

The PRESIDENT pro tempore. The Senator from South Carolina [Mr. THURMOND].

Mr. THURMOND. Mr. President, as debate continues on S. 2830, the Food, Agriculture, Conservation, and Trade Act of 1990, we must remember how important the farmer is to this great Nation. Although farmers account for only about 3 percent of the total population of this country, they have the responsibility of working to feed the total population of our country. While they represent a small segment of the population, their contribution to society is absolutely vital and one on which we all depend.

Nationally, there are over 2 million farms with nearly a billion acres of farm land in production. Of all the industries in the United States, agriculture is the largest. Nearly 21 million people, or almost 19 percent of the work force of this country, are employed in agriculture. Agriculture contributes nearly one-fifth of our gross national product.

In my home State of South Carolina, agriculture is the third largest industry in terms of cash receipts, behind textiles and tourism. In 1985, farm income was $151 million for South Carolina. The 1982 Census of Agriculture reports that 29 percent of the land area of the State was used for crop production. Further, there are 24,929 farms which plant almost 5.6 million acres. Approximately 57 percent of this acreage was cropland, 34 percent was woodland, and 9 percent was in miscellaneous usage such as house and barn lots, roads, as well as ponds.

Having grown up on a farm in Edgefield, SC, I know firsthand the long hours and hard work required to produce a crop. Daily, these dedicated men and women must labor in the fields from dawn until dusk in good weather and bad. The nature of their business requires farmers to be the biggest gamblers in the world. The farmer is no stranger to adversity. They must face risks which are unlike any faced by other businesses. They are susceptible to the unpredictable whims of nature. Without any warning, an entire season's crop can be wiped out by drought, flooding, freezing temperatures and pest infestations in a matter of hours. In spite of these hardships, they continue to work to raise our food and fiber.

Agriculture has been an integral part of the Nation's economy since its beginning. In 1987, the Nation celebrated the 200th anniversary of the signing of the Constitution. Thirteen of the thirty-nine signers of the Constitution depended on agriculture for their livelihood. For over 200 years, farmers have remained the backbone of our country.

The bill we are considering today recognizes the important role that agriculture continues to play in our economy. It includes changes in farm, environmental, and consumer policy. Although this bill includes many improvements, there are issues about which concerns have been expressed. I look forward to continuing the debate on this important measure.

Mr. President, I learned the following quote in my studies of agriculture at Clemson University, from where I graduated, which eloquently expresses the importance of agriculture:

> At the head of the arts and sciences, at the head of civilization and progress, stands not militarism, the science that kills, nor commerce, the art that accumulates wealth, but agriculture, the mother of all industry and the maintainer of all human life.

Mr. President, I yield the floor.

The PRESIDENT pro tempore. The Senator from Nevada [Mr. REID] is recognized.

AMENDMENT NO. 2331

Mr. REID. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDENT pro tempore. The clerk will state the amendment.

The assistant legislative clerk read as follows:

> The Senator from Nevada [Mr. REID], proposes an amendment numbered 2331.

Mr. REID. Mr. President, I ask unanimous consent that reading to the amendment be dispensed with.

The PRESIDENT pro tempore. Without objection, further reading of the amendment will be dispensed with.

The amendment is as follows:

> At the end of the bill add the following:
>
> SEC. . FINDINGS AND POLICY.
>
> (a) FINDINGS.—The Congress finds that—
>
> (1) The LD50 test is an acute toxicity test on animals which has been shown to be inaccurate, misleading, and unnecessary in product testing;
>
> (2) other tests have been developed which are less costly, more humane, and more accurate;
>
> (3) nonanimal alternatives have been developed for other acute toxicity tests using animals;
>
> (4) the Federal Government has encouraged the use of the LD50 test and other animal acute toxicity tests through regulations which mandate their use, encourage their use, or do not prescribe other less costly, more accurate and humane alternatives;
>
> (5) private industry is reluctant to use other tests without encouragement from the Federal Government; and

(6) private industry and the consumer will benefit from the promotion of alternative methods of testing when these alternatives are more accurate and humane than animal tests.

(b) POLICY.—Federal departments and agencies shall encourage the development and use of product testing procedures which accurately reflect human reactions to products, including consumer products and products containing hazardous or toxic substances, but which do not rely upon animal models.

SEC. . FEDERAL ACTION.

(a) PROHIBITION OF USING LD50 Test for Product Safety, Labeling, and Transportation Requirements.—Effective 1 year after the date of enactment of this Act, Federal department or agency heads may not consider LD50 test results when determining product safety, labeling, or transportation requirements for the purposes of Federal regulation.

(b) REGULATIONS CONCERNING TESTS OTHER THAN ANIMAL TOXICITY TESTS.—(1) Not later than 1 year after the date of enactment of this Act, each Federal department or agency head shall—

(A) review and evaluate any regulation, guideline, or recommendation issued by that department or agency which requires or recommends the use of an animal toxicity test for the purpose of pre-market evaluation of the relative acute toxicity of a product; and

(B) promulgate regulations which specify that nonanimal toxicity tests be used instead of animal toxicity tests, unless that Federal department or agency head determines that in certain limited cases the nonanimal toxicity test has less validity than the animal toxicity test.

(2) If a determination is made that a specific nonanimal toxicity test is less valid than an animal toxicity test, the appropriate Federal department or agency head shall publish in the Federal Register an explanation of all options considered and the justification for continuing the animal toxicity test, which shall be subject to public comment before a final regulation is promulgated.

(c) PERIODIC REVIEW OF ANIMAL TOXICITY TESTING REGULATIONS.—At least every 2 years (beginning 3 years after the date of enactment of this Act), each Federal department or agency head, after considering the most recent technological advances available, shall determine whether continued use of any animal toxicity test is justified. If a Federal department or agency head determines that such a use is justified, then that Federal department or agency head shall publish in the Federal Register an explanation and justification of such continued use, which shall be subject to public comment.

SEC. . DEFINITIONS.

For purposes of this Act—

(1) ANIMAL.—The term "animal" means any vertebrate.

(2) ANIMAL TOXICITY TEST.—The term "animal toxicity test" means an animal model acute toxicity test including (but not limited to) the Draize eye or skin irritancy test, approximate lethal dose test and the limit test.

(3) FEDERAL DEPARTMENT OR AGENCY HEAD.—The term "Federal department or agency head" means the head of a Federal department or agency who—

(A) has authority to promulgate regulations, guidelines, and recommendations with respect to procedures to be used in the testing of products, including consumer products, veterinary products, and products containing hazardous or toxic substances; or

(B) licenses or approves products, labeling requirements for products, or the transportation of products based on the results of these tests.

(4) NONANIMAL TOXICITY TEST.—The term "nonanimal toxicity test" means a nonanimal model acute toxicity test including (but not limited to) cell culture, computer modeling, protein alteration, and chorioallantoic membrane techniques.

The PRESIDENT pro tempore. The Senator from Nevada [Mr. REID] is recognized.

Mr. REID. Mr. President, this amendment that I have just sent to the desk is comparable to a bill that has been introduced on several occasions in the Senate. There is presently a bill pending that has been cosponsored by Senators JEFFORDS, WIRTH, COHEN, BURDICK, and AKAKA.

The amendment I am offering today encompasses the provisions of S. 891, which is entitled the Consumer Product Safety Testing Act. An identical bill has been introduced in the other body on many occasions. As we speak, H.R. 1676 is pending in the House with more than 100 cosponsors.

The purpose of my amendment is to encourage modernization of consumer product testing. First of all, the amendment precludes Federal agencies from accepting the results of the lethal dose 50 test, an outdated and unreliable test. Second, this bill calls upon Federal agencies to review regulations, some of which are decades old, and to substitute nonanimal for animal tests in situations in which the nonanimal test would protect humans equal to or better than the animal methodology.

The bill does not mandate any changes not endorsed by the regulatory agencies. It does not place restrictions on medical research. I repeat, this amendment places no restrictions on medical research or places any substantial economic burden on industry or Government.

What then is the lethal dose 50 test, the LD50 test? Mr. President, the test is easy to say, LD50, but is horrible and gruesome to consider. In the LD50, rabbits and other laboratory animals are force-fed poisons and other chemical substances until 50 percent of them die. That is the LD or lethal dose 50, a needlessly cruel lab test. What are they force-fed? Drain stoppers, all kinds of things for cleaning ovens, for cleaning toilets—anything you can imagine, these animals are force-fed until half of them die.

But LD50 is not just inhumane, Mr. President; it is scientifically suspect and unreliable. According to an Office of Technology Assessment report on animal testing alternatives—and, by the way, this report is 5 years old—the LD50 test has poor reproducibility. In other words, the results cannot be duplicated or confirmed in another laboratory. This is one of the foundations of sound, reliable scientific research. The Office of Technology Assessment also concluded: "The results are difficult to extrapolate to humans because there are so many mechanisms by which death could occur."

We cannot even be sure, Mr. President, what the LD50 test means to the people who use and buy the products being tested. The Consumer Product Safety Commission has stated that it has a policy to discourage the classical LD50 test. The Food and Drug Administration and the Environmental Protection Agency have both stated that they do not require or encourage the continued use of this test.

In 1984, the chairman of the Medical Research Modernization Committee called the LD50 test an anacronism. The World Health Organization toxicology consultant considers the LD50 test to be a "ritual mass execution of animals."

But 5 years later, after the Office of Technology Assessment has done their work, we are still using this outdated, behind-the-times study because the written regulations have simply not changed in that 5-year period of time. Industry believes that existing guidelines make animal testing necessary for market approval and protection in liability suits. As long as the Federal Government refuses to change the rules, companies will fail to use or create more effective tests.

My amendment attempts to break this logjam, to encourage innovation and accuracy in product testing. Companies will be able to pursue the use of more effective and more humane methods.

Critics will claim that valid alternatives do not exist. Considerable progress, though, has been made to render the Draize eye irritancy test—another test often referred to as the rabbit blinding test—extinct.

In the Draize test, high concentrations of irritants are squirted into the eyes of rabbits. The rabbits endure excruciating pain. Reports indicate, Mr. President, that rabbits cry like human babies during this painful procedure. The irritants squirted into the open eyes of these rabbits could be pesticides, cosmetics, or other irritating chemicals. The drops are applied until the rabbits' eyes are painfully swollen. At the end of the Draize test, the rabbits are killed. I might add, Mr. President, at that time death is merciful.

Draize test alternatives have already been developed by the private sector. Last year, for example, Avon Corp. discontinued the Draize test and is now using something called Eytex, a nonanimal alternative toxicity test that the company validated for its products as part of its product safety evaluation program.

Other companies, including Mary Kay, Amway, Revlon, and Faberge have dropped animal testing to verify the safety of their products.

The protection of human health is also of paramount concern, but I do add, Mr. President, that if these major companies about which I have spoken have given tests to the necessary governmental agencies that satisfied those agencies, certainly others should follow suit.

The Federal Government should be setting a better standard and advance safety product testing. For example, right now, Mr. President, in at least six States throughout the Nation, legislation has been introduced like this. We should set a better example and not have this done on a hodgepodge basis throughout the various States.

A letter from a California assemblyman—this letter was written to Congressman HENRY WAXMAN—outlines the problems that State legislatures face surrounding the problem of the use of animals in acute toxicity testing. Assemblyman O'Connell wrote:

The issue of the use of animals in acute toxicity tests was recently brought before the California assembly. This specific bill sought to criminalize the use of the Draize or LD50 skin irritating test for the purpose of testing consumer or household products. This legislation arose out of frustration with the lack of initiative on the part of industry to change from animal to in vitro acute toxicity testing where possible without sacrificing human health and safety. As recently exemplified by Avon's initiatives, industry is capable of significant changes in this area.

The assemblyman continued:

The bill failed in large part because of confusion over the Federal Government's role in determining the safety of cosmetics and household products and the Government's continued support for the Draize test despite a lack of initiative to validate new technologies.

We need to give some direction to the various States. It can be done by adopting this amendment.

This amendment calls upon Federal agencies to review these regulations regarding animal toxicity tests, and if nonanimal alternatives exist—I repeat, if nonanimal alternatives exist—to substitute these alternatives. It is not fair to the consumer to continue using such tests, especially, if viable alternatives exist.

Mr. President, without Federal guidance to the contrary, companies conducting LD50—remember, it stands for lethal dose 50—and the Draize test will stick to the tried and true. But these tests have proven to be less than true. They have been tried, but they have been proven to be less than true. These tests are certainly cruel, and they are also certainly unreliable.

When it comes to product safety, we cannot afford these half-truths. These tests fail miserably where it counts the most—on humanitarian and scientific grounds. The U.S. Congress is the appropriate forum for initiating change in this area. This modest amendment will do nothing more than require agencies to review scientific progress. In the name of product safety, consumer safety, and scientific integrity, I urge adoption of this amendment.

I want to repeat, Mr. President, that this amendment does not deal with medical research. I quote from a statement made by my colleague in the hearings that took place on the bill in the Senate. Congresswoman BARBARA BOXER testified before the Senate Commerce Committee as follows:

I would like to add that claims that this legislation will force all animal testing to a grinding halt are patently misleading and irresponsible. This bill is directed specifically at toxicity testing of consumer products and in no terms involves biomedical research.

Additionally, while this bill bans use of the classical LD50 test in the first part, animal toxicity tests may continue to be required and the results accepted provided that they are justified.

I also direct the Senate's attention to a statement that will, I am sure, be brought up, that this is not the right place to do it. Maybe there should be more hearings held.

I submit that, first, this legislation arose in 1985 at the same time that the Office of Technology Assessment was asked by Senator ORRIN HATCH to make a determination as to how these products are used and should be used, and how these tests are used and should and should not be used. That was in 1985.

In that year, H.R. 1877 was introduced. In that year in the House, there were 105 cosponsors. In 1987, H.R. 1635 was introduced again by Congresswoman BOXER. Then there were 112 cosponsors in the House. At this time, the bill was referred to the House Subcommittee on Health, where it died, and at that same time I introduced S. 2814. There was no hearing held on it.

Again, I introduced H.R. 1676, not in the 100th Congress, but in the 101st Congress, and that matter is now languishing in committee. During the 101st Congress in the House, a bill was introduced by Congresswoman BOXER, and now there are 123 cosponsors, as of the last date, on that legislation.

So, Mr. President, I think it is time we acted on this legislation. The claims as to it being something that would interfere with medical testing are simply not valid.

I ask that this matter be overwhelmingly supported by this body.

Mr. President, parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state his parliamentary inquiry.

Mr. REID. It is my understanding this amendment is proceeding under a time agreement of 1 hour. Is that correct?

The PRESIDENT pro tempore. There is no time agreement on the Senator's amendment.

Mr. REID. There is no time agreement. I yield the floor.

The PRESIDENT pro tempore. Who seeks recognition?

Mr. LUGAR addressed the Chair.

The PRESIDENT pro tempore. The Senator from Indiana [Mr. LUGAR].

Mr. LUGAR. Mr. President, I rise in opposition to the amendment of the distinguished Senator from Nevada. I commend him for his thoughtful explanation and sense of humanity and compassion that certainly motivates this amendment.

Mr. President, the basic dilemma that many scientists face is that while nonanimal testing has progressed substantially, there is not overwhelming confidence in nonanimal tests. This is a simple way of stating what can be said in much more complex fashion, but this is the dilemma.

The amendment of the Senator simply states that the LD50 test, 1 year after enactment of this amendment, will not be recognized.

I state specifically: Effective 1 year after the date of enactment of this act, Federal department or agency heads may not consider LD50 test results when determining product safety, labeling, or transportation requirements for purposes of Federal regulation.

Mr. President, the distinguished Senator has pointed out the Commerce Committee has received this legislation and the comparable House committee has received the legislation. Those committees have apparently had hearings, and not acted on this amendment.

The amendment arises in this farm bill context I suspect because some of the tests involve pesticides, insecticides, and various chemical situations that are part of agriculture.

The Senator has mentioned specifically cosmetics, and the fact that in some cosmetics testing something other than animal tests appear to work effectively. I would commend those who are doing that testing to use in every instance, if those tests are effective, other than animal tests.

But we are advised by the relevant governmental agencies that are involved in testing of all sorts—FDA, the Food and Drug Administration, the EPA, Environmental Protection Agency, and the Department of Commerce—of deep concern about this amendment because of its broad-brush approach. If 1 year after enactment of this amendment LD50 tests can no longer be utilized—that is a very severe and broad-brush stroke of all the testing being then done, much of it are very relevant to human health and safety.

I am simply advised that with regard to pesticide testing in particular there

is not confidence that the effects upon human beings can be foretold with the same degree of certainty that animal testing now gives in their so-called nonanimal testing mode.

I suggest that the amendment prophesied that progress will be made at a fairly rapid rate across the board in terms of this testing. Many Senators pray that would be so. But there does not appear to be substantial evidence that that will occur, and 1 year is a fairly short-term time for this complex evolution.
